So far as concerns there being any world agreement with regard to sugar, the Senator must know as well as I do that these so-called conventions are founded upon existing tax laws, and when the tax laws are abolished and the whole world is permitted to refine sugar from Cuba and the Danish possessions, as well as from the balance of the world, those conventions can not be upheld and continued.

Mr. LODGE. Mr. President, we are not in that convention. That was a convention made by the beet-sugar producing countries of Europe. They were finally forced into it by Great Britain, which began to see the direction in which bounty-fed sugar was leading her. I have not any question that the rates of wages in foreign refineries are more than they are here; but as to the business of refining sugar, of course what our sugar refineries deal with is the raw sugar, imported, in the main, from Cuba. They take that raw sugar and refine it here; that is all they do. Their source of supply is near at hand; there are only three of them in the field; they are in close connection with the sugar interests abroad; and I think it will be found that they will remain in control of the market; I have not any question that they will. I do not believe for one moment that they would advocate free sugar if they did not think it was for their profit. I do not think it would be quite as profitable to them as very low duty.

Mr. WILLIAMS. I notice the Senator uses the plural pro-noun and says "they." I believe the evidence shows that the Federal Refining Co. advocated free sugar and the American Refining Co., generally known as the Sugar Trust, testified that

they were opposed to it.

Mr. LODGE. No; none of them were opposed to it. The American Sugar Refining Co. did not meddle at all. Arbuckles took occasion to write me a letter, after I drew the report on the last tariff bill, to say they were earnestly for it. I am certain the American Sugar Refining Co. desire the reduction. I believe a very low duty would suit them a little better, but I think they can get along without a very low duty.

Mr. WILLIAMS. My impression was from the testimony

and what they said that the American Refining Co. and Arbuckles wanted a very low duty on raw sugar and a reduction on refined sugar, with a differential that would render them

secure.

Mr. LODGE. Oh, yes; that is an ideal situation, but they are practical men and they are anxious to get the best they can, and the best they can get is free sugar. Of course, in the early days, the American Sugar Refining Co., being alarmed and knowing what was happening, started in to get a large interest in the beet-sugar industry for their own protection. At one time they owned nearly half the stock in many of the refineries. Either because they found it was impossible to continue that policy, or because of late years they had hopes of better arrangements for themselves, I think they have not of late pursued it, but, of course, it would be of profit to them to close all the beet-sugar refineries which are now scattered through the West and supply the local market and have the benefit of freight protection against the refined sugar of the eastern refineries.

I can not see, Mr. President, that this can be of any benefit except to the refiners. It leaves them without a domestic competitor; it leaves them to take full advantage, as they did in 1911, of any temporary shortage and keep it up. In those four months of that shortage the refineries made more money just on that turn than was made by all the beet-sugar factories in the country. They have this great control. Two of them are They are just as called independents. One is called a trust. like as three peas in a pod, there is no difference, they are equally interested, and they are equally determined to get just as much for their sugar as the traffic will bear. They have made this agitation simply because they thought there was money in it. The repulsive thing about the Federal Sugar Co. is the hypocrisy of their whole campaign.

Now, Mr. President, I wish to say a word in closing.
Mr. BRISTOW. Mr. President—
The VICE PRESIDENT. Does the Senator from Massachu-

setts yield to the Senator from Kansas?

Mr. LODGE. Certainly; with pleasure.
Mr. BRISTOW. Speaking of the Federal Sugar Refining
Co., the Senator from Massachusetts will remember that this

Cents per pound.

year, indeed at this very time, I do not have in mind the exact quotation, but I have it up to within a week, that company is charging about 40 cents a hundred pounds more for refined sugar than it did last March, though it is not paying any more for raw sugar at all.

There is no beet sugar on the market now, and they simply put up the price 40 cents a hundred pounds higher than it was then, although they are paying exactly the same for their raw

Mr. LODGE. I do not in the least blame the man who is engaged in the business for making as much profit as he honestly can on the product which he manufactures; but when he travels down here and spends thousands and thousands of dollars in getting up imaginary associations and sending out circulars on the ground that what he wants to do is not to make money, but to help the consumer and make sugar cheaper to the people on whom he raises the price the instant he gets a chance-that

phase of the thing, I think, is simply repulsive.

I wanted to speak of the effect on trade and commerce, something which I think is a good deal overlooked. In three years sugar goes on the free list under this bill. The Cuban treaty becomes valueless to the Cubans and they undoubtedly will give us notice and the treaty will be abandoned. I take the figures for 11 months. They are not the figures for a year. The trade with these islands has not been as good during the past year as it was the previous year. I will take the 11 months from June 30, 1912, to May 31, 1913. There has been some falling off. One hundred and twenty million dollars were the imports from Cuba, almost all sugar. Our exports to Cuba were \$61,000,000. Our total trade with that island was \$181,000,000.

With Porto Rico, that small island of our own, our imports were \$42,000,000 in 1912, our exports \$37,000,000, making a total of \$80,000,000. For the 11 months ending May 31 of this year the imports from Porto Rico were \$35,000,000, the exports \$29,000,000; in all, \$65,000,000 was our trade with Porto Rico

for the 11 months.

Our total trade with Austria-Hungary for an entire year was only \$45,000,000, and the trade of the little island of Porto Rico alone with this country is \$20,000,000 more than the trade with Austria-Hungary; it is \$20,000,000 more than our trade with Spain; it is \$23,000,000 more than our trade with Russia.

Our trade with Cuba far exceeds our trade with Italy. trade with Cuba more than equals our entire trade with Aus-

tria, Spain, and Russia.

With Hawaii our total trade for the 11 months ending May

31 last was \$65,000,000, the same as with Porto Rico.

With the Philippines our total trade was \$42,000,000, a falling off from the previous year. I will print the statement for the previous year. It was then \$46,000,000. Forty-two million dollars was our total trade with those islands. They took \$23,000,000 of our exports. Hawaii took \$28,000,000, Porto Rico \$29,000,000, and Cuba \$65,000,000 of American products. The total trade for the 11 months ending May 31, 1913, with Cuba, Porto Rico, Hawaii, and the Philippines was \$353,000,000. That is larger than our trade with all the European countries put together, except France, Germany, and England. It is a very large trade.

Now, the Cuban trade you are going substantially to kill in three years. You have cut down already the trade with Porto The sugar crop there is going to be reduced. It is falling off this year, owing to the fact that the small planters and growers, with the prospect before them of this bill and free sugar, can not borrow the necessary money from the banks to carry on the business. If you will look over the court records in Porto Rico you will find that a great many small sugar producers have already gone into the hands of receivers. That means, of course, a reduction in their ability to buy from us. Their trade will be reduced. The same thing is true of Hawaii, and the same thing will be true of the Philippines.

Mr. President, to put sugar on the free list in three years you give up for nothing all that revenue about the imposition of which no one complains, and in a few years destroy a great beet-sugar industry in this country which is not only valuable to the consumer but valuable to the agricultural interests of the whole country. You benefit only three great refineries and dam-

age a great and growing trade with these islands which want to trade only with us, and must trade practically only with us.

I think, Mr. President, it is not only cruel to the industries involved, but I think economically it is the most indefensible action that can possibly be taken in any revenue bill.

I suggest that these two little tables be printed in the RECORD.

The VICE PRESIDENT. Is there objection? The Chair hears none.

The tables referred to are as follows: Imports and exports.

	Imports.	Exports.	Total trade.
Cuba Porto Rico. Hawaii. Philippines	\$120, 154, 326 42, 873, 401 55, 055, 816 23, 257, 199	\$61, 133, 985 37, 424, 545 24, 418, 671 23, 703, 935	\$181, 288, 311 80, 297, 946 79, 474, 487 46, 961, 131

Mr. SMOOT. Mr. President, I wish to call the attention of the Senator from Massachusetts to one fact. Canada, our neighbor on the north, produces very little sugar. There is only one factory, I think, in Alberta. She has a duty on sugar only two-thirds of what our duty is. Yet the price of sugar in Montreal is nearly always higher than it is in New York. The reason of that is on account of the home production of sugar in the United There can be no other reason.

Mr. LODGE. There can be no other reason.

Mr. BRISTOW. Mr. President, the Senator from Massachusetts [Mr. Lodge] spoke of sugar being an article of universal In this connection I have a table showing the tax that is levied on sugar by the various countries. It represents the tax that was levied in 1912. I should like to incorporate it in the RECORD. I might call the attention of the Senator from Massachusetts to some of the amounts that are levied as taxes by the various countries. On pure sugar England's tax is 40 cents per hundred pounds.

Mr. LODGE. I think I said 39. Mr. BRISTOW. It is approximately 40 cents; it is 39.9 Mr. BRISTOW. It is approximately 40 cents; it is 53.0 cents. Switzerland, 79 cents; the German Empire, \$1.51; Belgium, \$1.75; Denmark, \$1.90; France, \$2.36; Norway, \$2.43; Russia, \$2.49; Spain, \$3.27; Austria-Hungary, \$3.49; Sweden, \$3.64; Bulgaria, \$4.15; the Netherlands, \$4.91; Greece, \$4.98; Servia, \$5.24; Roumania, \$5.67; Italy, \$6.21; Portugal, \$7.09; Turkey has a 10 per cent ad valorem; Canada, \$1.26, on sugar from the English colonies, 84 cents; Australia, foreign, \$3.04, from the English colonies, \$1.95; East Indies has a 5 per cent ad valorem; Egypt an 8 per cent ad valorem; the United States has \$1.90 as a general duty and \$1.52 from Cuba. I ask that this table giving the details may be printed in the

RECORD.

The VICE PRESIDENT. Without objection, it will be so ordered.

The table referred to is as follows:

¹At expiration of Brussels sugar convention.

Mr. THOMAS. May I ask a question of the Senator?

Mr. BRISTOW. Certainly. Mr. THOMAS. Has not the Senator added the consumption tax of those countries to the import duty?

I said it is the consumption tax. It is the Mr. BRISTOW. tax that is levied by those countries on sugar, including all

Mr. THOMAS. The consumption tax is collected alike on the home production and on the foreign importation?

Mr. BRISTOW. Yes; that is, the tax on sugar. It is the consumption tax.

Mr. LODGE. They may put on a surtax, too. Mr. BRISTOW. That is included.

I have some more data here that I think would be of interest. The average selling price of refined sugar in England for the first six months of 1913 was \$3.387 per 100 pounds. The average in New York was \$4.203 per 100 pounds, making a difference of 81.6 cents. If sugar was selling in the United States for the full European price plus the duty, as is alleged by my friend from Montana [Mr. Walsh], it would be \$1.50 more than the price in London; but the average price shows that it is only 81.6 cents more, making approximately 70 cents less than the parity between the two countries.

I have here a table showing the English tariff duty, and I

ask that it may be incorporated into the RECORD.

Mr. SMITH of Michigan. Will the Senator from Kansas

state what the English duty is at present?

Mr. BRISTOW. It is a graduated duty, very much like ours, not exceeding 76° pure by the polariscope test, in our money 20 cents per hundred.

Mr. SMITH of Michigan. If the Senator will pardon me one word, even that duty has had the effect to stimulate the domestic sugar industry in England. The question recently arose in the British Parliament as to whether even that duty ought not to be repealed in order to be consistent with the policies of the

English Government. It has operated to stimulate quite a considerable industry, amounting to several thousand tons, as a result of this small duty, which was never intended for protection at all.

Mr. BRISTOW. I have been advised that there is a movement in the British Isles now to undertake the development of the beet-sugar industry, and a proposition was made that rather than go to the American system of protection and the German and French systems of protection, it might be well to repeal this duty so that it would not stand as a protective duty in favor of this production, and to be consistent, as the Senator from Michigan has said, with the English system of tariff. But I understand that Lloyd-George has opposed any such movement as that.

I have here a table showing the quantity of sugar imported into the United States from Hawaii, Porto Rico, the Philippines, and all other countries. I think it will be of some interest to have it incorporated in the RECORD. I have the statistics from 1898 to 1912 showing the development of sugar production in those countries with which we have such close commercial relations, referred to by the Senator from Massachusetts [Mr. Lodge]. It makes a remarkable showing. Since 1898 the importations of sugar from Hawaii have increased—I will speak in round numbers—from 249,000 tons to 602,000 tons in 1912, showing a remarkable development in those islands. From Porto Rico we imported, in 1898, 49,000 tons in round numbers; that has increased in 1912 to 367,000 tons, a growth of approximately 320,000 tons since Porto Rico became a part of the United States. From Cuba we imported in 1898 but 220,000 tons, in round numbers, while in 1912 we imported from Cuba 1,593,000 tons. From the Philippines, in 1808, we imported 14,000 tons, and in 1912 we imported 217,000 tons. From all other countries-to show the influence of the preferential duties to Cuba and of incorporating these other possessions within our area-in 1898 we imported 811,000 tons, while last year we imported but 241,000 tons. I ask that this table be incorporated in the RECORD.

The VICE PRESIDENT. In the absence of objection, permission to do so is granted.

The table referred to is as follows:

Sugar imported into the United States from Hawaii, Porto Rico, Cuba, the Philippines, and all other countries. [Short tons.]

Fiscal year.	Hawaii.	Porto Rico.	Cuba.	Philip- pines.	All other countries

Mr. WILLIAMS. Mr. President, as all Senators know, my private opinion has been somewhat adverse to putting sugar on the free list, even at the end of three years. I was led to that opinion because of certain revenue reasons and also because of a plank in the Democratic platform that we would not destroy any legitimate industry. Without caviling about the word "legitimate," I thought the Louisiana cane-sugar industry might be permitted to be called a "legitimate industry," but I want now to say that the Senator from Massachusetts [Mr. Lodge] has reminded me of that quotation in the Scriptures, "Almost thou persuadest me." If I thought as the Senator from Massachusetts thinks, or as he says he thinks, about sugar, I would never have had the slightest hesitation in the world about putting it upon the free list, because its importation from all the world can not possibly hurt anybody in the United States, if his argument is correct

The Senator went on to say that we will kill our trade with Cuba by putting sugar on the free list. Our chief importations of sugar have been from Cuba all the time, with a high tariff or with a low tariff, simply because Cuba produces the cheapest sugar in the world. Here is the Senator from Massachusetts, a scholar, a political economist, and all that, who absolutely wants the Senate and the country to believe that reducing the duty on sugar, which now applies to Cuba, and nothing will stop the importations of sugar from Cuba, because 80 per cent of our trade with Cuba is of sugar, and the Senator says we will kill our trade with Cuba by permitting the Cubans to send their sugar here free,

Then, the next position he takes is that our refiners will be able to master the entire market by reason of the fact that we will permit refined sugar to come from all the world to American shores—from far off Sumatra and Java and Holland and England and Cuba and Jamaica and all the balance of the world—that they will be permitted, after three years, to send refined sugar to the American market without paying a dollar of tax, and a Republican stands here and tells us that we are going thereby to kill our trade with Cuba and to destroy our trade or reduce it with Porto Rico, the Hawaiian Islands, and the Philippines.

A moment before that the Senator said that beet sugar and Louisiana sugar could not stand the competition with tropical cane sugar. Then a minute afterwards he said Cuban tropical cane sugar, raw and refined, could not compete with the American refiners; that Sumatran sugar can not do it; that Javan sugar can not do it; that none of the sugar of the balance of the world can do it. I suppose, judging by what the Senator said, that the people out in the country, not so wise as he is and not so learned, some few ignorant people may imagine that Porto Rico is not a tropical island; that Hawaii is not a tropical island; and that they do not raise tropical sugar there. They may imagine that their labor is so high that they can not

I have heard a great many remarkable arguments here, but we are now faced with a situation that I declare confuses my intellect. If it be true that we are going to kill our trade with Cuba and reduce our trade with the tropical islands under our flag by permitting the free entry of sugar, then what a won-derful "love's labor lost" has been the task of the Senator from Kansas and the Senators from Louisiana. You are going to have less competition after you get free sugar than you had before; our trade with Cuba is to be killed; our trade with our tropical islands is to be depressed and reduced, and all on account of free sugar!

Mr. LODGE. Mr. President, will the Senator from Mississippi allow me to interrupt him a moment? The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Massachusetts?

Mr. WILLIAMS. Certainly.

Mr. LODGE. We shall lose the preference in the Cuban mar-

ket, which, of course, will reduce our trade.

Mr. WILLIAMS. That brings me to the next point. Here is the thing that confuses my intellect. Here are a lot of people who opposed giving the preference to Cuba, in the first place, when we had the Cuban reciprocity treaty under consideration, because, they said, it would hurt our own people-no; our own producers, not our own people. I do not believe they ever said that; or, if they did, they did not mean it. Then they were opposing our grant of right to the Cuban producer to send his sugar here free; and then, in the next breath, they tell us what an immense injury we are going to do to Cuba by permitting the Cubans to send their sugar here free.

Mr. LODGE. Mr. President, will the Senator allow me there

a moment?

The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Massachusetts?

Mr. WILLIAMS. Yes.

Mr. LODGE. I was a strong supporter of the reciprocity treaty with Cuba.

Mr. WILLIAMS. I knew the Senator was.

Mr. LODGE. Of course under this proposed legislation sugar will come here free instead of as now under a reduction.

Mr. WILLIAMS. Yes.

Mr. LODGE. In my judgment it will not alter the sale of Cuban sugar here.

Mr. WILLIAMS. Not at all.

Mr. LODGE. But we now receive, in return for our preference to Cuba, a preference for all of our manufactures in her market. That preference we shall lose for our articles.

Mr. WILLIAMS. Well, it has been a long standing Demo-cratic argument that just in proportion as you hampered imports you always hampered your exports to the country from which you imported, and I am glad to also have a recognition of that doctrine from the Senator from Massachusetts.

Mr. LODGE. A recognition of what doctrine?

Mr. WILLIAMS. It is as true as twice two are four.

Mr. LODGE. What is it that is so true?

Mr. WILLIAMS. Why, the doctrine that just in proportion as you hamper imports from a country to your market you necessarily hamper the exports from your country to their

Mr. LODGE. Mr. President, I am afraid the Senator from Mississippi did not hear what I said.

Mr. WILLIAMS. You said the result of this would be that we would decrease our exports to Cuba.

Mr. LODGE. I said we would decrease our exports into

Cuba, where we now have a preference.

Mr. WILLIAMS. Mr. President, that may or may not follow. If the Senator means that by the destruction of the preferential in sugar, Cuba will, under the abrogation clause of that treaty, give notice of her intention to abrogate the entire treaty, then the Senator is necessarily and mathematically correct. We must necessarily lose some of our trade with Cuba in the shape of our exports to Cuba.

Mr. LODGE. That is all I meant.
Mr. WILLIAMS. But under another clause of this bill there is also a provision that the President may, when, in his

opinion, any country is acting unfairly, raise some duties.

Mr. LODGE. Mr. President, does the Senator suggest that Cuba will be acting unfairly toward us if she should terminate the treaty when we take from her the only value the treaty has to her?

Mr. WILLIAMS. We do not take away the only value. The Senator is mistaken.

Mr. LODGE. It has no other value to her. Mr. WILLIAMS. If the Senator had said "the major part," he would have been correct.

Mr. LODGE. Well, the major part.

Mr. WILLIAMS. But we have given, without considering sugar, vast advantages to her tobacco and some other products. The advantage goes to her tropical fruit; the advantage goes to everything which she raises and may export from her shores to ours. If Cuba chooses to take that position, of course, what the Senator says will be true; but it will not flow from the economic principle of granting free entry of sugar, it will flow from the fact that there exists a treaty which contains a clause giving the right to abrogate it upon a change of duty in either country which, in the opinion of the other, changes the original conditions in a manner unfavorable to it.

Mr. LODGE. If the Senator will allow me, he is, of course, aware that we make no concession on tobacco.

Mr. WILLIAMS. The Senator is mistaken as to that.

Mr. LODGE. I will read from the treaty. I mean that under the language of the treaty Cuban tobacco gets no con-

Mr. WILLIAMS. Cuban tobacco gets a concession now.

Mr. LODGE. There is no preferential at all on tobacco.

Mr. WILLIAMS. Find the clause.

Mr. LODGE. I read from the Cuban treaty:

It is agreed that the tobacco, in any form, of the United States or of any of its insular possessions, shall not enjoy the benefit of any concession or rebate of duty when imported into the Republic of Cuba.

Mr. WILLIAMS. That is right.

Mr. LODGE. The next article of the treaty provides:

It is agreed that similar articles of both countries shall receive equal

And so forth.

Mr. WILLIAMS. I do not know whether that concludes that question or not, but I have been under the impression, and I am under the impression now, that a differential is actually granted to Cuban tobacco coming into the United States, and that the treaty is construed in accordance with Articles II The only thing I remember being exempted-

Mr. LODGE. If I am wrong, this table will show in a moment, and if I am wrong I will very gladly say so. I will look

at it to see.

Mr. WILLIAMS. I do not know whether the Senator is wrong or not. Speaking frankly, I arrived at the conclusion I have stated from what I have heard. I have not hunted up the figures at all, but I understood that everything either way had a differential except our tobacco exported to Cuba, and, of course, articles on the free list.

Mr. LODGE. Mr. President, the Senator is right.

Mr. WILLIAMS. I thought so.

Mr. LODGE. Cuba does get a preferential on tobacco.

Mr. WILLIAMS. I have not examined the figures.

LODGE. I thought that a subsequent article pre-

Mr. WILLIAMS. Cuban tobacco is granted a concession in our markets, but by express clause in the treaty American

tobacco exported to Cuba receives no concession. Mr. LODGE. I was under the impression that Article VII, providing that similar articles of both countries shall receive

equal treatment, prevented a concession to Cuban tobacco. Mr. WILLIAMS. The question of Cuban tobacco is construed

according to the second article instead of by the seventh.

Now, one other matter. The Senator says that several trusts in this country have been advocating free trade in sugar. think the Senator is mistaken. One of them has been doing so; there is no doubt about that. The Federal Refining Co. have not only been advocating it, but they have been keeping a lobby here; I do not understand why; it is one of the things that has been confusing this poor intellect of mine that has already been confused twice in this short speech; but Mr. Atkins came down here on January 15, appeared before the Ways and Means Committee, and said that he favored and that his company favored the retention of the duty on sugar.

Mr. SMOOT. Mr. President, not the present duty. Mr. WILLIAMS. But he favored the retention of either the present duty on sugar or a duty.

Mr. SMOOT. A duty.

Mr. THOMAS. No specific duty was mentioned.
Mr. WILLIAMS. My recollection is that he used the words
"favored the retention of the duty," although he may have said he favored the retention of a duty.

Mr. SMOOT. A duty. Mr. WILLIAMS. Very well. He said furthermore that his company had no connection with the Federal Sugar Refining I do not remember what the Arbuckles want.

Mr. LODGE. When I said in my speech a year ago that the Arbuckles and the American Sugar Refining Co. were not favorable to it. they wrote to me and said they were.

Mr. WILLIAMS. Who did that?

Mr. LODGE. The Arbuckles. Mr. WILLIAMS. The Arbuckles wrote and said they were.

I said I did not know where the Arbuckles stood.

Mr. President, this proves one thing—and it is the only thing it does prove—it proves that Senators on the other side are wrong all along the line; it proves that the great refiners, paying twice as much for their labor, but for highly organized, efficient labor, are willing to take their chance against the world in importing free sugar and refining it upon the American continent.

Mr. BRISTOW. Mr. President— Mr. WILLIAMS. It proves that you are wrong about your idea that the cheaper the labor is per diem or per man the more protection you have got to have. That is the first proposition.

The next proposition is that if you are not wrong about that, then you are wrong about their not being undersold by foreign refiners; and if you are not wrong about that, then you are wrong about refined sugars not being cheaper, even if raw sugar costs as much; but every one of you admits that raw sugar will cost less.

I say that one of the effects of free trade in sugar is going to be that in a few years there will be refineries in Cuba; there will be refineries in the tropical islands; and the gloom and the cloud that have gone over all of the tropical islands because of the fact that the world tried to hothouse into existence sugars that were not naturally produced at a profit, having been destroyed in the market of 90,000,000 people, there will be a revival of the old-time prosperity in the cane fields of the West

I did not want to give away \$30,000,000 of revenue on sugar; would rather have reduced the revenue upon the people's clothing, their hats, and other things. I did not want to give it away, because I think the Senator from Massachusetts is right when he says that Louisiana cane sugar being an exotic can not stand in the face of the competition of tropical cane sugar. I also believe that the beet-sugar people will be checked up for some time; but if I believed, as the Senator says he believes, that there will be no reduction in the price of sugar, that the refiners of the world can not compete with the refiners of the United States, and if I furthermore believed that it would raise the price of sugar in the American market, then I would owe an apology to everybody with whom I have differed upon this particular question.

Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Kansas?

Mr. WILLIAMS. Certainly.

Mr. BRISTOW. So that there may be no misunderstanding as to the position which I have taken in regard to the American refiners being able to compete with the foreign refiners, I desire to say that I have not believed for four years that the American sugar refiners needed any protective duty. I offered to the tariff bill under consideration four years ago an amendment removing the differential which they had as a protective duty; that is, the  $12\frac{1}{2}$  cents as it was in the Dingley bill and the  $7\frac{1}{2}$ cents as it is in the present law. I did that because I believed that the American sugar refiners can refine sugar as cheaply in this country as can the refiners of any country in the world.

If the Senator will remember, in the data that I submitted this morning I included a table in fegard to wages in the different foreign countries as compared with the wages paid in our country. I stated at the time that I did not think the difference in the cost of production was measured accurately by this very wide difference in the wages paid; but, taking everything into consideration, I undertook to summarize and state what, in my opinion, was approximately the difference in the cost of production. I do not want to have it understood that I believe the American Sugar Refining Co., the Arbuckles, or Spreckels—that is, the Federal Co.—need any protection whatever in meeting any competition in refined sugar-that is, for the process of refining.

Mr. WILLIAMS. Mr. President, I am glad to have that admission, even from a Republican not of the stand-pat variety. I am glad to have an admission that a manufacturing enterprise in the United States can produce at a cheaper price and can successfully compete with a foreign manufactured product. Sugar is a manufactured product of the highest character, involving not only the ordinary industrial processes, machinery, and all that, but chemistry, and all the balance of it. I am glad to have the Senator admit that they are not dependent for their power to compete upon the price of labor per day or per week; in other words, that the cost of labor entering into a product is not to be measured by the price of the labor by the day or by the week, but by the efficiency with which the labor is handled, the amount of machinery which is brought to help it, the intelligence in the administration of the business, the overhead part of it, and a dozen other things; in other words, that the cost of production is not fixed by the price per week of labor, except in the things closest to the very ground itself, like chopping wood in the forest, or something of that sort.

Mr. BRISTOW. If the Senator will permit me again, I do not want him to take the statement which I made as to the refining

of sugar and apply it as a general proposition.

Mr. WILLIAMS. Ah!
Mr. BRISTOW. There are occupations and there are products that are produced in this country where the difference in the wages does make a difference in the total cost of production. I was dealing wholly and exclusively with the question of protection for the sugar refiners. Indeed, I might say that the hearings show that these refiners have stated that they believe they can refine as cheaply here as the refiners in any country in the world. They do not claim, as I have read the record, that

they need any protection for the process of refining.

Mr. WILLIAMS. Mr. President, that is just the quarrel.

The quarrel is that whenever you are arguing one way you argue as if the price of labor were everything, and when you argue the other way you argue as if the price of labor were a subordinate factor in the cost of production. Everybody knows, of course, without any instruction from the Senator from Kansas or from me, that there are products in which the price of labor is the main factor. When I go out and promise to deliver 100 cords of wood to the Senator from Iowa, everybody knows that in a primitive, primeval pursuit like hiring men to cut down trees and chop them up the price of labor is the main factor. But whenever I go into a silk mill, a sugar refinery, a cotton factory, a woolen factory making the finer classes of goods, with an immense amount of machinery used, where the efficiency of labor, the intelligence of labor, the amount of labor performed by a man in a day, the amount of machinery used, the character of the administration of the business, and all that, count, then you come into a business where the mere manual part cuts hardly any figure.

I am willing to bargain with you Republicans now, as far as I am concerned. I am willing to leave out this whole thing of the cost of production, because nobody can tell what it is. can not tell it from day to day in the same business. But I should be willing to find out what the labor cost is per yard, per bushel, per ton, per bale, of everything in the world and compromise with you on a tariff to cover it, because I would have the lowest tariff America has had since 1815.

Mr. BRISTOW. If the Senator will yield for a moment, the illustration which the Senator gave as to cutting wood, of course, is a very apt illustration. Does be not think that the difference in the wage scale in the production of a ton of beets would influence very materially the cost of producing that ton of

Mr. WILLIAMS. That depends upon the character of the labor in the two localities. If you are given equally efficient or equally inefficient labor, of course it does. If you are given equally efficient or equally inefficient management, of course it does. If you are given equally high or equally low priced lands, of course it does.

Mr. BRISTOW. The data which I submitted here this morning show that the wages in an American beet field were from two to three times more than they were in Germany; yet when you take into consideration all the elements, they show that the cost of producing a ton of beets was not three or four times as much in America as in Germany, but only from 50 cents to

Mr. WILLIAMS. I did not intend to get off into all those things. I was just calling attention to some of these inconsistencies. I do not agree with the Senator about that as applied to beet culture in this country. It requires highly intelligent labor, and still more highly intelligent management. We are beginning to make the inventions, and the balance of the world looks to us for them. We have passed the stage where they make them and we look to them. But the general proposition will not do.

Take the simple process of cotton cultivation. I suppose that has more labor in it, in proportion to the balance of the factors that enter into the price of the cotton, than almost anything else in the world. It is the sort of agriculture that can be carried on by very ignorant labor. Yet I pay from five to seven or eight times as much for my labor as they do in British India, and there is not a port in the world in which I can not beat them selling cotton by superiority of management and superior effi-

ciency of agriculture.

Mr. CUMMINS. Mr. President—
The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Iowa?

Mr. WILLIAMS. Yes.

Mr. CUMMINS. I am very much interested in the proposal just made by the Senator from Mississippi. I have an amendment pending to this bill in which it is proposed to do the very thing just suggested by the Senator from Mississippi. I should like to see a tariff bill made upon that basis, no matter how low the duties might go. I have here an amendment which provides for the creation of a commission-

Mr. WILLIAMS. The Senator must pardon me, but I do not wish to go into that.

Mr. CUMMINS (continuing). An independent, impartial, nonpartisan or bipartisan commission-

Mr. WILLIAMS. I do not wish to go into that.
Mr. CUMMINS. I know, but that amendment provides that s to any article in this bill-

Mr. WILLIAMS. The commission is to determine it.

Mr. CUMMINS (continuing). They may hear and decide on what the difference is between an efficiently conducted and welllocated enterprise in this country and a similar one abroad, and that thereafter the duty shall be that difference.

Mr. WILLIAMS. Mr. President, I do not want to go into five

or six discussions.

Mr. CUMMINS. That is the proposition just made by the

Senator from Mississippi.

Mr. WILLIAMS. My opposition to that is well known to every citizen in a freedom-loving country. In the first place, gentlemen talk about getting the tariff out of politics in that way. You can not get it out of politics in that way without having a row as to what standpoint, what viewpoint, your commission is going to take.

Mr. CUMMINS. I agree that you can not get it out of

politics. I agree to that.

Mr. WILLIAMS. That is the only reason I have heard for it. Mr. CUMMINS. But we can create a tribunal that is better calculated and better adapted than we are to find the difference between the costs.

Mr. WILLIAMS. I must decline to yield further. I want to sit down. The Senator admits that we can not get the tariff Mr. WILLIAMS. out of politics. The Senator from Minnesota [Mr. CLAPP] recently said that that was the reason for having a commissionto get it out of politics. Now the Senator admits that we can not get it out of politics. Now you are proposing, by your own admission, to take away from the elected representatives of the people a political question and surrender it to a commission appointed by somebody.

I do not believe any free country governed by commission could exist free for many years. We have too many commissions already. I am the commissioner from the State of Missions already. sissippi, or one of them, elected to sit in judgment on this question. I am not going to admit that my people made a mistake when they sent me here as a commissioner. I am a tariff commissioner now, and I am acting as one, with a full sense of my responsibilities. I am not going to turn over my duties to a bureau that works in secret and is influenced by God only knows

That is my opposition. It is a political opposition. It is a governmental opposition. It is an opposition from the standpoint of a citizen of a free and self-governing country, a representative Government.

It is a great mistake to suppose that the more nearly mechanically accurate you can make this or that or the other governmental operation the better Government you have. That is a secondary consideration. Mere efficiency of administration is a secondary consideration. The great, prime consideration is the education of the people in governing themselves. I would far rather live in a country where the Government was not quite so good than to live in a country like Prussia, where it was awfully efficient, but where the bureaucrats did the governing. I am one of the old-fashioned fellows who believe that the right of self-government carries with it the right of self-misgovernment at the same time.

But I was through with what I had to say five or six or seven minutes ago, and have been carried on by questions

from one thing to another.

Mr. SMOOT. Mr. President, I desire to ask the Senator if he understands that the sugar refiners want this low rate of duty—50 cents a hundred pounds—as suggested by Mr. Lowry

and others, for a protective duty?

Mr. WILLIAMS. I do not know. I confess that when one of them comes here wanting free sugar it confuses my intellect

about what they do want and what they are up to.

Mr. SMOOT. Certainly. They do not want the 50 cents as a protective duty. That is not what they want that low rate for. They want it so that the Cuban treaty will not be abrogated. They want a duty of 50 cents a hundred so that Cuba can have a preferential of 20 per cent, and they will speculate on the other 80 per cent, the same as they have done in the past-upon the difference between the 100 per cent to the world and the 80 per cent to Cuba. They know that if Cuban sugar is allowed to enter this market at a preferential rate they make the great part of that preferential rate. The refiners want to make millions out of handling Cuban sugar, and they can do so with a preferential rate against the other sugars of

the world. It is not protection they want the 50-cent rate for; it is for the reason I have stated that the sugar refineries of this country want a small rate of duty on sugar.

The VICE PRESIDENT. The question is on the amendment

proposed by the committee.

Mr. SMOOT. I will ask the Senator from North Carolina, as it is 5 minutes of 6 o'clock now, if he will not lay the bill aside?

Mr. SIMMONS. I think we have sufficient time to take a vote to-night.

Mr. SMOOT. Oh, no, Mr. President; there will not be sufficient time.

Mr. SIMMONS. Unless some Senator wants to speak there

Mr. WILLIAMS. Let us take a vote on the committee amendment.

Mr. SMOOT. Would it not be better to vote on the amendment to the committee amendment?

The Senator from Kansas [Mr. Bristow] has offered a substitute for the first two sections. Before that substitute is in order, as I understand, we must have an oppor-

tunity to perfect those two sections.

The VICE PRESIDENT. The Chair has been so ruling since

the commencement of the debate.

Mr. SIMMONS. I ask for a vote on the committee amend-

Mr. SMOOT. Do I understand that wherever there is an amendment to the bill offered here by the committee, and some Senator wants to offer an amendment to that amendment, it is not proper to consider it first?

The VICE PRESIDENT. It would be in order if it were offered as an amendment to the amendment.

That is what I understand this is.

The VICE PRESIDENT. It is not offered in that way. is offered as an amendment not only to paragraph 179, but also to paragraph 180. It proposes to strike out the paragraphs as they appear in the bill. The Chair has consistently ruled that the committee amendments are first in order.

Mr. BRISTOW. I think the way we have been proceeding has been to perfect the committee paragraph before the substitute was voted upon. Since mine is a substitute for this paragraph, I see no objection to voting first upon the committee amendment, unless some Senator wants to speak to that amend-

Mr. SMOOT. That was the point, Mr. President. The Senator from Kansas is perfectly correct in case of a substitute; but, as I understood, there was to be an amendment offered to

the committee amendment.

Mr. NORRIS. Mr. President, I think I can clarify the atmosphere as far as the Senator from Utah is concerned. He probably refers to me. I intend to offer an amendment to strike out the three-year clause—that is, commencing after the proviso. But I have no amendment to offer to the committee amendment, and I am perfectly willing to vote on the committee amendment.

Mr. SMOOT. Then I misunderstood the Senator from Nebraska. I thought he was going to offer an amendment to the committee amendment.

Mr. NORRIS. No.
Mr. SMOOT. I have not any objection to that.

Mr. BRISTOW. Is not the committee amendment the threeyear clause?

Mr. SIMMONS. No.

Mr. NORRIS. No. Mr. BRISTOW. O

Mr. BRISTOW. Oh, no; that is true. I see now. The VICE PRESIDENT. The committee amendment will be

The Secretary. On page 53, line 8, after the words "polariscopic test," it is proposed to insert:

Provided, That the duties imposed in this paragraph shall be effective on and after the 1st day of March, 1914.

Mr. BRISTOW. Mr. President, I desire to make a parliamentary inquiry. I have an amendment to offer after the amendment that is now pending is disposed of, and I will read it. I wish to inquire if it will be precluded if the amendment of the committee is adopted?

The amendment is as follows:

Provided, however, That so much of paragraph 216 of an act to provide revenue, equalize duties, and encourage the industries of the United States, and for other purposes, approved August 5, 1909, as relates to the color test denominated as No. 16 Dutch standard in color, shall be and is hereby repealed.

The committee amendment makes the bill take effect on the 1st of March next. My amendment will repeal the provision

in existing law relating to the color test, making the bill, so far as the color test is concerned, go into effect at once. inquiry is, Will it be in order for me to offer this amendment after the committee amendment has been adopted?

The VICE PRESIDENT. Where does the Senator from Kansas propose that his proviso shall enter the bill?

Mr. BRISTOW. If my amendment should be defeated, I will then move at the end of line 13, page 53, to insert the proviso.

The VICE PRESIDENT. It would undoubtedly be in order after the committee amendment shall have been agreed to or rejected. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The VICE PRESIDENT. The question is now on the amendment offered by the Senator from Kansas [Mr. Bristow].
Mr. Bristow. There are a number of Senators who want

to speak on the amendment before it goes to a vote. I take it for granted that the Senator from North Carolina will not insist on having them speak to-night. It is now 6 o'clock.

Mr. SIMMONS. If the Senator asserts that there are other

Senators who desire to speak-

Mr. BRISTOW. I have been so advised.

Mr. SIMMONS. The hour of 6 o'clock having arrived, of course in accordance with the understanding we have been many than the course of the course operating under I could not insist on going on. President, I wish to give notice that on Wednesday before we adjourn, if we have not made better progress than we have

adjourn, if we have not made better progress than we have made to-day, I shall move that the Senate meet at 10 o'clock instead of 11 o'clock as now.

Mr. SMOOT. I thought we made excellent progress to-day upon this schedule. I will say to the Senator that if I had known the schedule was coming up to-day I certainly would have been prepared to have voted on the schedule this afternoon. I think all the time has been warn profitably taken noon. I think all the time has been very profitably taken up, with no inclination on the part of anyone to filibuster in any way. Of course, if the Senator insists upon a vote upon it, then I would content myself by speaking when the schedule came into the Senate.

Mr. SIMMONS. I am not making the motion now. I said I would make it on Wednesday before we adjourn, so as to apply

The VICE PRESIDENT. By unanimous consent, the bill will be temporarily laid aside.

SENATOR FROM ALABAMA (S. DOC. NO. 165).

Mr. BANKHEAD. Mr. President, a situation exists in the Senate which will require the most careful and painstaking investigation. I allude to the vacancy which has occurred on account of the death of my late lamented colleague, Senator JOHNSTON.

I ask unanimous consent to print in the RECORD the opinions of the legal advisers of the governor of Alabama, upon which opinions he doubtless based his action in the appointment of Hon. H. D. CLAYTON to serve for the unexpired term of the late

Senator Johnston.

I wish to say to the Senate that the Governor of Alabama has no pride of opinion in the action that he has taken. When the vacancy occurred and the conditions were put up to him as to what action he would take, he called upon his legal advisers for opinions as to his legal and constitutional authority in the matter, and it is these opinions that I desire to have printed in the RECORD in order that the Senate before taking any action on the matter may have an opportunity to read and study the opinions upon which the governor acted.

The VICE PRESIDENT. Is there objection to the request

of the Senator from Alabama?

Mr. BANKHEAD. I shall ask the Senate for permission to print the opinions, which are not very long, in the RECORD, and I shall also ask to have them printed as a public document, because if printed as a public document it will be much more convenient for Senators to examine them in that form.

Mr. SMITH of Michigan. Mr. President—
The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Michigan?

Mr. BANKHEAD. I yield to the Senator.
Mr. SMITH of Michigan. For information I desire to know whether the credentials of the appointee have been presented to the Senate.

Mr. BANKHEAD. They have not. Mr. SMITH of Michigan. Then, as a matter of fact, the

Senate has no jurisdiction over the matter.

Mr. BANKHEAD. The Senate can give its consent to the publication of the opinions in order that it may have the opinions before them when they come to act upon the question, That is what I am asking.

Mr. SMITH of Michigan. Probably for the information of Senators; but the governor of that State is privileged to change his mind at any moment and withdraw the appointment, leaving no question for us to consider.

Mr. BANKHEAD. It is not a question here of jurisdiction, It is a matter of information. I will say to the Senator from Michigan that there is not a possibility that the governor of Alabama will change his mind, as he now sees the situation. I hope the Senator from Michigan will not object to the publication.

Mr. SMITH of Michigan. I do not ordinarily object to matters of this kind, and I am especially loath to object to anything that is requested by the Senator from Alabama, but that our Record should be encumbered by the views of the governor of Alabama upon a question that has not yet been presented to the Senate, and in the absence of jurisdiction over the subject matter, seems to me of doubtful wisdom. If the Senator from Alabama is seeking to justify the governor of his State for some hasty or precipitate action concerning the vacancy which exists in this Chamber from Alabama, I would seriously object.

Mr. OVERMAN. I suggest to the Senator from Michigan that we are all interested in this question. I understand it is only a lawyer's brief, and we should like to read it as lawyers to know the reasons which have been given for the appointment. I do not think the question of the appointment of a Senator has come up, or that it will come up to-day.

Mr. SMITH of Michigan. This is more than a question of courtesy to the governor of Alabama and one that we ought to consider. The Senate should take no part in the local politics of Alabama.

Mr. BANKHEAD. Will the Senator yield to me for a

Mr. SMITH of Michigan. I would not be willing at this time to consent to the request in its present form. If it is the earnest wish of the Senator from Alabama that this informa-tion should be printed as a public document at the Government expense in order that we may know the views of the chief executive of Alabama, well and good; I am not going to object to it, but it does not strike me that it is desirable or proper at this time

The VICE PRESIDENT. Is there objection to the request

of the Senator from Alabama?

Mr. CUMMINS. Mr. President, I look at it from another point of view than that occupied by the Senator from Michigan. If the Senator from Alabama says to the Senate that the credentials of Mr. Clayron, who has been appointed by the governor, are to be presented to the Senate, then I think we ought to consent to the printing of the argument in the Record or as a public document, because we will all be interested in the conclusion to which an examiner or student must come. But unless he gives the Senate the assurance that the credentials are to be presented, then I would think that this argument ought not to be either made a public document or embodied in the RECORD.

Mr. BANKHEAD. There is not a particle of doubt of the fact that the credentials will be presented to the Senate.

Mr. CUMMINS. With that assurance, Mr. President, I make no objection myself, nor do I think anyone should make an objection to the printing.

Mr. SMOOT. Does the Senator from Alabama ask that it be printed as a public document and also go into the RECORD?

Mr. BANKHEAD. Yes; I ask that it be printed as a public

document, because it will be very much more convenient to Senators to have it on their desks in a form in which they can refer to it at all times.

Mr. SMOOT. That is what I thought. If the Senator will request that it be printed as a public document I have no objection, or if he desires to have it printed in the RECORD let it be printed in the RECORD, but let him state his choice as to one course or the other, and not have it printed in both forms.

Mr. BANKHEAD. I have no objection that it be printed as a public document and that it be omitted from the RECORD. My only purpose was to have the opinions printed as a matter of convenience to Senators, and the document will be more convenient in that form.

The VICE PRESIDENT. The Chair hears no objection, and the opinions will be printed as a public document.

## EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After six minutes spent in executive session the doors were reopened, and (at 6 o'clock

and 18 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, August 19, 1913, at 11 o'clock a. m.

### NOMINATIONS.

Executive nominations received by the Senate August 18, 1913. SECRETARY OF LEGATION.

John Van A. MacMurray, of the District of Columbia, now Chief of the Division of Near Eastern Affairs in the Department of State, to be Secretary of the legation of the United States of America at Peking, vice Edward T. Williams.

COMMISSIONER OF IMMIGRATION.

Henry M. White, of Washington, to be commissioner of immigration at the port of Seattle, Wash.

## CONFIRMATIONS.

Executive nominations confirmed by the Senate August 18, 1913. UNITED STATES DISTRICT JUDGE.

William H. Sawtelle to be United States district judge for the district of Arizona.

UNITED STATES ATTORNEY.

William G. Barnhart to be United States attorney for the southern district of West Virginia.

POSTMASTERS.

COLORADO

Joseph W. Beery, Saguache. A. J. Horan, Crested Butte. Henry Clay Monson, jr., Steamboat Springs. Michael F. O'Day, Lafayette.

MICHIGAN.

Frank M. Ennis, Baraga.

NEW MEXICO.

Walter P. Wilkinson, Santa Rita.

NEW YORK.

Anthony J. Beck. St. James. Clarence Fox, Cobleskill.
Charles H. Huntting, Smithtown Branch,
Cornelius T. Seaman, Hewlett.

Frank T. Campbell, Marion. Edwin E. Curran, New Straitsville. Charles C. Fowler, Canfield. Orange V. Fritz, West Alexandria. William B. Meyer, Oxford.

PENNSYLVANIA.

Harry W. Fee, Indiana. Albert H. Fritz, Quarryville. Robert H. Gracey, Glenside. William H. Gruber, Palmerton. C. Steck Hill, Hughesville. John Orth, Marietta.

# SENATE.

## TUESDAY, August 19, 1913.

The Senate met at 11 o'clock a. m. Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved. LABOR CONDITIONS AT PATERSON, N. J.

Mr. JONES. I have a resolution here from citizens of Spokane, Wash., asking for an investigation of the strike conditions at Paterson, N. J., and especially with reference to the imprisonment of Alexander Scott. It is accompanied by a copy of a statement printed in one of the New York papers purporting to give the facts in connection with this matter. I have not offered any resolution in reference to the matter, and I do not intend to do so, but if the statements contained in the article are correct it would seem that the authorities have come very near a violation of the constitutional rights of individuals.

I move that the petition together with the statement be referred to the Committee on Education and Labor, and I ask that committee to look into the matter very carefully to see whether or not any action should be taken by the Senate.

The motion was agreed to.

CALLING OF THE ROLL

Mr. PENROSE. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst Bacon Bankhead Brady Brandegee Bristow Bryan Burton Cetron Fall Fletcher Gallinger Gronna Nelson Simmons Smith, Ariz. Smith, Ga. Smith, S. C. Norris O'Gorman Overman Owen Smoot Page Penrose Perkins Pomerene Sterling Johnson Johnson
Jones
Kenyon
Kern
Lane
Lewis
Lippitt
Lodge
McCumber
McLean
Martine, N. J. Stone Sutherland Swanson Thomas Catron Chamberlain Reed Robinson Chilton Clapp Clark, Wyo. Clarke.Ark. Thornton Tillman Vardaman Walsh Saulsbury Shafroth Sheppard Crawford Cummins man Weeks Williams Shields

I wish to state that my colleague [Mr. Brad-Mr. JAMES. LEY] is detained from presence here by reason of illness. He has a pair with the Senator from Indiana [Mr. Kern]. I will allow this announcement to stand for the day.

Mr. SHEPPARD. I wish to state that my colleague [Mr. CULBERSON] is necessarily absent and that he is paired with the Senator from Delaware [Mr. DU PONT]. I will let this announcement stand for the day.

The VICE PRESIDENT. Sixty-four Senators have answered to the roll call. There is a quorum present. The presentation of petitions and memorials is in order.

#### PETITIONS AND MEMORIALS.

Mr. FLETCHER. I have received a letter in the nature of a memorial, signed by sundry wholesale fruit dealers of Florida, remonstrating against the imposition of a duty on bananas. I move that the memorial be referred to the Committee on Finance.

The motion was agreed to.

Mr. PERKINS presented petitions signed by sundry citizens of Los Alamitos, Artesia, Norwalk, Anaheim, Buena Park, Hynes, and Santa Ana, all in the State of California, praying for the adoption of the proposed tariff referendum, which were ordered to lie on the table.

Mr. SMITH of Michigan. I have received a letter from the secretary of the senate of my State transmitting resolution adopted by that body relative to proposed changes in the tariff. I ask that the letter and resolution be printed in the RECORD.

There being no objection, the letter and resolution were ordered to lie on the table and to be printed in the RECORD, as follows:

SENATE OF THE STATE OF MICHIGAN, Lansing, Mich., April 9, 1913.

Hon. WM. Alden Smith, United States Senate, Washington, D. C.

MY DEAR SENATOR: By direction of the senate I hand you herewith copy of the resolution this day adopted by the senate relative to proposed changes in the tariff.

Very respectfully,

DENNIS E. ALWARD.

DENNIS E. ALWARD, Secretary of the Senate,

SENATE OF THE STATE OF MICHIGAN, Lansing, Mich., April 9, 1913.

Mr. Smith offered the following resolution:

Senate resolution 72.

Senate resolution 72.

Whereas there are located and have been in operation in the State of Michigan during recent years 17 beet-sugar factories, which factories represent an investment of about \$12,000,000, and which factories have paid out to the farmers of the State of Michigan during recent years about \$7,000,000 per annum for sugar beets; and Whereas the beet-sugar industry in the State of Michigan employs a large amount of labor, both in raising sugar beets and in manufacturing said beets into sugar, and said industry has resulted in largely increasing the value of the farm lands in the State of Michigan, and any injury to said beet-sugar industry in this State would be a serious blow to the State; and
Whereas the sheep and wool industry in this State is an important one, the number of sheep now owned by the farmers of Michigan being approximately two and one-half millions and their value more than \$10,000,000; and
Whereas both the beet-sugar industry and the sheep and wool industry above mentioned are of great importance to the farmers of the State of Michigan, as well as to other classes of its people, and any reduction of the tariff upon either sugar or wool would be a great blow to both said industries and a great injury not only to the farmers of the State, but also to the laboring classes: Therefore be it

Resolved by the State Senate of the State of Michigan, That the President and the Congress of the United States be, and they are hereby, respectfully requested not to take off or reduce the tariff upon sugar or upon wool, as by so doing they will be striking a heavy blow at the State of Michigan; and be it further

Resolved, That a certified copy of this resolution be mailed by the secretary of the senate to each of our United States Senators, to each of our 13 Representatives in Congress, and to the President of the United States.

I hereby certify that the foregoing resolution was adopted by the senate this 8th day of April, 1913.

DENNIS E. ALWARD, Secretary of the Senate.

Mr. SMITH of Michigan presented a memorial of sundry citizens of Sand Lake, Mich., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. JOHNSON presented a memorial of Local Union No. 179, Cigarmakers' International Union of America, of Bangor, Me., remonstrating against the importation of cigars free of duty from the Philippine Islands, which was ordered to lie on the table.

#### BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows

By Mr. NORRIS:

A bill (S. 3006) authorizing the President of the United States to appoint certain persons in the Regular Army and place them upon the retired list; to the Committee on Military Affairs.

By Mr. BURTON: A bill (S. 3007) granting an increase of pension to Thomas Greer; to the Committee on Pensions.

By Mr. SMITH of Michigan:
A bill (S. 3008) granting an increase of pension to Josiah F. Gifford (with accompanying paper); to the Committee on Pensions.

By Mr. JOHNSON: A bill (S. 3009) granting an increase of pension to Charles Burns

A bill (S. 3010) granting an increase of pension to Peter

Prock; and A bill (S. 3011) granting a pension to Mary J. Gooding; to the Committee on Pensions.

By Mr. JOHNSON (for Mr. BURLEIGH):

A bill (S. 3012) granting an increase of pension to Arthur L. Brown; and

A bill (S. 3013) granting a pension to Abbie Brann; to the Committee on Pensions.

By Mr. McLEAN:
A bill (S. 3014) granting an increase of pension to Anna Deforest (with accompanying papers); to the Committee on Pensions.

By Mr. SHIELDS:

Joint resolution (S. J. Res. 65) to amend Senate joint resolution No. 8, approved May 4, 1898, entitled "Joint resolution providing for the adjustment of certain claims of the United States against the State of Tennessee and certain claims against the United States"; to the Committee on Claims.

## IMPORTATIONS IN AMERICAN VESSELS.

Mr. JONES. I submit a resolution and ask for its immediate consideration.

The resolution (S. Res. 165) was read, as follows:

The resolution (S. Res. 165) was read, as follows:

Resolved, That the Secretary of State be directed to transmit to the Senate copies of all protests filed against paragraph J, subdivision 7, of Section IV (V as amended), of H. R. 3321, "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," together with copies of all correspondence that has passed between this country and any foreign country relating thereto, and copies of any report or reports prepared or made thereon by any officer of the United States; the subject referred to being the provision in the tariff bill providing for a discount of 5 per cent on all duties on goods, wares, and merchandise imported by vessels admitted to registration under the laws of the United States.

The VICE PRESIDENT. The Senator from Washington asks unanimous consent for the present consideration of the resolution.

Mr. KERN. I object.
The VICE PRESIDENT. On objection, the resolution goes

Mr. WILLIAMS. I did not notice whether the resolution contains the words "if not incompatible with the public interest."

Mr. JONES. No; that clause is not in the resolution. I do not think it ought to be.

Mr. WILLIAMS. I think it ought to be in every resolution. It would not do any harm to insert it.

### RAILWAY LAND GRANT IN IOWA.

Mr. CUMMINS submitted the following resolution (S. Res. 166), which was read:

Resolved, That the Secretary of the Interior, the Secretary of War, and the Attorney General be, and they hereby are, requested to furnish to the Senate, as soon as practicable, copies of all letters, maps, and other documents found in their respective departments and not included in Senate Executive Document No. 124, Forty-ninth Congress, second session, in any manner relating to the land grant under act of Congress of May 12, 1864. (13 Stat., 72.)

Mr. CUMMINS. I ask for the present consideration of the resolution.

Mr. WALSH. I should like to ask the Senator from Iowa to

what matter the resolution relates?

Mr. CUMMINS. It calls for a copy of certain maps and other documentary matter connected with a land grant to a railway company in my State.
The VICE PRESIDENT.

Is there objection to the present

consideration of the resolution?

Mr. SIMMONS. I shall not object to it unless it leads to debate. I should like to reserve the right to object; but I do not presume that it will lead to any debate.

Mr. CUMMINS. I can not imagine that it will lead to debate. Mr. SIMMONS. No; I do not suppose it will. The resolution was considered by unanimous consent and

agreed to.

FEES OF CLERKS OF DISTRICT AND CIRCUIT COURTS.

Mr. CHAMBERLAIN. Some days ago I introduced a resolution authorizing the appointment of a committee of five Senators to examine into the question as to the fees and compensations paid to clerks of the district and circuit courts of the United States, and it was referred to the Committee to Audit and Control the Contingent Expenses of the Senate. That committee reported the resolution back without amendment and with the recommendation that it be referred to the Judiciary Committee. It is on the calendar, however, and I request that the resolution be taken from the calendar and referred to the Judiciary Committee.

The VICE PRESIDENT. The Senator from Oregon asks that Senate resolution 155 be taken from the calendar and referred to the Committee on the Judiciary. Is there objection? The Chair hears none, and that action will be taken.

#### CONDITIONS IN MEXICO.

The VICE PRESIDENT. Resolutions coming over from a

previous day the Chair lays before the Senate.

Mr. PENROSE. I ask to have both resolutions I submitted go over for a day. I stated when I introduced them that I would probably want three or four days to have matters de-

The VICE PRESIDENT. The resolutions will go over. The Senator from Washington [Mr. Poindexter] has a resolution coming over.

Mr. GALLINGER. I ask consent-

Mr. JONES. My colleague [Mr. Poindexter] is not present, and therefore I will ask to have the resolution go over.

The VICE PRESIDENT. It will go over. The morning business is closed.

# THE TARIFF.

Mr. SIMMONS. I ask unanimous consent that the Senate proceed with the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government,

and for other purposes

Mr. LIPPITT. Mr. President, a little out of the regular routine I wish to call attention to some questions of language that are used in the textile schedule. I presume those textile schedules will be before the Senate within a few days, and I want to bring the matter up at this time, so that the gentlemen who have particular charge of the schedules can give the matter a little consideration.

In all those four schedules—cotton, wool, flax, and silk—the products interlock and overlap each other, because sometimes they are composed wholly of one material and sometimes composed in part of many of them, and sometimes of all of them. The usual provision is that the duty shall follow the material which has the greatest cost in the product, but the language which is used to describe that situation in this bill is so varied that it seems to me it opens a very dangerous situation and one that is almost contain to lead to litigation. that is almost certain to lead to litigation.

In the present law-the Payne-Aldrich law-the language which is used is that in a fabric composed of cotton, or of which cotton is the component material of chief value, the product follows the cotton schedule; and where it is composed of silk, or of which silk is the component material of chief value, it follows the silk schedule. That language is uniformly used—I think without a variation—through all the provisions of the cotton, flax, and wool schedules. But in this bill that language is sometimes used, sometimes they have used the expression composed wholly or in chief value of cotton, some-times they have used the expression made of cotton or of which cotton is a component material of chief value, sometimes they

have used the expression made wholly or in chief value of cotton, sometimes they have used the expression made wholly, and sometimes they have used the expression made in whole or in part. In all there are six different forms of language in the textile schedules as they are now proposed that are used for the purpose, I presume, of conveying exactly the same idea.

The natural inference of anyone studying the bill is that when different language is used a different idea is sought to be conveyed, and I think it is very bad practice to use entirely different forms of expression in this way where I suppose there is no question about the fact that the meaning meant to be conveyed is always the same. These schedules are going to be subjected to the most exacting and careful scrutiny by some of the most skillful customhouse lawyers in the world the instant they are put into practice. Every word and every punctuation point will be studied for the purpose of seeing if the meaning can not be twisted in some way. I want to call the attention of Sena-tors on the other side who have these particular schedules under consideration, and to ask them if they will not give that matter their attention, for the purpose of seeing whether it should be corrected before the bill becomes a law?

The other day, in the course of some remarks, I spoke about the method by which the language of previous tariff laws had been twisted, and I referred to fabrics that were largely colored which, by the ingenuity of customhouse lawyers, have been classified as white goods. I have a sample to show exactly to what I refer, and I use it now simply to show the ingenuity with which it is possible for technical language to be twisted from its proper meaning. Certainly nobody would suppose that a fabric like that [exhibiting] could be classified as white goods. Nevertheless in the course of the litigation over the Dingley law that was what occurred. I am sure that if these varied expressions, two of which are sometimes used in the same paragraph in following sentences, the inference being natural that there must be some different purpose meant by the use of different language—I say, that if those are allowed to continue it merely gives an opening for litigation that I am sure neither side of the Chamber would care to have inaugurated.

Mr. WALSH. Mr. President, on yesterday I promised to have read from the desk to-day some letters which it seemed to me might throw some light upon the question as to why there were not more sugar-beet factories built in my State and in the State of the Senator from South Dakota [Mr. Sterling]. I now send those letters to the desk and ask that they may be read.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested. The Secretary read as follows:

THE GREAT WESTERN SUGAR Co., Denver, Colo., June 8, 1996.

Mr. H. O. HAVEMEYER, New York. Mr. H. O. HAVEMEYER, New York.

Dear Sir: The inclosed letter from Mr. Boettcher explains itself. Would like to know if you see any way to check this kind of competition. I sometimes think it is a mistake not listing our stock and offering it for sale; if people want to buy common stock we ought to give them a chance to come in. This is simply a suggestion. We are doing everything we can to discourage the building of any more factories until the matter of tariff legislation is more settled than it is at present. We are using that as a basis of argument against the building of any more factories.

Promoters like the Garden City and the Sheridan people are claiming that trusts have made great profits out of the business and in that way selling their stock.

Respectfully, yours,

C. S. Morey.

THE GREAT WESTERN SUGAR CO.,

Denver, Colo., June 27, 1996.

My Dear Mr. Morey: I had an interview to-day with the Colorado Springs people in reference to their contemplated factory to be built at Sheridan, Wyo.

Sheridan is situated on the Burlington route, a distance of 140 miles from Billings. If this factory is built, of course they will come in direct competition with our local points of the Billings factory. I was in hopes that I would be able to have these Colorado Springs people take an interest in our Billings factory and keep them from building this contemplated plant, but I fear I will not be able to do anything with them, as they tell me they have sold their common stock of the Garden City plant, which they are now building, at \$50 per share and upward. They frankly admit that this common stock is all water and does not represent anything—that is the way they are making their money. They feel they can do the same thing in Sheridan, and claim they have a ready sale for their common stock. Most of their stock is sold. They also expect to make a large profit on land they have purchased, and expect to build a number of ditches and sell out the land at a large profit.

chased, and expect to build a number of ditches and sell out the land at a large profit.

There is nothing I can say to them that would be attractive enough for them to discontinue their building the Sheridan factory, and I fear they will build a plant to be ready for the crop of 1907. The promoters of the scheme put in very little money of their own, as they seem to have the faculty of having their people put up the money, and they are getting the benefit of the common stock for themselves.

I understand Mr. McKinnle is going to Sheridan latter part of next week, and as I expect to go to Billings about the 5th of next month will stop off at Sheridan and look over the territory, and if there is

anything more I can do with these people to keep them from building a factory I will do so, although I have very little hopes.

I am just calling your attention to these items so you will know they raise the money for their new factories.

Very truly, yours, C. BOETTCHER.

Mr. C. S. Morey, Denver, Colo.

FEBRUARY 27, 1905.

Mr. T. R. CUTLER, Salt Lake City, Utah.

Salt Lake City, Utah.

Dhar Sir: Referring to yours of February 21, bearing upon Boutelle and his projects, I wired you to buy a tract of land in any town where Boutelle or his crowd buys one with a view and determination of building a competing factory. Boutelle is a very unreliable man; he represents a very unreliable crowd, and he is in it for the commission which the promotion gives him. He can be very easily knocked out.

If any territory about us is suitable and ready for a factory, we should be on the alert and provide it, and if you find any company having bought a tract of land in view of building a factory, do not hesitate to buy a tract in the same place and let the people understand that we are in earnest.

You should have an active man following him and his crowd up. Outside of the promotion feature they have no interest whatever, and so many of their enterprises have proved unsuccessful that it would be an advantage to the community to knock them out.

Yours, truly,

H. O. Havemeyer.

H. O. HAVEMEYER.

THE BILLINGS SUGAR Co., Denver, Colo., August 27, 1906.

Mr. C. S. MOREY, Harbor Springs, Mich.

Mr. C. S. Morey, Harbor Springs, Mich.

Dear Sir: * * * I tried to arrange with Mr. Cutler to have him agree to stay out of Montana points and we will stay out of Idaho, but he seems to think there are so few places in Idaho that we can reach that he would not agree to that, but they have agreed to stay out of places where our rate is less than theirs. I have also called on Mr. Eccles in reference to his building a factory in Bozeman. Mr. Eccles, however, did not return to meet my appointment, but I met Mr. Rolapp, and we talked the matter over, and they seem to calculate to build a factory at Bozeman. I explained our side of the case very fully, stating that everything was very high in Montana, that labor was exceptionally high, and if we had to make sugar at the Montana points to be shipped to Missouri River it certainly would be a losing scheme, as it would cost considerably more to make sugar in Montana than it would in Utah or Colorado, and our factory was large enough to supply all the local territory. He seemed to realize that fact and made a statement that they had not looked at it in that light and it was a new point to be brought up, and agreed that as soon as Mr. Eccles returned he would do any work.

ne would take it up with him and would probably see us before they would do any work.

Now, it seems to me foolish for our people in New York to agree to take a half interest with Mr. Eccles and come into direct competition with the Billings factory. Our people in New York should take the stand, and stay with it, not to put a dollar into these factories, and I feel satisfied that Mr. Eccles will not build this factory if our New York people take that stand.

Yery truly, yours,

C. Boettcher, President.

SALT LAKE CITY, April 11, 1905.

SALT LAKE CITY, April 11, 1965.

H. O. Havemeyer, Esq.,
117 Wall Street, New York, N. Y.

Dear Sir: * * Referring now to the question of western Idaho. I informed you that Boutelle and Hoover had been operating in the vicinity of Payette, and it was with extreme difficulty I was able to overcome their operations. After they decided to move their operations they went on to the vicinity of Nampa and tried to get in there, but I had forestalled them. There were also other parties operating in that field, and I have been working for the last 30 days to get these matters adjusted so that we could control the situation, because these people were effering \$5 for beets, and it would have upset our entire Idaho operations.

Yours, very truly,

Thomas R. Cutler,
General Manager.

THOMAS R. CUTLER, General Manager.

Mr. WALSH. Mr. President, I should say in explanation of these letters that they were introduced in evidence in the pending suit brought by the Government against the American Sugar

Refining Co. to adjudge it to be a trust.

The distinguished Senator from Kansas [Mr. Bristow] on yesterday addressed a question to me, but did not permit me to I desire to say this morning that I was not unaware of the fact to which he invited our attention-the difference between the European price and the New York price of sugar. I express my very great gratification at the view expressed by so good an authority as the Senator from Kansas that the price of sugar will be reduced only 60 cents a hundred pounds by the removal of the duty, because if our manufactory in Montana suffers no greater detriment or loss-in other words, if the price is not reduced more than that amount-it will be so much easier for it to meet the conditions which are about to confront us

Mr. SMOOT obtained the floor. Mr. BRISTOW. Mr. President, if the Senator from Utah will pardon me a moment, I wish to say that I am very glad, indeed, that the Senator from Montana has had incorporated into the Record the letters which have been read at the desk. They show very conclusively the efforts which the Sugar Refining Trust made to prevent the development of the beet-sugar industry; and the development of that industry in the face of this determined opposition on the part of Havemeyer and the trust shows that they failed in their efforts in attempting to control the beet-sugar production. Now, they have taken the other tack and are undertaking to destroy it by free sugar in lampton, Mass., in 1838, but due to lack of technical knowledge

stead of by undertaking to prevent the establishment of beet-sugar factories and controlling those already established.

Will the Senator from Utah yield to me for a Mr. REED.

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Missouri?

Mr. SMOOT. Certainly.

Mr. REED. Mr. President, I hardly think the statement made by the Senator from Kansas [Mr. Bristow] should go unchallenged in view of the fact that all the evidence thus far produced tends strongly to show that the so-called Sugar Trust and their allies exercise practically a control over the beet-sugar factories of this country to-day or, at least, a majority of them; so that if they are engaged in destroying the beet-sugar factories they are engaged in destroying a business in which they have a heavy financial interest. I do not say they hold a controlling interest in all, but the evidence very recently taken shows that they have a very large interest, if not a controlling interest, in a great number of them.

Mr. BRISTOW. The Senator unfortunately was engaged yesterday on other matters and was not present during the debate when I submitted a list of the factories in which the trust has an interest and the extent of the interest of the trust in each factory. That is to be found on page 3865 of the RECORD. I will advise the Senator that the trust does not now own anything like a majority of the stock in a majority of the factories; indeed, its percentage of stock in the beet-sugar factories to-day is very much less than it was at the time the effort was being made concerning which the Senator from Montana

has introduced letters this morning.

Mr. REED. I think the Senator is in part in error in his statement. There has been some juggling of this stock—a very suspicious juggling, so far as the evidence taken by the committee of which I happen to be a member is concerned—and it looks very much to me as though the stock was being handled by straw men, and that the controlling interest, or something near a controlling interest, does still exist in the trust. I think I can demonstrate that as to a large number of these factories; but I am not going to trespass further on the courtesy of the Senator from Utah at this time. If, however, that is to be an issue, I shall have something to say on it in the future.

Mr. BRISTOW. Of course I do not care to go into the arguments which I made yesterday and repeat them; but I think that it, was demonstrated yesterday that the beet-sugar production in this country was not controlled by the trust, and that the beet-sugar producer is the only competitor which the trust has in this market. I believe that has been demonstrated

beyond question.

Mr. WALSH. Mr. President-

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Montana?

Mr. SMOOT. Does the Senator from Montana want to make

any extended remarks?

Mr. WALSH. I merely desire to make a correction; that is all. Simply in the interest of accuracy, Mr. President, in view of the statement made by the Senator from Kansas, I think it due to the Senate to say, so that it may not be misled about the matter at all, that the Mr. Morey who writes and is written to in this matter is the president of the Great Western Sugar Co. One-third of the stock of that company is owned by the American Sugar Refining Co., as suggested by the Senator; one-third by the Havemeyer family, and the remaining third by other individuals represented by Mr. Morey. It appears that he was in conjunction with the American Sugar Refining Co. in the effort. The Mr. Eccles referred to in one of the letters was connected with the Utah Sugar Co., and I think was the president of that organization. He died a short time ago.

Mr. BRISTOW. If the Senator from Utah will pardon me again, the data which I submitted yesterday show that the trust owned 26 per cent of the common stock and 38 per cent of the preferred stock of the Great Western Sugar Co., of Colorado.

THE WILSON-UNDERWOOD BILL AND THE AMERICAN SUGAR INDUSTRY. Mr. SMOOT. Mr. President, in discussing the subject of the tariff on sugar and the effect which the removal of the duty on that commodity will have on the domestic sugar industry, it is essential to revert to the early history of and the vicissitudes through which the industry passed for several decades after its inception in this country. But this phase of the subject has been so ably presented upon the floor of this Chamber and elsewhere that I will not take the time of the Senate except to refer briefly to the first unsuccessful attempts to establish the industry in the United States.

The first beet-sugar factory in this country which succeeded in producing a small quantity of sugar was erected at North-

in both field and factory the plant operated but one season. At about this time the world production of beet sugar was 36,408 tons, of which France produced 25,000 tons and Germany 1,408 tons. Both in France and Germany, but more especially in the latter country, economists had begun to realize the direct and indirect value of the beet-sugar industry in increasing the national wealth, and these Governments gave every aid and assistance possible to encourage the expansion of the industry. From this meager beginning the production of these two countries gradually has increased until in the past year Germany produced 2.728,000 short tons of sugar and France 966,000 tons. If the same encouragement by the Government had been given to the industry in the United States that was given to it in Germany, instead of the early pioneers becoming discouraged and the expansion of the industry being allowed to lapse for decades, we long ago would have been producing all the sugar we consume, thereby saving the hundreds of millions of dollars which we have sent abroad for our sugar requirements, and in those sections of the country adapted to sugar-beet culture would be producing two bushels of cereal crops where we now produce but one.

The next attempt to establish the beet-sugar industry in this country forms what we believe to be an important economic event in the history of Utah, the State which I have the honor

in part to represent.

In 1852 Hon. John Taylor, one of the pioneer leaders in the attempt to establish a self-sustaining community in the untrodden wilderness west of the Rockies, far beyond the farthest outposts to which population had then penetrated, conceived the idea of introducing the culture of sugar beets and the manufacture of beet sugar. Established in France under the guidance of the great Napoleon the industry had proved its worth, both through its direct economic return and through the increase which it brought about in the yield of other crops. To France, therefore, an order was sent for the machinery necessary to equip a beet-sugar factory. It was shipped by a sailing vessel to New Orleans, there transferred to a river boat and carried the Mississippi and the Missouri to Fort Leavenworth. Thence it was hauled by ox teams across the plains and mountains a thousand miles farther, and finally it was set up in Salt Lake City in a building which still stands—an object of historic interest.

But while those early pioneers had the courage and the indomitable spirit to overcome the obstacles of distance and lack of transportation in bringing the equipment for their factory 7,000 miles, they lacked the knowledge and experience necessary to the successful conduct of this industry. They knew nothing of the proper methods of growing beets or of manu-racturing sugar. The factory could produce nothing but sirup, being unable to crystallize the juice, and so the attempt was soon abandoned. It passed into history as the third serious effort to establish the industry of sugar making from beets in the United States. Aside from its historic bearing it is of little present importance and I mention it here merely to call attention to the conditions of hardship, danger, and loss under which early attempts were made to establish this so-called "hothouse" industry which it is now proposed ruthlessly to destroy. I mention it also to call attention to the fact that the State which I have the honor to represent was one of the pioneers in the attempt to introduce an industry in the finally successful establishment and expansion of which she since has played a leading part, and which, if permitted to continue at the rapid growth which it has enjoyed for the past few years, would confer the greatest blessings upon the people of the whole United States.

Subsequently several unsuccessful attempts were made to establish the industry in Illinois, Wisconsin, New Jersey, and Maine, and it was not until 1879 that success was wrested from failure by Mr. E. H. Dyer, who erected a small plant at Alvarado, Cal., in that year. This factory since has been enlarged from time to time and is still in operation. American energy and perseverance now began to assert themselves, and from 1879 to 1891 five additional small but successful factories were

erected.

In 1890, with the adoption of the McKinley tariff bill, an effort was made to give direct support and encouragement to the production of sugar in the United States by the payment of a bounty of 2 cents a pound. This system has been employed with great success by European countries in the building up of the beet-sugar industry, which had added millions of dollars yearly to their farm wealth. It had been used by France, the early home of sugar-beet culture, by Germany, which had adopted and improved upon the French system, by Austria-Hungary, and by the smaller countries of northern Europe. An indirect bounty system is to-day in force in Russia, which has

been increasing its production at a very rapid rate and promises ultimately to become the greatest producer of beet sugar in the world.

With the example of these foreign nations before us, it was felt that the bounty system would lead to a more rapid development of this valuable industry in the United States than could

be achieved in any other way.

There was another reason for the adoption of the bounty system for the upbuilding of the industry rather than to attempt to rely upon the encouragement of a protective tariff on foreign importations. As the result of a long period during which the Republican Party had been in control, the Nation had emerged from the financial difficulties of Civil War days into a period of the greatest prosperity it had ever experienced up to that time. With economy in administration and with careful management of the revenues the Federal Government had accumulated a surplus, the disposition of which became one of the pressing questions of the day. With no need of the revenue that would be yielded by a duty on importations of sugar, the bounty plan was particularly attractive. I believe that it was a Republican Member of Congress—Hon. J. H. Gear of Iowa—who first suggested the bounty plan as the best solution of the problem presented by a growing surplus in the Treasury and a desire, which in that unenlightened age was considered commendable either in a Democrat or a Republican, to build up the domestic sugar industry. At any rate, the bounty plan was adopted. It provided for the payment of 2 cents directly from the Federal Treasury for every pound of sugar grown in the United States. In addition, certain States of the Union added a bounty of their own. I am proud to be able to say that my own State of Utah was again in the forefront of the effort to build up this great industry and placed a State bounty of a cent a pound on all beet sugar produced within its borders.

The enterprise and energy of Utah citizens responded to this appeal, and in 1891 a company was organized and started the manufacture of sugar from beets at Lehi, Utah. This factory, enlarged, improved, and greatly extended, is still in operation, and is one of the oldest factories in the United States that has

been continuously in operation.

The early years of the industry in Utah, as in other States, were years of desperate struggle to keep alive. Many times it seemed inevitable that the attempt must end in disastrous fail-The Federal bounty, pronounced unconstitutional, was cut off in two years. A period of Democratic administration, disaster, and panic followed. On every hand the industries of the country—industries that had been long established and had enjoyed a flourishing course for years, as well as these of more recent origin—were plunged into bankruptcy or existed under a pall of stagnation and loss. The rich Treasury surplus was no longer a source of embarrassment. It had disappeared soon after the Democratic Party came into power, and the Government was forced to the expedient of borrowing to meet its ordinary obligations. With such conditions prevailing throughout the country, it would seem that there could be slight hope for the struggling sugar industry. As a matter of fact, little impetus was given to the domestic sugar industry by the legislation of 1890; or, perhaps, it would be more accurate to say that it remained in effect for too short a time to yield any appreciable results. In spite of all discouragements, however, and in face of a long period of continuous and disheartening losses the pioneers of the industry in Utah continued their efforts. No chapter in the whole glorious record of American industrial achievement presents a brighter record of persistence in the face of almost overwhelming discouragements than does the early his-

tory of the beet-sugar industry in the Western States.

Thus down to 1897 the total net results of the attempt to establish the beet-sugar industry in the United States had been the erection of six small factories, each of which was making a desperate struggle for existence and was doomed apparently to early extinction. In that year the Republican Party, which had been definitely commissioned at the preceding election with the task of restoring prosperity to the calamity-ridden Nation, applied the policy of protection to the domestic sugar industry. The tariff rate placed on imported raw sugar was one calculated to yield a large amount of revenue and at the same time it fully equalized the difference between the rate of wages paid in the United States and in the beet-growing countries of Europe. It enabled the manufacturers of beet sugar to pay to American farmers a price for their beets sufficient to make the cultivation of the crop attractive and to pay to the labor employed in the fields and factories the rate of wages demanded by American standards of living. Those who entered upon the new business still had to face the hazards inseparable from the inception of a new industry. They had to learn efficient methods of operation. They had to teach the farmers how to

grow beets successfully and to show them the manifold advantages of the crop. Technical men, sufficiently trained in the management of the complex machinery, were not available in this country, and while foreign experts at first were employed, they were unable to adapt themselves to existing conditions, and difficulties in the management of the business were manifold. The business was an unusually hazardous one, but the assurance was held out to those who embarked upon it that if they persisted, if they followed a progressive course and brought it to the high plane of efficiency characteristic of American industry, that they would be enabled to place it upon a permanent basis of reasonable prosperity, subject to the competition of others working and producing under like conditions. That is all the assurance the leaders of American business enterprise ever have asked, and it was sufficient for the men who were struggling to establish this important addition to the agencies of our national prosperity. The record of growth and development recorded by the beet-sugar industry since that time is one to The record of growth and development challenge admiration.

The 6 struggling factories of 1897 have increased to 73, some among the largest in the world, others of more modest dimensions, but all important factors in promoting the business activities and the prosperity of important sections of the country. The output of sugar has advanced from 36,000 tons in 1898 to 700,000 tons in 1912, an increase of over 1,800 per cent. The culture of sugar beets has spread from a few localities in three States until it reaches out over 17 States, ranging all the way from Ohio to the Pacific coast. The number of farmers engaged in beet growing has increased from a few hundred to 60,000 to the pacific coast. or more and the number of workers engaged in various branches

of the industry to 150,000.

Mr. GALLINGER. Mr. President—
The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from New Hampshire?

Mr. SMOOT. I do.

Mr. GALLINGER. I was interested in the Senator's statement as to the enormous increase in the production of beet sugar in this country during the last 10 years, I believe. I will ask the Senator if it has been practically a progressive increase?

Mr. SMOOT. With one or two exceptions, Mr. President, which I will call attention to later in my remarks.

Mr. GALLINGER. But practically it has increased from year

Mr. SMOOT. From year to year, with exceptions noted.

Yet we are told that the beet-sugar industry has not made good; that it has enjoyed years of protection; that it has had its chance and, since it is not yet able to meet the competition of all the world, that it must be extirpated as a "hothouse" product and a failure. I maintain that in all industrial history, whether it be the history of the United States or of any other nation, you will find few industries that have made such rapid progress as this, that have so well repaid the extension of a measure of public encouragement, or that have given such clear proof as has the beet-sugar industry that, with a continuation of such attention and encouragement over a reasonable period, it would repay to the American people a thousandfold of all that it had received from them. What other industry can you name, one-half so difficult and complex of mastery as this, that in so brief a period of time has spread over a territory comprising nearly two-thirds of the agricultural area of the United States or that has multiplied its output at a pace anywhere approaching this same "hothouse" industry?

This record of growth is all the more remarkable when we consider that it has been made in the face of almost constant tariff agitation and of repeated reduction in the extent of protection accorded it. While it is true that only once before in the 16 years since 1897 has there been a general overhauling and reduction of tariff rates, it also is true that, so far as sugar is concerned, there have been successive material reductions. There has not been a year, there has been scarcely a moment, in all that period when the beet-sugar industry of the United States has not had to face either a reduction in the degree of protection accorded it or, what is equally or even more demoralizing, the constant agitation for tariff revision or reduction in

one form or another.

First of all, there was the Spanish-American War. came in 1898, the very first year after the definite application of the policy of protection to the beet-sugar industry of this country. It added new and important sugar-producing areas to the territory of the United States-Porto Rico and the Philipand for a time it seemed likely that Cuba, with its great possibilities for the production of sugar cane, might also become a permanent addition to our territory. In that same year another sugar-producing territory was added to this country by the annexation of Hawaii. While that act made no immediate

change in the conditions confronting the sugar producers of the continental portion of the United States, since Hawaiian sugar previously had been coming in duty free, it did make it certain that henceforth Hawaii was to be an integral part of our Nation, and that whatever policy of encouragement or devasta-tion was adopted by the dominant political party would be shared by the continental beet grower and the Hawaiian cane grower alike. Thus, in a single year there was added to the area

of the country these three insular territories.

The following table shows the imports of sugar into the United States from these three islands for the fiscal years 1898 and 1912, together with the percentage of increase during that

	. 1898	1912	Increase.
Hawaii Porto Rico Philippine Islands	Short tons. 249, 884 29, 226 14, 744	Short tons. 602, 732 367, 144 217, 785	

Next came the agitation for Cuban reciprocity. It began almost as soon as we had struck the shackles of Spanish dominion from our island neighbor, and it continued until the final adoption of the reciprocity act in 1904. The American people, so far as they took any interest in the matter, were for Cuban reciprocity because their hearts were full of kindness for the people of Cuba, whom we had set free and started on a career as an independent nation. They wanted to see Cuba succeed and prosper, and they were willing that out of the abundance of our strength we should aid their weakness. But the force that kept alive the agitation for Cuban reciprocity, that supplied the funds to keep it going and made possible the activities of societies with fine-sounding titles to fight for it was sugar; that is to say, it was the determination of the great seaboard refiners to secure an advantage in obtaining their supplies of raw sugar. to acquire a permanent differential against foreign competition. and to arm themselves with a new and powerful weapon with which to combat the growing beet-sugar industry of the United States, an industry which even then they had begun to see contained possibilities of seriously interfering with their future control of the sugar supply of the American people. told before a committee of this Senate within the past few weeks-I know not how true the charge is-that the Sugar. Trust in a single year spent \$750,000 to further the cause of Cuban reciprocity. Whatever the amount may have been, the adoption of Cuban reciprocity has been worth many millions of dollars to the big refiners, by making it possible for them to bring in the greater part of their raw material at less than the full rate of duty imposed by the Dingley law and by helping to hold back the growth of the beet-sugar in-That it had this effect may be clearly seen by the fact that in 1903, the year before Cuban reciprocity, the number of new beet-sugar factories projected in the United States was 94 and that in 1904 this number had fallen to 50, while the number of factories actually in operation had decreased by

The enactment of the Cuban reciprocity act, providing a reduction of 20 per cent of the full tariff rate on all sugar imported from Cuba, made it inevitable that that island would in time supply all the sugar required by the American people, aside from that of domestic production. It amounted, therefore, to a permanent reduction of the rate on 96° sugar from 1.685 cents a pound, the rate prescribed by the Dingley Act, to 1.348, a cut of roundly a third of a cent a pound in the rate of protection accorded to the domestic sugar producer. And it is to be noted that the condition of affairs which I have just said was made inevitable by the adoption of Cuban reciprocity actually has come into existence and that during the present year the sugar output of Cuba, added to that of the American producers, not only has equaled but actually has exceeded by half a million tons the total requirements of the American people.

With the protection which we have extended to Cuba the sugar production of the island has increased already to the point where it supplies the entire demand of the American market, aside from that portion of it supplied by the domestic sugar grower. The struggle between Cuba and the American grower of beet and cane for the control of that particles demand now supplied from our own soll is just beginning. Its effect on the producer can not be predicted with certainty. Its effect on the consumer, however, is not open to question. With the sugar schedule left as it stands to-day the struggle between these two contending forces is certain to keep the price of sugar to the consumer at the low level where it is to-day or to send it still lower. The fierce competition that will be waged between

the American sugar producer on the one side and the Cuban planter who reaches the American market through the great seaboard refiners is certain to provide cheap sugar for the

American people.

In any event Cuban reciprocity has served to thwart the growth of the domestic industry and has checked the building of many new beet-sugar factories in this country. Certainly this year has demonstrated the present rate is a competitive rate and that, we are told, is the goal of this proposed tariff legislation. Certainly the wise, the businesslike, and statesmanlike course to follow would be not to make too radical a change until we see the result of competition under it which is now reaching an acute stage.

Following the adoption of Cuban reciprocity by less than three years—in 1906—came the second American occupation of Cuba as the result of internal strife in the island. That action resulted in a well-grounded fear, which in some quarters became a strongly urged desire, that Cuba might become an American territory. Happily the exercise of firmness and tolerance made such a result unnecessary, but the possibility of it was sufficient to check again the expansion of the beet-sugar industry.

Two years later the national campaign of 1908 was waged with the tariff as the chief issue and in 1909 followed the actual revision of the tariff. The reduction made in the tariff rate on sugar was slight and in no way injured the domestic industry, but the uncertainty of that period as to the actual course that would be followed was sufficient to apply another brake to its development. As everyone knows the past three years have been years of constant agitation over the tariff, an agitation that is about to be crowned by the final act of destruction, if this bill which we are now discussing is adopted, if reason and conviction among the men who sit on the other side of this Chamber fail to rise superior to the command of a party caucus.

Thus, as I have said, throughout the entire period since 1897 the beet-sugar industry of the United States has been menaced by the prospect or the actual application of a reduction in the tariff duty upon sugar. That it has been able, in spite of this handicap, to spread from the shores of the Pacific to the slopes of the Alleghenies to multiply its production twentyfold is a record that challenges the admiration of the world, and that affords the most complete vindication of the policy and efforts of those who placed the present protective sugar tariff upon the statute books and of those who, in the face of repeated failures and discouragements, have helped to bring the industry to its

present stage of development.

The American people believe in this industry. They want to see it enabled to grow and develop until every pound of sugar consumed in the United States is grown from American soil. The American people have no especial fondness for the big sugar refiners nor have the refiners ever shown that they deserved any marks of particular favor from the public. great body of American citizens are not anxious to advance the interests and to enrich the pockets of the Sugar buckles, and Spreckels, or to do the bidding of Spreckels's man Friday, even though the leaders of the Democracy are ready to give ear to their claims and to follow their counsel, while the honest men who have the interests of the industry and of the people as a whole at heart are denied a hearing, and the attempt is made to hold them up to obloquy and scorn. do not expect that this warning will be heeded to-day, but the time will surely come when you Democratic Senators will realize its soundness and when you will regret in bitterness of spirit that you ever permitted yourselves to be bound to the chariot wheels of the great refiners.

I believe in the principle of protection to American industry. Under its benign application the United States has grown to greatness and prosperity as has no other nation in a similar space of time. Our wealth and progress, the high standards of living of our people—of those who labor with their hands no less than those who direct the labor of others—have become at once the marvel and the envy of the world. I believe, and I say unhesitatingly and without fear of successful contradiction, that in the whole range of tariff legislation, in the whole field of American industry, no better demonstration of the working out of the theory of the protective tariff can be found, no more complete vindication of the soundness of that theory can be asked than is afforded by the course of the domestic sugar industry during the past 15 years. That theory holds, if I understand it correctly, and I think that I do, that in the beginning, when protection is extended to a new industry the full amount of the duty imposed will be added to the price of the protected product. The people of the whole country—all of those, at least, who use the particular commodity in question—will pay something for the upbuilding of the new industry. The individual

contribution is a negligible amount. It is unfelt. But in the aggregate it provides the stimulus necessary to induce hundreds, perhaps thousands, perhaps tens of thousands, of producers to embark upon a new field of business that otherwise never could have been opened to them. As time goes on the industry expands; the number of domestic producers is multiplied; competition begins to be felt among them; it becomes more and more keen; under its influence prices come down; and at length we have a situation where we are wholly independent of the outside world and where prices are at the same level as though no customs duty had ever been levied or as near to that level as American standards of wages and American standards of living will permit.

So it has been with the domestic sugar industry of the United States. In the early part of the period to which I have referred the placing of a duty upon foreign-grown sugar undoubtedly operated to increase somewhat the price of sugar to the American consumer by almost the full amount of duty. The domestic producer of sugar then gauged his price-or, rather, the price was gauged for him—by the world price of sugar plus the dury, plus the charge for refining, plus transportation. The domestic plus the charge for refining, plus transportation. producer simply had to cut below this price sufficiently to get his product into any particular market that he might be seek-His profit was measured by the extent to which he could reduce his cost of production and selling below the figure thus established. This was the first stage of development. In that stage the cost of domestic production was higher than it is today, much higher than it will become in the future if the industry is permitted to continue its natural and orderly course of development. It was higher because the beet-growing farmers had not gained the experience necessary to the production of a high grade of beets and because the managers and employees of the sugar factories had not gained the practical skill necessary to securing the highest possible extraction of sugar from the beets. In the establishment of any industry in a new field new and special problems arise and the solution of these problems is a matter of time, expense, and effort. Even with a relatively high selling price, therefore, most of the beet-sugar factories made little or no money in these earlier years. Many of them were complete failures and the capital invested was a total loss.

Next we come to the second stage contemplated in the development of a domestic industry under a protective tariff-the stage of expansion and the building up of domestic competition. How did this work out in the case of the American production of sugar under the protective tariff? We are told as part of the attempt to justify the removal of the duty at this time that the American sugar industry has not grown; that it never could supply the amount of sugar required by the American people. Let us see about that. I have referred heretofore to the marvelous growth of the beet-sugar industry, but we must bear in mind that there also was the cane industry in Louisiana, Hawaii, and in Porto Rico likewise enjoying the stimulative influence of the protective policy. There was also the Cuban industry, which for the past nine years also has received the benefit of the same stimulus to the extent of enjoying a preferential entry into our market for her sugar equivalent to a protection of a third of a cent a pound against the rest of the world. Let us see whether the production of sugar has grown or not in these various sections during this period. I quote herewith the production for each of these Territories in 1903-4 and also in 1912-13. The figures are given in long tons:

	1903-4	1912-13
American beet-sugar territory Hawaii Louisiana and Texas Porto Rico. Philippines Cuba	Long tons, 208, 135 328, 103 215, 000 130, 000 84, 000 1, 040, 228	624,000
Total protected and partly protected sugar.  Total consumption of the United States.	2,005,466 2,767,162	4, 162, 000 3, 504, 182

Note.—It should be noted that the Louisiana crop was far below normal in 1912-13 on account of extensive flood damage in the State, The average production of Louisiana and Texas may be placed at 323,581 tons.

It thus will be seen that the production of sugar in purely American territory increased from 965,000 tons in 1903-4 to 1,787,000 tons in 1912-13 and this in spite of the destruction of a large part of the Louisiana crop in the latter year. In the same period the Cuban output advanced from slightly over 1,000,000 to more than 2,000,000 tons. Thus in each case there has been an increase of roundly 100 per cent.

Mr. SUTHERLAND. Mr. President-

The VICE PRESIDENT. Does the Senator from Utah yield to his colleague?

Mr. SUTHERLAND. My colleague has, I think, shown by the figures that the Cuban production of sugar has more than doubled since 1904.

Mr. SMOOT. In the nine years.

Mr. SUTHERLAND. That has been under the stimulation afforded by a reduction of the duty by 20 per cent. My colleague is familiar with the conditions in Cuba, and I ask him to state what he thinks will be the effect upon the production of sugar in Cuba of taking the duty entirely off—whether or not the production will not be vastly increased?

Mr. SMOOT. Mr. President, it is my opinion that the production of sugar in Cuba will greatly increase, although I must frankly state that I believe that the best sugar lands in Cuba are now being cultivated; but if domestic production in the United States were entirely eliminated, with this market right at Cuba's door, there is no question that its production of sugar would be increased.

Mr. SMITH of Michigan. Mr. President—
The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Michigan?

Mr. SMOOT. I do.

Mr. SMITH of Michigan. I have read recently the opinion of an eminent French statistician, who has made a very careful compilation of the sugar possibilities of Cuba, and he estimates, without any reservation whatever, that Cuba is capable of producing an annual crop of sugar aggregating more than 5,000,000 tons

Mr. SMOOT. I have no doubt, Mr. President, that the Cuban lands that are fitted for the production of sugar could

produce at least that amount or more.

It is interesting to compare with these figures the total consumption of sugar in the United States. In 1903-4 this was 2,767,162 tons, or 661,696 tons more than the total production of the domestic industry plus Cuba. In 1912-13 the estimated sugar requirements of the American people were 3,504,182 tons, 657,818 tons less than the combined production of the United States and Cuba. Thus we already have reached the position where protected and partially protected sugar supplies all the sugar required by our people. If we leave Cuba, our most important single source of supply at present, entirely out of account, the rate of growtl which the American sugar industry has shown in the past nine years would enable it to overtake the present sugar requirements of the American people in another decade. This effectively disposes of the claim that it is impossible even with adequate protection to satisfy our own needs in the matter of sugar from our own soil. Why, Senators, we have it on the authority of the Department of Agriculture that there are 274,000,000 acres of land in the United States adapted to sugar-Leaving entirely out of our reckoning the canegrowing portion of the United States, the utilization of only 1 acre in 50 of this available beet-growing area one year in four would provide all the sugar needed by the American people. Any one of a dozen States is capable of producing enough sugar to supply the whole country. It is ridiculous to assert that there is any insuperable obstacle, or any obstacle at all except that which the Democratic Party proposes now to erect, in the way of the American production of the entire American supply of sugar.

Thus we have seen that the protective tariff has been effective in building up the domestic sugar industry, in greatly expand-ing the output of sugar within American territory. Now, let us see how sugar has responded to the final test imposed by the protective theory as given by me a few moments ago. Has the policy of protection led to domestic competition? Has it reduced the cost of sugar to the consumer? These are the ques-

tions for us to decide.

As I have already explained, it was true during the early years of the development of the domestic sugar industry that the price at which beet sugar was sold in any part of the counwas determined by the price of refined cane sugar in New k. This was modified only by the fact that, owing to the prejudice against beet sugar which has been carefully and systematically fostered among the public and the grocery trade, the producer of beet sugar is compelled to dispose of his product at all times below the prevailing market price of cane re-The difference usually is 20 cents a hundred pounds, This has become a trade custom, although there is no sound reason for it. Pure beet sugar and pure cane sugar are chemically identical. Each will satisfy every use that the other can Each will satisfy every use that the other can be put to. With the present perfection of the manufacturing processes of beet sugar they are indistinguishable even by an

I am reminded, Mr. President, in this connection of an experience that I had when I was the manager of one of the mercantile establishments in Utah. I sold a sack of sugar to a lady in my home town. She saw the name "Lehi" and immediately sent it back and said that she did not want beet sugar, that she wanted cane sugar, because she could not make cakes and pastry so well with beet sugar as with cane. She happened to be a very close relative of mine, so I merely took the same sugar, put it into a cane sugar bag, and sent the same sugar back to her. About a week after she met me and said, "Now, don't you ever send me any more beet sugar; you send me the kind of sugar you sent me the last time-[Laughter.] That is about all the difference there is sugar." in it—the brand upon the sack, and nothing more.

With this modification, however, it was broadly true in earlier years that the price of beet sugar was determined by the price of cane sugar. Yet even during this early period the beet exercised an important influence upon the price of cane, for it has long been a phenomenon familiar to the trade that whenever beet sugar comes upon the market the wholesale price of refined cane sugar is reduced by the refiners and whenever beet sugar is off the market the price of the cane product is advanced by the refiners. Those who have perused the testimony taken by the Hardwick committee of the House of Representatives are aware that this condition was certified to alike by beet-sugar manufacturers, by the cane refiners, and by such expert authorities as Dr. Harvey W. Wiley.

Except in California, beet sugar is practically all manufac-

tured within a period of three months, extending from the be-ginning of October to the end of December. Usually the manu-facturers have found it necessary to sell their output as fast as they made it, so that until very recently almost the entire beet-sugar ouput for any one season had passed into the channels of trade by the end of the calendar year. During that three-month period, however, beet sugar has regularly per-formed the service for the American people of bringing about a reduction in wholesale prices. That reduction was forced upon the refiners in order to enable them to meet the competition of the domestic product that was being turned out by the various beet-sugar factories all the way from Michigan to California. In fact, the reduction in prices thus forced upon the refiners gave rise to bitter complaints on their part and explains the animosity with which they have pursued the domestic sugar industry in recent years, seeking to destroy it by the aid of Congress, since they could not do so by fair and open competition.

The proceedings of the Hardwick committee contain the testimony of the representatives of the various big refining interests—the American Sugar Refining Co., Arbuckles, Spreckels, and the rest-each admitting that the growing competition of beet sugar from American factories made it difficult, and in some cases impossible, for them to operate at a profit during the three-month period already referred to. I will not attempt to quote all these different witnesses, since their statements were in practical agreement, but I will give you the refiners' position in the words of Edwin F. Atkins, acting president of the American Sugar Refining Co., who summed up their situation in the following words:

Eastern refineries, not only the American Sugar Refining Co. but the others, have to reduce or close down until the beet sugars are out of the way. Any refining that is done between the 1st of October and the 1st of January is done without any profit and very often at a loss.

The influence of domestic beet sugar in reducing the price of sugar to the public and in preventing the refiners from squeezing the consumer at will was well illustrated during the year 1911. In that year, due to a general shortage resulting from crop failures in various parts of the world, the price of sugar became very high. The refiners, though handling stocks which they had purchased at much lower figures, took advantage of the impending shortage to run up their quotations during the summer months before the domestic crop came upon the market. Seeing a chance to make enormous profits they promptly forgot their solicitude for the consumer and proceeded to exact every cent that they could. It is noteworthy and instructive that in the very forefront of this movement was the man who has made the greatest parade and the loudest protest of his philanthropic desire to help the consumer. This man was Claus A. Spreckels, of the Federal Sugar Refining Co., working as usual through his sales agent, Frank C. Lowry, who figures in Washington as secretary of a phantom committee of wholesale grocers, but in New York becomes an active and energetic seller of his emplovers' sugar.

Between July 1 and September 20, 1911, the wholesale price of sugar in New York, as fixed by the refiners who were at that time in full control of the market, advanced from 5 cents a pound to figures varying from 6.75 cents to 7.50 cents. Appar-

ently the highest quotation of the American Sugar Refining Co., established toward the end of this period, was 6.75 cents, but patriots Spreckels and Lowry, the men who were devoting their money and time to the cause of free sugar in order to "help the consumer," were exacting a full half cent more than this, or 7.25 cents a pound, while the house of Arbuckle, headed by another gentleman who had dedicated himself to the cause of free sugar in the interest of the American consumer, put the price up still higher, to 7.50 cents.

The sugar which these refiners were handling during this period had all been produced, of course, during the preceding sea-The sole excuse for advancing the price was the threatened shortage for the approaching season, but so well did this excuse serve the refiners' purpose that they were able to reap tremendous profits during this brief period and to put into their pockets undoubtedly many times the amount that they have since expended so altruistically in promoting the cause of free sugar "in behalf of the consumer."

At the end of September, with the coming upon the market of American-grown and American-made beet sugar, the situation quickly changed. Sugar which had been selling at wholesale at 7.5 cents a pound and at retail in some instances as high as 10 cents a pound, began to drop back in price. The beet sugar was sold at prices ranging from 5½ to 5½ cents, and it forced the refiners down to the same level for their product during the period while the beet-sugar supply lasted. During this period of three months the wholesale price of sugar had advanced 2½ cents per pound, but the rise was checked when the beet-sugar product came onto the market, and within 10 weeks from this time the wholesale price of sugar was lowered 12 cents per pound. After January, 1912, when beet sugar was off the mar-ket, the refiners marked up the prices again; but during the time while the beet-sugar output was being produced it saved to the consuming public millions of dollars on their sugar bills. Without the domestic industry the American people would have been forced to go on paying the abnormal price of the summer for their sugar to the further enrichment of the refiners. one service entitles the domestic sugar industry to the gratitude and support of the American people rather than to an edict of decapitation.

Now let us turn to the situation during the past year. The beet-sugar crop of 1912-13 was by far the largest ever produced in this country. It exceeded by nearly 100,000 tons the best previous crop. When this 1912 beet-sugar crop came upon the market it did more than to force a mere temporary reduction in the prices made by the refiners. It put an end, for the time being at least, to the domination of sugar prices by the refiners. It put an end to the system by which price of sugar in other parts of the country were based on the New York prices, with the cost of transportation added, as a result of which it had become a trade axiom that the wholesale price of sugar always was lower in New York than in any other part of the country. With more than threescore beet-sugar factories competing among themselves, and competing also with the output of the cane refineries, the dominance of New York in price making was shattered. Throughout the autumn months, when the lowest quotation of the refiners in New York was 4.9 cents wholesale, sugar was being laid down in Chicago at 4.4 cents-a full half cent below the New York price-by the beet-sugar manu-It was placed on the St. Paul and Minneapolis market at 4.65 cents, and at the principal competitive points throughout the great central and western sections of the country the beet-sugar producers were providing sugar for the consumer at prices which were lower for the first time in history than the prices prevailing at the seaboard. In the face of this competition the big refiners not only were driven back to their strongholds along the coast, but the beet sugar even followed them Many of the refineries were closed down. Others continued to operate on part time. Mr. Spreckels, who talks loudly of cheaper sugar for consumers but shows a strange reluctance to do anything in a business way to lighten the consumer's burdens, closed down his establishment to await the time when beet sugar should be out of the way and he could operate more profitably.

Owing to the greater extent of the beet-sugar crop it was not as formerly entirely disposed of by January 1. It was the estimate of Mr. W. P. Willett, the expert employed by the Hardwick committee to aid its investigation and the man who is recognized as the foremost statistical authority on sugar in the United States, that about 60 per cent of the crop was carried over the first of the year. It was further estimated by Mr. Willett that the beet sugar produced by American farmers and manufactured in American factories had operated to save to consumers half a cent a pound in 1912, and that it would have the

effect of continuing this saving throughout 1913. If this be true, and I have not observed that anybody has attempted to con-trovert his statement, it means that the American beet-sugar industry has saved to the American people some \$75,000,000 in these two years over what they would have paid if the control of their sugar supply had been entirely in the hands of the big refiners, where the Democratic Party is now attempting to place it.

In this connection I wish to call the attention of the Senate to an article entitled "United States versus United Kingdom" in the issue of August 7, 1913, of Willett & Gray's Weekly Statistical Sugar Trade Journal, the effect of which is to show that the competition between our domestic sugar producers as compared with the world's market has caused a saving to the sugar consumer in the United States of \$25,500,000 during the first six months of the present year, and that this benefit is the equivalent of a reduction in the duty on sugar of 0.633 cent per pound, which means that the present effective Cuban duty of 1.348 cents has been reduced through open competition to 0.715 cent per pound. The article is as follows:
UNITED STATES VERSUS UNITED KINGDOM.

The saving to United States consumers by reason of refiners having abundant supplies of free and preferential raw sugars instead of having to go abroad for full-duty sugars in the world's markets is well shown by an analysis of the business of the first six months of 1913, as follows:

1. The average cost of 96° centrifugals to refiners was 3,433 cents per round.

1. The average cost of some control of the average selling price of refiners for standard fine granulated refined sugar was 4.203 cents per pound.

3. The average difference between raws and refined was 0.770 cent per pound.

4. The average cost of European beet sugar landed in the United States, at the parity value of 96° centrifugals, was 4.066 cents per pound.

9. The average cost of European beet sugar landed in the United States, at the parity value of 96° centrifugals, was 4.066 cents per pound.

5. No European beet sugars were needed and only small quantity imported bought last year. The refiners had a full supply of local sugars at cost of 0.633 cent per pound less than the world's price at Hamburg. Competition of local sugar producers lost to them not only the 0.337 cent per pound reciprocity advantage to Cuba but 0.296 cent per pound additional. Except for this competition our refiners must have paid 4.066 cents per pound for raw sugar at the world's basis, and, adding the same difference of 0.770 cent per pound for cost of refining and profit, our sugar consumers would have paid 0.633 cent per pound, or, say, about five-eighths cent per pound more (4.836 cents) than they did pay. This represents a saving to consumers of \$25.500,000 under our present protective duty from the competition between our domestic sugar producers and those of our island possessions and of Cuba. This benefit to consumers might also be considered as the equivalent of a reduction in the duty on sugar of 0.633 cent per pound, or, say, to a duty of 0.715 cent per pound on Cuban sugar.

6. On basis of world's value, our consumers received their sugar at world value plus a duty of 0.715 cent per pound on 96° test sugar.

7. The refiners of Great Britain during the same six months paid duty of 0.346 cent per pound on 96° sugar and bought beet sugar, 88° analysis, 94° test, at world's price, which averaged 2.10 cents per pound f. o. b. Hamburg. Adding freight and insurance to United Kingdom, 0.12 cent per pound, against American refiners' price of 4.203 cents per pound less duty than our full duty of 1.685 cents per pound, as an our full duty of 1.685 cents per pound less duty than our full duty of 1.685 cents per pound less duty than our full duty of 1.685 cents per pound on 96° test, so that our consumers paid 0.186 cent per pound less duty than our full duty of 1.685 cents per pound on 96°

There is another phase of this situation to which I desire to call your attention. Awhile ago I quoted the figures for production and consumption of sugar during the present year. figures show that the combined sugar output of Cuba and the United States was greater than the American people could con-Consequently some of this sugar must find a market Naturally the sugar to go to other markets is that elsewhere. of Cuba, since Cuba's product still pays 13 cents a pound to get into the United States. When the Cuban sugar crop of the current year began seeking the American market, about the 1st of January, the refiners, facing the necessity of meeting the competition of the domestic beet product, forced the prices of raw sugar down to 2 cents a pound. They cut their own charge for refining, which had stood at \$1.07 a hundred pounds at the beginning of the year, until it touched a lowwater mark of 58.5 cents a hundred pounds on March 19, 1913. By so doing they were able to place refined sugar on the market at practically 4 cents a pound. This situation prevailed through-out the early months of the year, but as the beet sugar gradually passed into consumption the refiners have increased their

margin until it stood on July 2 at 93 cents a hundred, while they still hold the Cuban planter down close to the 2-cent level. Does any reasoning being suppose for one instant that any power except the competition of American-grown beet sugar, which they could not control, would have induced these powerful refiners to lower the rate of toll which they exact from the sugar passing through their hands? Does anyone pretend to say for one moment that the refiners gave the American public the benefit of 25 or 35 cents a hundred pounds on the sugar entering into trade channels over a considerable period purely because of their love and affection for the public? Did they do it in 1911, when the price of sugar went up and there was no beet sugar on the market? Their whole past record gives instant refutation to such a supposition. The one single factor that has supplied cheap sugar to the American consumer during the past nine months-the only factor that could supply it-has been the American beet-sugar industry through the vigorous competition that it has forced the refiners to meet through the check that it has imposed upon the ability which the refiners otherwise would possess to manipulate sugar prices at will.

That sugar has been cheap during the period to which I am referring nobody, I suppose, will venture to deny. Housewives all over the country know that it has been cheaper than during any time for 15 years past. Merchants in every section have been advertising to sell sugar over their counters at from 4 to 4½ cents a pound. I hold in my hand an advertisement taken a few months ago from one of the newspapers published here in the city of Washington which quotes the best granulated sugar at 41 cents a pound. While the prices of other food products have continued to mount higher and higher, adding to the cost of living, sugar alone has shown a steady and material decrease in This is a service rendered to the consumers of the country to which the American beet-sugar industry has contributed. It is an important service. If you, the responsible legislative representatives of the Democratic Party, destroy competition; if you destroy the opportunity to secure cheap sugar through the destruction of this American industry, the people of the United States will remember your action. They will resent it and they

will repudiate you and your party.

But, some may say, even though the domestic sugar industry be destroyed by the removal of the tariff, may not we still have cheap sugar? Will not sugar refined in England or Germany or other countries come in here and force the refiners to reduce

prices? Let us see about that.

Sugar refining, as everyone knows, is probably the most highly concentrated business in the country. It is all in the hands of a few men, a few great concerns of enormous capitalization and resources. The report of the Hardwick investigating committee made the statement that half a dozen men absolutely dominated the business of refining sugar. I believe the number might safely be placed at even less than that. It is generally recognized that three big companies rule the industry, and of these three one is so much larger than the others that it completely overshadows them. The situation was aptly expressed by one of the witnesses before the Hardwick committee when he testified that "the independents"—meaning the so-called independent refiners-"go along under the umbrella of the trust." It is safe to say that that umbrella is not going to be extended to accommodate any newcomers, and that those who are now under it will act together to exclude any who may seek its protection.

I do not say that there is any illegal combination among the various sugar refiners to-day. I do not know whether there is or not. But I do say that there is no real, effective competition between them. That is self-evident from the fact that the big refiners, the larger of the so-called independents as well as the trust, at no time operate to the full melting capacity of their plants; the average, as shown by the brief of the United States district attorney, is 60 per cent. The manufacturer in any line of business who is engaged in real, aggressive competition runs his factory to its capacity, whenever trade conditions make such a course possible. He makes a fight for all the business he can handle, and is not content, as are these alleged independent refiners, to follow one big concern, not only in prices but even

to the extent of reducing output.

If the refiners who have been filling the ears of the public with the promises of what they will do for the relief of the poor downtrodden sugar consumer, who is getting his sugar to-day cheaper than at any time since the general rise in the cost of food products began, were earnest in their protestations, they had a wonderful opportunity to demonstrate their faith by works in 1911. With raw sugar on hand bought at a low price they could have stayed the rise that took place during the summer of that year before the beet sugar of the West arrived to stop and to reverse the movement. Did they do it? On the contrary, these alleged independents outstripped the trust itself in their race to extort the last possible penny from the pockets l

of the consumers. And when the Moses of free sugar, Mr. Frank C. Lowry, was confronted with these facts before a committee of this very Senate, he dropped for a moment his pose of philanthropic friend of the masses and brazenly admitted that he

was in business to get all he could out of it.

As I have said, I do not know that there exists to-day any actual agreement among the sugar refiners, but I certainly believe that before the ink is dry upon the signature to this bill, if it becomes a law, there will be an effective understanding among them, if it does not already exist, by which they will act together to drive out any attempt at outside competition and to preserve the American sugar market for their joint ex-

Shortly after this pending bill was brought forward at the present session of Congress Mr. Claus A. Spreckels was quoted in a published interview as making the boast that the refiners had nothing to fear from free sugar, because sugar could be refined here more cheaply than anywhere else in the world. claim is probably well founded. I am willing to give the re-finers full credit for having the most complete and perfect equipment, for maintaining a most effective organization in their industry, and for paying the lowest possible wages to their With the advantages which they now enjoy from their control of the domestic trade, modified only by the competition of home-grown beet sugar, with the additional advantages which they enjoy through their control of the chief sources of their raw material supply in Cuba, with unified and harmonious action among themselves, they will be able to repel all attempts at invasion and to preserve the sugar market of 100,000,000 people for themselves.

Mr. SMITH of Michigan. Mr. President—
The PRESIDING OFFICER (Mr. Hughes in the chair). Does the Senator from Utah yield to the Senator from Michigan?

Mr. SMOOT. I do.

Mr. SMITH of Michigan. I do not know whether the Senator intends to touch upon the dual aspect of that situation or not, but I recall that during the hearings before the House Committee on Ways and Means, of which I happened to be a member, about the time of Cuban reciprocity, this Mr. Atkins, whom the Senator from Utah characterizes as the head of the American Sugar Refining Co., told of very large holdings of sugar lands in Cuba; and I have not any doubt at all but that their holdings have been increased rather than diminished during the

years of their prosperity.

Mr. SMOOT. I do not believe there is a person who knows anything about the sugar industry who has ever denied it. I have never heard it denied that they have increased their holdings in Cuba. I wish I had here a statement which was handed to me, showing the amount of acres they do control.

Mr. SMITH of Michigan. My ears still tingle with a statement I heard from the lips of Mr. Atkins; but the Senator from Utah says he never heard anybody deny it. The difficulty is it is not asserted often enough; at least it has not been asserted often enough to reach the ears of the Democratic Party, who seem to be cooperating with them at this moment.

Mr. SMOOT. Mr. President, should a foreign refiner attempt to gain a foothold here, it will be easy for them to depress prices temporarily until he is driven out. Should any body of men attempt to operate a genuinely independent and competing refinery here, it will be easy for them to ruin such an enterprise, as others have been ruined, and that by the mere manipulation of prices without exposing themselves to any danger of the law. We would simply have over again on a larger scale the conditions that prevailed in the early days of the upbuilding of the Sugar Trust, when brief periods of cutthroat competition were followed by long periods of monopoly and high prices. have again the situation described by Henry O. Havemeyer, when he declared that there never was a war in the sugar trade for which the public did not pay the bill three or four times over.

Therefore I say to you, Senators, that the hope of competition arising from outside to replace the laboriously secured competition now afforded by the domestic sugar industry which you propose to strike down is a vain delusion and a snare. say that if this bill were honestly labeled it would be described, as to Schedule E, "A bill for the destruction of the domestic sugar industry and for the enrichment of the refuers beyond the dreams of avarice." That would be a just title, because I defy anybody to point to a single interest or to a single person in the whole United States who will derive any permanent and lasting benefit from its enactment save and except only the great seaboard sugar refiners.

I know that the claim has been made by Democratic Members of Congress, taking their inspiration and their facts from the disingenuous Mr. Lowry, in his rôle of friend of the consumer, that the removal of the tariff duty on sugar will save vast sums to the consumers of the country. The amounts named at different times and by different speakers have varied widely. I have seen it placed at \$150,000,000 a year and I have seen it placed at \$115,000,000. A few millions more or less in these claims does not matter, for they are all so extravagant and so ridiculous as scarcely to deserve attention. The greatest possible reduction in the cost to the consumer under conditions of the most genuine and active competition for our market by all the world would not amount to anything like this.

I am glad to say that no such figures have been seriously contended for on the floor of the Senate. Whatever may have been said in the heat of the campaign, when the Democratic national committee guilelessly circulated Mr. Spreckels's statements on this subject by the million, any Democratic Senator who repeats them in this Chamber challenges the judgment of the most distinguished of his colleagues, the very men composing the committee in charge of this bill. In their report of 1912, the Democratic members of the Finance Committee, then the minority members, state emphatically that very much the major part of the tax levied upon the consumer of sugars and sweets goes into the United States Treasury and only a minor part into the pockets of the producers. I am sure, therefore, that any assertion that the \$50,000,000 of revenue is only the minor fraction of the cost to the American consumer will be repudiated as quickly on that side of the Chamber as on this.

It is easy to demonstrate the falsity of the extravagant figures I have referred to and the correctness of the conclusion reached by the Democratic members of the Finance Committee in their

report last year.

To begin with, the maximum possible saving to the consumer under the conditions which I have suggested, conditions which never will be realized, is not to be reckoned by taking some arbitrary figure like 1.90 or 1.685 or 1.34 and multiplying the total sugar consumption by this amount. The true theo retical figure is to be obtained by taking the difference between the world price of sugar of a certain grade and the American price for sugar of the same grade. This measures the maximum amount of difference chargeable under any conceivable conditions to the tariff. That difference now never amounts to 1.90 cents a pound, practically never to 1.685 cents, seldom even to 1.348 cents. In other words, under existing conditions in the sugar industry of the United States, sugar sells at most times below parity, the term parity meaning in this connection the world price of sugar, registered by quotations at Hamburg, Germany, with the duty added. I have compiled from the weekly journal of Willett & Gray, the official organ of the sugar trade, a statement of New York and Hamburg quotations for the period from January 1, 1913, to July 1, 1913. This shows that during this entire period the New York price averaged 60 points below parity. In other words, the portion of the price paid by American consumers of sugar that could under any possible course of reasoning be charged to the tariff during this period was 1.08 cents. If all the sugar consumed by the American people were subject to this reduction, the maximum possible saving would be not \$150,000,000 nor \$115,000,000, but in round figures \$85,000,000, or about 88 cents a year for each consumer.

As to a great proportion of the sugar used by the American people, however, no saving of any sort would be possible under any circumstances so far as the consumer is concerned. Nearly one-third of the average annual consumption of sugar reaches the consumer indirectly through use in manufactured articles. An investigation of the cost of living in a large number of American families conducted in 1901 by the Department of Labor disclosed the fact that of the average per capita consumption of sugar in this country but 70 per cent reached the consumer directly as sugar, the other 30 per cent being used in various manufactured articles, such as candy, bread, bis-'cuits, and so forth.

Nobody will seriously contend that a reduction in the price of sugar amounting even to a cent and a half or 2 cents a pound would affect the retail price of these articles. It would amount at the utmost only to a fraction of a cent on the quantity of these commodities ordinarily purchased, and this slight difference would be promptly absorbed before it had a chance to reach the ultimate purchaser. It is not seriously contended that we would get a larger can of condensed milk for 10 cents, more sticks of chewing gum for a nickel, or that a 50-cent box of candy would sell for 49 cents if sugar were put on the free list.

Mr. JAMES. I should like to ask the Senator a question. The Senator argues that placing sugar on the free list would american not cheapen it to the consumer. Is it not a fact that when sugar by them.

was placed on the free list in 1890, within 30 days from that time the price of sugar fell 2 cents per pound to the consumer? Mr. SMOOT. Nearly so; and I hope the Senator will just wait and listen to me, and I will explain the reason why so

clearly I think that he himself must see it. Mr. JAMES. But, as a matter of fact, though, that is true,

is it not?

Mr. SMOOT. Yes; practically so; and, as a matter of fact, Mr. President, I want to say when sugar goes on the free list again it will immediately drop in price. There is no doubt about it. And it will remain there until the home producers are destroyed and the refiners have the market in their hands, and then will be the time when they will levy tribute on the consumers in this country and they will have to pay their demands.

Mr. JAMES. In other words, the argument of the Senator is that if 100,000,000 more consumers are given for the consumption of the world's production of sugar, those who are now interested in producing sugar for the consumption of the world will do, because we give them 100,000,000 more consumers, what they never have done, monopolize the price of sugar.

Mr. SMOOT. The Senator is absolutely mistaken, I say.

Mr. JAMES. The Senator is not mistaken.

Mr. SMOOT. I was speaking of the 100,000,000 consumers of American-produced sugar. I was discussing the local production of sugar. I do not care for the producer of sugar in I am not concerned in him. Let the Russian Government look after him, and that is what it is doing now, by paying him a bounty. I do not care for the German producer of sugar. I am only interested in the American producer of sugar.

Mr. JAMES. I should judge from the Senator's argument that that is true, and that he is not interested, either, in the

American consumer of sugar.

Mr. SMOOT. The Senator is absolutely wrong again, and I will explain to him before I get through why he is wrong.

Mr. JAMES. It will be interesting.

I hope the Senator will listen, and his patience Mr. SMOOT. will be rewarded.

Continuing at the place I was interrupted, I will state that a deduction of this portion of our natural consumption reduces the total possible saving from free sugar to \$59,500,000, or about

62 cents a year for each consumer.

But it must be remembered that the tariff on sugar is the greatest revenue producer on the entire list of dutiable articles. Sugar turns into the Treasury of the United States, roundly, \$50,000,000 a year. That sum is paid now by the people of the country about in proportion to their means. The rich consume more sugar than the merely well-to-do, and the family of moderate means uses more than the very poor family. This always has been one of the great advantages of sugar as an object of taxation; the tax is paid more nearly in proportion to ability to pay than is almost any other. If we cut off from the Treasury this \$50,000,000 a year, it is obvious that the money must be raised by some other form of taxation. This leaves but \$9,500,000, or about 10 cents per capita per year, as the amount that could be actually saved by the removal of the tariff on imported sugar, assuming that the consumer got the full benefit of it.

Now, Senators, while I do not for one moment admit that even this paltry saving, amounting to about 10 cents a year per capita, will be realized by the consumers of this country as the result of the removal of the tariff from sugar, I have no hesitation in saying that if the consumer were forced to pay that amount, or even ten times that amount, additional for his sugar in the course of a year that sum would be a small price indeed to pay for the benefits which every class of American citizens, no matter whether they live in beet or cane growing States or in States where not an ounce of sugar is or ever is likely to be produced, have derived from the upbuilding of this American industry, and which they will continue to derive in far greater measure if it is permitted to live and to expand until it supplies all the sugar required by the American people. The domestic sugar business to-day, though it is only on the threshold of its potential development, distributes to American industry, in round figures, \$150,000,000. That outlay is not confined to the sugar-growing sections of the United States nor to the people directly engaged in the production of sugar. It is used to buy all sorts of supplies-foodstuffs, dry goods, implements and machinery, animals, fertilizer, and everything else that is produced or dealt in in this country. It enriches the volume of trade in a thousand directions. It helps to pay the wages of American workmen employed in 10,000 different shops and factories. It is a vital part of the great interdependent scheme of American industry, helpful to its fellow industries and helped

Moreover, we are still putting into the pockets of foreigners \$100,000,000 every year for the sugar we still import from abroad. Permit the domestic industry to continue in existence and in healthful progress and in the course of a few more years that \$100,000,000 will no longer go into the pockets of foreigners but it will go into the pockets of American farmers and mer-chants and workmen. Then we shall have not \$150,000,000 but \$250,000,000 distributed by this industry through the varied channels of American industry and trade. Destroy the domestic industry and you divert this vast golden stream to the labor and capital of other lands, and the great sugar refiners will take toll of every dollar of it, for it will all pass through their hands. That is why I say that if it were conclusively proved—though it can not be proved—that the upbuilding of the industry of sugar growing in the United States would cost the consumers of the country all that the most ardent free trader claims that it costs in increased payment for their sugar it still would be the best investment they could possibly make. And the consumers of the United States would make it willingly, for they know that it would all be returned to them many times over. sumers of the United States are not demanding the sacrifice of this great and growing industry. The voice of the consumer has not been raised to demand the removal of this duty. He knows that sugar is the cheapest thing he buys, that it is the one thing entering into his living account that has been getting cheaper while all things else that he purchases have been growing dearer. It is true that all of us have received scores, perhaps hundreds, of little printed slips ostensibly representing the voices of consumers, but, as has been fully shown by his own admissions, they are but the disguised voice of Frank C. Lowry, the tool and agent of the refiners. His brain conceived them, his hand and Spreckels's money sent them here, and they are absolutely worthless as expressions of public sentiment.

I have already given reasons why the consumer will not save anything at all by the adoption of free sugar. If you remove the duty on sugar, destroy the domestic sugar industry, and hand the control of the sugar supply over to the little coterie of seaboard refiners—as you will if you pass this bill—the consumer not only will not secure his sugar more cheaply but he will pay more for it at most times and on the average than he

does to-day.

I do not mean to say that there will be no reduction at any time. I expect to see the price of sugar decline very sharply and materially soon after this bill goes into effect. I expect to see it continue at a low figure until the domestic sugar industry is driven out of existence or is crippled beyond hope of recovery When that point is reached I expect to see it advance again and to remain permanently at a high level except at such times as the refiners may find it necessary to scare off threatened competition or to annihilate would-be competitors. That is what every man who has studied trade conditions carefully and who is honest in the expression of his opinions expects to see as a

result of the adoption of this measure.

It is true that the proponents of this measure have denied that it involves the destruction of the beet-sugar industry of the United States. They began with the positive assertion that it would not harm any branch of the domestic sugar industry. In the face of governmental reports showing that the Louisiana cane industry could not survive under free sugar, in face of universal testimony to this effect, including the testimony of their guides and mentors, the big refiners, they were forced to abandon this position. They then conceded that the Louisiana cane industry would be destroyed root and branch, and they took the position that Louisiana had no claim to consideration; that if its chief industry, which has been the life work of a great proportion of its people, the only business that they know, and in which they have invested \$100,000,000, relying upon the fact that almost from the very inception of the American Government, with the exception of the brief interval of the direct bounty, there has been at least a revenue duty upon sugar-the advocates of free sugar calmly told these American citizens that if their one great industry could not withstand the chilling blasts of free trade then it was fit only for dissolution. ana is to be outlawed. Its people are to be cast beyond the pale. That is Louisiana's reward at the hands of the Democratic Party for generations of unswerving loyalty to that party through long years of adversity as well as in its rare seasons of prosperity and power.

In the face of further accumulating evidence that it costs 3 cents a pound and upward to produce sugar in Hawaii and in Porto Rico under the conditions of rising wages, better standards of living, and increased cost of transportation that have come to prevail in these islands since they came under the American flag, the free-sugar advocates have come to the point of admitting that the sugar industry of Hawaii and Porto of growing the beets themselves, the situation is entirely dif-Rico—the one industry on which the people of those islands ferent. Here it is a matter of labor, hard, toilsome labor

chiefly depend, the industry that provides their revenues and is the source of such prosperity as they enjoy-also will be totally destroyed. Some of them still insist, however, that the beetsugar industry can in large part survive free trade, that the farmers and workmen of the West engaged in this industry must be taught to meet the competition of the cheapest labor on the face of the globe. They adnit, with an airy dismissal on the face of the globe. They admit, with the beet-sugar fac-of the subject as one of small moment, that the beet-sugar fac-tories which are not "advantageously located," those that are not "efficiently managed" are doomed to go under. But they insist that others will be able to survive. "Be efficient," they say, "introduce economies in the growing of your beets and in the management of your factories, and you will be all right." It is easy to settle the most desperate of human problems if one relies serenely upon a preconceived theory and waves aside all unpleasant facts that contradict that theory. Gentlemen, I know the sugar-beet industry of Utah, and Utah, I believe, is one of the States which these free-trade theorists regard as favorably located for the perpetuation of this industry. A very simple examination of easily accessible facts will show that not one single beet-sugar field or factory in any part of the United States can long survive the removal of the duty on sugar. lowest cost of producing sugar from beets that ever has been reported from any part of the country was 2.70 cents a pound. That was reported from a single factory in California. The cost reported by every other factory in that or other States ranges from 3 to 4 cents a pound. And we have it on the authority of the greatest sugar experts in America; we have it on the thority of the cold, hard facts of the cost of production in Cuba, in Java, and in other countries employing the lowest grade of black and brown and yellow labor; we have it on the undisputable evidence of the price at which Cuban sugar is seeking the American market to-day that any locality that can not com-pete with raw sugar landed at New York at a cost of 2 cents a pound can not continue in the sugar business after this bill goes Why, Senators, there is not a beet-sugar factory in into effect. the United States to-day that is not paying the farmers of their territory more than 2 cents a pound for raw sugar in the beet before ever it enters on any of the factory processes for the extraction of the sugar contents.

I know that in putting into plain words this one fact I am but confirming in the mind of the free-trade theorist, who views all things through the misty veil of his theory and regards the practical experience of the business world with supreme disdain, the conviction that the sugar-beet industry deserves no other fate than prompt annihilation. We have heard his voice raised in discussion of this subject. We have heard him declare that if any American industry can not exist without a tariff, if it can not meet the competition of the lowest-paid labor in the world, then that one fact is proof positive that God Almighty did not intend that industry to exist in this country.

I do not agree with that view. If that theory had governed

us from the beginning, we would be a hundred years behind where we are to-day. We would not have that splendid array where we are to-day. We would not have that splendid array of great industries that dots our land from border to border. We would not be shipping to other nations that vast volume of manufactured articles the totals of which are announced with such just pride by the Department of Commerce. Many of these industries may not need the tariff to-day, but there are few, very few, of them that would have risen to a position where they could contend for foreign markets, or even for the home market, except for the intelligent, progressive application of the protective principle in the earlier period of their develop-

It is well enough to say to the farmer and the manufacturer: Be efficient; introduce economies; reduce the cost of your product. There are many farms and factories, no doubt, possibly there are whole industries, in which more efficient and economical methods could be introduced without any sacrifice of the interests of American labor; but how in the name of common sense are you going to reduce cost in an industry in which the one great item of cost is labor unless you reduce the reward of labor itself?

That is the condition in the beet-sugar industry. labor. Eighty per cent or more of the cost of producing sugar goes for labor. The work of sugar extraction in the newer The work of sugar extraction in the newer beet-sugar factories of the United States is as efficiently conducted as it is anywhere in the world. The workers in these factories are paid four times the wages paid to those in similar employment in Europe. But factory labor cost is relatively a small part of the cost of extracting sugar. The processes by which it is accomplished are mainly processes of wonderfully ingenious and perfect machinery.

But when we come to the field and the farm, to the process

during the long summer days from the time when the seed is put into the ground until the crop is harvested and shipped to The time may come when, through the discoveries of science and the application of inventive genius, much of this labor now performed by hand will be carried on by machinery that will greatly lighten the burden of the tiller of the fields. That day is not yet. When it arrives, if it ever does, it will be time enough to talk about the removal of the tariff on sugar. It is true that the American beet farmer receives a far higher price for his product and the beet-field worker from five to ten times the wage for his toil that is paid to the peasants who perform the same labor in Europe or to the peons who work in the cane fields of the Tropics, but he lives on a far higher plane; he must conform to a higher standard of living to be a fit citizen of this Republic, and no self-respecting American will ask or concede that he be ground down for the further enrichment of a mere handful of wealthy sugar refiners.

I know it has been charged that the labor in American sugarbeet fields is labor of an inferior grade, that it is recruited from all the countries of Europe and that it is not entitled to the consideration due to genuine Americans. Here again I might quote from the report submitted last year by the distinguished members of the Finance Committee, who are in charge of this bill, in which they specifically contrast the "in-telligent, efficient, white labor," engaged in the production of beet sugar with the unintelligent and inefficient labor producing foreign cane sugar. Further than this, however, I can say of my own knowledge that so far as the State of Utah is concerned, that claim is part and parcel of the numberless false assertions put out by those who would destroy this industry at any cost of truth or honesty, for their own profit. The beets grown in Utah are grown by native American farmers on their own little farms and the labor devoted to the task is their own labor and the labor of their sons and hired helpers, the latter, too, being mostly of American stock. If in other sections there is a larger proportion of those who have come to us but recently from the other side of the ocean, seeking here a better living and a better opportunity, I say that so long as we receive these people, so long as we permit them to come, we have got to give them an opportunity to earn good wages, to rise to the level of those who have preceded them, and to rear their children as good Americans should be reared. We have got to do it in de-fense of those who are already here and in defense of popular government.

I for one will never ask of the farmers and wage earners of this country, whether they be descended from those who first landed on our shores or whether they be among those who have most recently sought the haven of America, that they shall place themselves upon the level of the half-naked and halfbarbarous workers in the cane fields of foreign tropical lands, wearing but a single garment, living in miserable huts, without fire and without light, subsisting upon the uncooked food that kindly nature provides about them. I will not ask them to descend to the level of the blacks of Cuba or the brown men of Java, who toil in the cane fields for 8 cents a day, or the yellow men of Formosa, who labor under conditions forced upon them by their cruel masters of Nippon, conditions that no American laborer for a single moment would accept. Nor will the American people ask or permit any such thing. Yet only by such means, if their application were conceivable, would it be possible to compete with that very labor in this industry.

The evil and disaster inflicted by the sugar schedule of this bill will be general and widespread. It will destroy the prosperity and blast the progress of Louisiana, Hawaii, and Porto Rico. Its malign influence will extend to every industry and every factory that finds a market for any portion of its product among the people of any of these sections. The one feature of it to which I wish to refer briefly at the present time, however, is its effect upon the prosperity and development of the West. And in doing this I do not desire to put forward any claim for preferential treatment for my own part of the country. I do not believe that sectional lines should play any part in the construction of a tariff bill. I never have asked any consideration for the people and the industries of Utah that I was not willing to ask for New England or New Jersey or Alabama, or any other State in the Union. It is only because I believe that the welfare of all sections of our country and of all of our people should be the governing factor in legislation so directly affecting their prosperity as does tariff legislation that I am moved to make any reference to the gross inequalities of this bill in its treatment of different sections of the country.

It is no secret that the burdens of this bill will bear with particularly onerous weight upon the people and the industries of the West. Distinguished Senators upon the Democratic side have given damning and convincing proof of this fact. They

have made eloquent but ineffectual protest against the sacrifice of their people on the altar of the impractical and outworn theory of free trade. I do not charge that this measure was conceived in a spirit of hostility to the West. But I do say that if hostility to the West and a wanton desire to tear down the structure of hard-earned prosperity that has been reared in that great section of our country within the past few years had been the impelling motive, it is difficult to conceive of any means by which the work could have been made any more complete than it is in this bill as it stands to-day. And while this applies to many sections of the bill, it applies especially to Schedule E, not only for the reason that the Western States from the beginning have led in the development of the beet-sugar industry, but also because the sugar beet plays a part in the economy and progress of the West that no other product does or can play.

It would be difficult, and it is unnecessary to attempt to compute the vast additions to the wealth of the United States that have been made by the application of the policy of reclamation to what was once described as the arid West. Before the inception of this policy land as rich and fertile as any on the face of the globe lay idle because of lack of water. Of the transformation that has been wrought as a result of remedying that lack through vast governmental and private works of irrigation I do not need to speak. The wisdom of that policy has been demonstrated so fully and convincingly by its practical results that nobody now would publicly advocate its abandonment. It has added and is destined in the future to add enormously to the food-producing power of the United States.

mously to the food-producing power of the United States. Reclamation of and by itself, however, has not been able to solve the problems or to remove the handicap of the West. The great handicap of the West has long been its distance from the great markets of the country, or, since the measure of distance in this matter of marketing is cost rather than miles, we may describe it as the high cost of transporting its products to market. The ordinary products of the farm are bulky; it is necessary to change them into forms that are more easily handled. Corn and hay can not be shipped profitably for long distances, but when converted into beef and wool they can be. It is because of its adaptability to conversion into small bulk and weight that the sugar beet has proved such a boon to the West, and especially to those regions in which the use of irrigation is necessary.

The very first State in which the attempt was made to grow sugar beets on irrigated land, I am proud to say, was my own State of Utah. The results obtained there and in other places since that time have shown that sugar beets are one of the crops best adapted to growth under the conditions that surround the reclaimed lands of the West. For purposes of transportation the weight of a ton of beets can be compressed into about 15 per cent of its original amount. Furthermore, the crop is one that responds liberally to the methods of intensive cultivation necessary for the proper utilization of irrigated lands. This tariff bill, if enacted, will strike a serious blow to the development of the reclaimed areas of the West and will cripple the magnificent results accomplished by some of the great works that already have been constructed.

I want to say in passing that one feature of this bill as it applies to sugar betrays a degree of political cunning and astuteness, I might even say a species of political trickery, that I believe can not be matched in any other tariff measure that ever has been proposed in this country. I refer to the date at which the free-sugar provision of this measure is to take effect. It is to go into force not immediately or in the near future but nearly three years hence, just before the opening of the next national campaign, just at a time when the reduction in prices which the refiners must permit in order to destroy their domestic competitors can be pointed out with greatest political force and effect, just too late for the full extent of the destruction and loss resulting from its enactment to be realized by the people before they are called upon to pass judgment upon the present administration. It was no mere statesman seeking to promote the welfare of the people, no mere economist in love with a theory and determined to put it into effect at any cost to himself, who fixed that date. That was the wily act of a shrewd political manipulator seeking to fool the American public for the perpetuation of his party's power. And while the domestic producers of sugar doubtless are grateful for this three-year respite in which to wind up their affairs and turn to some other occupation, if such they can find, I do not believe that they are under any delusions as to the impelling motives behind this act of seeming grace.

Aside from this one purpose of a possible advantage in serving the political fortunes of the Democratic Party, aside from its great and very definite material advantages to a small group of wealthy and powerful sugar refiners and a few Louisi-

ana money lenders, it is impossible to find any reason, any excuse, any palliation even, for the enactment of the sugar schedule of this bill. It is not demanded by the political principles of any political party, not even of the Democratic Party, so far as the past records and public declarations of that party reveal. proposes to destroy a great and growing industry in which the welfare, the prosperity, the very livelihood of hundreds of thousands of American citizens are bound up. Its effect will be to lay waste smiling farm lands and thriving communities as no purely physical scourge ever visited upon any part of the country has done. It proposes to partially devastate our in-sular possessions. Their people have no voice here in the decision of this matter, so vital to them, but they have intrusted their lives and their possessions to our keeping with full confidence of receiving honorable and just treatment at our hands. That confidence the Democratic Party is about to shatter and betray. The enactment of this bill will hand over to the tender mercies of a little group of sugar refiners the absolute control of the sugar market of 100,000,000 American sugar consumers. It is a bill to promote monopoly, to destroy competition. contravenes the established economic policy of every civilized nation in the world. It serves the interests of a handful of men at the expense of the whole body of citizens of this Republic. It is without a single redeeming feature. It is so indefensible that the crack of the party whip, promises and threats, all are reputed, if reports are true, to have been expended upon the able, experienced, and statesmanlike members of the majority in a desperate effort to hold them in line for this one provision, which is so much worse than other portions of a bad measure that their sense of decency revolts at the prospect of voting for it.

It is not my place nor inclination to show that the action contemplated by this bill in relation to sugar is a base betrayal of the pledges given to the people by the Democratic Party through its platform and through the public and private utterances of its party defenders during the last national campaign. That task has been performed more convincingly, with more intimate information and with greater ability than I possess, by Democratic Members of this Congress. It has been told how the committee that framed the Democratic platform refused specifically and definitely to grant the requests showered upon them by the representative of the refiners to place a free-sugar plank in that platform. I recall that just about a year ago the distinguished Senator from Mississippi stood upon this very floor defending the report to which I have previously referred, the report that rejected the free-sugar bill passed by the Demo-cratic majority of the House of Representatives—and passed, as was admitted at the time, only because it was certain not to become law. It substituted for that bill a reduction in the existing duty, a reduction that I believed then was too drastic for the safety and progress of the domestic sugar industry, but still a reduction that preserved two-thirds of the existing rate of duty. In defense of that action the report declared:

It seemed to us that this

The entire removal of the sugar duty-

was not in keeping with the promise of the Democratic platform to reduce present protective duties "gradually" toward and finally to a revenue basis. We have seen no reason why sugar should have been excepted from the general policy advocated by the Democratic Party and believed by us to be right.

Mr. SMITH of Michigan. From what is the Senator quoting? Mr. SMOOT. This is the report that was made by the Democratic members of the Finance Committee on the sugar schedule of a year ago.

Mr. SMITH of Michigan. By whom was it signed? Does the

Senator recall? Mr. SMOOT. By the Senator from Mississippi [Mr. WII-LIAMS], by the Senator from North Carolina [Mr. SIMMONS], by the Senator from Missouri [Mr. STONE], and by the Senator

from Maine [Mr. Johnson].

Mr. SMITH of Michigan. The then Senator from Texas, Mr. Bailey, also signed it, I believe.

Mr. SMOOT. Perhaps so.

Mr. GALLINGER. Will the Senator reread that, please?

Mr. SMOOT. Yes. There were also one or two other Democratic Senators who signed the report. I can not recall them at this time. I repeat the statement made in their report:

It seemed to us that this-

That is, the action of the House in providing for free sugarwas not in keeping with the promise of the Democratic platform to reduce present protective duties "gradually" toward and finally to a revenue basis. We have seen no reason why sugar should have been excepted from the general policy advocated by the Democratic Party and believed by us to be right.

Mr. SMITH of Michigan. Is the Senator still quoting from the report?

Mr. SMOOT. Yes; what I have read is a part of the report. Mr. SMITH of Michigan. If the Senator will pardon me, I should like to place in the RECORD a couple of names he did not

The PRESIDING OFFICER. Does the Senator from Utah yield for that purpose?

Mr. SMOOT.

To do so is perfectly satisfactory to me. Mr. SMITH of Michigan. John W. Kern, of Indiana, seems to be in the list, and Joseph W. Bailey.

Mr. SMOOT. I knew there were two names that I had forgotten.

Mr. SMITH of Michigan. As well as the chairman of the Finance Committee [Mr. Simmons], a member of the Finance Committee [Mr. Stone], and the Senator from Mississippi [Mr. WILLIAMS], to whom the Senator has referred.

Mr. SMOOT. I recall, as I say, that the Senator from Mississippi upheld that position, which he had taken in company with other leaders on the Democratic side, with his customary great ability, and that he then made the statement-

There is not the slightest anticipation in the mind of any intelligent man that sugar will be placed upon the free list, not even if a Democratic Senate and a Democratic House and a Democratic President come into power.

Mr. NORRIS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Nebraska?

Mr. SMOOT. I yield. Mr. NORRIS. I should like to inquire of the Senator where that statement was made.

Mr. SMOOT. It was made on the floor of the Senate.

Mr. NORRIS. Can the Senator give me the page? Mr. SMOOT. Page 9744, on July 27.

Mr. NORRIS. July 27 last? Mr. SMOOT. No; a year ago, 1912.

Mr. MARTINE of New Jersey. Mr. President, I should like to say that in the opinion of very many people in this country the fact that they have changed their minds is an evidence of intelligence.

Mr. SMITH of Michigan. Not too often, however. Mr. SMOOT. I have heard the Senator from New Jersey make that statement frequently. I think he must change his mind quite often

Mr. MARTINE of New Jersey. The Senator should not

delude himself with that idea.

Mr. NORRIS. If the Senator will permit me, I should like to suggest that at least the Senator from Mississippi [Mr. WIL-LIAMS] has not changed his mind, unless he has done so within the last 24 hours.

Mr. MARTINE of New Jersey. I am not talking about the Senator from Mississippi. I say that in the opinion of very many people in this broad land it is an evidence of intelligence that these gentlemen may have changed their minds; and some of them have.

Mr. NORRIS. As an abstract proposition, that is true. statement the Senator read was a statement made by the Sena-

tor from Mississippi, as I understood.

Mr. SUTHERLAND. If they change their minds too often, it is an evidence of instability.

Mr. GALLINGER. It seems to me, whether it is an evidence of intelligence or not, depends upon the direction in which they change their minds.

Mr. MARTINE of New Jersey. They have changed their minds in the direction of the relief of the people, thank God.

Mr. SMOOT. The fact that they have changed their minds in this particular case is, to me, an evidence of instability, to say the least.

Mr. President, I believe that the Senator from Mississippi was absolutely sincere and correct in making that declaration. I believe that there was no anticipation in the minds of men in public or private life throughout the country generally that the Democratic Party would make the abject betrayal of American sugar producers and consumers into the hands of the refiners which it is now preparing to make. Certainly there was nothing in its platform or in the speeches of its candidates to give rise to any such anticipation.

Throughout the campaign, wherever the Democratic orators spoke upon the tariff issue, whether they spoke in those vague general phrases which they so much delight in, whether they referred to general revision or specifically to action upon the sugar schedule, they gave no hint of any such purpose as is now taking place in this Senate. On the contrary, when this issue of sugar was presented squarely to them they gave assurances which, however they may have construed them, they knew would be construed by their hearers as a declaration to reduce the sugar duties moderately and gradually, if at all. This happened not once but many times. The whole tenor of their public utterances was that any revision of the sugar duties would be so moderate and so gradual as not to injure or retard the domestic sugar industry. In the language of the report prepared by the Democratic members of the Senate Finance Committee of the Sixty-second Congress, from which I have previously quoted, there was to be "a gradual reduction toward a revenue basis." Is the absolute removal of all duty on this product, the placing of it on the free list, to be construed as reduction "toward a revenue basis"? I think not. Not until the votes were safely counted, not until the electoral college had met and acted, not until after the Democratic nominee was actually an occupant of the White House was there the slightest hint that free sugar was to be demanded as a part of Democratic tariff revision.

I shall not venture to characterize this course as it might be characterized. I shall not attempt to fathom the motives that led many of the campaign speakers of the Democratic Party to declare themselves against free sugar in October, before election, and for free sugar in March, after election. I will say that if the placing of sugar upon the free list was contemplated, if any candidate for public office sincerely believed that to remove this duty was a matter of moral right or public policy, the brave, the manly, and the honest thing for him to do would have been to declare his purpose in terms not to be misunderstood, regardless of the effect upon his personal political fortunes.

Why mince words? Senators—you who sit upon the other side of this Chamber—I believe, I think you believe, the whole country believes that if many of you vote according to your honest convictions and sincere beliefs this schedule will be greatly modified or overwhelmingly rejected. You who represent the great sugar-producing States of the West and South know that it will inflict injury and loss upon the people who sent you here. If reports are true, some of you have given pledges and promises to your own people to oppose any such measure as this, and your people know that opposition to be anything but a sham must manifest itself by acts and not merely by words. What account are you going to give of your stewardship? Are you going to be true to the welfare and the interests of the sovereign States whose ambassadors you are? Are you going to vote your own honest convictions or are you going to accept dumbly and with averted faces this iniquitous provision, which is violative of the preelection promises of the great party which you honor by your allegiance, this provision which emerges here not from the commingling of minds in any legislative council, but which is reported to the Senate under caucus instructions like an imperial ukase from the throne of a czar, and which you are commanded to accept without protest. without change, and without discussion? The American people await your answer.

Mr. President, last evening, just before the adjournment of the Senate, a question arose as to what sugar refiners were in favor of free sugar and what refiners were not. I have here verbatim extracts taken from the testimony of the representatives of the big refining interests before the special committee on the investigation of the American Sugar Refining Co. and others. It shows that the refiners are united in seeking either free sugar or a drastic reduction. I do not care to take the time of the Senate to read these statements, but will ask that they may be printed in the RECORD without reading.

The PRESIDING OFFICER. Unless there is objection, it will

be so ordered.

The matter referred to is as follows:

# APPENDIX A.

FREE SUGAR IS DEMANDED BY THE SUGAR REFINERS AND WILL BENEFIT THEM DIRECTLY.

EDWIN F. ATKINS, ACTING PRESIDENT OF THE AMERICAN SUGAR REFINING CO.

The CHAIRMAN. Is it really on account of the competition, Mr.

The Charman. Is it really on account of the competition, Mr. Atkins?

Mr. Atkins. I think so * * * the beet sugars are taking away the trade of the refiners year by year (p. 48).

Mr. Madison. So you can hardly ascribe it to the fierce competition by the beet-sugar people?

Mr. Atkins. Certainly. All that beet sugar comes on the market at a certain season of the year. It is all produced in about three months' time. They all want to market it just as rapidly as possible, and in order to do that they come to the eastern points. California sugar comes into Chicago and the Michigan sugar into Buffalo and Pittsburgh; and eastern refineries, not only the American Sugar Refining Co. but the others, have to reduce or close down until the beet sugars are out of the way. Any refining that is done between the 1st of October and the 1st of January is done without any profit and very often at a loss.

Mr. Madison. Then, as a matter of fact, your competition with the beet-sugar people only exists during a few months of the year?

Mr. Atkins. Three months; and that is 25 per cent of the whole time (p. 49).

Mr. ATKINS. Three months; and that is 25 per cent of the whole time (p. 49).

Mr. Hinds. As a matter of fact, does your minority holding in these beet companies give you any actual control in their management?

Mr. ATKINS. It does not; it does not. We have no control whatever over the prices, and there is a continual conflict in regard to the prices at which the beet-sugar companies are selling. They enter into the

eastern territory and compete with us. Competition at certain seasons of the year is so great that the refineries of the Atlantic coast have to either reduce their meltings or close down (p. 80).

Mr. HINDS, So that a reduction of the tariff passing beyond a moderate amount would tend to the prosperity of the refiners and to the detriment of the beet-sugar people?

Mr. ATKINS. Take the independent refiners, outside of our concern at all, that represent more than half the supply of the United States. They say, and I think they say truly, that it is for the refiners' interest to have a low rate of duty rather than a high rate of duty and reduce the basis of value upon which they can sell.

WASHINGTON B. THOMAS. CHAIRMAN BOARD OF DIRECTORS, AMERICAN SUGAR

WASHINGTON B. THOMAS, CHAIRMAN BOARD OF DIRECTORS, AMERICAN SUGAR REFINING CO.

Mr. Malby. You have to-day competition among the beet-sugar industries of the United States, have you not?

Mr. Thomas. We have.

Mr. Malby. And good, sharp competition, say, with the Michigan Sugar Refining Co.?

Mr. Thomas. We have (p. 2013).

Mr. Malby. So that, reverting to the question once more, if the beet-sugar industry was wholly destroyed, then you would get in there, would you not?

Mr. Thomas. We would extend our sales, undoubtedly.

Mr. Malby. Let us be frank about it. You would extend your sales to every single household where beet sugar is now sold, which would pay the price, would you not?

Mr. Thomas. Oh, yes. It would take the place of beet sugar (p. 2014).

Mr. 2014).

CHARLES R. HEIKE, FORMER SECRETARY AMERICAN SUGAR REFINING CO. CHARLES R. HEIKE, FORMER SECRETARY AMERICAN SUGAR REFINING CO.

Mr. FORDNEY. If the duty were removed on foreign imported sugar, would the benefits inure to the beet-sugar industry and not the refiners that refine foreign imported raw sugar?

Mr. Heike. The refiners would have the advantage.

Mr. FORDNEY. That is what I meant.

Mr. Heike. The beet-sugar companies probably would find great difficulty in making beet sugars at all (p. 208).

Mr. FORDNEY. Now, if the duty were removed absolutely on sugar, could we produce either cane or beets in this country?

Mr. Heike. I doubt it very much.

Mr. FORDNEY. Then that would destroy the industry absolutely in this country?

Mr. Heike. Yes.

Mr. FORDNEY. And you would approve of that?

Mr. Heike. Yes (p. 292).

WILLIAM G. GILMORE, PARTNER, ARBUCKLE BROS., SUGAR REFINERS.

WILLIAM G. GILMORE, PARTNER, ARBUCKLE BROS., SUGAR REFINERS.

Mr. Madison. In other words, you think the thing to do is to take off the duty, and that it would be to your advantage to take it off, as a refiner of came sugar?

Mr. Gilmore. Yes, sir.

Mr. Madison. And you would advocate the taking off of the duty?

Mr. Gilmore. I would personally. I am only speaking now personally (p. 1169).

Mr. Gilmore. The refiner of cane sugar is not making enough

Mr. GILMORE. The renner of cane sugar is not making money. * * * * Mr. Madison. Would you adopt the suggestion of the gentleman as to the beet-sugar industry?

Mr. GILMORE. The home beet-sugar industry, of course, is curtailing the sale of the cane-sugar products. You can not sell it twice.

Mr. Madison. In other words, if they were out of the way, you would make more money?

Mr. GILMORE. We would have more employment, I suppose, for our output, for our capacity—our refining capacity.

Mr. Madison. And the ultimate conclusion is you would make more money?

money?

Mr. GILMORE. I think we would (p. 1167).

Mr. MADISON. Suppose, as a matter of fact, they get to a point where, instead of producing about 600,000 tons of sugar a year, they actually produce a million and a half tons of sugar, what effect would that have?

Mr. GILMORE. It would shut down most of the eastern reflueries for a part of the season.

Mr. MADISON. You would have to quit the business:

Mr. GILMORE. Yes (p. 1168).

WILLIAM J. JAMISON, PARTNER, ARBUCKLE BROS.

WILLIAM J. JAMISON, PARTNER, ARBUCKLE BROS.

Mr. RAKER. How would it affect you if there was no tax on the importation of sugar—raw sugar?

Mr. JAMISON. I think it would enable us to run more constantly.

Mr. RAKER. What do you mean by that, now?

Mr. JAMISON. To keep up the capacity.

Mr. RAKER. Will you explain it?

Mr. JAMISON. I mean we would be able to sell more sugar.

Mr. RAKER. Do you not have a supply all the time?

Mr. JAMISON. Well, we are not able to run full at all times.

Mr. RAKER. Because of the way raw sugar is shipped into the United States?

Mr. Harre. Decade V.
States?

Mr. Jamison. Oh, no; on account of the beet product. If there was no duty I do not think the beet would be so prosperous and we would probably sell more sugar. If the duty was removed, I mean to say (p. 1195).

Mr. Barre. What would you think would be a fair compensation?

Mr. RAKER. What would you think would be a fair compensation?
Mr. Jamison. I think there should be a cent a pound taken off at
the present time at least, and later—
Mr. RAKER. A little more?
Mr. Jamison. Yes; until it is entirely removed (p. 1196).

CLAUS A. SPRECKELS, PRESIDENT FEDERAL SUGAR REFINING CO.

Mr. Hinds. Mr. Spreckels, you have been carrying on a campaign to reduce the tariff as beneficial to the cane-sugar refiners?

Mr. Spreckels. I have.

Mr. Hinds. Of course, that will be damaging to the beet-sugar refiners?

refiners'

finers?

Mr. Spreckels. To some extent it will (p. 2275).

Mr. Hinds. In other words, perhaps, you would take it (the tariff) 1 off, would you not, and have free trade?

Mr. Spreckels. I would have free trade (p. 2277).

Mr. Hinds. You would have free trade in sugar?

Mr. Spreckels. Absolutely (p. 2278).

Mr. SMOOT. I also have here a table showing the comparative prices of various food products for the years 1904 to

1913. I will state that the average price from 1890 to 1899 is used as a basis. I ask that that may be inserted in the RECORD without reading

The PRESIDING OFFICER. In the absence of objection, it will be so ordered.

The matter referred to is as follows:

#### APPENDIX B.

COMPARATIVE PRICES OF FOOD PRODUCTS, 1904-1913. . [The average price 1890-1899 is used as a base and equals 100.]

	1904	1905	1906	1907	1908	1909	1910	1911	1912	1 1913	Aver- age.
Sirloin steak	111.0	110.6	114.2	116.7	119.9	126. 1	134.0	134. 9	153.0	160.8	128.
Round steak	120.8	120.0	124.4	128, 4	135.5	140.6	149.9	152.6	174.3	184.5	143.
Rib roast											133.0
Pork chops											155.
Bacon, smoked											153.
Ham, smoked											140.
Lard, pure	116.3	115.8	127.3	133.5	134.3	150.5	172.9	145.3	154.3	162.3	141.5
Hens	120.6	123.6	128.0	131.3	134.9	145.7	155.0	151 6	158.3	166.6	141.
Flour, wheat	118.3	118.6	108.3	118.2	127.1	138.1	135.9	127.9	132.9	127.4	125.
Corn meal	122.9	125.5	124.5	133.5	142.6	145.7	147.9	147.2	160.3	156.1	140.
Eggs, strictly fresh	131.1	131.3	134. 2	138.2	142.8	154.7	158. 2	150.2	162.5	156.0	145.
Butter, creamery	108.1	111.4	118.3	127.3	127.9	134.3	139.9	131.3	147.4	163.5	131.9
Potatoes, Irish	119.0	109.3	114.6	122.2	129.8	133.4	119.5	157.0	168.2	123.6	129.
Sugar, granulated	100.4	101.8	97.2	98.7	101.3	100.3	102.5	111.1	108.8	95.1	101.
Milk, fresh	107.4	108.1	110.0	118.9	123. 2	126.2	131.6	132.7	135.6	140.1	123.

1 February.

Mr. SMOOT. The above table is compiled from statistics collected by the Department of Labor. It gives the prices of 15 leading articles of food selected as representative by the department for the past nine years and for February, 1913. As these figures show, the average price of every article on the list, with the exception of sugar, has been continually higher than its average in the period from 1890 to 1899, which is taken as 100 for the purpose of comparison. In the case of sugar the price in 3 of the 10 years has been below the average of 1890-1899. With the exception of the abnormal year of 1911, the average price of sugar since 1904 has been almost exactly the same as the average during the 10-year period 1890-1899, the actual figure being 100.6. In the case of the other products quoted the average increase has been 38 per cent. These figures show conclusively that sugar now is relatively the cheapest food product that the American people use, that it is the only product that has not advanced greatly in price during the past decade, and that it plays no part in the increased cost of living.

Mr. THOMAS. Mr. President, before the Senator takes his seat I should like to make one inquiry. I understood the Senator to say that the bounty of 2 cents a pound on sugar produced in the United States, provided for by the McKinley bill, was declared unconstitutional. I should like to have a citation to the case in which that decision was made.

Mr. SMOOT. Mr. President, I have always understood that that was the case. In my hurry in preparing the remarks I have submitted I did not look up the matter; but if it is not the case, then I have been mistaken in my understanding of it

Mr. THOMAS. The Senator is nearly always accurate in his memory and in his statements of facts and figures. It was a surprising statement to me, however. Consequently my curiosity was aroused and I wanted a reference to it. My understanding had been that there was a controversy in the courts over the subject and that the decision was just the other way. I think the ther Senator from Kentucky, Mr. Carlisle, afterwards Secretary of the Treasury under Mr. Cleveland, represented the side of the case which contended for the unconstitutional nature of the bounty.

Mr. SMOOT. What became of the provision of the law? Mr. THOMAS. I think it was sustained, but my memory on

that point is not entirely reliable.

Mr. WILLIAMS. Under Cleveland's second administration, if my memory is correct, the man in the Treasury Department who had to indorse certain papers in order that the payments might be made—I have forgotten his name—refused to indorse them, and they were not indorsed. Up to that time, however, the payments had been made; and the matter was pending, I think, when the bounty provision was repealed. I believe the man's name was Bowers.

Mr. SMOOT. As the Senator says, I hardly ever make a statement on the floor of the Senate unless I look up the facts before making it. In this particular case I did not, for I felt certain of the history of the case, and I was extremely busy last evening.

Mr. THOMAS. The Senator may be correct.

Mr. SMOOT. I will not say that I am correct, but I will look the matter up. I will say that if I am not correct, I have been

mistaken in my opinion for a number of years.

Mr. SMITH of Michigan. Mr. President, perhaps the situation in our State may have had some effect on the mind of the Senator from Utah. We had a sugar-bounty law in Michigan. Mr. THOMAS. I think the State courts did hold the bounty

provision to be unconstitutional, and the cases were not appealed.

Mr. SMITH of Michigan. Our supreme court held the law to be unconstitutional, as I recollect. And it failed, although it was the means of stimulating the sugar industry considerably in our State; yet when the legislative act reached the court of final jurisdiction, it declared the law to be unconstitutional. do not know whether the Federal law was ever so declared or not.

Mr. SMOOT. I will look the matter up. Mr. RANSDELL. Mr. President, I should like to ask the Senator from Utah a question, if I may, before he concludes. noticed that in the Senator's very interesting address he stated that the average yield of sugar in Louisiana was about 300,000 tons. I will ask him to correct that and state exactly what it is. I have here, from the Department of Agriculture, a statement showing that while the crop of the past year was very short, owing to excessive overflow, the average yield for the past 10 years was 323,581 tons.

Mr. SMOOT. Mr. President, I do not know whether the Senator was in the Chamber or not when I referred to the fact that the small yield for 1912 was on account of the floods.

Mr. RANSDELL. Yes.

Mr. SMOOT. Then, speaking in round numbers as I was, I said that the Louisiana crop as a general thing was about 300,000 tons.

Mr. RANSDELL. I should be very glad if the Senator would publish the figures I refer to, because I think they would show that our yield is a good deal larger than the average person thinks it is. For instance, it runs in 1907, 380,000 tons, the next year 397,000, the next year 364,000, the next year 342,000, then 353,000, and drops down to 153,000 last year because of the overflow. I shall thank the Senator very much if he will insert those figures.

Mr. SMOOT. I assure the Senator that in my published remarks I will simply say what the average yield is, and put in the 323,000 instead of saying "about 300,000 tons."

Mr. RANSDELL. I thank the Senator.
Mr. President, I wish to give notice that when the bill reaches the Senate I shall offer an amendment proposing to strike out the provision for free trade in sugar after the lapse of three years. My amendment would strike out portion of paragraph 179, beginning with the words "Provided further," in line 11, page 53, and closing with the words "free of duty," in line 13 of the same page. The effect of that would be to leave a duty of about 1 cent a pound on importations of sugar from Cuba.

Mr. NORRIS. Mr. President, will the Senator yield to me

for a moment?

Mr. RANSDELL. Certainly.

Mr. NORRIS. I will state to the Senator that I had myself given notice that I was going to offer that amendment as soon as this particular amendment is disposed of. I do not, of course, wish to interfere with any plan the Senator may have in reference to the matter; but it was my intention to offer that amendment as soon as the amendment offered by the Senator from Kansas [Mr. Bristow] had been voted upon, and to submit some observations in regard to it.

Mr. RANSDELL. Mr. President, I do not wish to have any conflict between the Senator and myself. I had decided that it would be better, from my point of view, to offer this amendment when the bill reaches the Senate, and to make some observations on it at that time, though, of course, I can not control the action of the Senator from Nebraska.

Mr. NORRIS. I will say to the Senator that if he has any objection to my offering that amendment now and would prefer

to have me wait, I shall be glad to do so.

Mr. RANSDELL. I have no objection, but I believe it would be better for the friends of sugar if the amendment were offered

Mr. NORRIS. My own judgment is that there is nothing contrary to parliamentary usage or the practice of the Senate in having the amendment offered then, even though it had been offered in the Committee of the Whole.

Mr. RANSDELL. I understand that is correct, and that it can be offered in the Senate again, even if offered in Committee of the Whole.

Mr. NORRIS. That is my own judgment. Mr. RANSDELL. Mr. President, I do not intend to discuss the sugar schedule at any length at this time. I shall refrain from full discussion until I speak in support of my amendment. I deem it my duty, however, to call the attention of the Senate to the deep-seated resentment existing in the State of Louisiana at this proposed legislation. It is a very serious question with us in Louisiana. In placing sugar upon the free list at the end of three years this bill will destroy in the most ruthless, cruel, unwarranted, unjustifiable, and un-Democratic manner the greatest industry in my State, which has given more employment than any other single avocation to the people of Louisiana for 125 years, in which there are \$100,000,000 invested, which sup-norts at least half a million couls which progressing the supports at least half a million souls, which produces crops that sell annually for from \$25,000,000 to \$30,000,000, one which everyone who has studied the subject admits can not exist without some degree of duty in competition with the sugar of the Tropics, and an industry which has been the greatest revenue producer of any in the entire schedules. And yet, without rhyme or reason, without excuse or justification, without even explanation from anyone authorized to give an explanation, the party is about to destroy this industry. No one has even tried to defend or explain this action. In the speech of the chairman of the Committee on Finance and in the report accompanying this bill not a word is said in explanation, no word in defense.

My people feel very deeply on this subject. They resent this proposed action very strongly. They have been Democrats, and good Democrats, for a long time. They have borne the brunt of the Democratic battle, along with their sister Southern States, when practically the only Democracy was in the South; and now they have been singled out for slaughter, for absolute ruin, by their own household. I can not foretell what the political effect will be, but I wish to call to the attention of the Senate the resolutions of a great mass meeting held in the interior of Louisiana, at the city of New Iberia, on the 2d of this month, the largest and most enthusiastic gathering ever held within the history of the State at any interior point, a mass meeting attended by seven to ten thousand voters, gathered together from all the surrounding parishes, addressed by 12 speakers, representing every element of factional Democracy. There was not a single Republican orator. These speakers were the ablest men in the State, and all their addresses echoed the sentiments that appear in the resolutions, which I shall now read to you and ask you to consider carefully:

men in the State, and all their addresses echoed the sentiments that appear in the resolutions, which I shall now rend to you and ask you to consider carefully:

We, citizens of Louislana, in mass meeting assembled, declars:

We, citizens of Louislana, in mass meeting assembled, declars:

The iffth and last paragraph specifically mentions by name with the conditions and not with theories, and recognizing the fact that many of the great industries of this country had been, in part or in whole built upon the polley of protection, declared that such revision should make the provider of the control of the protection of the series of the provider of the protection of the series of the provider of t

the last 10 years, the price of sugar has steadily gone downward, and in the efforts of the party to reduce the tariff in order to cheapen the cost of living it is manifestly unjust that the chief industry of our State should be segregated for destruction by scheduling it for the free list, when that article is the cheapest article of food now in the American market and the duty on the same has always been recognized by all the leaders of the party to come within the Democratic doctrine of tariff for revenue. Our Senators are elected, as it were, ambassadors from a sovereign State, not only to protect and care for the interests of the people of the Union, but to watch over and protect the interests of the people of their own State. They can not delegate the great trust confided to them to another. In the performance of their high duties to the people of their own State and of their country they must exercise their own independent judgment and be guided by their own consciences and not by the action of any political caucus. They can not transfer that judgment, nor can they commit their consciences to the keeping of other Senators. Especially is this true with regard to the Senators and Representatives from our own State. Prior to their election they made certain promises and pledges to the people. Their pledges and promises to the electors of this State were unequivocal, open, and aboveboard. In their public addresses they declared that they would never vote for a tariff bill ruinous to the industries of the State. This was their platform. They were elected upon that platform, and that platform was not hostile or antagonistic to the Democratic platform at Baltimore, and as honorable men there is no other course for them to pursue than to stand to and be guided by the pledges that they made to the electors of this State. It is unfair and unjust to them, not only as honorable men but as Senators, to ask or expect them to pursue any other course than that which they promised the people to follow when they were soli

tives, whether in the their king, the people.

The fifth and last paragraph specifically mentions by name

the committee on resolutions voted down a free-sugar plank, and when Mr. Wilson was elected President and promised that his tariff policy would not strike down a single industry.

In the Daily Picayune of August 3, 1913, I find an editorial entitled "The New Iberia rally," from which I quote:

entitled "The New Iberia rally," from which I quote:

"" This outpouring of the people of southern Louisiana to do honor to two great public servants who have boldly announced their purpose to vote against a party measure overwhelmingly indorsed by the Democratic caucus because it strikes at the prosperity of their own State should give the weak-kneed Democrats in the Senate who oppose free sugar, yet tamely submit to the commands of the party leaders, serious food for reflection. The fact should never be forgotten that Senators, unlike Representatives, represent their States and not individual districts or sections of States. It is therefore eminently proper and fitting that Senators should permit no consideration of party or public expediency to divert them from the obligation they are under of considering the State they represent before all other matters whatsoever. Men who would be willing to sacrifice vital interests of their respective Commonwealths to party expediency or on demand of party leaders are unworthy to hold their seats in the highest legislative chamber of the Nation.

I shall next read from an editorial in the New Orleans Item

I shall next read from an editorial in the New Orleans Item of the 3d instant on "Louisiana, the tariff, and the bitter lesson of political tariff tinkering":

of political tariff tinkering. The period here in Louisiana beyond all recent times is one of political unrest, of self-questioning, of thought, of new alignment. Louisianians know that the charge that the sugar planters and the sugar interests of Louisiana are "bloated beneficiaries of special privilege" is cruelly false. They know that the sugar planters, the brokers, and the handlers of sugar have prospered on the average hardly to the same extent as the agricultural interests of the Middle West and North.

Indeed, Senators, the editorial writer might have said that, owing to awful freezes in the latter part of 1911, which nearly ruined the crop, and to the most disastrous overflow on record in 1912, which destroyed nearly one-half of the growing crop of sugar cane in Louisiana, many of the sugar planters are to-day mortgaged up to their very necks, and a number of the sagar plantations have been sold under foreclosure of mortgage within the last few months.

To resume the quotation:

If the national Democratic Party continues to declare that support of a tariff bill drawn upon the lines of the Underwood-Wilson bill now pending is the ultimate test of Democracy, if such a bill is declared to express and to enunciate the fundamental principle of the party, fust so surely will the national Democratic Party take the final step which must result in the disruption of Louisiana's "solid Democracy" unless the words uttered at New Iberia and the words heard on every street corner and in every countingroom are empty and meaningless.

Mr. President, being confined here as I have been since the 4th day of March, in attendance upon my duties in the Senate, I have had no opportunity to visit Louisiana so as to come in contact with her citizens and ascertain from personal talks with them their real sentiments; but these expressions are taken from the four great daily newspapers of New Orleanstaken from the four great daily newspapers of New Orleans—the only great dailies we have there—and I repeat that if you can believe what they say, if you can believe the solemn expressions of that great mass meeting in New Iberia, there is not a good state of feeling toward the national Democracy on the part of the people of Louisiana. It is for Congress to say whether that feeling shall continue and grow; it is for us to decide whether or not a soothing balm shall be applied.

Mr. President, let me reiterate what I said before, that Louisiana is not asking any unfair privilege. Her people ask no favors; they ask that the same treatment be meted out to them which is measured to every other section of the country; they ask that their great industry-sugar-which has produced more revenue than any other article, the revenue upon which is more easily collected than that on any other; sugar, which is the cheapest article of human food; sugar, which is the one article which has gone down steadily in price for the last 20 years, shall continue to bear at least a reasonable rate of duty, shall be treated somewhat the same as manufactured articles of steel, cotton, wool, and many others.

They are not asking the retention of the present Payne-Aldrich rate. They are willing to accept a cut in proportion to the average cut made on other articles in this tariff bill; but they are not willing to have their greatest industry sacrificed, and their Senators will fight until the last minute to keep it

from being completely, ruthlessly, and needlessly destroyed.

The VICE PRESIDENT. The question is on the amendment

offered by the Senator from Kansas [Mr. Bristow].

Mr. Bristow. I ask for the yeas and nays on that amendment, Mr. President.

The yeas and nays were ordered, and the Secretary pro-

ceeded to call the roll.

Mr. CHILTON (when his name was called). mr. CHILTON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. Jackson]. As he is not present, I withhold my vote.

Mr. KERN (when his name was called). I have a general pair with the senior Senator from Kentucky [Mr. Bradley].

In his absence, I withhold my vote. If I were at liberty to vote, I should vote "nay."

Mr. SMITH of Maryland (when his name was called). have a general pair with the senior Senator from Vermont [Mr. DILLINGHAM], and therefore I withhold my vote, If I were at liberty to vote, I should vote "nay."

Mr. THOMAS (when his name was called). eral pair with the senior Senator from New York [Mr. Root]. I therefore withhold my vote. If I were at liberty to vote, I should vote "nay."

Mr. TILLMAN (when his name was called). I have a general pair with the Senator from Wisconsin [Mr. Stephenson], and therefore withhold my vote.

The roll call was concluded.

Mr. McCUMBER. I have a general pair with the Senator from Nevada [Mr. Newlands]. I transfer that pair to the junior Senator from Maine [Mr. BURLEIGH] and vote. I vote

Mr. CHAMBERLAIN. I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. In his absence, I

withhold my vote. If permitted to vote, I should vote "nay."

Mr. CHILTON. I transfer the pair which I have just announced to the senior Senator from Virginia [Mr. Martin] and vote. I vote "nay."

Mr. THOMAS. I transfer my pair with the senior Senator from New York [Mr. Root] to the Senator from Georgia [Mr. Bacon] and vote. I vote "nay."

Mr. JONES. I desire to announce that my colleague [Mr. Poindexter] is necessarily detained from the Chamber. I am satisfied that if he were present he would vote "yea."

Mr. SMOOT. I desire to announce that the senior Senator from Delaware [Mr. DU PONT] and the junior Senator from Wisconsin [Mr. Stephenson] are detained from the Senate on account of illness.

The result was announced-yeas 34, nays 39, as follows:

- 1	Y	EAS-34.	
Borah Brady Brandegee Bristow Burton Catron Clapp Clark, Wyo.	Crawford Cummins Fall Gallinger Groma Jones Kenyon La Follette Lodge	McCumber McLean Nelson Norris Page Penrose Perkins Ransdell Sherman	Smith, Mich Smoot Sutherland Thornton Townsend Warren Weeks

So Mr. Bristow's amendment was rejected.

Mr. NORRIS. In paragraph 179, page 53, line 11, after the date "1914." I move to strike out the proviso down to and including line 13.

The VICE PRESIDENT. The amendment proposed by the Senator from Nebraska will be stated.

The Secretary. In paragraph 179, page 53, beginning with line 11, it is proposed to strike out the following proviso:

Provided further, That on and after the 1st day of May, 1916, the articles hereinbefore enumerated in this paragraph shall be admitted free of duty.

Mr. NORRIS. Mr. President, the amendment which I have just offered does not change any rate of duty or schedule in the bill; it leaves the tariff on sugar exactly as it is in the bill; but it strikes out that provision of the bill that after three years the product named in the schedule-sugar-shall be free of any duty. I shall not detain the Senate more than a few moments in the discussion of the amendment. I approach it and discuss it from the standpoint of the consumers of sugar.

In round numbers there are in the United States engaged in the production of sugar, both cane and beet, between one million and one million and a half of American citizens; and I am willing to concede that if free sugar would reduce the price of sugar to the consumer by the amount of all the duty, we would not be

justified in retaining that duty. If I believed now that the removal of the duty on sugar or, in other words, the placing of sugar on the free list would permanently reduce by the amount of the duty the cost to the sugar consumer, I would have no hesitancy in voting for free sugar. I do not believe we have a right to ask the other 89,000,000 people to pay an increased price for sugar in order to give employment and to keep up the business of the million or the million and a half who are directly interested in the production of sugar; but to me it seems like a plain proposition that the placing of sugar upon the free list will mean ultimately the paying of a higher price for sugar by the American consumer. I have a great deal of sympathy for the man who honestly believes that the removal of the duty would reduce by the amount of the duty the cost of sugar to the consumer; and, as I have said, if I believed that way I would unhesitatingly support that kind of a proposition.

In the first place, Mr. President, before I undertake briefly to give my reasons why I think it is necessary for the protection of the consumer of sugar to retain a duty on it, I want to

say just a few words about the present schedule.

I believe that the sugar schedule in the present law can not be defended from any standpoint. I am particularly opposed to what is ordinarily known as the Dutch standard color test. That I believe to be a joker, the effect of which has been nothing else than to put money into the pockets of American refiners of sugar—the Sugar Trust. In addition to that, I think the tariff itself is entirely too high, and that all those engaged in the production of sugar can stand a reasonable and fair reduction of the tariff.

The Dutch standard color test has been with us a great many years; it is in the present law; it was in the Dingley law; it was in the Wilson law. There was a time in the past, before the invention of the polariscope, when it was necessary, but since that time it has been of no more use, in my judgment, in

a tariff schedule than a fifth wheel to a wagon.

The present Democratic majority of the Senate in revising this schedule, in my judgment, would have done well if they simply had omitted from it the particular proviso which my motion seeks to strike out. I am not going to discuss at the present time, Mr. President, the position of the majority on the question and how I think it has changed since the last general election and how it has been manipulated by secret caucus methods; but I am going to content myself with a few suggestions as to why it seems to me every fair-minded man, having in view the ultimate good to the consumers of sugar, ought to favor the retention of a reasonable tariff upon that product.

I have no sympathy with those economists who say that there ought to be a revenue tariff on sugar, except in so far as that revenue tariff might have a tendency to protect the industry in this country and thus continue what I believe would be real competition in sugar. I want to make sugar just as cheap as possible to the consumer. It is a necessary of life, and I want to lessen the burdens upon the poor as much as possible.

From the Bureau of Statistics of the Agricultural Department I learn that they have estimated that the world's production of sugar for the year 1912–13 is 18,000,000 tons. This bureau informs me that for quite a number of years the world's production of sugar and the world's consumption of sugar have been practically equal, and that the consumption of sugar during this year will equal the production, in round numbers, of 18,000,000 tons. From my viewpoint, it is important for us to bear in mind that fact, which I think will not be disputed by anyone, that the production and the consumption of sugar, taking the world over, taking the world as a whole, has been

practically equal for quite a number of years.

I think it will also be conceded that free sugar will drive out of existence and out of business nearly all, if not all, of the beet-sugar factories; it will drive out of business the canesugar industry of Louisiana and of the adjoining States; it will curtail the production of sugar in Porto Rico to quite a large extent; it will cut down the production of sugar in Hawaii to quite a large extent, and also in the Philippine Islands. not give, and no man so far as I know can give, any definite figures as to just how great will be the destruction along the lines I have indicated; but I believe it is practically conceded by all those who have studied the question that the cane-sugar industry in the United States will be entirely wiped out, and that practically the same thing will happen to the beet-sugar industry; that from a third to two-thirds of the production of sugar in Porto Rico will be eliminated; that about one-third of the production in Hawaii will be eliminated, and something less of the production in the Philippine Islands.

I have no desire, Mr. President, to do anything except to reach a fair and honest conclusion. I believe that I am conservative in my statement when I say that free sugar would practically reduce the production of sugar in the United States and its dependencies from 1,000,000 to 1,500,000 tons. Let us for just

a moment think of the effect that that would have. Suppose it reduced it only 1,000,000 tons—and I do not believe there is anyone who has studied this subject who will not agree that it will reduce it more than that—considering now that the production in the world and the consumption in the world are equal and that at one stroke of the pen you cut down the production of sugar a million tons, is there any man who will deny that it would have a very perceptible effect upon the world's price of sugar? I do not believe anyone will seriously dispute that proposition. There is no doubt but what this alone would increase the world's price of sugar regardless of the tariff.

From the same bureau I learn that we produced in the year 1912–13 beet sugar in the United States to the amount of 618,354 tons and cane sugar to the amount of 145,155 tons, making a total production of sugar in the United States proper for the present year of 763,509 tons. That is less than the production would have been had it not been for the destructive floods that almost wiped out the production this year of Louisiana sugar. Louisiana produced in the year before 322,209 long tons of sugar. More than half of that was swept away by disastrous floods. We produced in Porto Rico 340,000 tons of sugar during this year, we produced in Hawaii 500,000 tons, and in the Philippine Islands 175,000 tons.

The duty provided in the pending bill, as I understand, shorn of its technicalities—and if I am wrong I should like to be corrected—on refined sugar, in round numbers, is \$1.25. The real

tariff, however, is 20 per cent below that.

I call attention to the fact that in our reciprocity treaty with Cuba we have provided, among other things, that her sugar shall be admitted into the United States at a reduction under the regular tariff rates of 20 per cent. While refined sugar has to pay under the present law a duty of \$1.90, Cuban sugar can

come in for 20 per cent less.

It has been conceded, I think, and will be conceded now, that just as soon as the sugar which we produce this side of the tariff wall—that is, in the United States proper—and in our dependencies, which, added to the sugar that is produced by Cuba, amounts to more than the sugar we consume, then the consumer will get the benefit of the reduced tariff on sugar. In other words, the bill which is now before the Senate, while it provides for a duty, speaking in round numbers, of \$1.25 on refined sugar, as a matter of fact the real duty would be just around a dollar—I cent a pound—because Cuban sugar, having a preferential rate, enjoying the right to come into the United States at 20 per cent less than sugar from the balance of the world, and Cuba producing enough sugar, added to our domestic production, to constitute more than we consume, the result is that no sugar comes in that pays a tariff at all, except from Cuba, and that pays the reduced rate.

There were produced in Cuba this year 2,250,000 long tons of sugar. That amount, added to the amount which we produced ourselves, made, as I have said, more sugar than we consumed. Altogether the Cuban sugar and the sugar produced in the United States, Hawaii, Porto Rico, and the Philippines amounted to 4,028,509 long tons, while our consumption of sugar was considerably less than 4,000,000 tons; so that, for practical purposes, this bill provides that the tariff on refined sugar shall be about 1 cent per pound, running down from that according to the degree of saccharine matter contained in the sugar.

Now, let us see, Mr. President. If we make sugar free and drive out of existence practically all of our production in the United States proper, and reduce that which comes from some of our dependencies by at least one-third, or, in some instances, perhaps more, it appeals to me as being reasonable that we shall have subjected our sugar market to the absolute control of the sugar refiners. The sugar that will come in will come into this country in the shape of raw sugar from Cuba. The American people can not use the sugar as it is brought in. It will first have to be refined. Every man concedes that if the refining interests should be controlled, if they should be manipulated, the sugar market of the United States would be manipulated and would be absolutely under the control of the refining interests, or the Sugar Trust.

I do not mean to say that what is now known as the Sugar Trust would necessarily refine or buy all the raw sugar that came in. As the testimony in all these investigations shows, however, the independent refiners, whatever number there may be—and there are but a few of them—would naturally come under the umbrella of the American Sugar Trust. That was the testimony of one of the independent refiners before the Hardwick committee.

It is not necessary to charge them with any ulterior motive or anything of the kind. It is perfectly natural. It seems to me it is a universal law of business that the man who is engaged in the sugar-refining business shall try to get all he can out of the product. If he had no competition here, and five or six concerns could combine to control the refining of sugar, the result would be that just as soon as these competing sugar industries were driven out of business they would raise the price as high as the market would stand. They would have control of the situation, and could put the price almost anywhere they pleased.

Did it ever occur to you that when the price of sugar is raised just 1 cent a pound for one year just in the American market it means, in round numbers, \$100,000,000? They could raise the price of sugar 1 cent a pound over night. The combination would be, to a great extent, beyond the control of Congress in its legislative capacity and beyond the jurisdiction of the courts to enforce laws against it, even if Congress had power to pass laws that were applicable. The price of sugar would undoubtedly go down for a year or so, until the beet-sugar industry was completely driven out of business and until the canesugar industry was entirely stranded.

It will not do to say that if afterwards the price of sugar were put up these industries would again spring up. It would take millions and millions of dollars to do that. No man would invest a single penny in the business if he knew that it was within the power of such a combination to put the price of sugar down below what it would cost him to produce it and drive him out of business the second time. It will never do to think for a moment that these men will be driven out of business twice.

Mr. President, much has been said about the attempt, several years ago, of the Sugar Trust to buy up the beet-sugar factories in the United States. I have no sympathy with that great I have no sympathy either with the men who in years past have put millions of water into the beet-sugar business. To me it is not so material what becomes of them. worrying about what will happen to the men who have their money in the sugar business, although I should like, if I could, to protect all those who have honestly invested in it. But I believe there is a greater duty that we owe here, and that is to the men and the women, the millions of citizens, who have to buy their sugar daily, most of them poor. The poor man needs as much sugar per capita as the wealthy man. It is not, perhaps, a tax that is paid equally, but there are more poor people than there are others, and they have the greater burden in this particular respect.

It is not, therefore, because some men who have invested their money in some of these enterprises may lose it that I am opposing this provision of the bill. It is not so much for that reason, but in the interest of the men and the women who in the future will have to buy their sugar from what I believe will

become a great world monopoly in the sugar business.

As I said, Mr. President, I have looked upon the question entirely from the consumer's standpoint. Looking at it from that standpoint, I do not desire to subject the consumers of the United States to the certainty of the control of this product by the American Sugar Refining Co. I do not believe, considering the matter from the standpoint of the consumer alone, that we can afford to do it.

There are, however, other considerations. I have thus far argued the matter entirely from the viewpoint of the consumer. As I intimated a while ago, however, I do not wish to have it understood that I would entirely eliminate other things. I believe that should be the controlling factor, and that is the controlling influence as far as my vote on this schedule is concerned. I should like to support this schedule that has been brought in here by the majority if they would eliminate the clause providing that in three years sugar shall be upon the free list. I believe the duty provided in this particular schedule, if that clause were eliminated, is sufficient to retain the operations of the beet-sugar industry and the cane-sugar industry of the South. Coming in that form from a Democratic Congress, there would be no fear that a further cut would be made in the near future. In my judgment we should then see this industry advance and spread at a more rapid rate than at any previous time in its history.

As I said, however, there are some other considerations. Most of them have been mentioned in this discussion. There is no doubt but that the cultivation of beets improves the soil. This and other suggestions which I shall now proceed to mention, if standing alone, would not be sufficient to warrant us in retaining a tariff on sugar; but I do contend that they have a direct bearing upon the question and ought to be taken into consideration for what they are worth. I shall not offer them as being, in my judgment, sufficient in themselves to sustain a vote in favor of a tariff on sugar, but they do throw light upon the question of future possibilities in beet-sugar production. There are great possibilities of improving and cheapening the

production of beets and of cheapening the methods of extracting sugar from beets, and all these things should receive due consideration in deciding whether we are justified in destroying the industry by the removal of the tariff.

The beet-sugar industry has not developed as fast as I should have liked to see it, although I believe its development has been wonderful. I have gone through the beet fields. I have gone through the beet-sugar factories. In a general way, I know something about the way the farmer raises beets, and the way the factory converts the beet into sugar. It has seemed to me, as I have gone over the fields and have seen them work, and have gone through the factories and have seen them work there, that there are yet vast possibilities for improvement of the methods now in vogue.

In the first place, when the farmer plants the beets he plants a great many more seed than could possibly grow upon the ground if they all grew. The idea is to get the beets spaced in the row as nearly equal in distance apart as possible, and to leave no vacant places, so as to get as large a yield as possible. To get them too close means that the beets will not be so good, and to get them too far apart in the row means that they will not be getting from the land the amount of beets that they ought to get. So that brings about the necessity of thinning the beets, which is a very tedious process. Men, women, boys workers in the fields-have to get down on their knees and take each row of beets by itself and thin them out by hand. That is a kind of labor that is very distasteful to the American. I do not doubt but that the ingenuity of the Yankee will yet invent some way by which all of that will be done by machinery. It is not only a kind of work that is distasteful to the American workman, but it is very expensive. It is hard work. It costs great deal of money to go over an acre of beets and thin them out properly.

I know that several years ago the Agricultural Department was working on a scheme of putting up beet seeds in paper strings and rolling them into balls. The idea was to put the ball in a machine, drive it across the land that was ready for the planting of beets, bury the paper cords, and every so many inches in that paper cord there was a beet seed. If every beet seed grew, and if every beet seed gave only one sprout, they would have had a perfect system of planting beets by machinery, but so far the efforts have not been successful. The Agricultural Department is now trying to get a beet seed that will produce only one plant.

These are fields of uncertainty, I admit. It may be that they will never develop into all that it seems to me the indications warrant, but there are great possibilities ahead in that respect.

But that is not all. After the farmer has raised the beets, they are pulled by hand. They have a machine first that loosens them, but men must go through the field and pull each beet by hand. That is very hard work, expensive work, and the American does not like to engage in it. After the beets are pulled by hand they are topped, as it is called, by hand. Every top is cut off with a knife.

I stood in my home town a year ago, outside of a blacksmith shop, and saw them repairing a machine that a man had invented, and thought at the time he had a perfect machine that he could drive across a row of beets, pull the beets by machinery, cut off the tops, and elevate the beets into a wagon that was driven alongside. Not a human hand touched the beet at any time until it reached the factory, and I presume very seldom there. It was all done by machinery,

But that machine has not yet been fully developed. They are still working on it. They may never make a success of it;

But that machine has not yet been fully developed. They are still working on it. They may never make a success of it; but to me it looks like a very probable thing that in some, if not in all, of these respects the raising of beets will be greatly improved and the cost greatly reduced.

When we come to the machinery after the beet is in the factory, we find it very expensive. In the last 10 years it has been very much improved. They have been able to extract more of the saccharine matter from the beet than they did before. There are vast possibilities in the improvement of machinery after the beet gets to the factory.

Then there are vast possibilities in improving the quality of the beet itself. Our Agricultural Department is working along that line. Experiments are being made along that line.

So it seems to me that if you take all these things into consideration—especially if you believe, as I do, and as I think every reasonable man who studies the question must believe, that the retention of this business in this country is absolutely necessary in order to keep down the price of sugar to the consumer—it is well for us to consider the vast possibilities of improvement that may come about, and undoubtedly will come about, if we continue to permit our people to engage in the business by retaining a reasonable tariff upon sugar.

There is a vast amount that might be said in addition to the things I have suggested; but it seems to me that, taking everything into cons'deration, a fair view of the entire subject must lead any reasonable man to the conclusion that unless we are moved by some motive, some caucus, some political control, or some other influence that causes us to do what our better judgment tells us we ought not to do, there can hardly be a dissenting opinion as to the desirability of keeping this industry alive, and this, too, entirely in the interests of the consumer.

I believe that even our Democratic friends, if they voted their real conscientious convictions on this schedule, would carry the motion that I have made by a majority, even though no one else were permitted to vote. I have been able to find but few who in conversation do not admit, some from one viewpoint and some from another, that it is desirable that this industry should not be driven out of existence. We ought to keep it, not particularly because we owe it anything, but because we owe it to ourselves. We owe it to the consumers of sugar that we shall not subject them to the possibility of the control of the price by a great trust that will, I believe, manipulate the price of sugar if the beet-sugar industry is driven out of existence just as surely as the sun will rise to-morrow.

When we vote on this amendment I am not going to ask for a roll call at this time, because the Senator from Louisiana [Mr. RANSDELL] has given notice that he will make the same motion when the bill gets in the Senate, and I have agreed with him, so far as we are concerned, that we will ask for a roll call at that time and not at this time.

Mr. TOWNSEND. Mr. President, I think probably this question has been discussed from all standpoints, so that every Senator thoroughly understands the situation. Yet it is such an important matter that I should feel that I had not performed my full duty if I did not briefly, at least, voice my protest against the proposed action of the Senate.

I have no doubt that a majority of the Senators believe that the provision of the Senate bill, if it does not destroy, will certainly cripple the sugar interests in the United States. If this is accepted as a fact, there ought to be some good reason

for the action which you propose to take.

It has been stated authoritatively that we produce in the United States something over 700,000 tons of sugar annually. At the market price of sugar that is worth something like between sixty and seventy million dollars, a very considerable item in itself and one that should be given very careful consideration before we destroy it.

The question naturally comes to the mind of every Senator, Why is this thing done? A Democratic change of duty can be justified on only two grounds—one for revenue and the other to reduce the price of the article to the people. Of course, the item of revenue is eliminated, because this bill destroys revenue, the most prolific source of revenue which the country knows.

Senators have argued—and, to my mind, logically and with irresistible force—that we can not hope to reduce the price of sugar eventually to the American consumer by destroying domestic production. Every Senator who heard it must have been convinced beyond any possibility of doubt by the argument of the Senator from Kansas [Mr. Bristow] yesterday that the duty on sugar is never added in its entirety to the cost of sugar to the American consumer. All must be equally convinced that because of the production of domestic sugar the price of sugar has been less to the American consumer than it would have been if there had been no production in the United States. Because of American competition the price of sugar has been reduced.

Sugar is one of the clearest examples of the benefits of a protective tariff of any article that is produced in the United States. There was a time when the protective principle was applied in the production of tin plate. When the foreigner had complete control of the American market the price of tin plate was very high. But when a duty was placed upon that article and its production was encouraged in the United States the price of tin plate went down to a lower point than was ever

known before.

It is possible in the United States, and no one disputes the statement, to produce all of the sugar which our people consume. A demonstration is being made of that fact. It is not simply a theory. We can produce sugar, and we are producing it. Under very many discouraging circumstances sugar production has grown until to-day it is one of the great and important industries in the United States. Not only will this bill deal a blow to the consumer, as demonstrated by the Senator from Nebraska [Mr. Norris], who has just taken his seat, but we are, as it seems to me, ruthlessly and without any hope of advantage destroying the investments of people who are contribut-

ing to the wealth and general welfare of our people throughout the United States.

This industry, I repeat, has been advancing. I have not seen anything that more clearly demonstrates this than a letter which I received the other day from a man who has been interested in the establishment of the sugar-beet industry. As he puts it, he is neither a laborer nor a capitalist, but he has taken a course as hundreds of other young men of this country have taken courses in our institutions of learning with a special reference to fitting themselves for this great industry—the growth of sugar beets and the extraction of sugar from them.

He states that in 1898 he left college, having fitted himself with special reference to the work; that he has devoted his life to the sugar-beet business. He established factories, around which whole communities have centered. He states that in 1904 the average mill cost of manufacturing beet sugar in the United States was \$2.08 a hundred. By reason of inventions, experiments, and practical work in the production of sugar the cost has been reduced from \$2.08 to \$1 a hundred, and in some cases to as low as 90 cents. In the meanwhile the price of beets to the farmer, to the producers of this country, has increased \$1 a ton. In other words, the cost of sugar manufacture has been reduced more than a dollar a hundred pounds, while the cost of the beets to the manufacturer has increased a dollar a ton for the beets, and sugar to the consumer has decreased 75 cents a hundred. During those years from 1904 to 1913 other food products have increased, while sugar has decreased in

So I repeat, this is an industry which is not only practicable, but it is also one in the interest of the consumer. The price of sugar has been going down, while the price of the raw material, if we can call the beet the raw material, and it is the raw material to the factory man, has been going up to the American farmer.

It would seem to me, Mr. President, that with these facts clearly before us we ought to hesitate before we strike this blow.

It is a fatal mistake for any nation to put itself in a position where it is dependent for a necessity of life upon foreign countries. Sugar is one of the necessities of life. It can be produced here, and both in time of war and in time of peace our people ought to be self-reliant and independent so far as necessities are concerned.

Mr. President, I felt that it was a duty I owed to the people of my State to say this much. I wish it were possible for me to say something which would induce Senators to consider this question divorced from any restraint of caucus or from any consideration of party necessity; that it might be considered in the light of its economic bearing upon the American people.

I think that Congress is making a serious mistake. This is an industry that, as my colleague [Mr. SMITH of Michigan] well said yesterday will be destroyed, so far as its profitable operation is concerned, so far as the interests of the small stock owners and growers are concerned. If it survives, it will survive in the hands of the men who, perhaps, can hold it in idleness for the next two or three years, and in the end the people who have built up the industry will have been defrauded of their rights; their property will have been taken from them. The people in the meanwhile will have been placed at the mercy of three great monopolistic concerns. Three sugar refineries are at the bottom of free sugar. They will furnish the only market for raw sugar, and upon their tender mercies the American consumer is to be thrown for refined sugar. These refiners are big and powerful, and they do not need this benefaction from Congress. With their source of supply all from abroad, what will prevent them from forming gigantic foreign trusts and combinations which can not be reached by this Government? This measure might properly be termed a bill in the interest of monopoly and against the American people. It is unwise and un-American.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Nebraska [Mr. Norris].

The amendment was rejected.

Mr. BRISTOW. I desire to offer the amendment which I send to the desk.

The VICE PRESIDENT. The Senator from Kansas offers an amendment, which the Secretary will read.

The Secretary. On page 53, line 11, after the word "four-teen," insert the following words:

Provided, however, That so much of paragraph 216 of an act to provide revenue, equalize duties, and encourage the industries of the United States, and for other purposes, approved August 5, 1909, as relates to the color test denominated as No. 16 Dutch standard in color, shall be, and is hereby, repealed.

Mr. BRISTOW. I hope the chairman of the committee will accept this amendment. It simply repeals the provision in the present law relating to the Dutch standard color test. Four years ago nine-tenths of the Democratic Members voted to strike that provision out of the bill. Last year I think nine-tenths voted to strike it out; indeed it went out by unanimous consent.

This amendment simply strikes it out as soon as this bill is enacted. The bill if it passes unamended will maintain that provision until March 4 next. I should like to have the Senator from North Carolina consent that this amendment shall go

through, if he will.

Mr. SIMMONS. I will ask the Senator if he has any objec-

tion to referring the amendment to the committee?
Mr. BRISTOW. Mr. President, if an amendment to a bill which was voted on four years ago by nine-tenths of the Democratic Members, if a provision which had practically the unanimous support of the Democratic membership last year, can not now be accepted without being referred to the Democratic caucus, I want to vote on it now on a roll call. If the United States Senate has become so subservient to a caucus domination that it can not accept the simplest amendment to a bill which nine-tenths of the membership of the body believes ought to be enacted, without waiting for a caucus to pass on its merits, then I think the American people ought to know it.

Mr. SIMMONS. Mr. President, I do not see any reason why the Senator should become so excited simply because I asked him a question. I asked him if he would be satisfied to pursue that course. The proposition was made suddenly, before I had any opportunity to confer with the chairman of the subcommittee in charge of the schedule. I simply asked him a very innocent question, and I do not see any reason why he should

become so excited about it.

Mr. WILLIAMS. Mr. President, I should like to have the amendment read.

On page 53, line 11, after the word "four-The SECRETARY.

teen," insert the following proviso:

Provided, however, That so much of paragraph 216 of an act to provide revenue, equalize duties, and encourage the industries of the United States, and for other purposes, approved August 5, 1909, as relates to the color test denominated as No. 16 Dutch standard in color, shall be and is hereby repealed.

Mr. WILLIAMS. Mr. President, that is a matter to which my attention was called after this was reported in its present shape. I had come to the conclusion—and I think I may speak for the others probably—that an amendment like the one which the Senator has proposed should be adopted. The Dutch standard is an iniquity that has met with universal condemnation. In postponing the date at which the new law should take effect-in other words, in continuing in existence the old law for the balance of this year—we were thinking only of the question of giving these people the receipts for this year's cane and beets upon the basis of their contracts, and things of that sort, but did not think about the question of the Dutch standard.

Later my attention was called to it, and I had intended to see the members of the subcommittee and of the committee and suggest that there ought to be an amendment for the purpose of abolishing the Dutch standard in the present law, even though the balance of the present law was continued, so that we might do justice to these people with regard to their con-

tracts.

If I may speak for this side—I am speaking for myself, at any rate—I am perfectly willing to accept the amendment. think it ought to be accepted, in fact; and if the Senator had not offered it I was, later on, going to offer one to accomplish the same purpose

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Kansas.

Mr. SIMMONS. I wish to say before the vote is taken that this matter had not been called to my attention at all.

Mr. BRISTOW. I read the amendment into the RECORD last

Mr. SIMMONS. The request I made of the Senator was simply to have an opportunity to ascertain whether the subcommittee had considered it.

The amendment was agreed to.

The next paragraph was read as follows:

180. Maple sugar and maple sirup, 3 cents per pound; glucose or grape sugar, 12 cents per pound; sugar cane in its natural state, or unmanufactured, 15 per cent ad valorem: Provided, That on and after the 1st day of May, 1916, the articles hereinbefore enumerated in this paragraph shall be admitted free of duty.

Mr. GALLINGER. Mr. President, I will inquire if there are any amendments now pending to the sugar schedule?

The VICE PRESIDENT. Not to this point.

Mr. GALLINGER. I had hoped, Mr. President, that this one

little, struggling industry, the manufacture of maple sugar,

would not attract the attention of Senators on the other side. The manufacture of maple sugar is confined to a few States. Last year there were 1,700,500 pounds imported, a very considerable amount, upon which duties were paid to the amount of \$68,000. I will ask the Senator in charge of this schedule why the necessity for interfering with this little industry, the manufacture of maple sugar.

Mr. WILLIAMS. I do not know that there was any necessity. We thought it advisable, however, to make the provision. I do not know how you expect to increase the growth of maple trees by putting a protective duty on maple sugar. It is not an infant industry at any rate.

Mr. GALLINGER. The Senator does not expect to either destroy or increase the trees by putting them on the free list either, does he?

Mr. WILLIAMS. No; I think not, I think the sap will continue to run.

Mr. GALLINGER. Probably so. Mr. WILLIAMS. Yes.

Mr. GALLINGER. The Senator does not offer any argument in that suggestion. He is always extremely witty, and this is a specimen of his wit.

Mr. WILLIAMS. I beg the Senator's pardon, but I think it was an argument.

Mr. GALLINGER. I fail to see it. Mr. WILLIAMS. It was an argument. It may have sounded

humorous, but at any rate it was an argument.

Mr. GALLINGER. The Senator knows that maple sugar made in this country is in competition with Canadian maple sugar, and American maple sirup is in competition with Canadian maple sirup. We imported 1.700,000 pounds of maple sugar last year, and the estimate that the Senator and his committee make is that next year we will import 1,800,000 pounds, a very small additional importation. I think the Senator is wrong in that estimate. I have an impression-

Mr. WILLIAMS. I would not be surprised.

make it.

Mr. GALLINGER. I have an impression that a great deal more than that will be imported. But, Mr. President, I know how futile it is to make a contest over this item.

Mr. WILLIAMS. No, seriously; if the Senator wants to talk

seriously about it

Mr. GALLINGER. I would like to do so.
Mr. WILLIAMS. There are no pauper maple trees in Canada
and there is no pauper labor in Canada. So upon the argument for protection itself even—and I am speaking from a protectionist standpoint now, because I want to assume the Senator's standpoint-it does not apply to maple sugar or to the labor that is engaged in collecting the sap and boiling it down and getting maple sugar out of it. Certainly, such protective reasons as might have been made plausibly for cane sugar and for beet sugar none of them apply to maple sugar, I do not suppose there are imports of maple sugar from any country in the world except Canada; and the conditions of labor there and here are substantially the same, and the trees are substantially the same. We have a little advantage I suppose in the weather, but that is about the only difference.

Mr. GALLINGER. I think the Senator is wrong on that

Mr. WILLIAMS. It may be so. Mr. GALLINGER. If he had lived in Canada he would know that the weather there is extremely favorable for the manufacture of maple sugar. I suppose, however, the proposed change is on the same principle that cane sugar and beet sugar are to be put on the free list, and maple sugar goes with the In other words, the tail goes with the hide. I suppose rest. that is it?

Mr. WILLIAMS. If it is any consolation to the Senator to express it in that way I am willing to close the debate or per-

mit it to be closed with that statement.

Mr. GALLINGER. The constant iteration and reiteration that labor conditions are the same in Canada and in the United States is perhaps as well known to me as to almost any Senator. I know that in the Province of Quebec labor conditions are not similar to those in the United States, and that as large wages are not paid in that Province.

Mr. WILLIAMS. In that single Province of Canada I think probably the Senator is correct, and the wages are somewhat

Mr. GALLINGER. I am absolutely correct.

Mr. WILLIAMS. If the Senator means the gross wages of those people, with a lower standard of living, more thrifty and more saving, which is a racial trait, and they are willing to take less wages. If the Senator means that the net wages, the amount that the man has after he has paid for what he needs or for what he thinks he needs, are greater in this country than in Quebec, I doubt it very much.

Mr. GALLINGER. I mean that wages are higher here than

in the Province of Quebec.

Mr. WILLIAMS. That is the real wage after all.

Mr. GALLINGER. What I mean is that the average day's labor, without reference to what a man eats or wears, is lower in the Province of Quebec than in the New England States.

Mr. WILLIAMS. But there are 3,000 miles of the border, you know, and this can not be tested simply by the difference

between New Hampshire and Quebec.

Mr. GALLINGER. Of course, the 3,000 miles, which includes all the States bordering on Canada, do not produce maple sugar. That industry is confined——

Mr. WILLIAMS. I am sure I do not know, but I expect

there is some maple growing all along the line.

Mr. GALLINGER. The Senator's humorous suggestion that the maple trees are similar in Canada with those in the United States equally applies to sugar beets and to cane sugar. So there is no argument in that. It would also apply to wheat or any other product of the farm.

Mr. WILLIAMS. We have heard from the beet-sugar men that they expected a greater amount of saccharine matter per ton in Germany than here. I am not discussing the question of the dissimilarity of beets as regards their capacity to make

sugar.

Mr. GALLINGER. This is not worth spending much time over. As I said in the beginning, I had hoped that this one little industry would escape the Argus eye of the Senator from Mississippi, but it has not. New England has had slaughter all along the line in the metal schedule and the chemical schedule, and we will be slaughtered in the textile schedule, and very likely maple sugar ought to go with the rest. I know there is no use contesting the case. I am making this simple statement, and with that will be content, except that I will ask for the yeas and nays on the amendment.

Mr. WILLIAMS. Mr. President, one word. The word "slaughter" strikes me as rather an extreme word. It is as if I were making a man a present of \$50 a month and then said to him, "I will reduce the bounty I am giving you to \$30," and then he would come to me and lodge a complaint that I was about to murder him. I think the word "slaughter" is a

little strong.

Mr. GALLINGER. Probably it is, and very likely I ought to have used a milder word, but the result will be disastrous to New England industries.

Mr. WILLIAMS. It involves the idea that you have a vested right in a tax. It may be true that you have enjoyed such great sectional advantages under the tariff laws of this country that when we make a reduction all along the line you do suffer somewhat more than those parts of the country that have not enjoyed the special privileges conferred upon you by law. If that be true, then the blame is to be laid upon those who extended the special privilege and not upon us, who are trying to prune the tree.

Mr. GALLINGER. Mr. President, we understand the attitude of the other side of the Chamber on this matter. We understand their economic attitude.

Mr. WILLIAMS. I think the Senator is right. We both understand one another's attitude, and I think we are wasting a great deal of language. The country will judge us by what we do and not by what we say.

Mr. GALLINGER. Having had such a lucid explanation from the Senator from Mississippi, I am willing that the vote shall be taken, and I ask for the yeas and nays on the proviso which

I move to strike out.

Mr. PAGE. I have been, Mr. President, a very insidious lobbyist in behalf of maple sugar for five years, and it seems that it is all going for naught. I only wish that the good Senator from Mississippi might go up to Vermont in March and April, when the snow is about 3 or 4 feet deep. If he would put on a sap yoke and go out and wade though anywhere from 2 to 4 feet of snow, sometimes so deep one can not get through, and bring in that sap to the sugar house, after boiling it down, he would think that we ought to have protection for that kind of labor if for none other.

Mr. WILLIAMS. If it is such hard work as all that, let us make the Canadians do it.

Mr. PAGE. We have the sugar maple; we know how to make sugar better than anyone else in the world; and we do not want to abandon that industry.

I want to say to the Senator, not that I expect the slightest consideration to be shown us, that that is an industry which is pretty much all work. We use a little weed and we have to chop the wood. We take the broken limbs that may be blown off during the winter for firewood. It is all labor, and I know that the farmer or the owner of the sugar bush does not get any more than he ought to have with the duty as it now is. The duty ought to be retained, but I am not very much given to wasting my breath and my strength in fighting where I know that I am absolutely buried and have no hope of winning. I simply say that I hope the amendment proposed by the Senator from New Hampshire [Mr. Gallinger] may prevail.

Mr. GALLINGER. My amendment seeks to strike out the proviso. That would leave a reduction of the duty on maple sugar from 4 cents a pound to 3 cents a pound, and glucose from 1½ cents to 1½ cents. By the adoption of the proviso those articles would not be put on the free list at the end of three years. I think we ought to be allowed to continue the industry upon the basis of the reduced duties, so long as we may do so to the advantage of the American people.

The VICE PRESIDENT. The question is on the amendment

proposed by the Senator from New Hampshire.

Mr. GALLINGER. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER], and in his absence I withhold my vote.

Mr. CHILTON (when his name was called). I have a pair with the junior Senator from Maryland [Mr. Jackson], which I transfer to the senior Senator from Virginia [Mr. Martin] and vote. I vote "nay."

Mr. KERN (when his name was called). I have a general pair with the senior Senator from Kentucky [Mr. Bradley], and therefore withhold my vote.

Mr. SMITH of Maryland (when his name was called). I have a general pair with the senior Senator from Vermont [Mr.

DILLINGHAM], and therefore withhold my vote.

Mr. SUTHERLAND (when his name was called). I am paired with the Senator from Arkansas [Mr. Clarke]. That Senator seems to be absent, and I will transfer my pair with him to the Senator from California [Mr. Works] and vote. I vote "vea"

vote "yea."

Mr. THOMAS (when his name was called). I again announce my general pair with the Senator from New York [Mr.

Roor] and withhold my vote.

Mr. TILLMAN (when his name was called). I have a general pair with the Senator from Wisconsin [Mr. Stephenson], and therefore withhold my vote.

The roll call was concluded.

Mr. KERN. I transfer my pair with the senior Senator from Kentucky [Mr. Bradley] to the junior Senator from Tennessee [Mr. Shields] and vote. I vote "nay."

Mr. GALLINGER (after having voted in the affirmative). I inquire if the junior Senator from New York [Mr. O'GORMAN]

has voted?

Bacon

Bryan Chilton Fletcher

Gore Hitchcock Hollis Hughes James

The VICE PRESIDENT. The Chair is informed that he has not.

Mr. GALLINGER. I have a standing pair with that Senator, but I will transfer it to the junior Senator from Maine [Mr. Burleigh] and allow my vote to stand.

Mr. McCUMBER. I have a general pair with the senior Senator from Nevada [Mr. Newlanns], which I transfer to the junior Senator from Washington [Mr. Poindexter] and vote. I vote "vea"

The result was announced—yeas 35, nays 37, as follows:

Culberson Dillingham du Pont Goff Jackson Martin, Va. Newlands O'Gorman Oliver Poindexter Smith, Md. Stephenson Thomas Tillman

So Mr. Gallinger's amendment was rejected.

Mr. GALLINGER. Mr. President, I can not let the opportunity pass without expressing extreme gratification over the large affirmative vote that was cast in behalf of maple sugar. It shows that there is an inclination on the part of the Senate to give consideration to some of the little industries in which New England is interested. I will renew the motion when the bill gets into the Senate in the hope that two more of our Democratic friends may relent and vote with us at that time.

The reading of the bill was resumed,

The next amendment of the Committee on Finance was, in paragraph 182, on page 53, line 23, after the word "less," to strike out "and sugars after being refined, when tinctured, colored, or in any way adulterated," and on page 54, line 1, after the words "per pound," to insert "and chewing gum," so as to make the paragraph read:

182. Sugar candy and all confectionery not specially provided for in this section, valued at 15 cents per pound or less, 2 cents per pound; valued at more than 15 cents per pound, and chewing gum, 25 per cent ad valorem. The weight and the value of the immediate coverings, other than the outer packing case or other covering, shall be included in the dutiable weight and the value of the merchandise.

The amendment was agreed to.

Mr. CUMMINS. Mr. President, before we pass to the next schedule I should like to ask a question of the chairman of the Committee on Finance. It may be very clear to him, but I am a little uncertain about it. Under what duty is sugar to enter between the date of the passage of this bill and the 1st of March, 1914?

Mr. SIMMONS. Under the existing duties. I will state to the Senator that it is probable that it will be necessary for us to bring in an additional amendment to make that more certain.

Mr. CUMMINS. Mr. President, in my opinion, if the bill is

passed as it now is, sugar will come in free from the date of the passage of the bill until the 1st of March of next year.

Mr. SIMMONS. I am aware, Mr. President, that that contention has been made, and I have said to the Senator that the committee has in view the probability of framing an amendment to remove any doubt about that matter.

Mr. CUMMINS. I am very glad that the committee has it in mind, because I have assumed that it did not intend that we should have free sugar during that period.

The VICE PRESIDENT. The Secretary will proceed with the

reading of the bill.

The Secretary proceeded to read Schedule H-spirits, wines,

and other beverages.

Mr. SIMMONS. Mr. President, there are in Schedule H probably but one or two controverted matters, the schedule being practically the same as the present law, with the exception of the amendments in paragraphs 254 and 2541. If there is no objection to passing that over at the present time, I should somewhat prefer to take up the cotton schedule.

The VICE PRESIDENT. Is there objection?

Mr. BRISTOW. Mr. President, I should like to inquire if the Senator from North Carolina has advised the Senator from Wisconsin [Mr. La Follette] as to his desire in regard to the cotton schedule? I think the Senator from Wisconsin has given that a great deal of attention, and I do not see him in the Chamber.

Mr. SIMMONS. No: I have not advised him; but I think he is in the cloakroom.

Mr. BRISTOW. I do not think he expected the cotton sched-

ule to come up at this time.

Mr. SIMMONS. Well, Mr. President, we can proceed with the wine and spirits schedule until we get to the amendments, which I am not ready to ask the Senate to act upon this after-

The VICE PRESIDENT. The Secretary will read.

The reading of the bill was resumed with Schedule H-spirits, wines, and other beverages, paragraph 242-and continued down

to paragraph 253, page 68.

Mr. BRISTOW. Mr. President, I wish to inquire of the Senator in charge of this part of the bill if paragraph 252 includes

grape juice? I see it covers prune juice and cherry juice.

Mr. SIMMONS. If the Senator will turn to paragraph 2541, I think he will find that that covers grape juice.

insert "containing each not more than one-half pint, 12 cents per dozen," so as to make the paragraph read:

per dozen," so as to make the paragraph read:

253. Ginger ale, ginger beer, lemonade, soda water, and other similar beverages containing no alcohol, in plain green or colored, molded or pressed, glass bottles, containing each not more than one-half pint, 12 cents per dozen; containing each not more than three-fourths of a pint, 18 cents per dozen; containing more than three-fourths of a pint each and not more than 1½ pints, 28 cents per dozen; but no separate or additional duty shall be assessed on the bottles; if imported otherwise than in plain green or colored, molded or pressed, glass bottles, or in such bottles containing more than 1½ pints each, 50 cents per gallon, and in addition thereto duty shall be collected on the bottles, or other coverings, at the rates which would be chargeable thereon if imported empty. Beverages not specially provided for containing not more than 2 per cent of alcohol shall be assessed for duty under this paragraph.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 254, page 69, line 5, after the words "provided for in this section, in," to strike out "bottles or jugs containing not more than one-half pint, 10 cents per dozen bottles; if containing more than one-half pint and not more than 1 pint, 15 cents per dozen bottles; if containing more than 1 pint and not more than 1 quart, 20 cents per dozen-bottles; if imported in bottles or in jugs containing more than 1 quart, 18 cents per gallon; if imported otherwise than in bottles or jugs, 8 cents per gallon; and in addition thereto, on all of the foregoing, duty shall be collected upon the bottles or other containers at one-third of the rates that would be charged thereon if imported empty or separately," and to insert "plain green or colored, molded or pressed, glass bottles, or in jugs, containing not more than onehalf pint, 10 cents per dozen; if containing more than one-half pint and not more than 1 pint, 15 cents per dozen; if containing more than 1 pint and not more than 1 quart, 20 cents per dozen; but no separate or additional duty shall be levied on the bottles or jugs. If imported in bottles or jugs containing more than 1 quart, 18 cents per gallon; if imported otherwise than in bottles or jugs, 8 cents per gallon; and in addition thereto duty shall be collected on the bottles or other containers at the rates that would be charged thereon if imported empty or separately," so as to make the paragraph read:

so as to make the paragraph read:

254. All mineral waters and all imitations of natural mineral waters, and all artificial mineral waters not specially provided for in this section, in plain green or colored, molded or pressed, glass bottles, or in jugs, containing not more than one-half pint, 10 cents per dozen; if containing more than one-half pint and not more than 1 pint, 15 cents per dozen; if containing more than 1 pint and not more than 1 quart. 20 cents per dozen; but no separate or additional duty shall be levied on the bottles or jugs. If imported in bottles or jugs containing more than 1 quart, 18 cents per gallon; if imported otherwise than in bottles or jugs, 8 cents per gallon; and in addition thereto duty shall be collected on the bottles or other containers at the rates that would be charged thereon if imported empty or separately.

Mr. CLARK of Wyoming. Mr. President I wish to call the

Mr. CLARK of Wyoming. Mr. President, I wish to call the attention of the Senator in charge of this schedule of the bill to what appears to me to be a fact, that this amendment as prepared admits duty free all mineral waters in quart bottles or less unless they are in colored bottles. I do not suppose that was the intention of the committee. The error seems to have been made in an attempt to consolidate the law of 1909 and the House bill. I think there should be some sort of change there, because we have something like \$400,000 revenue under that paragraph, and it might be very greatly in danger as it now

I submit that to the Senator in charge of this part of the bill. Mr. HUGHES. I will call the Senator's attention to the fact that this language was copied from another paragraph in the

bill that seems to include all possible containers.

Mr. CLARK of Wyoming. No; not at all. It does not include plain glass containers. If the Senator will look at the law of 1909 he will find that the first part of the paragraph refers to mineral waters imported in colored containers, and the last part of the paragraph refers to mineral waters imported in other containers than colored ones.

Mr. BRANDEGEE. Mr. President, it occurred to me that possibly in line 16 a comma had been omitted after the word "plain." I do not know

Mr. CLARK of Wyoming. No. Running all through the laws as we have had them heretofore the colored bottles are referred to as plain green or colored bottles; and then the last half of the section in the laws heretofore has covered bottles other than plain green or colored. Of course, it might be remedied, as the Senator from Connecticut has suggested, by inserting a comma after the word "plain."

Mr. HUGHES. The same language appears in the ginger-ale

paragraph.

Mr. CLARK of Wyoming. Of course, I am not particularly interested in this matter. My suggestion is only for the pur-The next amendment of the Committee on Finance was, in paragraph 253, page 68, line 15, after the word "bottles," to intended to be preserved. I have no question at all in my own mind that under this section all mineral water imported in quart receptacles or less than quarts, unless the bottles were colored green or some other color, would come in absolutely free. have assumed that that was not the purpose of the paragraph. I think it is worthy of the consideration of the committee before they finally pass on it.

Mr. SIMMONS. Does not the Senator think that if there were a comma inserted after the word "plain" his criticism would be eliminated?

Mr. CLARK of Wyoming. I think that would remedy the criticism, but it would make the sentence inartistic if you should say "plain" and then "green or colored." I think probably that would meet it, but I think it would not be a very artistic way

Mr. SMOOT. I will say that the word "plain" would not meet it, because if the word "plain" and nothing else were used all the importers would have to do would be simply to put some kind of wording upon the bottle, and then it would not be a plain bottle. The mistake of the Senator having the schedule in hand comes from the fact that he has used, in paragraph 254, words that were used in old paragraph 311 as to ginger ale, and so forth.

Mr. CLARK of Wyoming. But the difficulty is that he has not used them all.

Mr. SMOOT. I was going to say that the Senator from Wyoming is certainly correct. I believe that just as soon as the Senator studies the wording of paragraph 254 he will admit it.

Mr. SIMMONS. I am inclined to think the Senator from Wyoming is right about it. It is just a question of how it may be remedied.

Mr. CLARK of Wyoming. Of course, I have no amendment to suggest. I leave that to the consideration of the committee.
Mr. BRANDEGEE. Does not the same criticism apply to paragraph 253?

Mr. SMOOT. No; it does not.

Mr. SMOOT. No; it does not.

Mr. BRANDEGEE. It uses exactly the same language.

Mr. CLARK of Wyoming. But down below, in line 21, if the
Senator will notice, it says that if imported otherwise than in plain green or colored bottles it shall be taxed at a different rate of duty than that imported in uncolored bottles.

Mr. SMOOT. If they had followed up paragraph 254 with the same words with which they followed up paragraph 253, providing for mineral water coming in in bottles other than those named in the paragraph, there would be no question but that it was correct. As it is now, it is incorrect.

Mr. SIMMONS. I think if the words "plain green or colored, molded or pressed," were stricken out, leaving only the words "in glass bottles, or in jugs," that would meet it.

Mr. CLARK of Wyoming. That would remedy the situation as far as my suggestion was consequent.

as far as my suggestion was concerned.

Mr. HUGHES. Then, Mr. President, I move to strike out the

words "plain green or colored, molded or pressed," including the comma, on line 16, page 69, of the bill. The VICE PRESIDENT. The amendment to the amendment

will be stated:

The Secretary. In the committee amendment, on page 69, line 16, it is proposed to strike out "plain green or colored, molded or pressed," and the comma after the word "pressed."

The amendment to the amendment was agreed to. Mr. SMOOT. Mr. President, I should like to ask the Senator upon what theory he provides in line 21 that "no separate or additional duty shall be levied on the bottles or jugs," referring of course to the half-pint and pint bottles stated in that clause, and then provides in line 24 that "duty shall be collected on the bottles or other containers at the rates that would be charged thereon if imported empty or separately"? Under the present law the Senator no doubt remembers that one-third of the value

is collected.

Mr. HUGHES. Yes; one-third of the value is collected. Mr. SMOOT. That applies to the whole of the paragraph. Mr. HUGHES. The pints and the quarts.

Mr. SMOOT. Everything. Mr. HUGHES. Yes.

Mr. SMOOT. But now you have separated it, and have said that the one-half pints and the pint bottles shall not pay any

Mr. HUGHES. Yes; because that makes it harmonize with the other items in the paragraph. If you take paragraph 253, you find the same situation there. The committee thought a duty of 25 per cent ad valorem upon mineral water was a sufficient duty, and deliberately left off the duty of one-third the value of the container, which had been assessed under the old law.

Mr. SMOOT. If the Senator speaks of the duty, he must remember that they have reduced the duty on bottles holding not more than one pint from 20 cents to 15 cents per dozen.

Mr. HUGHES. We have levied an equivalent ad valorem of 25 per cent on the items included in the paragraph, and thought that was sufficient.

Mr. SMOOT. I was wondering why you provided here for the collection of a duty on all bottles or other containers over and above the quarts.

Mr. HUGHES. I presume for the reason that it is done in other places in the schedule. We did not want any additional duty charged upon pint or quart containers. When it comes to other large containers, the situation may be entirely different; and the action that we took harmonized this particular para-

graph with the preceding paragraph.

Mr. SMOOT. Of course the result of this will be that importers of mineral waters, such as Apollinaris and other waters from Germany, hereafter will have to pay no duty whatever upon the bottles, but simply upon the water.

Mr. HUGHES. It comes to an ad valorem rate of about 25

per cent.

Mr. SMOOT. In the past, of course, they have paid the duty upon the bottles. It has been a great source of revenue to the United States. That class of water, as everybody knows, is used from one end of this country to the other upon the tables of the rich people of the country. The Senator must admit that he is throwing away that revenue. I can not see why it should be done. That is the reason I asked the Senator why the committee took that position.

If it had been a water that was used by the ordinary people in this country, and was a necessity in any way, there would be no complaint whatever, and no justifiable cause for questioning this language. But it is a water that is used only at banquets and by the rich people of the country, and there are millions of dollars' worth of it imported into this country. Under this paragraph all that revenue is to be thrown away. It will not do a single person in this country any good, because the water will be sold at the same price per dozen bottles, and whatever the Treasury of the United States loses the great water companies of Germany and France will make.

Mr. HUGHES. Mr. President, the change in this paragraph harmonizes it with the preceding paragraphs of the bill. The Senator is mistaken in regard to the quantity of mineral water covered by this paragraph that is imported. It is not anything like he said it was, according to the Treasury report. event, the committee decided that the rate of duty levied upon mineral water in this bill, the equivalent ad valorem of which is 25 per cent, was sufficient.

The VICE PRESIDENT. The question is on agreeing to the

committee amendment as modified.

Mr. SMOOT. Mr. President, the importations for 1912 of all mineral waters and all imitations of natural mineral waters and all artificial mineral waters not specially provided for, in bottles or jugs containing not more than 1 pint—that is the smallest size—amounted to \$429,375; or there were 835,591 dozen bottles of that class of water imported into the United States. In the same year, of mineral waters containing more than 1 pint and not more than 1 quart, the value of the importations was \$554,890.

Mr. HUGHES. The Senator can get the totals here in the table. It is less than a million. He said "millions." That is

what I referred to.

Mr. SMOOT. I did not say millions annually; I say that there are imported into this country millions of dollars' worth.

That is what I said.

Mr. HUGHES. Then I withdraw the statement.

The VICE PRESIDENT. The question is on agreeing to the amendment

Mr. SMOOT. I will not prolong the debate, but I was going to call the attention of the Senator—if he will just turn over the page and look at the items there I think they would cover the amount of a million or more. It follows that all that water will be imported into this country, simply giving to the importers of Apollinaris water and waters from the springs of Germany a benefit here of the duty upon one-third of the bottles that the water comes in.

If the Senator was in Congress four years ago, he knows that the employees of every concern manufacturing bottles in this country petitioned Congress to see that this provision was put into the law. The House provided in the law of 1909 that the rate should be collected upon the full value of the bottles, but when it came into the Senate there was a compromise made and there was one-third of that value taken. That is the history of it.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the committee was to add a new paragraph, as follows:

The amendment of the committee was to add a new paragraph, as follows:

254. Every producer of pure sweet wines, other than those actually exported, is hereby required to pay to the Government as a revenue tax the sum of \$1.10 per proof gallon for the wine spirits or grape brandy or pure neutral alcohol used by him in the fortification of said wine, the same to be paid upon the removal thereof from the distillery or from any special bonded warehouse: *Provided, however, That it is time of the payment of said tax upon such wine spirits or grape brandy or pure neutral alcohol used in fortifying pure sweet wines may be extended not exceeding two years upon the producer of such pure sweet of said tax with sureties to the satisfaction of the collector of internal revenue of the district and the Commissioner of Internal Revenue conditioned upon the payment of said tax within said two years.

That so much of the act entitled "An act to reduce the revenue and equalize duties on imports, and for other purposes." approved October 1, 1890, as relates to the use, free of tax, of wine spirits or grape brandy in the fortifying of pure sweet wine, and all acts amendatory thereof, so far as they relate to the fortification of such wines and the charge therefor, which may be inconsistent with this paragraph are hereby to that extent repealed:

(other than distilled spirits) not made exclusively from fresh grapes, berries, or fruits, and upon all wines to which have been added spirits exclusively, except pure neutral alcohol, there shall be levied, collected, and paid before removal from the place of manufacture a tax of 25 cents on each and every wine gallon where the alcoholic strength of such wine does not exceed 22 per cent, by volume, and upon all such wines or liquors containing an alcoholic strength of over 24 per cent, by volume, and upon all such whice how the district in which such wine or liquor subject to tax under the provisions of this paragraph shall file with the collector of the district in which such wine or li

Mr. SIMMONS. I ask that that paragraph be passed over. I will state as a reason why I wish to have the paragraph passed over at present that the committee has been giving some hearings to a number of representatives of these industries from the Pacific coast and from the eastern section of the country. They have been before us for two or three days, and we wish to look into the matter further before action by the Senate. I ask that the paragraph be passed over.

The VICE PRESIDENT. If there be no objection, the para-

graph goes over.

Mr. SIMMONS. That finishes the schedule. I ask now that Schedule I be taken up.

The reading of the bill was resumed at line 7, page 73, Sched-

ule I, cotton manufactures.

The next amendment of the Committee on Finance was, to strike out paragraph 255, in the following words:

strike out paragraph 255, in the following words:

255. Cotton thread and carded yarn, combed yarn, warps, or warp yarn, whether on beams or in bundles, skeins, or cops, or in any other form, except spool thread of cotton, crochet, darning and embroidery cottons, hereinafter provided for, shall be subject to the following rates of duty: Nos. 1 to 9, inclusive, 5 per cent ad valorem; Nos. 10 to 19, inclusive, 7½ per cent ad valorem; Nos. 20 to 39, inclusive, 10 per cent ad valorem; Nos. 50 to 59, inclusive, 10 per cent ad valorem; Nos. 50 to 59, inclusive, 20 per cent ad valorem; No. 100 and over, 25 per cent ad valorem. Cotton card laps, roping, sliver, or roving, 10 per cent ad valorem; cotton waste and flecks manufactured or otherwise advanced in value, 5 per cent ad valorem.

And in lieu thereof to insert:

255. Cotton thread and carded yarn, warps, or warp yarn, whether on beams or in bundles, skeins, or cops, or in any other form, not combed, bleached, dyed, mercerized, or colored, except spool thread of

cotton, crochet, darning and embroidery cottons, hereinafter provided for, shall be subject to the following rates of duty:

Numbers up to and including No. 9, 5 per cent ad valorem; exceeding No. 9 and not exceeding No. 19, 75 per cent ad valorem; exceeding No. 19 and not exceeding No. 19, 175 per cent ad valorem; exceeding No. 39 and not exceeding No. 49, 15 per cent ad valorem; exceeding No. 59 and not exceeding No. 79, 20 per cent ad valorem; exceeding No. 59 and not exceeding No. 79, 20 per cent ad valorem; exceeding No. 79 and not exceeding No. 99, 225 per cent ad valorem; exceeding No. 99 and not exceeding No. 190, 25 per cent ad valorem; exceeding No. 199, 20 per cent ad valorem; exceeding No. 19, 10 per cent ad valorem; exceeding No. 9, 75 per cent ad valorem; exceeding No. 19 and not exceeding No. 19, 10 per cent ad valorem; exceeding No. 19 and not exceeding No. 49, 175 per cent ad valorem; exceeding No. 39 and not exceeding No. 59, 20 per cent ad valorem; exceeding No. 49 and not exceeding No. 79, 225 per cent ad valorem; exceeding No. 79 and not exceeding No. 79, 25 per cent ad valorem; exceeding No. 79 and not exceeding No. 79, 25 per cent ad valorem; exceeding No. 79 and not exceeding No. 199, 275 per cent ad valorem; exceeding No. 199, 20 per cent ad valorem; exceeding No. 199, 20 per cent ad valorem. exceeding No. 199, 20 per cent ad valorem; exceeding No. 199, 20 per cent ad valorem. exceeding No. 199, 20 per cent ad valorem; exceeding No. 199, 20 per cent ad valorem. cent ad valorem

During the reading of the amendment,

Mr. SMITH of Georgia. I think the committee will ask to strike out the word "combed," but I do not do so at the present. However, I call attention to the fact that we do expect in all probability later to omit the word "combed."

Mr. LIPPITT. What is the reason for that omission? Mr. SMITH of Georgia. I would prefer that the reading should go on at present.

After the reading of the amendment was concluded,

Mr. SMITH of Georgia. We also desire to strike out the word "combed" as it appears later on in the same paragraph.

Mr. LIPPITT. Excuse me; I did not hear what the Senator

Mr. SMITH of Georgia. The subcommittee expect to ask the approval of the committee as a whole to strike out the word

"combed" in each place where it appears in the paragraph.

Mr. LIPPITT. I should think, of course, if that is going to
be done it would be inadvisable to pass on the paragraph at all, because I should not suppose that the gentlemen in charge of the bill would wish to pass a paragraph to which they wanted to make some amendment.

What I particularly wanted to call to the attention of the Senate is the substitution of an ad valorem stepping-stone system of duties made by this bill for what is perhaps the most perfectly graded specific duty there is in the entire tariff law. The duties as provided for in this amendment are represented on the chart which is hanging on the wall by the first column of figures, which is a gray cloth, but the classifications for colored yarn and for gray cloth are exactly the same. I simply use that to illustrate that the method of applying duties has been changed to what I consider to be a most imperfect system.

There is more than one thing to be considered in making a tariff law. Of course in the mind of the general public what particularly strikes them is the question of rates—whether the rates are high or low-but when it comes to making a law that can be called excellent or otherwise it is also most essential that those rates of duty shall be proportionately applied to the various articles they refer to.

You will see by looking at the table which is on the wall that on all yarns from 19 to 39, when colored, there is a duty of 12½ per cent ad valorem. From 39 to 49 there is a jump of 5 per cent, which is in the neighborhood of 40 per cent of the duty, making a rate of 17½ per cent. In other words, while the very proper principle is recognized in the classification that is used in the bill, that the finer the number of yarn the higher the duty should be from a protective standpoint, for as I examine the bill I suppose, of course, the variations of duty are so laid for the purpose of protection, the only question I am discussing is whether it is a good form of protection or not.

I say that in addition to the rates of duty it is necessary that the form should be perfect, and in the form which is here adopted we have the anomaly that while it is recognized that the duties should vary with the number from No. 19 to 39, which is a very large classification of cotton yarns, which in cludes probably 70 per cent of all the cotton yarns that are spun in this country, there is absolutely no variation in the duty at all. Nevertheless, when you jump from 39 to 39½ there is an increase of 40 per cent in the duty. is an increase of 40 per cent in the duty.

Mr. President, if it was necessary to make any such changes as that in order to make a good system of duties, I would not waste the time of the Senate in calling it to their attention. But it not only is not necessary but in the law as it stands to-day, and in the law as it has stood for very many years prior to the law now in force, a much more perfect system was adopted—a system by which the duty varied by a uniform differential for each variation in the number of the yarn. Under the present law, starting with the basis of 2½ cents a pound up to No. 15, one-sixth of a cent per number is added for each number up to No. 30, and one-fifth of a cent per number for each number from No. 30 up. In other words, there is a perfectly uniform differential applying to each number of yarn as the numbers grow finer.

I fail to see why with such a perfect system in form which had worked entirely satisfactorily it was necessary to adopt such an imperfect system as the stepping-stone one which is represented in the pending bill. If it was necessary and desirable in the minds of the gentlemen in charge of the bill to reduce the duties, they could have reduced them without in the slightest degree changing the system upon which they are It could have been reduced either by using an ad valorem duty or by using a specific duty as is in the present law, and that would have given a very much more even and uniform application of these duties.

Further, Mr. President, not only has the classification been changed from the uniform system now in existence, but also the method of applying the duty has been changed from a specific to an ad valorem basis. To use ad valorem duties on these cotton yarns necessitates, in the first place, finding the numbers of the yarns, which is not a difficult undertaking. then necessitates finding the value of the yarns and arranging the duties in accordance with those values. That opens up a very large range of new questions concerning undervaluation, concerning prices in different countries, concerning the different prices in the same number of yarn; for the price of No. 25 yarn, for instance, is not uniform. It is not simply because it is No. 25 yarn. There is an enormous variation in the price of No. 25 yarn according to the quality of stock out of which it is made, according to the twist that is put into it, and according to various other considerations.

In the present case we have a simple, uniform duty that can be easily administered, and we are substituting for it a duty that is going to be difficult to administer, certainly as compared with the present duty, that is not uniform in its applica-tion of varying duties, and I fail to see the justification for it.

I further want to say that so far as the question of specific and ad valorem duties goes as applied to these yarns, whereas the specific system now in force has been changed in the case of cotton yarn to an ad valorem duty, when it came to the silk schedule, where there is to-day a compound duty, substantially a specific duty, in force, and under the House provisions an ad valorem duty had been substituted, the Senate committee bill has returned to the specific form of duties now in existence, with different rates.

It seems to me that if it is desirable in the case of silk yarns that there should be a specific duty, it is certainly equally desirable in the case of cotton yarns that there should be a specific duty. There is no question about the ease of its col-

I hope, Mr. President, that there will be some explanation made of the reason why it is necessary or why it is desirable to make the changes I have referred to.

Mr. SMITH of Georgia. Mr. President, we agree with the view that has been adopted by the House as to the wisdom of changing the plan under which the yarn and the cloth schedules are prepared. They are made to a large extent to harmonize with each other. One of the reasons, I have no doubt, for changing the yarn schedule was to make it conform to a similar plan with reference to the cloth schedule.

The cloth schedule as found in the Payne-Aldrich law is most complicated and has caused much trouble in its administration. It is based on the number of threads per square inch, the number of square yards per pound, and the value per square yard. All three of these elements enter into the plan of making the assessment or levying the tax. They become complicated and difficult. We have changed from that complicated plan to one which followed the numbers of the thread. The House simplified the mode of levying the tax.

Of course Senators understand that the difference in the number of yarns indicates the length of the thread. Beginning with No. 1, the smallest amount of thread is made from a pound. As you go on to higher numbers you increase the length of the thread made from the pound of cotton.

A study of the prices abroad and the prices here shows that the higher the number of the yarn the greater the competition from abroad with the productions here; the higher the number of the yarn the larger the tax which can be levied upon the yarn and yet leave competition from foreign spinners and thereby increase the revenue and bring about the result intended of competition.

So that the yarn numbers were adopted, starting with 5 per cent ad valorem for yarns from ones to nines, inclusive, and increasing from that on up to 25 per cent ad valorem for yarns from 100 to 200. Finally, at 200 and over, the rate was put at 20 per cent ad valorem, these yarns coming into this country almost exclusively to be handled for the purpose of making laces and not being yarns which enter into the production of cloth.

For the same reason that I have suggested, we wish to leave out the word "combed." The word "combed" is not found in connection with the cloth schedule, and the subcommittee that has had charge of this schedule do not think that there is any necessity for increasing the rate as to combed yarns. We think that the increases as to yarns should follow the increases as to cloth when dyed, mercerized, stained, painted, and so forth.

Mr. LODGE. Mr. President, this arrangement of duties on yarns is extremely complicated, and it seems to me somewhat unsystematic. I do not believe in ad valorems; I think the specifics are the proper method; but there is one question I should like to ask the Senator from Georgia, and that is, why there is a higher average duty on yarns than there is on the spool thread made from those yarns?

Mr. SMITH of Georgia. We shall reach the spool schedule after we dispose of this.

Mr. LODGE. I am aware of that; but they are closely connected.

Mr. SMITH of Georgia. I will, however, give my views on that now. As to the spool-thread paragraph, we have adopted the same classification of "spool thread, crochet, darning, and embroidery cottons" that is found in the existing law. perience has shown, and the report of the Tariff Board shows, that the thread coming into this country comes in largely at a duty under 20 per cent. The rate of 20 per cent is given the thread because the thread is of a character which under the specific duties of the Payne-Aldrich bill would be taxed less than 20 per cent ad valorem, and it therefore falls within the minimum provision that the rate in no case shall be less than 20 per cent. If the rate applicable to yarns had been placed upon thread, at least in some instances the Payne-Aldrich rates would have been increased.

Mr. LODGE. Mr. President, I understand that the sizes of yarns used by thread manufacturers range from 40 to 100, and that the sizes that are principally used in the manufacture of thread would be 50 and 60. That yarn gets, as I understand it, 20 per cent duty in the proposed tariff bill. That is 5 per cent more than is given to the finished material, which in this case is the thread.

Mr. SMITH of Georgia. I did not understand the Senator from Massachusetts.

Mr. LODGE. I say these yarns, of course, are the raw material of the spool cotton.

Mr. SMITH of Georgia. Yes.

Mr. LODGE. And it seems to me to put a duty on the average yarn used in the manufacture of spool cotton heavier than that placed upon the thread itself-

Mr. SMITH of Georgia. That seems illogical. Mr. LODGE. It seemed to me illogical,

Mr. SMITH of Georgia. Well, we took that subject up and investigated it, and we were surprised to find that the thread that now comes into this country comes in under the provision that in no instance shall the tax be less than 20 per cent. We find that the bulk of the thread which comes in takes the 20 per cent duty, because under the specific duty it would be below 20 per cent. This fact is particularly mentioned by the Tariff Board, and if we had adopted the yarn rates as to spool thread it would have carried the tax considerably above what it is under the Payne-Aldrich law.

Mr. SMOOT. I should like to ask the Senator this question: The statement that he makes in relation to the price of articles covered by paragraph 256, the low value of which the Senator speaks, is not spool cotton, but it is darning cotton and the reel or ball of cotton in skeins and cones.

Mr. LIPPITT. Crochet cotton.

Mr. SMOOT. The reel of cotton or the ball of cotton that comes here in cones is sometimes a pound and a half or two pounds in weight; and sometimes the large wooden cones weigh perhaps 5 pounds. It is that cotton which comes in this paragraph at the rate named by the Senator. If he will notice the importations of items under this particular paragraph, he will see that the equivalent ad valorem duty under the Dingley tariff, which was adopted in the year 1905, was 27.35 per cent. That included not only spool cotton, but it included all of the reel, the ball, and the skein cotton, which is a great deal cheaper than is the spool cotton. In the year 1910, under the present law, the equivalent ad valorem for articles named in that paragraph was 26 per cent and a little over; for the year 1912 it was 22.95 per cent, including all the items named in the paragraph.

If the Treasury Department had separated spool cotton from the reel cotton, the skein cotton, or the ball cotton, there would be no doubt that the ad valorem equivalent would have been higher upon the spool cotton than upon the cheaper varieties of cotton that I have mentioned in this paragraph.

Mr. LODGE. Mr. President, I merely desire to say that I have a letter from Mr. Charles B. Warren, of the Warren Thread Works, of Westfield, in my State, in which he says:

Please note that the proposed bill covering cotton yarn gives a higher average duty than is placed upon spool cotton. This seems to us an inconsistency, as yarn is the raw material from which our product is manufactured.

I simply read that statement from his letter to show the point I am trying to make.

As to the importations, the thread actually imported under the Payne-Aldrich tariff was very small in quantity; it was composed principally of fancy items and not staple sewing thread, on which the duty averaged about 23½ per cent, as stated in the handbook issued by the committee; but that gives an erroneous idea as to the staple thread which forms the great bulk of the production. It seems to me that, whatever rates are adopted, it is a mistake to put a heavier duty on the raw material than on the finished product which is produced from the raw material.

I have here some very carefully prepared tables with regard to wages and costs, which I will not read but which I will ask to have printed in the Record. Among them is one showing the imports of thread which seems to me to prove the point which I have been trying to make.

My only desire, Mr. President, is not to debate the matter at length but simply to call attention to the fact that this is another case where we do not put it on a revenue basis; we do not put it on a free-trade basis, but we give an actual benefit under our law to the foreign maker by imposing a lower rate

on the finished product than on the raw material of that product. I ask that the tables to which I have referred may be printed in the Record as a part of my remarks.

The VICE PRESIDENT. In the absence of objection, permission is granted.

The tables referred to are as follows:

## ROVING FRAMES.

England, 10 hank roving: Girl runs 2 frames, 162 spindles each, 324 spindles; speed, 1,158 revolutions per minute; earns, 68 hanks, at 2.85d, 168, 2d. (\$3.96) per 55 hours; produces, 68 hanks, 1,102 pounds; for \$3.96, equals \$0.0035 per pound.
United States, 10 hank roving: Girl runs 2 frames, 200 spindles each, 400 spindles; speed, 1,250 revolutions per minute; earns, 68 hanks, at \$0.135, \$9.18 per 54 hours; produces, 68 hanks, 1,360 pounds; cost, 1,360 pounds, for \$9.18, equals \$0.0068 per pound.

\$0.135, \$9.18 per 54 hours; produces, 68 hanks, 1,360 pounds; cost, 1,360 pounds, for \$9.18, equals, \$0.0068 per pound.

RING SPINNING.

England, on 24s: Girl runs 1 frame on 24s and 1 frame on finer count; earns, 41 hanks of 24s, at 2.2d., 7s. 6d., equals \$1.82; 40 hanks finer at 2.4d., 9s. 5½d., equals \$2.28; \$4.10 per week of 55 hours; produces, 41 hanks, 603 pounds, per 55 hours; cost, 603 pounds, for \$1.52, equals \$0.0030 per pound.

United States, on 24s: Girls run 2 sides on 24s, at \$0.86½, equals \$1.73; 5 sides finer, at \$1.50, equals \$7.50; earns, \$9.23 per week of 54 hours; produces on two sides, 298 pounds per 54 hours; cost, 298 pounds, for \$1.73, equals \$0.0058 per pound.

England, on 40s: Girl runs 2 frames, 4 sides, at 8.500 revolutions per minute; earns, 80 hanks, at 2.84d., 18s. 11d., equals \$4.57 per 55 hours; produces, 80 hanks, 704 pounds; cost, 704 pounds, for \$4.57, equals \$0.005 per pound.

United States, on 40s: Girl runs 6 sides, at \$1.50, \$9 for 54 hours; speed. 8,400 revolutions per minute; produces, 670 pounds; cost, 670 pounds, for \$9, equals \$0.0134 per pound.

England, on 58s: Girl runs 2 frames, 4 sides; earns, 60 hanks, at 3.42d., 17s. 1d., equals \$4.13 per 55 hours; produces, 60 hanks, 364 pounds; cost, 364 pounds, for \$4.13, equals \$0.0114 per pound.

United States, on 58s: Girl runs 6 sides, at \$1.50, \$9 per 54 hours; produces, 434 pounds; cost, 434 pounds, for \$4.13, equals \$0.0104 per pound.

Winding 2 or 3 ends from cops to a spool: Speed, in England, 560 feet ner minute; in United States, 450 feet ner minute.

Winding 2 or 3 ends from cops to a spool: Speed, in England, 560 feet per minute; in United States, 450 feet per minute. Attend, in England, 14 to 25 drums; in United States, 20 to 87 drums.

404, 327. 29 1, 046, 000. 01 

Mr. SMITH of Georgia. Mr. President, there is this further reply to that suggestion: These products are very much more valuable, and the same ad valorem will raise a very much greater revenue. Now, I want to read from the report of the Tariff Board with reference to paragraph 314 as it appears in the Payne-Aldrich law:

It is also provided that none of the goods covered by paragraph 314 shall pay a less rate of duty than 20 per cent ad valorem. During the last fiscal year, of spool thread cotton imported, that paying the minimum rate of 20 per cent exceeded that liable to the specific rate both in quantity and value.

And they give the figures, which show \$404,000 worth below

20 per cent and \$313,000 worth above it.

Mr. SMOOT. Mr. President, the Senator knows that the items in paragraph 256 of the pending bill, in which spool thread cotton is provided for, are the same items exactly as those covered by the present law under paragraph 314, which

Spool thread of cotton, crochet, darning, and embroidery cottons, on spools, reels, or balls, containing on each spool, reel, or ball not exceeding 100 yards of thread, 6 cents per dozen.

And then it provides specific rates as to the number of yards on a spool, and so forth, and contains the proviso, as stated by the Senator:

That none of the foregoing shall pay a less rate of duty than 20 per cent ad valorem.

I have not examined the report made by the Tariff Board in regard to spool thread, but I do know that cotton on reels, ball cotton, and skein cotton generally come in as single thread, and are a great deal less valuable than spool cotton. If the spool cotton came under the 20 per cent duty, as stated by the Tariff Board, I can not understand why the Treasury reports show that during the year 1905 the equivalent ad valorem was 27.35 per cent; that during 1910 the equivalent ad valorem was 26.63 per cent, and last year the equivalent ad valorem on all of the

items in the paragraph was 22.95 per cent.

Mr. SMITH of Georgia. Yet the Treasury report shows that of the importations for the fiscal year ending June 30, 1912, \$1,046,000, instead of the figures two years previous, came in on which the specific duty did not amount to 20 per cent.

Mr. SMOOT. For what year is that? Mr. SMITH of Georgia. The year ending June 30, 1912. The first figures I gave were the figures from the Tariff Board and they applied to a prior year, the year 1911. The subsequent figures from the Treasury show an increase to over a million dollars of goods that came in paying the 20 per cent minimum, because the character of the goods was such that the specific duties would have been less than the minimum of 20

While I am on my feet I wish to suggest to the Senator this thought: Does it not show that a high class of goods came in, instead of a cheap class, as the Senator suggests, and that so expensive were the goods that the specific rate provided in the

law did not reach the 20 per cent?

Mr. SMOOT. Mr. President, the higher the price of the goods of course the lower the specific ad valorem.

Mr. SMITH of Georgia. That is just what I say.
Mr. SMOOT. So it can not apply to the higher-priced goods.
I should say that the mere fact that the goods were higher priced can not answer the situation. In answer to what the Senator said in relation to importations in 1912, I call his attention to what the Treasury Department reports. I do not know what the Tariff Board has reported, and I do not know as to what year they reported; I have not the figures for the year 1911; but the figures for 1910 and 1912 I have here. The importations under that paragraph—that is, under paragraph 314 of the present law, which is the corresponding paragraph to the one we are now discussing, paragraph 256—the value of the importations for 1910 was \$511,071, the duties collected were \$136,107, and the equivalent ad valorem rate was 26.63. per cent. In the year 1912 the import values were \$1,552,735, the duties collected were \$356,330, and the equivalent ad valo-rem therefore would be 22.95 per cent. The reports of the Treasury Department, according to the figures that I have before me, show that the lowest equivalent ad valorem for importations of goods in this paragraph was 22.95 per cent.

Mr. SMITH of Georgia. What did the Senator say were the

importations for 1912?

Mr. SMOOT. In 1912 the importations were \$1,552,735, the amount of duties collected for that year was \$356,330, and the equivalent ad valorem was 22.95 per cent. That is the lowest equivalent ad valorem on that particular paragraph of this schedule of any year for which I have the figures before me.

So, Mr. President, I do not understand how the Tariff Board

could have made such a report. It may be that the report was made upon the year 1911, and it may be that that particular year there was some phenomenon that we do not know of now, or at least that I do not know of. But certainly it is not the case as far as the year 1910 or the year 1912 is concerned. do know, and I believe the Senator knows, that cotton that is shipped into this country in skeins and balls and cones is far less in value than any spool cotton that is ever shipped into this

I know that cotton comes in in cones—as I stated before, cones 14 inches in length—and I believe that many times there are 2 or 3 pounds of cotton upon one cone. It is all single. It never comes in double unless it is fancy yarn. In the case of spool cotton it is the finest of thread, the finest spun thread that it is possible to make in this country. Not only that, but it is doubled and twisted besides and put upon a little spool; and there is no man, whether he belongs to the Tariff Board or anyone else, who can say that cone cotton and yarn is of a higher value than spool cotton.

Mr. SMITH of Georgia. Evidently they do not refer to the character of yarns that the Senator from Utah has in view. I do not claim at all to be an expert in these matters. I have simply used the information which seemed to be at hand. I hope the Senator from Rhode Island was right when he said that I know more about my own profession than I do about this. have sought to do the best I could with the responsibilities upon me and using the information that was at hand.

I find this in the Tariff Board report:

The decline in the ad valorem duty, while the specific rate has remained practically the same, is due to the increase in the value of the thread imported.

Mr. SMOOT. Absolutely; and that is true. It could not be otherwise. It is because with a specific rate upon a given value the equivalent ad valorem will always be the same, and as the price rises the equivalent ad valorem declines, and as the price declines the equivalent ad valorem rises.

Mr. SMITH of Georgia. The cheaper the goods the higher the ad valorem on a specific basis, and the dearer the goods the

lower the ad valorem.

Then, I call attention again to the fact that the Treasury report for June 30, 1912, shows \$1,046,000 of these goods which came in so high in value that the specifics did not amount to 20 per cent, and therefore they did not take the specific duty, but were taxed at the minimum rate of 20 per cent ad valorem.

Mr. SMOOT. I say the only way that could be accounted for is that that is for the fiscal years 1911 and 1912, and not for the fiscal years 1912 and 1913. I am reporting now the year 1912, in which the importations amounted to \$1,552,735, and the equivalent ad valorem was 22.95 per cent. There is no question about that amount being right. But if the fiscal years 1911 and 1912 are the years that the Senator is reporting. I can not say what the importations are, because I have not the figures before me. But if it did fall below 20 per cent it is the only year it has fallen below that figure. Does the Senator admit that the figures I have read for the years 1905, 1910, and 1912 are correct?

Mr. SMITH of Georgia. I have not followed the years very far back, but I find this observation by the Tariff Board:

This increase in value, as in the case of other cotton goods to which attention has been called, is explained by two causes, the fact that our imports tend toward finer grades from year to year, and the increase in price of yarn for the same goods.

So the Tariff Board treated it as an accepted fact that this was to be the condition.

Mr. SMOOT. Mr. President, I do not think that part of the report refers to yarns.

Mr. SMITH of Georgia. This follows thread. It follows im-

mediately after what I have just read before.

Mr. SMOOT. Yes; but the word "goods" does not apply

to yarns. Mr. SMITH of Georgia. But this language is used just after

the language which reads as follows:

The decline in the ad valorem duty, while the specific rate has remained practically the same, is due to the increase in the value of the thread imported.

The Tariff Board were discussing this very question, and it is from the Tariff Board report that I derived the information that I have presented to the Senate.

Mr. SMOOT. I understood the Senator to say "goods." Of course "goods" means piece goods and not thread. I may have misunderstood him in reading that.

Mr. SMITH of Georgia. In their next sentence they do

This increase in value, as in the case of other cotton goods-

They simply treat thread as other cotton goods to this extent: They state the tendency is toward the importation of the finer qualities, and as in goods the highest class goods may be competitive to some extent under existing prices, so in threads the highest-priced threads may be. That is what they mean.

Mr. SMOOT. Of course, in speaking of cotton goods, that means piece goods. Thread or any condition of cotton less

than cloth itself is never referred to as "goods."

Mr. LIPPITT. Mr. President, I have been listening very interestedly to this discussion. I understood the Senator from Georgia [Mr. SMITH] to state that the only reason for putting a duty of 15 per cent on thread, when there is in many cases a duty of 271 per cent upon the yarn out of which that thread is made, is because the figures of importation show that the imports of thread only pay a duty in the neighborhood of 20 per cent. Therefore he figured that if he put a duty of more than 20 per cent upon thread he would be raising the duty.

I should like to say to the Senator from Georgia that to argue in any way at all from importations of an unimportant amount and the rates of duty that are paid on that unimportant amount to the rates of duty that are applied under the present law to the thread that is manufactured but that is not imported at all is not a proper method. The facts are, and the Senator seems to be surprised about it, that of course the thread is imported at the point where it will pay the least duty. You do not import thread that pays the most duty. The kind of thread that under the classification of the law is such that the duty is the smallest amount will come in, and that is exactly what has happened under the thread classification.

I have here the prices of several different kinds of foreign thread. There is the Arkwright thread, so called—these are brands—made in Manchester, England. The net price per brands-made in Manchester, England. dozen is 29.86 cents. The present duty per dozen is 12 cents. In the case of the Alost thread, made in Belgium, the present price is 28 cents per dozen and the duty 12 cents per dozen. In the case of the Shamrock thread, made at Belfast, Ireland, the present price is 31.54 cents per dozen and the duty 12 cents per dozen.

I shall not read them all, but the result of that is that the duty on those five or six well-known brands of thread is not 20 per cent; it is 41.85 per cent.

In other words, under the present law the thread that is not imported because the duty is too high to permit it to be imported, which has no representation in the figures the Senator from Georgia [Mr. SMITH] has been reading, is protected not by a duty of 20 per cent but by more than double that, or a duty of over 40 per cent.

I am glad this subject has come up, because I really think this duty upon thread is perhaps one of the most unjust duties there is in this whole schedule. I am not referring alone to the textile schedules, but to all of the schedules. I say that because it is so entirely out of proportion to the other duties on similar articles. I simply want, in the very fewest words, to

explain to the Senate how thread is made.

It is a very simple thing. Thread made from No. 100 yarn, which is a very common number and of which very large amounts of sewing thread, what is called domestic thread, are made-such thread as you buy at the retail stores-is simply the result of taking two or three or four or more threads of No. 100 yarn and twisting them together, the resultant product being what is known commercially as thread.

The labor cost and other costs of turning cotton into No. 100 yare, as compared with the increased cost of turning that No. 100 yarn into thread, are about the same. In other words, it costs twice as much to take cotton and make thread out of No. 100 yarn as it does to make the No. 100 yarn itself. Therefore, on any relative basis of duty, at least the duty should be as But what has happened is that while in this bill the duty is 271 per cent on the No. 100 yarn, the duty is only 15 per cent upon the thread made out of that yarn.

Certainly that is an anomaly; and I am very largely interested in it, because I expect the largest manufacturers of thread in this country are located in the State of Rhode Island, in the city of Pawtucket. I refer to the representatives in this country of the J. & P. Coates Manufacturing Co. There is another very considerable thread concern in the town of Westerly, R. I.

There are also a number of small makers of thread in Rhode Island. The product is one that requires the very best class of

help to produce it satisfactorily.

When a person goes and buys thread he wants something that is as near perfection from one end of its length to the other as it is possible to have it. The slight difference that there is in the cost of making thread is as nothing compared to the annoyance that would come from using a thread that was not perfect. Therefore the very highest quality of yarn that there is in this or any other country is what is put into the manufacture of thread for sewing purposes.

Not only, therefore, is this duty unfair, because it is only slightly over one-half the duty upon the raw material of which the thread is composed, but it is unfair because while the raw material is called No. 100 yarn, the same as much other raw material is called No. 100 yarn, the quality of the thing that is described by that same name is very much higher in the case of what is used for thread than what is used for the ordinary

manufacture of cotton goods.

If a duty of 27½ cents is fair for No. 100 yarn, a duty of 15 per cent for thread made out of No. 100 yarn is manifestly unfair. If a duty of 15 per cent is fair for No. 100 yarn when it is in thread, then a duty of 27½ per cent for that No. 100 yarn before 100 per cent more cost has been put on it is manifestly unfair. As I understand, that is the whole situation.

The imports to which the Senator refers are very largely of crochet yarns. I spoke the other day of fancy yarns, of yarns with nubs on them that might be called decorative yarns. These crochet yarns are used for the purpose of making things of that kind. They are an entirely different product from thread, although they come in under the thread schedule. is nothing in the figures the Senator has read to indicate in the slightest degree what proportion of those imports are thread proper, and what are crochet yarns, which are also described under the same paragraph.

Therefore it seems to me manifestly unfair to attempt to argue from the rates of duty that are paid on that small amount of importations. It is small. I think the Senator said it was a million dollars or thereabouts, whereas the value of the whole product of thread in this country is in the neighborhood of \$30,000,000, much of which is not represented in the importations at all. The only effect, so far as I can see, of putting this duty of 15 per cent upon thread is going to be that operatives of the very highest class of expertness and skill are going to have their positions put in just twice the peril from foreign importations that operatives are who are making a product that requires somewhat less skill.

Mr. REED. Mr. President, will the Senator enlighten us as to the wages paid to these very high-class operatives?

Mr. LIPPITT. The wages are somewhat higher.

Mr. REED. About what are they? Mr. LIPPITT. What does the Senator mean? Mr. REED. How do they range ber week?

Mr. LIPPITT. The wages were all put upon record some little time ago. I can not carry all those things in my head. will say, however, that a statement was made a few years back of the wages that were received by the laborers in the J. & P. Coates factory in Pawtucket, R. I., and in the J. & P. Coates factory in Paisley, Scotland; and those figures showed that the earnings in this country were just about double those in Scotland. They simply accord with thousands of other figures of the same kind.

Mr. REED. I am not interested in what the wages are in Scotland. I want to know what they are in this country.

Mr. LIPPITT. The wages in Scotland are about one-half what they are in America.

Mr. REED. What are the wages in this country for the highly skilled men that the Senator says will suffer?

Mr. LIPPITT. I can not say accurately; but if the Senator asks me for a guess, I think in the case of mule spinners they probably make \$16 to \$18 a week.

Mr. REED. An ordinary brick mason, who is not protected,

gets about \$6 a day.

Mr. LIPPITT. What does the Senator mean by saying that the brick mason is not protected?

Mr. REED. I say that simply because he is not protected.
Mr. LIPPITT. I differ from the Senator entirely on that
statement. What is protected in the case of the laborer engaged in making cotton cloth is the cloth that he makes. is a certain duty put upon that cloth which makes it impossible to import it except by the payment of that duty. In the case of the brick mason and the stonemason and in the case of all the men occupied in the building trades there is no duty upon their product because it is physically impossible to import their product; and the protection that is upon the men engaged in that trade is not merely a protection that sometimes allows importations to come in, but it is a protection made by the powers that made this world, which makes it absolutely impossible for the products of

gaged in England or France, or wherever it may be. Mr. REED. I submit there is free trade in labor, and if these men who lay the brick and are not taxed get \$6 a day, and the very highest class in this particular branch for whose benefit we pay tribute get \$16 a week, it shows just how much real

their labor to compete with the products of men similarly en-

benefit this protection was to the spinners.

Mr. LIPPITT. It enables them to get 100 per cent— Mr. JAMES. If the Senator will permit me, the argument he now makes that we can not import brick, does not-

Mr. LIPPITT. I did not say that we can not import brick. Mr. JAMES. It does not harmonize with the argument made last week that they would import granite and run the granite

quarries of New England out of business if we reduce the tariff.

Mr. LIPPITT. The Senator certainly could not have been listening to what I said. I did not in the slightest degree say that you could not import brick. I said you could not import the products of the bricklayer. The bricklayer does not make the products of the bricklayer. The bricklayer does not make brick; he makes a house. What I was claiming was that we could not import a house, and I never yet have heard of one being imported. These are theoretical-

You can import granite such as is quarried in Mr. JAMES.

New England.

Mr. LIPPITT. Certainly. The Senator knows that a stonemason is not a quarryman.

Mr. JAMES. I know; but the Senator was making an argument that leads to the conclusion I suggest.

Mr. LIPPITT. I beg to differ from the Senator. Mr. President, I was led astray into a discussion of theoretical protection and free trade, not particularly in line with this subject. I would much rather speak to the particular subject. It is 6 o'clock.

Mr. SMITH of Georgia. Mr. President, I would like to put into the Record in this connection another extract from the report of the Tariff Board upon this subject. It reads as follows:

The trade in cotton thread is controlled largely by one company with manufacturing establishments in the United Kingdom, the United States, Canada, Russia, Austria-Hungary, Germany, France, and Spain. The local market in each country is supplied directly through the factory located within the country. The smallness of the international trade, as shown in Table 25, is probably due to the fact just stated.

Mr. SMOOT. In this connection I wish to call the Senator's attention to one other item. I am not going to offer an amendment to-night, but I ask him to take it into consideration.

No matter what the rate may be, I do not believe it is going to affect the price the ultimate consumer pays for spools of

thread. But there is another item of the present law that I do believe ought to be in this law to protect the purchaser in case of fraud, and guarantee to him that when he pays for 600 yards of cotton thread he will get it. I call the Senator's attention to this section in the present law:

That in no case shall the duty be assessed upon a less number of yards than is marked on the spools, reels, comes, tubes, skeins, or balls.

I feel quite confident that if those words are not included in the proposed law foreign manufacturers in many cases will ship spools of thread here having perhaps each 25 or 30 yards less than the number to-day upon spools of cotton. I bring this to the attention of the Senator because of the fact that before this provision was put in the law that was the case. I think if cotton thread is imported into this country the purchasers ought to have every yard they pay for the same as we are compelled to put upon a spool of cotton the number of yards in the spool

The VICE PRESIDENT. The question is on agreeing to the

amendment of the committee.

Mr. LIPPITT. I do not know whether it is in order now, but I have an amendment which I should like to propose to one of the later paragraphs of Schedule I. I should like to offer it now, so that it may lie on the table and be printed.

The VICE PRESIDENT. The amendment will be printed and

lie on the table.

Mr. GALLINGER. I would suggest to the Senator from North Carolina that we have run a little beyond the usual hour. Senators are in the habit of making engagements, with the understanding that we are to adjourn about 6 o'clock.

Mr. SIMMONS. I am willing that the bill shall be laid aside. I do not know whether an executive session is desired or not.

Mr. BACON. There is some executive business that has to be attended to. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 5 minutes spent in executive session the doors were reopened, and (at 6 o'clock and 10 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, August 20, 1913, at 11 o'clock a. m.

## CONFIRMATIONS.

Executive nominations confirmed by the Senate August 19, 1913. CONSTRUCTOR IN THE REVENUE-CUTTER SERVICE.

Frederick Allen Hunnewell to be constructor with the rank and pay of a first lieutenant.

ASSISTANT ATTORNEY GENERAL.

Preston C. West to be Assistant Attorney General, to be assigned to the Department of the Interior.

POSTMASTERS.

Norman P. Cormack, Wasco. Frederic S. Harrison, Patterson. Esther B. Hensel, Portola. David C. Hyer, Susanville. J. B. Laufman, Santa Paula. William K. McFarland, Jackson. Frederick B. Nichols, McCloud. Warren Rodgers, McKittrick.

John E. Dargan, Riceville. Owen Hourihan, Salem. C. S. Shanklin, Marion. J. G. Winter, Sioux Center.

KENTUCKY.

P. C. Mayhugh, Eddyville.

MISSOURI.

J. S. Walker, Marceline.

OHIO.

John E. Taylor, Crooksville.

PENNSYLVANIA.

Rush B. Miller, North Girard.

SOUTH DAKOTA.

John Debilzan, Andover. G. L. Kirk, Platte. T. J. Sullivan, Iroquois.

## HOUSE OF REPRESENTATIVES.

Tuesday, August 19, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

Imbue us, O God, our heavenly Father, plenteously with grace divine, that we may possess a susceptible mind, a live con-science, and an earnest desire to know and do Thy will. To this end be with our President and his advisers, that he may be able to peacefully and amicably adjust all the problems 'twixt us and other nations. And Thine be the praise, through Jesus Christ our Lord. Amen.

The Journal of the proceedings of Friday, August 15, 1913,

was read and approved.

ADJOURNMENT UNTIL FRIDAY NEXT.

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet on Friday next.

The SPEAKER. The geatleman from Alabama [Mr. Under-WOOD] asks unanimous consent that when the House adjourns to-day it adjourn until next Friday. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

COMMISSIONS IN RELATION TO INDIAN AFFAIRS.

The SPEAKER. The Chair desires to make an announcement two. The last Indian appropriation bill provided for the or two. or two. The last Indian appropriation bill provided for the appointment of two commissions. One of them is to investigate the Bureau of Indian Affairs, to be composed of three Senators and three Representatives. The Chair appoints on the part of the House the gentleman from Texas [Mr. Stephens], the gentleman from Oklahoma [Mr. CARTER], and the gentleman from South Dakota [Mr. BURKE].

The Indian appropriation bill also provided for the appointment of a commission of two Members from each House to investigate the question of tuberculosis among the Indians in connection with an inquiry into the necessity and feasibility of establishing, equipping, and maintaining a tuberculosis sani-tarium in New Mexico, and to make an inquiry into the necessity and feasibility of procuring impounded waters for the Yakima Indian Reservation. The Chair, believing that the business can be transacted more cheaply by appointing two of the same Members on that commission, appoints on the part of the House the gentleman from Texas [Mr. Stephens] and the gentleman from South Dakota [Mr. BURKE].

INTERNATIONAL CONGRESS ON BILLS OF EXCHANGE (S. DOC. NO. 162).

The SPEAKER laid before the House the following message from the President of the United States, which was read and, with the accompanying documents, referred to the Committee on Foreign Affairs and ordered to be printed:

To the Senate and the House of Representatives:

I transmit herewith a report by the Secretary of State covering the report of the American delegate to the International Congress on Bills of Exchange, which was held at The Hague in the summer of 1912 and at which the United States was represented by the authority of Congress.

WOODROW WILSON.

THE WHITE HOUSE, August 13, 1913.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as

To Mr. CAMPBELL, indefinitely, on account of the illness of his

To Mr. HAMLIN, indefinitely, on account of illness in his family; and

To Mr. Wilson of Florida, for the day, on account of illness. ORDER OF BUSINESS.

Mr. ADAMSON. Mr. Speaker, there are on the Calendar of the House, reported by the Committee on Interstate and Foreign Commerce, seven bridge bills which appear to be uncontested. I would like to ask unanimous consent for their consideration. Shall I ask for their consideration one at a time or ask unanimous consent at once that all seven be considered?

The SPEAKER. The Chair thinks that in that kind of a case a blanket unanimous consent would be proper. The gentleman from Georgia [Mr. Adamson], chairman of the Committee on Interstate and Foreign Commerce, asks unanimous consent for the present consideration of certain bridge bills. Is there objection?

Mr. FLOOD of Virginia. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman how long he thinks this will take?

Mr. ADAMSON. There is no opposition to any one of them. Mr. FLOOD of Virginia. Then it ought not to take more than a few minutes.

Mr. ADAMSON. They are uncontested bridge bills. Mr. FLOOD of Virginia. Why not have the regular order, and let us have a call of committees?

Mr. ADAMSON. I submit the request, Mr. Speaker, subject, of course, to the will of the House. It will take only a few

Mr. FLOOD of Virginia. If it will take only a few minutes, I shall not object.

The SPEAKER. Is there objection?
Mr. RAKER. Mr. Speaker, reserving the right to object, under the order made several days ago the bill H. R. 7207 had the right of way, commencing on Friday last. On that day there was no quorum present, and I understand that the taking up of these bridge bills by unanimous consent will not replace or vacate the order heretofore made relative to H. R. 7207. Is

The SPEAKER. That was a continuing order. Mr. RAKER. Very well. I have no objection.

BRIDGE BILLS.

The SPEAKER. The gentleman from Georgia [Mr. ADAMsonl is recognized.

Mr. ADAMSON. Mr. Speaker, do I understand that consent has been given for the consideration of all seven bills?

The SPEAKER. Is there objection?

Mr. MURDOCK. Mr. Speaker, I would like to know if the request of the gentleman from Georgia is that these bills are to be considered all together.

Mr. ADAMSON. Oh, no; just an order that all of them be considered.

Mr. MURDOCK. One at a time? Mr. ADAMSON. One at a time. The SPEAKER. Is there objection?

There was no objection.

BRIDGE ACROSS MONONGAHELA RIVER, FAIRMONT, W. VA.

Mr. ADAMSON. The first bill is H. R. 6582, to authorize the city of Fairmont to construct and operate a bridge across the Monongahela River at or near the city of Fairmont, in the State of West Virginia.

The SPEAKER. The Clerk will report the bill.

The bill was read as follows:

Be it enacted, etc., That the city of Fairmont, a municipal corporation under the laws of the State of West Virginia, is hereby authorized to construct, maintain, and operate a bridge and approaches thereto across the Monongahela River at or near the city of Fairmont, in Marion County, W. Va., at a point suitable to the interests of navigation, in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906: Provided, That said bridge shall be so constructed, maintained, and operated as to permit of its continuous use by the public as a highway bridge, to be used for all kinds of highway traffic and travel, as well as for the operation of street cars on and over the same.

same. SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendment:

On page 2 strike out the colon and all of the section after the word "six" in line 1.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

BRIDGE ACROSS WHITE RIVER, NEWPORT, ARK.

Mr. ADAMSON. The next bill is H. R. 5891, authorizing the construction of a bridge across the White River at Newport, Ark.

The SPEAKER. The Clerk will report the bill.

The bill was read, as follows:

The bill was read, as follows:

Be it enacted, etc., That S. Heinemann, his associates and assigns, be, and they are hereby, authorized to construct, maintain, and operate a wagon and foot bridge and approaches thereto across White River at or near Newport, Jackson County, Ark., at a point suitable to navigation interests, in the State of Arkansas, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

Sec. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendment.

With the following committee amendment:

Amend, page 1, line 5, by striking out the words "wagon and foot." The amendment was agreed to.

Also, the following committee amendment:

Amend, page 1, line 7, by striking out the word "navigation" and insert in lieu thereof the word "the."

The SPEAKER, The question is on the amendment. Mr. COOPER. Mr. Speaker, I have been unable to get a copy of the bill. Will the gentleman please explain the effect of that amendment striking out the word "navigation"?

Mr. ADAMSON. It is entirely a matter of verbiage. The language used in the bill was "navigation interests." always used is "interests of navigation."

Mr. COOPER. Suitable to the interests of navigation.

Mr. ADAMSON. Yes; the committee took the liberty to apply the proper form, "the interests of navigation," instead of "navigation interests."

Mr. MOORE. Mr. Speaker—

The SPEAKER. Does the gentleman from Georgia yield to the contleman from Paparagraphic?

the gentleman from Pennsylvania?

Mr. ADAMSON. Certainly.
Mr. MOORE. I have not been able to obtain a copy of this bill, but I presume the stream over which this bridge is to be built is a navigable stream.

Mr. ADAMSON. I think that presumption is well founded. Mr. MOORE. I observe that the right to build the bridge is awarded to a private concern or to individuals.

Mr. ADAMSON. Yes. I admit that that is subject to criticism, and I have always maintained that it ought never to be granted except to a corporation authorized by local law; but there were precedents for this, and, as we thought this enterprise was straight and bona fide, we did not make any objection.

Mr. MOORE. Suppose the bridge should fall into decay and that it should become necessary, for the purposes of navigation, to remove the obstruction created by the bridge. At whose expense would that be done?

Mr. ADAMSON. I think the general bridge act makes full

provision for taking care of that contingency.

Mr. MOORE. The expense, then, would fall upon the Government, would it not?

Mr. ADAMSON. Of course, if the private individuals were utterly insolvent, it might; but it might be the same with a rotten corporation.

Mr. MOORE. But there is nothing in this bill or in the general bridge act that makes these individuals responsible for repairs to that bridge or for the removal of obstructions to navigation if it should develop that this bridge subsequently should become an obstruction to navigation.

Mr. ADAMSON. The general bridge act contains a provision that the word "person" shall be held to mean anybody to whom the consent is granted, whether an individual, a mu-

nicipal corporation, or a private corporation.

Mr. MOORE. Will the gentleman answer this: Is there any responsibility at all upon these private parties to make good any loss that may occur to the people there by reason of the deterioration of that bridge?

Mr. ADAMSON. All the safeguards which are contained in the general bridge act, which we regard as ample, will apply

Mr. MOORE. Does that mean that any bond is to be given by the men who erect this bridge that they will make good

any expense which is incurred by the Government? Mr. ADAMSON. If the Secretary of War deems it proper to demand it, I think he can do so when he approves the specifi-

Mr. MOORE. The fact is that the award is made here to private parties to build this bridge, which may subsequently become an obstruction to navigation, and there is no remedy against the bridge becoming an obstruction to navigation or of removing it at the expense of the United States.

Mr. ADAMSON. The fact is that neither this bill nor any other bill passed by Congress awards anything to anybody. Congress merely consents that in so far as this paramount right of navigation is concerned this bridge may be erected, subject to the direction of the Secretary of War, under safe-guards provided in the general bridge act, that it never shall interfere with navigation.

Mr. MOORE. And he imposes no obligation on individuals

Mr. ADAMSON. He imposes anything he thinks proper.

Mr. MOORE. I want to ask the gentleman from Georgia if he does not think it is proper that this committee, which the Republican leader thinks the most important committee in the House, ought to take up the question of following up the men to whom these privileges are given, so that in the event subsequently that a loss occurs to the people, or there is inter-ference with navigation, some one may be held responsible? Mr. ADAMSON. The present Republican leader of the minor-

ity was at one time the chairman of that great committee, and , while he was with it he collaborated with the rest of us and we formulated a general bridge act, and if my genial friend from Pennsylvania will take the trouble to read the work of that distinguished Republican leader and the rest of us he will find

that all the questions he has asked are amply answered in that act.

Mr. MOORE. But if the distinguished leader of the Republicans erred in any way, the distinguished gentleman from Georgia, now chairman of the committee, follows valiantly in his

Mr. ADAMSON. I was there at the time to see that the distinguished gentleman, now Republican leader, did not commit any error. [Laughter.] We enacted a bridge act standardizing all acts of Congress, leaving the responsibility for the details with the Secretary of War to protect the interests of navigation.

Mr. MOORE. And the gentleman is satisfied to let the individuals have the privileges and mulct the Government with dam-

ages for removing obstructions.

Mr. ADAMSON. I do not want to embarrass the gentleman from Pennsylvania nor elicit any confession, but I want to ask him if he has ever read the general bridge act?

Yes. Mr. MOORE.

Mr. ADAMSON. Then I advise the gentleman to read it again.

Mr. MOORE. It leaves it discretionary with the Secretary of War

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. ADAMSON. Certainly.
Mr. MANN. Mr. Speaker, as long as the general bridge act has been referred to, it may be proper to say that the general bridge act provides, in a case of this sort, first, a criminal responsibility; and, second, a civil liability on the part of the persons building the bridge. I do not see how we can go further than that, to pursue a man civilly and to put him in jail. [Laughter.

Mr. MOORE. Mr. Speaker, there are some bridges in this country and some dams that are obstructions to navigation which the Government will have to remove, notwithstanding the

general bridge and dam acts.

Mr. ADAMSON. I think the gentleman ought to give notice to the Secretary of War where those bridges and dams are.

Mr. MOORE. I can do it in a number of instances

Mr. ADAMSON. But I am not responsible; go to the Secretary of War.

Mr. MOORE. But the gentleman is here to provide a remedy for this state of things.

Mr. ADAMSON. We passed this law in 1906.
Mr. MANN. Mr. Speaker, my friend from Pennsylvania will find that the bridges he refers to were not constructed under the provisions of this act.

Mr. MOORE. The obstructions still remain and the people will have to pay for their removal when it comes time to re-

move them.

Mr. COOPER. Will the gentleman from Georgia yield?
Mr. ADAMSON. I will.
Mr. COOPER. I have just procured copies of the bills.

would like to ask him about one of the bills already passed

Mr. BARTLETT. That is the bill before the House, Mr. ADAMSON. That is the one now on deck.

Mr. ADAMSON. That is the one now on deck.
Mr. COOPER. I notice that by the amendment the words
"wagon and foot" are stricken out.
Mr. ADAMSON. Yes.

Mr. COOPER. This bill proposes to confer upon private individuals-Mr. Heinemann, his associates and assigns-certain rights. As originally introduced this was to private individuals a right to erect a wagon and foot bridge, but if they can assign those rights to a railroad company and the amendment strikes out the words "wagon and foot," then the railroad company would have a right to construct a railroad bridge.

Mr. ADAMSON. I will state to the gentleman that we strike those words out because they are words defining and limiting the uses of the bridge, and the general bridge act covers all those questions. The general bridge act provides that specificathose questions. The general bridge act provides that specifications and plans and the purposes of the bridge be placed before the Secretary of War, and the Secretary of War then shall examine and approve them, and it is further provided that any railroad can use any bridge by paying for the use of it.

Mr. COOPER. It does not provide that any foot passenger can use a railroad bridge by paying for it.

Mr. ADAMSON Yes

Mr. ADAMSON. Yes. Mr. COOPER. Does the gentleman believe that the community in Arkansas are going to the expense of raising enough money to establish a railroad bridge?

Mr. ADAMSON. These people who ask for this consent will undoubtedly lay before the Secretary of War a plan of the kind of bridge they want.

Mr. COOPER. But if we pass this bill in this form we indicate to the Secretary of War that in so far as Congress is concerned we are willing they should have a railroad bridge.

Mr. ADAMSON. No, sir—.
Mr. COOPER. Certainly we certify to the Secretary of War, on the face of the bill, that it is absolutely immaterial to Con-We leave it exclusively to the Secretary of War.

Mr. ADAMSON. On the contrary, the implication of the general bridge act and every inference to be drawn therefrom by the Secretary of War is that all of these bridges are for the purposes of pedestrians and vehicles because it is expressly provided that railroads which want to use them may apply and pay

for their use. That is the idea.

Mr. COOPER. Without any desire to criticize the committee I do not like to see a bill introduced conferring upon private individuals and their assigns the right to construct only a wagon and foot bridge and then have it reported with the words "wagon and foot" stricken out. Wherever it can, Congress itself ought to indicate the character of these structures over navigable streams and not put so much responsibility upon any mere executive officer.

The gentleman from Georgia knows, as does every Member of the House, what influences are brought to bear upon executive officers to secure privileges of this sort. The Secretary of War can not make a personal examination. People who are after assignments of this kind come with powerful influence and Congress always, when it can, ought to limit the authority and discretion of executive officers in the matter of granting concessions, especially important concessions, over navigable streams, Mr. ADAMSON. The trouble, Mr. Speaker, is in the concep-

tion of what we are doing. The language of which the gentleman from Wisconsin complains is that the grantee may sell to somebody else without depriving the project of the consent of Congress. We can not hamper or limit the power and right of

people to sell property.

Mr. COOPER. Why did not the gentleman leave those words "wagon and foot" in the bill and let them assign to the rail-

road company if they wish to do so?

Mr. ADAMSON. Because we have standardized these bridge acts in the general bridge act, in which we have expressed all the things that the gentleman from Wisconsin or anybody else could demand or desire, and under that general bridge act these people present specifications to the Secretary of War; and the general bridge act itself contemplates a popular bridge for pedestrians and vehicles, and the express provision follows saying that railroads can get on it by paying for it. That is the custom, that is the plan, that is the idea, and there is no trouble about it. The only objection I have to this bill is one which I have urged often and been overruled, that the grant should be to corporations only and not to individuals, so as to secure perpetuity and assurances that the State authorities have provided for it and permit it.

The SPEAKER. The question is on agreeing to the amend-

ment.

The question was taken, and the amendment was agreed to. * The Clerk reported the next amendment, as follows:

On page 1, line 7, strike out the word "navigation" and insert in lieu thereof the word "the," and after the word "interest" insert the words "of navigation."

The question was taken, and the amendment was agreed to. The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

BRIDGE ACROSS SABINE RIVER, ORANGE, TEX.

The SPEAKER. The Clerk will report the next bill. The Clerk read as follows:

The Clerk read as follows:

A bill (H. R. 3406) to authorize the construction of a bridge across the Sabine River at Orange, Tex.

Be it enacted, etc., That the Orange Commercial Club, its successors and assigns, be, and they hereby are, authorized to construct, maintain, and operate a bridge and approaches thereto across the Sabine River at a point suitable to the interests of navigation at the city of Orange, Tex., in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the engrossment and

third reading of the bill. The bill was ordered to be engrossed and read a third time, was read a third time, and passed.

BRIDGE ACROSS RED LAKE RIVER, MINN.

Mr. ADAMSON. Mr. Speaker, I next call up the bill (H. R. 1681) to extend the time for constructing a bridge across the Red Lake River in township 153 north, range 40 west, in Red Lake County, Minn.

The SPEAKER. The Clerk will report the bill. The Clerk read as follows:

The Clerk read as follows:

A bill (H. R. 1681) to extend the time for constructing a bridge across the Red Lake River in township 153 north, range 40 west, in Red Lake County, Minn.

Be the enacted, etc., That the time for commencing and completing the construction of the bridge authorized by the act of Congress approved February 27, 1911, to be built across the Red Lake River, at or near the section line between sections 28 and 29, township 153 north, range 40 west, in the county of Red Lake, in the State of Minnesota, is hereby extended to one year and three years, respectively, from date of approval hereof.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read a third time, and passed.

#### BRIDGE ACROSS TUG FORK, W. VA.

Mr. ADAMSON. The next bill I wish to call up is bill H. R. 6378, a bill to authorize Robert W. Buskirk, of Matewan, W. Va., to bridge the Tug Fork of the Big Sandy River at Matewan, Mingo County, W. Va., where the same forms the boundary line between the States of West Virginia and Kentucky.

The SPEAKER. The Clerk will report the bill.

The Clerk proceeded to read the bill as follows:

A bill (H. R. 6378) to authorize Robert W. Buskirk, of Matewan, W. Va., to bridge the Tug Fork of the Big Sandy River at Matewan, Mingo County, W. Va., where the same forms the boundary line between the States of West Virginia and Kentucky.

to bridge the Tug Fork of the Big Sandy River at Matewan, Mingo County, W. Va., where the same forms the boundary line between the States of West Virginia and Kentucky.

Be it enacted, etc., That it shall be lawful for Robert W. Buskirk to construct and maintain a footbridge and approaches thereto across the Tug Fork of the Big Sandy River at Matewan, Mingo County, W. Va., where the same forms the boundary line between the States of West Virginia and Kentucky, as he may deem suitable for his purposes, subject to the approval of the Secretary of War.

SEC. 2. That any bridge authorized to be constructed under this act shall be a lawful structure, and shall be recognized and known as a post route, and shall enjoy all the rights and privileges of other post roads in the United States, upon which also no higher charge shall be made for the transmission over the same of the mails, or for through passengers, or freight passing over said bridge and approaches than the rate per mile paid for transportation over the railroads leading to said bridge; and the United States shall have the right of way for postal, telegraph, and telephone purposes, without charge therefor, across said bridge and approaches thereto. Said bridge shall be built and located under and subject to such regulations for the security of navigation as the Secretary of War shall prescribe; and to secure that object the said Robert W. Buskirk shall submit to the Secretary of War, for his examination and approval, a design and drawing of the bridge, and a map of the location thereof, giving for the space of 1 mile above and 1 mile below the proposed location, the high and low water lines upon the banks of the river, the direction and strength of the current at all stages of the water, with the soundings, accurately showing the bed of the stream, and the location of any other bridge or bridges, such map to be sufficiently in detail to enable the Secretary of War to judge of the proper location of said bridge, and shall furnish such other information as ma

Nouses, SEC. 4. That this act shall be null and void if actual construction of the bridge herein authorized be not completed within three years from the date hereof.

SEC. 5. That the right to alter, amend, or repeal this act is hereby expressly reserved.

During the reading, Mr. ADAMSON. Mr. Speaker, two or three sections in the bill down to the end of section 3 and one or two lines in section 4 are stricken out, because the matter is incorporated in the general bridge act and is already the law. I ask unanimous consent that the matter so stricken out be not read.

The SPEAKER. The gentleman from Georgia [Mr. ADAMson] asks unanimous consent that the matter stricken from the bill be not read. Is there objection? [After a pause.] The Chair hears none.

The Clerk concluded the reading of the bill.

The SPEAKER. The Clerk will report the first amendment. The Clerk read as follows:

Amend, page 1, line 4, by striking out the first word "and."

The SPEAKER. The question is on agreeing to the amend-

The amendment was agreed to.

The Clerk read the next amendment, as follows:

Amend the same line by inserting after the word "maintain" the words "and operate."

The amendment was agreed to.

The Clerk reported the next amendment, as follows:

Amend, line 4, by striking out the word "footbridge" and inserting in lieu thereof the word "bridge"

The amendment was agreed to.

The Clerk reported the next amendment, as follows:

Amend, page 1, by striking out all of line 8 after the word "Kentucky" and all of line 9.

Mr. MANN. Mr. Speaker, I did not hear just how the amendment was reported. Is that the amendment on page 3,

The SPEAKER. The Clerk will report the amendment again. The Clerk read as follows:

Amend, page 1, by striking out all of line 8 after the word "Kentucky" and all of line 9.

Mr. MANN. Well, Mr. Speaker, that amendment should be although the Clerk very naturally reports it from the way the bill is printed—to strike out those two lines and insert the language on page 3, lines 18 to 22, in italics, because that becomes a part of section 1.

Mr. ADAMSON. That is the purpose of it. It is to be stricken out and reinserted at the end of the bill.

It should be at the end of the section.

The SPEAKER. The Clerk will read the amendment.

The Clerk read as follows:

Amend, page 1, by striking out after the word "Kentucky" all of lines 8 and 9 and insert in lieu therof the following: "At a point suitable to the interests of navigation, in accordance with the provisions of an act entitled 'An act to regulate the construction of bridges over navigable waters,' approved March 23, 1906."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

Mr. ADAMSON. Mr. Speaker, by changing 'he number of the section that would make it "section 2" instead of "section 5." Mr. MANN. Sections 3 and 4 have not been stricken out yet.

Mr. ADAMSON. Mr. Speaker, I move to amend by striking out sections 3 and 4.

The SPEAKER. The gentleman from Georgia [Mr. ADAMson] moves to amend by striking out sections 3 and 4. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ADAMSON. Mr. Speaker, I move to amend by substituting for the figure "5" the figure "2."

The SPEAKER. The question is on agreeing to the amendment of the gentleman from Georgia, that the figure "2" be substituted for figure "5."

The amendment was agreed to.
The SPEAKER. The question is on the engrossment and third reading of the amended bill.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

BRIDGE ACROSS OKANOGAN RIVER, WASH.

The SPEAKER. The Clerk will report the next bill.

The Clerk read as follows:

An act (S. 1853) to authorize the board of county commissioners of Okanogan County, Wash., to construct and maintain a bridge across the Okanogan River at or near the town of Malott.

the Okanogan River at or near the town of Malott.

Be it enacted, etc., That the board of county commissioners of Okanogan County, Wash., its successors and assigns, be, and is hereby, authorized to construct, maintain, and operate a bridge, with approaches thereto, across the Okanogan River, at a point suitable to the interests of navigation, at or near the town of Malott to a point opposite on the Colville Indian Reservation. Said bridge shall be constructed in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

Sec. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

Mr. MANN. Mr. Speaker, I do not desire to be too technical, yet I think it would be well to follow the approved form. Will not the gentleman from Georgia [Mr. ADAMSON] propose an amendment striking out the period in line 9 and inserting a comma, and striking out the words, "Said bridge shall be con-

structed "? Mr. ADAMSON. I confess, Mr. Speaker, that the committee was fully as critical as the gentleman from Illinois [Mr. MANN], but we thought that inasmuch as the other body of this Congress had passed the bill in this way and it came so near to being right, we would not cast a criticism on the work of the other body and cause the bill to require further action there by making these slight corrections.

Another error that the gentleman from Illinois [Mr. Mann] might have mentioned is that they omit the word "operate" in the title. In our committee we discussed the propriety of amending the title so as to put in the word "operate" and transpose the word "and," and also to remove the period in line 9 and

strike out the words "Said bridge shall be constructed," so that it would be in accordance with the approved form.

Mr. MANN. Let us make it according to the form.

Mr. ADAMSON. The committee decided that it would not give cause of offense to the dignity of the other body on account of such slight errors, but for my part I am willing to amend the language and think it ought to be done, just as the gentleman from Illinois suggests.

The SPEAKER. Does the gentleman from Illinois [Mr.

MANN] offer an amendment?

Mr. MANN. No.

Mr. ADAMSON. I will ask unanimous consent, Mr. Speaker, that these changes be made.

The SPEAKER. Without objection, the Clerk will report the amendment.

Mr. ADAMSON. Instead of breaking the sentence into two parts, remove the period in line 9 and strike out the words, "Said bridge shall be constructed."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page I, line 9, after the word "Reservation," by striking out the period and inserting a comma, and striking out the words "Said bridge shall be constructed," so that the line will read "the town of Maiott to a point opposite on the Colville Indian Reservation, in accordance with the provisions of the act," etc.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ADAMSON. When the bill is passed, Mr. Speaker, I shall move to correct the title and make it perfect.

The question is on the third reading of the The SPEAKER. amended Senate bill.

The Senate bill as amended was ordered to be read a third

time, was read the third time, and passed.

The title was amended so as to read: "An act to authorize the board of county commissioners of Okanogan County, Wash. to construct, maintain, and operate a bridge across the Okanogan River at or near the town of Malott."

BRIDGE ACROSS THE MISSISSIPPI RIVER, MINN.

Mr. ADAMSON. Mr. Speaker, there is one more bill. The SPEAKER. The Clerk will report it.

The Clerk read as follows:

A bill (H. R. 1985) to authorize the county of Aitkin, Minn., to construct a bridge across the Mississippi River in Aitkin County, Minn.

Minn.

Be it enacted, etc., That the county of Aitkin, a municipal corporation organized and existing under the laws of the State of Minnesota, is hereby authorized to construct, maintain, and operate a bridge and approaches thereto across the Mississippi River at a point suitable to the interests of navigation, at or near one of the points where the said Mississippi River is crossed by the section line between sections 23 and 26 in township 49 north, range 25 west, of the fourth principal meridian, in the county of Aitkin, in the State of Minnesota, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906,

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engressed and read a third time.

The bill was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. Adamson, a motion to reconsider the several votes by which the various bills were passed was laid on the table.

## LEAVE TO ADDRESS THE HOUSE.

Mr. CLARK of Florida. Mr. Speaker, some weeks ago I in-troduced a resolution (H. Con. Res. 14) reaffirming the Monroe doctrine. I desire now to ask unanimous consent that I may address the House upon that resolution for 45 minutes on next Friday after the approval of the Journal.

The SPEAKER. The gentleman from Florida [Mr. Clark]

asks unanimous consent that on next Friday, after the approval of the Journal and the transaction of routine business, he be permitted to address the House for 45 minutes on his resolution touching the Monroe doctrine. Is there objection?

Mr. FOSTER. Mr. Speaker, reserving the right to object, is this to be an order regardless of the state of public business in the House at that time?

The SPEAKER. The Chair stated the request of the gentleman from Florida as he made it.

Mr. FOSTER. Then I object, Mr. Speaker.
Mr. CLARK of Florida. I will state to the gentleman that
if there are any committee reports or if there is anything of that kind, I shall surely not insist upon displacing important public business

Mr. FOSTER. Mr. Speaker, it occurs to me that at this particular time it is probably not best that we should take up a discussion of this question in the House for reasons that are

ought to forego his desire of making a speech here on this subject at this particular time.

The SPEAKER. Is there objection?

Mr. FOSTER. I object, Mr. Speaker. The SPEAKER. The gentleman from Illinois objects.

ORDER OF BUSINESS.

Mr. FLOOD of Virginia. Mr. Speaker, I demand the regular order.

The SPEAKER. The regular order is the Hetch Hetchy bill. Mr. MANN. Mr. Speaker, when the House adjourned on account of the death of Senator Johnston there was a special order granting permission to the gentleman from Oklahoma [Mr. Morgan] to address the House for 30 minutes. I ask unanimous consent that the gentleman be permitted to address the House now for 30 minutes.

The SPEAKER. The gentleman from Illinois [Mr. MANN] asks unanimous consent that the gentleman from Oklahoma [Mr. Morgan] be permitted to address the House for 30 minutes at

Is there objection?

Mr. FLOOD of Virginia. Mr. Speaker, reserving the right to object, I will say to the gentleman that there are one or two bills on the calendar, reported from the Committee on Foreign Affairs, that we are exceedingly anxious to have considered, and I do not think they will take more than a few minutes. After that I shall have no objection whatever to the request of the gentleman, but to delay these bills for half an hour may run us up to the time of adjournment.

Mr. MANN. I hope the gentleman will not call up any bill to-day which will involve a discussion of the situation in Mex-

ico, because I think that would be a bad policy.

Mr. FLOOD of Virginia. I certainly have no bills in ref-

erence to Mexico.

Mr. MANN. I take it that any bill affecting our foreign relations is almost sure just at this time to lead to a discussion of the Mexican situation; and, in my judgment, the best thing that Congress can do on this subject is to be patient, keep still,

and keep cool. [Applause.]
Mr. FLOOD of Virginia. Mr. Speaker, I can not conceive how either one of the bills on the calendar, reported from the Committee on Foreign Affairs, can lead to a discussion of the

Mexican question.

Mr. MANN. The gentleman knows that these bills will be considered in the Committee of the Whole House on the state of the Union, where any subject is in order to be discussed. One gentleman has already indicated a desire this morning to discuss a subject which would inevitably lead to a discussion of the Mexican situation, even if it were not involved in his own speech. It seems to me it is wise, just at present, to avoid any discussion in Congress, and certainly in the House, in reference

to that situation. I think we ought to be willing at present to keep still and keep cool.

Mr. FLOOD of Virginia. Mr. Speaker, there is certainly no disposition on this part of the House to precipitate a discussion of the Mexican question here, and certainly the Foreign Affairs Committee has shown its disposition to keep quiet and keep cool, and it and every member of that committee has done so. [Applause.] But this is a matter that has no earthly relation to the Mexican situation. I was going to call up first a bill creating a legation in the Republic of Paraguay.

Mr. MANN. A South American Republic?
Mr. FLOOD of Virginia. A South American Republic. We have no American representative there at present.

Mr. MANN. It involves the whole Monroe doctrine.

Mr. FLOOD of Virginia. I should not think it would involve any discussion of the Monroe doctrine, or any discussion of anything beyond the very merits of the question whether or not it is wise for us to accredit a diplomatic representative to this South American Republic.

Mr. FOSTER. Will the gentleman permit me for just a mo-

ment? I think under the circumstances, in view of the conditions that exist at this particular time, my colleague from Illi-

nois [Mr. MANN] is correct.

It is not a pleasant thing for me to object to any Member making a speech on the floor of the House. I objected to the gentleman from Florida [Mr. Clark] speaking on next Friday, and while I bear only the kindlest feelings toward him I believe it proper and right that these matters should go over for the present. I hope the gentleman from Virginia, the chairman of the Committee on Foreign Affairs, will see fit to permit this matter to rest for a little while, because I do not believe there is any great necessity for the passage of this bill for at least 30 days longer. I think under the circumstances that ought to be probably apparent to every Member, and I think the gentleman done. The chairman of the Committee on Foreign Affairs well knows that if this discussion comes up in the Committee of the Whole any Member has a right under the rules to discuss not only affairs pertaining to the South American Republics, but all sorts of subjects that they may feel that they want to discuss at this particular time. I think the matter ought to go over as suggested by the gentleman from Illinois.

The SPEAKER. The question pending is the request of the

gentleman from Illinois that the gentleman from Oklahoma be

allowed to address the House.

Mr. FLOOD of Virginia. Mr. Speaker, I reserved the right to object, because I wanted to bring this bill before the House. I realize, however, that under the freedom of debate in the Committee of the Whole House on the state of the Union some Members who are not willing to sit quietly and keep cool, notwithstanding the strained relations that exist between this country and Mexico, might precipitate this question in debate, and therefore I will withdraw the objection I had to the gentleman from Oklahoma proceeding with his speech.

The SPEAKER. Is there objection?
Mr. CLARK of Florida. Reserving the right to object, I would like to know on what subject the gentleman from Oklahoma is going to address the House.

Mr. MORGAN of Oklahoma. On the subject of the tariff bill

now before Congress.

Mr. CLARK of Florida. Then I object.

Mr. SMITH of Minnesota. Mr. Speaker, I ask unanimous consent to introduce in the RECORD an analysis of the Glass currency bill, written by William T. Coe, of Minneapolis, Minn., who has been a member of the State legislature and is a prominent lawyer in our city.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to extend his remarks in the Record by inserting

the document he speaks of.

Mr. BORLAND. Mr. Speaker, I dislike to object, but I am

going to do it.

Mr. SMITH of Minnesota. It will make about three pages of the Congressional Record.

The SPEAKER. Is there objection?

Mr. BORLAND. I object. Mr. BRITTEN. Mr. Speaker, I ask unanimous consent to extend some remarks in the RECORD applying to a resolution introduced by me last Friday, which was referred to the Committee on Naval Affairs.

The SPEAKER. The gentleman from Illinois asks unanimous

consent to extend his remarks in the RECORD.

Mr. BORLAND. Mr. Speaker, reserving the right to object, I would like to ask the gentleman if these are his own views or the views of some one else?

Mr. BRITTEN. I will say that they are my own views. Mr. BORLAND. Then I have no objection.

Mr. MURDOCK. Reserving the right to object, Mr. Speaker,

I would like to ask the gentleman on what subject?

Mr. BRITTEN. My statement will apply directly to a resolution introduced by me last Friday, with a view to making an appropriation for three battleships.

Mr. SAUNDERS. Mr. Speaker, I object.
The SPEAKER. The gentleman from Virginia objects.
Mr. BRITTEN. Will the gentleman withhold his objection

for a moment? [Cries for the regular order.]

The SPEAKER. The regular order is the Hetch Hetchy bill. Mr. MANN. Mr. Speaker, the regular order is to make a point of no quorum, which I do.

## ADJOURNMENT.

Mr. FOSTER. Mr. Speaker, I move that the House do now

The question was taken, and the motion was agreed to: accordingly (at 12 o'clock and 58 minutes p. m.) the House, under the order previously agreed to, adjourned until Friday, August 22, 1913, at 12 o'clock noon,

## EXECUTIVE COMMUNICATION.

Under clause 2 of Rule XXIV, a letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of preliminary examination and survey of Brazos Santiago Harbor, Tex. (H. Doc. No. 200), was taken from the Speaker's table, referred to the Committee on Rivers and Harbors, and ordered to be printed with illustration.

#### REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, Mr. SHARP, from the Committee on Foreign Affairs, to which was referred the bill (H. R. 6382) to provide for representation |

of the United States in the Fourteenth International Congress on Alcoholism, and for other purposes, reported the same with amendment, accompanied by a report (No. 53), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

#### CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 2327) granting a pension to Edward Coffee; Committee on Pensions discharged, and referred to the Commit-

tee on Invalid Pensions.

A bill (H. R. 3788) granting an increase of pension to Olaf Volkerts; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

# PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. NORTON: A bill (H. R. 7494) granting 200,000 acres of land to the State of North Dakota for the use of a State normal school to be located in said State west of the Missouri River and for the use of the State normal school located at Minot, N. Dak.; to the Committee on the Public Lands.

By Mr. GARRETT of Texas: A bill (H. R. 7495) for the erection of a public building at Huntsville, Tex.; to the Committee

on Public Buildings and Grounds.

By Mr. WILSON of Florida: A bill (H. R. 7496) to designate Port St. Joe, Fla., as a port of entry; to the Committee on Ways

and Means.

By Mr. HARRISON of New York: A bill (H. R. 7497) to promote the efficiency of the customs service and establish the customs guards; to the Committee on Ways and Means.

By Mr. RAKER: A bill (H. R. 7498) for the erection of a building at the city of Alturas, State of California, to be used for quarters for day-school teachers under the Indian service, and for other purposes; to the Committee on Indian Affairs.

Also, a bill (H. R. 7499) for the support and education of

the Indian pupils at the Fort Bidwell Indian School, Fort Bidwell, Cal., and for repairs and improvements, and for other purposes; to the Committee on Indian Affairs,

Also, a bill (H. R. 7500) for the erection of a building at the town of Lookout, State of California, to be used for quarters for day-school teachers under the Indian service, and for other

purposes; to the Committee on Indian Affairs.

By Mr. BROUSSARD: A bill (H. R. 7501) to establish an agricultural, plant, shrub, fruit, and ornamental tree, berry, and vegetable experimental station at or near the city of New Iberia, Iberia Parish, in the State of Louisiana; to the Committee on Agriculture.

By Mr. ADAMSON: A bill (H. R. 7502) to provide for the erection of a public building in the city of Talbotton, Ga.; to

the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 7503) to provide for the erection of a public building in the city of Buena Vista, Ga.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 7504) to provide for the erection of a public building in the city of Greenville, Ga.; to the Committee on Pub-

lie Buildings and Grounds.

By Mr. BROWN of New York: A bill (H. R. 7505) appropriating money for the improvement of Sterling Basin, Greenport Harbor, N. Y.; to the Committee on Rivers and Harbors.

By Mr. MONDELL: A bill (H. R. 7506) for the repeal of the provisions of the agricultural appropriation act for the fiscal year 1914, providing for the custody and protection of migratory game and insectivorous birds by the Government of the United States; to the Committee on Agriculture.

By Mr. EAGLE: A bill (H. R. 7507) to provide for \$500,000,000 of United States notes and for the deposit of same by the United States with the National Banking Associations of the United States under certain conditions; to the Committee on Banking and Currency.

By Mr. MOORE: A bill (H. R. 7508) appropriating the sum of \$6,000 a year for the support and maintenance of the Permanent International Commission of the Congresses of Navigation,

and for other purposes; to the Committee on Foreign Affairs. By Mr. SMITH of Maryland: A bill (H. R. 7509) to authorize the Secretary of Agriculture to engage in the making of de-natured alcohol on the Arlington Experimental Farm or at such other place as may be determined; to the Committee on Agriculture.

By Mr. KENNEDY of Iowa: A bill (H. R. 7510) granting to the Inter-City Bridge Co., its successors and assigns, the right to construct, maintain, and operate a bridge across the Mississippi River; to the Committee on Interstate and Foreign Com-

By Mr. THOMSON of Illinois: A bill (H. R. 7511) to provide for the construction of the Patent Office of the United States, including a hall of inventions, and for other purposes; to the Committee on Public Buildings and Grounds.

By Mr. PETERS: A bill (H. R. 7512) relative to legislative

counsel and agents; to the Committee on the Judiciary.

By Mr. KIRKPATRICK: A bill (H. R. 7513) to provide for the remodeling or improvement of the post-office building at Ottumwa, Iowa; to the Committee on Public Buildings and

By Mr. HOWARD: A bill (H. R. 7514) to provide for a site and public building at Decatur, Ga.; to the Committee on Public Buildings and Grounds.

By Mr. FAISON: A bill (H. R. 7515) for the purchase of a suitable site and the erection of a Federal building for the United States post office at Morehead City, N. C.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 7517) providing for the survey of a proposed canal from the navigable waters of Goose Creek to the navigable waters of Jones Bay in Pamlico County, N. C.; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 7518) to appropriate the sum of \$5,000 for equipping and maintaining a Weather Bureau observatory at Newbern, N. C.; to the Committee on Agriculture.

Also, a bill (H. R. 7519) appropriating the sum of \$20,000

for repairs and improvement of the roadway to the national cemetery at Newbern, N. C.; to the Committee on Military Affairs.

Also, a bill (H. R. 7520) for the survey of Neuse River, N. C.;

to the Committee on Rivers and Harbors.

Also, a bill (H. R. 7521) to provide for terms of the United States district court at Goldsboro, N. C.; to the Committee on the Indiciary

Also, a bill (H. R. 7522) for the erection of a monument to Gen. James Moore upon Moores Creek battle ground, N. C.; to

the Committee on the Library

By Mr. ESCH: A bill (H. R. 7523) to authorize the Secretary of War to furnish one condemned cannon to T. J. Hungerford Post, No. 39, Grand Army of the Republic, Department of Wis-consin, at Spring Green, Wis.; to the Committee on Military Affairs

By Mr. KINDEL: Resolution (H. Res. 228) to investigate the alleged dissolution of the Union Pacific-Southern Pacific Railroad merger, and other matters; to the Committee on Rules.

By Mr. MONDELL: Resolution (H. Res. 229) directing the Postmaster General to inform the House what steps have been taken toward readjustment of compensation of star-route and screen-wagon contractors on account of the establishment of the parcel post, etc.; to the Committee on the Post Office and Post Roads.

By Mr. TOWNER: Concurrent resolution (H. Con. Res. 15) proposing mediation under the provisions of The Hague convention between the contending forces in the Republic of Mexico, on the part of the Governments of the Republics of Brazil, Argentina, and the United States; to the Committee on Foreign

By Mr. STEPHENS of Texas: Joint resolution (H. J. Res. 120) providing for the appointment of a joint committee from the Senate and House of Representatives to consider the questions of banking and currency; to the Committee on Rules.

### PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 7524) granting a pension to Lovina Hissong; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7525) granting a pension to Francena Brokaw; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7526) granting an increase of pension to John T. Collins; to the Committee on Invalid Pensions.

John T. Collins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7527) granting an increase of pension to George Brenizer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7528) granting an increase of pension to George Van Atta; to the Committee on Pensions.

By Mr. BROWNING (by request): A bill (H. R. 7529) authorizing the appointment of Joseph Westesson, a professor of mathematics, with the rank of lieutenant, United States Navy, on the retired list; to the Committee on Naval Affairs.

By Mr. FAISON: A bill (H. R. 7530) granting an increase of

pension to Joseph A. Scott; to the Committee on Invalid Pen-

Also, a bill (H. R. 7531) granting a pension to Elza Lawrence; to the Committee on Pensions.

Also, a bill (H. R. 7532) granting a pension to Zebulon A.

Pyatt; to the Committee on Pensions. Also, a bill (H. R. 7533) for the relief of Salem Methodist

Episcopal Church South, Wayne County, N. C.; to the Committee on War Claims.

Also, a bill (H. R. 7534) for the relief of the trustees of Presbyterian Church, Newbern, N. C.; to the Committee on War Claims.

Also, a bill (H. R. 7535) for the relief of R. W. Williamson, administrator de bonis non of the estate of William Ward, de-

ceased; to the Committee on War Claims.

Also, a bill (H. R. 7536) for the relief of the trustees of Salem Church, Wayne County, N. C.; to the Committee on War Claims.

Also, a bill (H. R. 7537) for the relief of the heirs of Nancy Barfield, deceased; to the Committee on War Claims.

Also, a bill (H. R. 7538) for the relief of the heirs of Mary

Everitt, deceased; to the Committee on War Claims.

Also, a bill (H. R. 7539) for the relief of the estate of Benjamin C. Smith, deceased, W. W. Smith, administrator; to the Committee on War Claims.

Also, a bill (H. R. 7540) for the relief of the estate of Seth Waters; to the Committee on War Claims.

Also, a bill (H. R. 7541) for the relief of Samuel J. White; to the Committee on War Claims.

Also, a bill (H. R. 7542) for the relief of W. T. Hawkins; to

the Committee on War Claims.

Also, a bill (H. R. 7543) for the relief of Frederick Pate; to the Committee on War Claims.

Also, a bill (H. R. 7544) for the relief of Faris Nassef, a naturalized citizen of the United States; to the Committee on

Immigration and Naturalization.

Also, a bill (H. R. 7545) for the relief of the heirs of John B.

Wolf; to the Committee on War Claims.

Also, a bill (H. R. 7546) for the relief of Zadock Paris; to

the Committee on War Claims. Also, a bill (H. R. 7547) for the relief of Maj. Paul C. Hutton,

United States Army; to the Committee on Claims.

Also, a bill (H. R. 7548) to correct the military record of

James B. Waters: to the Committee on Military Affairs

Also, a bill (H. R. 7549) to carry into effect the findings of the Court of Claims in the matter of the claim of the estate of George W. Perry, deceased; to the Committee on War Claims.

Also, a bill (H. R. 7550) to carry into effect the findings of the Court of Claims in case of Methodist Episcopal Church South, of Beaufort, N. C.; to the Committee on War Claims.

Also, a bill (H. R. 7551) to carry into effect the findings of the Court of Claims in the matter of the claim of the Methodist Episcopal Church South, of Morehead City, N. C.; to the Committee on War Claims.

Also, a bill (H. R. 7552) to carry into effect the findings of the Court of Claims in the matter of the claim of the Hood Swamp Baptist Church, of Wayne County, N. C.; to the Committee on War Claims.

By Mr. FOWLER: A bill (H. R. 7553) for the relief of the

estate of Moses M. Bane; to the Committee on Claims. By Mr. GOOD: A bill (H. R. 7554) granting a pension to

Mary E. Brady; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7555) granting an increase of pension to

Ford Cusey; to the Committee on Invalid Pensions. By Mr. GRIFFIN: A bill (H. R. 7556) granting a pension to

George F. Flinn; to the Committee on Pensions.

Also, a bill (H. R. 7557) for the relief of Charles L.

Schroeder; to the Committee on Claims.

By Mr. JACOWAY: A bill (H. R. 7558) for the relief of George W. Beavers; to the Committee on Military Affairs.

By Mr. KELLY of Pennsylvania: A bill (H. R. 7559) granting an increase of pension to Gustav Shultz; to the Committee on Pensions.

By Mr. KIRKPATRICK: A bill (H. R. 7560) granting an increase of pension to Mary J. Cole; to the Committee on Invalid Pensions.

By Mr. McKENZIE: A bill (H. R. 7561) granting an increase of pension to Eliza Cooper; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7562) granting an increase of pension to William Wippow; to the Committee on Invalid Pensions.

By Mr. MONDELL: A bill (H. R. 7563) granting an increase of pension to Rachel L. Foster; to the Committee on Invalid Pensions.

By Mr. PEPPER: A bill (H. R. 7564) granting an increase of pension to George D. Washburn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7565) granting an increase of pension to Ben van Steinburg; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7566) granting an increase of pension to

Oliver M. Evans; to the Committee on Invalid Pensions.
Also, a bill (H. R. 7567) granting an increase of pension to

John M. Duncan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7568) granting an increase of pension to

William Ellis: to the Committee on Invalid Pensions

Also, a bill (H. R. 7569) granting an increase of pension to Cornelia S. Greenwood; to the Committee on Pensions

Also, a bill (H. R. 7570) granting an increase of pension to Mary Anna Yohum; to the Committee on Pensions.

Also, a bill (H. R. 7571) granting an increase of pension to

Lee Henning; to the Committee on Pensions.

Also, a bill (H. R. 7572) granting a pension to Virginia Dick-

inson; to the Committee on Pensions. Also, a bill (H. R. 7573) granting a pension to Emma E.

Stacey; to the Committee on Pensions.

Also, a lill (H. R. 7574) granting a pension to Bert E. Lock-

wood; to the Committee on Pensions.

Also, a bill (H. R. 7575) granting a pension to Annie Twiggs;

to the Committee on Pensions. Also, a bill (H. R. 7576) granting a pension to Addie M. Mun-

roe; to the Committee on Pensions. Also, a bill (H. R. 7577) granting a pension to Belle S. Gould;

to the Committee on Pensions.

Also, a bill (H. R. 7578) granting a pension to Carrie Record;

to the Committee on Pensions.

Also, a bill (H. R. 7579) granting a pension to Lucy Coleman; to the Committee on Pensions.

By Mr. ROUSE: A bill (H. R. 7580) granting an increase of

pension to Martha York; to the Committee on Invalid Pensions. By Mr. RUSSELL: A bill (H. R. 7581) granting an increase

of pension to Benjamin L. Sheppard; to the Committee on Invalid Pensions Also, a bill (H. R. 7582) granting an increase of pension to

Benton Braden; to the Committee on Invalid Pensions By Mr. STEPHENS of Texas: A bill (H. R. 7583) granting a pension to Tela K. Jones; to the Committee on Pensions.

By Mr. WILSON of Florida: A bill (H. R. 7584) to relinquish and quitclaim to L. J. Anderson, of Pensacola, Fla., his heirs and assigns, and Eva M. Anderson, of Pensacola, Fla., her heirs and assigns, respectively, all right, title, interest, and claim of the United States in, to, and on certain properties in the city of Pensacola, Escambia County, Fla.; to the Committee on the Public Lands.

By Mr. WINSLOW: A bill (H. R. 7585) for the relief of George E. Mansfield; to the Committee on Military Affairs.

Also, a bill (H. R. 7586) granting a pension to James A. Gaffney: to the Committee on Pensions.

Also, a bill (H. R. 7587) granting a pension to Julia Ward; to the Committee on Pensions,

Also, a bill (H. R. 7588) granting a pension to Joshua H. Brackett; to the Committee on Pensions.

Also, a bill (H. R. 7589) granting a pension to Clarence E. Cook: to the Committee on Pensions

Also, a bill (H. R. 7590) granting a pension to Kate B. Wheeler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7591) granting an increase of pension to Charles A. Barlow; to the Committee on Invalid Pensions,

# PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ESCH: Petition of the Brotherhood of Locomotive Firemen and Enginemen, of Peoria, Ill., favoring improvement in living conditions of our seamen; to the Committee on the Merchant Marine and Fisheries.

Also, petition of the Society of Automobile Engineers, protesting against the passage of the Oldfield bill; to the Committee on Patents.

Also, petition of the North Carolina Pine Association, protesting against the passage of House bill 5773; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Brotherhood of Locomotive Firemen and Enginemen, of Peoria, Ill., favoring restriction of immigration;

to the Committee on Immigration and Naturalization.

By Mr. JOHNSON of Washington: Petition of the Anacortes Chamber of Commerce and Manufactures of Anacortes, Wash., favoring the passage of legislation making an appropriation for the improvement of the Edison Slough; to the Committee on Rivers and Harbors.

Also, petition of the city council of Vancouver, Wash., asking permission to build an electric railway through Vancouver Barracks without requiring the paving of the roadway; to the Committee on Military Affairs.

Also, petition of the South Bend Commercial Club of Wash-

ington, favoring the fortification of Willapa Harbor; to the Committee on Naval Affairs

By Mr. KALANIANAOLE: Petition of the Japanese residents of Hawaii, protesting against the removal of the duty on sugar; to the Committee on Ways and Means.

By Mr. LOBECK: Petition of the Friends of Bird Protection, of Omaha, Nebr., protesting against the Senate amendment for plumage proviso and favoring House proviso; to the Committee

By Mr. LONERGAN: Petition of the Association of German Authors in America, of No. 1 Broadway, New York, protesting against the 15 per cent import duty on books published in foreign languages; to the Committee on Ways and Means.

By Mr. UNDERHILL: Petition of the Order of Railway Conductors of America, Cedar Rapids, Iowa, protesting against the passage of the workmen's compensation law; to the Committee on the Judiciary.

Also, petition of the Brotherhood of Locomotive Firemen and Enginemen, of Peoria, Ill., relative to legislation to extend the authority of the locomotive boiler inspection division of the Interstate Commerce Commission; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Inventors' Guild, protesting against the passage of the Oldfield bill; to the Committee on Patents.

Also, petition of the Brotherhood of Locomotive Firemen and Enginemen, of Peoria, Ill., favoring restriction of immigration; to the Committee on Immigration and Naturalization.

Also, petition of the Brotherhood of Locomotive Firemen and Enginemen, Peoria, Ill., favoring the passage of legis-lation requiring headlights of a certain candlepower on all locomotives; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Brotherhood of Locomotive Firemen and Enginemen, Peoria, Ill., favoring the passage of legislation to improve the living conditions of our seamen in the merchant marine; to the Committee on the Merchant Marine and Fisheries.

Also, petition of the Switchmen's Union of North America, protesting against the passage of any of the proposed workmen's compensation bills now before the House; to the Committee on the Judiciar;

Also, petition of the Interstate Cottonseed Crushers' Association, Chicago. Ill., protesting against the Austria-Hungary duty on cottonseed oil; to the Committee on Ways and Means.

Also, petition of the Buffalo Chamber of Commerce, Buffalo, N. Y., favoring the passage of legislation exempting associations not organized for profit, but for the general good of a community, from the income-tax bill; to the Committee on Ways and Means.

Also, petition of the New York Zoological Society, New York, favoring the passage of legislation preventing the importation of wings, plumes, skins, etc., of wild birds for commercial use; to the Committee on Ways and Means.

By Mr. WALLIN: Petition of Orts-Verband, of Amsterdam, N. Y., protesting against a duty on books in foreign languages; to the Committee on Ways and Means.

By Mr. WILSON of New York: Petition of the Central Labor Union of Brooklyn, N. Y., favoring Government manufacture of armor plate for the battleships; to the Committee on Naval Affairs.

# SENATE.

# Wednesday, August 20, 1913.

The Senate met at 11 o'clock a. m. Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved. MESSAGE FROM THE HOUSE,

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the Speaker of the House had appointed, in accordance with the provisions of the Indian appropriation act approved June 30, 1913, Mr. Stephens of Texas and Mr. Burke of South Dakota members of the commission to investigate the question of tuberculosis among the Indians in connection with an inquiry into the necessity and feasibility of establishing, equipping, and maintaining a tuberculosis sani-tarium in New Mexico, and an inquiry into the necessity and feasibility of procuring impounded waters for the Yakima Indian Reservation.

The message also announced that the Speaker of the House had appointed, in accordance with the provisions of the Indian appropriation act approved June 30, 1913, Mr. Stephens of Texas, Mr. Carter, and Mr. Burke of South Dakota members of the joint commission to investigate Indian affairs.

The message further announced that the House had passed the bill (S. 1353) to authorize the board of county commissioners of Okanogan County, Wash., to construct, maintain, and operate a bridge across the Okanogan River at or near the town of Malott, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the

H. R. 1681. An act to extend the time for constructing a bridge across the Red Lake River, in township 153 north, range 40 west, in Red Lake County, Minn.;
H. R. 1985. An act to authorize the county of Aitkin, Minn., to

construct a bridge across the Mississippi River in Aitkin County,

H. R. 3406. An act to authorize the construction of a bridge across the Sabine River at Orange, Tex.;

H. R. 5891. An act authorizing the construction of a bridge

across White River at Newport, Ark.;

H. R. 6378. An act to authorize Robert W. Buskirk, of Matewan, W. Va., to bridge the Tug Fork of the Big Sandy River at Matewan, Mingo County, W. Va., where the same forms the boundary line between the States of West Virginia and Ken-

H. R. 6582. An act to authorize the city of Fairmont to construct and operate a bridge across the Monongahela River at or near the city of Fairmont, in the State of West Virginia.

#### MEMORIALS.

Mr. SMITH of Michigan presented a memorial of Local Union No. 205, Cigar Makers' International Union of America, of Battle Creek, Mich., remonstrating against an increase in the internal-revenue tax on cigars, which was ordered to lie on the table.

He also presented memorials of Local Unions Nos. 22, 340, 46, 167, and 69, Cigar Makers' International Union of America, of Three Rivers, Detroit, Traverse City, Grand Rapids, and Owasso, all in the State of Michigan, remonstrating against the importation of cigars free of duty from the Philippine Islands, which were ordered to lie on the table.

#### BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES: A bill (S. 3015) designating certain lands as "The Parthe-

non"; to the Committee on the Library.

A bill (S. 3016) granting permission to Capt. Dorr F. Tozier to accept a gift from the King of Great Britain; to the Committee on Foreign Relations.

## COMMITTEE SERVICE.

On motion of Mr. Kern, it was

Ordered, That Senator John F. Shafroth, of Colorado, be appointed a member of the Committee on the Philippines in place of Senator Martine of New Jersey, who has resigned therefrom.

### AMENDMENTS TO THE TARIFF BILL.

Mr. PENROSE. I desire to submit an amendment to the pending tariff bill in the nature of a substitute for Schedule K. I will take this opportunity of saying that this amendment is the same as the one introduced by me in the last Congress, which received nearly all the then majority votes in this Chamber. I ask that the amendment may lie on the table.

The VICE PRESIDENT. The amendment will lie on the

table and be printed.

Mr. PENROSE. I submit also an amendment to the same bill relative to the hosiery paragraph of the cotton schedule.

ask that it may lie on the table.

The VICE PRESIDENT. The amendment will be printed

and lie on the table.

#### CONDITIONS IN MEXICO.

The VICE PRESIDENT. The following resolutions come over from the preceding day.

The Secretary. Senate resolution 162, by Mr. Penrose:

Resolved, That the President be requested-

Mr. PENROSE. I ask that those two resolutions may lie on the table until I call them up, if there is no objection.
The VICE PRESIDENT. That action will be taken.

The Secretary. Senate resolution 164, by Mr. Poindexter.
Mr. JONES. My colleague [Mr. Poindexter] is not present,

same request the Senator from Pennsylvania has made. that the resolution may lie on the table until called up by my colleague

The VICE PRESIDENT. That action will be taken.

IMPORTATIONS IN AMERICAN VESSELS.

The VICE PRESIDENT. The Chair lays before the Senate resolution 165, coming over from yesterday.

Senate resolution 165, submitted yesterday by Mr. Jones, was read, as follows:

Resolved, That the Secretary of State be directed to transmit to the Senate copies of all protests filed against paragraph J, subdivision 7, of Section IV (V as amended), of H. R. 3321, "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," together with copies of all correspondence that has passed between this country and any foreign country relating thereto, and copies of any report or reports prepared or made thereon by any officer of the United States; the subject referred to being the provision in the tariff bill providing for a discount of 5 per cent on all duties on goods, wares, and merchandise imported by vessels admitted to registration under the laws of the United States.

Mr. JONES. It was suggested by the Senator from Mississippi [Mr. Williams] yesterday that the words "if not incompatible with the public interest" should be inserted.

Mr. SIMMONS. I was going to make that suggestion.
Mr. JONES. I have no objection to the insertion of those words.

The VICE PRESIDENT. The resolution will be so modified. The question is on agreeing to the resolution as modified.

The resolution as modified was agreed to.

#### THE SUGAR SCHEDULE.

The VICE PRESIDENT. The morning business is closed. Mr. SIMMONS. I ask unanimous consent that the Senate proceed with the consideration of House bill 3321.

The VICE PRESIDENT. The Senator from North Carolina asks unanimous consent that the Chair lay before the Senate

House bill 3321.

Mr. MARTINE of New Jersey. Mr. President, may I ask the Senator from North Carolina if he will defer just a moment? I desire to state, Mr. President, that I was very much impressed with the intense earnestness of the address of the distinguished Senator from Utah [Mr. Smoot] yesterday on the sugar schedule. I have thought over in my mind a good many times the picture of desolation and sadness that was depicted for the western plains that are now or recently have been in the culture of beets. I realize and appreciate that it was the voice of an honest, conscientious, and earnest man in the behalf of that which he deemed right. That that address was the opinion and judgment of one with patriotic purposes I have no doubt, yet of one who was prejudiced in favor of the theory as well as the practice of protection.

Lest this thought shall go to the public and find lodgment in their minds and hearts without the least thought of contradiction, a matter has come to me within a few hours that I deemed it but fair to the people of the United States should be stated to them. Within the past few hours I have been in conversa-tion with a gentleman largely versed in the western interests, largely versed in both the culture and planting of sugar beets and sugar cane and the manufacture thereof, a man whose judg-

ment certainly should be taken for something.

I have realized the criticisms that my friend from Utah made, but within a few hours it has been my privilege to have been in conversation with no less a gentleman than Rudolph Spreckels. Mr. Rudolph Spreckels had just arrived here from the Pacific coast. I asked him what he felt was the feeling of the people in the West and in California and on the Pacific coast with reference to the tariff bill. His statement to me was in these words, plain and flat: "I feel that the bill will be well received and thoroughly appreciated by the people of California. It is in line with that which you have promised and in line with

that which the people had reason to anticipate."

I then said, "Mr. Spreckels, I want to ask your judgment. I have heard and we all have heard and the Senate has heard pictures of the doleful conditions that would take place from the abandonment of beet-sugar planting. I want to ask if, in your judgment, that will be the case?" He said, "I can see nothing of the kind." I asked him if he felt that the sugar mills would close in dearth of beet culture. He said they would not, that there are some mills which should close, there is no doubt. Then I asked him as to the situation in Louisiana. He said, 'I feel that in Louisiana they have had no legitimate and just

I then said, "Now, Mr. Spreckels, as to Hawaii, what is the situation there?" He said, "I am glad you have raised that question. I used to be an owner and a planter in Hawaii." I asked, "Are you still not an owner and planter and refiner?" He said, "No sir: I am out of sugar, and have been." and I ask that the resolution may go over. I will make the He said, "No, sir; I am out of sugar, and have been for a number of years." He said Hawaii will prosper, anyway; their profits are inordinate; that whatever the tariff, the conditions, and the soil are such that their profits are inordinate, and will represent in many instances as high as 80 per cent.

Mr. PENROSE. Will the Senator permit a question at this

point?

Mr. MARTINE of New Jersey. Certainly, Mr. PENROSE. The Senator has quoted a very distinguished gentleman. In order that the Senate may know the impartiality of this witness, I would be glad if the Senator from New Jersey could inform the Senate what was the amount of his cam-

paign contribution to Mr. Wilson's candidacy.

Mr. MARTINE of New Jersey. I know nothing of that. I know the fact, however, that he has been the greater part of his life a most staunch and stalwart Republican. I believe, that as God gave him wisdom he saw the light of day and he did vote for Woodrow Wilson. I believe I have heard-I do not know of my own knowledge-that he may have contributed some money to the Democratic campaign. But be that as it may, the position is pretty well established, I feel, in the minds of the people that there can be no justification for taxing 100,000,000 people inordinately in order to enrich a few. I believe the public will indorse and sustain the action of the Democratic Party in this very controversy for a lower tariff.

Now, this is a view that many of us now have, and I present it in contrast with the desperate picture that has been drawn for us day after day, and the desperate picture that was drawn by the distinguished Senator from Utah, I am willing to admit patriotically in his own judgment and conscience. many things I feel in common with him. I love your earnestness and I love your intensity. I would not give a rush for a man who had no convictions, and I would give less for a man who had convictions and had not the courage to stand up and defend them. But I do believe that the Senator from Utah has been misguided. I want that the public may know that there is another side to this question, and that gentlemen who are in close touch with this great sugar industry and who can view it as readily as can the Senator from Utah see no result of desolation and sadness and woe.

Mr. SMOOT. Mr. President, just one word. I wish to say to the Senator from New Jersey that I appreciate his kind reference to me, and I do want to say that I have the highest respect for the Senator from New Jersey, because I believe him absolutely honest in his belief in free trade on many, many

of the items produced in this country.

Mr. MARTINE of New Jersey. I thank the Senator. Mr. SMOOT. There is not a Senator on the other side of the Chamber who is so consistent in his politcial views affecting

the tariff as is the Senator from New Jersey.

However, Mr. President, I do believe that the people of California have just as much confidence in the judgment of her two Senators as they have in that of Mr. Spreckels, a man who is directly interested in seeing that we have free sugar.

I do not know the situation in California as well as I do in the State of Utah, but I want to say to the Senator from New Jersey if ever I spoke the truth in my life as I understand it and as I see it I presented it yesterday to the Senate on the

I am not going to discuss the question any further. I will let the people of California judge between the views expres by the two Senators from that State and those of Mr. Spreckels,

expressed through the Senator from New Jersey.

Mr. PENROSE. Mr. President, since the Senator from New Jersey has seen fit to raise this question I desire to call the attention of the Senate to the fact that Mr. Spreckels, whom he has cited as a witness, is distinctly a beneficiary of this tariff bill. We have heard a great deal, with much unction, of consultation and conferences in past years with the beneficiaries of tariff legislation.

I had not intended to bring it up, but since the Senator from New Jersey has been consulting with Mr. Spreckels for the last

two or three days, I happen to have here

Mr. MARTINE of New Jersey. Quite to the contrary, sir, I only saw him a few hours ago.

Mr. PENROSE. I have seen the Senator in his company a

number of times.

Mr. MARTINE of New Jersey. I think the Senator's vision

must be utterly in error. I have met him but once in my life.

Mr. PENROSE. The Senator seemed to be on very intimate terms with him when I saw them together yesterday.

Mr. MARTINE of New Jersey. That is very possible. I was reasonably close to him and trying to gather what information I could to offset the unfortunate stories of calamity which have been stated by the distinguished Senator from Pennsylvania [Mr. Penrose].

Mr. PENROSE. I should like to know from the Senator from New Jersey whether Mr. Spreckels authorized him to repeat the conversation which he has given to the Senate this morning.

Mr. MARTINE of New Jersey. I will say that first Mr. Spreckels told me this, and a few moments afterwards I thought how bright in comparison with the clouds that have been depicted; and I said to myself, "Great heavens, a thousand men and women in our land who are interested would love to hear that story!" Then I went back to Mr. Spreckels, and it may be the Senator-

Mr. PENROSE. Then the Senator has seen him twice?

Mr. MARTINE of New Jersey. You may have it so, but it was within a few minutes, and perhaps the Senator was near by, and through the crack of a door heard the conversation.

Mr. PENROSE. I saw the Senator talking with him in the

corridor.

Mr. MARTINE of New Jersey. Now, this is my authority and authorization. Then it was that I said, "Mr. Spreckels, I have been impressed with that which you told me, which is so in contradiction to those things we have heard. I want to know if I may use that." I recited it over and over, and his acquiescence was entire and complete. If the Senator needs any further evidence, God knows where he will get it.

Mr. PENROSE. Then the Senator admits that instead of

seeing Mr. Spreckels once, he has seen him twice?

Mr. MARTINE of New Jersey. Call it what you may. Mr. PENROSE. When I saw them together there was evi-

dently an affinity of two kindred souls that had long been parted and now had met and talked in mutual interest.

Mr. MARTINE of New Jersey. I am very fond of kindred souls. It is a good part of my make-up. I have met the Senator sometimes pleasantly and kindredly and I would love to meet

him more.

Mr. PENROSE. Since the Senator from New Jersey has seen fit to cite the testimony of Mr. Spreckels against the unanimous testimony of the growers of Louisiana, who are threatened with destruction and will be destroyed, and against the unanimous testimony of the beet-sugar growers and manufacturers of the western country, whose industry has been started after so much experiment and so much labor and trouble, with the encouragement of the Federal Government; since he has seen fit to cite the case of this one man, distinctly a beneficiary under the bill, I desire to call his attention and that of the Senate in this connection to Mr. Spreckels's record. It will not take long.

The agitation for free sugar has been conducted for a number of years by Mr. F. C. Lowry, acting as the secretary of an alleged organization known as the Committee of Wholesale Gro-Mr. Lowry was the sales agent for the Federal Sugar Refining Co., the head of which is Mr. Claus A. Spreckels. Mr. Lowry admitted that \$16,000 had been expended by him in the

effort to work up a sentiment for free sugar.

Mr. MARTINE of New Jersey. "By him." By whom?

Mr. PENROSE. By Mr. Lowry—

Mr. MARTINE of New Jersey. That is all ri Mr. PENROSE. Representing Mr. Spreckels. That is all right

Mr. MARTINE of New Jersey. You are saying "representing Mr. Spreckels." He does not say that he represents Mr. Spreckels.

Mr. PENROSE. In other words, this spontaneous sentiment coming from the American consumer was aroused at an expense of \$16,000, admitted to have been expended, and how much more has been expended we are not informed.

Mr. OVERMAN. Did he say he was the agent of Claus

Spreckels?

Mr. PENROSE. Yes, sir.

Mr. MARTINE of New Jersey. I was not talking about Claus Spreckels; I was talking and distinctly stated that it was Rudolph Spreckels.

Mr. JAMES. The Senator from Pennsylvania has the wrong

Spreckels.

Mr. PENROSE. I want to give the history of the whole Spreckels connection.

In the last political campaign, Mr. Spreckels contributed \$5,000 to the Democratic campaign fund toward the election of President Wilson. In California, Rudolph Spreckels, brother of Claus A. Spreckels, had charge of the California Republican Wilson organization. He contributed large sums in financing it and had numerous meetings under its auspices throughout the State. I should say that fully \$5,000 was expended by Mr. Rudolph Spreckels in his efforts in behalf of Mr. Wilson in California. This is a horrible narrative of beneficiary tariff legislation. [Laughter.]

Mr. MARTINE of New Jersey. I am not responsible for anything Claus Spreckels says. I simply stated what Rudolph

Spreckels told me.

Mr. PENROSE. The Senator will get acquainted with Claus

Mr. MARTINE of New Jersey. Yes; but the Senator will

just confine himself to Rudolph.

The Senator will get Claus in due time. Mr. PENROSE. Both these brothers believe in free sugar-at \$5,000 apiece. They are antagonistic to their two elder brothers, John D. Spreckels and Adolph B. Spreckels. In fact, there has been a family feud among these brothers that extends over a period of years. At one time their father, Claus Spreckels, sr., disowned his two younger sons. He had presented them with some stocks in Hawaiian sugar companies and for some reason he became dissatisfied with the action of his younger sons regarding these stocks and brought a suit in the California courts to recover the stocks upon the ground that the gift of the stock was not joined in by his wife and that under the California law this failure on the wife's part to join in the gift invalidated the gift. The Supreme Court, however, held that the law which had been relied upon applied only to real estate.

Toward the close of his life Claus A. Spreckels, sr., made up with his younger sons and disinherited his two elder sons. The will is still in litigation. It is an interesting family, Mr.

It is within the range of possibility that the bitter fight that is being waged by these younger sons of Claus Spreckels, sr., against their elder brothers is due to family hatred and a desire to ruin the two elder sons by the two younger sons. two elder sons are interested in Hawaiian plantations and in the beet-sugar mills of California. I am informed and I believe that the two elder sons are not interested in any refineries whatever.

The testimony that was brought out before the Hardwick committee shows that if the duty on sugar were removed absolutely we could produce neither cane nor beets in this country; that this removal of the duty would absolutely destroy the industry in this country, and that the people interested in the refineries would approve of such a course. You will find something to this effect on page 292 of the Hardwick committee hearings; you will also find some evidence of this kind on pages

1195 and 1196 of the same hearings.

There is no doubt in my mind that this bitterness on the part of Claus A. Spreckels and Rudolph Spreckels against John D. Spreckels and Adolph B. Spreckels has a good deal to do with the action of the former in trying to break down the beet-sugar industry of this country and the cane-sugar industry of Hawaii. It would mean practically ruin for John D. and Adolph B. Spreckels if such a law were passed. The fact that Claus A. Spreckels contributed \$5,000 toward the Wilson campaign and Rudolph Spreckels probably spent as much for the election of Wilson in California, it seems to me, would indicate that the attitude of the administration in supporting free sugar so energetically after the President's partisans had accepted these contributions is more reprehensible than is the action of those men whose money is invested in the sugar industry in this country and the Hawaiian Islands, and whose presence in Washington to protect their investments has been denounced as sidious lobby."

Mr. MARTINE of New Jersey. I only desire to say, Mr. President, that if I had any thought of working up a family tree I would never look any further than to the Senator from Pennsylvania. He certainly has worked up the Spreckels family tree and its finesse; but I want to know who signed this communication. You know signing a communication means everything. Only a few days ago I presented a communication with reference to Pennsylvania, and the distinguished Senator from Pennsylvania asked that it be expunged from the Record and. if possible, obliterated from the hearing of the Senate, simply

because it came here without a signature.

I do not care what Mr. Claus Spreckels may say, nor do I care about the family alliances and connections, nor the quarrels that the Spreckels family have had; but I do say that what I have stated was the statement of Rudolph Spreckels, and in his desire for free sugar he is not alone. Many other people, and there were a great many in Pennsylvania-

Mr. PENROSE. I never heard of one. Mr. MARTINE of New Jersey. Oh, well, your hearing was poor at times. You have lived so long in the clang and the riveting of the boiler and in the clang of the machine shop that you know of nothing else of the cry of humanity. The welding of a plate and the riveting of a boiler had more charms for you than the cry of struggling and of suffering humanity. [Laughter.]

Mr. PENROSE. The boilers that are being riveted in Penn-

sylvania are daily growing fewer in number.

Mr. MARTINE of New Jersey. Are they? Just let me read something to you which I have here.

Mr. PERKINS. Mr. President, I will state for the information of the control of t tion of the Senator from New Jersey [Mr. Martine] that California has 11 beet-sugar factories, which have been erected at a cost of \$20,000,000, and the disbursements for labor and beets have aggregated \$15,000,000 a year, thereby giving a market to many farmers and employment to many laborers. factories have been projected, which will not be built if this bill passes in its present form, and it will be impossible for those now in existence to continue to manufacture beet sugar under prospective conditions.

#### THE TARIFF.

Mr. SIMMONS. Mr. President, I ask that the Senate proceed with the consideration of the tariff bill.

Mr. MARTINE of New Jersey. One moment—
The VICE PRESIDENT. The Senator from North Carolina asks unanimous consent for the consideration of the tariff bill. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government,

and for other purposes.

Mr. President, I desire to say that I hope Mr. SIMMONS. we shall go on with the cotton schedule. In that connection wish to add that so anxious are Senators on this side of the Chamber to make progress with the bill that on yesterday, when we had the sugar schedule under consideration, we refrained from any discussion, and I hope that we shall not now go back to the sugar schedule and enter into a discussion of it I ask that we proceed with the reading of the bill, Schedule I being the one under consideration, as I understand.

Mr. GALLINGER. Mr. President, I did not understand the statement made by the Senator from North Carolina, my atten-

tion being diverted for a moment.

Mr. SIMMONS. I stated that on yesterday we were so anxious on this side to proceed with the bill that a number of Senators refrained from speaking when the sugar schedule was up, and that I hoped we would not go back to it to-day.

Mr. GALLINGER. Then there is a "conspiracy of silence"

on the other side of the Chamber?

Mr. SIMMONS. Oh, Mr. President, the Senator can characterize it as he pleases. I have just made a plain statement that we did not consume the time of the Senate yesterday in discussing the sugar schedule.

Mr. GALLINGER. Mr. President, I think that is agreeable

to this side.

The VICE PRESIDENT. The Secretary will state the pending amendment.

The Secretary. On page 73, after line 7, the committee propose to strike out paragraph 255, as follows:

255. Cotton thread and carded yarn, combed yarn, warps, or warp yarn, whether on beams or in bundles, skeins, or cops, or in any other form, except spool thread of cotton, crochet, darning and embroidery cottons, hereinafter provided for, shall be subject to the following rates of duty: Nos. 1 to 9, inclusive, 5 per cent ad valorem; Nos. 10 to 19, inclusive, 7½ per cent ad valorem; Nos. 20 to 39, inclusive, 10 per cent ad valorem; Nos. 40 to 49, inclusive, 15 per cent ad valorem; Nos. 50 to 59, inclusive, 17½ per cent ad valorem; Nos. 60 to 99, inclusive, 20 per cent ad valorem; No. 100 and over, 25 per cent ad valorem. Cotton card laps, roping, sliver, or roving, 10 per cent ad valorem; cotton waste and flocks manufactured or otherwise advanced in value, 5 per cent ad valorem.

And in lieu thereof to insert:

And in lieu thereof to insert:

255. Cotton thread and carded yarn, warps, or warp yarn, whether on beams or in bundles, skeins, or cops, or in any other form, not combed, bleached, dyed, mercerized, or colored, except spool thread of cotton, crochet, darning and embroidery cottons, hereinafter provided for, shall be subject to the following rates of duty;

Numbers up to and including No. 9, 5 per cent ad valorem; exceeding No. 9 and not exceeding No. 19, 7½ per cent ad valorem; exceeding No. 19 and not exceeding No. 39, 10 per cent ad valorem; exceeding No. 39 and not exceeding No. 49, 15 per cent ad valorem; exceeding No. 49 and not exceeding No. 59, 17½ per cent ad valorem; exceeding No. 59 and not exceeding No. 79, 20 per cent ad valorem; exceeding No. 79 and not exceeding No. 99, 22½ per cent ad valorem; exceeding No. 199 and not exceeding No. 199, 25 per cent ad valorem; exceeding No. 199, 20 per cent ad valorem; exceeding No. 39 and not exceeding No. 10, 10 per cent ad valorem; exceeding No. 19 and not exceeding No. 19, 10 per cent ad valorem; exceeding No. 19 and not exceeding No. 19, 17½ per cent ad valorem; exceeding No. 39 and not exceeding No. 49, 17½ per cent ad valorem; exceeding No. 59 and not exceeding No. 59, 22½ per cent ad valorem; exceeding No. 59 and not exceeding No. 99, 25 per cent ad valorem; exceeding No. 59 and not exceeding No. 99, 25 per cent ad valorem; exceeding No. 99 and not exceeding No. 99, 25 per cent ad valorem; exceeding No. 99, and not exceeding No. 190, 27½ per cent ad valorem; exceeding No. 190, 20 per cent ad valorem. Cotton waste and flocks, manufactured or otherwise advanced in value, cotton card laps, roping, sliver, or roving, 5 per cent ad valorem.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

Mr. BRANDEGEE. Mr. President, if I understood the Senator from Georgia [Mr. SMITH] correctly, yesterday afternoon he announced that it was his intention, or it might be his intention later on, to offer an amendment to the committee amendment, and in view of that fact-

Mr. SMITH of Georgia. We have determined not to offer it. On looking into the matter further we do not think it necessary.

Mr. BRANDEGEE. Then I have nothing further to say.
Mr. SMITH of Georgia. We were doubtful whether the
word "combed" properly fell into the class where it appears;
but we now think it does, and for that reason we leave it.
The VICE PRESIDENT. The question is on agreeing to the

committee amendment.

The amendment was agreed to.

The reading of the bill was resumed, and paragraph 256 was read, as follows:

256. Spool thread of cotton, crochet, darning, and embroidery cottons, on spools, reels, or balls, or in skeins, cones, or tubes, or in any other form, 15 per cent ad valorem.

Mr. SMITH of Georgia. Mr. President, the committee has authorized me to offer, after the word "form," in line 14, an amendment reading:

Not exceeding 600 yards in length.

Mr. SMOOT. Mr. President, will the Senator please repeat the suggested amendment?

Mr. SMITH of Georgia. In line 14, after the word "form," to insert the words "not exceeding 600 yards in length."

It was believed that longer threads would cause trouble in classification and that by limiting the number of yards covered by this section it would simplify the enforcement of the section and prevent an effort to bring in under this section yarns that

were not really intended to be covered by it. Mr. SMOOT. Then, all darning cotton and embroidery cottons or cottons on spools or reels or balls or skeins, in order to come in under this paragraph, must be under 600 yards?

Mr. SMITH of Georgia. Yes; the others will take their classi-

fication under the general yarn count.

Mr. SMOOT. Mr. President, the present law applying to these same items contains the clause, "containing less than 600 I think the amendment ought to be adopted. In this connection I will ask the Senator if he has taken into consideration the suggestion which I offered last night adding the proviso:

That in no case shall the duty be assessed upon a less number of yards than is marked on the spools, reels, cones, tubes, skeins, or balls.

Mr. SMITH of Georgia. Our inquiry led us to conclude that this was not necessary, for the reason that most of these goods are shipped in by standard houses; they are sold under the names of the houses and on their reputation, and we were advised that there is no danger of the trouble feared by the Senator

Mr. SMOOT. Really the insertion of the words in this bill can do no harm.

Mr. SMITH of Georgia. This amendment will carry the paragraph into conference; and if, on further inquiry, we conclude that it is necessary to do so, we can provide for it in

Mr. SMOOT. I desire to say to the Senator that even in conference that provision can not be incorporated if it be not placed in the bill in the House or in the Senate.

Mr. SMITH of Georgia. I have not taken up that further

proposition for the reason stated.

The VICE PRESIDENT. The Secretary will state the amendment proposed by the Senator from Georgia on behalf of the committee to the paragraph.

The Secretary. On page 75, paragraph 256, line 14, after the word "form," it is proposed to insert "not exceeding 600 yards in length."

The VICE PRESIDENT. The question is on agreeing to the

Mr. LIPPITT. Mr. President, I also desire to offer an amendment to be inserted after the word "form," in paragraph 256.

The VICE PRESIDENT. The Senator from Rhode Island will kindly suspend for a moment. It is impossible for the Chair to hear anything that the Senator from Rhode Island has been saying, on account of the disturbance in the Senate Chamber.

Mr. LIPPITT. Mr. President, I said that I also desired to offer an amendment to paragraph 256, to be inserted after the word "form," in the following words: "Shall pay the same rate of duty as the single yarns of which they are composed, but not less than," so that it would read, "but not less than 15 per cent ad valorem."

The VICE PRESIDENT. The Chair is of the opinion that the committee amendment would first be in order. The question

is on agreeing to the amendment offered by the Senator from Georgia on behalf of the committee.

The amendment was agreed to.

The VICE PRESIDENT. Now, the amendment proposed by

the Senator from Rhode Island is in order.

Mr. LIPPITT. Mr. President, the adoption of that amendment, I think, would make it necessary for me to move that paragraph 256 be stricken out and that in place of it there be inserted:

Spool thread of cotton, crochet, darning, and embroidery cottons, on spools, reels, or balls, or in skeins, cones, or tubes, or in any other

And here are the words I wish to insert—
The VICE PRESIDENT. The Chair is of the opinion that the Senator's amendment is perfectly germane to the paragraph of the bill under consideration, but his amendment would strike out the words "not exceeding 600 yards," which have been inserted on motion of the Senator from Georgia.

Mr. LIPPITT. I do not ask to strike out those words.

The VICE PRESIDENT. The Chair understands that: but the adoption of the amendment proposed by the Senator would have the effect of striking them out.

Mr. GALLINGER. Mr. President, would not this be the parliamentary situation: The amendment of the committee agreed to and then the Senator from Rhode Island moves to substitute the provision he has read for the committee provision as amended as a substitute for that paragraph?

Mr. LIPPITT. I think on further consideration, Mr. President, the amendment offered by the Senator from Georgia somewhat confused me, and I will offer the amendment to follow the words inserted on motion of the Senator from Georgia.

The VICE PRESIDENT. The amendment will be stated. The Secretary. After the word "length," in the amendment just agreed to, it is proposed to insert:

Shall pay the same rate of duty as the single yarns of which they are composed, but not less than.

Mr. LIPPITT. Mr. President, in explanation of the amendment which I have offered, last night at the time the session adjourned I was discussing the discrimination exhibited in this paragraph against threads as compared with all other forms of cotton yarns. I had shown that thread was composed of what is ordinarily known as cotton yarn by taking two or more single strands of yarn and twisting them together to form a thread; that in the great majority of cases the single yarns paid a higher rate of duty than 15 per cent, and that the cost of twisting the single yarns into thread was, in most instances, as large

as the total cost of changing cotton into yarn.

On the subject of discrimination, of which the duty on yarns is one of the most glaring instances to be found in the cotton schedule, I want to take this opportunity of calling the attention of the Senate to a very remarkable memorial which was sent to this body a few days ago, signed by 96 of the leading distributors of textile fabrics in New York and elsewhere, pro-testing against the discrimination in this schedule. They represent, in a large measure, the wholesale textile trade of the United States. They are importers; they are commission merchants; they are jobbers of all kinds of textile fabrics. Among them are many of the best-known names in the United States. I will only instance one of them as a sample of the whole-the firm of H. B. Claffin & Co .- which is one of the largest importers of textile fabrics in this country, which is one of the largest users of all classes of textiles, and not of cotton alone. I mention that name as a sample of the signers of the petition.

What I wish to call attention to is what they are protesting against. They are not protesting against a change in the duty, in the case of the silk schedule, from 55 per cent to 45 per cent, although they are large users of slik goods. They are not protesting against a reduction of the protective duty upon woolen goods from in the neighborhood of 50 or 60 per cent to 35 per cent. They are protesting in this emphatic way solely on account of the gross discrimination which has been made with regard to these three sister industries in reducing the duties on cotton fabrics from between 50 and 60 per cent to 16 per cent. They are protesting against the injustice of treating so differently one industry, as is done in this bill, by putting upon cottons a duty of only one-half of what is put upon woolens, and only one-third of what is put upon silks.

I offer this amendment, not for the purpose of putting the labor that is employed in the manufacture of cotton thread on a parity with the labor that is employed in making cotton yarn, but simply so that the duty shall not be less than the duty on the raw material of thread. I think it is a subject that ought to have material of thread. I think it is a the consideration of the committee.

Mr. SMITH of Georgia. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst Bacon Bankhead Gallinger Nelson Smith, Md. Smith, Mich. Gronna Hitchcock Hollis Hughes Norris Overman Smoot Sterling Borah Brady Brandegee Page Penrose Stone Sutherland James
Jones
Jones
Kenyon
Kern
La Follette
Lane Perkins Pittman Pomerene Reed Robinson Bristow Bryan Burton Swanson Thomas Thompson Thornton Burton Chamberlain Clapp Clark, Wyo Clarke, Ark. Colt Crawford Fall Fletcher Saulsbury Shafroth Sheppard Tillman Townsend Vardaman Walsh Lane
Lea
Lewis
Lippitt
Lodge
McLean
Martine, N. J. Sherman Warren Weeks Williams Shively Simmons Smith, Ga.

Mr. JAMES. My colleague, the senior Senator from Kentucky [Mr. Bradley], is detained from attendance here by reason of illness. He has a general pair with the junior Senator from Indiana [Mr. Kern]. I wish this announcement to stand for the day.

Mr. SHEPPARD. My colleague [Mr. Culberson] is unavoidably absent. He is paired with the senior Senator from Delaware [Mr. DU PONT]. I ask that this announcement may stand

for the day.

VICE PRESIDENT. Sixty-eight Senators have answered to the roll call. A quorum of the Senate is present. The question is on the amendment proposed by the Senator from

Rhode Island [Mr. LIPPITT].

Mr. CLARK of Wyoming. Mr. President, before the vote is taken I should like to ask the Senator in charge of this schedule whether or not the intimation made by the Senator from Rhode Island is correct—that without his proposed amendment and with the duty as carried in the bill the duty upon these completed products will be less than the duty on the constituents that enter into them?

Mr. SMITH of Georgia. The Senator probably was not here yesterday afternoon when we discussed this subject. That is true in some instances, but it is also true under the present

law, under the specifics.

Mr. CLARK of Wyoming. I am not speaking of the present law. Attention has now been directed to the fact; and it occurs to me that if it is a fact this amendment or some amendment ought to be placed in the bill. It hardly seems the right levying of a duty that the duty upon a raw product that enters into a manufactured product should be more than the duty upon the manufactured product itself.

Mr. SMITH of Georgia. The statement of the Senator is correct, that in some instances this duty is less than the duty on the yarn, and the same is the case now. The articles that come in are principally of the highest character, and there is more competition where the duty is less than 20 per cent under the specifics. We went into that matter pretty fully yesterday

afternoon.

Mr. GALLINGER. Mr. President, while this schedule has a very important bearing upon a great industry in my own State. I do not propose to occupy more than a minute or two in discussing it. I wish to put in the RECORD, however, a couple of statements which came to me some time ago regarding the industry and which I think are of interest.

Mr. A. Barton Hepburn, the well-known New York banker, who had recently been in England, gave out this statement:

Business activity in England is at the high-water mark and there are no apparent signs of recession. Undoubtedly her manufacturers are rushing the making of goods in the expectation of finding a profitable market in the United States when the Underwood tariff bill becomes a law.

Mr. Frank S. Turnbull, director of the Rogers-Peet Co., of New York, who has been consulting prominent manufacturers in Yorkshire, Scotland, and other places, said to the correspondent of the New York Sun in regard to the Underwood tariff bill:

The feeling of manufacturers here is one of surprise that the cut in textile duties is so radical. They would have preferred a bill which was less drastic, for such a measure would have indicated permanency and stability. The English and Scotch manufacturers would like a 35 per cent ad valorem duty. They will sell a much greater quantity of goods in the United States, but they will not put themselves to the expense of increasing their plants until they are certain that the new tariff is to last. It would please them greatly if they were sure of that, and they would not have to hesitate to increase their plants.

It seems from this testimony, which I give for what it is worth, that even the manufacturers in Great Britain are somewhat alarmed at the tremendous cut that is made in this schedule, because they think that in the future, if another party comes into power, the present duties will be overturned and much larger duties imposed. Their feeling apparently is that if a less radical cut had been made it might have resulted in

a law that would have been permanent so far as this industry is concerned.

Personally I greatly regret that our Democratic friends have seen fit to strike so severe a blow as they have at this industry. I think I know what the result will be; but we are powerless on this side of the Chamber to prevent that result. All we can do is to record our votes, when we have an opportunity, against the provisions that have been incorporated in the bill regarding the different articles in this schedule.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Rhode Island [Mr. LIPPITT].

Mr. LIPPITT. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. BRISTOW. Mr. President, I ask th may be stated, so that we may understand it. Mr. President, I ask that the amendment

The VICE PRESIDENT. The Secretary will state the amend-

ment.

The Secretary. On page 75, line 14, after the word "form" and after the comma, the Senate has already agreed to an amendment, proposed by the Senator from Georgia, adding the words "not exceeding 600 yards in length." After the word "length" the Senator from Rhode Island proposes to insert:

Shall pay the same rate of duty as the single yarns of which they are composed, but not less than—

So that, if amended, it would read: Not less than 15 per cent ad valorem.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when his name was called). general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. I transfer that pair to the senior Senator from Maine [Mr. Johnson] and will vote. I vote "nay."

Mr. GALLINGER (when his name was called). general pair with the junior Senator from New York [Mr. O'GORMAN]. I transfer that pair for the day to the junior Senator from Maine [Mr. BURLEIGH] and will vote. I vote

Mr. KERN (when his name was called). I transfer my general pair with the senior Senator from Kentucky [Mr. Bradley] to the junior Senator from Arizona [Mr. Smith] and will vote. I vote "nay."

Mr. SMITH of Maryland (when his name was called). have a general pair with the senior Senator from Vermont [Mr. Dillingham]. Therefore I withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from New York [Mr. Root]. I transfer that pair to the Senator from Virginia [Mr. MARTIN] and vote "nav.

Mr. TILLMAN (when his name was called). I have a general pair with the Senator from Wisconsin [Mr. Stephenson]. I

therefore withhold my vote.

The roll call was concluded.

Mr. McCUMBER. I transfer my general pair with the senior Senator from Nevada [Mr. Newlands] to the junior Senator from California [Mr. Works] and vote "yea."

Mr. JONES. I desire to state that my colleague [Mr. Poin-DEXTER] is necessarily detained from the Chamber and that he is paired with the Senator from Oklahoma [Mr. Owen]. I will state that with reference to the votes yesterday my colleague was paired with the Senator from Oklahoma [Mr. Owen],

although I did not know it at the time.

Mr. SMITH of Maryland. I transfer my pair with the Senator from Vermont [Mr. DILLINGHAM] to the Senator from South

Carolina [Mr. SMITH] and vote. I vote "nay."

Mr. GALLINGER. I have been requested to announce that the Senator from Delaware [Mr. DU Pont] is paired with the Senator from Texas [Mr. Culberson]; that the Senator from West Virginia [Mr. Goff] is paired with the Senator from Alabama [Mr. BANKHEAD]; that the Senator from Pennsylvania [Mr. OLIVER] is paired with the Senator from Oregon [Mr. CHAMBERLAIN]; and that the Senator from Maryland IMr. JACKSON] is paired with the Senator from West Virginia [Mr. CHILTON

Mr. BANKHEAD. I transfer my pair with the junior Senator from West Virginia [Mr. Goff] to the Senator from Louisiana [Mr. RANSDELL] and vote "nay."

The result was announced-yeas 33, nays 39, as follows:

YEAS-33.

Borah Brady Brandegee Bristow Burton Catron Clapp Clark, Wyo.

Martin, Va. Newlands Dillingham So Mr. Lippitt's amendment was rejected.

The next amendment of the committee was to strike out para-

graph 257 in the following words:

graph 257 in the following words;

257. Cotton cloth, not bleached, dyed, colored, stained, painted, printed, Jacquard figured, or mercerized, containing yarn the highest number of which does not exceed No. 9, 7½ per cent ad valorem; exceeding No. 9 and not exceeding No. 19, 10 per cent ad valorem; exceeding No. 19 and not exceeding No. 39, 12½ per cent ad valorem; exceeding No. 39 and not exceeding No. 49, 17½ per cent ad valorem; exceeding No. 49 and not exceeding No. 59, 20 per cent ad valorem; exceeding No. 59 and not exceeding No. 99, 22½ per cent ad valorem; exceeding No. 99, 27½ per cent ad valorem. Cotton cloth, when bleached, dyed, colored, stained, painted, printed, Jacquard figured, or mercerized; shall be subject to a duty of 2½ per cent ad valorem in addition to the rates otherwise chargeable thereon.

And in lieu thereof to invert.

And in lieu thereof to insert:

And in lieu thereof to insert:

257. Cotton cloth, not bleached, dyed, colored, stained, painted, wovenfigured, or mercerized, containing yarns the highest number of which does not exceed No. 9, 7½ per cent ad valorem; exceeding No. 9 and not exceeding No. 39, 12½ per cent ad valorem; exceeding No. 19 and not exceeding No. 39, 12½ per cent ad valorem; exceeding No. 39 and not exceeding No. 49, 17½ per cent ad valorem; exceeding No. 59 and not exceeding No. 59, 20 per cent ad valorem; exceeding No. 59 and not exceeding No. 79, 22½ per cent ad valorem; exceeding No. 79 and not exceeding No. 79, 22½ per cent ad valorem; exceeding No. 79 and not exceeding No. 99, 25 per cent ad valorem; exceeding No. 99, 27½ per cent ad valorem. Cotton cloth when bleached, dyed, colored, stained, painted, printed, woven-figured, or mercerized, containing yarn the highest number of which does not exceed No. 9, 10 per cent ad valorem; exceeding No. 9 and not exceeding No. 9, 15 per cent ad valorem; exceeding No. 39 and not exceeding No. 39, 15 per cent ad valorem; exceeding No. 49 and not exceeding No. 49, 20 per cent ad valorem; exceeding No. 59 and not exceeding No. 59, 22½ per cent ad valorem; exceeding No. 59 and not exceeding No. 79, 25 per cent ad valorem; exceeding No. 59 and not exceeding No. 79, 25 per cent ad valorem; exceeding No. 79 and not exceeding No. 79, 25 per cent ad valorem; exceeding No. 79 and not exceeding No. 79, 25 per cent ad valorem; exceeding No. 79 and not exceeding No. 79, 25 per cent ad valorem; exceeding No. 79 and not exceeding No. 79, 25 per cent ad valorem; exceeding No. 99, 30 per cent ad valorem;

Mr. SMITH of Georgia. Mr. President, the committee desires to change the amendment in two respects, in line 8 to substitute the word "average" for the word "highest," so the estimate the word "average" for the word inglies, so the estimate will be made by the average number of the yarns instead of the highest, and in line 22 again to substitute the word "average" for the word "highest."

The VICE PRESIDENT. The Secretary will state the pro-

posed amendment to the amendment.

The Secretary. On page 76, line 8, before the word "number," strike out the word "highest" and insert the word "average," and the same on line 22.

The VICE PRESIDENT. If there be no objection, the pro-

posed change will be made.

Mr. LIPPITT. Mr. President, I wish to speak on that sub-ject. I should like to ask the Senator from Georgia if he has figured or has any information upon how much he is reducing the duty upon cotton cloth by the amendments which he now proposes as compared with the duty which that same cloth would pay under the original amendment?

Mr. SMITH of Georgia. Coupled with the amendment suggested, we desire also to amend paragraph 258, by adding in the seventeenth line, after the word "included":

In counting the threads all ply yarns shall be separated into singles and the count taken of the total singles.

The factors of count, length, condition, and weight shall be taken as found in the fabric as imported.

We have had the estimate made to which the Senator refers. We find that in the large majority of the instances, even in the higher class goods, it makes no substantial effect upon the rate. The only goods upon which it affects the rate to any extent are the novelty goods. Later on we expect in connection with the damask paragraph to bring in an amendment, although we may have to pass it over to-day, making a special provision for those novelty cloths. I have quite a lengthy sheet here in which that estimate has been made, which I will be glad to submit to the Senate. The proposed amendment is largely for administrative purposes. It simplifies administration vastly beyond what it is under the present law and also under the pending bill.

Mr. LIPPITT. Mr. President, of course I appreciate the personal compliment which is paid in this amendment. In the remarks which I made to the Senate upon this question I pointed out that, although the method of classifying goods which is contained in the original amendment had been the policy of the

Democratic Party for more than two years, it was an impossibllity of administration. The substitution of the simple word "average" for "highest" is a recognition of the fact that for two years they have been trying to put before this country something which they could not do; and there was no evidence of any change of that policy, if I may go so far as to say it, until I brought it to the attention of this bedy.

But I also pointed out at that time that if they were going to adopt the policy which I suggested, and which is a very simple and a very much more perfect method of classification than the one they originally had, they should also accompany it by a differential between the duties that cloth pays and the duties that yarn pays as compared with the one they have. Between the duties on yarn in the bill reported to the Senate by the Finance Committee there is a difference of 21 per cent in each classification as represented in the chart which hangs against the wall. Where the duty on cloth is 10 per cent on cloth com-

posed of No. 9 to 19, it would be 7½ per cent for yarn, and so on.

It is a matter of great practical difficulty to determine the fineness number of yarn in cloth. It is not a very difficult proposition to discover the average number of yarns in a piece of cloth, but when they classify their goods by the fineness number of which the fabric was made, as is very commonly the case, the yarn of the warp would be No. 35 or 33 and the filling would be No. 42 or 43 or 44, which are very common constructions, the rate of duty on that piece of cloth would be in the gray 20 per cent. Under the amendment which they have now proposed the rate of duty would be 17½ per cent. In other words, by making the amendment in this form and without perfecting it, as I took the liberty of indicating in my speech should be done, they are reducing the duty over the duty that they have proposed to levy.

The occasion and reason for using the average number is because that is simple to administer. In addition to making that average number and taking advantage of that easy administration, which is very proper, they should also increase the differential between cloth and yarn 21 per cent more than now exists. In other words, I am not asking for any more duty than they have proposed, but I do ask that if they adopt one suggestion of mine they will not destroy its effect and purpose by not adopting the companion suggestion that is a necessary

and integral part of it.

As I pointed out, in their method of applying the duty not merely would the duty be raised 2½ per cent, but in some cases, by the presence of a very small amount of fine yarn cloth on which the average duty would not exceed under the now proposed change  $17\frac{1}{2}$  per cent, would pay as high a duty as 25 per I do not think that those cloths are entitled to the change, but I think it is very plain to anybody who will study this question that if they are going to make at this late hour, without adequate study of the question, a change in the plan they have steadily pursued for two years, they at least ought to accompany it with the other changes that will make the rate of duty they propose to pay on cotton cloth the equivalent of what they proposed to this body before they made this change.

Mr. President, I have pointed out here over and over again

that the duties on cotton fabrics are only one-third the duty of their sister industries of silk and wool, and now by putting in

their sister industries of sik and wool, and now by putting in this amendment they propose to reduce those duties another 2½ per cent. That is not a fair way of perfecting a bill.

Mr. SMITH of Georgia. Mr. President, I desire to take issue with the Senator from Rhode Island with reference to the feasibility of determining the highest yarn count. It has been discussed by the Bureau of Standards and fully sustained by them, and also by a number of writers upon textiles in publications on that subject. It seemed, however, scarcely just that a product which might have only 5 per cent of a very high-class yarn and the balance of a low-class yarn should follow the 5 per cent instead of following the average whole. It is conceded by all that the average yarn count is the simplest of all plans. Our officers in the customhouses so believe.

It can be explained, after working out a mathematical problem which is somewhat difficult, that there is a simple and easy formula for applying the test as to the average number of yarns. The officers of the Government have also been at work for some time upon the effect on the rate of taking the average yarn. I furnished the Senator quite a detailed statement made by them on the subject.

It does reduce somewhat the duty, but, Mr. President, the report of the Tariff Board shows that the duties on cotton goods can be reduced and must be reduced very substantially to bring

them to a competitive basis.

It is surprising to find how many of our cotton products are sold at the mills in the United States as cheap as they are in England. The chief benefit perhaps to the public from these reductions will come through a suspension of the system of sales after they leave the mill. So far as the mill owners are concerned, they will be perhaps less effective than they will be upon the trade where trade agreements exist that have carried

the cost to the final consumer at high prices.

Mr. LIPPITT. Mr. President, I should like to ask the Senator if he has submitted this proposed change in its partial form to anybody who could be called a textile expert? In asking that question I do not mean by a textile expert a member of the board at the customhouse. They are not experts in the methods of applying tariff laws that have been written; they are not experts in the sense of knowing about the cost of cotton cloth and textile fabrics or the various changes in cost which come about in changes of fabric. Whom has the Senator consulted?

Mr. SMITH of Georgia. Mr. President, we have not considered it from the standpoint of the cost of conversion, because anyone who examines the report of the Tariff Board must be satisfied that it is practically impossible to handle fairly the subject from that standpoint. The varying cost of production of the same goods in this country at different mills is so great that when we go from the highest cost of production to the cheapest cost of production, the variation is startling. The matter has been considered, however, in connection with the relative selling prices abroad and here, and it has been considered with reference to the character of threads in many of the cloths. The result worked out has been what I submitted to the Senator on the lengthy sheet that I gave him. The work has been done, of course—

Mr. LIPPITT. I will ask the Senator from Georgia if he will tell me whether he has consulted with any experts?

Mr. SMITH of Georgia. I was just going on to state that the work was done for us by representatives of the Government in the customhouse in New York and by the utilization of the reports of the Tariff Board.

Mr. SMOOT. Mr. President, I understood the Senator from Georgia to say that he recognized the fact that the amendment

offered reduces the duties.

Mr. SMITH of Georgia. In some instances.

Mr. SMOOT. Is it not a fact, Mr. President, that in nearly every instance it would reduce the duty about 2½ per cent outside of the first bracket?

Mr. SMITH of Georgia. No; not as the figures were worked out and given to me. Of course, I do not pretend to have any

personal knowledge on the subject.

Mr. SMOOT. Mr. President, of course the Senator knows, if he has had his attention called to it, that most of the cloths are made with the filling of one number and the warp of another number, and when the filling is finer or vice versa, it is to obtain a certain effect or finish upon the clothes. It seems to me, this being true, it will in many cases—I will not say in every case, but at least in a great many cases—bring the cloth, if the amendment offered by the Senator is adopted, to a lower bracket than the provision in paragraph 256 with the word "highest" used. If it does bring it within a lower bracket, then, of course, the Senator from Georgia must admit that it would be 2½ per cent reduction.

Mr. SMITH of Georgia. Of course if it lowers it, it lowers it.
Mr. SMOOT. Mr. President, if the Senator would look it up I
believe he would find by taking the average size of the yarns
in a piece of cloth, in the warp and the filling, that in a majority
of cases this would bring it into a lower bracket than the word
"highest" would bring it under the paragraph as it stands

to-day.

Mr. SMITH of Georgia. As worked out for me by the experts, there are few cases in which it brings it to a lower rate. As to those I took the Tariff Board's report, and as to all except two or three I found the relative selling prices in England and the United States such that I felt that the reduced duty

would only be competitive.

Mr. SMOOT. Mr. President, just take the case the Senator from Rhode Island [Mr. Lippitt] called attention to, which is an ordinary one. The warp of 35s and the filling of 42s—the average of those two would be 38½s. Paragraph 257, as originally reported, would bring the duty based upon a 42 thread within another bracket from ?8½, as the Senator knows. Those are very common numbers used in this country in the manufacture of cotton goods. As I think the Senator has already stated upon the floor, 70 per cent of them fall within this very bracket or the two brackets in which these sizes fall. If that is the case—and I have no doubt but that it is so—the change is going to result in a decreased duty of 2½ per cent on the great bulk of American manufactured goods.

Mr. TOWNSEND. Mr. President, I was interested in one statement made by the Senator from Georgia [Mr. SMITH]

which he did not make entirely clear to me. I have come to the same conclusion that he has from reading the Tariff Beard report, that not only are many cotton goods sold as cheaply abroad as they are here, but that in some cases they are sold cheaper here than they could be manufactured abroad to-day. What I was not clear in was the statement of the Senator as to what benefit he expected would accrue to the American consumer by reducing those duties.

Mr. SMITH of Georgia. I stated that I found from the Tariff Board report that there were many instances in which the real loss to the consumer took place between the factory and the final sale to him; that it was due to trade agreements in this country, which increased the price to the consumer even where the manufacturer here sold at prices that were entirely competitive and in some instances cheaper than those of the English manufacturer, yet that through trade agreements, incident to subsequent sales, the consumer here finally received his goods at a higher price than that at which the consumer received them in England—

Mr. TOWNSEND. I understood that.

Mr. SMITH of Georgia. By bringing competition between the factory abroad and the factory here, the result would be that these trade agreements would be abandoned and the consumer would naturally be relieved of some of the increases now placed upon him.

Mr. TOWNSEND. I can not follow that very clearly myself; but it would indicate to me that there was the very closest kind of competition now between the producers abroad and the producers here if the price here was less than the foreign price, or at least even the cost of the foreign article was less.

Mr. LODGE. Mr. President, I do not care to go into the details, which are very many and very complicated, of this matter, but I do want to call attention to certain general considerations, which I think are very serious, in regard to the arrangement adopted in this bill. I am not now speaking of rates of duty whether low or high, but of the adjustment of the classes. If we are to have duties at all, whether revenue duties or protective duties or duties for any other purpose, they ought to be properly classified and adjusted with relation to the different productions of an industry so very complicated as is the cotton industry.

There can be no question whatever that the coarser weaves are better treated in this bill than the finer weaves. I do not for a moment intend to suggest that that was done intentionally, or with a view of striking at New England or other northern mills which are the chief producers of the fine goods; but there can be no doubt of the fact. I can not suppose that it is intentional, because it would be a short-sighted policy if it be thought that the interests of the makers of coarse goods would be safeguarded by leaving them a sufficient protection and allowing the fine goods to suffer. Of course if the fine-goods mills are compelled to cease the manufacture of fine goods and are forced to go to the manufacture of print cloths, sheetings, and the coarser goods, inevitably an intensity of competition will be created which will drive the domestic coarse goods below the point of profitable production.

point of profitable production.

We had such a situation some years ago when the southern mills and the northern mills alike suffered from the intensity of competition in the same lines of goods. Speaking broadly, that condition, which is certainly not desirable to the industry either North or South, was greatly relieved by the increasing tendency on the part of the longer established mills in the North to devote themselves to the manufacture of fine goods. I think the industry of the finer goods and the manufacture of the finer yarns has been also begun in the South and is developing there. Nothing is more important to a healthy condition of the cotton industry in this country than the greatest possible diversification of their product.

Mr. SMITH of Georgia. Mr. President, will the Senator from Massachusetts allow me?

The PRESIDING OFFICER (Mr. POMERENE in the chair). Does the Senator from Massachusetts yield to the Senator from Georgia?

Mr. LODGE. Certainly.

Mr. SMITH of Georgia. I should like to say that the men engaged in manufacturing the coarser goods who appeared before our committee all came to urge rates for the high-class goods, taking exactly the position the Senator has taken, that their interest in the matter was that the high-class goods should receive a tariff that was satisfactory to them—

Mr. LODGE. Which would encourage their production.

Mr. SMITH of Georgia. And encourage their production. There was no contest before our committee between the producers of the coarser grade goods and the higher grade goods,

so far as I can recall. The low-grade-goods people were as warmly the friends of the high-grade-goods people as they were of themselves.

Mr. LODGE. That was my own conclusion from my own experience; but the fact remains that in the bill— Mr. LODGE.

Mr. SMITH of Georgia. So that whether the goods are high class or low class or are produced in one section or the other the manufacturers, whether of high-grade or low-grade goods, were all more interested in the rates on high-grade goods than they were in the rates on low-grade goods.

Mr. LODGE. I have no question that the manufacturers in all parts of the country, whether they make the coarse goods or the fine goods, take the view of what is best for the industry

as a whole which I have tried to express.

Now, as I have said whether intentionally or not, it seems to me to have been demonstrated-I will not go over the arguments-that the fine weaves have suffered unduly, and that the inevitable tendency of the bill, owing to the maladjustment of the rates among the different classes, will be to bring about an oversupply of the coarse goods, due to the compulsion which it will exercise on many of the fine-goods mills to return in whole or in part to the making of print cloths, plain cloths, or the coarser fabrics, such as sheetings.

I think the fact that the duties are not properly adjusted is a fatal objection to the scheme. I am saying nothing about the rates, whether they are too high or too low; I am simply speaking of the adjustment. On that adjustment rests, in the first place, fairness to the industry, and, in the second place, it prevents the industry from becoming overweighted or one sided along certain lines of production. It is for the interest of the whole industry, in a word, to encourage the fine weaves.

The Tariff Board report has been frequently referred to during the debate, and I want to call attention to their statement that we can make goods here at a lower cost than they can be made in England. That is true of some fabrics, but I do not think attention has been sufficiently paid to precisely what the Tariff Board did say. Here is their report on Schedule I, page 12. The Tariff Board says that the weaving cost of the fabrics produced on automatic looms, which are more common in this country than in England, is no greater here than abroad; but they go on to say:

In the case of finer goods, however, especially figured goods with complicated weaves, the cost of weaving is higher here than in England. This is due largely to the fact that the difference in the number of looms tended per weaver is less than in the case of plain goods. On a large part of these fancy goods (those requiring more than one kind of filling) the automatic loom can not be used. Even disregarding the question of automatic looms, the difference in the number of looms tended per weaver on such fabrics is less than in the case of plain cloths. Consequently the comparatively small difference in output per weaver does not offset the higher wages paid in this country.

That is the statement of the Tariff Roard and I think in sub-

That is the statement of the Tariff Board; and I think in substance that it is correct. The reason why weaving done on the automatic looms reduces the cost of production in the United States is simply because it reduces the labor cost per unit, showing incidentally that the labor cost is the key of the situation in the cotton industry, where labor is a very large part of the cost of the fabric produced. One man can attend to 20 or more of these automatic looms—that is, we have a man multiplied by 20, we will say, by the automatic loom-and as we use a great many more of those looms than they do in England we reduce the labor cost, the labor unit, just that much, because in England, where they do not use them on the coarser goods, a man is multiplied by 6 or 8 by his machinery, and they are putting a man multiplied by 6 or 8 in competition with a man multiplied by 20.

Mr. SMOOT. Mr. President—
The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Utah?

Mr. LODGE. Certainly; with pleasure.

Mr. SMOOT. Not only as to the greater number of looms that can be attended to by one man, but wherever an automatic device is used upon a loom it runs continuously, with the exception of when there is a thread broken in the warp or a break in the filling requiring the stopping of the loom.

Mr. LODGE. Certainly.

Mr. SMOOT. If the automatic device is not on a loom, it must stop to change the shuttle every time a bobbin runs out.

Mr. LODGE. When we come to the finer weaves the automatic loom can not be used, and that, of course, fundamentally changes the whole situation. In the manufacture of the finer weaves our weavers use substantially the same kind of machinery as the English weavers. So the weaver is no longer multiplied by 20 by his machinery, but only by the same amount as the English weaver; and therefore our labor cost immediately rises when you pass from the coarser goods to the finer goods.

The increase in cost is shown by the following extract from the Tariff Board report, Schedule I, page 456. I take their figures. I am not sure that they are right in all respects in regard to cotton; but I will take them, because they have been the basis of so much argument.

The Tariff Board say :

The labor cost of the plain weaves varies from 3.5 cents to slightly over 6.5 cents per pound, constituting from 8 per cent to 21.5 per cent of the total cost. * * * The conversion cost on the same cloths varies from 29.5 per cent to 35.8 per cent of the total cost. * * *

cost. * * *
Treating the three fancy-weave groups as a whole, we find that the labor cost varies from 15.2 cents to 29.3 cents per pound, constituting from 20 per cent to 42.7 per cent of the total cost. The conversion cost forms from 35.7 per cent to 58.6 per cent of the total cost.

That shows clearly, on the authority of the Tariff Board, the immense difference between the fine weaves and the coarse weaves. I do not see how it is possible to have a fair schedule where the arrangement is practically reversed from what it ought to I repeat that I am not arguing the rate. Make your figure what you please on the coarse weaves; but build it up proportionately, so as to give the fine weaves the same chance that the coarse weaves have so far as they are affected by the tariff. That seems to me the fundamental difficulty with this whole schedule, without going into the details.

Mr. SMITH of Georgia. Mr. President

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Georgia?

Mr. LODGE. Certainly; I yield. Mr. SMITH of Georgia. I should like to ask the Senator if he has made a study of the English selling prices of the factories of these finer goods and the American selling prices of the factories, to see whether it is not true, relatively speaking, that the increases provided by this bill about represent the difference in the selling price of the various classes of goods at the factories?

Mr. LODGE. Mr. President, I have not examined those prices. I have at times gone into the cost of distribution with some thoroughness. While I have not the figures here now, I am very sure, broadly speaking, that I am correct when I say that what the Senator states about the cost at the factory in America as compared with the English factory cost applies chiefly to the coarse goods. I do not think it is true of the fine weaves. I think the fine weaves cost more. The factory cost is more, speaking broadly. There may be exceptions; but speaking broadly, I think the fine weaves cost more at the factory.

Mr. SMITH of Georgia. I was not referring to the cost of

production. I was referring to the selling cost of the factory.

Mr. LODGE. Precisely. Let me take a single case about which I think I am correctly informed, though I am speaking

from memory of a year ago.

In the case of the Amoskeag Manufacturing Co. of New Hampshire, the great makers of ginghams, while I have not compared the figures, I have no doubt their gingham costs at the mill are no higher than the costs of the factories making ginghams in England. I think they could probably meet them on that basis. I am speaking only of their coarse goods. But I was told, and I think correctly, by one of the officers of the mills some time ago when the subject was under discussion— I may not have the figures exactly right, but if I am very far wrong the Senator from Rhode Island will correct me—that they sold their ginghams in the neighborhood of 3½ cents a yard, and by the time they went over the counter in department stores, dry-goods stores, and so forth, some of them had climbed up to 9 or 10 or 12 cents a yard. There is not any question the monstrous additions that are made to the factory costs. In the past, in the debate on the Payne-Aldrich bill, we tried to show that it was not the manufacturers' cost from which the people were suffering, because the cost at the factory was in many cases very low; but to it there were added these huge costs of distribution, which present another problem. I am aware of that; but I am very sure, speaking broadly, that the fine weaves made in America can not be sold at the factory door or anywhere else in competition with the English fine weaves without some protection or without some duty favorable to the American

I will frankly say that, of course, I have a great interest in this particular matter of fine goods. Their manufacture has grown enormously in my State within a comparatively short time. The great city of New Bedford, which now has 100,000 inhabitants, has been built up on the fine-goods industry. It is, therefore, a very serious matter, in the interest of the business of my State, to have such a change made—I do not mean in the rates, but a change of classification-which, I believe, would be fatal to many of the establishments.

I am not sure as to the exceptions made in fancy weaves. Unfortunately I am so little of a practical man on the question

of cotton spinning that I am not sure I am right when I say that I find only one exception. There may be some other smaller ones on the Jacquard tapestries that have been put in by the Senate committee, but the only exception I find is the cotton damasks. I think the others are all treated in the general schedule.

Mr. SMITH of Georgia. Mr. President—
The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Georgia?

Mr. LODGE. Certainly.

Mr. SMITH of Georgia. The Senator probably was not in the Chamber when I stated that the committee desired to add to the cotton-damask schedule a provision including certain classes of novelties, but we are not prepared to present it this morning. When that paragraph is reached we wish to pass over it. Upon examining some of those novelty cloths we found they have a small proportion of very fine threads, perhaps a fourth of very fine yarns or threads, and a large proportion of very coarse threads, and we thought they ought to be classed by themselves. We have in view a classification for novelty cloths which we are not prepared to submit this morning; so that when we reach the damask paragraph we shall ask to

I desire to add that I have prepared a statement showing a large number of producers of table damask or towel damask. Towel damask, just in the next paragraph, will take the same 25 per cent rate. I should have regretted it if we had been in the attitude of bringing in a measure that took care of a single industry, even if it was by inadvertence. It certainly would have been by inadvertence if we had done so, but I should have regretted the inadvertence. Table damask always

has been classed by itself.

When we reach that paragraph I will give the Senate a list of a large number of firms, both in Philadelphia and in Massachusetts, that produce damask. I am glad to say that my investigation has relieved us of what would have been an embarrassment, through inadvertence, if the Senator's suggestion, made a few days ago, had been correct, that this bill singled out cotton table damask made by one firm only for a special

rate of duty.

Mr. LODGE. I am very glad the committee is considering a reclassification of what are known as the fancy weaves and novelties. I really think it is only just that they should be classed together, and not that one division should be set off by

itself.

Mr. LIPPITT. Mr. President—
The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Rhode Island?

Mr. LODGE. Certainly.

Mr. LIPPITT. The Senator from Georgia has suggested that he is going to bring in some other changes in this schedule. The change which he has brought in this morning, and which we are now discussing, is a very radical change. I understand he has other changes that are also very radical. It seems to me under the circumstances that it would be a very wise thing for the Senators in charge of the bill to withdraw this paragraph until such time as they can present it to us with at least a day's notice of the radical revisions they are making, so that we may have a reasonable time in which to consider them. The changes about which the Senator is talking go to the root of the whole matter. They can not be discussed here offhand without consideration and without warning.

Two years have been spent on this bill, and particularly on the

cotton schedule. Now, at the very last moment, when the Senators in charge of the schedule are going to urge us to take a vote perhaps within an hour or two, they come in and propose radical changes to it. Mr. President, that is not the way to put before this body a matter of such importance as this paragraph. I think it only reasonable that the whole thing shall be passed over until it can be reported to the Senate at least with a day or two of notice of what is going to be proposed.

Mr. LODGE. Mr. President, although I think it would have been better if we could have had them all to consider beforehand, I am not disposed to find fault with any method which has resulted so far in what seems to me very marked improve-But when the Senator from Rhode Island says this schedule has been under consideration for two years, I wish to say that I think it has been under intelligent consideration for only about two months, or perhaps two weeks; certainly not more than two months. I will go further than that, and say only since the day it went before the subcommittee of the Finance Committee. However I may differ from the members of that subcommittee in some of their conclusions, I have no hesitation in saying that I know they made every effort to inform themselves in regard to this schedule. While I never had

occasion to go before them about anything, I know they made every effort to inform themselves about it and to try to deal intelligently with it. In the case of the earlier efforts to which the Senator refers, which came to us from the House, dealing with the cotton schedule alone, intelligence was conspicuous chiefly by its absence.

In view of the changes which the Senator from Georgia predicts, I shall not say anything more at this time in regard to the matter of the fancy weaves or novelties, but shall wait until I learn what is proposed along that line.

Mr. SMITH of Georgia. I will state the proposed change. Mr. LODGE. The Senator said he was going to ask to have that clause passed over.

Mr. SMITH of Georgia. I will read the amendment that I hope to propose later to the paragraph dealing with damasks or

Cotton cloth composed of threads or plied yarns made of singles of different numbers.

We are still considering whether or not that is a proper definition of the cloth intended to be covered.

Mr. LIPPITT. Mr. President, will the Senator kindly read that again?

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Rhode Island?

Mr. LODGE. Mr. President, if I may make a suggestion, I do not wish to hold the floor indefinitely; but if this clause is to

be passed over Mr. SMITH of Georgia. Yes; that clause will be passed over, Mr. LODGE. The amendment which the subcommittee de-

cides upon, I think, ought to be printed, so that the Senate can see it for a day before it is taken up. In the meantime the clause which the Senator has just read as a tentative amendment will be printed in the RECORD to-morrow, so that we can examine it then.

Mr. SMITH of Georgia and Mr. SMOOT addressed the Chair, The PRESIDING OFFICER. Does the Senator from Massa-

chusetts yield, and to whom?

Mr. LODGE. Certainly; I yield to the Senator from Georgia, Mr. SMITH of Georgia. I stated that when the damask paragraph was reached we intended to ask to have it passed over. We hope to dispose of the balance of the schedule but to leave that paragraph undisposed of. I stated at the time that we probably should bring in an amendment of the character I read a few moments ago.

Mr. LA FOLLETTE. Mr. President, will the Senator kindly

repeat the language he has just read?
Mr. SMITH of Georgia. Yes; I will read it in a moment. The difficulty about the matter, so far as our labor upon it is concerned, has been to reach a description—to put into words something that would cover the particular class of goods in-tended to be covered and not also cover a good deal else that we did not intend to cover. Two or three times we have worked out a description and then have found that we were also describing something else that ought not to have been covered. The duty that we contemplated would have put the goods in a position where there would have been no competition at all from abroad.

The language which we have in view is:

Cotton cloth composed of threads or plied yarns made of singles of

We contemplate adding that to the paragraph dealing with

table damask cloths, with a duty of 25 per cent.
Mr. LIPPITT. Exactly where would it come in?
Mr. SMITH of Georgia. It would just be added to the paragraph dealing with damask cloths. The damask paragraph puts a duty of 25 per cent on table damask. What we were contemplating was to add this description of these novelty cloths, with 25 per cent duty.

Mr. SMOOT. Mr. President-

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Utah?

Mr. LODGE. Yes; I yield to the Senator from Utah. Mr. SMOOT. I wish to call the Senator's attention to paragraph 257, the one now under consideration, if it is contemplated adding those words to the damask paragraph, because in paragraph 257, on line 7, he uses the words "woven figured," and on lines 21 and 22 he also uses the words "woven figured." Does not the Senator think "woven figured" should be stricken from this paragraph if he is going to add those words to the damask paragraph?

Mr. SMITH of Georgia. No; because it applies to other goods besides these. These are not the only woven figures, and these woven figures should remain with the  $2\frac{1}{2}$  per cent duty as to woven-figured goods generally. In the damask paragraph, if we carry out our present view upon further studying the subject, we will impose a specific duty upon a particular class of novelty The work is largely done on the thread. The thread itself, as shown by the Senator from Rhode Island, has the novelty attached to it. I think the Senator from Rhode Island had here a little package of the threads and presented them to the Senate. They are largely made from that class of thread, as I understand.

Mr. SMOOT. Of course, I do not quite catch the full meaning of the amendment suggested, and therefore I will wait to see it

Mr. LODGE. Mr. President, in regard to this matter of the yarns I believe it is a mistake administratively to abandon the count of the threads per square inch and come to the number of the yarns in the fabric as the test for the imposition of a There must be a necessary uncertainty if you base it on the number of the yarns. The Senator from Rhode Island [Mr. LIPPITT] has shown to the Senate the imperfection and the uncertainties in determining the number of the yarns even when done by the Bureau of Standards. But the average customhouse inspector, without all the means and appliances which the Bureau of Standards possesses, on looking at a piece of cotton cloth, of course with a microscope, and telling the number of the yarns from looking at it, it is impossible that he should come within three or four numbers of the correct number, except by luck or guess. It is an uncertain way of determining the value of the goods on which the duty is to be levied. It is certain to lead to undervaluation and to the escape of the importer from the payment of the duties which the law intends to collect.

Mr. President, if we must have the number of the yarns as the basis of the duty, I think it is a great advance to adopt the amendment proposed by the Senator from Georgia to-day to make it the average number in a piece of cloth instead of the highest, as was the former test. But if the addition that is proposed by the Senator from Rhode Island is not made, when that perfecting amendment is adopted, the result will be a reduction in the duty which the committee have decided to be fair, and they are not likely to have erred on the side of lenity. They have fixed a certain rate of duty. Now, they put in a desirable amendment, and without a further provision the effect of that desirable amendment, as I understand it, will be to lower the duties through these schedules, without any intention on their own part of lowering the duties, as I understand it.

I really think the committee ought to take that into consideration; when they change from highest to average they ought to make such additional amendment as is necessary in order to secure the rate of duty which they have themselves reported as

proper to be imposed.

Now, Mr. President, I pass to another point. I do not suppose my protest will have the slightest effect, but I want to make it. You will find in the bill, on page 76, line 21, and so forth, "cotton cloths, when bleached, dyed, colored," and so on. There are Senators who know-and if I blunder they will correct me-but I understand there is a much wider gap between the bleached and dyed, and so forth, than there is between the gray cotton cloth and the bleached. Am I wrong?

Mr. LIPPITT. No. Mr. LODGE. In a brief presented to the committee it is stated that the number of operations in a cotton-printing establishment is about 23—that is, in the print works. Of these 23 operations only 6 appear in the process of bleached goods. That is, up to the point of producing the bleached goods there are 6 processes and there are 17 that follow in order to produce the dyed and printed fabric. Yet bleached goods are given the same rates as all these other goods, dyed, colored, stained, painted, printed, woven, figured, or mercerized. It can not be right to put bleached goods on the same plane with the others.

Mr. SMITH of Georgia. The only difference would be in the ad valorem. The difference would have to depend on the rela-

tive value of the goods. That is where it leads to.

Mr. LODGE. I understand the ad valorem, but unfortunately I do not think it will quite work out in that way. I think there ought to be a distinction drawn and they should not be given the same rate. The dyed, colored, stained, painted, printed, figured, woven, or mercerized should be put together. There is no fault to find with that. But I think the bleached should be separated from them and separated from the gray cloth in order to make a proper adjustment between the different processes.

I reiterate what I have said many times. I am not now contesting the rates at all. You make the rates too low, in my judgment; but whether you make them-low or high I want them to be adjusted so that they will be fair to all the different grades

of manufacture.

Mr. SMOOT. Mr. President-

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Utah?

Mr. LODGE. Certainly. In fact, Mr. President, I yield the floor, for I have concluded all that I desired to say. What I have said is mostly in the way of protest against what I think are mistakes in the framing of the bill in the administrative I am very glad to hear that there are to be even some slight improvements. I will not say slight, for if properly arranged they will be very important improvements. If the Senator will unite with his average number some provision that will prevent that average number from making a general reduction of all the rates, I think it would be a very great improvement upon the bill. I think he is contemplating a very great improvement administratively and in every other way by the change which he suggested in the cotton damask schedule. sincerely hope those changes will be made.

Mr. SMOOT. I was simply going to call the Senator's attention to a further fact in connection with the statement he has just made. Where the cloths are dyed they are dyed with col-

ors carrying a rate of duty of 30 per cent.

Mr. LODGE. Certainly, and the bleached—
Mr. SMOOT. I am only speaking of dyed cloths now. Of course, printed and mercerized-

Mr. LODGE. Bleached cloths, obviously, do not have to bear

that expense.

Mr. SMOOT. In the low numbers of cloths dyed a rate is provided of only 10 per cent ad valorem. The Senator's objection is a protest against putting the bleached cloth at the same rate as the dyed cloth, while the dye that is used for the dyeing of the cloth carries a rate of 30 per cent.

Mr. LODGE. It is an incitement to bring in the dyed cloth. Mr. SMITH of Georgia. A large part of the dyes are put on

the free list.

Mr. SMOOT. All that are put on the free list are the alizarins and indigoes. All the coal-tar dyes that are imported into this country carry a rate of duty of 30 per cent.

Mr. SMITH of Georgia. All vat dyes are put on the free

list.

Mr. SMOOT. The Senator can not say that alizarin is a vat dye.

Mr. SMITH of Georgia. It is so classified in the trade.

Mr. SMOOT. Alizarins are used in dyeing cloth in the same way as coal-tar dyes, whether they be brown, red, scarlet, or any other color.

Mr. SMITH of Georgia. But the dyes that are used, I understand, in the finest goods are the dyes that we put on the

The sulphur dyes are not on the free list.

Mr. SMOOT. What does the Senator mean by sulphur dyes? Mr. SMITH of Georgia. I am not sure that I know beyond the fact that the classes of people who make the cheaper goods in addressing us said that we left their dyes taxed and the tariff is the lowest on their goods and the dyes used for the finer goods we put on the free list. I am repeating the statement some-what like a parrot, as it has been presented to me in communications and discussions of the subject, because I know nothing about it from the standpoint of being inside of a factory and seeing the work performed.

Mr. SMOOT. The very finest color and the most delicate shade of cloths are dyed from coal-tar dyes provided for in paragraph 21 of the bill carrying a rate of 30 per cent. It is true that alizarin and colors obtained from alizarin are on the free list. So is indigo on the free list. The reason why indigo was put on the free list was because it is used in the cotton mills of the South in dyeing denims. The fine cloths are dyed generally with coal-tar dyes enumerated in paragraph 21.

Mr. GALLINGER. Mr. President, the interest that I have felt in this schedule and the inquiries that I have made concerning it have led me to the conclusion that no subcommittee of the Democratic side gave more patient and intelligent consideration to the problems they had in hand than the subcommittee on this schedule. It gives me pleasure to publicly express my appreciation of the industry, the courtesy, and the intelligence the Senator from Georgia [Mr. SMITH] brought to the consideration of these problems. I realize how difficult it would have been for me, with a much longer legislative experience than the Senator from Georgia has had, to be able to master even to any considerable extent the rates and the classifications that are required to reach fair and just conclusions.

I think I am safe in saying that the Senator from Georgia appreciates to-day, as he did not when he took up this question, the great difficulties he had to contend with, and I think I am justified in saying now what a distinguished Democratic Senator suggested to me, that a very much abused former Member of this body, a Republican, deserves great credit for the grasp he had of these difficult and perplexing problems.

There is trouble more or less in adjusting fairly matters connected with the paragraph now under consideration. I wish to say that when we reach paragraph 267 I will want to call the attention of the Senator from Georgia to what I think are some very serious mistakes in that paragraph.

Mr. JOHNSON. Mr. President-

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Maine?

Mr. GALLINGER. I do. Mr. JOHNSON. The Senator refers to the industry in Keene, N. H.?

Mr. GALLINGER. Yes; and also in Barnstead, N. H.

Mr. JOHNSON. We have it under consideration.
Mr. GALLINGER. I am glad to know that. I have correspondence and I have samples. I do not want to use a single unnecessary moment now in discussing even this schedule, because I am anxious that this bill will be proceeded with as rapidly as possible; but I was going, when that paragraph was reached, to ask the subcommittee if they would not take what I have in my possession and give fresh consideration to the paragraph, because I feel sure that unintentionally an injustice has been done to one phase of that manufacture.

In view of that, Mr. President, I want to ask the Senator from Georgia, inasmuch as he proposes changes in the paragraph now under consideration, if it might not be well to pass over, perhaps not all the schedule but all controverted paragraphs, so that the subcommittee could give a little further attention to them, and come in here very likely with propositions that would meet the acquiescence of us all. I do not want to be factious or obstructive, or to undertake to force my individual views upon the other side, which I know would be futile, but I think probably we would make more speed if the committee would pursue that course rather than ask us to

vote upon these matters at the present time.

Mr. SMITH of Georgia. The only change, Mr. President, I believe, in the paragraph under consideration is the one I have When we reach the damask paragraph we wish to attach, if we can, certain specialties with a specific rate, and for the present I will ask to have it passed. I believe to have the balance out of the way will make it easier for us to work on the damask paragraph. The other changes that we make are not material. When we reach the final paragraph we will ask to restore the words "whether composed in part of," which are stricken out. These changes are very simple. The important additions we will probably make will be on damask. I should like very much to get rid of the balance of the schedule and save that one paragraph for our special study.

Mr. PENROSE. Mr. President, I introduced an amendment this morning to the hosiery paragraph, concerning which I should like to make a few explanations to the Senate. I will not have my data ready until to morrow, and I would ask the Senator from Georgia to kindly pass over the hosiery paragraph, as I shall be out of the Chamber when it is reached.

Mr. SMITH of Georgia. When we reach the hosiery para-

graph I will do so.

Mr. PENROSE. I will be prepared to go on with it to-morrow.

Mr. SMITH of Georgia. I am perfectly willing to pass it over to-day

I wish to ask the Senator from Georgia if the specialties which he refers to as those which they have under consideration in the damask paragraph are the products of the Jacquard loom?

Mr. SMITH of Georgia. I think the work is done on the

threads before they are woven.

Mr. LIPPITT. Mr. President, I must confess that the situation in which this paragraph is now left is one that gives me perplexity. I had given it some consideration, and I thought was prepared to discuss it in some way, but the changes that have been suddenly made here are revolutionary. the damask paragraph, I have an amendment, which I proposed yesterday, which I had intended to offer for the consideration of the Senate. Whether I do it or not in the form in which I proposed it depends upon what is done with some of these other things.

It is so evident to my mind that the difficulties and, if I may say so, the inconsistencies of this cotton schedule as it has been drawn up and presented to the Senate have appeared so plainly to the minds of the gentlemen particularly in charge of it that I do feel it would be very much fairer for everyone if the committee would take the whole thing under consideration, digest it, and bring in to us here for our consideration and discussion a settled policy. How can anybody undertake to discuss intelligently a long and intricate schedule like this, the component parts of which overlap and interlock each other in many different ways, when we are told they think they are going to change it in this way and perhaps may be changed in some other ways. Of course the gentlemen on the other side have the power way? Of course the gentlemen on the other side have the power to go ahead with it as they think it wise, but the situation

seems to have reached a point where I should think it needed

further digestion.

The PRESIDING OFFICER (Mr. CHILTON in the chair). The question is on the amendment of the Senator from Georgia to the amendment of the committee.

Mr. GALLINGER. Let it be stated, Mr. President.

The PRESIDING OFFICER. The amendment will be stated.

The Secretary. On page 7, line 8, strike out "highest" and insert "average," and in line 22 strike out "highest" and insert "average."

Mr. LIPPITT. Before that question is put I should like to ask the Senator from Georgia whether among the other changes there is any possibility of his also changing the differential between yarn and cloth, as has been suggested here. It would make all the difference in the world as to how we should vote on this amendment. If the differential is to be taken under consideration and possibly changed, I should vote for this amendment. If there is to be no change in the differential, I think it is a very unjust amendment.

Mr. SMITH of Georgia. It is not our purpose to change the differential. The differential stands at 2½, the difference be-

tween the cloth and the yarn.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question recurs on agreeing to the amendment of the committee as amended.

Mr. LIPPITT. I have an amendment which I have offered to paragraph 268, which includes the amending of paragraph 57 by striking out the words "woven-figured."
The PRESIDING OFFICER. Does the Senator offer that

amendment now?

Mr. LIPPITT. I was going to offer it when we came to paragraph 268. I presume I will not find myself in any parliamentary difficulty if it is left until that time?

The PRESIDING OFFICER. The Chair should think not. Mr. LIPPITT. I would prefer to leave the amendment until we get further along in the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee as amended.

The amendment as amended was agreed to.

The next amendment of the Committee on Finance was, in paragraph 258, page 77, line 12, after the word "piece," to strike out "or cut in lengths," so as to make the paragraph read:

258. The term cotton cloth, or cloth, wherever used in the paragraphs of this section, unless otherwise specially provided for, shall be held to include all woven fabrics of cotton, in the piece, whether figured, fancy, or plain, and shall not include any article, finished or unfinished, made from cotton cloth. In the ascertainment of the condition of the cloth or yarn upon which the duties imposed upon cotton cloth are made to depend, the entire fabric and all parts theref shall be included. The number of the yarn in cotton cloth herein provided for shall be ascertained under regulations to be prescribed by the Secretary of the Treasury.

The amendment was agreed to.

The Secretary. In this paragraph, after the word "included," page 77, line 17, the Senator from Georgia offers an amendment.

Mr. SMITH of Georgia. It is a committee amendment.

The Secretary. It is proposed to insert:

In counting the threads all ply yarns shall be separated into singles and the count taken of the total singles.

The factors of count, length, condition, and weight shall be taken as found in the fabric as imported.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. LIPPITT. Does that mean that a thread that is weighted shall be weighed without any attempt to remove the weighting material from the thread? I do not know whether the Senator is aware to what an extent in the manufacture of cotton cloth, in England particularly, weighted materials are used. They are very uncommon in this country, but it is usual in the South American trade and in the trade in other parts of the world. The English cloth is frequently weighted to the extent, I am told, of 20 and 25 per cent. By "weighted" I mean that mate-

rial other than cotton is used to produce the weight.

I know that not long ago some people in New England sent a representative to South America to investigate the possibilities of an export trade with those countries. The gentleman who went was a very efficient expert in the business. He spent two or three months in a careful examination of the situation, and his report was that unless the people in New England were prepared to weight their goods artificially they would have no chance in competing with the English products in those countries. There are some cases-I am very sorry I have not the samples here; I have some over at my office-in which the goods are filled with materials so that while the weight of the thread as it actually appears in the cloth might be No. 30 thread, it would easily be as coarse, perhaps, as No. 20. I think

the customary way in all such cases is simply to wash or boil the fabric a little, so that any extraneous material may be removed. I think the gentlemen who are familiar with the customhouse could explain that to the Senator in such a way that he would see the point and not insist on an amendment that would prevent manifestly foreign material from being removed from the cloth before the size of the thread was determined.

Mr. SMITH of Georgia. Mr. President, I will ask to pass over that paragraph for the present.

The PRESIDING OFFICER. Without objection, the para-

graph will be passed over.

Mr. SMITH of Georgia. I will say to the Senator and to the Senate that the object of that provision was to facilitate the measurement of the average thread so that an inch of cloth or more than an inch of cloth which was to be measured could be handled without separating the thread.

The suggestion of the Senator that the boiling process, or the process which could be had without unraveling the thread to make a complete removal of the foreign matter, is one that we may wish to take under consideration. There was no purpose intentionally to add the weight, but to facilitate the measurement by space without unraveling.

Mr. LIPPITT. I presumed that was the case.
Mr. SMITH of Georgia. I think it very probable that a slight addition will obviate that trouble. I ask that that para-

Mr. BRANDEGEE. Mr. President, is that paragraph 258? The PRESIDING OFFICER. That is passed over.

Mr. BRANDEGEE. Is that the paragraph that has just been passed over?

The PRESIDING OFFICER. Yes; it is passed over for the time being.

Mr. BRANDEGEE. That was what I meant by the phrase " passed over." passed over." It was not passed or adopted by the Senate? Mr. SMITH of Georgia. No; the paragraph just passed over

is paragraph 258—the definition of cloth.

Mr. BRANDEGEE. That is what I thought. In connection with that, if the paragraph is not going to be considered at this time, I want to ask the Senator what is the effect of changing the language in line 10, on page 77, from the language of the old law, which was "in the paragraphs of this schedule," while in the proposed law the language is "in the paragraphs of this section"? This paragraph reads:

The term cotton cloth, or cloth, wherever used in the paragraphs of this section, unless otherwise specially provided for, shall be held to include all woven fabrics of cotton.

Mr. SMITH of Georgia. I thank the Senator from Connecticut for the suggestion. I think that should be "this schedule." As we have passed over the paragraph, I will look into it. In a number of instances we found it necessary to correct language of that sort.

Mr. BRANDEGEE. As I looked at it at first blush, if that language stands it would lead to utter absurdity, because it would result in cloth, which might be woolen cloth, spoken of in this section, which is the dutiable list, being classified as

Mr. SMITH of Georgia. I think the word should be "schedule" instead of "section."

Mr. BRANDEGEE. I think so.

Mr. SMITH of Georgia. But I will look at it, as we shall return to this naragraph.

The reading of the bill was resumed.

The reading of the bill was resided.

The next amendment of the Committee on Finance was, in paragraph 259, page 78, line 2, after the word "fiber," to strike out "whether composed in part of" and to insert "or of which cotton or other vegetable fiber is the component material of chief value or of cotton or other vegetable fiber and," and in line 5, after the word "rubber," to strike out "or otherwise," so as to make the paragraph read:

259. Cloth composed of cotton or other vegetable fiber and silk, whether known as silk-striped sleeve linings, silk stripes, or otherwise, of which cotton or other vegetable fiber is the component material of chief value, and tracing cloth, 30 per cent ad valorem; cotton cloth filled or coated, all olicloths (except silk olicloths and olicloths for floors), and cotton window hollands, 25 per cent ad valorem; waterproof cloth composed of cotton or other vegetable fiber, or of which cotton or other vegetable fiber is the component material of chief value or of cotton or other vegetable fiber and india rubber, 25 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 260, page 78, line 7, after the word "section," to strike out "whether in the piece or otherwise and," and in line 8, after the word "unfinished," to insert "not hemmed, 25 per cent ad valorem; hemmed, or

hemstitched," so as to make the paragraph read:
260. Handkerchiefs or mufflers composed of cotton, not specially provided for in this section, whether finished or unfinished, not hemmed, 25 per cent ad valorem; hemmed, or hemstitched, 30 per cent ad valorem.

The PRESIDING OFFICER. The question is on the amendment proposed by the committee.

Mr. SMOOT. Mr. President, I hardly understand the reason of that change. Can the Senator from Georgia explain why that change was made?

Mr. SMITH of Georgia. Does the Senator refer to striking out the words "whether in the piece or otherwise and"?
Mr. SMOOT. Yes; and inserting the words "not hemmed,

25 per cent ad valorem."

Mr. SMITH of Georgia. The object was to make a difference in the duty between hemmed handkerchiefs and mufflers, which go into a higher class, and the ordinary handkerchiefs, which fall in the cheaper class. We thought that on the cheaper handkerchief 25 per cent was an ample duty, and that that difference should exist between the two.

Mr. SMOOT. That is true so far as the handkerchief is concerned, but my question to the Senator was in reference to the original paragraph which reads "whether in the piece or otherwise," while the paragraph as proposed to be amended reads:

260. Handkerchiefs or muffers composed of cotton, not specially provided for in this section, whether finished or unfinished.

Does that mean that a dozen or more of handkerchiefs could not enter in the piece?

Mr. SMITH of Georgia. It was to avoid any confusion in regard to cloth coming in in bolts of handkerchief cloth.

Mr. SMOOT. What I am trying to get at now is to ascertain whether you have not changed the law and allowed that very thing. Let me call the Senator's attention again to the language. It now reads:

Handkerchiefs or mufflers composed of cotton, not specially provided for in this section, whether finished or unfinished.

Mr. SMITH of Georgia. It is the handkerchief itself, whether finished or unfinished.

Mr. SMOOT. It is the handkerchief or muffler whether it is finished or unfinished. Will not that allow the handkerchief to be imported in the bolt or piece—a piece of goods that could be cut up into handkerchiefs?

Mr. SMITH of Georgia. I do not think so. I think that would fall under the ordinary cloth duty, and the words "fin-ished or unfinished" refer to hemmed or not hemmed.

If that were the case, it would be an unfin-Mr. SMOOT. ished handkerchief.

Mr. SMITH of Georgia. The unhemmed handkerchief would be cut up into handkerchiefs.

Mr. SMOOT. Hemmed is another step in the progress of the finishing of the handkerchief. You provide "not hemmed, 25 per cent ad valorem"; and if the handkerchiefs are hemmed or hemstitched you provide a duty of 30 per cent ad valorem. Mr. SMITH of Georgia. Well, the paragraph applies to them finished or unfinished; but when not hemmed the duty is 25

per cent, and when hemmed it is 30 per cent.

Mr. SMOOT. Of course I can see, Mr. President, what the original paragraph meant; that is, that handkerchiefs or mufflers coming into this country, whether in the piece or other-

Mr. SMITH of Georgia. In the piece or in the bolt.

Mr. SMOOT. Certainly-whether they are in the piece or in the bolt or come in in any other form.

Mr. LIPPITT. Will the Senator from Utah yield to me?

Mr. SMOOT. Certainly.

Mr. LIPPITT. The language "whether in the piece or otherwise" does not mean in the piece or in the bolt, but means in

the piece or cut, or cut into small lengths. The term "length" is usually considered synonymous with "piece."

Mr. SMOOT. I understand the word "piece" to mean an individual handkerchief, one piece; but, in the broad sense, I suppose the Senator from Rhode Island is correct in saying that "piece" means "bolt," otherwise it might be construed to cover a bolt that might be cut into single handkerchiefs.

Mr. SMITH of Georgia. The paragraph as we have it, as I

understand, applies to handkerchiefs cut.

Mr. SMOOT. In the way the paragraph stands, it will apply

to them anyway; it will apply to handkerchie's in the bolt or in the piece, and I do not believe it will make any difference in

the meaning of the paragraph by making the proposed change.
While I am on this subject, Mr. President, I will ask, Does
the Senator believe that the 5 per cent differential between the
cloth itself and the hemstitched handkerchief is sufficient?

Mr. SMITH of Georgia. We found them just the same in the House bill, and we made a difference of 5 per cent.
Mr. SMOOT. You found them?

Mr. SMITH of Georgia. Yes; we found a duty of 30 per cent on each, and we reduced the unhemmed 5 per cent, so as to make a difference in the rate of duty between the hemmed and unhemmed handkerchiefs.

Mr. SMOOT. I am not talking about the unhemmed hand-kerchief. I am talking about the hemstitched handkerchief. The cloth which comes into this country, out of which hemstitched handkerchiefs are made, under the Senate amendment carries a rate of 25 per cent ad valorem. You have retained upon hemmed handkerchiefs the House duty. The most highly finished handkerchiefs, those hemstitched, you only provide 30 per cent on the handkerchiefs made from the same cloth.

Mr. SMITH of Georgia. We thought 5 per cent was a proper difference to be provided for in the bill, it having come to us

from the House with no difference between them at all.

Mr. SMOOT. That evidently, as the Senator himself admits, was an error. There is not any question about that.

Mr. SMITH of Georgia. If we had not thought we were im-

proving the bill by the change we would not have made the change.

Mr. SMOOT. Mr. President, the committee have not increased the duty on the hemstitched handkerchief; they leave the hemstitched handkerchief just as it was provided for in the House bill, but they did on the unhemmed handkerchief reduce the duty from 30 to 25 per cent; or, in other words, the unhemmed handkerchief that is made from Irish linen-and the cloth is not made in this country-carries exactly the same rate as the cloth itself, while in the highly finished hemstitched handkerchiefs there is only a 5 per cent differential allowed, which every manufacturer of those goods in this country asserts is not sufficient to equalize the difference in cost between making the handkerchief in Ireland and making it in this coun-The case would be a little different if the cloth were made in this country; but it is not made here, nor can it be made here. Therefore, Mr. President, it seems to me that we shall at least partially sacrifice this business upon the higher and the finer grades of hemstitched handkerchiefs.

I am not, however, going to offer an amendment. I simply

call the attention of the Senator to these facts.

The PRESIDING OFFICER (Mr. Hollis in the chair). The question is on agreeing to the amendment of the Committee on Finance in paragraph 260, which has been stated.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 261, page 78, line 14, after the word "value," to insert "or of cotton or other vegetable fiber and india rubber."

The amendment was agreed to.

The next amendment was, in paragraph 261, page 78, line 18, after the words "ad valorem," to insert:

All of the foregoing when composed of cotton in combination with flax, hemp, or ramie, or of cotton with flax, hemp, or ramie and india rubber, 35 per cent ad valorem.

Mr. SMOOT. Mr. President, I desire to read that before we pass upon it to see if I understand it properly. I was wondering if the amendment will not conflict with another portion of the paragraph. The Senator will see that the paragraph begins:

Clothing, ready-made, and articles of wearing apparel of every description, composed of cotton or other vegetable fiber-

Now note-

or of which cotton or other vegetable fiber is the component material of chief value.

That clothing may be made from a vegetable fiber of which cotton is the component material of chief value and the balance of the component part of that cloth may be rubber or hemp or ramie; and if so, under the first part of this paragraph it will carry a duty of 30 per cent ad valorem.

The committee proposes an amendment, beginning in line 18, after the words "ad valorem," rending:

All of the foregoing when composed of cotton in combination with flax, hemp, or ramie, or of cotton with flax, hemp, or ramie and india rubber, 35 per cent ad valorem.

Under the first part of the paragraph clothing made in combination with flax or made in combination with hemp or ramie or with india rubber would carry 30 per cent, whereas under the second part of the paragraph if the cloth is composed of cotton in combination with the enumerated articles it would carry a duty of 35 per cent.

When a raincoat, for instance, enters this country and the customhouse officer examines it and finds that the component material of chief value in it is cotton and, therefore, that it falls under paragraph 261, what is he going to do? Is he going to assess it at 30 per cent under the first provision in the paragraph or is he going to assess it at 35 per cent under the second provision?

Mr. GALLINGER. Mr. President—
Mr. SMITH of Georgia. It would bear the rate named—35
per cent—if made in combination with flax, hemp, or ramie.

Mr. SMOOT. But the first part of the paragraph is just as specific, because it provides that if-

composed of cotton or other vegetable fiber, or of which cotton or other vegetable fiber is the component material of chief value, or of cotton or other vegetable fiber and india rubber—

It shall bear a duty of 30 per cent.

Mr. GALLINGER, Mr. President—
The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from New Hampshire?

Mr. SMOOT. Certainly; I yield to the Senator. Mr. GALLINGER. Mr. President, it is so refreshing to find an increase of duty proposed in this bill that I hope the Senator from Utah will not make any trouble about it. For my part I am very glad to see the increased rate, and even though there may be a little conflict, why not let it go?

Mr. SMOOT. Mr. President, I am not worried about the increase, but I do not want the manufacturers of this country to think that they are going to get 35 per cent duty when they are not going to get it, because under the first provision of the paragraph the very items which it is subsequently provided shall carry 35 per cent will come in at 30 per cent.

Mr. GALLINGER. Mr. President, the Senator from Utah must know that there are pleasures in anticipation. Let the manufacturers imagine that they are going to get a little addi-

tional duty and learn afterwards that they are not.

Mr. SMITH of Georgia. We are now assured that there are fibers besides the three named that are used with cotton. The first portion applies to fibers other than those subsequently specifically named, and was so intended. It was left there because we were told by officers of the Government that there were a number of other fibers besides the three named which are united with cotton and come in in that way. Cotton in combination with the fibers specifically named will carry a duty of 35 per cent, and the first part of the paragraph providing a duty of 30 per cent will apply to other fibers.

Mr. SMOOT. The trouble with that is that in the first part of the paragraph there is a specific provision put there by an amendment of the Finance Committee of the Senate covering "cotton or other vegetable fiber and india rubber"; and in the second part of the paragraph is inserted the words, "or ramie

and india rubber."

Mr. President, I only call attention to the fact, and am not going to make any further observation regarding it.

The PRESIDING OFFICER. The question is on agreeing to

the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 261, page 78, line 22, after the word "section," to strike out "25" and insert "30," so as to read:

Shirt collars and cuffs of cotton, not specially provided for in this section, 30 per cent ad valorem.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 262, page 78, line 24, after the word "velvets," to insert "plush or velvet ribbons"; and in line 25, after the word "corduroys," to insert "chenilles," so as to read:

262. Plushes, velvets, plush or velvet ribbons, velveteens, corduroys, chenilles, and all pile fabrics, cut or uncut, whether or not the pile covers the entire surface, etc.

The amendment was agreed to.

The next amendment was, in paragraph 262, page 70, line 2, after the word "composed," to insert "wholly or in chief value.

Mr. LIPPITT. Mr. President, I should like to ask the Senator from Georgia whether he does not think it would be wise to make the language of this bill uniform in regard to what is here proposed? So far in this schedule wherever the idea conveyed by the words "wholly or in chief value" is expressed, it has been expressed by saying, "composed of cotton, or of which cotton is the component material of chief value." I took occasion yesterday to point out that in the textile schedules there had been six different forms of language used to express the

Mr. SMITH of Georgia. Mr. President, I am perfectly willing to accept the suggestion of the Senator from Rhode Island.

Mr. LIPPITT. I only make the suggestion for the sake of avoiding litigation. There are several other places throughout the bill where I think it would be much improved by having the language uniform.

The PRESIDING OFFICER. The Chair will inquire if the Senator from Rhode Island has offered an amendment?

Mr. LIPPITT, I did offer an amendment, and I understood the Senator from Georgia to accept it, that there should be sub-

stituted for the words "wholly or in chief value" the words of cotton, or of which cotton is the component material of chief value.'

Mr. HUGHES. The language should be "composed of cotton or other vegetable fiber, or of which cotton or other vegetable fiber is the component material of chief value.'

Mr. LIPPITT. The Senator from New Jersey is quite cor-

rect; that is the way in which it should be stated.

The PRESIDING OFFICER. The Secretary will state the

amendment to the amendment. Mr. SMITH of Georgia. Mr. President, the reason for the change in language there was to make clear the exception just

following, "except flax, hemp, or ramie." Mr. SMOOT. I take it for granted that the reason for excepting flax, hemp, or ramie was that they are provided for in

Mr. SMITH of Georgia. Yes; they are provided for elsewhere.

Mr. SMOOT. In paragraph 289?
Mr. SMITH of Georgia. I think that is the paragraph.
The PRESIDING OFFICER. The Secretary will state the amendment offered by the Senator from Rhode Island.

The Secretary. In place of the amendment proposed by the committee, in line 2, after the word "composed," it is proposed to insert the following words:

Of cotton or other vegetable fiber, or of which cotton or other vegeta-ble fiber is the component material of chief value.

Mr. SMITH of Georgia. I will ask the Secretary to read the whole sentence, including the words "except flax, hemp, or ramie."

The Secretary read as follows:

Any of the foregoing composed of cotton or other vegetable fiber or of which cotton or other vegetable fiber is the component material of chief value, of cotton—

Mr. HUGHES. The words "of cotton or other vegetable fiber" should be stricken out and it should go on "except flax, hemp, or ramie."

Mr. SMITH of Georgia. Mr. President, I am afraid the proposed amendment will not carry the meaning desired.

Mr. LIPPITT. I think, Mr. President, it would correctly carry the meaning if it were put in the proper form. If you say "composed of cotton or of which cotton or other vegetable fiber, except flax, hemp, or ramie, is the component material of chief value," I think that would cover it.

Mr. SMITH of Georgia. Then the words "except flax, hemp,

or ramle" would not apply to the expression in the preceding part of the paragraph, "composed wholly or in chief value of

Mr. LIPPITT. Certainly if it is composed wholly of cotton it carries the duty, or if cotton is the component material of chief value it carries the duty, but otherwise it does not. I should think those words might be inserted there subject to further consideration.

Mr. SMITH of Georgia. Mr. President, I do not object to the usual language. The change of the language in this paragraph as we have made it was to have the exception of flax, hemp, or ramie apply both to the article when cotton was the material of chief value and also to apply to it when cotton or other vegetable fiber was the material of chief value. I am inclined to think that we have expressed it better as it is than we would by adopting the change suggested. I believe if the Senator from Rhode Island will write out just what he suggests and will compare it with the language in the bill, he will see that we have it more clearly expressed here than we can express it by the usual language. That was why we deviated from the usual language; so that "flax, hemp, or ramie" would apply to the article composed wholly or in chief value of cotton or other vegetable fiber.

Mr. LIPPITT. Why is it necessary when you say "if the article is composed wholly of cotton" also to have a provision that the duty does not apply if the article contains flax, hemp, or ramie?

Mr. SMITH of Georgia. That is not necessary. It is the next provision to which the exception applies—"or in chief value of cotton."

The PRESIDING OFFICER. As the Chair understands the situation, the amendment suggested by the Senator from Rhode

Mr. SMITH of Georgia. I think we had better hold to the

present language.

The PRESIDING OFFICER. The Chair understands that the amendment has been withdrawn, and the question recurs on the amendment offered by the committee.

The amendment was agreed to. The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 262, page 79, line 3, after the word "flax," to insert hemp, or ramie."

The amendment was agreed to.

The next amendment was, in paragraph 262, page 79, line 6, after the word "corduroys," to insert "chenilles."

The PRESIDING OFFICER. The question is on agreeing to the amendment

Mr. GALLINGER. Mr. President, I ask for a division on that amendment.

The PRESIDING OFFICER. The Senator from New Hampshire asks for a division. Those in favor of the amendment proposed by the committee will rise and stand until counted.

Mr. HUGHES. I ask for the yeas and nays.

Mr. GALLINGER. I will withdraw my suggestion if the Senator from New Jersey withdraws his. I will add-

Mr. HUGHES. I withdraw my demand for the yeas and nays. Mr. GALLINGER. I will add that it grieves me to see only

two Senators on the other side of the Chamber.

'The PRESIDING OFFICER. The Chair will state that in that case it is proper to suggest the absence of a quorum.

Mr. GALLINGER. I do not suggest the absence of a quorum,

Mr. President.

Mr. HUGHES. I withdraw my demand for the yeas and nays.

Mr. BRANDEGEE. Counting the Presiding Officer, there are three Senators on the other side present.

The PRESIDING OFFICER. The demand for the yeas and nays is withdrawn. The question is on agreeing to the amend-

ment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 262, page 79, line 8, after the word "flax," to insert "hemp, or ramie," so as to read:

Or other pile fabrics composed of cotton or other vegetable fiber, except flax, hemp, or ramie, 40 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 79, to strike out all of paragraph 263, in the following words:

263. Curtains, table covers, and all articles manufactured of cotton chenille, or of which cotton chenille is the component material of calef value, tapestries, and other Jacquard figured upholstery goods, composed wholly or in chief value of cotton or other vegetable fiber; any of the foregoing, in the piece or otherwise, 35 per cent ad valorem; all other Jacquard figured manufactures of cotton or of which cotton is the component material of chief value, 30 per cent ad valorem.

And to insert:

263. Tapestries, and other Jacquard figured upholstery goods weighing over 6 ounces per square yard, composed wholly or in chief value of cotton or other vegetable fiber, in the place or otherwise, 35 per cent ad valorem.

Mr. SMOOT. Mr. President, I am glad to see that there is an amendment to the House provision; but I wish to call the Senator's attention to one thing that I think would be an improvement to this paragraph.

The provision in the House bill for Jacquard figured manufactures of cotton is dropped, as the Senator knows. This leaves only the provision for tapestries and other Jacquard figured upholstery goods. To bring this provision into harmony with the corresponding provision in Schedule J, paragraph 293, and Schedule K, paragraph 318, the term "Jacquard figured" should be amended to read "woven-figured." This applies only to tapestry now. In order to harmonize the wording of the bill, both in Schedule J and in Schedule K, instead of "Jacquard figured" the words should be "woven-figured."

Mr. HUGHES. I will say to the Senator that I was chiefly responsible for the use of the words "woven-figured" in the other paragraph. I know something about textiles in a prac-"Jacquard figured," and rely upon a description of that kind, would make several of the paragraphs extremely difficult of administration. That did not apply to tapestries. There is not administration. That did not apply to tapestries. the slightest objection, so far as I know, to the Senator's suggestion; but the application of the words "Jacquard figured" to tapestries, while it is out of harmony with the various other paragraphs, is sui generis in a way. So far as I know there are no figured tapestries that are not figured by a Jacquard machine. There are other figured textiles that are not figured by a Jacquard machine.

Mr. SMOOT. Mr. President, of course I know that there are woven figured cloths of many kinds, woven upon attachments to a good many different kinds of looms. But it does seem to me that if we are going to be consistent we ought to be consistent clear through the different paragraphs. If in the future tapestries can be woven on any but a Jacquard loom, it seems to me they ought to fall in this paragraph; and if you are going to use the words "woven figured" in one place, you ought to use them in another.

There is not much difficulty in determining Mr. HUGHES. whether or not the textiles made in the part of the country from which I come are Jacquard weave or not. There is great difficulty in determining that in other places. I did not appreciate it until we went into the investigation of the cotton As a matter of fact, as the Senator from Rhode Island knows, any kind of weave can be made on a Jacquard loom. You can weave absolutely plain cloth on it, and it is frequently done. So the word "Jacquard" is not descriptive of

Mr. SMOOT. Plain cloth is never woven on a Jacquard loom.

Mr. HUGHES. Yes; it is.

Mr. SMOOT. If it is done, it is done because they do not pay any attention whatever to cost. It is too expensive as a prac-

Mr. HUGHES. I will tell the Senator that it is done frequently, for this reason: Sometimes it is less expensive to run a short order through a Jacquard harness than it is to put up the harness and put in the shaft. For instance, an order might come in for 25, 50, or 100 yards of plain cloth, and the warp and the attachments already on the loom would be equal to turning it out. In such a case they might run that plain cloth through the Jacquard loom. I have frequently seen it done. There is a Jacquard-woven piece of cloth, absolutely plain, the same as if it were run through a shaft through which you could not weave anything but plain goods. Therefore I did not think the word was properly descriptive, and I suggested that the words "woven-figured" be substituted for "Jacquard figured," as being more descriptive. It is conceivable that in some instances it would be more difficult to weave in a figure by means of a shaft than it would be to weave in a figure by means of the Jacquard loom. So, as I say, the objection I had to it in the other paragraph did not apply to this particular paragraph, in my opinion. I can not see the slightest objection to making the change, though, so far as I am concerned.

Mr. SMOOT. Mr. President, I can not conceive of any condi-

tion in a mill where a plain piece of cloth would be woven on a Jacquard loom, unless it happened that the Jacquard loom stood idle when all of the other looms were in operation.

Mr. HUGHES. It would not necessarily follow that they

would do it even then.

Mr. SMOOT. I do not care whether the warp is 600 yards or whether it is 20 yards. Before a piece of cloth can be woven the warp has to be drawn through the heddles, and it has to be drawn through the reed, and it has to be tied to the cloth roller to begin the weaving of it.

Mr. HUGHES. But that may have been done already. Mr. SMOOT. Then, I say it would not have been done unless

the Jacquard looms were lying idle and all the other looms in

the room were busy.

Mr. HUGHES. No; the Jacquard loom might have been working on an order, and they might have come to the end of the particular order, and they might hand the weaver another order which instead of calling for a figure or a pattern simply called for a straight piece of cloth. It is true that it would not be done as a matter of practice, and the Senator is substantially right in saying that it would only be done on a loom for which they had not any use at that time. It would be an expensive proposition, too.

Mr. SMOOT. Very expensive indeed.

Mr. LIPPITT. If the Senator from New Jersey will yield to me for a minute, I only wish to say that I think he is quite correct in his general statement that ordinarily tapestry goods are of such a character of decoration that it requires the

Jacquard loom to make them.

Mr. SMOOT. Yes; but while the Senator has been speaking it has occurred to me that there are occasionally certain fabrics that are made for portière purposes, and things of that kind, where the figures certainly could be made on what is ordinarily known as a dobby or a shaft loom. Having used the words "woven-figured" over in the other clause, I should think probably it would be more uniform to do it here.

Mr. HUGHES. I am inclined to agree with the Senator. I had some difficulty in explaining my reasons for wanting to substitute "woven-figured" for "Jacquard," and I got tired of it after a while. I am perfectly willing to accept that suggestion. I think it is more accurately descriptive of the method

of making the cloth.

Mr. SMITH of Georgia. We really retained the word "Jacquard" here because we thought we were striking out the term "Jacquard" too much; and as it was claimed that the only way these goods were made was by means of the Jacquard loom, we were willing to recognize the term "Jacquard." But But

we are perfectly willing, as the Senator suggests, to put in "woven" in place of "Jacquard." With the approval of the Senator from New Jersey, we will change the word "Jacquard" to "woven."

Mr. JOHNSON. I think we had better consider that matter,

Mr. President

Mr. SMITH of Georgia. The Senator from Maine, who is also upon our subcommittee, has just come in, and he suggests that he would like to have the committee consider the matter further before we determine upon the change.

Mr. SMOOT. Then the Senator will ask that it be passed

over?

Mr. SMITH of Georgia. Yes; we will pass over that para-

graph.

Mr. WEEKS. Mr. President, before passing over the paragraph I should like to ask the Senator from Georgia what becomes of curtains, table covers, and other articles that were in paragraph 263 before it was amended?

Mr. HUGHES. The Senator will see that chenilles are car-

ried in paragraph 262.

I see that cotton chenilles are carried in para-Mr. WEEKS. graph 262; but I am not sure that table covers would come under that paragraph, and I am not sure that curtains would. A considerable industry has been developed in those articles.

Mr. HUGHES. They are covered as fully as I think they

were covered in the other paragraph, which read:

Curtains, table covers, and all articles manufactured of cotton chenille.

If they are manufactured of cotton chenille, they will be covered in the other paragraph. If they are not, they were intended to be covered in any event; and anything that is not specifically provided for, of course, will be classed as countable cotton.

Mr. WEEKS. Do I understand that this paragraph applies

only to chenille curtains?

only to chenille curtains?

Mr. HUGHES. No. Paragraph 262 applies to "chenilles and all pile fabrics, cut or uncut, whether or not the pile covers the entire surface. Paragraph 263, as it came from the House, applied to "curtains, table covers, and all articles manufactured of cotton chenille," meaning curtains of cotton chenille and table covers of cotton chenille, "and other Jacquard-figured upholstery goods."

Mr. WEEKS. I should like to make one more inquiry. bedspreads made on the Jacquard loom come under this paragraph, as the bill is now framed, or do they come under para-

graph 257?

Mr. HUGHES. Bedspreads come under paragraph 257.

Mr. WEEKS. Is it the intention that they shall come under paragraph 257?

Mr. HUGHES. That was the intention; yes. Mr. WEEKS. I desire to ask the Senator from New Jersey if he thinks they are given sufficient protection under that

Mr. HUGHES. There is not the slightest reason in the world so far as I know for differentiating between bedspreads and other woven-figured goods. I do not know of any. If the Senator does, I shall be glad to have him state it.

Mr. WEEKS. I supposed bedspreads were woven, not in the

piece, but as separate articles.

Mr. HUGHES. They are woven by the mile. [Laughter.] If they come in in the piece, they go into the basket clause and take a high rate of duty; but they are woven like every other kind of cotton cloth is woven. They are just ripped out in great quantities. While I do not wish to enter into the old controversy with the Senator as to the amount of protection necessary for American-made articles with reference to foreign importations, there is no reason that I know of for making a distinction between an ordinary piece of woven figured cotton cloth and a bedspread.

Mr. WEEKS. Is there not a material difference in the cost

of bedspreads, depending on the figures that the piece contains?
Mr. HUGHES. We allow 2½ per cent for decorating other cotton cloth, weaving a figure into it, and the only thing they do out of the ordinary with reference to a bedsprend is to weave a figure into it. It has been the custom hitherto, in the con-struction of tariff bills, to take some particular article and give it a special rate. It seems to me they must have done it for some particular man. In a great many cases those things per-sist throughout the various bills. Different tariff makers follow the old language, the old basis, the old method of construction. Occasionally Democrats fall into that error, too, I suppose in the interest of time and convenience. But just because you can designate this article eo nomine as a bedspread I never have been able to see why it should be given any different treatment than that accorded to any other piece of cotton cloth which is woven, figured, or jacquarded.

I am not taking issue with the Senator from Rhode Island, who says that all jacquarded cloths should be given a higher differential. That is not what we are discussing now. We are discussing whether or not bedspreads, because they can be conveniently named, should be treated differently.

Mr. WEEKS. I should like to ask the Senator from New Jer-

sey in what way he gives 2½ per cent differential in this par-

ticular case?

Mr. HUGHES. All cotton cloth which is woven or figured receives a differential of 2½ per cent over cotton cloth in the gray.

Mr. LIPPITT. I should like to ask, if it is bleached, whether

it pays any more duty than a plain piece of cloth?

Mr. HUGHES. No. Mr. LIPPITT. Then, I fail to see how the maker has any added duty for his product. He has in name, but in fact he

Mr. HUGHES. The Senator knows that bedspreads may come in with a figure woven into them with the fabric in the gray; and another piece of cloth coming in in that condition would pay a rate of duty of 2½ per cent less than a bedspread coming

in in the gray. That is true, is it not?

Mr. LIPPITT. That is true; but it is also true that the provision is so arranged that, manifestly, anybody would bring in fancy cloth in the finished condition, in which case he would pay absolutely no additional duty for the fancy figures. Instead of carrying out what I think was the manifest intention of the committee to make some distinction between figured cloth and unfigured cloth, in practice I fail to see how they have done

Mr. HUGHES. That is a general criticism of the bill, which, of course, I was not discussing with the Senator. The Senator has discussed that. I was simply trying to show the Senator from Massachusetts [Mr. Weeks] that there was not any reason for treating bedspreads in any different manner from that in

which we treated other fabrics.

Mr. WEEKS. I should like to ask the Senator from New Jersey if the department experts have advised the subcommittee that there is not an additional cost of manufacturing bedspreads, for instance, over the cost of other cotton cloth?

Mr. HUGHES. Oh, no; there could not be, in the nature of things. There could not be any greater cost in manufacturing bedspreads than certain characters of Jacquard goods, cotton goods. In fact, as the Senator from Rhode Island stated, I can think of a great many weaves which are far more entitled to consideration than mere Jacquard weaves.

Mr. WEEKS. Is not the cost greater than it would be in plain

cloths, for instance?

Mr. HUGHES. Oh, yes; it costs more. I do not say that it does not cost more to make Jacquard cloth than it does to make plain cloth. I did not intend to convey that impression.

Mr. WEEKS. My question was whether the tariff experts on cotton advised the subcommittee that bedspreads would be

sufficiently protected by being put in paragraph 257?

Mr. HUGHES. I do not know whom the Senator means by

"the tariff experts."

Mr. WEEKS. I assume that the committee has had the benefit of the advice of experts connected with the department.

Mr. HUGHES. The examiners at the ports watching importations state that there is not any particular reason for differentiating this article from any other. It has only been separated from the great body of cotton fabrics by a tariff bill. There is not any other reason on earth for it. It stands on precisely the same footing as every other piece of figured cotton cloth in the world, except that it has been treated in the tariff bill eo nomine; it has been called a bedspread. That is the only different treatment. That is the only thing that differentiates it from anything else. If there should be a higher duty upon a bedspread because of the fact that it is Jacquard woven, there should be a higher duty upon all Jacquard-woven goods; and there are weaves and fabrics which, from the standpoint of the Senator, are entitled to a great deal more duty than an ordinary Jacquard-woven fabric.

Mr. WEEKS. Have they been given it in this bill? Mr. HUGHES. They have been treated as Jacquard figured goods have been treated.

Mr. WEEKS. Just one more question. Why is it that they

are not entitled to as much duty as tapestry or damask? Mr. HUGHES. Speaking for myself, the reason I would urge

for the duty that is put on damask is that it should produce some revenue. I do not think there is any need, from the protective standpoint, of levying a duty upon damask; but I think more revenue will be produced there, perhaps, than at any other point. This is another instance of the survival of the old, old habit of treating commodities eo nomine. They get separate treatment for that reason. So far as I am concerned, I think

perhaps it would be better to let them all take their chances in

Mr. SMOOT. You would get more revenue in that way.
Mr. HUGHES. Probably.
The VICE PRESIDENT. Paragraph 263 will be passed over. The Secretary. Paragraph 264 and paragraph 265 are also passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 266, page 80, line 14, after the word "underwear," to insert "and wearing apparel"; and, in the same line, after the word "description," to insert "not specially provided for in this section," so as to make the paragraph read:

266. Shirts and drawers, pants, vests, union suits, combination suits, tights, sweaters, corset covers, and all underwear and wearing apparel of every description, not specially provided for in this section, made wholly or in part on knitting machines or frames, or knit by hand, finished or unfinished, not including such as are trimmed with lace, imitation lace or crochet or as are embroidered and not including stockings, hose and half hose, composed of cotton or other vegetable fiber, 30 per cent ad valorem.

The amendment was agreed to.

Mr. BRANDEGEE. Mr. President, cotton manufacturing is one of the chief industries of the portion of the State of Connecticut in which I reside. I have here a great many communications from the owners and managers of the mills engaged in that industry. I wish to read, briefly, a few extracts from a portion of the communications I have received.

The Falls Co., of Norwich, Conn., write me, through their

president, as follows:

As manufacturers of cotton goods, we wish to enter our protest against the passage of the tariff bill now before Congress.

We firmly believe that its enactment will paralyze the industry of cotton manufacturing for a long period.

How a set of intelligent men can believe for a moment that the country can stand such a radical change all at once and survive is be-

I have been in hopes that the Senate might stem the tide, but fear it hasn't the strength.

A director of the National Association of Cotton Manufacturers, a resident of my State engaged in the business, telegraphs me:

I believe the passage of the present Underwood bill would work incalculable harm to the cotton manufacturing industry of this country and all who are dependent upon it, and I urge you to do all in your power to defeat it.

The warden and court of burgesses of the borough of Danielson, Conn., write me inclosing a resolution which they adopted, as follows:

Resolved, That we urgently request the chairman of the Ways and Means Committee of the United States Senate and House of Representatives, and the Senators and Congressmen from our district, that the cotton and woolen schedules in the proposed national tariff legislation be maintained substantially as at present.

The Lawton Mills Corporation, of Plainfield, Conn., writes:

I want to enter our vigorous protest against the passage of the Underwood bill in its present form. If enacted, it means a 30 per cent reduction of wages and a loss to capital until business revives. We who are on the job know what we are talking about. History will repeat itself unless many changes are made on the cotton schedule before its passage.

passage.

I am inclosing a copy of a letter which I wrote some time ago to Mr. Lewis W. Parker, and requested that he send a copy of same to Mr. Underwood. Do everything you can to impress upon your colleagues the serious menace of this bill if it goes into effect, and beg to remain,

Yours, truly,

The Lawron Miles Congration.

THE LAWTON MILLS CORPORATION. H. LAWTON, General Manager.

I ask that the Secretary may read the letter which Mr. Lawton wrote to Mr. Parker, and a copy of which he inclosed to me, as it states very succinctly the position of these gentlemen upon this question.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and the Secretary will read, as requested.

The Secretary read as follows:

MARCH 24, 1913.

Mr. LEWIS W. PARKER, Greenville, S. C.

Greenville, S. C.

Dear Sir: You will recall the writer as being the gentleman who spoke to you in the Merchants' Club in New York two or three weeks ago as having in mind a few thoughts and views touching the tariff question with which the Democratic Party at the present time seem anxious to make history of, either for the betterment of the textile industry or for the setting back of same. It would seem strange to the writer that this question should be left for settlement in the hands of so many of our Congressmen and Senators who are so unfamiliar with the real facts and conditions pertaining to the best interests of the textile industries of this country. This question should be left for settlement by any such body of men, but, rather, it should be left for settlement by any such body of men, but, rather, it should be left in the hands of a commission entirely unbiased politically, and this body of men should be composed of men who are familiar with the textile industries of this country and competent to take up such a broad question and to take sufficient time to come to a correct conclusion pertaining to every detail, and same should be settled in a businesslike way once and for all time.

Our people have been educated up to a certain standard of living, and if this standard is to be maintained, any interference by tariff changes

is going to work toward the setting back and not the uplifting of the American workingman.

is going to work toward the setting back and not the uplifting of the American workingman.

The scale of wages which is now paid in the textile industries of New England is so far in excess of that paid in any other country that protection for the working people, as well as for the capital invested in the textile industries, is absolutely necessary to the extent that the scale of wages now paid can be maintained and capital can receive a fair return and a liberal depreciation can be allowed, and the industry can be settled down to a fixed and steady condition, so that capital and labor may be allowed to prosper, which is their just right, without interference, politically or otherwise.

Why should we travel so close to the precipice when the road is broad enough so that all may travel safety and common the road is broad enough so that all may travel safety and common the road of the date of the context of the other? In no other country under the sun does the political barometer vary from one extreme to the other? In no other country under the sun does the political barometer vary from one extreme to the other? In the feat of the date of the context of the other? In no other country under the sun does the political barometer vary from one extreme to the other? The period of the country in this country has been a football long enough, and this sort of condition should cease and the industry should be allowed to thrive without any further political interference.

The Democratic administration and party, which have just come into power, have a great opportunity before them. Never has a party had such an opportunity; but the opportunity will be thrown away unless just and intelligent action is taken in the many questions that seem to be up for adjustment at the present time, and the adjustments can be made in many of these questions if intelligent and judicious procedure is the watchword of the Democratic Party. They can become a great steadying factor in the political situation of the future. Dring the past 50 year

I do not know as I have made myself plain, but I am speaking as a practical man who has been connected with the textile industry during a period of 40 years as a practical worker and who knows something of the real conditions, thus adding what little I can in bringing about a condition of industrial peace, and beg to remain,

Yours, truly,

H. LAWTON.

Mr. BRANDEGEE. Mr. President, I do not intend to read or to ask the Secretary to read the communications I have here. I have communications from the Briggs Manufacturing Co., of Voluntown, Conn.; the Shetucket Co., of Norwich, Conn.; and many telegrams from commercial bodies in my State to the same general effect.

I know that it is useless to offer any amendments to this The Senator from Rhode Island has offered some and has some pending. Other Senators have offered amendments. I have voted for those amendments wherever they tended to mitigate the asperities of the bill. They are promptly voted I shall content myself with voting against the provisions of the bill, the committee amendments, and the schedules from time to time as best I may. That is all I have to say.

from time to time as best I may. That is all I have to say.

The next amendment of the committee was, in paragraph 267, page 80, line 22, after the word "garters," to strike out "ribbons"; in line 23, after the word "braces," to strike out "tapes, tubing, and webs or webbing" and insert "and fabrics with fast edges not exceeding 12 inches in width"; and, in line 25, to strike out "any" and insert "all," so as to read:

Bandings, beltings, bindings, bone casings, cords, garters, tire fabric or fabric suitable for use in pneumatic tires, suspenders and braces, and fabrics with fast edges not exceeding 12 inches in width, all of the foregoing made of cotton or other vegetable fiber, or of which cotton or other vegetable fiber is the component material of chief value, or of cotton or other vegetable fiber, and india rubber.

Mr. GALLINGER. I made an inquiry a little while ago concerning that paragraph, and the Senator from Maine suggested

cerning that paragraph, and the Senator from Maine suggested that it was to be further considered.

Mr. SMITH of Georgia. I have two amendments which I wish to propose to it. After the word "belting," in the first line of the paragraph, I move to insert "belts," and after the word "cords," at the end of the line, to insert "and tassels."

Mr. GALLINGER. Are those the only amendments that he has to offer, I will ask the Senator?

Mr. SMITH of Georgia. No.

Mr. SMOOT. I do not think it ought to read "cords and tassels." I think we ought to insert just "tassels" and a comma, so that it will take in both, whether it be a cord or whether it be a tassel.

Mr. SMITH of Georgia. It is "cord, tassels." We wish to add the word "tassels."

Mr. HUGHES. Before the Senator finally accepts that, I wish to call his attention to the possibility of the article coming in as both cord and tassel.

Mr. SMOOT. If both are enumerated in the paragraph there is no question that they would both carry the duty. They are both at the same rate. So there would be no question about it.

Mr. SMITH of Georgia. Tassels have the same rate.

Mr. SMOOT. Tassels have a rate. There would be a conflict if each had a different rate, but they have not.

The VICE PRESIDENT. The amendment to the amendment

will be stated.

The Secretary. In line 21, after the word "beltings" and the comma, insert the word "belts" and a comma, and in the same line, after the word "cords," insert "tassels" and a comma, so as to read:

Bandings, beltings, belts, bindings, bone casings, cords, tassels, garters, tire fabric, etc.

The amendment to the amendment was agreed to.

Mr. SMOOT. The amendment proposes to strike out the word ribbons." Where has the Senator taken care of ribbons? Mr. SMITH of Georgia. That is taken care of.

Mr. SMOOT. In some other paragraph?
Mr. SMITH of Georgia. It is in the same paragraph.
Mr. SMOOT. The suggestion of the Senator from New Jersey [Mr. Hughes] brings to me what I was going to say. as well say it now. I suppose the Senate committee in making the amendment striking out "ribbons, tapes, tubing, and webs or webbing" and inserting the words "and fabrics with fast edges not exceeding 12 inches in width" intends that the last provision is to cover all those items.

Mr. SMITH of Georgia. Yes; I think so. Mr. SMOOT. That has never been done, of course, in any previous tariff act. These very items have been litigated on for years and years and decisions have been rendered time and time again.

Mr. SMITH of Georgia. I will say to the Senator that the representatives of the Government in New York advise that they are still the subject of litigation and still unsettled, and we made these changes because they said, as a matter of administration, it would stop the litigation. What I know about it is tration, it would stop the litigation. what I gather from that source.

Mr. SMOOT. If the Senator had not interrupted me, I would have come to the point I intended to make. It is true, as the Senator has stated, and as I stated beforehand, that they have had continued litigation over these items. In fact, the appraisers have had to rely entirely upon the testimony of the

importers.

The importers have proven that tapes were not tapes; they have proven that trimmings did not come under this paragraph; they have proven that webbing was not intended under the law to be what we commonly know to be webbing. I was going to ask the Senator if he thought those simple words would cover all that and in the future do away with the litigation which has been so prolific in the past.

Mr. SMITH of Georgia. My opinion on the subject is based

upon what I am advised by the Government representatives at the customhouse in New York. They suggested this language as language which would stop litigation, cover the subject, and simplify the future administration.

Mr. HUGHES. I will say to the Senator the difficulty I find with it is not that it fails to include various articles, but that it fails to include something that will be necessary

Mr. SMOOT. I was going to come to that. Mr. HUGHES. It will be necessary later on in another paragraph to take note of the fact that this language has been inserted. The Senator will notice that the specifications are very general, indeed; that anything with two fast edges under a certain width-

Mr. SMOOT. Under 12 inches. It does not make any difference whether it is silk; it does not make any difference what it is, of course, providing it is the component material of chief value.

Mr. HUGHES. Yes; the component material of chief value.
Mr. SMOOT. Then it comes in under this paragraph and talls under this rate. I thought that if all the rates were the same there would be no conflict at all and it would make no difference; but if some importation comes into this country with two fast edges and happens to be 11 inches wide it would fall under this paragraph, no matter what provisions it may fall under ordinarily.

Mr. SMITH of Georgia. The amendment we will offer a little later in this paragraph will be, in line 16, page 81, to insert "not specifically provided for in this section." The purpose was to specifically provide for them in the other portions of the

Mr. SMOOT. I wish to say to the Senator that amendment will help somewhat, but it does seem to me if we would enumerate the items we have already there, and then specifically state that it applies to the enumerated articles and that they shall not exceed 12 inches in width, and must have two fast edges, there could not be a question about what the law meant, and no importer or any other person could misconstrue its meaning.

Mr. HUGHES. My understanding of it is that, so far as bandings, belting, bindings, bone casings, cords, garters, tire fabrics, and the articles that we have enumerated here are concerned, there is not much difficulty, but there are a number of fabrics which it is claimed do not belong in those classes, and which give the Treasury Department a great deal of trouble, will be caught by this language. The only trouble is that some other fabrics would also be caught by it unless they are specifically provided for, and we propose to attempt to specifically provide for them.

Mr. SMOOT. I hope the result will be a little better than I anticipate, but if not I think I have simply done my duty by calling attention to this matter. If Senators will take it into consideration and in the meantime become convinced that the wording would be a little plainer if it were worded something as I suggested, of course the amendment can be made when the bill gets into the Senate.

Mr. GALLINGER. I ask the Senator from Georgia where he proposes to insert the words "not specially provided for in this

section "?

Mr. SMITH of Georgia. After the word "lace," in line 16, on

page 81.

Mr. GALLINGER. I will ask the Senator if the committee has considered the matter of amending paragraph 368 in any way?

Mr. SMITH of Georgia. Yes. Mr. GALLINGER. Will the Senator be kind enough to state the amendment which may be suggested to that paragraph? It may save some time. I will say to the Senator I have no desire to consume time unnecessarily.

Mr. SMITH of Georgia. We have not prepared the wording of that paragraph which we will recommend, but we have in

view, I am satisfied, what the Senator has in mind.

Mr. GALLINGER. The Senator, of course, knows what I

have in mind.

Mr. SMITH of Georgia. We are simply preparing to reach

that paragraph later on.

Mr. GALLINGER. I have samples, but I will not even perhaps exhibit them. They are very beautiful samples of classes of goods made in a little town in New Hampshire, and they propose to extend the industry to other towns. They were introduced by an Austrian.

Mr. HUGHES. That is one class which, strictly speaking, is

lace, but it falls within this broad and general classification of fabrics. Being under a certain width and having two fast edges it is one of the things included in the dragnet which were not intended to be included. It will make necessary other language later on. I will say to the Senator that I have seen the

Mr. GALLINGER. I presumed the committee had seen them. Mr. HUGHES. I think there is not any doubt but that this language will include them, and it was not intended that it should do so.

Mr. GALLINGER. I had hoped that the committee did not intend to include these fabrics with some others that are named; as an instance, tire fabric; the fabric suitable for use in pneumatic tires.

Mr. HUGHES. That is a lace.

Mr. GALLINGER. It would seem absurd to me. These are very beautiful goods manufactured, as I suggested, by a gentleman from Austria who established a little industry in Barnstead, N. H., a little interior town. I am going to read his letter; it is brief.

BARNSTEAD, N. H., July 1, 1913.

Hon. Jacob H. Gallinger, United States Senate, Washington, D. C.

Dear Sir: Please help us to keep the tariff for featherstitched braid, edgings, and corset trimmings like samples we inclose at 60 per cent duty, which we are manufacturing in Barnstead, N. H.

We have been the first in America who started to manufacture these goods nine years ago in Barnstead, N. H.

We have worked very hard, paid no dividends the first eight years, left the little profit we made in the company to develop the business, and now the tariff on these goods we manufacture shall be reduced from 60 per cent to 35 per cent and less, which can not be done without injury to our industry to such an extent that our very existence will be a question in future.

It is said that under a 60 per cent duty 90 per cent of these goods used in this country is imported to the United States from Europe; and we, the domestic manufacturer, can not compete with the foreign manufacturers.

They undersell us right and left now under a 60 per cent duty.

Note that these goods contain only from 35 to 40 per cent of material, 40 to 45 per cent labor, and 15 to 20 per cent overhead expenses.

The manufacturers in Europe get the material from 15 to 20 per cent cheaper; they pay only one-third to one-fifth as much wages as we pay, and their overhead expenses are only about one-half as much as ours.

How shall we be able to compete with the European manufacturers and make both ends meet when we have to pay from 15 to 20 per cent more for the material, from 65 to 80 per cent more wages, after we had to invest more than twice as much for the plant and machinery as the same factory and machinery would cost in Europe?

If the tariff is reduced to 35 per cent, then we will have to reduce the wages accordingly or go out of business.

I am born and brought up in Austria, and have since I am in America been in Europe twice, where I made a special study of our business, so that I know exactly what I am talking about.

New HAMPSHIEE ARTISTIC WEB CO.

F. ZECHA.

NEW HAMPSHIRE ARTISTIC WEB CO. F. ZECHA.

The writer says:

KEENE COMMERCIAL CLUB, Keene, N. H., July 9, 1913.

The writer says:

Keene, N. H., July 9, 1913.

Hon. Jacob H. Gallinger,
United States Senate, Washington, D. C.

Dear Sir: I realize the seeming absurdity of expecting a tariff measure to be changed for the benefit of a New Hampshire industry, but there is one phase of the pending bill to which I would fain call attention in the hope that you may see your way to try to obtain at all events a partial modification, which will still effect a considerable reduction on the existing rate.

Recently there was incorporated the Keene Artistic Narrow Web Co., the term narrow web being applied to embroideries for corsets and other articles of ladies' underclothing. Manufacturers in this line are not numerous, as I am informed that 95 per cent of the total amount consumed comes from Austria and Germany, where the wages of operatives are so low that the existing protection has enabled American manufacturers to realize only a legitimate profit, while some of them have failed to achieve any substantial success. The existing tariff is 60 per cent, and it is proposed to reduce it to 35 per cent, the effect of which on an industry manufacturing 5 per cent of the total product sold in this country will be obvious. Either the industry must suffer very seriously or there will have to be a substantial readjustment of wages. Granted that 60 per cent may be too high a tariff, is not an abrupt drop to almost half too drastic a change? In the eastern part of the State, as well as in Massachusetts and Rhode Island, there are factories whose business will be seriously interfered with, and as regards our new local enterprise plans have been held in abeyance until it can be decided whether it is possible to operate at a profit. Personally I feel the necessity of tariff reform; but surely this is an instance of reform going too far, and I have been requested by the directors of the Commercial Club to ask you to use your best efforts to secure a modification of this schedule, on which it is felt that a reduction of 10 per cent would be a subs

I answered that letter asking for certain information, and the same gentleman writes me as follows:

KEENE COMMERCIAL CLUB, Keene, N. H., August 9, 1913.

Hon. J. H. GALLINGER, Washington, D. C.

Washington, D. C.

Dear Sir: I appreciate the courtesy of your letter of the 8th. As a result of what is undoubtedly an error of classification, the fabrics which it is proposed to manufacture in the projected new industry come under-section 267. In order to post myself I took up the matter at the appraiser's office in New York and learned that in consequence of expensive litigation with importers in the past the words "fabrics with fast edges, not exceeding 12 inches in width," had been used, so that the 30 per cent duty provided applies equally to a plain tape, such as is used for an apron string, as well as fancy ornamented fabrics, like the inclosed samples. By reference to section 368 you will see that 60 per cent provision is made for "braids made by hand or on any braid machine, knitting machine, or lace machine," though it so happens that the fabrics in which we are interested are not made on any of these machines, but on an elaborate loom with various attachments, although they are as elaborate as embroideries taking a higher duty and require highly skilled operatives.

As explained in my former letter, only 5 per cent of these goods are manufactured in the United States—at Pawtucket, R. I., Epsom and Barnstead, N. H.—so that the oversight to which I am calling attention will only benefit foreign manufacturers and importers. Not to bother you with technical details, I may state that the plain braids are made on machines running 120 to 200 picks to the minute, where one operator can attend to four to eight machines, while the looms making these fancy fabrics only run 40 to 120 picks to the minute, where one operator can not attend to more than two machines and sometimes only

one. The wages in the former case are from \$8 to \$12 per week; in the other, \$12 to \$25. The 30 per cent duty will not cover the labor differential between Germany and the United States.

The matter is a very serious one for Keene. The Barnstead concern proposes to establish a branch of their business here. A large sum of money has been deposited, land purchased, plans drawn, and proposals received, but unless a change is made in the bill the project will have to be abandoned, as otherwise it can not exist. This industry has been developed by some brothers of Austrian birth in the face of the greatest odds, and it seems tough that a promising industry should be throttled merely by reason of a question of grammatical construction or technical description.

These goods are known as fancy braids and trimmings, but in section

merely by reason of a question of grammatical construction or technical description.

These goods are known as fancy braids and trimmings, but in section 368 you will see the words "trimmings not specially provided for," and the appraiser holds that they are provided for in section 267 in the words "fabrics with fast edges not exceeding 12 inches in width," although I believe I am not violating any confidence in saying he agrees that these goods ought to be differently classified. I have talked with a large importer in New York, who feels that the ambiguity of this clause will lead to expensive litigation, and it is believed that a satisfactory adjustment would be reached by the insertion of the words interlined in the inclosed copies of sections 267 and 368. This would leave the former clause, as originally intended, to apply to plain fabrics, while these fancy articles, which are luxuries, would be covered by section 368 as amended. These words have been approved by experts in the New York appraiser's office, and men handling imports of this class of goods agree that they are adequately described as "braids loom woven and ornamented in process of weaving." Please note that this description is narrowed down to "braids," so that it could not possibly cause confusion.

My appeal is absolutely nonpartisan. The Keene Development Co., which proposed to erect this new factory, is made up of leading business men of various political beliefs, and they are a unit in feeling that the bill as it stands will work an undeserved injury to a promising project, though it is also felt that the error is one of omission and not of commission.

Telephoning a few minutes ago to the president of the Barnstead concern I learned that he mailed you samples of his product some weeks

commission.

Telephoning a few minutes ago to the president of the Barnstead concern I learned that he mailed you samples of his product some weeks ago, and I respectfully suggest that you refer to them. Then compare with a plain piece of braid and ask your colleagues whether it is equitable that they should have the same classification in view of the accepted facts as to the cost of production. The existing duty is 60 per cent. It is obvious what the effect will be if it is reduced to 30 per cent at one fell swoop.

Assuring you that we shall heartily appreciate your cooperation in this matter, I am,

Yours, very truly,

WM. LITTLER, Secretary.

That gentleman proposed two amendments, which I will read, to the section under consideration. He asks that the words not specially provided for in this section" should be inserted, which I understand has been done. He suggested that in para-graph 368, Schedule N, after the word "braids," there should be inserted "loom woven and ornamented in process of weaving I will ask the committee if that proposed amendment has been called to their attention?

Mr. SMITH of Georgia. That language, I think, was furnished to him by the Government experts whom we had assisting us in the matter. That was the language which we were considering to be sure that it covered these goods.

Mr. GALLINGER. Very likely that will go in? Mr. SMITH of Georgia. Yes.

Mr. GALLINGER. I thank the Senator. That is all I have to say.

Mr. SMITH of Georgia. It is our present purpose to put it in, if we are sure that the language covers the case. We are considering that question, the object being to cover it.

thought it should be in the other paragraph.

Mr. GALLINGER. That is exceedingly satisfactory to me, and I will not waste a moment more of time on the subject.

Mr. BRANDEGEE. Do I understand that the paragraph is recommitted or passed over?

Mr. SMITH of Georgia. No; we are undertaking to perfect it as we go on. We have only one other change to propose in the paragraph, and that is to insert, after the word "lace," in line 16, page 81, "and not specially provided for in this section."

Mr. BRANDEGEE. If that is the case, I should like to bring to the attention of the Senator a communication which I have received from the American Mills Co., in Waterbury, Conn.:

This company manufactures elastic webbing (used for belts, suspenders, garters, etc.), which under this bill would be admitted at 25 per cent duty (Schedule I, par. 267).

I suppose that was the House provision.

The duty under the present law is 60 per cent (Schedule J. par. 349). Our foreign competition is principally from England and Germany, in both of which countries the labor cost is one-fourth to one-third of what it is here, not only in the actual manufacture of the goods themselves, but in all other items, which are incidental; and also those which go to make up the so-called overhead.

In behalf of this entire industry I beg you to exercise all the power you can to have this bill so modified as to make the reduction more reasonable. I think a duty of 40 to 45 per cent would be reasonable.

I will move that on page 81, line 16

The VICE PRESIDENT. The Chair is compelled to announce to the Senator that we have not reached that point. Mr. BRANDEGEE. Which committee amendment is now

pending?

The VICE PRESIDENT. The one on line 22, page 80, and lines 23, 24, and 25, on the same page.

Mr. BRANDEGEE. Very well.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 267, page 81, line 2, after the word "rubber," to strike out the following:

And not embroidered by hand or machinery; spindle banding, woven, braided, or twisted lamp, stove, or candle wicking made of cotton or other vegetable fiber; loom harness, healds, or collets made of cotton or other vegetable fiber, or of which cotton or other vegetable fiber is the component material of chief value; boot, shee, and corset lacings made of cotton or other vegetable fiber; and labels for garments or other articles, composed of cotton or other vegetable fiber, 25 per cent ad valorem; belting for machinery made of cotton or other vegetable fiber is the component material of chief value, 15 per cent ad valorem.

And in lieu thereof to insert:

And in hell thereof to insert:

Not embroidered by hand or machinery, or wholly or in part of lace or imitation lace, 30 per cent ad valorem; spindle banding, woven, braided, or twisted lamp, stove, or candle wicking; loom harness, healds, or collets, boot, shoe, and corset lacings; labels for garments or other articles, all of the foregoing composed of cotton or other vegetable fiber, or of which cotton or other vegetable fiber is the component material of chief value, 25 per cent ad valorem; belting for machinery made of cotton or other vegetable fiber and india rubber, or of which cotton or other vegetable fiber is the component material of chief value, 15 per cent ad valorem.

My SMICH of Coexpic. New Lycony to be proved "pot groundly well as the component material of chief value, 15 per cent ad valorem.

Mr. SMITH of Georgia. Now, I move to insert "not specially provided for in this section," after the word "lace," in line 16.
Mr. GALLINGER. Should it not read "in this paragraph"?

Mr. SMITH of Georgia. Not in this paragraph, because the paragraph referred to is another paragraph of the schedule.

The VICE PRESIDENT. The question is on agreeing to the

amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. BRANDEGEE. I move to amend the amendment as amended, on page 81, line 16, by striking out "30," before "advalorem," and inserting "40," so as to read:

Not embroidered by hand or machinery, or wholly or in part of lace imitation lace, not specially provided for in this section, 40 per cent

The amendment to the amendment was rejected.

The amendment as amended was agreed to.

Mr. SMITH of Georgia. Paragraph 268 we desire to pass over.

Mr. LIPPITT. I have an amendment to offer in substitution for that paragraph.

Mr. HUGHES. I should be glad to have it reported.

Mr. SMITH of Georgia. I would be glad to have it read now.

Mr. LIPPITT. I ask that the Secretary may read my amendment.

Mr. SMITH of Georgia. We do not wish to go on with the paragraph at present, but we would prefer to hear the proposed substitute read before we bring in our amendment to the paragraph.

The VICE PRESIDENT. The amendment will be stated.

The Secretary. Strike out, in paragraph 257, the words woven figured"

Mr. SMITH of Georgia. This is paragraph 268. Mr. LIPPITT. The two amendments go together.

The Secretary. And strike out paragraph 268 and in lieu thereof insert:

268. Figured or fancy cotty cloth woven by means of jacquard, dobby, drop box, lappet, leno, swivel, or other similar attachments, or containing novelty yarns in whole or in part other than the ordinary ply or cable-laid yarn or thread, there shall be paid a duty of 10 per cent in addition to the duty or duties imposed upon such cotton cloth by the various provisions of this section, the intent of this proviso being to add this duty or duties to those to which such cotton cloth would be liable if the provisions of this proviso did not exist.

Mr. SMITH of Georgia. I do not suppose that the Senator from Rhode Island desires to have his amendment acted on now, and the proposed substitute will go over with the paragraph.

Mr. LIPPITT. I presume it is the Senator's intention to

report his substitute within a few days?

Mr. SMITH of Georgia. Yes. If we can, we will report it to-morrow morning, but certainly we will present it within two or three days.

The next amendment of the Committee on Finance was, on page 82, after line 4, to strike out paragraph 269, in the fol-

lowing words:

269. Towels, bath mats, quilts, blankets, polishing cloths, mop cloths, wash rags or cloths, sheets, pillowcases, and batting, any of the foregoing made of cotton, or of which cotton is the component material of chief value, whether in the piece or otherwise, not embroidered nor in part of lace and not otherwise provided for, 25 per cent ad valorem.

And to insert:

269. Towels, quilts composed of two fabrics quilted, blankets, polishing cloths, mop cloths, wash rags or cloths, sheets, pillowcases, finished

or unfinished and not in the piece, batting, or cloth composed wholly or in part of looped threads lying on the surface, such as are known as terry cloth, whether in the piece or otherwise; any of the foregoing made of cotton or of which cotton is the component material of chief value and not embroidered nor in part of lace and not otherwise provided for, 25 per cent ad valorem.

Mr. SMOOT. This paragraph, Mr. President, is a new statutory provision for certain specified articles such as towels, wash rags, wash cloths, mop cloths, sheets, pillowcases, and so forth. In connection with those items the committee have inserted these words; "Such as are known as terry cloth, whether in the piece or otherwise." Terry cloth is a fabric from which bath robes, bath-robe blankets, and Turkish towels are made. It is also used in the making of dresses and even in the making of ladies' hats; it contains sometimes the most elaborate figures, and necessarily it must be woven on a Jacquard loom. To classify that kind of cloth with mop cloths and wash rags seems to me to be rather an incongruity.

Another thing to which I desire to call attention is that the rate provided for in this paragraph is 25 per cent ad valorem, whereas in paragraph 263, on woven-figured tapestry and up-holstery goods the words "woven-figured goods" are used, and they are also used in the different paragraphs of this schedule, which will certainly conflict with this paragraph. The rates are different, and I doubt very much whether terry cloth will enter under the classification in this paragraph at 25 per cent.

Mr. SMITH of Georgia. Mr. President, we have an amendment prepared for that particular part of the paragraph, which strikes out the words "whether in the piece or otherwise" and inserts after the words "terry cloth" the words "and articles made therefrom, not including wearing apparel.'

Mr. SMOOT. That will help a great deal, Mr. President.

Mr. SMITH of Georgia. I intend to present that amendment. Mr. SMOOT. I was not aware of the Senator's intentions; and I did not want the matter to pass over to-day without some action being taken.

Mr. SMITH of Georgia. I had not observed my memorandum on the subject at the time the Senator mentioned it.

Mr. · SMOOT. Does the Senator intend to now offer the

Mr. SMITH of Georgia. Yes; I now offer the amendment. Mr. SMOOT. Let the amendment be stated, Mr. President.

Mr. SMITH of Georgia. In the committee amendment, in paragraph 269, page 82, line 17, I move to strike out the words whether in the piece or otherwise" and to add after the word "cloth" in line 16 the words "and articles made therefrom, not including wearing apparel." I offer for the committee this amendment to the amendment.

The VICE PRESIDENT. The amendment proposed by the Senator from Georgia to the amendment of the committee will be stated.

The Secretary. In paragraph 269, page 82, after the word "cloth," at the end of line 16, in the committee amendment, it is proposed to strike out the words "whether in the piece or otherwise" and to insert "and articles made therefrom, not including wearing apparel."

Mr. SMOOT. Mr. President, if that amendment is to be seriously considered, I should like to suggest to the Senator from Georgia that I think it would be very much better not to have terry cloth in the paragraph in any way, and to let it fall under the provision that it will naturally fall under. If it is plain terry cloth, let it fall under the provision of plain cloth; if it is finished woven terry cloth, let it fall there; and if the manufactured articles or wearing apparel are made from terry cloth, let it fall under that paragraph. Then there will be no conflict. It does, however, seem to me that if you allow the term "terry cloth" to be inserted in this paragraph with a rate different from the rates named in the other paragraphs there will surely be a conflict.

Mr. JOHNSON. Is it not true also that terry cloth is more like pile cloth and has some of the characteristics of pile cloth?

Mr. SMOOT. The only difference between terry cloth and pile cloth is that pile cloth is woven, and is a hard woven cloth. Then the pile is clipped and cut or pressed down and the figures are made by pressing the pile. Terry cloth is, how-

ever, a very coarse yarn woven loosely. As I say, it is used for bath robes, bath-robe blankets, and similar purposes.

Mr. LIPPITT. It is also made in very elaborate figures. Mr. SMOOT. The Senator from Rhode Island suggests that it is also made in very elaborate figures, as I before suggested.

Mr. HUGHES. I will say to the Senator that the examiners at New York were very anxious to have terry cloth named in this paragraph as, in their opinion, it would help wonderfully in the administration of the law. It was inserted in the para- treated the fabric as we intended to treat it.

graph at their suggestion. My notion of it was-I do not know whether or not the Senator's information is to the contrarythat terry cloth is largely used for towels.

Mr. SMOOT. For bath towels, bath robes, and so forth. Mr. HUGHES. For polishing cloths and cloths that are intended to take up moisture. The loose-thread terry cloth, which is attempted to be described here, is much more used for those purposes than for the decorative purposes for which the Sena-

tor thinks it is used.

Mr. SMOOT. Mr. President, I am quite sure the Şenator from New Jersey will agree with me that terry cloth is used for bath robes, for bath-robe blankets, for towels, and there is not any question but that it is used for ladies' dresses. It is also used in the manufacture of ladies' hats. As I have said, I have seen terry cloth with the most elaborate figures woven into it upon the Jacquard loom, and it could not be made upon any other loom.

Mr. HUGHES. But does the Senator think that it should have a higher rate or a lower rate than it is proposed to give

Mr. SMOOT. I am not complaining of the rate. I am calling attention to the fact that it carries a rate of 25 per cent. It is made, as I have said, upon the Jacquard loom.

Mr. HUGHES. Not necessarily, of course.

Mr. SMOOT. I mean some of it is so made; that is, the elaborate figures are made upon a Jacquard loom. There is a plain terry cloth that can be made upon any kind of a loom, which is carrying a rate of 25 per cent now. There will be a conflict as to the rates in different paragraphs, because if you turn to the tapestry paragraph or the woven figured paragraph you will find that the rate of duty is 35 per cent. What I am trying to get at is that, whatever we do agree upon, there shall be no conflict hereafter upon entering the goods at the customhouse. I am not objecting at all to the rates, and am not discussing them in any way. I am simply bringing the attention of the committee to the facts of the case as I see them.

Mr. HUGHES. Of course the Senator from Utah knows how difficult it is to realize the effect of suggested language upon the floor of the Senate when engaged in attempting to pass the bill. I will say that the members of the subcommittee and of the full committee gave a great deal of consideration to just what the Senator from Utah has said, and we arrived at the conclusion that this was the best treatment of which the proposition was capable. In arriving at that conclusion we had the benefit of the advice and judgment of the officials in the appraisers' stores in New York, who are constantly handling these fabrics. It may be possible that the Senator is correct. If we had-treated it as countable cotton, very expensive, fancy stuff might have come in at a very low rate of duty.

Mr. SMOOT. That is the only question that has been in my mind. If plain terry cloth should fall in a countable paragraph, it would bear a very low rate of duty.

Mr. HUGHES. Yes; that is true.

Mr. LIPPITT. If the Senator will pardon me, I can not think that the contention of the Senator from Utah is very well taken. I am very much inclined to think that the description that has been given here of terry cloth is so manifestly different from tapestries that the Senator's very natural fear that it might perhaps fall under that paragraph and come in conflict with it is justified.

Mr. HUGHES. Besides, we have a weight provision in the tapestry paragraph which was intended to guard against that.

Mr. LIPPITT. As a matter of fact, the terry-cloth weave is entirely distinct from any other known weave. It consists, in essence, in having a loop of yarn on top of the fabric It is distinct from what is called a pile fabric—that is, a velvet or a plush-for in the pile fabric the thread is not looped on top, and in the terry cloth it is looped on top. So it seems to me the distinction is sufficiently clear.

Mr. SMOOT. I called attention to the tarestry paragraph, because the words "Jacquard figured" appear there, as they do in two other paragraphs. Certainly in terry cloth we have woven figures, and I thought that a conflict might arise. If the Senator from New Jersey is satisfied that with the amendment which has been proposed by the committee it will be covered, well and good. My object in calling attention to it was as I have stated. If there is to be a change, it ought to be made now, so that there can be no conflict hereafter.

Mr. HUGHES. The Senator from Utah is correct about that. I think, however, we have done as well as we could do in view of the information we had. So far as I can see, I think we

The PRESIDING OFFICER (Mr. Robinson in the chair). The question is on agreeing to the amendment to the committee amendment offered by the Senator from Georgia [Mr. SMITH].

The amendment to the amendment was agreed to.

The amendment as amended was agreed to

The reading of the bill was resumed, and the Secretary read

paragraph 270, as follows:

paragraph 270, as 10110Ws:

270. Lace window curtains, nets, nettings, pillow shams, and bed sets, finished or unfinished, made on the Nottingham lace-curtain machine, and composed of cotton or other vegetable fiber, when counting not more than 6 points or spaces between the warp threads to the inch, 35 per cent ad valorem; when counting more than 6 and not more than 8 points or spaces to the inch, 40 per cent ad valorem; when counting 9 or more points or spaces to the inch, 45 per cent ad valorem.

Mr. SMITH of Georgia. Mr. President, on behalf of the committee I move to strike out the words "nets, nettings," in the first line of the paragraph.

The VICE PRESIDENT. The amendment proposed by the

Senator from Georgia will be stated.

The Secretary. In paragraph 270, page 82, line 21, after the word "curtains," it is proposed to strike out the words "nets, In paragraph 270, page 82, line 21, after the

Mr. SMOOT. Mr. Fresident, I suppose that amendment is moved because of nets and nettings being enumerated in another place, and the Senator from Georgia intends that the rate in paragraph 270 shall not apply to the rate in the paragraph before named, where nets and nettings are included, so that there will be no conflict.

Mr. SMITH of Georgia. We shall also probably offer an amendment to the other paragraph putting a lower rate of duty on certain other cheap nettings, specifically naming them.

Mr. LIPPITT. What paragraph is that? Mr. SMITH of Georgia. Paragraph 368.

Mr. HUGHES. Paragraph 368 in the sundries schedule.

Mr. SMITH of Georgia. There is one class of nettings that Is very cheap and is entirely to be distinguished from the general class. They are covered by a paragraph which we will general class. They are covered by a paragraph which we win reach later. I refer to mosquito netting. We intend to qualify that paragraph-

Mr. LIPPITT. The Senator refers to the lace paragraph? Mr. SMITH of Georgia. The lace paragraph. We intend to qualify that paragraph by making a distinction between the

netting which falls under the lace class and mosquito netting.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Georgia on behalf of the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 271, page 83, line 7, after the word "cotton," to strike out "or of which cotton is the component material of chief value," so as to make the paragraph read:

271. All articles made from cotton cloth, whether finished or unfinished, and all manufactures of cotton, not specially provided for in this section, 30 per cent ad valorem.

Mr. SMITH of Georgia. Mr. President, the committee has determined to withdraw the suggested amendment striking out that

language and will leave the paragraph as the House adopted it.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

The amendment was rejected.

Mr. LA FOLLETTE. Mr. President, I have prepared some amendments to the schedule which the Senate has just been considering. I have not offered any of them, but have reserved them to be offered in the Senate when we shall complete the cotton schedule in the Senate. I expect then to offer them in the form of a substitute and to submit briefly my reasons for proposing the substitute.

The Secretary proceeded to read Schedule J, flax, hemp, and

jute, and manufactures of.

Mr. KENYON. Mr. President, the Senator from Kentucky [Mr. Bradley] requested me some time ago when the flax schedule came up to ask for him that paragraphs 272, 273, 274, 275, and 276 be passed over. I'do not know when the Senator will be here, but I would not have performed my duty if I had not made the request.

Mr. WILLIAMS. Mr. President, I have the very highest regard and friendship for the Senator from Kentucky, but I do not really see why five paragraphs of a bill which 90,000,000 people are waiting on should be passed over because some Senator happens to be absent, unless there is some very peculiar

reason for it.

Mr. KENYON. The Senator from Kentucky made the request, and he is not here on account of ill health. I am unprepared to say when he will be here, and I have only made the request for him. If the paragraphs to which I have referred can be

reserved in some way until after the bill comes into the Senate, I think the purpose which the Senator from Kentucky has in mind may be subserved.

Mr. SIMMONS. I suggest to the Senator from Iowa that if the Senator from Kentucky is not satisfied with the action as in Committee of the Whole he may offer any amendments he may desire when the bill is reported to the Senate.

Mr. KENYON. I simply felt that it was my duty to make the wishes of the Senator from Kentucky known. I have noth-

ing further to say.

Mr. WILLIAMS. Mr. President, every one of the paragraphs mentioned contains an amendment carrying some article to the free list. They can be dealt with just as well when we reach the free list, provided we deal with the Senate committee amend-If we adopt the Senate committee amendments, we ments now. merely strike the items from the dutiable list, and later on, in paragraph 492, they are all repeated and distinctly put upon the free list; so that the Senator from Kentucky, if he has any amendments to offer, can offer them to paragraph 492 just as well as here. It seems to me it will be better to get through with these paragraphs, and then, when we reach the free list, in connection with paragraph 492, let the Senator from Kentucky,

or any other Senator, offer such amendments as he may desire.

Mr. SMOOT. Mr. President, the Senator from Mississippi knows that if an amendment to place flax on the dutiable list carries, then of course all of the rates in the paragraphs following must be somewhat changed. That is the only thing that I see at the present time to prevent the immediate consideration

of the paragraphs.

Mr. WILLIAMS. They would not be changed by this body;

they might be changed in conference.

Mr. SMOOT. Oh, well, the bill would hardly be balanced if a duty should be placed on flax and the other paragraphs should remain as they are.

Mr. WILLIAMS. If we succeeded in taking these things off the free list, we would have to balance it in conference, I We will not undertake to balance it now.

Mr. SMOOT. It could not be balanced in conference, then. Mr. WILLIAMS. Oh, yes, it could, because there is a difference between the Senate rate and the House rate on every

paragraph in the flax and hemp schedule.

Mr. SMOOT. Of course it could be balanced so far as those rates were concerned; I am perfectly aware of that; but only between the rates provided by the Senate and those provided by the House. The rates could not be made lower or higher than prescribed by either House.

Mr. SIMMONS. For the very reason the Senator from Utah has given we want at the outset these paragraphs passed upon

before we go to the remainder of the bill.

Mr. SMOOT. That is exactly what I say. That is the position I take—that we ought to pass upon these paragraphs.

Mr. SIMMONS. It is necessary to do so.

Mr. WILLIAMS. The discussion is taking up more time than anything else. I will agree to pass over temporarily the paragraphs indicated. I am informed the Senator from Kentucky is quite sick. That fact I did not know.

Mr. HUGHES. Then we can not go on with the remainder

of the schedule.

Mr. WILLIAMS. Why not? Let us show some common sense. Mr. KENYON. I will communicate with the Senator from Kentucky this afternoon or to-morrow morning and advise him of the suggestions in the debate and that his rights will be pro-

tected, and I will inform the chairman of the committee.

Mr. WILLIAMS. Mr. President, I have agreed that those paragraphs be passed over until we finish this schedule. I should like to have the remainder of the schedule read and

acted upon.

# SENATOR FROM ALABAMA.

Mr. BANKHEAD. Mr. President, I desire to present the certificate of appointment from the governor of Alabama of Hon. Henry D. Clayton to fill the unexpired term of the late Senator Johnston. Inasmuch as there is some difference of opinion in the Senate as to the governor's authority to make this appoinment I move that the credentials or the certificate of appointment be referred to the Committee on Privileges and Elections. I should like, however, to have the certificate read and printed in the RECORD.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

To the Senate of the United States of America:

A vacancy having happened in the Senate of the United States of America by reason of the death of Joseph F. Johnston, a Senator of the United States of America from the State of Alabama, and the legislature of said State being now in recess;

Now, therefore, I. Emmet O'Neal, as governor of the State of Alabama, have this day appointed, and do by these presents appoint and commission. Hency D. Clayton a Senator of the United States of America from the State of Alabama to fill the vacancy which happened by the death of Joseph F. Johnston, said Hency D. Clayton possessing all of the qualifications required by the Constitution and laws of the United States of America and the constitution and laws of the State of

labama.

In witness whereof I have hereunto set my hand as governor of the late of Alabama and caused the great seal of the State to be affixed the capitol in the city of Montgomery this 12th day of August, A. D.

SEAL.] By the governor: EMMET O'NEAL GOVERNOR

CYRUS B. BROWN. Secretary of State.

Mr. BANKHEAD. I move that the certificate be referred to the Committee on Privileges and Elections.

The motion was agreed to.

#### THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

The Secretary proceeded to read paragraph 277.

Mr. SIMMONS. Mr. President, I desire to say that I think it would be very much better if we could consider the first five paragraphs of the flax and hemp schedule before taking up the remainder of it. I do not think the Senator from Kentucky [Mr. Bradley] would be in any way prejudiced, because he could move his amendments and his arguments when we reach the free list; and if not satisfied to do that, he would have the right to offer amendments in the Senate. I trust the Senator from Iowa [Mr. Kenyon] will withdraw his objection to our proceeding regularly with this schedule.

Mr. KENYON. Mr. President, I merely wanted to make known to the Senate the wishes of the Senator from Kentucky. I think the course suggested will be entirely satisfactory to and

will protect the Senator from Kentucky.

Mr. WILLIAMS. Meanwhile, Mr. President, the Senator from Wisconsin [Mr. La Follette] has gone to have a talk over the telephone with the Senator from Kentucky, and if he objects to what we have done I will then ask that the paragraphs be passed over.

Mr. BRISTOW. Mr. President, may I ask if the Senator from Kentucky should want the paragraphs reconsidered for the purpose of offering amendments, would the Senator from Mississippi be willing that they should be reconsidered in order that the Senator from Kentucky may present the matter which he desires to present?

Mr. WILLIAMS. If the Senator from Kentucky chooses to put his motion in that way, yes; but that would be totally unnecessary. When we reach the free list, the Senator from Kentucky can merely move to transfer a certain article from that place to a previous place in the bill with a certain tax, or he can offer his amendment to the free list itself.

Mr. McCUMBER. Mr. President, I desire to ask the chairman of the committee if he has determined to go on with Sched-

ule J this afternoon?

Mr. SIMMONS. Yes; we desire to go on with Schedule J this afternoon.

Mr. McCUMBER. I desire to offer some amendments to that schedule, commencing almost at the very beginning, with paragraph 272. I have not prepared the amendments, but I suppose, if the Senator insists on going on with this schedule, that

I can offer them as we reach each paragraph. I should prefer, however, that it go over until to-morrow.

Mr. SIMMONS. The difficulty about that is that there has been some arrangement that the other schedules would not be taken up this afternoon, and we should have nothing to do.

Mr. WILLIAMS. The Senator from North Dakota can offer

any amendment he desires.

Mr. McCUMBER. Then I desire to make a parliamentary inquiry. I have not had time to run through the bill since I returned, but I notice paragraph 272 is stricken out entirely. I presume, therefore, that the item covered by that paragraph is placed on the free list.

Mr. WILLIAMS. It is covered by paragraph 492 in the free

Mr. McCUMBER. It is transferred to the free list. the parliamentary inquiry—I do not know under what rule we have been proceeding up to this time—is whether or not committee amendments are first to be considered?

The VICE PRESIDENT. That depends upon what amend-

ment the Senator from North Dakota desires to propose.

Mr. WILLIAMS. The rule we have been following is this: If the committee amendment was to strike out an entire paragraph, then an amendment to the bill as it came from the House would have precedence, of course, so as to perfect the paragraph in that way if the Senate chose to do so; but where the committee amendment was in itself merely a change, instead of a substitution or an elimination, then the committee amendment has preference. If the Senator has an amendment to the House provision changing a rate of duty, or something of that kind, it would have precedence of the committee amendment which strikes out the entire paragraph.

Mr. McCUMBER. Mr. President, I will offer my amendment

at the present time, and that will bring the question to the

I move to amend paragraph 272, so that it will read:

Flax, not hackled or dressed, 1 cent per pound.

The VICE PRESIDENT. The amendment will be stated. The Secretary. In paragraph 272, page 83, line 12, it is proposed to strike out the fraction "½" and the word "of," so that if amended it will read:

Flax, not hackled or dressed, 1 cent per pound.

Mr. WILLIAMS. Of course the Senator knows that flax is not raised anywhere in this country except for flaxseed.

Mr. McCUMBER. The Senator is mistaken. We are raising flax in this country the fiber of which is being used, and used quite extensively. It is not used for the finer fabrics; but this covers everything in the nature of a flax fiber.

Mr. WILLIAMS. What is it used for?

Mr. McCUMBER. It is used for packing in refrigerator cars; it is used for making paper.

Mr. WILLIAMS. It is not decorticated and sold as flax anywhere in the United States?

Mr. McCUMBER. It is sold as flax, not hackled or dressed.
Mr. WILLIAMS. The Senator means the stalk is sold?
Mr. McCUMBER. The Senator from Mississippi understands

what the hackling is, and the dressing?

Mr. WILLIAMS. Yes.

Mr. McCUMBER. Of course it is shipped into this country under all of these conditions; and without any duty flax straw, flax, not hackled or dressed, from foreign countries, will come into competition with the same character of flax straw produced in this country.

I think I can better indicate to the Senator just what there is in this whole flax question if I submit to the Senate certain letters written by Mr. Blehdon, who is a manufacturer of this product in several of the States of the United States. They are addressed to the chairman of the Committee on Finance, and also addressed to the chairman of the Committee on Ways and Means of the House. Mr. Blehdon goes quite thoroughly into the question; and while the language he uses is not that which I would naturally adopt myself, there is nothing in the language that would make any of it at all objectionable.

With the permission of the Senate, I ask the Secretary to read the marked portions of the letter which I send to the desk.

The VICE PRESIDENT. Is there any objection? The Chair

hears none, and the Secretary will read as requested.

Mr. McCUMBER. The first letter that I will send up is one addressed to Hon. Oscar W. Underwood, chairman of the Ways and Means Committee of the House.

The Secretary read as follows:

(Schedule J, flax, etc. No. 333, flax straw, \$5 per ton. No. 336, tow of flax, \$20 per ton.)

BUFFALO, N. Y., March 21, 1913.

Hon. OSCAR W. UNDERWOOD, Chairman Ways and Means Committee, Washington, D. C.

Hon. OSCAR W. Underwood,

Chairman Ways and Means Committee, Washington, D. C.

Hoverable Sir. On the 25th day of January I appeared before your committee, as per record page 3503 to 3507, inclusive.

I appeared as the chosen representative of 32 towns in North Dakota and Minnesota, their commercial clubs, manufacturers of tow, and the farmers as sellers of flax straw or owners of small tow mills.

I then submitted a lot of petitions, with many signatures, and since that time there has been submitted direct from the farmers and myself a very large number of petitions and signatures, all praying that in order that they may sell their flax straw the present duty on the same may be continued, to wit, \$5 a ton of 2,000 pounds on flax straw, and that the present duty of \$20 per ton on tow, which is made out of flax straw, be sustained and continued, for if no tow can be made in this country the flax straw can not be sold.

Tow is used for upholstering furniture and lining of refrigerator cars, and thousands and thousands of tons of straw are bought of the farmers at from \$3 to \$9 a ton.

Canada raises as much straw as the United States, and Russia raises many times more; and as the wages in Canada are only one-half and in Russia about one-sixth what they are in America, and as flax straw can be bought over there at one-half, the price, the farmers could not sell their straw, and thereby would be deprived of many hundreds of thousands of dollars, some farmers having 10 tons for sale, some a few thousand tons.

The selling of flax straw is an absolute necessity to the farmers in order to make the raising of flax, as it is called by them, profitable, and the United States Agricultural Department has for the last few years made great efforts to encourage the raising of flax.

Of course, were the duty taken off or in any considerable way lowered the farmers could not compete, for they have to pay to hired men during seeding and harvesting from \$3 to \$5 a day, whereas the same labor can be had in foreign countries for fro

In good years about 3,000,000 tons of flax straw is raised in the United States, for which there was no market in the past until tow mills were built about 30 years ago, and about 5 years ago the carlining factories were started to line refrigerator cars with tow, and by this the icing of railroad fruit cars between California and the East has been reduced to one icing where formerly, when charcoal, cattle hair, and cork were used, three icings were necessary.

The farmers in the Northwest are very much concerned that the duty should remain.

has been reduced to one icing where formerly, when charcoal, cattle hair, and cork were used, three icings were necessary.

The farmers in the Northwest are very much concerned that the duty should remain.

The price of tow ranges from \$25 to \$60 and even \$80 per ton for best qualities; for the making of flax straw into tow it takes from 3 to 6 tons of straw to make 1 ton of coarse or fine tow, some of the straw having to run from two to five times through brakes, pickers, shakers, all driven by steam or electricity, and from 12 to 50 men are employed in tow mills.

Two concerns at St. Paul, Minn., and Port Huron, Mich., and several others, make binder twine out of American flax straw.

The said flax straw is raised in the States of North and South Dakota, Minnesota, lowa, Wisconsin, Michigan, and Ohio, and in some of the States large sums are now invested to manufacture wrapping and writing paper out of American flax straw.

Now, therefore, the raising of flax, or flax straw as it should be technically called, should certainly be protected in order to make a great industry out of it, as it will be in time.

Some of the witnesses before you on the 24th and 25th of January—those connected with the Barbour Co., at Allentown and Paterson, and several other concerns who manufacture thread—had the temerity to say that no good flax for spinning is raised in the United States; whereas, as a matter of fact, the States of Michigan and Ohio, and some parts of Wisconsin, and even in Minnesota, raise flax straw which is perfectly fit for spinning; but it is not encouraged by these big firms who manufacture and make prices on thread, and they prefer for some reason to import European flax, because it is cheaper than it could be produced here under American labor wages.

The Barbour Co. has imported as not hackled, and experts had to be called in to relieve the minds of the United States collectors—in preference to importing it via Suspension Bridge.

In ever heard of "flax dressers" in this country, unless they were amploye

As a matter of fact, tow can not be used for spinning, for it is used only for upholstering, refrigerator-car linings, wrapping and writing paper.

Flax for spinning is not a raw material at all, for it takes great labor and large expense to make long spinning flax out of flax straw; for, as I said, flax straw is worth from \$3 to \$9 a ton, whereas long spinning flax is worth from \$250 to \$350 a ton.

Now, look at the statement of the United States Linen Co., Chicago, who came before you and told you honestly that it is false that no spinning flax can be raised in this country. (See p. 3490.) They declare these statements as false and unfounded; and I, with great respect for your committee, and with truth and honesty, do declare these statements false, and I say:

Gentlemen of the committee, give the farmers of the United States chance to raise the same flax straw as they do in Europe, and they can raise it, and they will raise it, as the United States Linen Co. tells you, and as the International Flax Twine Co., of Chicago, who make binder twine, could tell you; but the farmers must be given a chance, that with the high wages they have to pay in this country the duty will remain to protect them and not open the country to these millionaire thread and twine manufacturers.

Less than 40 years ago all the flax straw raised in the United States was burned; now the Amenia & Sharon Land Co., of Amenia, N. Dak., and others, have imported thousands of bushels of Russian and Irish flaxseed to this country and have sold it to the farmers and are now raising flax straw, some of it a yard long and as good as they do in foreign countries; and they will do more, and the United States will raise flax straw and flax as good as others; and the farmers therefore pray for protection that the duty remain as it is.

I have the honor to be,

Yours, very respectfully,

Representing the flax-raising States in the Northwest, as per petitions and thousands of signatures turned over to the clerk of your committee, Mr. Daniel C. Rover.

Mr. BRISTOW. Mr. President, will the Senator from North Dakota yield to me?

Mr. McCUMBER. I yield.

Mr. BRISTOW. I desire to call the attention of the Senators in charge of this part of the bill to paragraph 492 of the free list and to the alleged reproduction of the present law.

Paragraph 334, which deals with this particular item in the present law, reads, as given in the handbook:

Flax, not hackled or dressed, & of 1 cent per pound.

The present law really reads:

Flax, not hackled or dressed, 1 cent per pound.

So, in attempting to reproduce the present law they have simply cut the duty in two, while it is alleged to be the present law. Does the Senator observe that?

Mr. WILLIAMS. What is the Senator's question?
Mr. BRISTOW. That is a clerical error, is it?
Mr. WILLIAMS. Undoubtedly. It is either an error of the

clerk or an error of the printer, or of somebody.

Mr. BRISTOW. Again, if the Senator will notice bracket 2, which relates to the duties collected on this particular item, it gives the equivalent ad valorem for 1905 as 8.59 per cent, for 1910 as 7.97 per cent, for 1912 as 7.21 per cent, and then estimates 3.67 per cent as the duty to be collected under this bill. That estimate is based upon the bill as it came from the House, is it, and not as it came from the Senate committee?

Mr. WILLIAMS. Undoubtedly. Of course, there will be no revenue the way it comes from the Senate committee. Nothing in the shape of revenue could come from an article on the free

Mr. McCUMBER. Mr. President, under the old law a duty of \$5 per ton, I believe, was levied upon flax straw. A duty of \$20 per ton, or 1 cent per pound, was levied upon hackled flax; that is, flax broken and partly stripped so that it might be advanced to a stage necessary to separate the fiber from the pulp.

Mr. WILLIAMS. Under the old law there was a tax on the tow of flax of \$20 per ton. The tax upon hackled flax, known as "dressed line," was 3 cents a pound.

Mr. McCUMBER. I have not the figures here; but it must be remembered that as the first process applied to the flax if it is to be used for spinning purposes, I presume it would have to be pulled. That is not done in this country at all. We are not attempting to raise flax to any great extent, at least, for the purpose of spinning into yarn for making the finer fabrics.

we shall ever be able to do so or not I can not say.

I have in my office several samples of a new process whereby instead of retting or rotting the flax there is a machine used that will take the ordinary flax straw which has passed through a separator and will break the woody pulp so that it can be released from the fiber; and it is said that flax fiber from a foot to 18 inches long may be produced from it, and that fiber might be used for ordinary spinning. But I have not as yet received any samples or any information that would justify me in the assumption that that can be made a success in this country. The great expense in the preparation of the flax straw and converting it into the fiber is in the retting process, in which it must be laid out in the sun and rain until the woody pulp is rotted and may be easily removed. The sections of the United States where flax is produced in the greatest abundance are the drier sections of the country, where this could not be done successfully. The cost of labor in this country is so high that it could not be successfully conducted.

What I am principally interested in is the flax straw and the flax which is converted into a kind of tow in all of the small mills, many of them owned by the farmers themselves, scattered throughout the two Dakotas and Minnesota and some in Michigan, whereby the flax straw, after the seed itself has been separated, has a marketable value. It passes through the separator; then these little mills take that product, and while they do not do any retting they at least have a process whereby they separate the woody pulp from the fiber and produce a very short fibered product, a product that is wholly unfit for the higher grades of spinning, and yet is fitted for the purposes for which it is used-to some extent for the manufacture of twine or rope and to a great extent for packing in refrigerator

cars, the making of paper, and like purposes.

The farmer ordinarily receives about \$3 a ton for his flax. He is at least furnished a market for his product wherever there is a mill in the vicinity and near enough at hand to justify the trouble and expense of hauling it to market. It is well said to be "the poor man's money." Ordinarily if the farmer is doing reasonably well he can find better employment than hauling flax to market at \$3 per ton. But in cases of drought, when his crops fail him, when his flax does not fill well, he may make up to a certain extent by hauling this product to market and receiving a little sum of money for it-probably at least enough to take care of his taxes.

I want a protection-I will call it a protection, if you see fitif not upon the straw itself, at least upon the product which comes from the straw. This process converts it into tow. As is shown in the letter of Mr. Blehdon, who is a manufacturer, that tow is worth from \$18 to \$20 per ton, I think. It is worth that for the purposes for which it is to be used. It is worth nothing for spinning purposes. Therefore nobody can be benefited in the matter of cheaper linen fabrics by reason of a reduction of the duty on this class of tow.

If you could so amend your bill as to make the duty applicable to the character of low-priced tow, which is unfitted for the manufacture of linen fabrics, I should not seriously oppose the other portions of the paragraph. But certainly there ought to be a protection for that.

Will these mills run without it? The protection on tow, I believe, as given by the House, is \$10 per ton-one-half what it

was before. From the very best information I can obtain the mills may yet run and produce and will be able to do so with that protection. From the same very best information, unless they have that protection they will be compelled to close, on account of the introduction into this country of the same material from Russia and from Canada.

I wish to save that much out of this bill for the benefit of the farmers of my State and the two adjoining States. North Dakota produces perhaps half of all the flax produced in the United States, while Minnesota and South Dakota produce prac-

tically the other half.

I desire also to present and have read another letter, written by Mr. Bolley, dean of and botanist in the Agricultural College of North Dakota. I had marked only certain sections, as he referred in one of the sections to his own political affiliations; but I do not know but that it may be proper to insert all of the So I will ask that the entire letter may be read, prefacing the reading with the statement that there is perhaps no man in the United States who is better acquainted with the flax conditions of the country than is Mr. Bolley, of the Agricultural College of North Dakota, and he speaks as an expert upon the question.

It has been claimed here that we can not produce the long-fibered flax in this country. We can produce it, but under present conditions we can not afford to produce it. That is the real answer to that proposition. Were the protection suffi-cient to justify the employment of labor, we could furnish in this country all of the fiber that would be needed for all of the products of flax fiber in the United States. I am well aware that as a Republican Congress has not given us suffi-cient protection to do that I can hardly expect a Democratic Congress to go beyond a Republican Congress and give us that protection. But I do ask—and I think I am justified in asking-that they will so amend this schedule that all of the lower priced short-fibered flax may be protected to the extent of \$10 per ton.

I will now ask to have read the letter from Mr. Bolley.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and the Secretary will read as requested.

Mr. McCUMBER. I will say to the Secretary that he may read it all.

The Secretary read as follows:

NORTH DAKOTA AGRICULTURAL COLLEGE AND UNITED STATES GOVERNMENT EXPERIMENT STATION,
DEPARTMENT OF BIOLOGY,
Agricultural College, N. Dak., April 8, 1913.

Hon. OSCAR W. UNDERWOOD, House of Representatives, Washington, D. C.

House of Representatives, Washington, D. C.

DEAR SIR: You will pardon me, an experiment-station worker, for a short letter as to the interests of the flax and hemp industry.

That you may not think of me as a high protectionist, let me say I east my first vote for Grover Cleveland the first term, but have not seen fit to vote for high protection any time sluce. However, our country seems to have adopted the system of raising a part of its revenues by tariffs rather than by direct legislation. Just in so far as it places a tariff upon one part of an industry while it leaves the other on the free list just that far our Government militates against the latter industry or part.

As an experiment-station worker I have spent a large portion of 20 years of my life in studying the best interests of the flax crop, with a view to helping our farmers retain that crop as a permanent one. I have visited every flax-cropping region in Europe and studied their methods.

methods.

In the interests of the farmers of the Northwest who have now learned how to do this line of work in agriculture, I hope you will not grant the wishes of the thread manufacturers and linen manufacturers of this country—that is, the right of retaining the duty on their manufactured products and at the same time grant their request to place the farmers' products—flax straw and flax tow, and hackled and unhackled flax—on the free list, or anything like near it. If the manufacturers are to retain their present protection, it is hardly fair to say to the American farmer: "On everything you have to wear and all the tools you have to work with in raising the flax crop we will tax you," and at the same time say to him, "If you succeed in raising anything we will give your product to the manufacturer free of tariff tax."

you," and at the same time say to him, "It you succeed in raising anything we will give your product to the manufacturer free of tariff tax."

I have read the tariff hearings on Schedule J with a great deal of interest and find that most of the arguments by Messrs. Barbour, Starling, Loughlin, and others, so far as they indicate or say that flax for fiber purposes can not be grown in America in as good quality as in any country in the world, that they are either mistaken, do not know what they are talking about, or, which is more likely, are willfully perverting the truth.

Whenever the farmers of the northern portions of Michigan, Wisconsin, Minnesota, and many parts of Oregon, Washington, and Maine, or any of the wetter regions of the Central States, wish to raise fiber flax for fiber purposes they produce a quality as good as any produced anywhere in Europe.

My hope is that in whatever way you change the present tariff conditions with reference to Schedule J you will give the farmer his just share of the protection, if there is to be any.

Mr. Chairman, it is easy for men who would like to have products which they work upon brought in free of duty to call the products which the American farmer is able to produce "rubbish," to make assertions that such products are "worthless," to say that "nothing can be grown," etc.

I am sure you take such assertions for what they are worth when you remember that the American soil and climate produce in rather high

I am sure you take such assertions for what they are worth when you remember that the American soil and climate produce in rather high

perfection any of those products for which the American market gives fair remuneration. Under other cov

Under other cover I send you copies of certain bulletins and amphlets, which I hope may in part indicate to you my interest in the subject.

Hoping you will pardon me for writing to you uninvited, I am, Yours, respectfully, HENRY L. BOLLEY, Dean and Botanist.

Mr. McCUMBER. Mr. President, there are some pertinent questions asked in that letter of the majority side of the Senate. There are important questions asked, and I would be greatly pleased if the chairman of the Committee on Finance would inform us why, while giving at least some protection, while levy-

ing a certain tariff upon the products of the mills, there should be at the same time free material given to the mills. Any Senator on the other side can answer. I ask my question, of course, of the chairman, but if the Senator from Mississippi will do me the honor of answering the question I shall be

pleased to have an answer to it from that source.

Mr. WILLIAMS. I hesitated about replying, because I doubted that the Senator was seriously asking the question at this part of the debate. That question has been asked in one form or another five, six, or seven times, and it has been answered five, six, or seven times. We have chosen to put the textile raw material upon the free list, because thereby we were enabled to make still greater deductions than we otherwise could have made in the finished product.

Mr. McCUMBER. For whose benefit?
Mr. WILLIAMS. If you count the amount of dollars we have taken off the raw material instead of the mere percentage and the amount of dollars we have taken off the finished product, the Senator will find we have not discriminated in favor of the latter as against the former. Of course, from the Senator's standpoint as a protectionist it is not worth the snap of a finger, but from our standpoint it is worth a great deal to us.

At any rate, it justifies us, in our opinion.

Now, take this question of flax. As the Senator has well said, we could raise all the Irish flax for the world in the United States if we wanted to. Illinois, Indiana, Ohio, and Kentucky can raise it as well as South and North Dakota and Minnesota. I remember, when I was a boy, seeing long Irish flax growing. As a matter of curiosity my father planted it to see whether he could grow it or not. But when it comes to the question of decorticating it it is utterly impossible to do it in the United States and get a flax fiber fit for spinning. We can raise flax fit for spinning, but we can not get flax fiber to spin without costing us a great deal more than it would be justifiable, even from a protectionist's standpoint, to levy a duty.

The Senator himself just a moment ago confessed that to be true, because he says that the high protection party in this country, going as high as they ever dared, have never yet dared to put a duty high enough to enable the American farmer to compete in the question of decorticating or retting the flax with India and with a great many other parts of the world.

Now that I am about it, because I do not want to occupy any time and I wish to give the Senator the conclusion of the discussion, if every statement made by the writer of the first letter he had read were a reliable one, I think he must be a very reckless man when he makes that statement. He says that labor is twice as high as in the countries near us which will compete with us in flax, and that is in connection with straw of flax and tow of flax. Of course, the writer of that letter knew that labor in America was not twice as high as it was in Canada. Of course, he knew that a product that was worth only from \$3 to \$3.75 a ton can not be hauled either by rail or by road or by water any long distance without consuming its entire value in the market. So much for that,

The letter writer confesses that we made about 3,000,000 tons last year of this flax—straw and tow. We imported about 170 tons of one and not much of the other; I have forgotten how much of the other.

Mr. President, once for all I will state the reason why we have put the raw materials of the textile industry on the free list. The Senator must remember that cotton was already there and jute was already there. We have placed hemp and flax and wool there that we might have an opportunity of cheapening the finished product to the consumer of the finished product. The difference between reducing the duty upon a finished product and upon the raw material is this: If I reduce the duty upon the finished product such and such a percentage, amounting to so many cents, say 3 cents in the yard, I have reduced the price to the consumer only 3 cents in the yard. But if I take off the duty upon the raw material I have taken off all the intermediate profit of from 15 to 25 per cent at each stage of the process. I have taken off all the compensating duties which are piled on plus something or other at each

stage of the manufacture. So if the part of the final cost which the raw material would make were 5 cents a yard, of course, when I have taken the tax off the raw material I have reduced the tax upon the finished material 20 to 25 cents a yard.

That is just as an illustration. Mr. McCUMBER. Mr. President, I think I have the position of the Senator pretty will in mind. It is this as applied to the particular subject which I am discussing: He reduces the tariff 100 per cent on the farmer's finished product for the benefit of the manufacturer and then gives a reasonable protection to the manufacturer to the end that the farmer may get the thing that the manufacturer has produced from it somewhat cheaper. In other words, the farmer's protection is taken away from the tow that comes from his flax and from the flax, so that the farmer will be able to buy his refrigerator cars at a less rate, because the principal purpose for which the product I am speaking of is used is for upholstering and for the packing of refrigerating cars.

Now, just how the farmer is going to get any benefit out of that and just how the public is going to get any benefit out of

it I do not know.

I will admit that the manufacturer of refrigerating cars will undoubtedly receive a benefit. The upholsterer of car seats will undoubtedly reap some benefit. But I fail yet to see—as I have failed to see anywhere in this bill-where the farmer will get a special benefit from placing everything that he produces practically on the free list.

Mr. WILLIAMS. Mr. President, does the Senator from North Dakota pretend that flax straw, about which he is talking, could possibly come here from any country in the world except

Mr. McCUMBER. Oh, yes; I take it— Mr. WILLIAMS. You contend, then, that an article worth \$3 to \$6 a ton could bear transportation from India to some-

Mr. McCUMBER. From Russia; yes. A great deal of it from Siberia and Russia could be baled and used for ballast in many of the Pacific ships, as is shown by the letter of Mr. Blehdon and by experts who speak upon the subject. I assume

that they know whereof they are speaking.

I am not dealing here with the long-fiber flax straw. If the Senator believes that the American public will buy their linen clothing and their linen fabrics, their tablecloths, their towels, and so forth, any cheaper because of the reduction in what he calls the raw material, I can see some reason why in that case he might favor it. I do not believe they will get any benefit whatever, because of the fact that the tax upon what he calls the raw material is such a mere bagatelle that it will not be taken into consideration and will form no part of the retail price of the article into which it enters. It is the retail price that the public must always deal with. But admitting the argument that they will get some benefit in that respect—which I do not believe-no one will get any benefit of the reduction of the duty upon this short-fiber straw that I am seeking to perpetuate the old duty upon, and which is not used for any of these fabrics. I am asking that this and this only may be placed upon the old condition for the benefit of that farming element, every shred of whose protection you have taken away by this bill under the assumption that the thing that he produces is somebody else's raw material. Yes, it is; but it is his finished product, and he is just as much entitled to proper protection upon his finished product as is the manufacturer upon his finished product. It is the height of injustice to say to him "You shall have no protection, whereas the manufacturer shall have protection," when you take into consideration the further fact that his profits are a mere bagatelle in the operation of his business as compared with the profits of the manufacturer. The labor that produces his articles is not paid one-quarter, hour for hour, what the labor is paid that produces the other articles. If there is any man upon the face of the earth who deserves a protection for his labor, it is the farmer. If there is any woman upon the face of the earth who deserves a protection for her labor, it is the farmer's wife and daughter. When you take their product and cast it to the winds as mere rubbish of raw material that must be taken possession of, and immediately it becomes gold the moment city labor handles it, then you do rank injustice to that farmer.

First, he must purchase his land. He has got to purchase that land with a mortgage upon four-fifths of his working life before he will ever become the owner of it. He must then plow and break and grub out and care for that land. He must pay

finished product, then I fail to understand what on earth is a finished product, and I fail to understand why he should not have the same consideration as any other American citizen.

I picked up to-day, Mr. President, a copy of the Modern Miller, and in the Modern Miller I found a quotation from the Department of Agriculture, in which it gave the average farm earnings in the United States. It gave the method by which it was arrived at, and it was ascertained, without going into the particulars, that the average farmer and his family earn net \$318 a year. Net \$318 a year divided up among the family, which would generally represent at least five adult persons, would mean about \$62 a year each, which, reduced down to months would be something over \$4 per month. Now, you take that man and take that family; you take that character of American labor, and you say they are not worth any considera-tion whatever; that what God made them for is to produce something for the manufacturer to make, that their products are simply raw material to be utilized by the intelligent labor of

I protest against that form of reasoning. I have but one desire, and that desire is to make the earning capacity of the farmer, with a given amount of labor, equal the earning capacity of the best paid labor in the United States, and until it reaches that point the farmer is the last man upon the face of the earth to be discriminated against.

Mr. SHEPPARD. May I ask the Senator a question?

Mr. McCUMBER.

Certainly.

If under the protective system the aver-Mr. SHEPPARD. age farmer makes only \$318 a year, have you not delivered a most unanswerable indictment against the system?

Mr. McCUMBER. If under the protective system he gets but \$318 a year, under a free-trade system, which is to take up his markets and divide the only markets he has with the entire world, is he to be benefited and get more?

Mr. SHEPPARD. Why not leave it to the future and to the operation of this bill to show that it will benefit the farmer, to show that it will increase his earnings because it will increase

his markets and the volume of his business?

Mr. McCUMBER. If it will benefit the farmer and increase the value of his products, your bill is a deception to the general public, because you are going to give them cheaper bread, cheaper fruit, cheaper clothing, cheaper everything else that is manufactured from the products of the farm, and how on earth you are going to give cheaper products and at the same time increase the value of the farm products is beyond my comprehen-

Mr. SHEPPARD. It will make the purchaser of the farm products in this country so much more able to buy them, to buy so much more of these articles, that we will have a relative

decrease in the cost of living.

Mr. McCUMBER. That is answering somewhat around in a circle. You will make the laborer's wages better than they were before. If you make the laborer's wages so much better than they were before, I assume that you have got to maintain the present prices of the products.

I can scarcely conceive of a condition whereby you are about to raise the value of labor and at the same time decrease the value of the product. If you raise the value of the product which the farmer must buy, I still fail to see how he is going to be greatly benefited by it when you at the same time cheapen

the product which he sells.

Mr. SHEPPARD. In every great American enterprise success depends on lowering the price on the individual sale and increasing the volume of business. You can take, for instance, the rate of carriage on a railroad per person or per ton of freight. It is smaller than it was when the road was first established, but the profits of the carrier are much larger than they were before, because the volume of business has increased and in greater proportion than the profit per individual transaction.

Mr. McCUMBER. Yes, Mr. President. Then if the human stomach to-day will digest a barrel and a quarter of flour, next year, when flour is cheaper, it will digest two barrels.

Mr. SHEPPARD. We are willing to be judged by the results that this bill will develop.

Mr. WILLIAMS. But perhaps a man who does not now get enough flour may get some then. The Senator generally seems to forget that the man who has not had an opportunity to digest

a barrel and a quarter, may get half of a barrel.

Mr. McCUMBER. Well, I can see some philosophy in that, and break and grub out and care for that land. He must pay his taxes upon it. In the spring he must seed and harrow and care for it. In the harvest he must cut his grain and thrash it and plow up the land for another season. If the bushels which he produces, if the straw which he produces are not a the consumption from 6 bushels to 3.43 bushels-as I now remember during the worst season of that time-and contending that the same rule which decreased it 18 years ago will suddenly increase it now.

Mr. WILLIAMS. And all that under the beneficent operation

of the McKinley law.

Mr. McCUMBER. No, Mr. President; that did not occur under the beneficent operation of the McKinley law; it did not occur until about the year 1895. The smallest per capita consumption of wheat in the United States there had ever been was, I think, in that year. I may be mistaken as to one or two of the years; but it was during that time. The consumption of wheat fell off very materially from 1893.

Let us remember that while the bill itself which lowered the

duties did not go into effect until the middle of the year the conditions which would naturally precede the bill, with a knowledge of its provisions, came into existence as soon as that

was made certain.

Mr. WILLIAMS. Why are not those conditions preceding the passage of this bill?

Mr. McCUMBER. They are.

Mr. WILLIAMS. It is the same sort of bill. This country

was never so prosperous in its history as it is to-day.

Mr. McCUMBER. I am very glad that question has been raised to-day. There is no reason on earth but the present conditions that will wholly account for the lower price of cereals throughout the Northwest. They are lower to-day, as a rule, than they have been for many years, and they have been lower during the last year than they have been at any time since the Cleveland administration. Why is it? To be fair, I will answer a part of it-

Mr. WILLIAMS. At what time last year were they lower? Mr. McCUMBER. A part of it is due to the fact that we raised a very abundant crop of cereals in the Northwest last

Mr. WILLIAMS. A part of it is due to the fact that you

are predicting upon the crop of this year.

Mr. McCUMBER. The other part of it is due to the fact of the lack of confidence throughout the country and the fear of what will follow as the result of your tariff legislation.

Mr. WILLIAMS. When was this wheat price which you state was lower than it had been since Cleveland's administration?

Mr. McCUMBER. It has been lower on all of the 1912 crop. I refer to the price of cereals as a whole.

Mr. WILLIAMS. The 1912 crop? Mr. McCUMBER. Yes; the 1912 crop.

Mr. WILLIAMS. And who was President then? Mr. McCUMBER. In the 1912 crop?

Yes Mr. WILLIAMS.

Well, the crop is here yet. Mr. McCUMBER. Mr. WILLIAMS. The crop is here yet.

Mr. McCUMBER. The crop is being now sold.

Mr. WILLIAMS. But I thought the Senator referred to the prices in 1912

Mr. McCUMBER. I have a vivid recollection of who is President now

Mr. WILLIAMS. I thought the Senator said the prices in 1912 were lower

Mr. McCUMBER. No; I said the prices of the 1912 crop.
Mr. WILLIAMS. You meant the prices now, then?
Mr. McCUMBER. The prices that have taken effect since the

production of the 1912 crop, commencing along, we will say, in December of 1912.

In December, 1912? Mr. WILLIAMS.

Mr. McCUMBER. Yes, Mr. WILLIAMS. Then, how much lower have the prices been than they were in the preceding year?

Mr. McCUMBER. The preceding crop?
Mr. WILLIAMS. I mean, how much have the prices been

Mr. McCUMBER. For the same grades they have been really about 25 cents a bushel lower on wheat.

Mr. WILLIAMS. What was the estimated increase of the production-what percentage?

Mr. McCUMBER. The estimated increase in the United States was about 100,000,000 bushels,

Mr. WILLIAMS. What percentage would that have constituted?

Mr. McCUMBER. It is on a basis of 600,000,000 bushels. I am giving the round numbers.

Mr. WILLIAMS. A little over 16 per cent.

Mr. McCUMBER. The average crop, we will say, is about 650,000,000 bushels

But the real question that I am asking the Senator is, Why not maintain the present rates upon that character of flax | tions so as to make the matter clear.

fiber which is fitted only for the purposes mentioned in the letters which have been read to you? Will the Senator give me a reason for not doing so?

Mr. WILLIAMS I thought I had given it to the Senator. The Senator says that it is useful for some purpose or other. It does not make any difference to me; whatever it is useful for,

it will make that cheaper.

It will make that cheaper.

We McCUMBER. Then, in the Senator's opinion, it will make car seats make refrigerator cars cheaper and it will make car seats cheaper, and the farmer, who suffers, will get an equivalent benefit in lower rates of freight and in lower passenger rates.

Mr. WILLIAMS. Well, now, I do not think the Senator from North Dakota will undertake to make the statement that if you enable a man to fit up a refrigerator car for less money in the long run, if not in the short run, the man who ships products in refrigerator cars would not get the benefit of that any more than the Senator would take the opposite course and assert that you might make the price of refrigerating as high as you please, and the only man to suffer would be the man with the refrigerator car. The Senator knows as well as I do that in the long run the users of a thing, whether they are farmers shipping wheat and flax or what not, pay for the thing which

they use to transport their products.

Mr. McCUMBER. Mr. President, I wish I could entirely agree with that; it would ease my fears upon a great many subjects; but I have seen Congress take 20 per cent off sugar as it came in from Cuba, and I have seen the refiners put millions of dollars into their pockets without benefiting the public at all. The refiners bought their sugar cheaper, undoubtedly, in Cuba, because we had thrown off 20 per cent; but I did not see the dear American people getting any especial benefit from it. So where refrigerating cars are manufactured only by a very few concerns, always acting in conjunction and asking practically the same price, I am not looking for a reduction in the price of those articles owing to the fact that you have taken off the farmer's tariff upon a load of flax straw.

Mr. WALSH. Mr. President-

The VICE PRESIDENT. Does the Senator from North Da-

kota yield to the Senator from Montana?

Mr. McCUMBER. In just a moment. Again, it was said that if we would take off the duty on hides, something from which the farmer undoubtedly got a little benefit, the dear American people would all have cheaper shoes. We took off the duty under very strong pressure from the administration and with the assistance of the Democratic Party, and the result was that shoes and leather went up about 10 per cent. So, I am skeptical either in the short run or in the long run of the farmers of my State getting a benefit that will be commensurate with their losses following the destruction and closing up of the tow

I now yield to the Senator from Montana.

Mr. WALSH. I am interested in the Senator's discussion of this subject, because my State stands next to his own in the production of flax, a fact which the Senator seems to have overlooked, having accorded that honor to the State of South Dakota. Accordingly, I am interested to learn from the Senator just exactly where the competition is which he so much dreads

in the matter of flax straw. Mr. McCUMBER. Mr. President, there will not be so much competition in the raw straw. The reason for that is, as already suggested by the Senator from Mississippi, that it would scarcely pay to haul the straw any great distance; it will scarcely pay to ship it any great distance by rail; but that which is produced from the straw can be hauled and used for ballast for almost nominal rates; and paragraph 273 deals with the hackled flax, with that partly manufactured. It will pay to ship the manufactured article. It is now being brought in from Canada, and we have had some very close legal questions as to what constituted hackled straw and what constituted broken straw. Some of the Canadian firms were simply shipping in their hackled straw and calling it by another name, such as "broken flax," so as to escape the \$20 per ton charge. If you continue the flax straw to still another degree of manufacture, you will easily see that you will then have placed enough value upon it so that it will be profitable to ship it here from any place in Canada or from Russia, and if you destroy our home mills, so that they will not be kept running, then the foreigners will have, of course, a monopoly of the market, and without the protection of an adequate duty they will ship it in in a hackled form.

Mr. WALSH. Of course, that is a very lengthy answer to a

simple question as to where the competition is to come from.

Mr. McCUMBER. The Senator's question was deserving, I thought, of an answer that would sufficiently explain the condi-

Mr. WALSH. I have been an earnest student of this question, and I am seeking further light now. I apprehend that the Senator is not contending at all that factories across the line in the Canadian Provinces afford any burdensome competition to the mills on this side in the manufacture of flax tow from flax

Mr. McCUMBER. In one section of the country there is very little competition, so far as the straw is concerned, but the Canadians will become great competitors, and, in my opinion, will obtain a monopoly of the production of the hackled straw

for use in the American market.

Mr. WALSH. Could the Senator tell me, then, of some mill in the Provinces adjacent to his State or to my own State that will come into competition with either the flax straw or the

tow produced in those States?

Mr. McCUMBER. Mr. President, those States are not the only States that are in competition with the Canadian Prov-The larger amount of flax straw imported into the United States is not from northwestern Calada.

Mr. WALSH. Evidently not.

Mr. McCUMBER. It is from the eastern section of Canada. Therefore it would not come into direct competition with the product of the States to which the Senator has referred; but if it should come in free, without taking into consideration the freight that will be necessary to bring the product from the Dakotas to the eastern market, they could drive us out of the market. I do not understand that there are any tow mills in northwestern Canada at all. There may be some, but I am not informed of it if there are.

Mr. WALSH. Then, is the Senator able to advise us just what the difference is between the cost of flax straw which comes into this country from anywhere in the Canadian Provinces and the price of flax straw in the Dakotas and in Mon-

Mr. McCUMBER. Mr. President, the flax straw produced in Canada that comes in competition with the flax straw and the hackled flax produced in the United States is produced in the eastern section of Canada, contiguous to the mills where it is manufactured into tow. Without the duty the Canadian product would obtain possession of the American market, and we

could not compet with them.

Mr. WALSH. Well, what are the facts about the matter, and where are the figures in relation to the price of flax tow or flax

straw, we will say, in the Province of Quebec?

Mr. McCUMBER. I have been giving them in the letters which have been read from a manufacturer of flax tow. If the Senator will read the two letters, he will find considerable information in them.

Mr. WALSH. I have read the letters with care, and I had a duplicate of the last letter presented by the Senator from North

Dakota.

Mr. McCUMBER. If the Senator asks me what it costs to produce flax straw in any place in the United States or in Canada, he is asking me a question that is not susceptible of an

Mr. WALSH. Then, upon what basis does the Senator ask

for the protective tariff, for which he is pleading?

Mr. McCUMBER. I have here another letter from Mr. Blehdon. He seems to have been persistent in the presentation of this case to the committees of the House and of the Senate, because the action proposed strikes to the death a business which he has built up through long years of labor. He would not use the language that he does use in the letters unless he felt it was a serious matter to his business. I now offer another letter, dated April 12, written to Hon. Oscar Underwood by Mr. Blehdon, and I will simply ask the Secretary to read the marked portions, leaving out that part which I have indicated to be omitted.

Mr. SIMMONS. I should like to ask the Senator one ques-

tion before that letter is read.

Mr. McCUMBER. Very well.
Mr. SIMMONS. The letter, as I understand, is from the same gentleman whose letters the Senator had read a little while ago. In one of those letters he stated, as I caught it, that the labor cost of reducing flax straw in Canada was one-half of what it is in this country. I want to ask the Senator if he believes that statement?

Mr. McCUMBER. I believe that that is practically true in eastern Canada. Remember that in this letter Mr. Blehdon is dealing with the straw which comes in competition with the American straw which he receives. If I were speaking of what we call the Canadian northwest, I would say frankly that I think there is practically little or no difference in the cost of labor. As to the eastern section of Canada I am not so well informed; but from the best information I can obtain, the cost present cause. When the corn crop has been burned up in

of labor on the Canadian side is considerably less-I can not say whether it is half as much, but it is considerably less than upon the American side.

Mr. SIMMONS. Mr. President, in the discussions we have had on this bill up to this time I think no Senator has contended that there is any material difference between the labor cost in this country and in Canada. I am very much surprised to hear the statement that the labor cost here is twice what it is in Canada. I have frequently heard the statement that the labor cost here was twice what it was in Europe; but this is the first time I have heard it stated in these discussions that there was any material difference in the wage cost along the border as between this country and Canada.

Mr. McCUMBER. I think the Senator has forgotten that

when we were discussing the reciprocity proposition a couple of years ago an extended argument was made on the floor of the Senate concerning the comparative cost of labor in the Province

of Ontario and in New York.

Mr. SIMMONS. Yes, Mr. McCUMBER. I think it was clearly established that the price of farm labor in Ontario and all of the eastern Provinces of Canada was very much lower than in the contiguous territory in the United States.

Mr. SIMMONS. In certain sections of Canada, where they employed foreign labor—Chinese labor, Japanese labor, or Hindu labor; I think that was stated at that time. I did not suppose they employed that character of labor in the sections of Canada adjoining North Dakota and Montana.

Mr. McCUMBER. No; the Senator is mistaken. Mr. SIMMONS. I am asking simply for information.

Mr. McCUMBER. The character of labor of which the Senator speaks is only employed out on the Pacific coast. I think there is very little of that, and it is lower in price simply because it is worth less.

Mr. NELSON. Mr. President, will the Senator from North

Dakota yield to me for a moment?

Mr. McCUMBER. I yield to the Senator.

Mr. NELSON. Out on the Pacific coast, in British Columbia, which is not much of an agricultural country, they employ that kind of labor, but they raise no flax out there. Flax is raised mainly either in the three Provinces of the Northwest or in Ontario. Ontario and Quebec are the great flax Provinces, and there they do not employ any of that kind of labor.

Mr. SIMMONS. That is exactly the point I was making. I supposed that in the sections of Canada where they grew flax the labor was very much of the same character as in this coun-

Mr. NELSON. Mainly.
Mr. SIMMONS. Mainly white people.
Mr. NELSON. Yes; but the wages in eastern Canada—in
Mr. NELSON. Yes; but the wages in eastern Canada—in
Ara much smaller than with us.

different just across the line from Montana and South Dakota.

Mr. McCUMBER. No.

Mr. SIMMONS. But this writer said the cost was twice as great here.

Mr. McCUMBER. I have said again and again in all of those debates that the labor in northwestern Canada and in the Dakotas differs very little in price; but farm labor in eastern Canada and the eastern United States shows a very wide difference in favor of the American side. While I would not attempt to speak definitely and accurately on the subject, my remembrance is, from the testimony that was given at the time, that our labor averaged nearly 50 per cent higher in New York State, for instance, than in Ontario. I am speaking now of farm labor.

Mr. JAMES. Can the Senator state what was the price of

corn in the Northwest last year?

Mr. McCUMBER. I can not, for the reason that in my section of the country very little corn is raised for sale; and not being interested in that particular crop, I have not kept very close track of it.

Mr. JAMES. Did the Senator include corn in his statement as one of the products that is now lower than it was last

year?

Mr. McCUMBER. I did not have it in mind. I had reference to our cereal crop of the Northwest. Corn is raised in the Central States.

Mr. JAMES. I will state to the Senator that it is true that corn is selling now in St. Louis and Kansas City at 80 cents a bushel, and it does not appear to be one of the products that has been driven down by the attempted revision of the tariff.

Mr. McCUMBER. But there is always a cause for every effect, and the Senator from Kentucky certainly understands the

Oklahoma and Kansas and Nebraska, and when it is very much the price will be very much higher.

Mr. JAMES. The same character of argument would apply to the reason why wheat should be so much lower.

Mr. McCUMBER. Certainly; and if I only dealt with two conditions—an excessive crop one year and a very short crop the next year—I should scarcely be dealing fairly with the Senate. But in my remarks I covered the 15 years preceding 1912, and properly and justly gave credit for the lower prices through the excessive crop that was raised in the Northwest in 1912.

Mr. JAMES. I agree with the Senator-I do not know whether the Senator will go that far or not-that the law of supply and demand controls the price of corn, just as it controls the price of wheat; that a failure of the crop one year will cause the price of the product to rise and a greater supply next

year will cause it to fall.

Mr. McCUMBER. To be sure; the Senator is absolutely right. But the law of demand also depends upon the ability to purchase. When money is scarce, owing to lack of confidence, stagnation naturally follows, and with it a slackening of business that prevents or decreases the ability to purchase.

If the Secretary will now read the second letter-Mr. SIMMONS. Just one word, Mr. President. desire to enter into any extended discussion, but I do desire to ascertain exactly the position of the Senator with reference to this matter. I do not understand the Senator to be expressing any apprehension that flax straw of the quality and character that his State produces will come into competition with any straw that is now imported into this country.

Mr. McCUMBER. Oh, yes; it comes into competition with Canadian straw, which is already being imported; and my position is that without any protection it will come into compe-

tition with straw raised in Russia.

Mr. SIMMONS. But the unit value of the straw imported into this country last year, I think, was \$40 a ton, and I understood the Senator from North Dakota to say that this was straw that sold for only about \$3 a ton. I do not see how straw that sells for \$3 a ton could possibly come into competition with straw that sells for \$40 a ton.

Mr. McCUMBER. The Senator will find that the straw which comes in at \$40 per ton is the hackled straw.

Mr. SIMMONS. That is the only kind that appears to have

Mr. McCUMBER. I know; some of it has come in under the head of broken straw; but the hackled straw of longer fiber is worth probably \$40 a ton. It has to go through a milling process, and that is a very different proposition from the raw product as it comes from the farm.

Mr. SIMMONS. The Senator's State does not produce any of

that kind of straw, as I understand.

Mr. McCUMBER. Oh, yes.
Mr. SIMMONS. Any of the long-staple straw?
Mr. McCUMBER. The \$40-per-ton straw is not the longfibered straw that enters into the composition of fabrics. is used for the same purpose. The hackled fiber that would come in, fit for the purposes to which the Senator refers, would be worth from \$240 to \$260 a ton.

Mr. SIMMONS. Yes; but what I am trying to ascertain is whether the Senator's State produces any straw that would come into competition with the straw that is imported here,

valued at \$40 per ton?

Mr. McGUMBER. Yes; but under the present law we have not imported the straw, because the duty on the straw itself is practically prohibitive.

Mr. SIMMONS. Then, there has been no importation of this

character of straw up to this time?

Mr. McCUMBER. Certainly not, under a protection of \$5 per ton, when the straw itself will sell for from \$3 to \$6 per ton.

Mr. SIMMONS. That is what I thought. The Senator's position is that his State produces a straw that is worth only \$3 per ton. The Senator stated, earlier in his speech, that where the mill is not too far from the farm it is profitable to haul this straw to the mill and sell it.

Mr. McCUMBER. Yes. Mr. SIMMONS. I assume from that statement that it would not be profitable to haul it any considerable distance.

Mr. McCUMBER. It would not. The Senator is correct.

Mr. SIMMONS. Not even to the mill?

Mr. McCUMBER. No.

Mr. SIMMONS. The only straw that could come into competition with the straw raised here is that produced in Canada and that produced in Russia, as I understand the Senator?

Mr. McCUMBER. I do not think any great quantity of the straw itself would come into competition with ours. It would

be the hackled straw. I am speaking of the raw straw. It would be that which is partly manufactured.

Mr. SIMMONS. But the Senator is discussing this \$3-a-ton

straw, and I am trying to find out whether there is any danger of any competition with that from abroad.

Mr. McCUMBER. There is great danger of competition.
Mr. SIMMONS. And I am trying to find out whether there is any danger of that straw in its raw state—not in its hackled condition, but in its raw state—coming over here. Straw, while very light, is exceedingly bulky, and in transportation a bulky product, though light, is necessarily charged a very high rate. In my section of the country we sometimes buy hay from the West when we do not make enough, but because of the bulky character and the light weight of hay the freight rate is always as much again, and sometimes nearly twice as much, as the cost of the hay itself. If this straw has to be hauled any considerable distance, it seems to me the farmers of the Senator's State would not be in any possible danger of competition, because of the freight rates.

Mr. McCUMBER. The Senator is correct, provided the mills will keep running. But if you take away the protection to the tow mill-that is what we are dealing with here-which hackles the straw, so that it closes, the farmer can not haul his straw anywhere. You destroy his market, because, as you say, he can not ship it any material distance. The vice of this proposed action lies in the fact that you close the mill, and that is what

I am trying to keep open.

Let me make that clear to you. You will close the mills in the Dakotas and in Minnesota, because the flax of Ontario, which is very much nearer the point of manufacture, can reach it with a very small freight rate, while ours could not reach it without a very high freight rate. Therefore our mills would close and there would be held open only those, perhaps, in New York for the manufacture of the Canadian straw, because New York does not produce any.

Mr. SIMMONS. I will assume that the hackled product of this \$3-a-ton straw would be of very little value.

Mr. McCUMBER. Why?

Mr. SIMMONS. If the hackled product was of much value, I should think that of itself would advance the price of the raw

straw beyond \$3 a ton.

Mr. McCUMBER. Of course, after it is hackled it brings its value up to about \$18 a ton; but the freight rates from North Dakota, Montana, and Minnesota to New York are such that with free hackled straw they could not compete with the Canadian product, that would not have the same freight rate.

Mr. WILLIAMS. Mr. President, one word, if the Senator will pardon me. This straw which is worth \$3 a ten is carried to

a mill, where it is hackled, is it not?

Mr. McCUMBER. Yes. Mr. WILLIAMS. Could the straw which sells for \$3 a ton be carried to any mill which was so far away that the transportation rate would be more than \$3 a ton?

Mr. McCUMBER. Certainly not. The Senator is right as to

that.

Mr. WILLIAMS. Very well. My own experience as a farmer is that I can not afford to haul anything over 12 miles that is not worth over \$3 a ton, even upon a dirt road. rail or by water do you suppose this \$3-a-ton stuff will stand transportation?

Mr. McCUMBER. Remember that in no instance are we transporting straw in its raw state. The Senator is mistaken if he understands that we transport the straw itself by freight.

Mr. WILLIAMS. Very well; the Senator is not talking about straw. He dwelt upon it as "the poor man's crop" and all that sort of thing, and said that we were taking it away from the farmer. What I am trying to show is that nothing could come into competition with this product that had to come more than

12 miles by a dirt road.

Mr. McCUMBER. All right. We will assume that to be absolutely true, and undoubtedly it is true. But that which has to come 5 or 6 miles I do not think our farmers will haul 12 miles for \$3 a ton. That which has to come from 5 or 6 miles comes to a mill to be hackled and partially manufactured. Then it is in a condition where it will stand the freight to the place of manufacture. If you produce the product so cheaply in eastern Canada that we can not afford to pay the freight from that mill upon the product, the mill closes, and of course the farmer gets nothing. It is not competition at his door; it is competigets nothing. It is not competition at the ultimate place of manufacture,
Mr. WILLIAMS. The hackled flax is worth \$18 a ton, I un-

Mr. McCUMBER. I believe that is it. One of these letters gives the exact figures. I think it is worth from \$18 to \$20 a

Mr. WILLIAMS. Of course, like every other product in the world, it varies in price. The Senator has stated that a Canadian mill can take the straw at \$3 a ton and turn it into hackled flax which is to sell at \$18 a ton, and beat us in doing it. That is his argument—that they can turn the \$3 stuff into the \$18 stuff more cheaply than we can. If that be true, it must be due to one of several reasons, or all of them. Either they have cheaper labor working in their mills-remember, now, not on the farm, but in the mills-or they have better mill machinery or they have better mill management or they have a climate better adapted to the process of manufacture.

Mr. McCUMBER. Or better freight rates. Mr. WILLIAMS. Or better freight rates; one or the other. I can understand how, at one place along this great 3,000-mile line, the freight rates should be in favor of the Canadian, and how at another place they would be favorable to the American.

Mr. McCUMBER. At every place.
Mr. WILLIAMS. But I can not understand how they would be in favor of the Canadian all along the 3,000-mile line; neither

can the Senator from North Dakota.

Mr. McCUMBER. That is just what I have been trying to explain to the Senator. There will be no 3,000-mile freight rates for the Canadian, because his product, as I have stated over and over again, is produced in Ontario, very close to the place of manufacture in New York. Therefore he has a very small freight rate as compared with our very large freight rates.

M. WILLIAMS. If the Senator will pardon me, I understand that; but that flax straw has to reach the Canadian mill, has it not, before it is turned into hackled straw and before it is shipped to this country or anywhere else? The Senator will admit that it can not be carried to a mill at the present price of \$3 a ton farther than about 12 miles over a dirt road, and I should say about 50 miles over a railroad, without eating up the entire price. Therefore none of the straw will ever go to a mill farther than 50 miles away, whether on the Canadian side or the American side. In other words, the consequence of the entire thing is that the straw to be hackled must be carried to a mill that is within \$3 freight-rate distance of the mill in which it is hackled. So the idea of the straw in Canada going to any except very few American mills very close to the border is out of the question, and the idea of any of our flax straw going to any mill in Canada, unless very close to the border, is also out of the question. In other words, it is one of the things that must be done by little country establishments close to the flax straw or else the mill will close because it can not get the straw.

Mr. McCUMBER. The force of the Senator's argument always seems to exhaust itself at the first mill-that is, at what I may call the hackling mill-whereas the governing proposition is the cost of putting it into the mill that manufactures it into

Now, let me make that clear to the Senator, if it is possible. Let us suppose that in North Dakota the raw straw will yield three and a half to five dollars a ton, dependent upon the condition of the straw. It will bring the value of that up to \$18 to \$20 a ton to pass it through the first process in the little local Now, it is 1,500 miles from the place to which it must be consigned to manufacture it into tow. We will say that it will cost \$9 a ton—it may be more than that, but I am giving that as an illustration—to send that hackled straw to New York where it is to be manufactured. We will admit, for this argument, that it will cost the same in Ontario, Canada, to haul it to the mill and get it hackled, and then it may cost \$2 a ton to get it from there over to the mills in New York to be manufactured. The Senator can easily see that under that condition, with a difference of \$7 in freight rates, we could scarcely compete with the product in Canada.

Mr. WILLIAMS. I see after you got it backled the difference of \$7 freight rate would be an immense item, but I can also see that the fellow who did the hackling could not get the straw to hackle unless he got it within a distance of \$3 a ton freight

Mr. McCUMBER. Of course he must get it within a short distance.

Mr. WILLIAMS. Therefore, no matter what it is, the amount he can get is very limited, indeed.

Mr. McCUMBER. Suppose it is true that it is very limited: that depends on the number of mills, and the mills do not cost very much. Some of the little hackling mills cost, I think, not over \$800 to \$1,000, and from that up to two or three thousand dollars. If the business would justify it, the number would very much increase. We have some of them in our State; I do know how many, but enough so that they use a considerable of the straw when the times are particularly close. If the conditions will justify it, there will be enough of those little mills

to reach most of the American farmers. The consumption in the United States at the present time of course, will not justify enough mills to take care of all the straw; but because it will not take care of all is no reason why we should not give the northwestern farmer the benefit of what the American market can hold and can consume as against the world; and especially so as no one will reap a benefit from placing this product on the free list except the manufacturer of the refrigerator cars and upholstered seats, and so forth; and the proportionate part of the cost that would be represented in the tow that is used in them is so very small that I doubt if the public itself, either immediately or remotely, would get any appreciable benefit. But it means a great deal to the farmer of the Northwest during hard times, and especially this year in my State, where in the western half of the State, perhaps, not more than from a third to half a crop will be harvested.

I now ask for the reading of the letter I have sent to the desk.

Mr. WALSH. Mr. President, before we dispose of this matter I desire to remind the Senate that in the course of some remarks which I made here about two weeks ago I had read a letter from a banker at Fessenden, in the State of the Senator, addressed to a lady who is engaged in the business of raising flax in Wells County, in his State. She thought she ought to get something for the flax straw, but she was answered that the people burned their flax straw in the State of North Dakota and do not get anything for it; that they had communicated with the Union Fiber Co., of Winona, Minn., and had endeavored to sell the flax straw there, but the transportation rates were so great that they consumed all the profit there was in the enterprise, making it impossible to market the straw.

Accordingly I communicated by wire with the Union Fiber Co., of Winona, Minn. I understand the Senator to say that he does not claim anything for a duty upon flax straw, but he is solicitous about a duty on tow. The Union Fiber Co. wired

me, under date of July 28-

Answering telegram this date, duty on flax tow has only nominal effect on our business.

That it has only a nominal effect is disclosed in another letter which I got from a professor of the agricultural college of North Dakota, who favored me with a copy of the letter read by the Senator and addressed to Hon. OSCAR UNDERWOOD. I read from that letter, written by Mr. Henry L. Bolley, as follows:

Practically all the flax straw which has been raised in the State has been run through the thrashing machine, and either has been burned or used for feed. However, there are, perhaps, a dozen tow mills within the boundaries of Minnesota and North Dakota which consume considerable straw, each within its own reasonable shipping or handling distances.

Which, I suppose, means that they can only get the straw from a distance of 10, 15, or 20 miles, as suggested by the Senator from Mississippi, as it is impossible to transport it a greater distance than that and likewise that they can not transport their product to any considerable distance, and certainly in all reasonable probability not so as to come in competition with anything that is manufactured upon the Atlantic seaboard at all. He continues:

The farmers get from \$2 to \$2.50 per ton for the straw. You are probably also aware that there are several new uses being made of flax straw as grown from seed flax. A reasonably good binder twine is being made in Minneapolis. The Union Fiber Mills at Winona—

The same company-

are making some very splendid insulating boards and other types of fiber products which are used in electrical work, refrigerator work, etc. A large amount of fiber is also used in making straight paper board, and the board or paper which takes the place of back plaster in houses. It is also used to some extent for mixing in cements used for plasters. Paper pulp products are also being experimented with in one or more mills in this region.

This man is advocating a duty upon flax tow. He says:

Free introduction of noils or waste fiber from Russia or of flax straw packing or ballast, without other compensating features, would

Would likely-

destroy the present activities of the tow mills, which now produce a very large amount of this product in the Northwest.

The flax crop is struggling against many odds, but I believe that eventually it will prove to be one of the permanent and valuable staple crops of the Northwest.

Very truly, yours,

HENRY L. BOLLEY.

The explanation is one that is perfectly simple and perfectly easy. The freight rates absolutely preclude the farmers of the State of the Senator or the farmers of my State from getting any benefit whatever from a duty upon either flax tow or flax

Before I take my seat, Mr. President, because the esteemed Senator referred the prevailing low price of wheat to apprehension about legislation that may be enacted by this Congress and to the fact that there was an extremely large crop produced last year, I desire to call the attention of the Senate to the fact that the farm price of wheat last year was lower than it has been in any year since 1906, and by examining the figures the

reason is perfectly obvious.

In 1906 we produced 735,261,000 bushels in this country as against 692,000,000 the year before and 634,000,000 bushels the year thereafter, and the price went down to 72 cents. I do not apprehend that in the year 1906 there was any particular apprehension troubling the minds of the country in relation to tariff legislation. In 1912 we again had a bumper crop, the total production being 730,260,000 bushels, as against 621,000,000 bushels in 1911; that is, 109,000,000 bushels more than we had the year before, an increase in the neighborhood of 15 per cent. But the price went down to only 85 cents as against 72\xi{g}, the farm price in 1906.

Of course there was only one cause which produced the fall in 1906—the bumper crop of that year—but when the fall was only half as great this year, it was not due to the bumper crop

we had last year but to some prevailing apprehension.

Mr. McCUMBER. I would just as soon go back again if the Senator from Montana wants to revert to it. He would find some explanation of the 1906 crop not only as a bumper crop in the United States, but as a pretty good bumper crop in the world, which, of course, had its effect on the prices in the He would perhaps have to take into considera-United States. tion several things in determining what influenced the price. Our prices, of course, are governed in the first instance by the home demand, that being the principal place of consumption. That home demand is influenced though not governed by the general level of the world's prices, which is governed by the general world's supply. I could not answer at this time the Senator's proposition without going a little further and finding out what the world's supply is. So I will have to deviate from that and get back to the question at issue. The Senator says that the farmers can not send their product

to the mills any appreciable distance. For a number of years we have been shipping this hackled flax, or, as we call it, partially manufactured tow, from the Dakotas and Minnesota to the State of New York—to Buffalo, I think—where it is manufactured into tow. That very fact itself destroys the Senator's theory. We have been doing it right along. We have been theory. We have been doing it right along. We have been doing it up to the present time, and that is pretty good evidence that with a continuation of the present conditions we will prob-

ably continue doing the same thing.

No one has claimed that you can afford to ship the straw itself any great distance. No attempt is ever made to do so. We can only get the straw within a limited distance from the little hackling or tow mill, as it is called; but after we have hackled the straw, after we have partially manufactured it, under present conditions we then can ship the product almost to any portion of the United States in competition with the Canadian product.

Without that protection these little mills will be compelled to close, and then, of course, the farmer will receive no price whatever for his product; and if at Buffalo or Rochester or wherever else the manufacturing center is in the State of New York they can not get this material from the State of New York they will naturally get it over from Canada, and that will be a splendid market for all the straw practically raised in Ontario, while it will entirely destroy our own market.

We have had \$20 per ton protection on this hackled straw. believe that these mills could still run in the Northwest if the bill were left exactly as it was passed by the House, namely, at \$10 per ton; but I believe without fair consideration the majority of the Senate committee did not take into account the uses for which this hackled straw or short-fiber tow is used, but assumed that they were benefiting the general public by a reduction in the cost of the raw material which would be reflected in a reduction in the retail price of the manufactured product. But inasmuch as it does not go into any manufactured product your reason fails, your purpose is destroyed, and therefore I ask you to reconsider that one proposition of the shortfiber flax, which is not fitted for the manufacture of fabrics.

If the Secretary will read the letter or make another attempt to do it, I shall be pleased.

The Secretary will read as re-The VICE PRESIDENT. quested.

The Secretary read as follows:

BUFFALO, N. Y., April 12, 1913.

Hon. OSCAR W. UNDERWOOD, Chairman Ways and Means Committee, Washington, D. C.

Dear Sir: I have before me the proposed tariff bill, dated April 7, and in the interest of the Committee on Ways and Means, and in the interest of Congress in general, which I am sure wants to do the right by both sides, the Government and the people, and finally in the interest of the hundreds of thousands of farmers in the States of Maine, Ohio, Michigan, Iowa, Wisconsin, Minnesota, and North and South

Dakota, I respectfully call to your attention what this communication addressed to you does contain.

First, Duty on "tow of flax straw," as it should be, and not "tow of flax," as it is called erroneously under the Payne tariff and copied in the proposed tariff.

I say the duty on "tow of flax straw" has been reduced from \$20 per ton to \$10 per ton, and the tow manufacturers and farmers whom I represented and do represent have no intention of criticizing or complaining of your decision in that matter, and \$10 a ton on tow of flax straw straw shall stand, as far as we are concerned.

Second, On the free list, page 111, section 497, line 21, of the proposed tariff you have flax straw.

To the tow manufacturers individually it would not make much difference, for if we would we could simply import flax straw from Canada, Russia, and Ireland fifty times more than we could use, for such flax straw from European countries would be imported as ballast in all kinds of salling vessels, the same as African fiber and foreign fibers are imported, and we could even buy some of that straw, delivered at our mills, at the same price as we pay to the farmers of the United States, to wit, from \$3 to \$9 a ton, according to the States where it is raised and to length and fiber-containing qualities.

But, honorable sir, have you and your committee for a moment considered that that will interfere with several hundred thousand farmers who annually receive from twenty-five to several hundred dollars each for their straw, and which in most cases goes to the farmers' wives and necessities for the whole family?

In spite of the fact that great efforts have been made for the last few years to use the flax straw for paper making and for linen, so far the bulk has been used for making upholstering tow, refrigerator-car linings, but just now some paper and linen mills are being started.

Yet only less than one-half of 'the flax straw raised in the United States is salable for all these purposes so far, and therefore one-half is reluctantly b

each mill.

These manufacturers and the lying importers have conjured up a veritable lying hell, for they themselves and their million-dollar trusts asked to be higher and higher protected.

Third, The farmers are imposed upon and wronged in other ways.

Just look at page 96, section 387, where it says, "sea grass and sea weeds, if manufactured, 10 per cent ad valorem"; and that was the same under the Payne tariff, and yet some of these great combinations in eastern large cities import free from Africa a fiber they call African fiber, of which I, under special cover by registered mail, send you a sample.

Hundreds of thousands of the content o

asmple.

Hundreds of thousands of tons were imported from Africa as ballast, most of it through New York, Philadelphia, and Boston, and some through Fall River. This fiber, or sea grass—it grows in places near the sea—is first washed and cleaned and then spun by heavy machinery in order to give it a curl just like curled cattle or horse hair, then it is untwisted again just like curled hair and used for mattresses and upholstering of couches.

Formerly the importers put their heads together and made the appraisers doubtless believe that the cleaning and the spinning into rope of this fiber and sea grass was done by the heat of the sun—yes, some of these appraisers are very wise men.

So, therefore, as I said, hundreds of thousands of tons of that stuff are used for upholstering and for bedding, and the farmers are cut out of their sales of flax straw and the tow manufacturers of tow.

Fourth Therefore a new paragraph ought to be inserted, reading: "African fiber, spun in rope, 10 per cent ad valorem," or \$10 a ton, as it was in previous tariffs.

Now, Mr. Chairman, I have taken great pains to explain to you facts, true facts, and nothing but facts, biased by nothing, but justice to everybody all around, and the same statements have been made and are being made to Senators and Congressmen of the flax-raising States.

The matter is in your hands, and from you the farmers and the people connected with the lines in question expect justice, and I surely and we all have no doubt if you can do justice you will do it.

I have the honor to be,

Yours, very respectfully,

For himself and those manufacturers and farmers as per signatures, petitions, and powers of attorney submitted to the honorable committee.

Mr. McCUMBER. I especially call attention, Mr. President, to the fact that immense quantities, hundreds of thousands of tons, of somewhat similar fibers have been shipped from South Africa merely as ballast, and the same writer calls attention to the fact that the flax hackled could be shipped as ballast both from India and from Russia with very little or no freight rates, and, therefore, secure a market in this country. It is to protect ourselves not only as against the Canadian product, but also as against the product of other countries that an adequate duty is desirable.

I omitted to answer that portion of the argument of the Senator from Montana [Mr. Walsh] relating to the establish-

ment of a tow mill at Winona, Minn., and its business. One can scarcely present a letter and draw an intelligent conclusion from it unless he understands the business of the institution writing the letter. I think if the Senator would make close inquiry into the case he would find that the mill in Winona does not use the flax straw after it has been thrashed at all, through it may use some of it; but I understand that for part of its processes it uses green flax straw.

Then the Senator must also take into consideration the fact that it is located near Minneapolis, a manufacturing center, where it can ship its product. It may get enough straw for all its purposes in its vicinity, and it may have customers for the articles it produces right in Winona itself, which is quite a large city, or it may ship its product to Minneapolis, which, I think, is only about 50 or 60 miles away. That would present a case entirely different from the cases I have been discussing.

Mr. GRONNA. Mr. President-

The VICE PRESIDENT. Does the Senator from North Dakota yield to his colleague?

Mr. McCUMBER. I yield to my colleague.
Mr. GRONNA. I will say to the Senator from Montana
[Mr. Walsh] that anyone who manufactures fiber ware is not a customer for the ripened flax straw. Fiber ware, such as pails, washtubs, and washbasins, is made out of the green straw. The straw which my colleague has been talking about is straw left in the farmer's field after it has been thrashed and the seed has been taken from it. In no way could that kind of straw be used for the purpose to which I have referred.

It is true, as my colleague has said, that flax straw is being hauled, though, of course, only a short distance, to what we call tow mills. We have had tow mills in my own county. It brings only a small price, as the Senator from Montana and my colleague have said; but if the duty is entirely taken off, flax straw will be bought in the East instead of in the West. After the straw has been hackled it is reduced in weight. It is then baled and can be shipped quite a distance, in view of the prices which the manufactured article brings to-day. So it is hardly fair to compare the product of the Winona concern with the product

about which my colleague has been speaking.

Mr. WALSH. Mr. President, lest any possible misconception may arise about the character of the business done by the Union Fiber Co., I refer you to the fact mentioned in the letter of Prof. Bolley. Likewise, I simply read from a letter written by a banker in the city of Fessenden, Wells County, to his client, the lady who was trying to dispose of her flax straw. I suppose that probably a man engaged in the banking business in Fessenden would be thoroughly well informed about the possibility of disposing of such flax straw as passes through the thrashing machine in that county. He is evidently a very intelligent man and recites the fact that the lady had endeavored to make disposition not only of that the lady had endeavored to make disposition not only of that flax straw, but of other flax straw which he had, and the only place that he could find a market for it, as he thought, was at Winona. They quoted him a price, and he proceeded to figure the thing out and found that it was impossible to ship it.

Mr. GRONNA. Mr. President, if my colleague will yield to me again, I will say that I am not disputing the statement made by the Senator from Montana that a great deal of flax straw is

by the Senator from Montana that a great deal of flax straw is being burned and a great deal of it is being fed to stock; I am not disputing the statement that hackled straw might be used at Winona; but I have simply made the statement that for fiber

at Winona; but I have simply made the statement that for fiber ware green flax must be used; it must be pulled by hand the same are flax is pulled for linen in the countries of Europe where linen is manufactured.

Mr. McCUMBER. Mr. President, it did not need a bank president nor anyone else to tell this lady that flax straw itself could not be shipped from Fessenden to Winona and sold to advantage. She would have to ship the straw itself about 500 miles; but suppose there was a little mill at Fessenden—
Mr. WALSH. That is not the question. That was the only place he knew of where she could dispose of it.

Mr. McCUMBER. Well, possibly there might not have been a place very much nearer where she could afford to dispose of it. You can not ship flax straw any distance at all. Let us admit that it will not pay to freight such straw any great distance. I have tried to make that clear; but it does pay to ship the fiber. Remember that four-fifths or five-sixths of the weight and bulk is taken away after the flax straw goes through the hackling process. If there was a little tow mill in the vicinity of her farm, she could undoubtedly afford to haul straw that distance, and then the tow mill could afford to ship the fiber is stated of the farm, she could undoubtedly afford to haul straw that distance, and then the tow mill could afford to ship the fiber is stelf clear on to the State of New York to have it manufacturing two for about 25 put of sax straw, should be left at \$20 at on, the Middle flow for about 25 put of sax straw, should be left at \$20 at on, the Middle flow for about 50 farm and manufacturing two for about 25 pears, and I am known in every place in the Middle western, and Northwestern States where flax is raised, for I either own mill and the dispose of it. A count of the straw itself about 500 miles; put of the fiber straw itself about 500 miles; put of the fiber straw itself about 500 miles; put of the fiber straw itself about 500 miles; put of the fiber straw itself about 500 miles; put of the fiber is

immediate vicinity-and I mean by a tow mill a mill that first puts the straw through the hackling process-of course she will never have a market.

Mr. President, I have another letter written by the same man, Mr. Blehdon, dated June 21, to the chairman of the Committee on Finance. It may be that he repeats himself to some extent in these letters, but each letter contains new propositions which I consider very important to a proper understanding of the question, and, though it may duplicate to some extent some of his former statements, I can scarcely take the time now to segregate the several parts and so will ask for the reading of the entire letter.

Mr. WILLIAMS. Mr. President-

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Mississippi?

Mr. McCUMBER. I yield to the Senator, Mr. WILLIAMS. Would not the Senator just as soon have the letter printed in the RECORD at this point as a part of his

Mr. McCUMBER. I wish to have the letter read. As I have said, I have just returned to the Senate after an enforced absence of nearly a month, and it is somewhat necessary for me to refresh my mind as I go over these letters in order to present the case fairly.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

In re Schedule J-Flax, hemp, etc.

BUFFALO, N. Y., June 21, 1913.

Hon. F. McL. Simmons, Chairman Committee on Finance, United States Senate, Washington, D. C.

Chairman Committee on Finance, United States Senate,

Chairman Committee on Finance, United States Senate,

Washington, D. C.

Dear Sir: I respectfully submit to your consideration this letter containing facts of greatest importance to millions of farmers of the Middle and Western States of the United States, because part of their financial welfare does depend, and will depend, upon the result and outcome of the tariff, so far as their raising of flax is concerned.

The product, just as it is raised by the farmer, is called by them flax"; the boll at the top of the plant contains the flaxseed, and the stalk is called "flax straw." The seed is used for the manufacture of oll, and so forth. The straw, after it is thrashed, is sold by the farmer to the tow mills for the manufacture of tow for upholstering furniture and all kinds of filling, and some for the lining of railroad refrigerator cars, where formerly charcoal or cork or pressed attle hair was used. Tow is made in four or five different grades, from the coarse to the very finest grade, for which purpose from 2½ tons of flax straw for a ton of coarse tow up to 6 tons of flax straw for 1 ton of the finest tow is used, and which latter grade can be used for all kinds of spinning. The flax straw is brought by the farmers to the tow mills, which are distributed all over the Western and Northwestern States, from Ohto North Dakota. Ohio and Michigan produce the finest flax straw, and so does Wisconsin; and most flax straw is made into spinning flax.

The United States raise about 3,000,000 tons of flax, which means flax straw with the seed on, and there is only a market to the farmers for about 800,000 tons, and which they team direct to the tow mills and receive cash for the thrashed flax straw of from \$3 to \$9 per ton. Farmers farther away from the mills bale the thrashed flax straw and ship it to the mill and receive from \$3 to \$9 a ton for it, according to the quality and length of the flax straw. There are some farmers who receive as much as \$6,000 a season

In fact, Canada has exported many cars of tow, which they, under the present tariff, fraudulently billed as flax straw, and have sold it, and could sell it. for much less than we could produce it, when it is considered that we have to pay from \$3 to \$9 a ton for the straw, when it can be bought over there at \$2, and even some less.

Now, therefore, tow of flax being on the free list, the tow manufacturers will buy no more flax straw, for they will need none; and the many mills which are half in the hands of farmers themselves will have to close entirely; and you will hear soon that a great uproar and general outcry will be made when it is found that not only flax straw but flax tow you have put on the free list, and therefore destroyed a large income of the farmers and destroyed the manufacture of tow, wherefrom the farmers receive partly their income. Why should flax straw but of flax straw be on the free list when the United States raises 3,000,000 tons, a year and can sell only about \$90,000 tons, the farmers have to burn the Jalana little raised in the United States, and the United States product is searcely to be considered; but you will see this is a different matter with flax straw and flax.

Here please note that tow mills are small concerns, worth a mill from four to five thousand dollars upward. These, compared with the millionaire thread, twine, and rope manufacturers, who petition flax straw and tow on the free list—your favors in justice should certainly fall upon the poor farmers. The combination of thread and twine manufacturers, who have millions invested, care very little what happens to the farmer, nor will thread or twine be cheaper, flax straw or tow being on the free list. But, on the contrary, whereas the United States Agricultural Department is trying to encourage the farmers to raise the best straw only, and whereas these farmers, many of them, have imported foreign best flax seed—these thread manufacturers never have encouraged anything of that kind, but, on the contrary, told the Ways

Be just, gentlemen; be just to the farmers; for if the farmer is suppressed the whole country will suffer.

Yours, very truly,

N. R. BLEHDON N. R. BLEHDON,
For himself, and representing by powers of attorney
and free of charge the tow manufacturers of the
United States, commercial clubs, and thousands
of farmers, as per evidence submitted to the
Ways and Means Committee January 24 and 25,
1019 1913

Mr. McCUMBER. Mr. President, this letter, I believe, was addressed to the chairman of the Finance Committee. It asks a very candid question of the chairman. I think another letter, a subsequent one, which I have from Mr. Blehdon, indicates that the chairman of the Finance Committee failed to answer that question, undoubtedly because he was overworked at the time, or perhaps because he desired to reserve his answer until he would be able to make it in the Senate.

The question which is asked is this: If there are about 3,000,000 tons of flax straw produced in the United States, and and destroyed because it is valueless, why does the Senator desire to put flax straw itself upon the free list?

I presume the question has in mind this proposition: If flax

straw is so cheap that it hardly pays the American farmer to haul it to the mills, so that he must burn two-thirds of his product, why should the Senator ask that we have cheaper flax straw?

Mr. SIMMONS. Mr. President, of course I do not recall this particular letter. I suppose I had many thousand letters of that sort; and I could not undertake to answer all the questions about the tariff that might be asked me by correspondents.

Mr. McCUMBER. I appreciate that. Mr. SIMMONS. If I understand the Senator, he says that because we have more straw in this country than we have any use for, and have to burn it, therefore there ought to be a duty on straw. Let me tell the Senator, in the first place, that I have examined both the Statistical Abstract of the United States and the Yearbook. I find from both of them that while they give a statement as to the amount of flaxseed produced in this country and the amount of flax straw produced in other countries, they do not give any statement as to the amount of | a duty of \$67.20.

flax straw produced in this country. I suppose that is because flax straw in this country, as a rule, is about like rice straw and wheat straw and oat straw; it has practically no value.

Mr. McCUMBER. I assume, however, that those who are engaged in the manufacture of this article have made a computation in this way: Knowing about how many tons it would take to produce a given number of bushels, they can therefore arrive approximately at the amount.

Mr. SIMMONS. I think, as a matter of fact, to be very frank-and I think the Senator will agree with me about this flax is produced in this country not for the straw but for the seed. All of the reports give the amount of flaxseed produced in this country and none the amount of flax straw produced in this country.

Mr. President, I can not think the Senator from North Dakota really believes there is any necessity for a duty upon flax straw produced in this country, for purposes of protection, from his own standpoint. Surely up to this time, if the records of the department are worth anything at all, there has been no importation of this kind of flax straw.

Mr. McCUMBER. But the Senator must remember the rea-

son for it.

Mr. SIMMONS. There has been no importation of hackled flax made from this kind of straw. A little while ago I suggested to the Senator that on account of the light character of this straw it could not be profitably imported into this country from any foreign country; that the freight rates made that impossible, and prohibited its importation here. The Senator answered me by saying that it was not the straw about which he was talking so much, but it was the hackled straw about which he was talking; and he suggested that while the straw itself was worth only about \$3 or \$3.50 a ton, the hackled straw was worth \$18 a ton, and that that was of sufficient value to justify the payment of the freight rates from a foreign country into this country.

I think the Senator is mistaken about that. But, however that may be, the records show conclusively that neither has any part of this particular straw been imported into this country nor has any hackled flax made from that straw been imported into this country.

Let me read to the Senator from the official record of imports entered for consumption during the year 1912, under the head of "Flax straw." The unit value of the straw imported into this country in that year was \$40.98, and only 170 tons were imported; so that none of this straw worth \$3 a ton was imported. Now let us see if any of the hackled product of flax made of this straw was imported. The Senator says it is worth \$18 a ton. The unit value of the tow of flax imported into this country in that year was \$180; so it could not have been the tow made of this straw. The unit value of the backled flax imported into this country in that year was \$606.56; so it could not have been the \$18 product which he says is produced from this \$3 straw. The unit value of the flax not hackled imported into this country in that year was \$310.71. So it is demonstrated by these figures that there has not been imported into this country up to this time any of this straw, nor any of the hackled flax produced from this straw.

Mr. McCUMBER. What does the Senator conclude from

that?

Mr. SIMMONS. My conclusion is that it does not need any protection, because none is being imported; and because, as I have argued before, the freight rates upon the straw itself worth only \$3 a ton are prohibitive, and the freight rates upon the hackled product worth \$18 a ton are likewise prohibitive.

Mr. McCUMBER. The Senator has forgotten to mention the

fact that there has been practically a prohibitive tariff, and that is the reason it has not been imported. If the straw itself is worth only \$3 to \$3.50 a ton, and there is a duty of \$5 a ton, it naturally follows that there would not be any imported. If the hackled straw is worth only about \$18 to \$20 a ton, and there is a duty of \$20 per ton, it naturally follows that there would not be any imported. But if you take off the \$5 a ton on the straw and take off the \$20 a ton on the hackled straw you will find then that it will come in, and it will supplant our product in the American market. That is all there is to that argument.

Mr. SIMMONS. The Senator can make that argument if he wishes, but I doubt very much whether the Senator believes that would follow.

Mr. McCUMBER. I did not quite understand the Senator.

Mr. SIMMONS. I say the Senator can make that argument if he desires; but as I have read, a part of this very product imported last year bore a duty of \$22.40 and another part bore Mr. McCUMBER. I am assuming that there have been no

importations whatever of any particular value.

Mr. SIMMONS. The Senator is making the argument, then, that while there have been no imports of this \$3 product and no imports of this \$18 product, when we put it on the free list Mr. SIMMONS. The Senator is talking about a product

when he knows the freight rate upon that product is as high as the freight rate upon hay or the freight rate upon any of the very bulky products.

Mr. McCUMBER. The Senator is certainly mistaken about

that.

Mr. SIMMONS. Does the Senator believe for a moment that a product that a farmer can not afford to haul with his mules and his team for 12 miles on account of its small value, worth hardly as much as a cord of wood in my country, could, if we put it on the free list, be brought to this country from Russia, occupying in the ship upon which it is brought a space probably equal to that which would be occupied by a product worth

ten or twenty times as much?

Mr. McCUMBER. Certainly not, and I never have claimed anything so ridiculous as that. But the Senator will insist upon ignoring the fact that we may bring in from Russia the product of the tow itself. Nobody claims that you can afford to bring straw from Russia. The very fact that you can not ship across the country a carload of potatoes does not establish the fact that you can not ship across the country the starch that would be produced from those potatoes. There is no danger of shipping any straw from the Canadian Northwest to New York any more than there is danger of our shipping straw from the Dakotas to New York. But we can ship the hackled

product to advantage.

Mr. SIMMONS. But you have not done so.

Mr. McCUMBER. If I stated that it was \$18 or \$20 a ton, I probably should have said that it costs from \$18 to \$20 a ton for the hackling process, and therefore it would make the value, we will say, from \$21 to \$23 a ton. They can afford to ship that, because it is very heavy, because it is baled, and because it occupies but a small space as compared with the straw itself.

But destroy the mill and you have no market for it.

So there is no necessity whatever, when you get right down to your real argument, for taking the tariff off the straw. The only argument you can make at all is that it does not make any difference whether you have a tariff on it or not; but when you come to the hackling process, you can not even make that excuse. You have simply got to make the excuse that you want to reduce the price of the hackled product of this short-fibered straw for the benefit of some one and to the detriment of the American farmer. When we ask who that some one is who is to receive a benefit from it, we are led directly up to the manufacturer of refrigerating cars and upholstered car seats. They are the only ones who are to receive a benefit.

Mr. President, Mr. Blehdon has been very insistent, and undoubtedly feels—and I feel he is correct in it—that his business is being entirely destroyed. He has an interest in and represents mills all over the Northwest. He declares that those mills will close upon a free hackled product. I submit the last letter from him upon that subject, and I ask that it may be read.

Mr. STONE. How long is it?

Mr. WILLIAMS. Unless the Senator has some particular reason for having it read, would be not just as soon let it go into the RECORD?

Mr. McCUMBER. This is the last one, and I have a par-

ticular reason for having it read.

Mr. WILLIAMS. It is nearly 6 o'clock, and we have spent the whole day practically on hackled straw. An executive session will be desired in a few minutes. Unless there is some particular reason why-

Mr. McCUMBER. I will say to the Senator it can be read in the morning, if they want to go into executive session now.

Mr. WILLIAMS. Let it be read now, if the Senator is not

willing to let it go into the RECORD without having been read.

Mr. SIMMONS. Yes; let it be read now.

Mr. STONE. What particular reason has the Senator for desiring that the time of the Senate shall be taken up by the reading of the letter?

Mr. WILLIAMS. It is not an argument. It is a—
Mr. MCCUMBER. I will read it myself if the Senator desires me to do so, but I thought the Secretary had better read it.

Mr. STONE. No, not that; but why does the Senator wish to take the time of the Senate in having a letter of that kind read that nobody will listen to?

Mr. McCUMBER. I am sorry, but I have not seen the Senator listening to any argument. I do not see that that makes much difference.

Mr. STONE. We have had the argument made by this same man presented by the Senator two or three times here this

Mr. McCUMBER. This is a new argument. It will be very instructive to the Senate.

Mr. STONE. Does the writer of the letter change his argument from day to day?

Mr. McCUMBER. This is a very good letter. I think the

Senator ought to listen to this one.

Mr. STONE. If the Senator merely wishes to kill time, all

right. Mr. McCUMBER. Not by any means. I have not taken much time in the last four weeks.

Mr. STONE. No: the Senator has not been here. He is

making up now for lost time.

Mr. McCUMBER. Then the Senator must excuse me for

taking a little time in a matter that so affects my own constituents.

Mr. WILLIAMS. I do not want the Senator to feel that we object to the time he has taken; we are delighted to listen to any argument from the Senator, but these are not arguments from the Senator or from any Senator. These are letters from somebody never elected to this body, and we could get the enlightenment in them just as well from the RECORD. I would be willing to sit here six hours and listen to the Senator from North Dakota—I like to hear him—but it did strike me that these other people who were getting before the Senate might be willing to have their statements go into the Record without reading.

Mr. McCUMBER. I try not to abuse the courtesy of the Sen-

ate in taking too much time in the presentation of any matter.

Mr. WILLIAMS. I do not object to any time the Senator himself takes.

Mr. McCUMBER. I feel, however, that this letter is quite instructive upon several points. I am perfectly willing to allow the matter to go over until to-morrow, because I will not complete what I have to say to-day.

Mr. WILLIAMS. I would rather, if the letter is to be read, that it should be read to-day; and I would rather that this para-

graph should be finished to-day.

Mr. McCUMBER. It will take some time to finish it.

Mr. STONE. I think it ought to be read. Evidently it is from a very great and wise man, who has been piling his letters one on top of another into the RECORD. I can not for one moment make the least objection to having the Senator from North Dakota not only put into the RECORD but read for the information of the Senate communications from a man upon whose judgment he so implicitly relies. Let us have the letter read.

Mr. PENROSE. We can not finish this schedule to-day. It

is just a question whether it shall be read now or to-morrow.

Mr. McCUMBER. The Senator from Missouri has grown

very generous in the last minute.

Mr. SIMMONS. I hope the Senator from Pennsylvania will agree that the letter may be read now.

Mr. PENROSE. Let us have an executive session.

Mr. SIMMONS. I shall not ask to keep the bill before the
Senate any longer to-day after the letter has been read.

Mr. McCUMBER. The reading of the letter could have been

completed while we have been arguing whether it should be read.

The VICE PRESIDENT. The Secretary will read the letter. The Secretary read as follows:

BUFFALO, N. Y., June 24, 1913.

Hon. Oscar W. Underwood,

House of Representatives, Washington, D. C.

Dear Sir: I would have come down to Washington were it not that I have been suffering very much from one of my ancient attacks of neuritis, for I would have liked to have a personal talk or interview with you, who were kind enough to grant one to me when I was in Washington in January, introduced to you by Mr. Charles Bennett Smith.

SMITH.

I then appeared before your committee with signatures and credentials from thousands of farmers as the representative, without pay and without any remuneration whatsoever, of all the tow manufacturers

without any remuneration whatsoever, of an title tow maintacture except one:

The Union Fiber Co., at Winona, Minn.; Atwood-Stone Co., Minneapolis, Minn.; Brady Tow Co., Wheaton, Minn.; J. W. Keogh & Co., Chicago, Ill., and St. Paul, Minn.; Andrew Thompson, Kensal, N. Dak.; Davis & Co., Reynolds, N. Dak.; Western Textile Co., Decorah, Iowa; G. W. W. Harden, Le Roy, Minn.; Wm. Salen & Co., West Salem, Ohio; Ashland Flax Mill Co., Ashland, Ohio; New London Tow Mill, New London, Ohio; Naperville Lounge Co., Naperville, Ill.; and many other tow mills distributed in Ohio, Michigan, Wisconsin, Iowa, Minnesota, North and South Dakota, wherever flax is raised, for the product is called by the farmers throughout the United States "flax."

I respectfully refer you to the Payne tariff, Schedule J. The duty on flax straw then was \$5 a ton, and on flax tow, or tow of flax, or tow of flax straw, as it is called, the duty was \$20 a ton.

Your committee transferred flax straw onto the free list and flax tow you cut 50 per cent and made it \$10 a ton.

Under this duty the tow manufacturers would be able to buy the farmers' flax straw, the farmers receiving from \$3 to \$9 a ton for their straw, according to quality in the different States where it is raised.

It needs from 2½ to 6 tons of flax straw to make a ton of common tow up to the fluest tow, and of which there is used in the United States several hundred thousand tons for upholstering of all kinds of furniture, and it is furthermore used, after being thoroughly broken and the woody part of the stalk worked out, and after it is chemically prepared so that it will not rot, for lining refrigerator cars instead of cork or cattle hair, which in time rots and smells badly in the cars.

In order to make the tow the farmers bring the flax straw to the mill, where it is stacked, and then it goes through corrugated steel brakes, steel pickers, steel shakers, and the mills are run by steam and electricity. To make a ton of the better and best grades of tow costs up to \$20.

The mills themselves are not expensive concerns, none of them costing more than about from \$5,000 to the highest, \$10,000, and are, to a large extent, owned by some farmers themselves.

Some farmers have 25 tons of straw for sale, some 50, some 100, and up to 500 tons a season, and every farmer in the Northwest raises flax straw, and when they bring it to the mills, or bale and ship the flax straw to the mills. after the flax straw has been thrushed, which means to have the seed thrashed out—and which is sold to oil manufacturers—they receive cash for.

Now, the money the farmers derive and have derived for years back from the sale of flax straw goes in ninety cases out of a hundred to the wife of the farmer, who buys the clothing and every

Now, the money the farmers derive and have derived for years back from the sale of flax straw goes in ninety cases out of a hundred to the wife of the farmer, who buys the clothing and every family necessity out of that money.

If, therefore, the tow manufacturers and the refrigerator car-lining manufacturers were unable to buy the hundreds of thousands of tons of straw from the farmers it would be a tremendous loss to hundreds of thousands of farmers in the Middle States, West, and Northwest, and, Mr. UNDERWOOD, if the party you so ably represent and in whom the business people of the United States confided and set a tremendous trust—and this is no flattery, but fact—would deprive the farmers of the sale of their flax straw, the farmers, I am sure, would believe themselves deeply and justly injured in the loss of their lawful income.

The farmers in general believe that they have been treated very hard or harsh, most everything they produce being on the free list.

If tow for upholstering and for refrigerator-car linings and for the production of wrapping and other paper, which enterprise was just started a short time ago, encouraged by the United States Agricultural Department, was put on the free list Canada, which pays half the wages we do, and Russia, which pays one-fourth the wages we do, would flood this country with tow, for the freight is very cheap, and I swear to you upon my honor that not a tow mill could exist and the farmers would lose one of their best incomes.

Your committee has done fair and straight and have doubtless considered that the poor hard working farmers do not combine and have million-dollar trusts, as the twine manufacturers and the thread manufacturers. For instance, the Barbour or similar concerns who petitioned your honorable committee to free flax straw and free flax, unhackled and hackled, but you did justice all around, because you and your committee understood the conditions and saved the farmers, and let me tell you that the United States raises some splendid flax for spinn

receive—starvation wages—when the owners themselves live in royal-like palaces.

The farmers can not believe, and we tow manufacturers can not believe, that the Senate Finance Committee and the caucus are posted about the flax business and the manufacture of flax and flax straw or they would certainly not take the bread of life away from the farmers and those connected with them by putting manufactured tow and flax on the free list.

Do not say Mr. Underwood, benerable sir, that the matter is out of

those connected with them by putting manufactured tow and hax on the free list.

Do not say, Mr. Underwood, honorable sir, that the matter is out of your hands, for it is still in your hands, even should it come to the time when the final Senate and House committee will meet for final arrangements.

I received within the last three days up to this writing 46 telegrams from the farmers in the West and Northwest, and the commercial clubs have taken action themselves, and I have written a letter to the Hon. F. McL. SIMMONS, chairman Committee on Finance.

The farmers can not send expensive lawyers to appear before your committees, and I have found out during my two weeks' stay in Washington at the time of the Ways and Means Committee hearing that paid lawyers will do no good, for we were all convinced that if the matter is brought before the committee justice will be done, and that is all we pray for and expect.

Again I say, honorable sir, do not say that the matter is out of your hands, for it will come back to your hands, and as you understand the conditions I, as the unpaid representative of the West and Northwestern farmers and tow manufacturers, lay the matter most respectfully before you.

I have the honor to be, Yours, very truly,

V. R. BLEHDON.

Mr. SIMMONS. I ask that the bill be laid aside for the day. OKANOGAN RIVER BRIDGE, WASHINGTON.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 1353) to ments of the House of Representatives to the oil (8, 1853) to authorize the board of county commissioners of Okanogan County, Wash, to construct and maintain a bridge across the Okanogan River at or near the town of Malott, which were, on page 1, line 9, after "Reservation," to strike out the period and insert a comma; on page 1, line 9, after "Reservation," to strike out "Said bridge shall be constructed"; and to amend the title so as to read: "An act to authorize the board of county commissioners of Okanogan County, Wash., to construct, maintain, and operate a bridge across the Okanogan River at or near the town of Malott."

Mr. JONES. I move that the Senate concur in the amendments of the House of Representatives.

The motion was agreed to.

JOINT COMMISSION TO INVESTIGATE INDIAN AFFAIRS.

The VICE PRESIDENT. In accordance with the provisions of the act entitled "An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with the various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1914," approved June 30, 1913, the Chair appoints Mr. Robinson, Mr. LANE, and Mr. Townsend members on the part of the Senate of the joint commission to investigate Indian affairs.

COMMISSION TO INVESTIGATE TUBERCULOSIS AMONG INDIANS.

Mr. STONE. In accordance with the provisions of the act entitled "An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with the various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1914," approved June 30, 1913, the chairman of the Committee on Indian Affairs appoints Mr. Robinson and Mr. Townsend as members on the part of the Senate of the commission to investigate the question of tuberculosis among the Indians in connection with an inquiry into the necessity and feasibility of establishing, equipping, and maintaining a tuberculosis sanitarium in New Mexco, and to inquire into the necessity and feasibility of procuring impounded waters for the Yakima Indian Reservation.

#### HOUSE BILLS REFERRED.

The following bills were severally read twice by their titles and referred to the Committee on Commerce:

H. R. 1681. An act to extend the time for constructing a bridge across the Red Lake River in township 153 north, range 40 west, in Red Lake County, Minn.;

H. R. 1985. An act to authorize the county of Aitkin, Minn., to construct a bridge across the Mississippi River in Aitkin

County, Minn.; H. R. 3406. An act to authorize the construction of a bridge across the Sabine River at Orange, Tex.; H. R. 5891. An act authorizing the construction of a bridge

across White River at Newport, Ark.;

H. R. 6378. An act to authorize Robert W. Buskirk, of Matewan, W. Va., to bridge the Tug Fork of the Big Sandy River, where the same forms the boundary line between the States of West Virginia and Kentucky; and

H. R. 6582. An act to authorize the city of Fairmont to construct and operate a bridge across the Monongahela River at or near the city of Fairmont, in the State of West Virginia.

## EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 5 minutes spent in executive session the doors were reopened, and (at 6 o'clock and 17 minutes p. m.) the Senate adjourned until to-morrow, Thursday, August 21, 1913, at 11 o'clock a. m.

### NOMINATIONS.

Executive nominations received by the Scnate August 20, 1913. SECRETARY OF EMBASSY.

Edward Bell, of New York, now on duty in the Department of State, to be second secretary of the Embassy of the United States of America at London, England, vice William P. Cresson, appointed secretary of the legation at Quito.

GOVERNOR GENERAL OF THE PHILIPPINE ISLANDS.

Francis Burton Harrison, of New York, to be Governor General of the Philippine Islands, vice W. Cameron Forbes, resigned.

## CONFIRMATIONS.

Executive nominations confirmed by the Senate August 20, 1913. MINISTER.

William J. Price to be envoy extraordinary and minister plenipotentiary to Panama.

# PROMOTIONS IN THE NAVY.

First Lieut. Russell H. Davis to be an assistant quartermaster in the Marine Corps with the rank of captain.
Lieut. Wilfred E. Clarke to be a lieutenant.

Lieut. Robert V. Lowe to be a lieutenant.

Lieut. (Junior Grade) Claude A. Bonvillian to be a lieutenant. The following-named ensigns to be lieutenants (junior grade): Edwin Guthrie.

Frederic T. Van Auken. William A. Hodgman.

POSTMASTERS.

CONNECTICUT.

Thomas J. Sullivan, Baltic.

INDIANA.

Lloyd W. Dunlap, Mentone.

NEW JERSEY.

Thomas C. Birtwhistle, Englewood.

PENNSYLVANIA.

James H. Alcorn, Waterford. Oscar E. Letteer, Berwick.

W. R. Rogers, Crewe.

### SENATE.

THURSDAY, August 21, 1913.

The Senate met at 11 o'clock a.m.

Prayer by Rev. Zed H. Copp, of the city of Philadelphia.

The Journal of yesterday's proceedings was read and approved.

CALLING OF THE ROLL.

Mr. SMOOT. Mr. President, I really believe we ought to have a quorum in the Senate to-day, and I suggest the absence of a quorum at this time.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Smith, S. C. Ashurst Bacon Bankhead Gronna Hitchcock Hollis Hughes Nelson Smith, S. C. Smoot Sterling Stone Sutherland Swanson Thomas Thompson Thornton Townsend Norris Overman Bradley Page Penrose Brady Brandegee Bristow James Jones Kenyon Perkins Pittman Pomerene Robinson Kern La Follette Lane Bryan Catron Saulsbury Shafroth Sheppard Sherman Chamberlain Lea Lippitt Lodge McCumber Vardaman Walsh Warren Chilton Clark, Wyo. Warren Williams Colt Fall Fletcher Gallinger Simmons Smith, Ariz. Smith, Ga. Martin, Va. Martine, N. J.

Mr. SHEPPARD. My colleague [Mr. CULBERSON] is unavoidably absent. He is paired with the Senator from Delaware [Mr. DU PONT]. I will let this announcement stand for the day. Mr. GALLINGER. I will take occasion to announce the un-

avoidable absence of the junior Senator from Maine [Mr. Bur-

LEIGH] on account of illness.

Mr. SMOOT. I desire to announce that the junior Senator from Wisconsin [Mr. Stephenson] and the senior Senator from Delaware [Mr. DU PONT] are absent from the city on account of illness

The VICE PRESIDENT. Sixty-two Senators have answered to their names. There is a quorum present.

## PETITIONS AND MEMORIALS.

Mr. HITCHCOCK. I present a resolution adopted at a meeting of the Democratic county central committee of Cuming County, Nebr., remonstrating against the Owen-Glass currency bill. The resolution is short, and I ask that it be printed in the RECORD and referred to the Committee on Banking and Currency

There being no objection, the resolution was referred to the Committee on Banking and Currency and ordered to be printed

in the RECORD, as follows:

Whereas there is now pending before Congress a currency measure known as the Glass-Owen currency bill—

known as the Glass-Owen currency bill—

Now, therefore, we, the Democratic county central committee of Cuming County, Nebr., believing that such currency bill is in many of its features undemocratic and undesirable, do hereby resolve that we deem it for the best interests of the country that such bill be rejected, and we do hereby request our Representatives in Congress to use all honorable means to defeat the bill; be it further

Resolved, That in the opinion of this committee the proposed measure, instead of providing for an expanding and flexible currency adequate to care for the business demands of the whole country at all times, unwarrantably reduces the power and limits the ability of the banks in the agricultural communities of the country to furnish the credit needed during the period of crop moving; be it further Resolved, That in our opinion the money question is paramount to all others at all times, and we believe that legislation touching so vital a subject should have the most careful consideration; and be it further

Resolved, That we affirm it to be our belief that Congress alone should have the power to coin and issue money. We declare our

adherence to the doctrine laid down by President Jackson, who said that this power could not be delegated to corporations or to individuals. The Democratic Party has always recognized this policy and it has often made the demand that all paper which is made a legal tender for public and private debts or which is receivable for dues to the United States should be issued by the United States Government. We are therefore opposed to the enactment of any currency measure which alms to discredit the sovereign right of the National Government to issue all money, whether of coin or paper, and to delegate this power to a Federal reserve board as is contemplated by the Glass-Owen currency bill.

At a meeting of the Democratic county central committee of Cuming County, Nebr., held on the 7th day of August, 1913, the above resolution was adopted by a motion duly made, seconded, and carried,

**Chairman of the Committee.**

**Higo M. Nicholson, Secretary of the Committee.**

**Mr. PERKINS presented petitions signed by sundry citizens.**

Mr. PERKINS presented petitions signed by sundry citizens of Norwalk, Anaheim, Artesia, Santa Ana, Whittier, and Compton, all in the State of California, praying for the adoption of the proposed tariff referendum, which were ordered to lie on the table.

the table.

Mr. O'GORMAN presented sundry petitions of citizens of Poughkeepsie, Nyack, Saratoga Springs, and Ithaca; of the Woman Suffrage Study Club of New York City, the Political Equality Club of Warsaw, the Woman's Political Union of Nyack, and of the Cornell Equal Suffrage Club, all in the State of New York, praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which were ordered to lie on the table.

#### LANDS FOR RESERVOIR PURPOSES.

Mr. STERLING, from the Committee on Public Lands, to which was referred the bill (S. 1784) restoring to the public domain certain lands heretofore reserved for reservoir purposes at the headwaters of the Mississippi River and tributaries, reported it without amendment and submitted a report (No. 104) thereon.

#### BILLS AND JOINT RESOLUTIONS INTRODUCED.

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GALLINGER:

A bill (S. 3017) designating certain lands as an addition to the Capitol Grounds, and establishing the Capitol Park; to the Committee on the Library.

By Mr. NORRIS

A bill (S. 3018) for the relief of Elizabeth B. Sarson; and A bill (S. 3019) for the relief of the estate of James H. Patterson; to the Committee on Claims.

By Mr. BANKHEAD:

A bill (S. 3020) for the relief of the estate of John H. Wisdom, deceased; to the Committee on Claims.

By Mr. TILLMAN:

joint resolution (S. J. Res. 66) providing for a second edition of the Congressional Directory for the first session of the Sixty-third Congress (with accompanying paper); to the Committee on Printing.

By Mr. BANKHEAD:

A joint resolution (S. J. Res. 67) appropriating \$150,000 for the improvement of the Tennessee River (with accompanying paper); to the Committee on Commerce.

### AMENDMENT TO THE TARIFF BILL.

Mr. CATRON submitted an amendment intended to be proposed by him to the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes, which was ordered to lie on the table and be printed.

## AFFAIRS IN MEXICO.

Mr. PENROSE. Mr. President, I offer a resolution which I should like to have read and lie on the table.

The VICE PRESIDENT. The Senator from Pennsylvania

submits a resolution, which will be read.

The Secretary read the resolution (S. Res. 167), as follows: The Secretary read the resolution (S. Res. 167), as follows:

Resolved, That the Senate recognizes that it has been the policy of
the United States to maintain the Monroe doctrine throughout the
Western Hemisphere, and that the United States acknowledges its responsibility under the Monroe doctrine; that there exists in the Republic of Mexico a condition of internal warfare and lawlessness, and
that a continuation of these present conditions, accompanied by the
destruction of property, may involve international complications and
intervention by European nations.

Resolved, That it is believed by the Senate that it is the first duty
of the Government of the United States to protect the lives and property of its citizens at home and abroad, and that such protection in
the Republic of Mexico will lessen the prevailing lawlessness and
destruction of lives and property, and the danger and complications
that might arise from European intervention in the Republic of
Mexico.

Mexico.

Resolved, That in the opinion of the Senate it is not the policy of the Government of the United States to recognize, aid, or assist any faction or factions in the Republic of Mexico.

Resolved. That the President of the United States be requested to take such steps as are necessary to place a sufficient number of troops, as a constabulary, in the Republic of Mexico wherever and at such points as in his opinion they may be needed properly to police and to protect American citizens and their property; and it is hereby declared that such employment of troops for the protection of the lives and property of American citizens is not made with any intent that such policing and protection shall be construed as an act of hostility or unfriendliness toward the Mexican nation.

Mr. LA FOLLETTE. I ask that the resolution may go over. Mr. PENROSE. I made the same request when I offered the resolution. I asked that it might lie on the table.

Mr. LA FOLLETTE. I did not hear it.

Mr. PENROSE. I submit the following amendment to the deficiency appropriation bill, which I understand is being prepared in the House of Representatives, although not yet reported from the committee. I ask to have the amendment lie on the table until the bill comes to the Senate. I ask to have the amendment read. It is an accompaniment to the resolution which I have just offered.

The VICE PRESIDENT. The Secretary will read the amend-

The Secretary read as follows:

For the protection of the lives and property of American citizens in the Republic of Mexico, and for each and every purpose connected therewith, to be expended at the discretion of the President and to remain available until July 1, 1914, \$25,000,000.

Mr. PENROSE. Mr. President, I do not intend to speak at length, of course, on the amendment or the resolution at this time. I merely want to remark that the administration has asked for \$100,000 to take Americans out of Mexico. that they belong in Mexico. They have their constitutional rights there and their rights under our treaties and under international law. We have no right to demand that they shall break up the ties of home and occupation and leave a country where many of them have been practically all their lives. Rather than appropriate the pittance of \$100,000 to make this wholesale removal I would urge the spending of \$25,000,000 to keep them where they belong and to protect them in their legal occupations.

Mr. BACON. Mr. President, I would inquire of the Senator from Pennsylvania what direction he desires to have the

amendment take at the present time.

Mr. PENROSE. I asked to have the amendment lie on the table until the deficiency appropriation bill came over to the

Senate.

Mr. BACON. Mr. President, I wish to say that in accordance with the wish of the Foreign Relations Committee, not expressing my views but the views of that committee, the amendment should properly go to the Committee on Foreign Relations.

Mr. PENROSE. It ought to go to the committee—
Mr. BACON. If the Senator will pardon me a moment, it is true that hereafter the amendment would go to the Committee on Appropriations, but it is manifest that it concerns something more than the mere question of the appropriation of While I will not, unless it seems to be so desired, money. While I will not, unless it seems to be so desired, make the motion at the present time, I will make it at some future time.

I desire to say again that in so doing I am not expressing my individual views. I am simply the mouthpiece of the committee, and I am expressing the will of the committee unanimously agreed to by that committee, both Republicans and Democrats, that on all matters which relate to this most delicate question at this time there should be a reference to the Committee on Foreign Relations for consideration.

I beg to assure the Senator that in making the motion it is not with any disposition to interfere with whatever may be the proper disposition ultimately of this matter, but the purpose is that there shall now be given to all matters in this delicate situation a careful consideration by the Foreign Relations Committee, and I repeat in saying that I am expressing the

views of the committee and obeying its direction.

Mr. LODGE. Mr. President, the Senator from Georgia has stated the action taken by the committee. I think it was the feeling of all the members of the committee that in a matter of such difficulty and delicacy, as we all recognize the Mexican situation to be, it is very desirable that any resolutions or amendments or action of any kind relating to the subject should have the consideration of the Committee on Foreign Relations before action in the Senate, and those instructions, if I may say so, were given to the chairman of the committee by unanimous vote. The committee take that view with no purpose of delay or anything of that kind. They are as deeply impressed with the responsibility and importance of the situation as any Senators can be, but they feel it to be very necessary that the committee should have the opportunity of con-

sidering these matters before any positive action is taken in the Senate.

Mr. PENROSE. Mr. President, so far as I am concerned, I shall not at the proper time make any opposition to the due consideration of this or any other similar resolution by the Committee on Foreign Relations. I know that they are a body of patriotic Senators, and as to anything that I might sponsor I would be only too glad to have their opinion and their more intimate knowledge of conditions before I would press it further.

This resolution is modeled almost verbatim from a similar paragraph in an appropriation bill passed during the Spanish War at the beginning of the difficulties with Cuba. I have forgotten whether or not that bill went to the Foreign Affairs Committee of the other House or whether it went directly to the Appropriations Committee. At any rate, whatever the ultimate procedure may be, in a day or so I shall want to make a few remarks on this resolution, so I will ask that it lie on the table and later on that it go to the Foreign Relations Com-

mittee, if the Senator from Georgia so desires.

Mr. LODGE. If the Senator from Pennsylvania will allow me, with regard to an appropriation affecting foreign relations, I will say that it is customary to send amendments for the appropriation of money which involve foreign relations first to the Committee on Foreign Relations. I reported one the other day, which was recommended by the administration, authorizing a payment to the family of an Italian who had been killed in this country. That amendment went first to the Foreign Relations Committee, and that committee directed me to report it favorably and have it referred to the Committee on Appropriations.

Mr. PENROSE. That is entirely agreeable to me if it is the

usual method.

Mr. LODGE. That is the usual method. Such a reference

also makes an amendment in order before the Senate.

Mr. PENROSE. But meanwhile I should like to have the resolution lie on the table, not to be called up should I be absent, so that a little later—it may be this week or early next week-I may have an opportunity to address the Senate on the

I want to say, Mr. President, in this connection that I am not a member of the Committee on Foreign Relations, and do not want to stir up this matter unnecessarily, but it is a real issue with me. The people of Pennsylvania are quite generally interested in Mexican conditions, and there is hardly a day that I am not in receipt of urgent telegrams and communications demanding that some prompt action be taken to remedy the conditions at present existing and becoming intolerable. is not a sentiment; it is a condition.

I have an article here-I do not vouch for its accuracy, but I suppose it is as accurate as are most statements of this character-from the El Paso Morning Times of August 16, which, I believe, is a leading journal there. It will take but a moment to read it, and I should like to have the Secretary

read it.

The VICE PRESIDENT. Is there objection?

Mr. NELSON. Will the Senator from Pennsylvania yield to me before it is read?

Mr. PENROSE. This will take but a moment.
Mr. NELSON. But I wish the Senator would yield to me now.

Mr. PENROSE. Yes: I yield to the Senator.

Mr. NELSON. Mr. President, it seems to me that we are unwise at this juncture to agitate this question. Our administration is now, so far as I can judge, doing the best it can to settle this difficulty; and the agitation caused by introducing resolutions of such kinds as have lately been introduced, thus keeping the subject before the public and agitating it in this manner, is only an embarrassment to our Government and can lead to no beneficial results. I for one, as a Senator of the United States, feel that the administration ought to be sustained in its effort to settle the difficulties in Mexico by peaceable and diplomatic methods. This amendment should go to the Committee on Foreign Relations, as all similar amendments. have heretofore gone, and should not be used as a means of exploiting matters here in speeches at this time.

I think speeches on the Mexican situation are, at this juncture, out of place and will be an embarrassment to our Government. want to remind Senators at this juncture of a little bit of history that we older ones remember well, because it transpired under our eyes and observation. We were very glad during the long, weary, and momentous days of the Civil War that no foreign Government intervened in our struggle, and that they allowed us to settle the struggle among ourselves. We were threatened time and again with intervention from France, from

Spain, and even from England. In one case the situation became so acute that a general of the United States at New Orleans was removed because of the complaint of foreign Governments. We were very glad to have foreign Governments keep their hands off and let us settle our controversy among ourselves. The treatment that we hoped and longed for, and which was accorded us during the days of the Civil War, we ought to be willing to accord to a sister Republic at this juncture, and not attempt to agitate the question and bring on war. We ought to permit Mexico, as we were permitted during the Civil War, to settle her internal troubles without warlike intervention on our part.

What is it Senators want? Intervention means war. Suppose we have a war with Mexico, there are 15,000,000 people in Mexico, and they will not quietly and supinely submit to have that country invaded and dismembered. Suppose we should get as the result of war what some people are pining for-two or three of the northern Provinces from Mexico and attach them to the United States—what good will it do us? The acquisition of Alsace and Lorraine by Germany as the result of the Franco-Prussian War has proved a great military burden to Germany, and has served in the intervening years to keep up more or less tension and friction between that country and France. It has been one of the causes that has led to the excessive arming of both countries and to the formation of triple and dual alliances. And while the people of those Provinces have been Germanized in speech, they still are, to a large extent, Frenchmen at heart. The experience of Germany and France would be ours if we should take the same course here, and as a result of war take two or three Provinces from They would be a festering sore between us and that Republic for all time to come.

Therefore it seems to me that at this juncture we ought to do everything we can in this country to avoid war, and give the people of Mexico the same chance to settle their internal difficulties which we asked and obtained during the long and

weary days of the Civil War.

Mr. PENROSE. Mr. President, I absolutely agree with everything which the Senator from Minnesota [Mr. Nelson] has said in his remarks to the Senate. I have expressly declared in the resolution that no kind of political intervention or interference is contemplated.

Of course, we recall the dreadful days of our own civil conflict, but the then threatened intervention from Europe was of a political character. What the American people will gradually come to demand in the present situation is the police protection of American citizens and of American property, particularly near our own border.

We have been for a generation going down to Nicaragua and to other Central and South American Republics and landing marines to protect American lives and American property. So I

do not think that I am proposing anything radical.

I want to assure the Senator from Minnesota and all Senators that I am as absolutely opposed to intervention and the recognition of anybody and, of course, to war, as is any Member of the American Congress; but I think I have a right to demand some action when the life of the son-in-law of the lieutenant governor of my State is threatened, and I still have no information as to his safety, and when millions of dollars of investments in the neighborhood of Durango owned by citizens of Pitts-burgh have been destroyed, and when other citizens of Pennsylvania, reputable gentlemen, have appealed to me for some effort to protect them, I feel that I am justified in calling and should be permitted to call the attention of this body to the sub-

There is nothing in the resolution to warrant any apprehension on the part of the Senator from Minnesota or of any other Senator that I am trying to pose as a jingo. Why, Mr. President, the suggestion of annexation of any part of any territory is to my mind too absurd for an intelligent man to entertain for a moment. We want peace; we recognize the disorders which have prevailed too frequently in our own history; we look with regret and charity on the difficulties within the Republic to the south, but I do think we shall soon reach the point when we shall have to protect American property and American lives, particularly in the leighborhood of our own border.

I will now close, if the Secretary may be permitted to read

the extract from the El Paso paper which I send to the desk. The VICE PRESIDENT. Is there objection to the reading of

the extract asked for by the Senator from Pennsylvania?
Mr. SMOOT. Mr. President, there is no State in all the Union that has suffered more, not only financially but perhaps also in the loss of life, than has the State of Utah during the present civil war in Mexico. From 5,000 to 6,000 of her citizens have been driven out of Mexico. So hurriedly were

they compelled to depart they left their homes overnight on freight trains, in box cars, or in any other way they could, to seek refuge at El Paso, Tex. They left the finest of homes and their fields that were ready for the harvest. Those homes have been ruined, their property has been destroyed, and a number of lives have been lost.

I desire to say to the Senate that Hon. A. W. Ivins, who might be termed the father of the Utah colonies, writes me that he speaks for a great number of the Utah people when he says they would rather lose every dollar of property they own in Mexico than to see intervention by this Government. says, "Let them fight it out among themselves"; and I, too, believe in that policy.

I want to support the President of the United States in his endeavor to bring peace to that distracted country. not want to see the time come when we shall have to intervene and go to war with those unfortunate and helpless people.

I wanted to say this much, because I believe that the President is doing everything to-day that can be done, and I be-lieve it would be bad policy for this Government at this time to intervene in Mexico and thus bring on bloody and costly war.

Mr. BACON. Mr. President, I think the sentiments uttered by the Senator from Massachusetts [Mr. Lodge], the Senator from Utah [Mr. Smoot], and the Senator from Minnesota [Mr. NELSON], and other Senators, all along the same line, must be extremely gratifying to every lover of his country. I think it is generally recognized that at this particular time it is not wise that there should be a discussion of this question. are many matters which ultimately will have to be discussed, and there are many Senators who are anxious to be heard and who restrain themselves with difficulty. I am not speaking of myself now at all, but of others. As the reading of that newspaper clipping can not have any special beneficial effect at this time, as it can serve no purpose and can now illustrate no argument which the Senator is later going to makefor I understand the Senator does not now propose to discuss it, although I do not want to object to it-I simply want to ask the Senator from Pennslyvania if he does not think that he could withhold it until such occasion when he thinks the time has arrived to address the Senate on the subject?

There would be no difficulty, Mr. President, in filling the RECORD with harrowing details of what is occurring in Mexico; but there is nothing new to be given to the public by putting it into the RECORD and having it now read; it has already been

in the newspapers.

It seems to me, Mr. President, that all Senators might now unite in the carrying out of the intention and purpose which have been so admirably expressed by Senators on the other side this morning to give to the President, the officer of this Government who is clothed by the Constitution with the great duty of being the spokesman who shall communicate between this Government and foreign Governments, the opportunity now, in the midst of the effort which he is making, to proceed without hindrance and without embarrassment and with unanimous support, as he should have and as I think, practically, he does have, from the Senate. I want to ask the Senator if he will not, in view of the circumstances, withhold the reading of the article? I will not ask that he say that he will not at such time as he thinks proper read it; but I ask him if he will not withhold it now and let us proceed to other matters?

Mr. PENROSE. I introduced the resolution in entire good faith and with the firm conviction that it was my duty to introduce it, and I would not, of course, be willing to withdraw

it now.

Mr. BACON. The Senator misunderstood me. I asked if he would not withhold the reading of the newspaper clipping which he has sent to the desk to be read.

Mr. PENROSE. I beg the Senator's pardon; I am not particular about that,

Mr. BACON. That is all I asked the Senator to do.

Mr. PENROSE. I will withdraw that, if the Senator so desires. I want to work with him in the matter and with his committee and the administration; but I do feel that something must be done at an early date to suppress the brutali-ties, robberies, and molestations of Americans, particularly right near our own border.

Mr. SUTHERLAND. Mr. President, I have heretofore refrained from saying anything whatever upon the Mexican situation, but not because I was not as deeply interested in the subject as other Senators in this body, for, as my colleague [Mr. Smoot] has very well said, my own State is very deeply interested in it.

I appreciate the good judgment and wisdom of the Senator from Pennsylvania [Mr. Pennsose]; but I want to say that, so far as I am concerned, at this juncture of affairs I think it is exceedingly unwise to enter upon a discussion in the Senate, especially in the open Senate, of this particular subject.

The former administration, with whose doings in Mexico I was personally more familiar than I am with the actions of the present administration, was doing precisely, so far as I

understand, what this administration is doing.

I have personally every confidence in the patriotism and good judgment of the President of the United States. I have had an opportunity, in connection with others, of talking with him face to face; and no man can talk with him without being convinced that President Wilson is patriotically engaged in doing everything he possibly can to bring order out of the

chaos which now exists in Mexico.

Under the Constitution of the United States the President of the United States is the accredited instrument that we use in dealing with all foreign nations; and in a situation like this I believe it to be the duty of every officer of the Government, of Senators and Representatives, to stand behind him in his efforts; and, although there may be some things that have been done or that may be done with which I would not entirely agree, I believe it to be the part of patriotism and good sense to withhold any criticism which I might otherwise have to make until the situation has clarified. Until it has clarified, it seems to me the wise and patriotic thing to do is to stand behind the effort which the President is making; and that I, for one, propose to do.

The reports in the morning papers which I read are to the effect that the officials of the Mexican Government are now saying that the sentiment of the President and the sentiment of the Senate differ with reference to what shall be done in I think that is an exceedingly unfortunate condition I think it would be far better, I think it would tend to uphold the hand of the President and to enable him far better to accomplish something if the contrary impression could go out—namely, that the Members of the Senate and the other officials of this Government are behind the President-instead of having the unfortunate impression go to the people of that country that our counsels are divided. So long as that condition exists the President of the United States is more or less handicapped in dealing with the situation.

Mr. LODGE. Mr. President, merely a word. I cordially agree with what the Senator from Utah [Mr. SUTHERLAND], who has just taken his seat, has said as to the general position, but I should like to add this remark as to the present situation: The President of the United States, charged with the duty of conducting our relations with foreign countries, has been making an effort, in good faith and with all the wisdom and patience at his command, to bring about some arrangement in Mexico which would lead to peace and stable government. What the result of that mission is we do not know officially. We see only the accounts in the newspapers—the guesses, perhaps, that have been made. I do not think we can judge of the situation properly until we hear officially exactly what has been done. Until we know precisely about the result of this attempt at mediation, or such other matters as the President thinks wise to give to us or to the country, it seems to me we had better not enter upon debate, for debate, as reported in garbled form to other countries, is often misunderstood.

I am sure we are all actuated by the same desire, and that is

to maintain the peace of the country, not to intervene, to avoid intervention if possible, and at the same time give full and proper protection to American life and American property.

I really think at this time, until we know a little more about

the present situation, it is well not to enter upon debate.

Mr. BACON. Mr. President, I think the suggestion just made by the Senator from Utah is a most valuable one. I do not think, however, that anything which could have occurred could give such emphatic denial to the possibility of the truth of the impression that seems to exist in Mexico in regard to any variance between the Senate and the President as has been given by the Senate in the patriotic utterances which have been heard in this Chamber to-day on each side, regardless of party. I am willing that they shall go as the answer to such an insinu-ation or such an impression. This answer of the Senate can not be misunderstood either in the United States or in Mexico.

Mr. GALLINGER. Mr. President, during this entire controversy I have scrupulously refrained from saying a word. I entertain the precise views that have been expressed by other Senators on both sides of the Chamber. Yet I have sometimes wondered—and this is the only thought I propose to suggest—if it might not be well for the President to take the Senate into his confidence and communicate to this body through some source-properly the Committee on Foreign Relations in executive session—precisely what the instructions were that were given to Mr. Lind. I do not think it would be well to publish

them to the world, but I do think that the Senate is entitled to that information. For one, desiring to uphold the President in every effort he can make to adjust affairs in Mexico, I feel that the Senate, which will have a very important duty to perform if this matter goes on much further, might well be put in possession of that piece of information.

Citizens in my own State have greatly suffered in their property and personal rights; but I have besought them at every point to be patient, hoping that a peaceful solution of the difficulties might be reached. I simply desire to add that I sympathize deeply with what has been said on both sides of the Chamber as to the desirability of ceasing needless agitation, which I feel sure can not possibly do any good, but it occurs to me that there will of necessity be less agitation on the part of the Senate if the President acquaints this body with the real facts in the case.

Mr. FALL. Mr. President, I have had very little to say upon this interesting subject for some time, and I do not intend to

occupy the time of the Senate now at any length.

I think the Senator from Utah [Mr. Sutherland] possibly misread the statement from Mexico, or at least he did not thoroughly understand the workings of the Mexican mind. My impression, obtained from the reports from Mexico, both through the papers and otherwise, is that Mr. Huerta claims to have private sources of information with reference to the differences which he says or intimates exist between the Congress of the United States and the President of the United States. I do not think there is any intimation that the public utterances, either in this body or in any other, have convinced Mr. Huerta that the President is not being supported by the sentiment of the country, but that private advices from private sources of his own have led him to make this statement.

I am one of those who believe that public opinion, which has been said to be the residuum of the power retained by the people under the tenth section of the Constitution of the United States, when correctly informed, will act correctly. I am inclined to think that the great mass of the American people are conservative, and that when they understand the conditions they will act in a conservative way. I think sometimes it is better to have discussion along certain lines than to suppress discussion. However, I have not objected to any attempt to shut off discussion at all. I have not agreed with that line of policy, but I am not criticizing the patriotism or the ability of the administration.

I am here to say that, as one Senator, I propose to sustain in every way possible, so far as my vote and influence and action may go, the President of the United States and the administration in dealing with this or any other foreign problem of such magnitude.

I do not agree with the idea that every discussion along every line of such an important matter as this should be closed off. believe that had the people of the United States been fairly dealt with by the Congress of the United States prior to the Spanish-American War, had the people of the United States thoroughly understood the situation exactly as it existed, that war could have been avoided, and it would not have been brought on by an outburst of enraged opinion rather than wellinformed opinion. I fear something of exactly the same kind may lead to a crisis in Mexican affairs; that instead of action based upon a well-informed public opinion, understanding the facts and the circumstances, something may occur which will so outrage the American people that no administration and no Congress supporting the administration can stop the natural course of this great warlike Nation when it becomes thoroughly aroused.

Of course I realize, as everyone else does, that the details of negotiations of a diplomatic character must necessarily be kept from the public. I realize very fully that time is necessary in all these matters. I am frankly in accord with the sentiment expressed by the other Senators that all necessary time be given for the present diplomatic arrangements to be concluded in a satisfactory way, if possible, or to be ended in some way. I am equally frank in the statement of my opinion that it will be very much better to follow the advice of one of the men who wrote, I think, most intelligently of our Constitution and our people, Mr. Bryce, who said that it was the duty and much the best policy that the President take into confidence, at least to as great an extent as possible, the Senate of the United States in such matters as this Mexican problem. I do not believe any administration can long act in accordance with the will of the people except in accord with the coordinate branch of the Government, which must act in foreign affairs, not only to sustain the hand but to carry out the objects of the administration, which deals directly in these matters. That, however, is merely a matter not so much of criticism as of difference of opinion.

I will say frankly that I believe a fair understanding of the conditions existing in Mexico to-day with reference to American lives, American property, and the conditions among the Mexicans themselves, fairly discussed, would inform the American people to such an extent that they could let their representatives in the Senate and in the House and in the White House know what the sentiment of the people was.

It has been said upon high authority that there is no sentiment upon certain phases of this Mexican question. I can say that in my judgment there is a growing sentiment in the United States, and one of resentment; there is a growing sentiment in every State in this Union. It is that sentiment, guided by mis-informed or uninformed public opinion, which I fear, and not the sentiment of the people when they are thoroughly informed

about the conditions.

We are not a people who rush headlong into war. I hope those who have the confidence of the administration will urge, or at least suggest, the view that the opinion of the people of the United States should be informed rather than inflamed. To attempt to suppress information, to suppress discussion, upon the insistence that war stares us in the face, is to inflame and not to inform public opinion. This is my judgment, Mr. President

Mr. KERN. Mr. President, a few days ago an address was delivered before the Republican Editorial Association of Indiana by the Hon. Charles W. Fairbanks, formerly Vice President of the United States-a man who was Presiding Officer of this body; a man with the respect and the confidence of all its Members; a man who, while a pronounced partisan, is recognized as being a careful student of public affairs, possessing enlightened views on public questions.

In this address brief reference was made to the Mexican tuation. The sentiments expressed were patriotic sentiments, situation. in line with those expressed on both sides of the Chamber this morning. It is because the sentiments expressed by him are in line with those expressed here, after reading a paragraph or two to express my own views, that I shall ask that the entire extract, which is short, may be printed in the RECORD.

He says:

I have no doubt that the disturbances in Mexico during the last few years have been due in a greater or less degree to an effort on the part of ambitious cunning men to force intervention and possibly annexation to the United States. The exploiters of public utilities and of the mineral and agricultural resources of our neighbor have undoubtedly thought that they would gain much if they could force intervention by the United States. There are soldiers of fortune in Mexico who would undoubtedly welcome such a contingency.

Sensationalists are adding to the confusion of the situation and making more difficult the solution of the problem. Intervention in Mexico is, of course, not a matter to be considered lightly; for intervention means war, and war means the destruction of human lives and the expenditure of hundreds of millions of dollars. It means, furthermore, the responsibility of the Government of 20,000,000 people for an indefinite period. We are now engaged in governing 10,000,000 aliens as the result of the Spanish-American War—a war which could very probably have been averted if we could have exercised a little more patience, patriotism, and self-restraint.

If our speculators in Mexico suffer pecuniary loss as the result of recurring revolutions, that is a matter for future consideration, when stable government and peace are fully established in that country. It is not warrant for shedding the blood of Americans. To sacrifice the life of one soldier for all of the dollars investors or speculators have ventured in Mexico would be the supremest criminal folly. Without a deliberate afront on the part of the Mexican Government, whether it exists de jure or de facto, is no good ground on which we would be justified in sending our armies beyond the Rio Grande.

He concludes by saying:

He concludes by saying:

President Wilson is dealing with it-

The situation-

The situation—
as best he can. We may not entirely agree that his course is better than that of his distinguished predecessor, nevertheless we should endeavor to uphold his hands.

There should be no difference of opinion as to that. By doing so we shall make his task a comparatively easy one.

It is not an hour for either little politics or sensational journalism. The clamor of the jingoes should not be allowed to drown the voice of rational, deliberate statesmanship. It is a pretty safe rule, when we come to deal with grave international problems, to put our faith in the President of the United States and follow where he may lead. He speaks for the country when we come to deal with international affairs. The President of the United States is a safer guide than sensationalists and the soldiers of fortune, who come to the surface whenever international controversies arise.

Those sentiments. Mr. President, were applauded vigorously

Those sentiments, Mr. President, were applauded vigorously and enthusiastically by a large body of the Republican editors of Indiana. I think it ought to go into the RECORD in connection with what has been expressed on the other side of the Chamber this morning, that it may be known in Mexico and everywhere that in the hour of supreme danger the American people stand as a stone wall with their administration in defense of the national honor and national right.

I ask that these remarks by Mr. Fairbanks be printed in the

RECORD.

The VICE PRESIDENT. If there be no objection-

Mr. SUTHERLAND. Mr. President, at the request of the Senator from Georgia the Senator from Pennsylvania withdrew a statement which he desired to have read and go into the RECORD. I think in the face of that the Senator from Indiana ought not to ask that this paper go into the RECORD. For that

reason, and that reason only, I shall object to its being printed. Mr. BRISTOW. Mr. President, I can not consent that the sentiments expressed by the late ex-Vice President as to the character of the Americans in Mexico shall be applied to them as a whole. There are without doubt many characters such as he describes in Mexico, but there are also many very worthy American citizens, who went there, as they had a right to go, into a friendly adjoining country. Just as there are many thousands of American citizens in Canada to-day, there are thousands in Mexico, who are worthy, honorable, upright, and who are there for legitimate purposes. I do not think that a general statement of that character in regard to all Americans

in Mexico should go without qualification.

Mr. FALL. Will the Senator yield to me?

Mr. BRISTOW. In just a moment. I merely want to say, so far as sustaining the Government of our country in its effort to remedy the chaos that exists there, I think we are all agreed. We may hold different opinions as to the proper method that ought to be adopted, but that is only natural. While efforts are being made by the President to solve these problems and to protect our people in their rights, I think we ought to stand together.

I am in accord with many things which President Wilson has done. Some of the things I think he ought to have done differently, but probably he has acted more wisely than if he had followed the course which it seems to me was a better That is a question which time alone can determine.

But I do not want any general statement to be made branding every man and woman who may be in Mexico as the character of individuals described by Mr. Fairbanks in his address, because I happen to have some very warm friends in Mexico, men who are worthy of the protection of their Government wherever they may be, whether in Mexico or in any other foreign country.

Mr. KERN. Mr. President—
The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Indiana?

Mr. BRISTOW. Very gladly.

Mr. KERN. Does the Senator understand that the late Vice President declared that every American in Mexico was of the character indicated by the Senator? He referred to a certain character of persons who are now agitating this question. was not a general denunciation of Americans in Mexico.

Mr. BRISTOW. It seemed to me as the Senator read it that it was pretty general. I think the ex-Vice President should have referred to others who are worthy of his consideration as well as those who are not, because there are both kinds in Mexico.

Mr. SIMMONS. Mr. President, I ask for the regular order.

Mr. GALLINGER. Has the morning business closed? Mr. SIMMONS. Has the morning business expired? The VICE PRESIDENT. Nothing has expired.

Mr. SIMMONS. The point I wish to make is that this debate is proceeding by unanimous consent; that there is nothing before the Senate and I think we might now go on with the tariff bill.

Mr. GALLINGER. It has seemed to cease by unanimous consent now, Mr. President, and I introduce a bill for refer-

[The bill introduced by Mr. GALLINGER appears under its appropriate heading.]

GOODS IN BOND.

Mr. SUTHERLAND. I offer a resolution and ask for its present consideration.

The resolution (S. Res. 168) was read, as follows:

Is there objection?

The resolution (S. Res. 168) was read, as follows:

Resolved, That the Secretary of the Treasury is directed to furnish, for the use of the Senate, so much of the Jolowing information as is now available:

First. The value of imported commodities now held under bond for warehousing or other purpose which have been entered without payment of duty.

Second. The value of such commodities so held at the same time in the year 1912.

Third. An estimate of the total amount of the duties payable upon such commodities under existing tariff laws.

Fourth. An estimate of the amount of duties which would be payable under the proposed tariff bill (H. R. 3321) as the same is reported to the Senate by the Finance Committee of the Senate.

The VICE PRESIDENT. The Senator from Utah asks unanimous consent for the present consideration of the resolution.

Mr. SIMMONS. I was under the impression that a similar resolution was passed a few days ago. Am I mistaken about

Mr. SUTHERLAND. I introduced a resolution of this same general character three weeks ago, asking for information which, I think, might have been furnished by the Treasury Department within a week. The delay in furnishing it to me is altogether unaccountable. There has been, as it seems to me, inexcusable procrastination about it. The resolution which I have now introduced differs from the former resolution in the particular that the resolution now calls for so much of the

information as may be available.

Mr. SIMMONS. Mr. President, I am not—

Mr. SUTHERLAND. Let me finish, if the Senator will allow me. We have now gone through the consideration of a very large part of the schedules of the tariff bill. It is going to be a matter of only a short time, I hope, until we shall have reached the administrative provisions of the bill. I, at least, consider the amendment which I have offered upon that sub-ject to be of importance, and it is necessary in order that it may be intelligently considered that the Senate should have the information which has been requested.

Mr. SIMMONS. Mr. President, I want to say to the Sena-

Mr. SUTHERLAND. That is the reason why I have introduced the resolution modifying the former resolution.

Mr. SIMMONS. I am not going to object to the present consideration of the resolution if it does not lead to debate.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution? The Chair hears none. The question is on the adoption of the resolution.

The resolution was agreed to.

THE TARIFF.

Mr. BRADLEY. Mr. President, I desire to announce that if physically able I shall submit a few remarks on the tariff bill on Tuesday next, immediately following the close of the morning business.

CONDITIONS IN MEXICO.

The VICE PRESIDENT. The morning business is closed. Mr. PENROSE. There are two resolutions (Nos. 162 and 163) on the table introduced about a week ago by me relative to the Mexican situation. In view of the fact that they were preliminary and of minor character, and that I have to-day introduced resolutions of wider scope, and I hope of more effective results, I would be entirely willing to have the two earlier resolutions now referred to the Committee on Foreign Relations. I would like to inform the chairman of that committee in this connection that if he wants any information from me or others as to what I know that I can produce about Dr. Hale or about conditions in Durango I will be very glad to communicate with him or to produce witnesses before him. I earnestly hope that he will give both resolutions early and earnest consideration.

Mr. BACON. Mr. President, I think the direction proposed by the Senator is a correct one. I beg to assure him that the committee will deal with the resolutions, as it does with all

other matters, in a proper way.

Mr. PENROSE. I recognize that this is the regular parliamentary procedure, and I only desired to have the resolutions lie on the table until I could possibly make a few remarks on them. That course is now unnecessary, in view of the resolution of wider scope which I have presented. The VICE PRESIDENT. The resolutions will be taken from

the table and referred to the Committee on Foreign Relations.

Mr. PENROSE. Not the resolution I offered to-day. The VICE PRESIDENT. The former resolutions that came over from a preceding day.

THE TARIFF.

Mr. SIMMONS. I ask unanimous consent that the Senate proceed to the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. PITTMAN. Mr. President— Mr. BRISTOW. Will the Senator from Nevada yield to me for just a moment while I refer to a matter in regard to my address the other day on the sugar schedule? It will take just

Mr. PITTMAN. Certainly, I yield to the Senator

Mr. Fowler in regard to his experience in growing sugar beets and the rotation of crops. Some debate was the result of reading the interview with Mr. Fowler, and I made the statement then that I had not communicated with Mr. Fowler and knew nothing of the facts except as they appeared in the newspaper. This morning I received the following telegram from Mr. Fowler:

EMPORIA, KANS., August 20, 1913.

Senator J. L., BRISTOW, Washington, D. C.

The article in the Emporia Gazette referring to my wheat grown on beet land is absolutely and positively correct in every particular, and I am willing to make oath to same.

RUPPLY FOWLER

The VICE PRESIDENT. The Senator from Nevada will proceed.

Mr. PITTMAN. Mr. President, the State of Nevada, which I have the honor in part to represent, is numbered among the wool-producing States of the West. The present tariff bill wool-producing States of the West. The present tariff bill places raw wool upon the free list. I am heartly in favor of such provision of the bill, and I am firmly convinced that it is for the best interests of the people of my State. I believe that a great majority of the citizens of Nevada are of the same opinion. I know that the Democratic papers of the State, with possibly one exception, are supporting the administration in placing raw wool upon the free list.

I realize, however, that some able and sincere Democrats in my State hold a contrary opinion, and that they are presenting to the people of the State the same erroneous statements and fallacious arguments by which they themselves were deceived. There is no doubt that such error is due to a blind faith in the representations of their friends who are engaged in the wool industry and a failure to properly analyze and apply the sta-

tistics relating to the production of wool.

The principal contentions of those who oppose free raw wool are:

(1) That it will destroy the industry.
(2) That it is a discrimination against the producer.

(3) That it will injure the woolgrowing States.

I will discuss each of these complaints in the order presented.

WILL IT DESTROY THE INDUSTRY?

There is only one way in which it could be instrumental in destroying the industry, and that would be by permitting foreign wool to come into the country in such quantities and at so low a price that the American woolgrower could not compete and make a reasonable profit upon the business. The removal of the tariff will certainly permit foreign wool to come into the country, but the question is, How much will come in, and at what price can the foreigner afford to sell it in the United States?

In the first place, the foreigner can not afford to sell his wool in the United States for less than he can obtain for it in the markets of the world; and in the second place, he can not afford to sell it for less than it cost him to produce.

DEMAND INCREASING.

The price of wool in the markets of the world, the same as other products, depends upon the supply and the demand. For a number of years there has been a constant demand for all the wool that has been produced. There is now an active demand for the entire wool production. The demand for the article is increasing at a far greater rate than the supply. With the spread of civilization and the growth of enlightenment and prosperity among the masses, the desire for more and better clothing and bedding has grown, until woolens have come to be looked upon as a necessity rather than a luxury. This demand must be an ever-increasing demand, so surely as civilization must advance.

SUPPLY DECREASING.

What is the outlook for the supply? It has about reached its maximum and must decrease with the advance of civilization. Vast ranges of free or very cheap lands are essential to the success of sheep raising where the production of wool is the chief product of the industry. It is a primitive industry that precedes civilization, and as the home seeker, the settler, and the farmer advance, the wool raiser must retreat. He has now reached his last stand. There is nowhere he can retreat. There are no new ranges to exploit.

The Tariff Board appointed by President Taft in 1911, in discussing this phase of the subject, in its report says:

Mr. PITTMAN. Certainly, I yield to the Senator.

Mr. BRISTOW. I have a telegram received this morning from Mr. Ruffin Fowler, of Emporia, Kans. In my address the other day on the sugar schedule I read a clipping from the Emporia Gazette that was alleged to be an interview with

In speaking of the sheep district of Argentina, the principal producer of sheep in South America, the board says:

The Province of Buenos Aires has approximately 35,000,000 sheep, or over one-half the total number in the Republic. The ranges are fully stocked and the number of sheep is decreasing owing to the inroad on the ranges by wheat farmers. The soil is rich and the carrying capacity of the range extremely high. The demand for the lands will doubtless decrease the number of sheep from now on.

And even in Africa we find no opportunity to greatly increase the supply, while the same causes that operate to decrease the supply in other countries will be operative there. The report in referring to Africa:

All the land available for sheep grazing seems now to be in use, although not fully stocked.

When there are men to cultivate land it is too valuable to be used for the raising of sheep exclusively for wool. As the land is withdrawn from the ranges for more profitable purposes, the herds must be decreased. Principally for such cause, between 1900 and 1910, the number of sheep in the United States decreased from 61,503,713 to 52,447,861, being a decrease of nearly

15 per cent in 10 years. Mr. WARREN. Mr. President, will I disturb the Senator by

asking him a question?

Mr. PITTMAN. I yield to the Senator, with pleasure. Mr. WARREN. I did not hear the date of the figures which

the Senator quoted. Will be kindly give me the date?

Mr. PITTMAN. I will state to the Senator that I used round numbers, without giving the thousands.

Mr. WARREN. For what year?

Mr. PITTMAN. For the years between 1900 and 1910.

Mr. WARREN. I observe the shrinkage. Has the Senator.

Mr. WARREN. I observe the shrinkage. Has the Senator before him and, if so, will be give us the explanation which both the Department of Commerce and Labor and the Department of Agriculture give, which is that the law required the behing of the commerce and the law required the state of the commerce o taking of the census of sheep in April instead of in June, before the lambs were born, and that therefore the decrease is very largely accounted for? In fact, so the Government experts say, there were but few less sheep in 1910 than there were in 1900. The number of sheep of mature age-breeding ewes-was about the same; but the lambs were not counted, because they were dropped between the two dates. I do not know whether the Senator has noticed that explanation of those figures

Mr. PITTMAN. I have noticed the matter to which the Senator refers. It is stated that, by reason of the taking of the census at a different period of time, there were apparently a fewer number of lambs; but I also call the Senator's attention to the report of the Tariff Board, which states that there has been a decrease in that length of time in the number of ewes

Mr. WARREN. I will not interrupt the Senator further now. I have all those matters, and I will bring them up in my own

Mr. PITTMAN. Very well.

Mr. WARREN. But I wanted to know if the Senator had noticed that fact.

Mr. PITTMAN. I have noticed that, and I think probably it may make a small difference in the 15 per cent, but it will be relative as the number of lambs are to the total number of

Mr. NORRIS. Mr. President, will the Senator kindly yield to me a moment there?

Mr. PITTMAN. Certainly. Mr. NORRIS. I think it would be well if the Senator would let us know whether the preceding census, that for 1900, was not taken at the same time. Was not that taken at the same

period of the year as the census of 1910?

Mr. PITTMAN. No; it was not; and, therefore, I think the statement of the Senator from Wyoming [Mr. Warren] in regard to lambs is probably correct. The census of 1900 showed probably a larger number of lambs than was shown by the last census.

Mr. NORRIS. I thought that it would be well, in the interest of the real truth of the situation, to know the period when each census was taken.

Mr. PITTMAN. I desire to be perfectly fair in the matter; and, if that is true, it would probably reduce the percentage to some extent, as the lambs are in proportion to the total num-

Mr. SMOOT. Mr. President, I should like to ask the Senator if it would not wipe out the whole percentage of decrease as given by him? Fifteen per cent of 60,000,000 in round numbers would be only 9,000,000 head. The Senator is certainly familiar enough with the sheep business to know that with 60,000,000 sheep in this country the lamb crop of any year would be 9,000,000 or more; and if it were 9,000,000, then the full 15 per cent of which he speaks would be wiped out.

Mr. PITTMAN. That would depend entirely, Mr. President, upon the particular periods when the respective censuses were taken and the particular number of lambs dropped within those particular dates, which I presume the Senator will be able to show at some other time.

In this connection I wish to state that the Tariff Board calls attention to the decrease of sheep first in the eastern part of the United States, and attributes that decrease to what I am now attributing it; that is, that the land is more valuable for other purposes than for sheep raising.

Mr. THOMAS. Mr. President-

The PRESIDING OFFICER (Mr. SAULSBURY in the chair). Does the Senator from Nevada yield to the Senator from Colorado?

Mr. PITTMAN. I do. Mr. THOMAS. I should like to inquire of the Senator whether the report of the Tariff Board shows or does not show a corresponding decrease in the wool clip?

Mr. PITTMAN. Yes. I thank the Senator for that suggestion. I think it will be found that there has been a corresponding decrease not only in the wool clip, but in the number of

grown sheep.

Mr. WARREN. Mr. President, quite the reverse is shown as to the wool clip, but I will bring that forward at some other time. Allow me to say right Le. : that the Tariff Board, of course, took partial figures from the census an 1 from the statistics of the Agricultural Department, but I have letters dated as late as yesterday from those two departments, which I will to-morrow or at some other time bring in, which show very plainly that the true sheep census of the United States is taken by those departments. The figures of the Tariff Board as to the number of sheep, as they were not called upon to report upon that fact, were drawn from portions of the reports only.

Mr. PITTMAN. I wish to say to the Senator that I realize that the report of the Tariff Board is very defective, but as a general thing the defect exists in favor of a high protective

tariff rather than against it.

Mr. WARREN. I do not wish to be put in a wrong position. I am not stating that the figures of the Tariff Board upon those matters which were relegated to them to ascertain are defective, but it was no part of their business to ascertain the number of sheep.

Mr. POMERENE. But that does not alter the fact. Mr. PITTMAN. I was simply taking up this part of the argument for the purpose of showing that the number of sheep is decreasing, and the reason given by the Tariff Eoard, which I accept for the purpose of this argument, is that the range lands of the country have been exhausted and that the range lands are being decreased because the lands are being taken up by farmers for more valuable purposes

Mr. WARREN. The Senator is speaking, of course, of lands

in the United States.

Mr. PITTMAN. I am speaking of lands everywhere. Mr. WARREN. I agree with the Senator in so far as lands

in the United States are concerned, but I disagree with him totally as to certain other countries.

Mr. PITTMAN. I agree with the report of the Tariff Board not only as to lands in the United States but as to lands in Australia, South America, and Africa.

Mr. WARREN. Possibly some parts of the Tariff Board report will hardly agree with what the Senator is now stating. However, we will let that pass.

Mr. THOMAS. Mr. President, if the Senator will permit me

Mr. PITTMAN. Just a moment. I have the Tariff Board report here to substantiate everything I have said, and I have sufficient quotations here to sustain everything to which I refer.

Mr. WARREN. I have not the slightest doubt but that the Senator means to be absolutely accurate, and I do not question a figure he has given or that every fact set forth by him he has found where he says he has found it. I made the inquiry not to embarrass the Senator, but to bring up the matter of the difference in the periods when the census for 1900 and that for 1910 were taken, the difference being caused by the law. As to the other matters I prefer, and I know the Senator would, that I take them up in my own time.

Mr. PITTMAN. I am very pleased to have had the inter-

Mr. THOMAS. Mr. President, if the Senator will permit

Mr. PITTMAN. I yield to the Senator from Colorado. Mr. THOMAS. I think it is appropriate here to call attention to the April number, 1913, of the North American Review, which contains an article entitled "Our wool duties," by Mr.

Thomas W. Page, former member of the Tariff Board, in which, upon the matter of the wool clip, on pages 452 and 453, he says:

upon the matter of the wool clip, on pages 452 and 453, he says:

It appears from this sketch that in spite of high protective duties, which have endured, with a single brief interruption, for generations, woolgrowing in the United States has become a waning industry. The census reports give evidence to the same effect. They show that the total number of sheep, excluding lambs, during the last 30 years has decreased in every decade. There has been some increase in the western division of the country, but that increase in the last decade was less than 3 per cent, and it was more than counterbalanced by losses in other sections. The amount of the total annual wool clip can only be estimated, and since it depends on weather conditions and other changing contingencies, it fluctuates from year to year. It may be said, however, that from the best estimates that can be made—and these estimates are accepted in business and are used in the Government reports—the average annual production in the five years ending in 1910 was about three hundred and cleven and a half million pounds.

pounds.

This is nearly 4,000,000 pounds less than the average annual production in the live years that ended a quarter of a century earlier.

I beg pardon of the Senator from Nevada for interrupting him, but I thought the paragraph I have read might be appropriate in this connection.

Mr. SMOOT. Mr. President, in this connection—
The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Utah?

Mr. PITTMAN. I do.

Mr. SMOOT. I understood the Senator to claim that the decrease in the number of sheep was caused solely by the fact that the lands are being taken for other purposes and that they have become so valuable that the owners could not afford to carry sheep upon them.

Mr. PITTMAN. I am certain the Senator does not intend to

misquote me.

No.

Mr. PITTMAN. I did not say that it was due solely to that Mr. PITIMAN. I did not say that it was due solely to that cause. There may be a great many causes operating to reduce the number of sheep. What I am simply going on to show now is that the demand is increasing. The only object of this part of my argument is to show that the demand is increasing.

Mr. SMOOT. Mr. Bresident, I simply wanted to call the Senator's attention to the fact that in 1894, when we had free wool, sheep decreased until, in 1897, there were only 36,818,000 head in the United States. After the duty upon wool was re-

head in the United States. After the duty upon wool was re-stored the number of sheep increased until we had 62,000,000 head, as the Senator has stated in his remarks.

Mr. WALSH. And now, Mr. President, they have fallen off until we have only 51,000,000 head instead of 62,000,000.

Mr. SMOOT. Yes; and the reason for that is that the lambs were not born at the time the 1910 census was taken, and accordingly the figures do not show the increase of sheep for that

Mr. WALSH. I am not giving the Senator the census report I am giving the report of the Agricultural Department

for 1913.

Mr. SMOOT. Well, Mr. President, I simply say that I was referring to the figures to which the Senator from Nevada was referring in his speech, and I quoted the figures as to the number of sheep for 1895, 1896, and 1897 from the Agricultural Department, Mr. President, there is no doubt about it. [Laughter.] The Senator refers to 1894 and 1895.

Mr. JAMES. No; I am talking about the number of sheep, which has fallen off, as suggested by the Senator from Montana, about eleven or twelve million, from 1903 to 1913; and still all that has gone on under a high protective tariff on wool; but if during this time wool had been free, then the Senator would have said that it was all attributable to free wool.

Mr. SMOOT. I misunderstood the Senator, for if the Senator will look at the figures he will find that just as soon as there was a duty on wool the number of sheep increased very

Mr. JAMES. The facts also show that under a high protective tariff on wool the number of sheep have decreased about from 10,000,000 to 14,000,000.

If the Senator continues, he will get it at Mr. SMOOT. 20,000,000 or 30,000,000.

Mr. JAMES. I am stating the facts.
Mr. PITTMAN. Mr. President—
Mr. JAMES. If the Senator from Nevada will permit me, if we had had free wool at that time, the Senator from Utah doubtless would be attributing the decrease of 14,000,000 sheep to free wool.

cotton went up from 6 cents at the beginning of that period to

about 12 cents at the end of it.

Mr. PITTMAN. What I wish to say to the Senator from Utah is that I am quoting from the Republican gospel; I am quoting from the Republican bible; I am quoting from the Tariff Board report to show that there has been a decrease in the number of sheep in the last 10 years. That is also sustained by the report of the Department of Agriculture. object in referring to that at the present time is to show that the natural demand for wool and for mutton is increasing and that, without any regard whatever to the tariff, the price must be sustained. So far as concerns the decrease in the number of sheep in the year 1894, I am not referring to any particular instance or to any particular date. I never said that there were not other causes. I know that droughts in New Mexico have killed sheep; I know that snows in Montana have killed sheep; and I know that in Australia in one year approximately one-half of the sheep were killed by a drought. But that does not reach the basic question. The basic proposition is that the ranges of the world are being taken up for more valuable purposes, and when those ranges are so taken up the flocks must decrease

Mr. POMERENE. Mr. President-

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Ohio?

Mr. PITTMAN. I do.

Mr. POMERENE. It seems to me that on this side of the Chamber we must remember that when a fact does not sustain the protective theory it ceases to be a fact. [Laughter.]

Mr. SMOOT. Mr. President, I wish to say that nobody has disputed the fact that there are now fewer sheep than there were a few years ago. No one has denied the fact which the Senator has stated, that the lands in this country are being used for other purposes-that is, certain lands-but there are lands in this country which never can be used for any other purposes than for grazing, and those lands are being utilized, as the Senator says, almost to their limit; but they are not

going to grow much less, as every western Senator knows.

Mr. PITTMAN. Mr. President, I will take pleasure in answering that question later on in my remarks. The Senator admits that the number of sheep are decreasing. If that be a fact, if the supply is decreasing, while there is no question but that the demand is increasing, according to the universal law if the demand is increasing and the supply is decreasing the price must have a tendency to rise. With the demand steadily increas-ing and the supply rapidly decreasing the competition must be between the buyers instead of the sellers. In such event, the price would be so high that the cost of production in foreign countries would not concern the American woolgrowers. It would simply mean that if another country produced wool for less money it would make a greater profit, but such result would in no way reduce the profit of the American woolgrower, because there would be no competition between sellers and no reason to sell any wool for less than the world's highest market

If the supply of wool was greater than the demand for it, then only that wool would be sold which was offered at the lowest price, and the country that could produce it for the least cost would, of course, be able to sell it for the lowest price; but when the demand is greater than the supply, all the wool will be sold and to the purchasers offering the highest

Such is the condition of the wool market to-day in Germany, France, England, and other countries where raw wool is admitted free of duty, but in the United States the buyer must pay the market price of the wool with the tariff duty added. For instance, last year the average price paid by the manufacturers in Germany, England, and France for raw scoured wool was 43 cents a pound, while the average price paid by the American manufacturer for scoured wool was 48 cents a pound, being the world's market price of 43 cents with the duty added. The American manufacturer, of course, added the extra price to his manufactured woolen goods, and the American people paid such bonus to the American woolgrower. By removing this duty we reduce the price of woolen goods the amount of such duty and compel the American woolgrower to accept the world's price. While such reduction will be quite large at the present time, the woolgrower can make a reasonable profit at the world's price, and that is all to which he is entitled.

Mr. PITIMAN. I desire to continue my answer to the Senator from Utah [Mr. Smoot].

Mr. WILLIAMS. I only desire to say that under the contention of the Senator from Utah [Mr. Smoot] if there had been a duty on cotton that would have accounted for the fact that

markets of the United States with foreign woolgrowers? say in the markets of the United States because the question of a tariff duty only affects such markets. The determination of this question depends upon the comparative cost of production of wool here and in foreign countries. To obtain the facts necessary to such determination requires a systematic, careful, and impartial investigation and consideration of many subjects and conditions in every wool-producing country in the world, during a long period of time, by disinterested and impartial men who are peculiarly fitted for such work. While no such investigation has been conducted, there are men who have given such subjects careful consideration and lifelong study. There are, in fact, members of the Senate Finance Committee and the Ways and Means Committee of the House who are probably as well versed in such matters as any tariff The Democratic majority in each of these committees in forming the pending tariff bill had the assistance of the best informed statisticians and experts. The fact that such committees have determined that the American woolgrower can compete with the woolgrowers of the world without the protection of a tariff at least shifts to the protectionists the burden of disproving such conclusions. Democrats have the right to rely upon the findings and conclusions of such committees as the highest authorities in their party until the error of such conclusions, if it exists, is proven.

ANALYSIS OF TARIFF BOARD REPORT.

On the other hand, those who contend that the American woolgrower can not compete with the producers of foreign wool without the aid of a protective tariff rely upon the report of the Tariff Board appointed by President Taft'in 1911. I have already called attention to the fact that the statistics submitted by experts to the Ways and Means Committee of the House and the Finance Committee of the Senate prove that no duty is required on raw wool to enable the American grower to compete in the markets of the United States, and intend to sustain such conclusions by an analysis of the Republican Tariff Board report. In the first place, I do not want it understood that I admit the correctness of such report, because I believe that the report is strongly biased in favor of a high protective tariff, that the board was appointed for the purpose of sustaining President Taft in his opposition to the Underwood tariff bill, which reduced the tariff on raw wool, that the board accepted as true the highest figures given by American sheep raisers as to the cost of production in the United States and the lowest figures given as the cost of production in foreign countries. President Taft, in his message of August 17, 1911, accompanying the veto of the wool bill, says:

My veto was based on the ground that, since the Tariff Board would make, in December, a detailed report on wool and wool manufactures, with special reference to the relation of the existing rates of duties to relative costs here and abroad * * * legislation should not be hastily enacted in the absence of such information.

How did the board proceed to obtain its information? Let

us take the board's own statement:

us take the board's own statement:

The board has conducted a detailed investigation of the financial aspects of the woolgrowing industry as it now exists in the western United States, in the prosecution of which every effort was made to obtain figures that were both accurate and reliable. In a majority of cases growers had not kept their accounts in such shape as to render the desired information readily obtainable. However, the familiarity of the agents of the board with the industry was such that, with the hearty cooperation of the growers themselves, results were obtained that fairly reflect the general conditions prevailing in that region.

* * From its very nature the inquiry was a difficult one. There seemed to be no uniformity in the accounting methods of those whose operations were under inquiry * The schedules upon which these calculations are based were filled out by agents of the Tariff Board, who personally visited each flockowner.

Such is the manner of obtaining the information upon which to

Such is the manner of obtaining the information upon which to base this report. From whom did they seek the evidence? the defendants who were under indictment. It is possible that the board believed that the sheep raisers were ignorant of the reasons that prompted the appointment of the board and the uses to which the evidence would be put, and therefore could be surprised into making admissions against their own interests. The cost of the production of wool in the United States from which the conclusions in the report are drawn were obtained "with the hearty cooperation of the growers themselves." The result of this hearty cooperation is apparent in the board's estimate of the cost of raising sheep in the Western States. The report, on page 311, says:

Operating costs are divided in the schedule into miscellaneous costs and costs of labor, forage, shearing, and selling, respectively. But in the tables shearing and selling costs are included under miscellaneous costs.

The items under miscellaneous costs need little explanation. In cases where the industry is carried on under a salaried manager employed by either a company or an individual, a charge for administration is allowed. When the owner devotes himself to the care of his flock he is allowed compensation usually as an item of labor costs, according to the time which he gives and the nature of his services.

The amount allowed is that which he would otherwise have had to pay for the performance of these services. If this allowance had not been made the comparability of the schedules would have been seriously affected.

"The items under miscellaneous expense need little explana-So says the report. And yet these items, without segregation or detailed computation, are given in the report as about equal to the combined costs of labor and maintenance. remember that the cost of forage and the feeding of the sheep is included under maintenance and not under miscellaneous charges. It is upon these miscellaneous charges that the board relies to sustain its conclusion that the cost of raising sheep in the United States is greater than in any other country. it says:

The items under miscellaneous expense need little explanation.

The costs of maintenance can not be considered of so much importance in the report, as it is given as only one-fourth of the expense of the industry, while the same report declares that miscellaneous expenses constitute one-half of the total costs. Little effort is made in the report to show that the cost of maintenance is greater in the Western States than in foreign countries, because the public are informed as to the vast ranges on the public domain the West used by the sheep raisers without hindrance or charge.

Mr. WARREN. Mr. President, the Senator does not mean, does he, that the sheepmen have the benefit of all the Gov-ernment lands without paying for their range privileges?

Mr. PITTMAN. They probably pay a small license fee in different places for the purpose. I believe the reports state that; but I believe all the public ranges are to-day practically

monopolized by sheep.

Mr. WARREN. I wish to say to the Senator that it is hardly a nominal figure, as he will see by investigation. It is pretty large figure.

Mr. PITTMAN. It is included, however, within the maintenance charges, which are only one-quarter of the total expenses of the sheep industry in this country.

The board can hardly contend that the difference in cost of production here and abroad is due to the difference in the cost f labor, because in its report in discussing the expenses of the industry in Australia it says:

Labor, while paid almost as much as in the United States, does not cost so much in the aggregate, because of the paddock system, which enables one man to care for very large numbers of sheep.

The same character of labor, in fact, that is used in all foreign countries is used in most portions of the United States. It is a foreign labor. It is just as cheap a labor, it is just as ignorant a labor, as we find anywhere in the world. As far as offering any protection to the American workingman is concerned, it does not do so, because this cheap foreign labor is

imported to many places in this country.

Mr. WARREN. Will the Senator give us, from his personal knowledge with regard to his own State, the wages of sheep

herders?

Mr. PITTMAN. I will give that information to the Senator in a few minutes from those who are even better informed than

the Senator from Wyoming or myself.

Mr. WARREN. If the Senator will allow me, that is rather an evasion of the question. I asked the question because I presumed the Senator would know exactly what the herders of sheep and minders of sheep receive in Nevada, as the Senators from each State ought to know about their particular State. I did not intend to be impertinent in my inquiry.

Mr. PITTMAN. I have no doubt the Senator has fixed conclusions with regard to such matters; but I prefer to give to the Senate the report of the assessors and of various sheepmen in my State as to the price they are paying rather than to

force my own conclusions upon the Senate.

Mr. WARREN. I understood the Senator not to be quoting then from the Tariff Board report, but to be stating that we paid for sheepmen in this country as low wages as were paid in Australia and other countries.

Mr. PITTMAN. What I read was from the Tariff Board re-

Mr. WARREN. The Senator, then, does not state that as his own knowledge of wages in his State, but from the Tariff Board report?

Mr. PITTMAN. What I have read is from the Tariff Board

Mr. SMOOT. The Tariff Board report does not say that there is as ignorant labor employed in this country as in any other country of the world, and the Tariff Board report does not say that the men are paid as low wages here as in any other country in the world.

Mr. PITTMAN. I read what the Tariff Board report said.

I will read it again for the benefit of the Senator.

Mr. SMOOT. There is no objection to what the Tariff Board says; it was the statement the Senator made after reading what the Tariff Board says.

Mr. PITTMAN. As the Senator is satisfied with what the

Tariff Board says, I will not read it again.

But what is the difference in the number of laborers employed, and what is the cost of building and maintaining these enormous paddocks to fence in millions of sheep? The board calls attention to the paddock system to show that a lesser number of herders is required, but it does not even suggest that such paddocks, in their building and maintenance, add an enormous item to the cost of raising sheep in Australia. If the paddock system were used in the West, the charging of half of the total cost of the industry to miscellaneous expenses might not appear to be such a gross exaggeration. If you do not know the equipment of a sheep ranch, look in the report and you will see it at a glance—a houseless, unfenced range on the free public domain, a sheep herder to every 1,500 sheep, a camp tender to every flock, which may contain from 3,000 to 10,000 head of sheep, a covered wagon to each camp tender,

and collie dogs to do the intelligent work.

Mr. WARREN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Wyoming?

Mr. PITTMAN. With pleasure.

Is the Senator now reading from the report Mr. WARREN. of the Tariff Board?

Mr. PITTMAN. No; I am not reading from the report. I

got my information from the report.

Mr. WARREN. May I ask the Senator, then, if he observed in reading the report that the final conclusion of the Tariff Board in comparing Australia and this country was that in certain parts of this country it cost 19 cents a pound to raise wool, in certain other parts 11 cents a pound, in certain others 9 and a fraction, but in Australia the profits on the sheep from other sources than wool were such that the wool cost them nothing, and, in fact, they made in many localities in Australia a profit without counting the wool at all?

Mr. PITTMAN. I thank the Senator for that suggestion. Mr. WARREN. That, of course, the Senator understands, is

in the report.

Mr. PITTMAN. Yes; and I want the Senator to listen carefully, if he will do me the honor to do so, when I read that portion of the report. I think he will ascertain that they do not state that the mutton pays all the expenses of producing the wool in Australia or in South America. I think the report will show that the mutton in certain parts of the West does pay, with the exception of one-half of 1 per cent, all the expenses of producing the wool.

But returning to the Tariff Board's methods of exaggerating costs. The report says that sometimes it is necessary for the sheep raiser to build bridges across gulches so the sheep can pass from one range to another, and that such necessities add greatly to the miscellaneous expenses. They may exist somewhere, but I have never seen a gulch on the western range that a sheep could not cross, and even the report does not contain a photo-

graph of one of these expensive bridges.

The board, on page 339 of the report, places the wages of herders at \$59.42 and board and extra labor at \$63.02 and board per month in the State of Nevada. Hon. D. F. Houston, the Secretary of Agriculture, in reply to a written request for information concerning the sheep industry in Nevada, says:

The wages of such employees (sheep herders and camp tenders) are about \$35 to \$40 per month and keep, amounting to about \$12 to \$14 per month.

It will be observed that the cost of labor as given by the Tariff Board is 58 per cent higher than the same cost as given

by the Secretary of Agriculture.

Mr. WARREN. Does the Senator wish by that to discredit
the figures of the Tariff Board on the cost of raising wool and

Mr. PITTMAN. I have already stated that I think they are very discreditable.

What is the difference between the Senator Mr. WARREN. from Nevada and the Tariff Board on wages, please?

Mr. PITTMAN. The difference is about 58 per cent.

Mr. WARREN. Did I understand that the wages were \$35 or \$30?

Mr. PITTMAN. I will read it again. Mr. WARREN. Please.

Mr. WARREN. Please. Mr. PITTMAN. The report gives the wages of herders in Nevada as \$59.42 and board; extra labor, \$63.92 and board. The Department of Agriculture, in reply to a recent letter of mine, says:

The wages of such employees (sheep herders and camp tenders) are about \$35 to \$40 per month and keep, amounting to about \$12 to \$14 per month.

Mr. WARREN. That is, the keep is \$12 to \$14 per month? Mr. PITTMAN. Yes, sir. Mr. WALSH. Mr. President, will the Senator kindly give me a reference to the portion of the report where that extraor-

dinary statement is made?

Mr. PITTMAN. On page 339 of the report.

Mr. WALSH. I say "extraordinary," Mr. President, because I am able to speak from actual personal knowledge when I say that sheep herders in the State of Montana get \$5 more than ordinary farm laborers, who are hired by the month and get \$40 a month. The prevailing rate of wages for sheep herders in the State of Montana is from \$40 to \$45 per month. When I heard the statement, I thought there must be some error.

Mr. WARREN. I assume that does not include the "straw bosses," as they are termed, and those who have the care— Mr. WALSH. The statement does not, either, as I gather

it, because it is expressly confined to sheep herders.

Mr. WARREN. As I understand the Senator from Montana, then, the regular wages would be from forty to forty-five dollars. That, of course, is "found." including living expenses; that is, \$40 to \$45 per month in addition to board, lodging, and such like expenses?

Mr. WALSH. Certainly; and the same is true here. statement is that the figures are based upon a computation of sheep herders getting fifty-nine dollars and some cents a month and "found."

Mr. WARREN. That being true, does the Senator maintain that the Tariff Board sets out that it costs as much for labor in Australia as it does in America?

Mr. PITTMAN. I read the language wherein they stated that. Mr. WARREN. I will not trouble the Senator further.

Mr. PITTMAN. The county clerk of Humboldt County, one of the largest sheep-producing counties in Nevada, sustains the Secretary of Agriculture in his estimate of the cost of labor. In answer to a letter of inquiry he writes me as follows:

From my observations up to a couple of years ago there were coming into this country a carload of young Basques every year, and their business was sheep herding, and I do not think that they received over \$30 per month for their first year's work, and perhaps in many cases not that much, but after gaining some experience in the work they were probably paid more.

The assessors of the various counties in Nevada, in reply to inquiries made by me, give the wages at from \$35 to \$45 per month. Hon. Ben W. Coleman, judge of the ninth judicial district court of the State of Nevada, a man who is most highly respected in the State for his learning, ability, and integrity, writes the following letter with reference to the sheep industry in Nevada:

NINTH DISTRICT COURT CHAMBERS, BEN W. COLEMAN, DISTRICT JUDGE, Ely, Nev., May 31, 1913.

Hon. Key Pittman, United States Senate, Washington, D. C.

Hon. Key Pittman,

United States Senate, Washington, D. C.

My Dean Semator: Yours of the 24th received. The assessor has not completed the assessment for this year, consequently I inclose statement for 1912 from his records.

I also inclose a clipping from the Journal, which you may have already. I do not believe the statement which has been made by the Sheep Growers' Association is reliable. Three years ago I bought a sheep ranch, and before doing so I inquired extensively as to the expense of running sheep, and from all the information received I found that the expense was about \$1 per head. I note that their statement is expense of running, "including losses," \$2.50 per head. I believe that \$1.50 per head, including losses, is ample, and that \$1.75 would be greatly in excess. I reach these conclusions after careful and extensive investigation.

Their statement also shows "that 80 per cent of the ewes lamh." This is a low estimate. Many of the ewes have twins. A flock of good, strong, healthy sheep run as high sometimes as 115 per cent. I was told by a very prominent sheepman here a little over a year ago that the report or figures given the men representing the Tariff Commission were not reliable and made in favor of the sheepmen.

I am not prejudiced against the sheep industry, as I am the half owner of a 700-acre sheep ranch and of 2,000 acres of grazing land, and my selfish interest is in keeping up the price of wool and mutton.

It has occurred to me that I might give you some idea as to the wages paid herders. The average herder carus about \$35 per month. If a man is in the business on a large scale he usually employs a camp tender, who earns about \$50 per month. The camp tender generally cares for two herds. He is the man, as you probably know, who goes out to the herder's camp about twice a week with salt, provisions, etc. A small rancher, or a man with one herd, usually acts as his own camp tender. As you said in your letter, a large percentage of the herders are Basques. They are practically all fo

BEN W. COLEMAN.

The board, on page 330 of the report, gives the average net income from the capital invested in the wool business in the Western States to be only 6.2 per cent, while on page 10 it states that the prevailing rates of interest throughout the western woolgrowing States are from 8 to 10 per cent. It is, indeed, strange that a man would remain in an industry, attended with all the risks portrayed by the board when he can lend his

money on gilt-edged security without danger or worry and earn a greater income. Again, if the business will earn only 6.2 per cent on the capital invested, how could a man borrow money at from 8 to 10 per cent to start, enlarge, or carry on such business? And if money can not be borrowed for such purposes—and certainly no one would lend upon a business that could not even earn the interest—how does the board account for the fact that it is a common occurrence for men to start in with a few hundred sheep and increase them to thousands in a few years? How does it explain the remarkable growth of fortunes in such industry within the last few years?

The board in its effort to exaggerate the costs of the industry has reduced its computations of profits to an absurdity. There is no doubt that the costs are much less and the profits much greater than are estimated in the report. The board in arriving at the cost of producing wool subtracts the receipts from all sources, except wool, which is principally mutton, from the total costs of the sheep business and the balance is the cost of producing the wool. This they designate as net charge against wool. For instance, if the mutton should sell for enough to pay all the expenses of the sheep industry, there would be no net charge against the wool and the price received for the wool would be all profit. The Tariff Board admits that the net charge against wool in South America is from 4 to 5 cents a pound, and in Australia somewhat less.

I ask the Senator from Utah if I am correct in that? Mr. SMOOT. The Tariff Board report says a few cents less. It says the amount of charge against the wool is a few cents in Australia.

While I am on my feet, I may have misunderstood the Senator in referring to the Tariff Board report on page 339. Did I understand the Senator to say the report shows that they paid \$59.42 per month for herders in Nevada?

Mr. PITTMAN. Yes. sir. Mr. SMOOT. Did the Senator at some time say that that amount included the board and expenses of maintaining the

Mr. PITTMAN. I did. My reason for stating that is that the board in its general report states that they do pay the herders

and furnish them their keep.

Mr. SMOOT. Then, of course, the conclusion the Senator reaches is certainly wrong, because he said there was a difference between \$40 and \$60 of 50 per cent, which is true. I am sure the Senator did not want Senators to understand that you can hire a herder in Nevada for \$35 or \$40 without his

Mr. PITTMAN. I understa Mr. SMOOT. With board? I understand that is the price they pay.

Mr. PITTMAN. And give him his board. I understand that when fixing the herder's salary they include his board. But if the Senator from Utah does not so understand it I am willing to accept his conclusion and subtract the cost of board from the \$59, and it will substantiate what I have already said as to the cost of labor.

Mr. SMOOT. I take it the Senator would say that to board a man in the West as sheep herder would cost at least \$20 a

Mr. PITTMAN. The reports we have from the Agricultural

Department say not.

Mr. SMOOT. I have not run sheep for a good many years. I do not own a head now. I have run a great many herds of sheep in my life. I assure the Senator I never hired a foreman for less than from \$75 to \$90 per month, and that was back in 1890. I paid Mr. Thomas Thompson as foreman \$85 at that time, and I am quite sure that the Senator will admit that to-day that amount is paid in Nevada or in Utah.

Mr. PITTMAN. I will say to the Senator that I know of my own personal knowledge that the wages run between \$35 and \$45, and a foreman gets about \$50 a month. I also want to state that those range herds in Nevada sometimes contain from 12,000 to 20,000 sheep under one foreman, and I would not be surprised that the foreman the Senator from Utah refers to had charge of a vast number of sheep.

Mr. SMOOT. No; never that number. I wish to say that as far as my own State is concerned we have no large herds of sheep there now. The number has been cut down by the Forest Service until there are very few sheep owned by any one man.

Mr. SHIVELY. Mr. President-

The PRESIDING OFFICER. Does the Senator from Nevada

yield to the Senator from Indiana?

Mr. PITTMAN. I yield.

Mr. SHIVELY. I only wanted to inquire of the Senator from Utah if he would infer from his own experience in this want to emphasize the fact, as I have done on several other oc-

matter and from the report of the Tariff Board that the wages

have gone down 25 or 30 per cent in the last few years?

Mr. SMOOT. I know nothing about that. I did not infer any such thing. The question came up as to what is paid to a herder in the State of Nevada. I only wanted to know if the figures included the board and expenses of maintaining the herder.

Mr. SHIVELY. Did the Senator's figure also include the board?

Mr. SMOOT. It did. Mr. SHIVELY. Erom \$75 to \$90? Mr. SMOOT. Not for the herder. Mr. Thompson was not a herder. He was foreman. In the Tariff Board report the wage of a foreman is given at \$111.

Mr. SHIVELY. Is there any other question the Schator desires to ask?

Mr. SMOOT. No; the Senator from Nevada asked me a ques-

tion in the beginning, and I answered it.

Mr. PITTMAN. The board does not attempt to substantiate these figures nor to show that it has obtained sufficient facts upon which to base the estimate. The best estimates place an average net charge against the principal foreign wools at 5 cents per pound.

But I am willing to accept the net charges placed in the Tariff Board report against the production of foreign wool, which is from 4 to 5 cents more on South American wool and

a few cents more on Australian wool.

COMPARISON OF TRANSPORTATION COSTS.

The average rate of transportation for foreign wool to the American markets is about one-half a cent more than for the transportation from the Western States to the same markets.

Mr. SMOOT. More? Mr. PITTMAN. More. Mr. SMOOT.

Mr. SMOOT. The Senator must know that the freight rate from Nevada to Boston or Philadelphia or any other eastern wool market is a great deal higher than the freight rate from Australia to those markets.

Mr. PITTMAN. But I am taking the importations covering a long period of time and the various grades of wool of all

countries coming into this country.

Mr. SMOOT. The Senator means the freight charge?

Mr. PITTMAN. I mean the freight charge.

Mr. SMOOT. I call the Senator's attention to the fact that the freight charge on wool to-day from Australia to Boston or Philadelphia is about \$8 a ton, and that is higher than it has That is 40 cents a hundred. The Senator knows that there can not be a hundred pounds of wool shipped from Nevada to Boston for less than \$1.92. So, Mr. President, there is one cent and a half a pound against the western grower on transportation.

Mr. PITTMAN. I said that the importation on wool into this country shows that it has cost half a cent more a pound than from the interior of this country to various markets, and I am prepared to show that at a later period of time. I should like to have the Senator from Utah at any other time discuss that particular question, if he sees fit. I make that as a statement based upon the computations of the Tariff Board and

upon other statistics now presented.

Mr. WARREN. Will the Senator allow me?
The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Wyoming?

Mr. PITTMAN. I do.

Mr. WARREN. I can not let that pass without putting my word against that of the Senator. As I read the Tariff Board report, and as I know from personal experience, it is often as low as \$8, sometimes higher, from Australia. The rate from Argentina oftentimes is 16 and 17 cents a hundred, while from the Rocky Mountain States the average is probably \$1.75. I think higher. In many western places the rate is \$1.98. Mr. THOMAS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nevada

yield to the Senator from Colorado?

Mr. THOMAS. With the Senator's permission, I should like to ask the Senator from Wyoming whether the freight on wool is not higher from his State and from mine to the Boston market than it is from the Pacific coast?

Mr. WARREN. It is; but not from Montana or the Rocky Mountain States.

Mr. THOMAS. I understand, but I am talking about our

States.

casions, that the issues which are here involved are very largely a matter of freight rates, and that the interior of this country, which has not even potential competition, is made the victim of the transportation rates on every commodity which we pro-

Mr. WARREN. Now, if the Senator will allow me-

Mr. THOMAS. And it is that growing and absolutely indefensible evil as much, if not more than the matter of tariff rates, that causes our section of the country to suffer as it

Mr. WARREN. I think the Senator cited that wool has cost \$1.72 a hundred for freight from the capital of the Senator's State and from the capital of mine until very lately, when, by a ruling of the Interstate Commerce Commission, it has been reduced to \$1.32. But we can not get away from the fact that all freight from foreign countries is bound to be lower than the rate at which any railroad can haul across the country, because of water transportation facilities.

Mr. THOMAS. I am not disputing that.

Mr. PITTMAN. Mr. President, I have to decline to yield further. I am always willing to yield for a reply to questions, but I really do not like to impose upon the Senate and the Finance Committee by allowing this matter to drag. ators may discuss this question between themselves.

I want to state now that I thoroughly agree with the Senator from Colorado [Mr. Thomas]. The question of freight rates could hardly be considered in this question at the pres-ent time to any particular extent, as we know that the rates are changing all the time. But I simply want to suggest to the Senator from Utah that all the wool in Australia is not raised in the town of Sydney. It is raised just as far in the interior

as our wool is raised, and it costs them just as much to get it to the seaports of Australia and the seaports of Argentina as it costs us to get it from the interior of the West to the seaports of our own country.

Mr. SMOOT. The same is true, I may say, in relation to our wool. It is not all produced where a railroad is, and it will have to be transported to a railroad.

Now, Mr. President, the tariff report says:

The general freight from the seacoast of New Zealand to London is reported as averaging \$3 per bale.

That is what the Tariff Board report says.

Mr. PITTMAN. Now, Mr. President, they take the freight rates from the port of Australia or the port of South America to another port on our coast, and they do not take into consideration the interior transportation of these countries at all, whereas, as a matter of fact, the interior transportation of those countries is more primitive than ours and more expensive than ours, and we place our wool practically at the market of this country on the coast at the same rate that they place in Australia the wool from the interior on the coast of Australia and Argentina.

TARIFF BOARD STATISTICS SUSTAIN FREE RAW WOOL,

On page 330 of the report is a tabulation showing by States total receipts and expenditures, capital per head, selling price of wool per pound, and net charges against wool per pound of flocks investigated by the Tariff Board in the western United States. I will not read the tabulation, but will ask leave to have it printed in my remarks at this point.

The PRESIDING OFFICER. Without objection, that will be

done.

The table referred to is as follows:

Table X.—Showing, by States, total receipts and expenditures, capital per head, selling price of wool per pound, and net charge against wool per pound, of flocks investigated by Tariff Board in the western United States.

Mr. PITTMAN. I simply want to read, however, the different costs of production in wool in the Western States as they will affect the same States. Here are the net charges: Arizona, 10 cents a pound; California, 7 cents; Colorado, 8 cents; Idaho, 17 cents; Montana, 13 cents; Nevada, 4 cents; New Mexico, 8 cents; Oregon, 10 cents; Utah, 9 cents; Washington, one-half cent a pound; and Wyoming, 12 cents a pound.

Now, let me read why that difference occurs in the cost of raising wool in these Western States. Nearly every one of those States was grouped with some western sheep-raising

State. The report says, at page 371:

The wide variation from Table XIII to Table XVIII in the net charge against wool depends in the main upon certain conditions which have already been discussed—the particular sort of flock kept, whether crossbred or pure wool; whether woolgrowing is combined with breeding; the importance for different purposes of the annual increase of lambs; the extent to which wethers are kept; the amount and quality of wool produced; and the methods employed in the farm operations.

Since the only source of regular income from wethers is wool, and the costs of maintenance are not materially lower than for breeding ewes, it is evident that though the fleece of the wethers may be superior to that of the ewes, the higher the proportion of wethers in a flock, the greater is likely to be the net charge against wool, since under the conditions now prevailing in this region the tables indicate that the fleece of a sheep alone does not pay for its maintenance.

The net charge for the production of wool in a foreign country being 5 cents a pound, the wool in the State of Nevada and the State of Washington requires no duty, because the net charge against the wool in those States is placed at less than 5 cents a pound by the Tariff Board.

If for the sake of argument we admit that there is no net charge against the wool in foreign countries, then the State of

because, as shown in the table, there is only one-half a cent a pound net charge against the wool in that State, and that would be offset by the greater freight rates on foreign wool. The report admits that Washington State requires no duty on its wool, that the receipts from other sources-which means mutton-are sufficient, lacking one-half cent per pound, to pay all expenses of the sheep industry. And remember, that this estimate is based on the exaggerated costs that the board has charged against the industry in the United States. In other words, the report admits that the cost of producing wool in Washington is only one-half of 1 cent per pound, while the same report shows that the cost of producing wool in South America is from 4 to 5 cents a pound, and a little less in Australia than in South America.

Why is Washington State in better condition to compete with foreign woolgrowers than the other woolgrowing States of the West? Can the other States place themselves in the same favorable position as the State of Washington? A careful study of the table will make clear the answer to both questions. It will be observed that Washington has no advantage over the other States in the matter of the cost of production of the wool, and receives a smaller price for its wool than is received in most of the Western States. Let us compare the industry in Montana and Wyoming, the two greatest producers of wool in the United States, with the State of Washington, where it is admitted by the board that the receipts from other sources besides wool practically pay all expenses of the sheep industry, leaving wool as a total profit.

The report gives the following cost per head for raising sheep in such States: The cost of the labor is, in Montana, 54 cents; in Wyoming, 72 cents; in Washington, 74 cents. So the cost of Washington will Mill require no duty to enable it to compete, the labor is greatest in Washington. The cost of maintenance

is, in Montana, 54 cents; in Wyoming, 36 cents; and in Washington, 62 cents. So the cost of maintenance is greatest in Washington. This shows that the cost of labor and maintenance is greater in Washington than in either Montana or Wyoming. The miscellaneous cost is, in Montana, 97 cents; in Wyoming, \$1.01; and in Washington, 77 cents. It appears from a comparison of these miscellaneous expenses that the cooperation of the woolgrowers in Montana and Wyoming was more hearty than in Washington. Yet, in spite of this, the report shows that the total cost of raising a sheep in Montana or Wyoming is less than in the State of Washington. The report gives the total cost of raising a sheep in each of such States as follows: Montana, \$2.05; Wyoming, \$2.09; and in the State of Washington, \$2.13. And although it costs more to raise sheep in Washington than in Montana or Wyoming, Washington earns an income of 17.3 per cent on the industry, while Montana earns but 5.6 per cent and Wyoming only 4 per cent, according to the report. It is apparent that the difference in profits is not due to the costs, and therefore must be due to the difference in the receipts. Washington receives no more for its wool, and therefore its increased receipts must come from some other source. By computation, based upon the tabulation hereinbefore set out, we find that the receipts per sheep for wool was, in Montana, \$1.261; in Wyoming, \$1.017; and in Washington, \$0.756; while the receipts from other sources per sheep were: In Montana, \$1.103; Wyoming, \$1.282; and Washington, \$2.167. In other words, Montana received \$2.36 for each sheep; Wyoming, \$2.30; and Washington, \$2.92 for each sheep. The in-

creased price for the Washington sheep is due to the fact that Washington received nearly twice as much for its mutton in each sheep as was received by either Montana or Wyoming.

Take Nevada, for instance. This State stands next to Wash-

ington, as is shown by the report, for the low net charge against the production of wool, and is accredited in such report with earning 11.3 per cent income on the investment. This is undoubtedly an underrating of the income, as we know, by reason of the gross exaggeration of the mythical miscellaneous costs; but it serves the purpose of comparison. Nevada, next to Washington, has the largest proportion of mutton sheep. The report shows that receipts for each sheep raised in Nevada are 94 cents from wool and \$1.97 from mutton. In other words, comparing Nevada with Montana and Wyoming, we find that Nevada receives for each sheep practically as much for its wool, while for the mutton product of each sheep it receives nearly twice as much as does either Montana or Wyoming.

The board, in discussing the tendency toward the raising of mutton sheep, calls attention to the fact that in Washington and Nevada, where the net charges against wool are recorded as the smallest, there are in use on the ranges the largest number of mutton rams. In Montana, Wyoming, and those other States where the profit on the investment is given in the report as the smallest, the sheep raiser sacrifices the mutton qualities of the sheep for the improvement of the wool, while the sheep raiser in Washington and Nevada devotes more attention to the production of mutton. In the former case, wool is treated as the principal product and mutton the by-product, while in the latter case mutton is considered as the principal product and wool as the by-product. The necessity for the sheep raiser to give more consideration to the production of mutton is recognized by the board, for it says in its report, at page 343:

## MUTTON AN IMPORTANT FACTOR

These figures indicate that under present conditions sheep raising can not be profitably carried on for the sake of the wool alone, and that if the industry is to prosper the receipts from mutton must cover a large part of the costs. The loss incurred in exclusive wool production is the result of two causes: (1) The gradual encroachment of agriculture on grazing lands and the consequent great increase in the costs of sheep growing, and (2) the gradual decline of wool values.

The decline in the profits of wool production has, however, been accompanied by an increase in the demand for mutton, resulting from the fact that the production of pork and beef has not kept pace with the growth of population.

But the number of sheep received at Chicago stockyards has constantly and rapidly increased, having passed the receipts from cattle in 1894 and being at the present time almost equal to the receipts of hogs. These figures are embodied in the following table:

	1870	1880	1890	1900	1910	1911 (esti- mated).
SheepCattleHogs	350,000	336,000	2,180,000	3,550,000	5, 229, 000	5,668,000
	533,000	1,382,000	3,484,000	2,729,000	3, 053, 000	2,920,000
	1,690,000	7,060,000	7,660,000	8,109,000	5, 587, 000	7,031,000

But these figures do not fully indicate the increase in the receipts of mutton as compared with those of beef and pork, since the average weight of sheep has been increasing, while that of cattle and hogs, respectively, has declined.

The annual consumption of sheep and lambs in the United States at the present time is thought to be about 17,000,000 head, representing a total weight of about 630,000,000 pounds. The average weight of the lambs marketed at Chicago is about 70 pounds and that of mature sheep about 100 pounds, and they dress about 50 per cent and 48 per cent, respectively. The important place which mutton holds to-day among meats is further shown by the fact that in the year 1910 Great Britain imported, principally from Australia and South America, 589,000,000 pounds of refrigerated mutton and 16,332,704 pounds.

The receipts from other sources amount approximately on an average per head to \$1.39 in the Western States, \$0.93 in Australia, and \$0.84 in South America, and constitute approximately in the United States 54.3 per cent, in Australia 41.3 per cent, and in South America 73 per cent of the total costs.

That receipts from other sources are largely derived from the sale of mutton is attributable to the fact that for some years the sheep industry of our western region has not been expanding; indeed, during the last 18 months there has been a sharp decline in the total number of sheep. A large percentage, ranging normally from 70 per cent to 80 per cent, of the sheep annually placed on the market are lambs, because it does not ordinarily pay to run wethers for their wool, and the grower retains only enough lambs to replace the unserviceable ewes which he annually culls from his flock. The price of mutton has varied at the Chicago stock yards but slightly for a number of years, as shown in the following table, which gives the average prices paid in the Chicago market from 1907 to 1911, inclusive:

	1907	1908	1909	1910	1911
Wethers.	\$5.74	\$5.14	\$5.58	\$5.46	\$4.22
Lambs.	7.19	6.11	7.34	7.56	6.00
Ewes.	5.19	4.88	4.88	5.19	3.75

The declines shown in 1911 are attributed to heavy liquidation on the part of western growers. It would appear that in normal times the annual receipts from mutton have remained fairly uniform during this period, but unless there is some marked change in conditions no material increase of this amount is to be expected in normal years.

In Australia the receipts from mutton constitute a much smaller proportion of the receipts from other sources. This is partly due to the fact that the great sheep runs of the interior are unfavorably situated as regards marketing, but in a larger measure to the fact that these growers place greater emphasis on the production of wool than on that of mutton, and run their flocks accordingly, as evidenced by their custom of keeping large numbers of wethers for their wool. In New South Wales, for example, wethers constitute over one-half of all the sheep kept. sheep kept.

Mr. President, I can not refrain from again calling attention to this significant language used in the report:

These figures indicate that under present conditions sheep raising can not be profitably carried on for the sake of wool alone, and that if the industry is to prosper the receipts for mutton must cover a large part of the cost.

The sheep raisers in the State of Washington and in the State of Nevada have already recognized this necessity, and the receipts for mutton in those States practically pay all the costs of raising sheep, leaving the wool as a net profit.

Mr. Bennett, the editor of the Wool and Cotton Reporter and a well-known expert on wool, in his testimony before the Ways and Means Committee of the House, said:

and Means Committee of the House, said:

The main objection to the duty on wool is not only that it hampers the manufacturers, but it hampers a proper sheep husbandry in the United States. The people of the United States are very fond of lamb, roast lamb, lamb chops, and lamb in every form, but there is not the desire in this country for heavy mutton that there is abroad in England and France and elsewhere. There have never been half enough lambs produced in this country to supply the demand. During the past year there has been something in the sheep and wool business of the United States approaching what we call a liquidation in the stock market—there has been a liquidation of sheep, due to the scarcity of pork and mutton, and I do not know that anybody knows to how low a point the supply of sheep and lambs in the United States has been reduced.

If we had free wool and the enormous political atmosphere which has surrounded the sheep husbandry was removed, instead of producing 50 per cent of the lambs in the United States we would produce 100 per cent. They do in England. They have twins enough to offset the male sheep and their losses in other directions, and they produce 100 per cent. The demand exists in this country for 100 per cent of lambs, but the attention of the farmer has been directed to such an extent to wool that they have never developed in that direction as they should.

I have been familiar with the woolgrowing in the West and sheep husbandry in the West for 35 years, and it is astonishing the extent to which they keep what they call dry sheep—that is, wethers, or denaturalized male sheep. They could sell them as full-grown sheep for three or four dollars, for the sake of the wool. I maintain that it will not be difficult for this committee to satisfy itself that with free wool and the proper development of the sheep husbandry in the United States more sheep will be kept than to-day, and it will be a growing industry instead of a decadent industry.

I want to call attention right now to the fac

I want to call attention right now to the fact that the very conditions against which the board complains exist to a greater extent in those States where the net charges placed by the board against wool were the greatest and to a lesser extent in those States where the charges were the least. The board's report and tabulations show that the State of Washington produces the greatest percentage of lambs of any Western State, and that the State of Nevada produces the next greatest per-centage of lambs of any Western State. The report also shows that the States of Washington and Nevada carry a smaller percentage of wethers than nearly all of the other Western States, carrying out the theory brought forward by the Tariff Board, and showing the western sheep raisers how they can have wool as a clear profit if they will continue their industry according to scientific views or as the nature of the country demands.

Let the sheep raisers of Montana, Wyoming, and the other Western States, who are crying for a protective tariff on wool, pay more attention to the raising of sheep for mutton and they will have no more need for such tariff than the States of Nevada and Washington.

IS IT A DISCRIMINATION AGAINST THE PRODUCER?

Mr. President, I will answer but briefly the next complaint against this provision of the bill: Is the placing of raw wool on the free list a discrimination against the producer because some duty is still maintained upon the manufactured article of which raw wool is a constituent part?

The complaint is based upon a theory of protection, and therefore I intend to discuss it from such viewpoint. As I understand, the recently declared theory of protection is that the tariff upon a foreign article should equal the difference of the cost of production at home and in a foreign country. I have already proven by Republican statistics that the cost of the wool industry is no greater here the try is no greater here than abroad, so raw wool, under the Republican theory, is not entitled to protection.

The manufactured article might or might not bear the same relation to a similar article abroad, but the raw material, if it did not come within the rule, certainly, under the Republican protective theory, would not be entitled to a protective tariff on the sole ground that a duty was placed upon the manufactured I do not understand that such a theory has ever been presented by any protectionist. If such theory were put into force and effect, then it would be essential to have a duty on every article, both raw and manufactured, whether it required the aid of protection or not. The Republican Party has never recognized such a theory, as every tariff bill that it has prepared has placed many articles upon the free list, and principally the raw articles

If one industry can exist without the aid of a tariff duty, and those engaged in such industry believe in the system of protec-tion at all, I can not see how they would have cause for com-plaint because a less-favored industry received only sufficient aid to preserve its existence.

The only possible excuse for the retention of any duty upon the importation of an article, other than that of raising revenue, is to prevent its destruction by reason of foreign competition. If the producers of raw wool do not believe that the manufacturers of articles containing wool require the protection of a duty to prevent their destruction, let them bring the evidence of such fact before this Democratic administration, and a way will be found, I confidently believe, to raise the necessary revenue from some other source and to place such manufactured articles also on the free list. I have not made any careful study of the tariff as affecting manufactured articles, but I do know that the sheep-raising industry does not require the aid of any tariff duty to enable it to compete in the markets of the world. But whenever I have the information that convinces me that the tariff can be entirely taken off of manufactured articles that are necessary to the comfort of the masses of the people, I intend to use my utmost endeavors to have such articles placed on the free list.

The only discrimination of which we hear complaint from the producers of raw wool is the alleged discrimination against such producers in favor of the manufacturers. They seem to think that the only ones to be considered are the producers and the manufacturers. It does not occur to them that the consumers, who are a hundred times greater in numbers than both the producers and manufacturers of wool together, should be taken into consideration. In determining whether a tariff bill discriminated against a State, we must determine whether it is a benefit or an injury to the greatest number in the State. In my State the producers have benefited by a duty on raw wool, and the consumers have been correspondingly injured. All the people are consumers, while less than two-fifths of 1 per cent of the population of my State are engaged in raising wool, and all the persons engaged in the industry, including owners and laborers, constitute less than 2 per cent of our population.

WILL IT INJURE THE WOOLGROWING STATES?

Mr. President, I now come to the last contention of those opposed to placing raw wool on the free list, viz, that it will injure the woolgrowing States.

It is contended by the woolgrowers that the bill will reduce the price of wool and thereby reduce the profits of the industry, even if it does not destroy such industry. I admit that the

price of wool will be reduced, but I believe that reasonable profits can be maintained in the manner I have hereinbefore discussed. But, for the sake of argument, suppose in the reduction of the price of wool the profits of the sheep industry are reduced, will the State thereby be benefited or injured? This naturally leads us to a consideration of the advantages and disadvantages of the industry to the State, and who are benefited and who are injured by a duty on raw wool.

ADVANTAGES OF THE INDUSTRY.

There were, according to the census of 1910, 1,154,795 sheep in the State of Nevada, valued at \$5,101,328, of which 329,920 were lambs, leaving \$24,875 sheep, exclusive of lambs. These sheep are owned, according to the report of the Nevada tax commission, by 314 individuals and corporations. The number of employees in the industry is not given in the census report nor in any other report on the industries of the State, and consequently must be estimated. The Tariff Board on page 593 says:

On one of the largest sheep ranches in Idaho, on the other hand, 2 men—1 herder and 1 camp tender—are employed per each 3,000 head of ewes and 1,500 ewes with their lambs, an average of 1 laborer to 1,500 head, and during lambing 3 men are employed to 1,000 ewes.

Taking a laborer to every 1,500 ewes with their lambs, we find that by dividing 824,875 sheep, being all of the sheep exclusive of the lambs, by 1,500 we get a result of 549 laborers necessary to the industry. During the lambing season and the shearing season extra labor must be employed. This is estimated to mean about 850 extra men for one month during the lambing season, or 70 extra men for the 12 months. About 200 extra men are required for 6 weeks during the shearing season, which would be an average of 22 extra men during the whole year for the purpose of shearing. Now, if we allow a foreman for each sheep owner in the State, there would be 314 foremen. This gives the total labor employed by the sheep industry of the State of Nevada at 955 men for the year around. This is undoubtedly greater than the actual number, because in many instances the owners of the sheep are Basque sheep herders, who act as their own herders, their own foremen, and their own shearers. In other words, the Basque sheep herder, with 1,500 sheep, performs all the labor with regard to such sheep without any assistance.

The advantages, therefore, of the industry to the State are that it brings into the State annually, according to the report of the Nevada Sheep and Woolgrowers' Association, \$568,800 and furnishes labor to 955 men.

DISADVANTAGES OF THE INDUSTRY.

To understand the disadvantages of the industry to the State a general consideration of the conditions existing in the State must be had.

In the first place, it is not one of the chief industries of the State and, in fact, is of small concern by comparison with the other great industries. The cattle industry of the State is engaged in by 2,548 farmers and is valued at \$19,071,809, while the sheep industry is engaged in by only 314 concerns and is only valued at \$5,101,328. The horse industry of the State is engaged in by 2,465 farmers and is valued at \$3,770,402. farmer in the State is engaged in raising agricultural crops, of a value of \$5,924,000 annually. The annual output of the manufacturing industries of the State is \$11,887,000, and em-The annual output of the ploys 2,527 men at an average wage of \$75 per month.

The mining industry of the State, as shown by the census report of 1910, shows a value of mining properties of \$156,-607,108, with an annual production of \$23,271,597. According to these statistics, there were employed in the mining industry 5,572 wage earners, who received \$8,535,539 for the year 1909.

In determining the relative importance of an industry, it is also necessary to determine the possibilities of the enlargement of such industry. The mining industry in the last 10 years has increased from an annual production in 1899 of \$3,209,457 to \$23,271,579 in 1909. The estimate of the Geological Survey for 1912 reaches the magnificent sum of \$38,358,732. there is no estimate as to labor, it must have increased proportionately. This industry is a growing industry, and gives every indication that it will increase in the next 10 years as much, if not more, than it has increased in the past 10 years.

The manufacturing industries of the State bave just commenced to attract the attention of our people and are increasing at a phenomenal rate. The condition is such that the continued growth of these industries can not be doubted. With all the metals used in the manufactures within its own borders, traversed by two great transportation companies with a local market of vast area, and water power equal to any in the world, the encouragement for the establishment of factories is unsurpassed.

Nevada is destined to be a great agricultural State. Within its borders are 70,285,440 acres of land, 20,000,000 acres of

which are of the most fertile soil, capable of raising anything that may be raised in a temperate or semitropical zone. State is divided into a system of valleys by chains of mountain ranges running north and south. These valleys in the northern part of the State have an average altitude of about 5,000 feet and gradually slope toward the south until in places they reach a point near sea level. The distance from the northern part of the State to the southern part is approximately 300 miles; and within this range we find a variation of agricultural products from wheat, grain, and hay in the northern and central portions of the State to fruits, melons, and vegetables in its southern portion. I realize that in the opinion of the great majority of people who have not visited our State it is largely a barren waste. I will admit that but a few years ago vast areas were considered by our own people to be practically worthless, by reason of the lack of water, that to-day are raising magnificent crops under the stimulus of irrigation. But a few years ago the water supply in the State was considered as limited to the few streams and springs within its borders, but to-day we have under way great governmental irrigation projects that will bring under cultivation 1,232,142 acres of that land which in the past has been referred to as a barren waste. It has been discovered that all our valleys are underlaid with running water, in many instances but a few feet from the surface; in fact, our great valleys are now known to be but river channels, filled with rich soil that has come down from the mountains through the ages. In addition to this water supply, available artesian water has been discovered in every portion of the State, and there is every reason to believe that land that is not subject to irrigation by means of irrigation projects and pumping wells will receive an ample supply of water from artesian sources.

For the purpose of encouraging the homesteading of this latter class of land I have had the honor to introduce in this body a bill amending the homestead laws of the United States allowing homesteaders on such land to be permitted to reside off of their homesteads until sufficient water can be developed for domestic uses. Another bill has just been introduced in the Senate by the senior Senator from Idaho which provides that domestic uses. the work of developing water on such lands and fencing the same shall be accepted in lieu of the requirements that so much of the land be cultivated each year. These acts will greatly stimulate the homesteading of these lands, and in our State we have between ten and fifteen millions of acres subject to homesteading under such provisions.

Farmers of our State, as is shown by the census report, nearly all raise cattle and horses, while very few of them raise any sheep except for their domestic use for mutton. The American farmer comes naturally to the raising of cattle and horses, and he has no superior on earth, while the sheep industry, with its cheap labor, seems to require the most ignorant, the most unprogressive, and the lowest type of foreign labor. It is the custom of the farmer in our valleys to range his cattle and horses on the adjacent mountain side while raising and harvesting his hay, and then to drive them within his inclosure, fatten them upon the grass and the hay, and drive them to market. Since the sheep industry has monopolized the range of the State of Nevada the farmer finds it difficult to pursue this sys-

tem of raising cattle and horses. Down each side of the val-leys, along the mountain ranges adjacent to these farms, come thousands upon thousands of sheep, driven by Basque sheep herders and collie dogs, uprooting the vegetation, breaking down fences, destroying roads, obliterating ranges, defiling the water-courses, and driving the cattle and horses of the farmer off of their natural ranges. Such are some of the disadvantages of the sheep industry to the State of Nevada.

There is no opportunity to further enlarge the sheep industry in the State of Nevada, because, as is stated by the Tariff Board, the ranges of the West are already overstocked. But there is ample room to increase the number of farms and to increase the number of the farmers' cattle and horses if the sheep are not permitted to longer monopolize the public domain, the springs, the wells, and the watercourses of the State. only believe in placing wool on the free list, but I believe in the establishment of such regulations over the public domain that every farmer will be insured in the use of a reasonable range adjacent to his farm.

WHO IS BENEFITED AND WHO IS INJURED?

Now let us see who is benefited by the sheep industry and who is injured.

Three hundred and fourteen sheep owners would be directly benefited by a duty on raw wool, by being able to sell to the American people their product by an increased price equal to the amount of the duty.

There would be injured by such duty over 80,000 people in my State, who would be compelled to pay the increased price for their woolen goods for the purpose of granting this benefit to the 314 sheep owners.

An examination of the assessors' returns from the various counties in the State will show that between 80 and 90 per cent of the sheep are owned by a very few men in the State and by institutions and individuals who do not reside in the State at all. For instance, the reports of Mr. A. A. Burke, the sheriff, and Mr. John Hayes, the assessor, of Washoe County, two of the most capable officers of the State, disclose that 26 per cent of the sheep in Washoe County are owned by residents of the State of California; that of the 41 owners of sheep in Washoe County 18 are residents of California; that of the 74 per cent of the sheep in Washoe County which are owned by residents of that county 4 institutions own over one-half, or, to be exact, these 4 sheep owners own 59 per cent of the sheep owned in Washoe County.

Mr. WARREN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Nevada

ield to the Senator from Wyoming?

Mr. PITTMAN. Certainly.
Mr. WARREN. Is it not also measurably true as to other industries that the ownership of a great many of them is largely in the hands of those who do not live in the State?

Mr. PITTMAN. It is not true with regard to any other stock or agricultural industry.

Mr. WARREN. Perhaps not in agriculture, strictly speaking; but what about cattle?

Mr. PITTMAN. The cattle are owned by two thousand five hundred and some-odd farmers, while the sheep are owned by 314 individuals.

Mr. WARREN. But there are quite a good many nonresident cattle owners, are there not?

Mr. PITTMAN. Very few, I am glad to say, in the State of

Mr. WARREN. Speaking of the farmers, I will ask the Senator whether it is not true in his State, as it is in other States, that they find a market for a great deal of their alfalfa, grain, and so forth, with the sheep men, who keep sheep, but do not engage in raising agricultural crops?

Mr. PITTMAN. I will state that that is correct; that at the present time they are compelled to sell some of their alfalfa to the sheep men; but I want also to say that a few years ago, before their cattle and horses were run off the range, they fed their own alfalfa to their own cattle and their own horses. That is the condition that has been brought about.

The letter from the sheriff says:

I have every reason to believe that in many instances, especially in cases of large flocks, the number returned is understated. For example, I have an instance in mind where the report of the scab inspector shows many more sheep dipped than were returned to me.

Were it not for this fraud by the owners of big bands of sheep, the fact that a still larger percentage of the sheep are owned by these four sheep raisers would be disclosed.

I will not impose upon the Senate by reading this statement. but will gladly submit it to any Senator who may care to check

up the computations.

It is hardly possible that even the sheep herder will receive any less by reason of the decreased profits of the sheep owners, as it is impossible to conceive that even a man of his type would work for less wages than he now receives. But admitting for the sake of argument that these five or six hundred Basque sheep herders would receive some indirect benefit from the increased profits of the sheep owners by reason of the duty, I still maintain there is neither reason nor excuse for granting a tonus to these laborers who are imported from the Pyrenees Mountains, between Spain and France, admitting allegiance to neither one nor the other of those great countries-men who do not know what a home is, and do not recognize the authority of government; men of the lowest type and the most inferior intelligence, who rarely seek to become citizens of the country to which they are imported—when such bonus must be taken from the hard earnings of the American farmers who are building homes and rearing their families and adding to the permanent strength of our Nation, and of the business men and professional men who are fighting the battle of life for the advancement of civilization without governmental aid, and of the highclass laboring men who are a part of our national life, who are the defenders of the flag of our country, and who are upbuilding the social and political standing of the masses.

Mr. WARREN. Mr. President, I have listened with a great deal of interest and a great deal of pleasure to the Senator from

Nevada, especially that part of his address referring to the prosperity and probable future development of that great State have known more or less of the State for a great many years, and I have been one of those who have always believed that much of the soil of Nevada was unsurpassed if submitted to a proper system of reclamation. I have been one of those who for many, many long years have struggled, officially and unofficially, to bring about that which is now being developed in the reclamation of the lands.

I agree with the Senator that intensive agriculture is preferable to sheep growing, or cattle growing, or horse growing, or anything of that kind, although I am a firm believer in diversified employments and diversified industries. I do not believe we should blot out any industry because it may have had a few years of drawbacks and may have decreased in importance.

I wish to say that, so far as the State of Nevada is concerned, while congratulating the Senator upon its great prosperity, I certainly am very sorry to hear that he considers all the sheep-men under indictment, and that the sheepmen of Nevada are the lowest of any workingmen on earth. That is not true, I may say, of other States. So far as the State of Wyoming is concerned, the men who work on the sheep ranches will compare in intelligence and education with other workers. In fact, we have a great many college graduates who have herded sheep. It is a healthful avocation, and a great many indulge in it. I must say also that I regret a little that all the Senator's figures, and largely his conclusions, are those of the Tariff Board, which he himself discredits.

I desire to give notice that on to-morrow, if agreeable to those in charge of the pending bill, I shall address the Senate on the subject of sheep and woolgrowing.

The PRESIDING OFFICER. The notice will be recorded. Mr. PITTMAN. Mr. President, in the first place I wish to state that I used the word "indictment" as meaning one with regard to whom something was being investigated. I did not mean to imply that the sheepmen were criminals. I simply used the word in the sense I have stated.

As to the character of the labor I must maintain what I have said before with regard to it.

Mr. WARREN. In the mining of coal in my State it is true that we have to depend very largely upon foreign labor. Quite a proportion of that is uneducated labor and that which we might consider of the lowest "lower" class. Is not that true of most of the industries of the Senator's State?

### TRIBUTE TO LABOR.

Mr. PITTMAN. Mr. President, as I was going on to say, I must contend, because I have proof of it, that in the State of Nevada practically all of our sheep herders and nearly all of the laborers engaged in the sheep industry are Basque herders, imported from the Pyrenees Mountains especially for that purpose, who speak very little of the English language and rarely ever declare their intention to become citizens of the United I do not say that for the purpose of attacking those people; I have nothing on earth against them. But it becomes necessary to refer to the fact in a comparison of those who are benefited and those who are injured by certain industries

As to the employment of foreigners in other branches of labor in my State, I wish to say that the other foreigners who are engaged in labor in the State are engaged principally in mining; not coal mining, for we have none, but hard-rock mining. There are no higher class laborers than miners. All of them are union miners. All of them stand for union wages. are all capable, intelligent workers, and every one of them declares his intention to become a citizen of the United States just the minute the opportunity is offered to him. There is no comparison whatever between the ordinary foreigner and the Basque sheep herder from the Pyrenees Mountains.

Mr. THOMAS. Mr. President, we have listened to a very important and a very illuminating discussion of the subject of free wool. I have noticed during the entire discussion the absence from the benches on the Republican side of nearly all of the Republican Senators. With the exception of the junior Senator from Idaho [Mr. Brady], the senior Senator from Utah [Mr. SMOOT], the senior Senator from Kansas Bristow], and the senior Senator from North Dakota [Mr. McCumber], who are practically always in their seats, and a few other notable exceptions, the speaker has addressed empty benches on that side. I wish to call attention particularly to the fact that the senior Senator from Michigan [Mr. SMITH], who the other day directed the attention of the country from this floor to a similar situation when the Senator from Kansas [Mr. Bristow] addressed the Senate upon an equally important subject, has not been present at all.

Mr. GALLINGER. Mr. President, perhaps the Senator from Colorado was not in the Chamber yesterday when I called attention to the fact that during an important debate there were just two Senators on that side of the Chamber present.

Mr. THOMAS. I was not. Mr. GALLINGER. For about one hour and a half we had the privilege of looking into the eyes of only two distinguished Senators on that side of the Chamber. It grieved me very much and I called attention to it.

Mr. THOMAS. Mr. President, I regret anything that occurred here that would in any manner grieve the genial and lovable Senator from the State of New Hampshire.

Mr. GALLINGER. I thank the Senator.

Mr. THOMAS. I said what I did just now, not in any com-

plaining mood but merely to call attention to the fact that a similar criticism uttered upon the floor of the Senate a few days ago, and I think a just one, was a criticism which, at times, is equally applicable to both sides of the Chamber.

Mr. GALLINGER. I think the Senator is right on that point. Mr. SMOOT. Mr. President, the Senator from Nevada [Mr. PITTMAN] has undertaken to prove by the Tariff Board report that it costs nothing, comparatively speaking, to produce wool in this country. He cites particularly the cost of wool in the State of Washington. I simply wish to call the Senator's attention to the report made by the Tariff Board as to what it does cost to produce wool in this country, and not in any one little particular spot that has a few sheep of one particular kind that are raised principally for mutton.

On page 11 of the Tariff Board report I find the following: On page 11 of the Tariff Board report I find the following:
That in the western part of the United States, where about twothirds of the sheep of the country are to be found, the "fine" and
"fine medium" wools carry an average charge of at least 11 cents
per pound, interest not included.

That if account is taken of the entire wool production of the country, including both fine and coarse wools, the average charge against
the clip is about 9½ cents per pound.

Mr. PITTMAN. Mr. President, while the Tariff Board raises

the average cost of producing wool in this country by including the cost of certain producers who are not pursuing a practical method, the Senator does not attack what I said with regard to the cost of producing wool in the State of Washing-

ton, and that is what he said he got up for.

Mr. SMOOT. I do not quite understand the Senator. I

did not say that I got up to attack anybody.

Mr. PITTMAN. I understood the Senator to state that he was getting up to attack my quotations in regard to the State of Washingon.

Mr. SMOOT. Oh, no, Mr. President; I did not say I was getting up to attack anybody. I simply said I desired to call attention to what the Tariff Board really did say as to what it costs to produce wool in this country, and cited the fact that the Senator from Nevada [Mr. PITTMAN] had been quoting from the same report and had taken one State to show that the cost of wool in that one particular State was little or nothing. That is all I said.

Mr. PITTMAN. Mr. President, I acknowledge that the average cost is greatly increased over the State of Washington or the State of Nevada by what I was trying to explain were unnecessary costs in some of these States. I was trying to explain to the Senator and to the Senate that in the State of Washington and in the State of Nevada, where the conditions are practically similar to those in Montana and Wyoming, they could raise wool at a very small cost, and that there was no reason why the other States should not be able to do the same thing. I can conceive that the average cost of raising fruit in this country might be made to appear so great in comparison with other countries that fruit could not be raised here, if we tried to raise pineapples and tropical fruits in hothouses in this country. If you should take that cost and throw it into the cost of raising apples, you would find the average cost of raising all agricultural products in this country so great that we could not compete with anybody in anything; and that is exactly the condition with regard to the wool industry to-day.

Mr. SMOOT. Mr. President, there is no part of this country that undertakes to grow wool where the conditions are not at least favorable for it. Wool can be grown in New Mexico or in Utah or in Wyoming or in Montana just as well as it can in Nevada. I believe the Tariff Board is right when it says:

That in the western part of the United States

That does not mean one State-

Mr. PITTMAN. It includes that State, though.

Mr. SMOOT. Yes; it includes that State-

where about two-thirds of the sheep of the country are to be found, the "fine" and "fine medium" wools carry an average charge of at least 11 cents per pound, interest not included.

If the Senator knows anything about the wool business, he knows that the fine and fine medium wools are the wools that are grown in the Western States and they are the wools that are called for by the manufacturers of this country.

Mr. WILLIAMS. Mr. President, they seem to be called for

with a very unprofitable demand, by the Senator's own state-

ment. If he is right, why do not the people out there raise the sort of sheep from which both the mutton and the wool can be sold at a profit, instead of trying to raise some for which there is an immense demand and yet no profitable demand?

Mr. SMOOT. So far as concerns the few sheep that are raised upon the farm, to which no expense whatever is charged—I mean none is charged against their keep, since they are fed by the help around the barn-the cost is not to be compared with a great herd of sheep that run upon the public domain, where so much a head is charged for the feeding of

the sheep during the season on forest reserves.

Mr. WILLIAMS. If there is one thing which has been clearly demonstrated by the members of the Republican Party in the last 20 years it is that the American white man can not compete with anybody in doing anything, and needs protection for everything. In view of the admission, for the sake of for everything. In view of the admission, for the sake of the argument, of this grand principle, I suggest that we go on with the matter of flax straw, which I believe is pending, and

Mr. WALSH. Before we go on to that, Mr. President, I desire to say that if, in my judgment, it were possible to attribute to any language used by the distinguished Senator from Nevada, in the address he has just delivered, the significance attached to it by the Senator from Wyoming in what he said was the characterization made by the Senator from Nevada of those engaged in the wool industry, I should feel it an imperative duty to join him in that protest. I stand here to attest, because I have been brought into intimate contact with them, the very high character of the men engaged in the wool business and the sheep industry in my State. But I can not conceive how anybody could so distort the language used by the Senator from Nevada or give to it any such significance as that attributed to it by the Senator from Wyoming.

We all understood perfectly well that the Senator from Nevada was characterizing, in the way he thought they deserved, the particular class of people who engage in the occupation of sheep herders in the State of Nevada. He said nothing whatever concerning the character of those who were engaged

in the sheep industry in that State.

Likewise, I should feel it my duty to make some protest if, indeed, the Senator from Nevada had said that the sheepmen were under indictment. It is perfectly obvious that he did not say anything of the sort. It seemed to me entirely proper for the Senator from Nevada to invite attention to the fact that the report of the Tariff Board and the statistics gathered by it are to be considered and weighed in connection with the obvious and indisputable fact that the information they got came from those who naturally are desirous of sustaining the duties.

Mr. SMOOT. Where else could they get it?
The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Utah?

Mr. WALSH. It is a matter of no consequence as to where

could get it or where they could not get it.
The PRESIDING OFFICER. Senators will suspend. Recognition must be obtained from the Chair before they proceed.

Mr. SMOOT. Mr. President

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Utah?

Mr. WALSH. I yield readily to the Senator from Utah, and

I will answer his question.

Mr. SMOOT. I asked the question, Where else could the information be obtained if not from the men who paid the bills and who knew exactly what the cost was?

Mr. WALSH. I am very glad to answer the Senator from Utah that it could not be obtained anywhere else, but that does not lessen to any degree whatever the fact that those things must be taken into consideration in arriving at the weight that is to be given to the information thus furnished.

Mr. PITTMAN. Mr. President, I take issue with the statement that the information could not be obtained anywhere else. I think the information could be obtained somewhere else. think it could be obtained from various sources besides the man who raises the sheep. I think you could obtain that information from the employee much better than you could from the employer. I think you could obtain it from the assessors of the various counties, who watch those things and investigate those matters. You could obtain that information from the bankers in the various communities. I think it is a mistake to say that the only way you can get evidence of facts is to ask the man against whom you are trying to get the evidence.

Mr. SMOOT. Mr. President, I wish to say to the Senator from Nevada that, of course, you can find out what a herder is paid by asking him, but a herder does not know anything about what it costs to board him; a herder does not know anything about what it costs to run a sheep wagon; a herder does not know anything about what the losses may be. The banker does not know anything about what the sheepmen may get for their wool. The banker does not know what expenses the sheepmen must pay. He knows what interest they pay.

I think the Senator from Montana was well within the truth in the statement he made. You can not know what the wool costs unless you get the information from the man who pays all the bills and knows exactly what he receives and what he pays

Mr. PITTMAN. The Republican Tariff Board seemed to go on that theory, because, apparently, they did not ask anyone except the man that was to be benefited by a duty on wool.

Mr. WILLIAMS. Mr. President, it having been clearly demonstrated not only that the American white man can not compete with anybody in doing anything, but that the most credible witness to be found is an interested witness, I hope we may

now go on with the flax, hemp, and jute schedule.

Mr. McCUMBER. Mr. President, before the Democratic Party succeeds in getting free hemp for its use some four years hence I should like in the meantime to protect the farmers of my State. I should like to keep the little tow mills running throughout the State. One farmer may make \$50, another may make \$100 or \$150 a year on the little amount of flax he may haul to the mills. Therefore if the mills are closed he will necessarily lose that little sum. It means considerable to him; and before it is voted away by the other side, I think at least we ought to have the entire vote of the Senate. I therefore suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. SHEPPARD in the chair).

The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gronna	Nelson	Smith, Ariz.
Bacon	Hollis	Norris	Smith, Ga.
Brady	Hughes	Overman	Smith, Md.
Brandegee	James	Owen	Smith, S. C.
Bristow	Jones	Page	Smoot
Bryan	Kenyon	Perkins	Sterling
Burton	Kern	Pittman	Stone
Catron	La Follette	Pomerene	Sutherland
Chamberlain	Lane	Ransdell	Swanson
Chilton	Lea	Robinson	Thomas
Clark, Wyo.	Lippitt	Saulsbury	Thompson
Clarke, Ark.	Lodge	Shafroth	Tillman
Colt	McCumber	Sheppard	Townsend
Fall	McLean	Sherman	Walsh
Fletcher	Martin, Va.	Shields	Warren
Gallinger	Martine, N. J.	Shively	Weeks
Gore	Myers	Simmons	Williams

Mr. JAMES. My colleague, the senior Senator from Kentucky [Mr. Bradley] is detained from attendance here by reason of illness. He has a general pair with the junior Senator from Indiana [Mr. KERN]. I will let this announcement

RANSDELL. I wish to announce that my colleague [Mr. THORNTON] is unavoidably absent. I ask that this an-

nouncement may stand for the day.

The PRESIDING OFFICER. Sixty-eight Senators have answered to the roll call. A quorum of the Senate is present. The pending question is on the amendment offered by the Senfrom North Dakota [Mr. McCumber], which will be ator stated.

The Secretary. In paragraph 272, page 83, line 12, after "dressed," strike out "one-half of," so as to read:

272. Flax, not hackled or dressed, 1 cent per pound.

Mr. McCUMBER. On this amendment I ask for the yeas and

The yeas and nays were ordered, and the Secretary proceeded

to call the roll.

Mr. CHILTON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. Jackson], which I transfer to the senior Senator from Maine [Mr. Johnson] son], and I vote "nay."

Mr. GALLINGER (when his name was called). I have a standing pair with the junior Senator from New York [Mr. O'GORMAN]. I transfer that pair to the junior Senator from Maine [Mr. BURLEIGH], and vote "yea."

Mr. McCUMBER (when his name was called). I have a general pair with the senior Senator from Nevada [Mr. NEWLANDS]. I transfer that pair to the junior Senator from California [Mr. WORKS], and vote "yea."

Mr. SMITH of Maryland (when his name was called). I have a general pair with the senior Senator from Vermont [Mr. Dillingham], and I withhold my vote.

Mr. TOWNSEND (when the name of Mr. Smith of Michigan was called). The senior Senator from Michigan [Mr. Smith] is absent on important bygings. He has a congral pair with is absent on important business. He has a general pair with

the junior Senator from Missouri [Mr. REED]. I desire to have

the junior senator from Missouri [Mr. Reed]. I desire to have this announcement stand for all votes to-day.

Mr. RANSDELL (when Mr. Thornton's name was called). My colleague [Mr. Thornton'] is unavoidably absent. If present, he would vote "nay."

Mr. TILLMAN (when his name was called). I have a pair with the Senator from Wisconsin [Mr. Stephenson], and there-

fore I withhold my vote.

The roll call was concluded.

Mr. JONES. I desire to announce that my colleague [Mr. POINDEXTER] is necessarily absent, and that he is paired with the Senator from Oklahoma [Mr. Owen].

Mr. THOMAS. I have a general pair with the senior Senator from New York [Mr. Root], which I transfer to the Senator from Louisiana [Mr. THOENTON], and vote "nay."

Mr. CHAMBERLAIN. I have a general pair with the Senator from Pennsylvania [Mr. Oliver], which I transfer to the junior Senator from Mississippi [Mr. Vardaman], and vote "nay."

Mr. REED (after having voted in the negative). voted a moment ago it escaped my recollection that I have a pair with the Senator from Michigan [Mr. SMITH] during his enforced absence from the city. I therefore withdraw my vote.

If I were permitted to vote, I would vote "nay."

Mr. MARTIN of Virginia. I desire to announce that the Senator from Alabama [Mr. BANKHEAD] is paired with the

junior Senator from West Virginia [Mr. Goff].

Mr. SHEPPARD. The Senator from Alabama [Mr. Bank-Head] requested me to announce that he is unavoidably absent and that he is paired, as just stated by the Senator from Virginia.

Mr. BRISTOW. I was requested to announce that the senior Senator from Iowa [Mr. Cummins] is necessarily absent and that he is paired on this vote with the senior Senator from Nebraska [Mr. HITCHCOCK].

The result was announced-year 30, nays 38, as follows:

	YE	AS-30.	
Brady Brandegee Bristow Burton Catron Clark, Wyo. Colt Crawford	Fall Gallinger Gronna Jones Kenyon La Follette Lippitt Lodge	McCumber McLean Nelson Norris Page Penrose Perkins Sherman YS—38.	Smoot Sterling Sutherland Townsend Warren Weeks
V-5	James	Pomerene	Smith, Ga.
Ashurst Bacon Bryan Chamberlain Chilton Clarke, Ark. Fletcher Gore Hollis Hughes	Kern Lane Leas Lewis Martin, Va. Martine, N. J. Myers Overman Pittman	Ransdell Robinson Saulsbury Shafroth Sheppard Shields Shively Simmons Smith, Ariz.	Smith, S. C. Stone Swanson Thomas Thompson Walsh Williams
	NOT V	OTING-27.	
Bankhead Borah Bradley Burleigh Clapp Culberson Cummins	Dillingham du Pont Goff Hitchcock Jackson Johnson Newlands	O'Gorman Oliver Owen Poindexter Reed Root Smith, Md.	Smith, Mich. Stephenson Thornton Tillman Vardaman Works

So Mr. McCumber's amendment was rejected.

The VICE PRESIDENT. The question recurs on agreeing to the amendment proposed by the committee to strike out para-

graph 272.

Mr. McCUMBER. The effect of this amendment being to place that item upon the free list, I think there should be a yea-and-nay vote. I ask for a yea-and-nay vote upon that one proposition.

The yeas and nays were ordered, and the Secretary proceeded

to call the roll.

Mr. CHILTON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. Jackson], which I transfer to the senior Senator from Maine

[Mr. Johnson] and vote. I vote "yea."

Mr. GALLINGER (when his name was called). Announcing the same transfer of my pair, I vote "nay."

Mr. KERN (when his name was called). I am paired with the Senator from Kentucky [Mr. BRADLEY] and withhold my

Mr. McCUMBER (when his name was called). Transferring

my pair as on the last vote, I vote "nay."

Mr. JONES (when Mr. Poindexter's name was called). I again announce the necessary absence of my colleague [Mr. POINDEXTER] and his pair with the Senator from Oklahoma [Mr. OWEN].

Mr. REED (when his name was called). I am paired with the Senator from Michigan [Mr. SMITH] during his absence from the city, and therefore I withhold my vote. I make this announcement for the day.

Mr. SMITH of Maryland (when his name was called). I have a pair with the senior Senator from Vermont [Mr. Du-

LINGHAM] and withhold my vote.

Mr. THOMAS (when his name was called). fer my pair with the senior Senator from New York [Mr. Root] to the Senator from Louisiana [Mr. THORNTON] and vote "yea."

Mr. RANSDELL (when Mr. THORNTON's name was called). My colleague [Mr. Thornton] is unavoidably absent. He is paired on this vote with the Senator from New York [Mr. Roor]. If my colleague were present and permitted to vote, he would vote "yea."

The roll call was concluded.

Mr. CHAMBERLAIN. I again transfer my pair with the junior Senator from Pennsylvania [Mr. OLIVER] to the junior Senator from Mississippi [Mr. VARDAMAN]. I vote "yea."

Mr. BRISTOW. I again make the announcement as to the absence of the senior Senator from Iowa [Mr. CUMMINS] and that he is paired with the senior Senator from Nebraska [Mr. HITCHCOCK]. I wish this announcement to stand for other roll calls to-day.

The result was announced—yeas 37, nays 30, as follows:

	YE	AS-37.	
Ashurst Bacon Bryan Chamberlain Chilton Clarke, Ark. Fletcher Gore Hollis Hughes	James Lane Lewis Martin, Va. Martine, N. J. Myers Overman Pittman Pomerene	Ransdell Rebinson Saulsbury Shafroth Sheppard Shields Shively Simmons Smith, Ariz. Emith, Ga.	Smith, S. C. Stone Swanson Thomas Thompson Walsh Williams
	NA NA	YS-30.	
Brady Brandegee Bristow Burton Catron Clark, Wyo. Colt Crawford	Fall Gallinger Gronna Jones Kenyon La Follette Lippitt Lodge	McCumber McLean Nelson Norris Page Penrose Perkins Sherman OTING—28.	Smoot Sterling Sutherland Townsend Warren Weeks
Bankhead Borah Bradley Burleigh Clapp Cufberson Cummins	Dillingham du Pont Goff Hitchcock Jackson Johnson Kern	Newlands O'Gorman Oliver Owen Poindexter Reed Root	Smith, Md. Smith, Mich. Stephenson Thornton Tillman Vardaman Works

So the amendment of the committee was agreed to.

The next amendment of the committee was to strike out paragraph 273, in the followings words:

273. Flax, hackled, known as "dressed line," 11 cents per pound.

Mr. McCUMBER. I propose to amend the paragraph so that it will read as follows:

273. Flax, backled, known as "dressed line," 3 cents per pound.

I only desire to say, not asking for a roll call on this amendment, that it is the old rate.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from North Dakota.

The amendment was rejected.

The VICE PRESIDENT. The question recurs on agreeing to the amendment proposed by the committee.

The amendment was agreed to.

The next amendment of the committee was to strike out paragraph 274, in the following words:

274. Tow of flax, \$10 per ton.

Mr. McCUMBER. On this amendment I should like to have some information from the chairman of the committee or the Senator in charge. I have prepared an amendment which I will read, and I ask the Senator's attention to it. It is to make the paragraph read as follows:

274. Tow of flax, used generally for upholstering and insulating, for refrigerators and refrigerator cars, paper and twine, and not used generally for weaving, \$20 per ton.

Mr. President, this is the particular paragraph that interests us more especially in my State, and the three Northwestern States producing flax and flax straw, than any other paragraph in this particular schedule. We are not attempting in any way by offering this amendment to interfere with a reduction of tariffs according to your program on any character of fabric, but where the fiber is so short that it can not be used for weaving purposes to advantage, and is used generally for the purpose of packing or insulating, for refrigerator cars, for making paper and some character of twine-it is not used for binding twine-where no one of the general public would be benefited by it, where it cheapens nothing to the ultimate consumer, where it destroys an industry without any general benefit, we feel that the industry of agriculture in general, which has been attacked all along the line by this bill, might be spared this final blow.

I should like to ask the Senator, if he will be kind enough to give me the information, what is to be gained by putting flax fiber on the free list, so far as it relates to this short-fibered tow, which can only be used for the purposes which I have mentioned?

It may be that in the draft of the amendment which I have made it will not exactly fit what I expect to accomplish, but if it does not it can be easily corrected either on the floor or in conference. I am seeking by this amendment to keep open the little tow mills in my State, and I am seeking it with the belief that no one will be injured by keeping them open and that the farmers of my State will be benefited thereby.

I will be glad to have the Senator in charge of the schedule give any reason why we should not be protected on this particular character of flax fiber.

Mr. WILLIAMS. Mr. President, unless my memory fails me, and it is becoming somewhat confused, the Senator from North Dakota asked this question yesterday and made exactly these remarks, and I made a stagger at a reply to the best of my ability, and I thought we might have left it there.

But tow of flax is a by-product of hackling, and it is used in the manufacture of the cheaper grades of yarn known as tow yarn. What sort of cloth tow yarns enter into I do not know, but they enter into something.

Mr. McCUMBER. No, Mr. President; if the Senator will

Mr. WILLIAMS. Very well. Mr. McCUMBER. I am excluding all kind of yarns and including only that tow which can not be used for spinning or weaving and will not be so used.

Mr. WILLIAMS. But I want to say to the Senator he is not doing anything he thinks he is doing.

Mr. McCUMBER. Very well, if I have not in the language used reached my desires, I hope the Senator will assist me in correcting it so that it will accomplish what I wish to accom-

Mr. WILLIAMS. I really confess that I decline the offer to assist because I do not know precisely what the Senator wants. But tow of flax, as I said, is a by-product of hackling, and it is used in the manufacture of the cheaper grades of yarn known as tow yarns in the trade.

I want to call the Senator's attention to the fact that once before this stuff was put upon the free list, and that was in the Wilson law. Under the Wilson law, with it on the free list, only 1,7111 tons were imported into the entire United States.

Now, I want to call the Senator's attention to the price per ton of the sort of tow that was imported. My object in doing that is to let him know that the sort of tow he is trying to protect is not the sort of tow that is imported at all. The sort of short-fibered tow to which the Senator is referring, which enters, as the Senator says, only into cushions and upholstery and refrigerating cars and all that sort of thing, was not imported into the United States at all, even when tow of flax was upon the free list; but the tow of flax which was imported into the United States was a tow of flax out of which these yarns are made, the unit value of which, if I can get the attention of the Senator from North Dakota, because it is useless to attempt to answer his question unless he listens to the reply-

Mr. McCUMBER. I want to assure the Senator that I am listening intensely, and I am gathering every word that he says.

Mr. WILLIAMS. On the contrary, I saw you gathering a great deal of some other sort of misinformation from the junior

Senator from Utah [Mr. SUTHERLAND].

Mr. McCUMBER. My ear was turned toward the Senator

from Mississippi.

Mr. WILLIAMS. Now, the average unit of that sort of tow that was imported when it was upon the free list was \$152.50 per ton, and the sort of tow that you are talking about is worth \$18 to 20 per ton, by your own statement, showing that it was a different thing. In 1905 the average price of it was \$183 per ton, and under the Payne tariff law, in 1911, the average price per ton of this stuff that was imported, tow of flax, was \$157 per ton, and in 1912 it had risen to \$188 per ton.

This stuff that the Senator is talking about, that is not fit to make yarn out of at all, is not going to be imported if you put it on the free list, and if you put a bounty on it you would have difficulty in getting it imported, unless you paid a pretty

the free list is tow that does enter into certain yarns for weaving a certain product, and the sort of tow the Senator is talking about they do not make yarn out of at all.

I do not know anything about your peculiar product except what you have told me, but from what you have told me all you can do with it is to make cushions, for upholstering, and I believe for refrigerator cars, and things of that sort.

I have tried to answer this question once before to the best of my poor ability. I do not know what sort of tow yours is, except that it is worth \$18 to \$20 a ton, and this tow that we are talking about was imported last year at \$180 a ton, and the duty was paid into the Treasury at the rate fixed at that time. There were 1,325 tons of it imported, and the duties collected were \$26,516. The sort of tow which was imported and the sort of tow we are trying to get imported in still larger quantities is the sort of tow out of which certain yarns are made for use in the textile industries of the country, and by the admission of the Senator from North Dakota his tow is not that sort of tow.

Mr. McCUMBER. The great trouble with the answer of the Senator from Mississippi is that he insists on answering a question that I do not ask and he does not answer the question that I do ask. I have not asked him anything about why he should not exclude the fiber that is used for spinning purpose

Mr. WILLIAMS. Nor have I said a word about the fiber. I was giving the Senator the figures upon the tow, and I was telling him what the tow was used for, to wit, to make certain yarns. He said his sort of tow is not used to make yarns at all. Therefore I was telling him that the sort of tow that would come in would not be any kind of tow that would compete with his kind of tow.

Mr. McCUMBER. On that the Senator is mistaken. Read the paragraph. It says:

Tow of flax, \$10 per ton.

Now, that includes all kinds of tow of flax. It is not limited at all to the particular kind that is used for weaving, and so forth. It now includes the short-fibered flax that is used for other purposes. It is nevertheless toy of flax.

Mr. WILLIAMS. Of course.

Mr. McCUMBER. It is put upon the free list by this para-

graph.

Mr. WILLIAMS. I will try once more, and if I fail this time want to confess my inability to use English. What I attempted to say was that when we put tow of flax-

Mr. McCUMBER. I will reach that part of it-

Mr. WILLIAMS. Which, of course, includes all this tow upon the free list, when we come to the actuality of the importation the sort of tow of flax that has been imported and will be imported is not the sort of tow of flax the Senator means.

Mr. McCUMBER. The great trouble with the Senator is

that he does not wait until he gets the full answer.

Mr. WILLIAMS. Therefore your question as to why we want to admit the importation of tow which does not enter into yarns and does not enter into textile fabrics falls to the ground, because our object is to permit the importation of the sort of tow that does make yarn and does enter into textile fabrics

Mr. McCUMBER. If the Senator will be a little patient and allow me to finish my reply he will ascertain that there has been an answer to his suggestion; but I can only reach one part of it at a time.

Mr. WILLIAMS. I made no suggestion. I was trying to

answer the question of the Senator.

Mr. McCUMBER. The first proposition is that there are now—I do not care what there was 20 years ago—there are to-day two kinds of flax tow that are being used in the United States. One is used for a certain purpose, that of packing or insulating refrigerator cars, for upholstering, to a small extent in making paper, and probably to a less extent in making wrapping twine. That is one of the kinds of tow that is being used in the United States to-day. The other kind of tow

Mr. WILLIAMS rose.

Mr. McCUMBER. I will yield to the Senator as soon as I have finished.

Mr. WILLIAMS. Very well.
Mr. McCUMBER. The other kind of tow that is being used in the United States is a long-fibered tow, which can be used for spinning into yarn and for weaving into different characters of fabrics. The paragraph of the bill which puts flax tow upon the free list covers both.

The Senator says that when we had the articles named in the same paragraph practically on the free list, we still did not import any of the kind of tow that is used for insulating, and so forth. Will the Senator tell me when we first began to use that kind of tow in the United States? Will the Senator tell me when the first tow mills that began to use, and were put in heavy bounty. The sort of tow that we are trying to get on operation to use, this particular kind of tow were established

in the United States? My conviction is, although I will not speak definitely, that there was not a tow mill of this kind in the United States or in Canada at that time. We used for insulating our refrigerator cars at that time charcoal, sawdust,

and other similar substances.

It has been found that we can make the short-fibered flax tow, and we thereby make a better insulator, and it can also be used for other purposes. Therefore, within the last 20 years, I would say within the last 15 years, this kind of a product has come into general use for the purposes which I have mentioned. It was not in general use during the operation of the tariff law of which the Senator from Mississippi has spoken. While it was not imported at that time, because there was no use for it in the United States, to my knowledge, and while it has not since been imported, we are using it; and because we have had a tariff that was practically prohibitory of importations is no reason why it will not be imported when we place it upon the free list.

As a matter of fact, however, it has been imported, and there has been a case before the Treasury Department for some time in regard to the importation. I do not know whether or not it has been settled, but I know a number of shipments came in from Canada under the name of broken flax straw. gave it that name to differentiate it from the hackled straw, so that it might come in under a \$5-per-ton duty, rather than the \$20-per-ton duty provided for on hackled straw. The appraisers allowed it to come in at the \$5-per-ton duty. A case was made before the Treasury Department and an appeal taken from the decision. That appeal, I believe, is now pending. So it has been and it can be brought in, and if it has been brought in under a \$5-per-ton duty, certainly it will be brought in in very much larger quantities upon a free-trade basis. That is the reason why I am seeking to protect this new article of use,

the reason why I am seeking to protect this new article of use, and by its protection keep open the little mills in the three northwestern States I have mentioned.

Mr. WILLIAMS. Mr. President, the Senator from North Dakota says that this article will be imported. I do not know whether it will be or not. That fact is in the womb of the future; I will try to put the matter in a different shape. It either will be imported or it will not be imported; that is a certainty. If it will not be imported, the Senator has been talking about an anticipated injury which will not exist, an injury to a special interest engaged in this particular business, and constituting perhaps not one-tenth of 1 per cent of the people of the United States. If it will be imported, then it will cheapen insulating and refrigerating, and that will be a great benefit to everybody, and also to modern science and modern industry. At any rate, that is our view of it in the alternative, and we are willing to vote upon it and to stand by what we do, rather

than merely by what we say.

Mr. McCUMBER. Mr. President, if it is to be sustained upon the ground that closing up the mill to the farmer will be a benefit to science by reason of its being a benefit to the manufacturer of refrigerating cars and refrigerators, I am willing to

go to a vote upon that proposition.

WILLIAMS. Mr. President, everything that cheapens insulating, everything that cheapens refrigeration, helps not only science and transportation, but it helps the entire people, all of whom have interest in insulating and in transportation. Of course the Senator from North Dakota knows as well as I do that the railroads do not pay for the tracks, that they do not pay for the coaches, that they do not pay for the steam engines, that they do not pay for anything except in the first instance, but that in the long run the people pay for them. The Senator understands that the companies that are refrigerating and insulating do not pay for refrigerating and insulation except in the first instance, and that in the long run the people pay for it. The cheaper it is the better for the people. So I shall rest satisfied.

Mr. McCUMBER. Mr. President, I have expressed my serious doubt that the manufacturers of those refrigerator cars will sell them cheaper because of the little benefit that they have gained and the little benefit that the farmers now have from The Senator thinks they will, but I do not think so. their flax.

Mr. WILLIAMS. Why does the Senator say "the farmers"?
When the Senator says that, he would have somebody believe that he means the farmers of the United States. I dare say that not one-tenth of 1 per cent of the farmers of the United States, even as farmers, are interested in this.

Mr. McCUMBER. I could probably, Mr. President, pick out four-fifths of the several items that are taxed, which it is considered ought to be taxed even by this bill, and find that not one-tenth of 1 per cent of the population is engaged in their production, but a great many of these one-tenths of 1 per cent make the whole, and we have got to consider all of the industries together.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from North Dakota to the amendment of the committee

Mr. McCUMBER. Upon that amendment I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. WILLIAMS. Did the Senator from North Dakota offer an amendment?

Mr. McCUMBER. I offered an amendment.

Mr. WILLIAMS. I did not know whether the vote was to be taken on the amendment proposed by the Senator from North Dakota or on the committee amendment.

Mr. McCUMBER. I would suggest that the amendment be again read, as some Senators did not hear it.

The VICE PRESIDENT. The Secretary will again state the

amendment.

The Secretary. In lieu of the words proposed to be stricken out in paragraph 274 by the Committee on Finance it is proposed to insert:

274. Tow of flax used generally for upholstering and insulating, for refrigerators and refrigerator cars, paper and twine, and not used generally for weaving, \$20 per ton.

The Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when his name was called). announcing my pair with the junior Senator from Pennsylvania [Mr. OLIVER] I transfer that pair to the junior Senator from Mississippi [Mr. Vardaman] and vote. I vote "nay."
Mr. CHILTON (when his name was called). With the same

announcement as that I made on the previous ballot I will vote. I vote "nay."

Mr. GALLINGER (when his name was called). I again announce the transfer of my pair with the junior Senator from New York [Mr. O'GORMAN] to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "yea."

Mr. KERN (when his name was called). I transfer my pair with the Senator from Kentucky [Mr. BRADLEY] to the Senator from Louisiana [Mr. Thornton] and vote. I vote "nay."
Mr. LODGE (when his name was called). I have a general

pair with the junior Senator from Georgia [Mr. SMITH]. I do not see him in the Chamber, and so I will withhold my vote.

Mr. McCUMBER (when his name was called). I transfer my pair with the senior Senator from Nevada [Mr. Newlands] I transfer to the junior Senator from California [Mr. WORKS] and will vote. I vote "yea." I will let the announcement of the change

of pairs stand for the day.

Mr. JONES (when Mr. Poindexter's name was called). I desire again to announce the necessary absence of my colleague [Mr. Poindexter]. He is paired with the Senator from Oklabers [Mr. Owner]. I make this appropriate and will let it. homa [Mr. Owen]. I make this announcement and will let it stand for the remainder of the day.

Mr. REED (when his name was called). I again announce my pair with the Senator from Michigan [Mr. SMITH] and

withhold my vote. If at liberty to vote, I should vote "nay."

Mr. SMITH of Maryland (when his name was called). I
again announce my pair with the senior Senator from Vermont
[Mr. Dillingham] and withhold my vote. If I had the privilege of voting, I should vote "nay."

Mr. THOMAS (when his name was called).

nounce my pair with the senior Senator from New York [Mr. Roor] and withhold my vote. If I had the privilege of voting,

should vote "nay."
Mr. RANSDELL (when Mr. Thornton's name was called). I again announce the unavoidable absence of my colleague [Mr. He is paired on this vote with the Senator from THORNTON 1. Kentucky [Mr. Bradley]. If present, my colleague would vote "nay."

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Wisconsin [Mr. Stephenson], and desire that this announcement shall stand for the day.

The roll call was concluded.

Mr. SUTHERLAND (after having voted in the affirmative). I understand the Senator from Arkansas [Mr. Clarke] has not voted.

The VICE PRESIDENT. The Chair is informed that the Senator from Arkansas is not recorded.

Mr. SUTHERLAND. I have a general pair with that Senator,

and therefore withdraw my vote.

The result was announced—yeas 26, nays 37, as follows:

YEAS-26.

Brady Brandegce Bristow Burton Catron Clark, Wyo. Colt Crawford Gallinger Gronna Jones Kenyon La Follette Lippitt Lodge McCumber McLean Nelson Page Penrose

So Mr. McCumber's amendment to the amendment of the committee was rejected.

The VICE PRESIDENT. The question recurs on the amendment proposed by the committee.

Mr. McCUMBER. Mr. President, the Democratic Ways and Means Committee and the Democratic majority of the House of Representatives, who are supposed to be close to nature and to have caught something of the aroma of flax and flax straw, saw fit to put a duty of \$10 per ton on tow. The Democratic majority of the Senate in caucus have placed flax tow upon the free list. I am about to attempt, by means of another amendment, to bridge the chasm between the Democracy of the House and the Democracy of the Senate by providing for a duty of \$10 per ton on tow of flax, applying only to that character of flax which can not be used for weaving. I therefore

offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated. The SECRETARY. In lieu of the amendment proposed by the committee striking out paragraph 274, page 83, line 15, it is

proposed to insert: 274. Tow of flax used generally for upholstering and insulating for refrigerators and refrigerator cars, paper, and twine, and not used generally for weaving, \$10 per ton.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from North Dakota to the amendment of the committee.

Mr. McCUMBER. On that amendment I ask for the yeas

and nays.

The VICE PRESIDENT. Senators seconding the demand will indicate it by raising their hands. [After counting.] In the opinion of the Chair, the demand is not seconded.

Mr. McCUMBER. I ask the Chair to put the request again, so that the Senate will understand the question, for I do not

think Senators are paying careful attention at all times.

The VICE PRESIDENT. The Senator from North Dakota demands the yeas and nays on his amendment. Is the demand seconded?

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when his name was called). announcing my pair with the junior Senator from Pennsylvania [Mr. OLIVER], I transfer that pair to the junior Senator from Mississippi [Mr. VARDAMAN] and vote "nay."

Mr. GALLINGER (when his name was called). ferring my pair with the junior Senator from New York [Mr. O'GORMAN] to the junior Senator from Maine [Mr. BURLEIGH], I vote "yea."

Mr. KERN (when his name was called). my general pair with the Senator from Kentucky [Mr. Brad-LEY] I withhold my vote.

Mr. REED (when his name was called). I again announce my pair with the Senator from Michigan [Mr. SMITH].

Mr. SMITH of Maryland (when his name was called). am paired with the senior Senator from Vermont [Mr. DILLING-HAM], and for that reason withhold my vote.

Mr. THOMAS (when his name was called). I transfer my pair with the Senator from New York [Mr. Root] to the Senator from Louisiana [Mr. THORNTON] and vote "nay."

Mr. RANSDELL (when Mr. THORNTON'S name was called). I again announce the unavoidable absence of my colleague [Mr. THORNTON] and ask that this announcement stand for the day.

The roll call was concluded. Mr. CHILTON. Repeating my announcement on the last ballot as to the transfer of my pair, I vote "nay."

Mr. SUTHERLAND. I inquire Arkansas [Mr. CLAEKE] has voted. I inquire whether the Senator from

The VICE PRESIDENT. The Chair is informed that he has not

Mr. SUTHERLAND. I withhold my vote on account of my pair with that Senator.

Mr. REED. I transfer my pair with the Senator from Michigan [Mr. Smith] to the Senator from Oklahoma [Mr. Gore] and vote "nay."

The result was announced—yeas 27, nays 36, as follows:

gard a negle of	YE	AS-27.	
Brady Brandegee Bristow Burton Catron Clark, Wyo, Colt	Crawford Gallinger Gronna Jones Kenyon La Follette Lippitt	Lodge McCumber McLean Nelson Norris Penrose Perkins	Sherman Smoot Sterling Townsend Warren Weeks

Bankhead Borah Bradley Burleigh Clapp Clarke, Ark. Culberson Cummins	Dillingham du Pont Fall Goff Gore Hitchcock Jackson Johnson	Kern Newlands O'Gorman Oliver Owen Page Poindexter Root	Smith, Md. Smith, Mich. Stephenson Sutherland Thornton Tillman Vardaman Works

So Mr. McCumber's amendment to the amendment of the committee was rejected.

Mr. McCUMBER. The next vote will be on the adoption of the amendment proposed by the committee. The amendment would place this product upon the free list. It is very important to my State, and I will ask the indulgence of the Senate to have a record vote, assuring the Senate that I will not ask for the yeas and nays on any remaining items of this schedule. I ask for the yeas and nays on the adoption of the committee amendment.

The VICE PRESIDENT. The question is on the amendment reported by the committee, on which the Senator from North Dakota demands the yeas and nays.

The yeas and nays were ordered.

Mr. SIMMONS. Mr. President, I simply want to say a word before the vote is taken. I find on inquiry that the product about which the Senator from North Dakota has been speaking has been construed by the board of appraisers, and they have held that it is not backled flax, but that it is flax straw.

Mr. McCUMBER. I want to correct the statement—Mr. SIMMONS. I mean the character of the material which the Senator has been discussing as used in refrigerator cars and for stuffing furniture, horse collars, and the like. It has been decided by the board of appraisers that that material is simply run through a machine containing corrugated rolls which have the effect of breaking up the straw and rendering it pliable, so as to fit it for use in stuffing furniture, and so on. They have held that that is not hackled flax or tow of flax, but that it is flax straw, and dutiable under the present law at \$5 per ton.

Mr. McCUMBER. Mr. President, I feel it incumbent upon me to correct the error of the Senator in two respects.

The material I have been discussing heretofore that came under paragraph 273 as hackled flax is that which comes from the mills in my State and in Minnesota. The Senator has referred to the decision in a case that I referred to a short time ago. where some broken straw was brought over from Canada. In other words, it involved a sort of halfway process between the breaking with the separator and the breaking and the separation in the tow mill, because the tow mill does more than the mere breaking. It simply severs to a considerable extent a portion of the pulp, and that is finished by knives on the machines in the East that take it up. So what the Senator refers to is not that which is covered by the preceding paragraph, and this vote is not upon that at all, but it is upon the tow itself.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when his name was called). I again announce my pair with the junior Senator from Pennsylvania In his absence I withhold my vote.

Mr. CHILTON (when his name was called). I make the same announcement as on previous ballots and will vote. I

Mr. GALLINGER (when his name was called). the same transfer of pairs as on the last vote, I vote "nay."

Mr. KERN (when his name was called). Because of my pair with the senior Senator from Kentucky [Mr. Bradley], I withhold my vote. If at liberty to vote, I should vote "yea."

Mr. REED (when his name was called). I again announce my pair with the senior Senator from Michigan [Mr. SMITH]

and withhold my vote.

Mr. SMITH of Maryland (when his name was called). I withhold my vote, being paired with the senior Senator from Vermont [Mr. Dillingham]. If at liberty to vote, I should vote "yea.

Mr. THOMAS (when his name was called). I repeat the announcement made on the last vote, make the same transfer,

and vote "yea.

The roll call was concluded.

Mr. JAMES. I have a general pair with the junior Senator from Massachusetts [Mr. Weeks]. I transfer that pair to the junior Senator from Oklahoma [Mr. Gore] and will vote. I vote "vea.

Mr. WILLIAMS (after having voted in the affirmative). am informed that the senior Senator from Pennsylvania [Mr.

Penrose] has not voted. Is that correct?

The VICE PRESIDENT. It is.

Mr. WILLIAMS. Then I wish to withdraw my vote. The result was announced—yeas 35, nays 27, as follows:

YEAS-35. Smith, Ga. Smith, S. C. Stone Swanson Thomas Ransdell Robinson Saulsbury Shafroth Ashurst Bacon Lane Lane
Lea
Lewis
Martin, Va.
Martine, N. J.
Myers
Overman
Pittman
Pomerene Bryan Chilton Clarke, Ark. Fletcher Hollis Hughes James Sharroth Sheppard Shields Shively Simmons Smith, Ariz. Thompson Vardaman Walsh Pomerene

NAYS-27. Lodge McCumber McLean Nelson Norris Page Perkins Crawford Gallinger Gronna Brady Brandegee Sherman Smoot Bristow Burton Catron Clark, Wyo. Colt Sterling Sutherland Townsend Warren Jones Kenyon La Follette Lippitt

du Pont Fall Goff Gore Hitchcock Jackson Johnson Kern Newlands O'Gorman Oliver Bankhead Borah Bradley Owen Penrose Poindexter Reed Root Burleigh Chamberlain Clapp Culberson Cummins Dillingham Smith, Md. Smith, Mich.

So the amendment of the committee was agreed to. The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 83, to strike out all of paragraph 275, in the following words:

NOT VOTING-33.

Stephenson

Thornton Tillman

Weeks Williams Works

275. Hemp, and tow of hemp, one-half cent per pound; hemp, hackled, known as "line of hemp," 1 cent per pound.

The amendment was agreed to.

The next amendment was, in paragraph 276, page 83, lines 18, 19, and 20, to strike out "not finer than 5 lea or number, 15 per cent ad valorem; if finer than 5 lea or number and yarns made of jute."

Mr. GRONNA. Mr. President, I should like to get some information from the Senator from Mississippi [Mr. Williams] on this paragraph. Is there not a considerable quantity of jute used in the manufacture of binding twine?

Mr. WILLIAMS. I really do not know. Mr. GRONNA. I thought perhaps the Senator had that information.

Mr. WILLIAMS. No; I have not.

Mr. GRONNA. I see from the handbook that during the year 1912 there were imported 1,256,000 pounds of single yarns made of jute not finer than No. 5 lea or number, and that 114,000 pounds of finer quality were imported. I take it that the Committee on Finance does not intend to tax the binding twine that the farmer uses to bind his grain and place all the articles which he produces on the free list. I know full well that paragraph 423-

Mr. WILLIAMS. Binding twine is on the free list. Mr. GRONNA. Yes; paragraph 423 provides as follows: 423. All binding twine manufactured from New Zealand hempila, istle or Tampico fiber, sisal grass, or sunn, or a mixture of any two or more of them, of single ply and measuring not exceeding 600 feet to the pound.

I will say to the Senators on the other side that that does not

include all binding twine.

Mr. SHIVELY. Mr. President—

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Indiana?

Mr. GRONNA. Yes; I yield. Mr. SHIVELY. We were in We were informed in the course of the consideration of the bill that there is absolutely none of this article used in the manufacture of binding twine. It is not used for that purpose at all.

Mr. GRONNA. I was asking for information, for I know that in my State a considerable quantity of what was known as jute twine was used some years ago. It was labeled as jute binding twine. May I ask the Senator who has this schedule in charge for what purpose this article is used? I observe that a large quantity is being imported, and I should like to know for what purpose it is being imported and for what manufacture it is being used.

Mr. WILLIAMS. Does the Senator wish to know for what

purpose these single yarns of jute are imported?

Mr. GRONNA. Yes. Mr. WILLIAMS. One class of them, the coarser class, is being imported for the purpose of making heavy jute fabrics, and the other class for the purpose of making finer jute fabrics and cloth. Single jute yarns enter into burlap, among other things, when they are a very coarse number.

Mr. GRONNA. I was under the impression that this article

was being used in the manufacture of binding twine.

Mr. WILLIAMS. No; it seems not. I had forgotten what the Senator from Indiana mentioned. Probably I was not present at the time.

Mr. WALSH. Mr. President-

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Montana?

Mr. GRONNA. Yes; I yield. Mr. WALSH. I think I can advise the Senator that jute yarn is the raw material of burlaps.

Mr. WILLIAMS. Not only of burlaps, but— Mr. WALSH. Of all kinds of jute fabrics; and I desire to say to the Senator from North Dakota that he will find binding twines generally on the free list under the provisions of paragraph 423.

Mr. GRONNA. Yes; I have just read the paragraph; but I

wish to say to the Senator from Montana-Mr. WALSH. I have not finished.

Mr. GRONNA. I wish to say to the Senator from Montana that I am quite familiar with binding twine, and that paragraph 423 does not include all kinds of binding twine.

Mr. WALSH. I was going to say to the Senator from North Dakota, and to the other Senators also, that the language of paragraph 423, as far as that goes, is the same as the language of paragraph 507 of the present act, which reads:

Binding twine: All binding twine manufactured from New Zealand hemp, manila, istle or Tampico fiber, etc.

The language is the same. So that paragraph 423 does not include all kinds of binding twine. It was because the committee apparently was led into an error by the provisions of the existing law.

Mr. GRONNA. I ask the Senator from Montana why the farmer should pay a duty on binding twine that runs more than

600 feet to the pound?

Mr. WALSH. I do not know. I supposed that measured the

binding twine.

Mr. GRONNA. It does not. The Senator from Montana will find that there is binding twine running 700 feet to the pound; that is, if manufactured of pure manila.

Mr. WILLIAMS. What was the Senator's remark? I did

not catch it.

Mr. GRONNA. My statement was that you will find binding twine that will run more than 700 feet to the pound, if the twine is manufactured from pure manila.

Mr. WILLIAMS. That has nothing to do with this.
Mr. GRONNA. It has this much to do with it, that the paragraph places a limitation upon it. It provides that twine which measures not more than 600 feet to the pound shall be placed on the free list.

Mr. WILLIAMS. Oh, the Senator means the free list?

Mr. GRONNA. Yes.

Mr. WILLIAMS. When we get to that we will deal with it. Mr. GRONNA. I was trying to deal with both at one time. When the farmer buys his twine he has to deal with both the purchase price and the question of paying for it.

Mr. WILLIAMS. If the Senator pleases, paragraph 276 relates to single yarns made of jute not otherwise specially provided for in this section. That has nothing at all to do with binding twine. Binding twine is in paragraph 423, upon the free list. When we reach that, if the Senator can show us any mistake we have made about it we shall take pleasure in either recommitting it for consideration or correcting it here. But that paragraph is not now under consideration.

Mr. GRONNA. I realize that; but my attention was called

to paragraph 423 by the Senator from Montana.

Mr. WILLIAMS. That does not deal with jute at all. Paragraph 423 has nothing to do with jute.

Mr. GRONNA. I will say to the Senator from Mississippi that it may be jute, or it may be something else.

Mr. WALSH and Mr. McCUMBER addressed the Chair.

The VICE PRESIDENT. Does the Senator from North Da-

kota yield to the Senator from Montana?

Mr. GRONNA. I yield to my colleague first. The VICE PRESIDENT. The Chair must insist that the Chair shall have a little something to say about this matter. Does the Senator from North Dakota yield to the Senator from Montana?

Mr. GRONNA. I do not. The VICE PRESIDENT. Does the Senator yield to his col-

league from North Dakota?

Mr. GRONNA. Yes, Mr. President; I yield to my colleague.
Mr. McCUMBER. I simply desire to say to my colleague that some years ago jute was mixed with sisal in making binding twine. Just as to what extent that has continued, I have no information. I am also informed that some years ago binding twine was made entirely of jute; that is, some kinds were made of jute. Whether that has been continued up to the present time or not, I am not prepared to say. But I wish to say to my colleague that this bill would be out of Democratic harmony if, after placing the farmer's product upon the free list, it did not tax the same product when he has to buy it back in twine or in some other form.

Mr. GRONNA. I now yield to the Senator from Montana if

he desires.

Mr. WALSH. Mr. President, I desire to invite the attention of the Senator from North Dakota to the fact that paragraph 423 contains exactly the same limitation that the present law does in relation to length. I am entirely satisfied that it was the purpose of the Finance Committee to put binding twine, without reservation, upon the free list. 'Apparently, when the Payne-Aldrich bill was framed there was no information before the Senate that jute was employed in the manufacture of binding twine at all; neither was it suggested, apparently, that the limitation "not exceeding 600 feet to the pound" was not an entirely proper limitation. If the Senator has any information to the effect that that will not include all kinds of binding twine I trust he will present it, because I shall be glad to join him in asking the Finance Committee to make the appropriate

Mr. GRONNA. I will say to the Senator from Montana and to the Senate that I have on many occasions measured binding twine and weighed it, and I know of my own knowledge that there is binding twine that runs more than 600 feet to the

Mr. SIMMONS. Mr. President-

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from North Carolina?

Mr. GRONNA. Yes; I yield to the Senator. Mr. SIMMONS. I desire to state to the Senator from North Dakota that the Senator from Montana is entirely right in stating that the Finance Committee intended to place all kinds of binding twine upon the free list; and if any information is brought to our attention to show that it is manufactured out of jute, or, as the Senator from North Dakota says, that it sometimes runs more than 600 feet to the pound, we shall be glad to make the change so as to carry out the purpose we had in view

Mr. GRONNA. I was quite sure of that. Mr. SIMMONS. I hope the Senator will let us go on now with the paragraph we have under consideration; and when we reach the paragraph in the free list dealing with binding twine we shall be glad to take up the matter with the Senator.

Mr. WILLIAMS. Mr. President, will the Senator from North Dakota permit me to interrupt him for a moment?

Mr. GRONNA. Yes; certainly.

Mr. WILLIAMS. If binding twine was ever made partially or altogether of jute, the reason why it is not now made of it is palpable, because under the Payne-Aldrich bill all-binding twine twine was placed upon the free list; that is, binding twine made out of New Zealand hemp, manila, istle or Tampico fiber, sisal grass, or sunn, or a mixture of any two or more of them. As a consequence, of course, people would have been stupid to import jute for binding twine or jute yarn when they could get better binding twine free of duty. As far as that is concerned, binding twine might be made out of cotton. If you are going to put upon the free list everything that could possibly be turned into binding twine you will have to put certain grades of cotton upon the free list, as well as jute. Binding

twine might be made out of flax. You would have to put flax yarns upon the free list. It might possibly be made out of hemp. But the framers of the Payne-Aldrich bill met the difficulty in the language I have stated, so that the farmer could get free binding twine without disrupting the cotton and jute and flax schedules; and he gets it. The only thing we did was to leave out the proviso which the Payne-Aldrich bill carried.

If it shall turn out that binding twine does measure more than 600 feet to the pound-and if the Senator says he knows it of his own knowledge, of course it is a fact—then when we get to that paragraph we might very easily strike out the language "not exceeding 600 feet to the pound." But we could not agree to put single jute yarns upon the free list just because they might possibly be used for binding twine any more than we

could put certain cotton yarns or flax yarns upon the free list.

Mr. GRONNA. The Senator calls attention to the fact that the Payne-Aldrich bill placed a certain duty on jute, but he forgets that it also placed a duty upon what is called by that side of the Chamber raw material. It is true, as the Senator from Mississippi has said, that twine may be and is manufactured out of flax, and I believe it is being manufactured out of jute. I believe a certain quantity of jute is being used in the manufacture of twine. I can see no reason why the farmer should pay a duty on his twine because there is a little jute in it, when nearly all of his products have been placed upon the free list.

Mr. WILLIAMS. But he will not import binding twine and will not buy binding twine with jute in it if he can get binding twine equally good or better without jute in it and at a

lower price.

Mr. GRONNA. I have seen the time when the farmer was compelled to buy the kind of binding twine that was being offered him, and that condition confronts the farmer almost every year. The twine, as the Senator from Mississippi knows, is being controlled by trusts, by cordage companies, by the International Harvester Trust. Why do you wish to place a duty on the farmer's binding twine when you are placing his products on the free list? I ask the Senator from Mississippi that question.

Mr. WILLIAMS. My answer is very plain. We are not placing a duty upon the farmer's binding twine at all. On the contrary, we are continuing it upon the free list, where we

found it.

Mr. GRONNA. Yes; that is true. The paragraph in the pending bill is, I understand, the same as the one in the

present law

Mr. SIMMONS. But, Mr. President, the Senator fails to recognize the fact that the paragraph we are dealing with now—276—simply provides for "single yarns made of jute, not otherwise specially provided for in this section." That is all we are dealing with now. The Senator from Mississippi very properly says that we can not amend this paragraph as to put jute yarns on the free list simply because possibly some jute may be used in making binding twine. It is a different article altogether that we are dealing with in this paragraph. It is single jute yarns, not used for binding twine, not made for that purpose at all.

I trust the Senator will let us act on this particular paragraph now and withhold his contention about the free-list para-

graph until we reach it.

Mr. GRONNA. As I understand the chairman of the Finance Committee, it is not the intention of the committee to put bind-

ing twine on the dutiable list?

Mr. SIMMONS. No; the committee has had no such intention; but putting a duty upon single jute yarns will not put any duty on binding twine. That is the question we are dealing with now.

Mr. GRONNA. Very well. Suppose, then, in this paragraph

we add the words "not used for binding twine."

Mr. SIMMONS. It says "not otherwise specially provided

; and if, when we come to the free list referring to this particular item, we should make some change, it would be otherwise specially provided for.

Mr. GRONNA. May I ask the Senator from North Carolina

if it is provided for anywhere in this section.

Mr. SIMMONS. I am not able right now to point out the

paragraph referring to it.

Mr. GRONNA. Paragraph 423.

Mr. SIMMONS. If that is so, paragraph 423 does provide for it.

Mr. GRONNA. Paragraph 423 does not mention jute, however.

Mr. WILLIAMS. Do I understand the question to be whether jute binding twine is anywhere upon the free list? Is that the

Mr. GRONNA. Yes.

Mr. WILLIAMS. No; it is not.
Mr. SIMMONS. The Senator from North Dakota has not asked that question, but of course that is a direct answer.

Mr. WILLIAMS. Was that the Senator's question, as I have stated it?

Mr. GRONNA.

Mr. GRONNA. Yes. Mr. WILLIAMS. TI Then that is the answer.

Mr. NELSON. Mr. President, I do not think jute is now used in binding twine. At an early day they did use a little Kentucky hemp and some jute. We have done so in Minnesota. We started in 1890, and the manufactory of binding twine was our State prison. It has proved a great success. We began in the first instance to manufacture it from hemp—plain Kentucky hemp. The twine proved a failure. It was clumsy and knotty and would not work well on the machine, and in a year or two it was abandoned. Our State had to throw away the machinery and get a new plant and a new outfit. To-day and for many years past, since we have had the new outfit, our binding twine is made at the State prison from the materials described in the paragraph on the free list.

The very best twine is made, of course, from pure manila. It costs high. Then there is another grade that is made partly from manila and partly from sisal grass or Central American tampico grass. Then there is some cheaper kind made from inferior grasses; but I do not think that now any kind is manufactured from jute. Perhaps in some cases there may be

Our twine plant in the State of Minnesota has proved a wonderful success. I think we are manufacturing now at the rate of 30,000,000 pounds a year. It is furnished to the farmers in carload lots at a little over cost. It is furnished to the dealers at a little less than that, but with the proviso that the dealers must not exact more than 1 cent a pound profit. Our State prison twine has been the great regulator of prices in Minnesota and has held down and checked the price of the Harvester Trust. In fact we control the price of binding twine in the State of Minnesota by the State prison twine, as we call it. All our farmers are hungry for it and take all they can get. Sometimes they can not get enough and they have to buy some from outside dealers.

I am not aware that they use any jute or have used it for years in the manufacture of that twine. I do not think the farmers will use it. I think, speaking from the standpoint of a farmer, it would be a good plan to prevent them from using jute in binding twine, because that would give them a very in-

ferior, worthless quality.

I have made these remarks to bring to the attention of Senators who come from agricultural States what a reform they can effect if they will follow in the wake of the State of Minnesota and set their State prisons to work manufacturing binding twine, and in that way become entirely independent of the trust and furnish the farmers cheap binding twine.

Mr. SMOOT obtained the floor.

Mr. GRONNA. Mr. President-

The VICE PRESIDENT. Does the Senator from Utah yield

to the Senator from North Dakota?

Mr. GRONNA. If the Senator from Utah will permit me, I simply want to add to what the Senator from Minnesota has said that North Dakota is also manufacturing twine at its State prison and that it has been a success and a factor in regulating prices to the farmers.

Mr. NELSON. Will the Senator from Utah allow me to add one word that I omitted to say when on my feet before?

Mr. SMOOT. I yield, Mr. President. Mr. NELSON. I think the Senator from North Dakota is

The best binder twine made from manila hemp runs more than 600 feet to the pound. It runs as high as 700 feet. think when you come to that article in the free list if you intend to give the farmers free binding twine you should eliminate that limitation of 600 feet to a pound. You should either eliminate it or make it, say, 800 feet to a pound. I think that is your purpose, and when you come to that I trust you will make that amendment.

Mr. SMOOT. Mr. President, I want to call the attention of the Senate to the inconsistency of this schedule. I will begin with the item in paragraph 276 and follow the yarn of that paragraph to the finished goods. Paragraph 276 provides that for in this section," shall pay a duty of 20 per cent ad valorem.

That is irrespective of the size or number of the yarn.

The next step of manufacture and the next process that

single jute yarns are used for we will find in paragraph 288. That paragraph provides that "plain woven fabrics of single

jute yarns, by whatever name known, bleached, dyed, colored, stained, painted, printed, or rendered noninflammable by any process," shall have a rate of 20 per cent ad valorem. That is just the same as the single yarn, irrespective of size. valorem duty is exactly the same, and in order that it carry a duty of 20 per cent it must be bleached, dyed, colored, and so forth.

Now turn to the free list, paragraph 416, and we find on the free list:

Plain woven fabrics of single jute yarns by whatever name known, not bleached, dyed, colored, stained, printed, or rendered noninflammable by any process, nor in any manner loaded so as to increase the weight per yard; waste of any of the above articles suitable for the manufacture of paper.

In other words, Mr. President, the single yarn itself carries 20 per cent ad valorem. If made into cloth and is bleached, dyed, painted, or stained it carries but 20 per cent ad valorem. If that same yarn is made into burlap and not bleached, dyed, stained, printed, or painted it goes on the free list, while the yarn that the burlap is made from carries a duty of 20 per cent.

That is the history of this one item.

Mr. WILLIAMS. A history without a map?

Mr. SMOOT. The Senator can so designate it if he wants That is the fact as to the working of it. Does the Senator think it is a proper or a consistent way to make a tariff bill?

Mr. WILLIAMS. Perfectly proper, but not consistent, and now I will explain in a few minutes why it is not consistent, as

soon as the Senator finishes.

I will gladly listen to the Senator now.

Mr. WILLIAMS. I will give the history of it if the Senator is through with the geography now, and the map of it. Is the Senator through?

Mr. SMOOT. The Senator may proceed.
Mr. WILLIAMS. Mr. President, this is one of the illogicalities of this bill, if I may frame that word. It is one of the inconsistencies of the bill.

Mr. LIPPITT. Did the Senator say one of many inconsistencies?

Mr. WILLIAMS. I did not. I said one of them, and there are not many.

Now and then men are led, when they have common sense, into doing a proper thing inconsistently rather than to be stubbornly stupid in doing a consistent thing. As this bill came over from the House of Representatives it had cotton bagging made out of jute upon the free list. I for one as a southern cotton planter could not afford to stand here in this presence and give the southern cotton planter the cloth for cotton bagging free of duty while the cloth for sacks for the grain and the bagging for the wool of the western farmer bore a duty.

We concluded that if we were going to put the cloth for the southern farmers' cotton bagging upon the free list we should put the cloth for the western farmers' grain sack and for the western farmers' wool bags upon the free list. We therefore put these plain woven fabrics as described in the free list in paragraph 416 as an amendment to that part of the paragraph which put bagging for cotton, gunny cloth, and similar fabrics suitable for covering cotton, composed of single yarns made of jute, jute butts, and so forth, upon the free list. That led us into this situation which we had to meet, not as logicians and as

logic choppers but as practical men.

We either had to take the cloth for the cotton bagging off of the free list and deprive the southern farmer of that advantage or we had to put the cloth for the wrapping of the western farmer's product upon the free list. Then the question confronted us, Where are you going to go after you do that? Shall you go back then and take the duty off single jute yarn because both cotton bagging and these bags of burlap are made out of single jute yarn? Then we were confronted with the fact that a lot of mills in this country are making single jute yarn.

Now, we have given them free jute, or, rather, they already had it under the Payne-Aldrich law, and so we concluded it was better to be illogical than perhaps to close those people down.

Then when we came to the next paragraph to which the Sena-tor referred, which is paragraph 288, plain woven fabrics of single jute yarn, not suitable for wrapping grain or for wrapping cotton either, we came to the conclusion that if the jute was free and if the duty on the single yarns made of jute was 20 per cent, that would, even from a protectionist standpoint, be a sufficient duty upon the plain woven fabrics for the man who made them.

The Senator asked whether we thought that was a proper thing to do. That depends. We have listened to nothing here for a week except howlings after howlings about being unfair to the farmer and discrimination against him. Now, when we reach a case where we discriminate for him-and this is a real

discrimination, the so-called discriminations against him are alleged discriminations, because we have reduced in dollars and cents the duties upon manufactured products more than we have upon agricultural products, and the allegation of dis-crimination is arrived at only by the percentage route, which is a very deceiving one-when we come to where we have discriminated in favor of the farmer we are charged with lack of logic, and we frankly confess it.

Mr. SMOOT. There is no need of being inconsistent in this matter at all. It is cured very easily, indeed. If the Senator There is no need of being inconsistent in this

will allow me

Mr. WILLIAMS. I will yield to the Senator just long enough for him to tell me how he would cure it, unless he took the duty off of single yarns made of jute altogether and put them on the free list.

Mr. SMOOT. Not necessarily. I will tell the Senator.

Mr. WILLIAMS. Well, tell me now. I will yield for that

Mr. SMOOT. Single yarns made of jute run from a coarse yarn down to a fine yarn, as the Senator knows. Now, if the Senator wanted cotton bagging and burlaps upon the free list, and they have been put upon the free list, and have a consistent tariff from the jute yarn to the finished product, he would have provided in this paragraph that all single yarns made of jute up to a certain number.
Mr. WILLIAMS. What number?

Mr. SMOOT. I would not say offhand. I would have to

Mr. WILLIAMS. We did not try to look it up. We found

nobody could tell us, offhand or any other way.

Mr. SMOOT. I can tell the Senator within an hour what number it ought to be.

Mr. WILLIAMS. I wish you would; I would like to have the judgment of an expert. We tried to do that.

Mr. SMOOT. It could have been done very easily. no doubt about it. I do not want to say right offhand without having the information that would make it absolutely accurate, just exactly what it is, but the Senator knows that burlap used to make grain bags and cotton bagging that covers cotton contains certain sizes of jute yarn. Both are staple articles, made in many parts of the world and in the same way; weigh wherever made about the same per pound. It would have been very easy, indeed, to make jute yarns used in burlap for grain bags and cotton bagging free, and in so doing make this a consistent

Mr. WILLIAMS. The Senator says he can tell us how. We tried to find out how. There were men before us who were manufacturing burlaps. There were men before us who were importing burlaps, and I asked several of them about this very

Now, we could do it as to cotton bagging, and the House did make the distinction as to cotton bagging; that is to say, this stuff where there is an excess of 16 threads to the square inch, counting the warp and filling, and weighing not less than 15 ounces per square yard. Then I asked if anybody could give me a number of threads or any other line of demarcation that would discriminate and differentiate, dividing bagging suitable for woolsacks and for grain bags from the other sort of burlaps. I wish I had known that the Senator from Utah was an expert upon this matter. I would have sent for him and maybe I would have gotten the information, but we did not get it from anybody else.

Moreover, we knew, as men of common sense, that one sort of burlap would hold corn, and that a finer sort of burlap to hold wheat or oats or barley or rye would have a closer texture, be more closely woven, while the burlap that wraps cotton you can stick your fist through, yet it is sufficient for that purpose. We then used this language so as to cover the stuff that they make woolsacks and grain bags out of:

Plain woven fabrics of single jute yarns by whatever name known, not bleached, dyed, colored, stained, printed, or rendered noninflammable by any process, nor in any manner loaded so as to increase the weight per yard; waste of any of the above articles suitable for the manufacture of paper.

Then we left the other burlaps which were bleached or dyed or colored or stained or printed or rendered noninflammable upon the dutiable list. Our idea was to interfere with existing conditions as little as we consistently could, provided we gave the farmers all over the land free wrappings for their products, and provided we made a sensible and reasonable reduction upon the finished products of jute, flax, and hemp. The "illogicality" of it, if I may frame the word, is obvious to a school boy; it took nobody to discover that; we had known it already.

Mr. SMOOT. Mr. President, I am not going to take the time of the Senate, because I want to get on with this bill,

but I have simply called the attention of the Senate to this inconsistency. The Senator admits the inconsistency, and-

Mr. WILLIAMS. We can make it logical-

If the Senator will permit me to finish, I will Mr. SMOOT. then yield to him.

Mr. WILLIAMS. We can make it logical by striking out the free listing of these two products, if anybody wants to do it.

Mr. SMOOT. Nobody has suggested anything like that. would have been through before this, if the Senator had not interrupted me. The Senator admits that both the Senate and the House bills provide for cotton bagging on the free interrupted me. list and names the number of threads per inch and the size of those threads. There was no difficulty about that, and yet the very threads that go into the cotton bagging are dutiable at 20 per cent under this bill. There is no necessity for that. You could have taken those threads out without question, because the free list particularly mentions what threads are meant, and that could have been done with burlap. That is all I wish to say.

Mr. WILLIAMS. Then the Senator would put single yarns

made of jute on the free list?

Mr. SMOOT. Not all of them.

Mr. WILLIAMS. You would put those threads of which cotton bagging is made upon the free list?

Mr. SMOOT. Yes; and also cotton bagging.

Mr. WILLIAMS. Does the Senator know how many factories in the United States manufacture the yarns out of which cotton bagging is made?

Mr. SMOOT. Yes; I do know. Mr. WILLIAMS. Then if they had to quit, you would be telling us that we had started a soup house somewhere and discharged a lot of laborers. What we did was to reduce the duty upon threads and yarns and to put these two particular products upon the free list.

Mr. SMOOT. There is no earthly difference whether a man goes to the soup house because he can not make the yarn or because he can not make the cloth; the result would be exactly

the same thing.

Mr. GRONNA. Mr. President, I want to say to the Senator from Mississippi that he has not heard any complaint from me about the duty on grain bags. So far as my State is concerned—and I think the same is the case in the adjoining States—we do not use grain bags in any great quantity. We spout the grain from the thrashing machine into grain tanks, and then it is carried to the elevator or granary.

Mr. WILLIAMS. They are used for wheat, for barley, for

oats, for rice, for rice flour, and other grains.

Mr. SMOOT. And for wool. Mr. WILLIAMS. And for wool.

Mr. WALSH. I merely desire to say in connection with what the Senator from North Dakota [Mr. GRONNA] has said that the custom is quite different in my State, because there practically all grain is sacked in the field where it is thrashed.

The VICE PRESIDENT. The question is on agreeing to the

amendment reported by the committee.

The amendment was agreed to. The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 276, page 83, line 21, after the word "section," to strike out "25" and insert "20."

The amendment was agreed to.

The next amendment was in paragraph 278, page 84, line 4, after the word "value," to strike out "25" and insert "20," and in line 5, after the word "number," to strike out "30" and insert "25," so as to make the paragraph read:

278. Threads, twines, or cords, made from yarn not finer than 5 lea or number, composed of flax, hemp, or ramie, or of which these substances or any of them is the component material of chief value, 20 per cent ad valorem; if made from yarn finer than 5 lea or number, 25 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 279, page 84, line 9, after the word "number," to strike out "15" and insert "12"; and in line 10, after the word "number," to strike out "25" and insert "20," so as to make the paragraph read:

279. Single yarns, made of flax, hemp, or ramie, or a mixture of any of them, not finer than 8 lea or number, 12 per cent ad valorem; finer than 8 lea or number and not finer than 80 lea or number, 20 per cent ad valorem; finer than 80 lea or number, 10 per cent ad valorem; ramie sliver or roving, 15 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 280, page 84, line 17, before the words "per cent," to strike out "30" and insert 25," so as to make the paragraph read:

280. Gill netting, nets, webs, and seines made of flax, hemp, or ramie, or a mixture of any of them, or of which any of them is the component material of chief value, 25 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 281, page 84, line 23, after the word "matting," to strike out "21 " and insert "2," so as to make the paragraph read:

281. Floor mattings, plain, fancy, or figured, including mats and rugs, manufactured from straw, round or split, or other vegetable substances, not otherwise provided for in this section, and having a warp of cotton, hemp, or other vegetable substances, including what are commonly known as China, Japan, and India straw matting, 2 cents per square yard.

The amendment was agreed to.

The next amendment was, in paragraph 282, page 85, line 2, after the words "(except cotton)," to strike out "35" and insert "30," so as to make the paragraph read:

282. Carpets, carpeting, mats, and rugs made of flax, hemp, jute, or other vegetable fiber (except cotton), 30 per cent ad valorem.

The amendment was agreed to.

Paragraph 283 was read, as follows:

283. Hydraulic or flume hose, made in whole or in part of cotton, flax, hemp, ramie, or jute, 7 cents per pound.

Mr. LODGE. Mr. President, I merely wish to call attention to the duty that is imposed by this paragraph on linen hy-draulic or flume hose. The duty in the existing law on the flax yarns from which they are made is 45 per cent and the duty on the completed article of hose is 15 cents per pound. In the pending bill the duty on the flax yarn has been reduced to 25 per cent ad valorem and the duty on the finished article has been cut to 7 cents per pound; that is, the duty on the raw material of this product has been reduced less than 50 per cent, while the duty on the finished manufactured article has been reduced more than 50 per cent. Of course, it puts an absolutely undue burden on the finished article, and it is an improper adjustment of classification. I suppose, however, it is one of those illogical things demanded by common sense, of which there are so many in the bill, and that it is useless for me to attempt to get a proper adjustment of the duties.

I merely call attention to it as another instance of carrying to the extreme the principle of giving protection to the foreign manufacturer. I ask that there may be printed in connection with my remarks, without reading, a letter relating to the matter.

The VICE PRESIDENT. In the absence of objection, permission is granted.

The letter referred to is as follows:

MALDEN, MASS., April 21, 1913.

The letter referred to is as follows:

Malden, Mass., April 21, 1913.

Hon. Heney Cabot Lodge.

United States Senate, Washington, D. C.

Dear Mr. Senator: We have just received a copy of the Underwood tariff bill and we are vitally interested in Schedule J, items 283 and 287. If these items go through as they are reported in the bill, we will be compelled to close up our works and go out of business.

We import single flax yarns on which the duty originally was 45 per cent, and on hydraulic linen hose, the duty was 20 cents per pound. Under the Payne bill, the duty on flax yarns remained at 45 per cent, but on hydraulic linen hose it was reduced to 15 cents per pound. Under the Underwood bill, item 283, Schedule J, duty on flax yarn is 25 per cent ad valorem and on hydraulic linen hose, in same schedule, item 287, the duty is 7 cents per pound.

Now, Mr. Senator, our average duty on all the yarns which we import amounts to more than 7 cents per pound, so that we are actually discriminated against in this country if this bill goes through as laid down in this copy. In addition to the unfavorable duty we are up against the cheap and low labor of our foreign competitors who can outrun us for fair on this basis.

We hardly believe that such an unfair proposition will go through Congress, but it certainly is up to our Representatives to see that we get a fair show to do business in this country. All we ask is an equal chance and no favoritism. The truth of our assertions can be verified by getting information from the customs in regard to the duty and prices of imported linen yarns, and we certainly hope you will do what you can to aid us in getting a fair deal. If you think it advisable, and will give us the names of the other Members of Congress and Senate, we will write them all a letter asking their cooperation.

Hoping that you will see the unfairness of this proposition and that you will assure us your cooperation in endeavoring to rectify this matter and thanking you for your attention, we remain

CHAS. NIEDNER'S SONS CO., WM. NIEDNER, Treasurer.

Mr. SMOOT. Mr. President, I should like to recur to paragraph 282 and to call the attention of the Senate to the words in line 2, "(except cotton)." Does the Senator from Mississippi think that those words ought to be there?

Mr. WILLIAMS. In what line? Mr. SMOOT. The words "(except cotton)," in line 2, page 85. The Senator knows that the articles enumerated in paragraph 282 made of cotton are specifically provided for in paragraph 311 of the wool schedule. It does seem to me that there is no need of having the words "(except cotton)" in this paragraph, because cotton is taken care of, and these very items are covered by paragraph 311.

Mr. WILLIAMS. Mr. President, that same language was in the Payne-Aldrich law.

Mr. SMOOT. Yes.
Mr. WILLIAMS. And we took it for granted, as we did in

language had been used in the old law the provision had probably been adjudicated, and having been determined it was better not to disturb it, unless there were some good reason for disturbing it.

Mr. SMOOT. It was put there because under the present law the method of assessing the duty is entirely different from that proposed in this bill, which puts the duty on an ad valorem basis. I do not know that the words will do any harm, but certainly they will do no good.

Mr. WILLIAMS. If they will do no harm, let them stay in

and let us go ahead.

Mr. SMOOT. Very well.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 284, page 85, line 9, after the word "tapes," to strike out "25" and insert "20," so as to make the paragraph read:

284. Tapes composed wholly or in part of flax, weven with or without metal threads, on reels, spools, or otherwise, and designed expressly for use in the manufacture of measuring tapes, 20 per cent advalorem.

The amendment was agreed to.

The Secretary read paragraph 285, as follows:

The Secretary read paragraph 250, as follows:

285. Linoleum, plain, stamped, painted, or printed, including corticine and cork carpet, figured or plain, also linoleum known as granite and oak plank, 30 per cent ad valorem; inlaid linoleum, 35 per cent ad valorem; olleloth for floors, plain, stamped, painted, or printed, 20 per cent ad valorem; mats or rugs made of olicloth, linoleum, corticine, or cork carpet shall be subject to the same rate of duty as herein provided for olleloth, linoleum, corticine, or cork carpet.

Mr. SMOOT. Mr. President, before leaving paragraph 285, and in connection with inlaid linoleum, the Senator from Mississippi will remember that in the Dingley bill the words "inlaid linoleum" were first used, and from a month or two after the passage of that bill up to nearly the time of the passage of the Payne-Aldrich bill there was constant litigation over that term. I believe that if the expression "inlaid linoleum" is used again in this bill the same questions will arise; in fact, I have no doubt about it. I see the Senator shakes his head. but it has been decided that the wording in the present law but it has been decided that the wording in the present law takes in all of that class of linoleum which is known as and called "inlaid linoleum." If the words of the present law, "the composition of which forms designs or patterns, whether inlaid or otherwise," were used, litigation that ensued for years because of the use of the words "inlaid linoleum" would be obviated. While I am not asking for a change in duty, I feel positive that if that description is incorporated in the pending bill it will be better for the administration of the

Mr. WILLIAMS. Mr. President, the case to which the Senator refers is the United States against Hunter, in One hundred and twenty-seventh Federal Reporter.

Mr. SMOOT. The case that I referred to, I think, was T. D. No. 30764; G. A. 7062.
Mr. WILLIAMS. This is 20075, but it is on the same point. In this case it was held, affirming the circuit court and reversing the board decision, that so-called granite linoleum, made by spreading paste upon a burlap foundation and then subjecting the same to pressure, resulting in variously colored spots and masses, was not inlaid linoleum as that term is used in the tariff.

Mr. SMOOT. That was granite and oak-plank linoleum.

Mr. WILLIAMS. Now, in the case of the United States against Scott (T. D. 29208) so-called plank linoleum or oak-plank linoleum, made by running paste of two colors in stripes of equal width upon a burlap foundation, were found to be produced by a different process from that employed in the manufacture of inlaid linoleum and were held not to be dutiable as inlaid linoleum. The House inserted in this clause:

Inlaid linoleum, 35 per cent ad valorem.

Then in that paragraph this language is found:

285. Linoleum, plain, stamped, painted, or printed, including corticine and cork carpet, figured or plain; also linoleum known as granite and oak plank, 30 per cent ad valorem.

So we mentioned it expressly in order to meet the decision. So we mentioned it expressly in order to meet the decision. Now, it appears that this came about in the following way: Prior to the passage of the Dingley law there were only three kinds of linoleum known to the trade. One was plain linoleum made, by pressing a colored paste upon the burlap—the burlap is the back of all linoleum; secondly, printed linoleum, upon which the desired pattern was printed; and then inlaid linoleum, made by pressing several colored pastes into the burlap. After the passage of the Dingley law two other linoleums became common in the trade; one was known as granted linoleum. came common in the trade; one was known as granite linoleum and the other was known as oak-plank linoleum, the process of making which I have just read from this decision. The language "inlaid linoleum" led to litigation under the old law, owing to the fact that this granite and oak-plank linoleum many instances in connection with this bill, that where the came into the trade later. Now, we have prevented the possibility of future litigation as to the meaning of "inlaid li-noleum" by mentioning eo nomine granite and oak-plank linoleum; so that I do not see how any litigation in regard to it can come in the future. If we had merely repeated the language "inlaid linoleum" there might have been some law-suits—some litigation about it—though I do not see precisely how because the courts have already satisfy the point at issue how, because the courts have already settled the point at issue. At any rate, out of a superabundance of caution we name granite and oak plank. The courts have held that these two last—granite and oak-plank linoleums—were not inlaid linoleums within the meaning of the Dingley law. So we have given them by their own names this duty of 30 per cent.

Mr. SMOOT. Mr. President, my only aim in bringing this matter to the attention of the Senate is that immediately after the decisions to which the Senator from Mississippi has referred, and up to the time of the passage of the Payne-Aldrich bill, there were suits pending upon every conceivable technicality. It is for that reason that I have called the Senator's attention to it. If the words "the composition of which forms designs or patterns, whether inlaid or otherwise," were used, there would be no question as to the meaning or description. If the Senator does not care about accepting my suggestion, well and good, but I am positive those words ought to be inserted.

Mr. WILLIAMS. I do not think the language here used will cause litigation any more than that in the present law, though

I do not know.

The reading of the bill was resumed.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 287, page 85, line 23, after the word "wholly," to strike out "or in chief value"; on page 86, line 1, after the word "wholly," to strike out "or in chief value"; and on the same page, in line 3, after the word "rubber," to strike out "50" and insert "40," so as to make the paragraph read:

287. Bands, bandings, belts, beltings, bindings, cords, ribbons, tapes, webs and webbings, all the foregoing composed wholly of flax, hemp, or ramie, or of flax, hemp, or ramie and india rubber, and not otherwise specially provided for in this section, 30 per cent ad valorem; wearing apparel composed wholly of flax, hemp, or ramie, or of flax, hemp, or ramie and india rubber, 40 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 288, page 86, line 5, after the word "known," to insert "bleached, dyed, colored, stained, painted, printed, or rendered noninflammable by any process," so as to make the paragraph read:

288. Plain woven fabrics of single jute yarns, by whatever name known, bleached, dyed, colored, stained, painted, printed, or rendered noninflammable by any process, 20 per cent ad valorem.

The VICE PRESIDENT. The question is on agreeing to the

committee amendment.

Mr. LODGE. Mr. President, I have no objection to the amendment being agreed to, but I merely want to speak on the paragraph.

The amendment was agreed to.

Mr. LODGE. Mr. President, I wish to call attention to this paragraph in connection with paragraph 290. This paragraph covers the fabrics of which the articles in paragraph 290 are made. What are commonly known as burlap and bags are covered by paragraph 290, burlap bags being made from burlap. The House seems to have had some faint conception of the fact that the duty on the completed fabric bore a certain relation to the raw material. They made the duty on the burlap 20 per cent and on the bags 25 per cent. The Senate committee, in its wisdom, has cut down the duty on the bags to 10 per cent and left the duty on the plain woven cloth 20 per cent.

Mr. SMOOT. The unbleached fabrics have been placed upon

the free list.

Mr. LODGE. I understood that bags were made of these plain woven fabrics of single jute yarns by whatever name known. Do I understand that they are made only of the unbleached fabrics?

Mr. WILLIAMS. The Senator will notice the difference be-tween the two. Paragraph 288 covers the material when bleached, dyed, colored, stained, painted, printed, or rendered noninflammable, and paragraph 290 covers it when not dyed, colored, stained, painted, printed, bleached, and so forth.

Mr. GALLINGER. Yes; that is right.

Mr. SHIVELY. The material of which the articles mentioned in paragraph 200 are made is on the free list in para-

Mr. LODGE. I have not examined paragraph 416 of the free list. If that has been done, of course that has made it

Mr. SMOOT. That makes the differential between the burlap and the bag 10 per cent.

Mr. LODGE. That makes the differential.

Mr. WILLIAMS. The Senator will notice that the House-

Mr. LODGE. I see that an amendment has been made by the Senate to paragraph 416 in the free list.

Mr. WILLIAMS. Yes. They made a different differential,

which makes the correction necessary.

Mr. LODGE. Yes; but it lowers the duty, in my judgment, far beyond the proper point. I desire in this connection, while I will not read it, to put in a statement in regard to the cost of these articles. Of course, this applies to the House provision; but it gives the cost of the articles, and I should like to have it printed. I had overlooked the amendment in the free list which, of course, establishes a differential, as the Senator says

The VICE PRESIDENT. Is there objection? The Chair

hears none, and the matter referred to will be printed.

The matter referred to is as follows:

Hon. Henry Cabot Lodge,

United States Senate, Washington, D. C.

Dear Sir: Permit us to call your attention to paragraphs Nos. 292 and 294 of House bill No. 10, placing a duty of 25 per cent on both burlap and burlap bags.

As manufacturers, we consider that in all fairness our product of burlap bags should carry a different rate than our raw material (which is burlap), for the reason that we are in competition with the manufacturer in Calcutta, where labor is the cheapest in the world.

While we advocate a specific duty, the ad valorem rate of 25 per cent on bags would be no hardship, provided the rate on burlaps be reduced at least to 17½ per cent ad valorem. This is merely to equalize the difference in labor cost between India and the United States and allow us to continue to compete with the mills in Calcutta.

During the past eight years the equivalent ad valorem rate on burlap has been 24 per cent and on bags 30 per cent, and at the present time over 10 per cent of the burlap bags consumed in this country are imported, chiefly from India, showing conclusively that we are now on a competitive basis in this industry, which is not sectional, bag factories being distributed throughout all portions of the United States.

This bill actually advances the rate on burlan which is numer.

bag factories being distributed throughout all portions of the United States. This bill actually advances the rate on burlap, which is unwar-ranted, as its use is general throughout the country for various

ranted, as its use is general through the inclosed printed facts bearpurposes.

May we ask your careful perusal of the inclosed printed facts bearing on this subject?

Trusting you will use your influence to have the item changed in
the bill as suggested, and thanking you for the consideration you may
give to the matter, we have the honor to remain,

Yours, respectfully,

H. & L. Chase.

NEW YORK CITY, January 17, 1913. *

To the honorable Committee on Ways and Means, House of Representatives, Washington, D. C.

atives, Washington, D. C.

GENTLEMEN: We, the undersigned committee, representing 22 of the principal manufacturers of cloth bags or sacks in all sections of the United States, having factories in 21 different States, and indirectly representing 10,000 workers, and through them 20,000 dependents, respectfully but insistently make the following statement and recommendations in regard to paragraphs 352 and 354 of the present tariff act, effective August 6, 1909:

The two or three persons who will present this petition to you are but two or three out of approximately 10,000 persons employed in this industry; these 10,000 provide a livelihood for approximately 20,000 dependents. To transfer employment from any number of these 10,000 workers to foreign labor would take away the means of livelihood from a corresponding number of consumers. There are approximately 30,000 people in the United States who are dependent upon this industry, and this petition is made informally in their behalf.

ARTICLES DESCRIBED IN PARAGRAPHS 552 AND 354.

ARTICLES DESCRIBED IN PARAGRAPHS 852 AND 854.

The goods described in paragraph 352 are known in this country as burlaps.

The goods described in paragraph 354 are known in this country as burlap bags.

RECOMMENDATIONS.

As to paragraph 352: Any rate of duty between free entry and the rate under the present law would be satisfactory to the bag manufacturers, provided a proper differential were maintained between paragraphs 352 and 354. However, it is the judgment of the bag manufacturers that a moderate duty on burlaps forms a proper and substantial source of revenue, without lajury to any industry; and, therefore, that at least a portion of the present duty should be retained. Burlaps compete with coarse cotton cloth, and this is an additional reason for maintaining at least a portion of the present duty.

As to paragraph 354: The present differential between paragraphs 352 and 354 should be maintained or increased and under no circumstances should it be reduced. It is the equivalent, approximately, of three-eighths of a cent per pound (specific), or 6 per cent (ad valorem). This differential is already a competitive marginal duty, as proved in two ways: First, by a comparison of labor and wages in the United States and foreign countries, especially India, against which country—and with a tendency already for such importations to increase.

BATES.

RATES.

At a meeting held in New York January 17, 1913, attended by the representatives of 12 prominent burlap-bag manufacturing concerns, it was the unanimous opinion that our first choice for rates would be:

Burlaps, paragraph 352 Bags, paragraph 354 Bags, paragraph 354 11

Based on Treasury statistics for eight years ending June 30, 1912, these rates would reduce the revenue:

Under paragraph 354 \$1,700,000

Under paragraph 354 \$1,700,000 1, 820, 000

It was also the unanimous opinion that the duty on burlaps and burlap bags ought to be specific, and we understand that the collectors of customs, who are well informed on the point, would strongly favor a specific duty.

The principal ports of entry for burlaps are New York, Boston, New Orleans, San Francisco, and Portland, Oreg. If you would ask the Board of General Appraisers and the collectors at these five ports, we think they would be unanimous in recommending specific duty for burlaps. It would save the Government and the importers an enormous amount of trouble and expense, and, we believe, would not harm anyone.

anyone.

But the extra trouble and expense of doing business under ad valorem duties are of less importance to us than would be the loss of our business, resulting from a reduction in the present differential between paragraphs 352 and 354. We can get along with compound ad valorem and specific duties if we must, and it is not of great importance to us whether the duty on the burlap cloth is somewhat more or less than I cent per pound; that item would be chiefly a matter of revenue. But we can not get along if the difference between paragraphs 352 and 354 is reduced. A reduction in the already small competitive difference of 6 per cent now existing might mean our extermination, and on no account should this difference be diminished.

BAG MANUFACTURERS' FIRST CHOICE FOR RATES OF DUTY.

AS THE LAW NOW IS.

AS THE LAW SHOULD BE. AS THE LAW SHOULD BE.

SEC. 352. Plain woven fabrics of single jute yarns, by whatever name known, weighing not less than 6 ounces per square yard, and not exceeding 30 threads to the square inch, counting the warp and filling, 1 cent per pound: if exceeding 30 and not exceeding 55 threads to the square inch, counting the warp and filling, seven-eighths of 1 cent per pound and 15 per cent ad valorem.

AS THE LAW NOW IS.

Sec. 352. Plain woven fabrics of single jute yarns, by whatever name known, weighing not less than 6 ounces per square yard, and not exceeding 30 threads to the square inch, counting the warp and filling, nine-sixteenths of 1 cent per pound and 15 per cent ad valorem; if exceeding 30 and not exceeding 55 threads to the square inch, counting the warp and filling, seven-eighths of 1 cent per pound and 15 per cent ad valorem.

Sec. 354. Bags or sacks made from plain woven fabrics of single jute yarns, not dyed, colored, stained, painted, printed, or bleached, and not exceeding 30 threads to the square inch, counting the warp and filling, seven-eighths of 1 cent per pound and 15 per cent ad valorem.

CHANGES IN IMPORTATIONS SHOULD

SEC. 354. Bags or sacks made from plain woven fabrics of single jute yarns, not dyed, colored, stained, painted, printed, or bleached, and not exceeding 30 threads to the square inch, counting the warp and filling, 1½ cents per pound.

CHANGES IN IMPORTATIONS SHOULD THE ABOVE RECOMMENDATIONS BE FOLLOWED.

There would be no material change in the volume of importations of burlaps or bags if the foregoing suggestions were followed, because the present relation of burlaps and bags to competing articles would not be materially altered. But if the present differential between burlaps and bags were diminished it would undoubtedly result in increased importations of bags, with a corresponding reduction in burlaps. In just such degree would American laborers engaged in this industry be forced to compete for work in other lines. The only possible result of such a condition in this and other industries would be a general lowering of wages in this country.

We wish to emphasize the statement that a considerable portion of the burlap bags used in this country is imported from abroad, because the present difference between the rate of duty on bags and the rate of duty on burlap cloth is too small to enable the American manufacturers to compete with Calcutta. The importation of these bags proves that the present difference is not protective and is only competitive. Any reduction in this difference wild deprive the American manufacturer of the opportunity to compete with Calcutta. We understand your honorable committee wishes to establish competitive rates and does not intend, to deprive the American manufacturer of the opportunity to compete. We respectfully urge you not to make any reduction in this difference, which is already too small to allow us to get more than a fair share of the business. Any reduction in this difference would prevent us from holding that portion of the business which we are now able to get.

We further recommend adhering to the present phraseology of paragraphs 352 and 354 as fer as nossible.

difference would prevent us from holding that portion of the business which we are now able to get.

We further recommend adhering to the present phraseology of paragraphs 352 and 354 as far as possible. Any radical change in classification such as that contained in the so-called "farmers' free-list bill" (H. R. 4413, 62d Cong.) would be confusing and possibly disastrous, without apparent advantage of any kind. The meaning of the present phraseology has been defined by 15 years of entries. It should not be changed in its fundamental construction.

Under House bill 4413, Sixty-second Congress, goods described as follows would have been put on the free list:

"—— gunny cloth, and all similar fabrics, materials, or coverings, suitable for covering and baling cotton, composed in whole or in part of jute, ——, or any other materials or fibers suitable for covering cotton, and burlaps, ——, or other materials suitable for bagging or sacking agricultural products."

The figures submitted for the present use of the Ways and Means Committee in a pamphlet entitled Tariff Handbook indicate that your honorable body has no conception of the articles that might have been given free entry under the above classification. Not only would free entry have been accorded to the articles referred to in paragraphs 352, 354, and 355, but an indefinite, indescribable, incalculable quantity and variety of other materials now covered in other paragraphs of Schedules I and J and possibly even Schedule K. There have been rullings of the Board of General Appraisers regarding the entry of goods classified under the phraseology "suitable for, etc.," that indicate clearly the wide and dangerous and indefinite scope of such classification for tariff purposes,

#### SUMMARY OF RECOMMENDATIONS.

Our recommendations, then, are not so much requests for protection as they are protests against the abrogation of the present competitive duty, which we require in order to continue in business. Radical changes in the classification or descriptive phraseology should be avoided if possible.

Statement of average yearly importations of burlap cloth and burlap bags for 8 years ending June 30, 1912, showing weight and value and the amount of duty under the present law compared with what the amount would be under the proposed change.

[These figures were obtained from Treasury Department statistics and are accurate and reliable.]

	Burlap cloth.1	Burlap bags. ²

Minnesota			7
Missonri			2
Nebraska			1)
			1
New Jersey			1
New Lork			.6
North Carolina			1
Onio			1
Oregon			ô
Pennsylvania		***************************************	7
Tennessee			2
Texas			3
			2
Wisconsin			1
Wisconsin			- 1

According to the statistics of manufactures of the United States, Thirteenth Census, 1910, the cloth-bag-manufacturing industry (which is listed under "Bags, other than paper") held the following position

	Number of in- dustries larger.	Number of in- dustries smaller.	Rank ex- pressed in per cent.
In number of establishments	138	118	46
In persons engaged in industry In number salaried employees	96 119	161 138	62½ 53½
In number wage earners	94	163 164	634
In salaries paid	117 110	140 147	64 544 57
In cost materials used	49	208	81
In value products made	66 109	191 148	74 58
A verage	99	158	614

It is clear from the foregoing that this industry demands your careful consideration. It has been developed during the past half century under tariff laws favorable to its growth. It is clearly upon a competitive tariff basis now. It deserves a continuation of that basis to just the same extent that other industries are accorded it.

REASONS WHY THERE SHOULD BE A DIFFERENTIAL BETWEEN PARAGRAPHS 352 AND 354.

The principal point of manufacture of burlap, which is the bag manufacturers' raw material, is in Calcutta, India. The Indian manufacturers of burlap would like also to manufacture the bags. Enough, perhaps, is known regarding the difference in conditions of employment, hours of labor, and wages in this country and in India to make unnecessary any further reference here. However, the following table may serve to make perfectly clear the fact that no difference in methods or atmosphere or scenery can, unaided by a protective duty, put American labor on a competitive basis with Indian labor.

	United States of America.	India.
Average hours per week Average sewers' wages per week Average hemmers' wages per week "Learners"	54 \$9.00 9.00 5.00	72 \$0, 66 . 45 . 40

Figures already given show that under the present differential there are importations of bags in considerable volume, and therefore that there is certainly no prohibition of importations from abroad nor monopoly for the American manufacturer in the present rates.

It has always been assumed that the consumer of burlap bags is confined exclusively to those engaged in agricultural pursuits. This is entirely wrong. We do not disguise the fact that the farmer is to some extent a user of burlap bags, but only to a very small extent. The grains and cereals from the Rocky Mountains to the Atlantic Ocean are handled by the farmer in bulk, and only a very small quantity of bags is used in this section for the purpose of moving the crops. From the Rocky Mountains to the Pacific coast grain is moved partly in sacks, partly in bulk, though the tendency toward the bulk movement of grain is strong, and it is freely predicted that within a short time after the opening of the Fanama Canal the Pacific clope will handle all its grain in bulk. Eliminating the Pacific clope will handle all its grain in bulk. Eliminating the Pacific clope will handle all its grain in bulk. Eliminating the Pacific clope will handle all its grain in bulk. This prestricted sense, largely as a consumer of the goods he busy, rather than of the goods he sells, and we do not see what material benefit would result to him by a reduction in duty on bags which are merely used as containers or conveyers are consumed almost entirely at home. This is clearly shown by the comparatively small "drawbacks" applied for upon bags exported filled with American product.

It is clear, therefore, that, even if the removal of the present differential should result in a slightly lower cost of burlap bags to, the bag consumers of this country, it would not materially benefit such consumers, and the retention of the industry in this country is justified.

#### CONCLUSION.

CONCLUSION.

In conclusion, therefore, we respectfully petition that, for the good of this country, for the greatest good to the greatest number, and for the preservation of the industry which we represent, the present differential of 6 per cent between paragraphs 352 and 354 should be increased rather than reduced.

Respectfully submitted.

Everett Ames, chairman (Ames-Harris-Neville Co., Portland, Oreg.); Benjamin Elsas (Fulton Bag & Cotton Mills, Atlanta, Ga.); Albert F. Bemis (Bemis Bro. Bag Co., St. Louis, Mo.). Paragraphs 332, 352, and 354, present tariff law.

Boston, Mass., February 7, 1913.

Boston, Mass., February 7, 1913.

Hon. Oscar W. Underwood,
Chairman Committee on Ways and Means,
House of Representatives, Washington, D. C.

Dear Sir: This letter is sent with the purpose of supplementing the information supplied by the brief filed with the committee under Schedule I and printed on pages 3220 and 3221 of Tariff Schedule No. 14, Hearings, etc., and under Schedule J, pages 3512 to 3516, Tariff Schedule No. 16, Hearings, etc., also in the hope of clarifying the following points regarding the tariff on cloth sacks that were left indefinite at the hearings before your committee January 22 to 25, inclusive:
A. Selling methods.
B. Use of cloth sacks by farmers.
C. Comparative manufacturing costs, United States and elsewhere.

#### POINT A.

There is no "trust" or combination of any kind, either for the purchase of raw material or selling of finished product, among the cloth-sack manufacturers of the United States. There is no "water" in the capitalization of this industry. In the distribution of the product there are no middlemen. Ninety-nine per cent of the product is sold by the sack manufacturers direct to consumers.

#### POINT B.

Consumption of new sacks by farmers.

#### COTTON SACKS.

Number produced and sold annually in the United States... 600, 000, 000 Number used directly for sacking agricultural products (or 6,000,000 500, 000, 000

It is clear from the above that there would be no material benefit to the farmer from placing cotton sacks on the free list, even if it were possible to do so without gross injustice to the manufacturers of cotton cloth and sacks.

Estimate of burlap sacks manufactured in United States of America and imported annually, also classification of same as to use.

#### MADE AND IMPORTED.

Burlap sacks manufactured annually in the United States 450,000,000 Burlap sacks imported annually, chiefly from India..... 55,000,000

Total burlap sacks consumed annually in the United 505, 000, 000

#### CLASSIFICATION OF USE.

Factory products:  Bran and other mili stuffs  Fertilizer  Flour (mostly export)  Sugar  Packing-house products  All other factory products	200, 000, 000 50, 900, 000 28, 000, 000 23, 600, 000 10, 000, 000 69, 000, 000
Farm products: Wheat, corn, and oats (domestic sacks) Wheat (foreign sacks) All other farm products (domestic sacks) All other farm products (foreign sacks)	35, 000, 000 50, 000, 000 35, 000, 000

125, 000, 000

380, 000, 000

Total factory and farm products.

505, 000, 000

The following table gives the production in 1912 of the three principal cereal crops of the United States, the rate of protective duty on each under the present law, and the approximate amount of each crop

Crop.	Bushels.	Protected by duty of—	Estimated amount sacked.	Per cent sacked.
Corn	3, 124, 746, 000 730, 267, 000 1, 418, 337, 000	Per bushel. \$0.15 .25 .15	Bushels. 4,000,000 96,000,000 125,000,000	13 '8 _{1%}
Total	5,273,350,000		225,000,000	4, 26

It is clear from this table that over 95 per cent in volume of the three principal cereal crops of the United States is handled without sacking, only 2½ per cent being handled in sacks of domestic manufacture, and 1½ per cent in sacks of foreign manufacture.

Proportionately less of these cereals each year is sacked. It will probably be but a short time before 99 per cent of the three principal cereal crops of the United States is handled in bulk.

Fully 99 per cent of the agricultural products of this country which are handled in sacks (whole grains, seeds, potatoes, nuts, onions, etc.) is dutiable under the present tariff at a rough average of 25 per cent ad valorem.

Inasmuch as only 5 per cent of the agricultural products of the United States is sacked, and inasmuch as those products that are sacked have the benefit of a 25 per cent protective duty, wherein is a reasonable competitive duty on sacks any burden to the producer of agricultural products?

The sack manufacturers of this country should be given the same measure of protection or competitive rates of duty as may be granted any other manufacturers.

POINT C.

#### POINT C.

COMPARATIVE MANUFACTURING COSTS, UNITED STATES AND ELSEWHERE.

There were one or two inaccurate and very general statements made orally at the hearings on January 24 and 25 regarding the cost of manufacturing burlap sacks in this country and the chief competing country, India. Below find a statement of costs, the correctness of which we would be glad to prove if desired:

Actual cost of making in the United States during the past year 89,835,000 plain, unprinted burlap sacks, 55.49 per 1,000.

Average charge by Calcutta mills over the cost of the burlap cloth for making burlap sacks, as per quotations and purchases of June 8, 1910, August 2, 1910, July 18, 1911, and October 24, 1912, \$1.60 per 1,000.

Difference against United States mamufacture, \$3.89 per 1,000

Difference against United States manufacture, \$3.89 per 1,000. This difference equals 0.39 cent per bag. This difference equals approximately 0.52 cent per pound. This difference at lowest market price equals 10 per cent ad valorem

maximum.

This difference at highest market price equals 5-per cent ad valorem minimum.

This difference at average market price equals 7½ per cent ad va-

This difference at average market price equals 7½ per cent ad valorem average.

It is clear from the above that the present differential of about 6 per cent ad valorem, or three-eighths cent per pound specific, is the minimum which would enable the manufacturer in this country to compete with India. Especially would this be true should a comparison be made between the necessarily high labor cost of manufacturing on our Pacific coast, where the manufacturers of this country are at a very much greater disadvantage in competing with India and need a differential of 12 per cent. The figures given above as the cost in the United States are an average between factories operating in several different parts of the country.

#### SUMMARY OF ARGUMENT AND CONCLUSIONS.

The cloth-sack industry of the United States is properly conducted, it as much entitled to fully competitive rates as any other

1. The cloth-sack industry of the United States is properly conducted, and is as much entitled to fully competitive rates as any other 2. Only about 1 per cent of the cotton-cloth sacks is used for sacking the direct products of the farm, and not more than 25 per cent of the burlap sacks.

3. Practically all farm products that are sacked are dutiable, and only 5 per cent of such products is sacked. The present duties on burlaps and burlap sacks are in no sense a burden to the farmer.

4. The present differential between burlaps and burlap sacks is the minimum permissible as figured from the average cost of manufacturing in this country and the cost in foreign countries.

The above data, in our judgment, still further support the rates recommended in the brief of the bag manufacturers' committee, found on pages 3,512 to 3,516, Tariff Schedules No. 16, Hearings, etc. (1 cent per pound on burlaps under par. 352 and 1½ cents per pound on sacks, par. 354), and we further urge your favorable consideration of those recommendations.

Very respectfully submitted.

Albert F. Bemis,

ALBERT F. BEMIS, President Bêmis Bro. Bag Co.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 289, page 86, line 9, after the word "flax," to insert "hemp, or ramie"; in line 10, after the word "flax," to insert "hemp, or ramie"; and in line 12, after the word "section," to strike out "45" and insert "40," so as to make the paragraph read:

289. All pile fabrics, whether or not the pile covers the entire surface, composed of flax, hemp, or ramie, or of which flax, hemp, or ramie is the component material of chief value, and all articles and manufactures made from such fabrics, not specially provided for in this section, 40 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 290, page 86, line 16, after the word "bleached," to strike out "25" and insert "10," so as to make the paragraph read:

290. Bags or sacks made from plain woven fabrics, of single jute yarns, not dyed, colored, stained, painted, printed, or bleached, 10 per cent ad valorem.

Mr. JONES. Mr. President, I desire to offer an amendment to that paragraph.

The VICE PRESIDENT. The amendment will be stated.

The Secretary. On page 86, at the end of line 16, it is proposed to insert:

Provided, That jute grain bags, known commercially as standard Calcutta 22-inch by 22-inch grain bags, shall be admitted free of duty.

Mr. JONES. I desire to call the attention of the Senate to

the situation to which this amendment applies.

The amendment is intended to admit, free, wheat grain bags which are especially used on the Pacific coast. I think possibly the bags described in the amendment are used there alone. The situation is that most of the wheat that we export or ship out of the country raised in California, Idaho, Oregon, and Washington, must be shipped in sacks. Practically all of these sacks are imported from Calcutta. There are from six to seven and a half million made on the coast in two or three factories that are found there and in the various State penitentiaries where they have bag factories. In our State penitentiary we have one that supplies, I think, three or four million of these sacks a year. But in addition to what are produced on the coast we must import from thirty-five to forty or forty-five million of these sacks every year to handle our own crop.

These sacks may be termed simply a vehicle of export because

they are brought into the country for the sole purpose of sacking the wheat and carrying it out. The farmer must buy the When he sells his wheat he simply sells the wheat with the sack, and gets practically nothing for the sack, and it goes out of the country. For the next year's crop he must again import sacks and pay for the sacks, and then they go out carrying his wheat as a vehicle of export. Every dollar of duty placed on such sacks is simply that much of a tax upon the farmer for

exporting his wheat.

In the imports under this item it will be noticed that while there is some variation, they range along practically the same from year to year. For instance, under the Wilson bill, when they were admitted free, we imported over 41,000,000 in number; and I see that in a note here it says these were bags for grain. So that that import represents practically what is covered by the amendment I have offered. In 1905, when they had a duty of seven-eighths of 1 cent a pound, we imported 37,000,000.

Mr. WILLIAMS. They not only had a duty of seven-eighths of a cent a pound, but they had that plus 15 per cent ad

Mr. JONES. Yes; that is true. There was an additional rate. I have found that the production of wheat in the Pacific coast States since 1896 has been practically the same. There has been some variation, a few million bushels, year by year; but the variation has been very much the same as the variation in the In 1910, with the duty the same as it was in 1905, the imports were over 60,000,000. Then, in 1912, the imports went down again to 46,000,000, corresponding very nearly, though not entirely, to the variation in the production of wheat; and I think it will be found, also, varying with the manufacture of these bags in the factories on the coast and in the peni-

Mr. SHIVELY. Mr. President, will the Senator from Washington yield to me?

Mr. JONES. Certainly.

Mr. SHIVELY. Under the Wilson bill, while bags were on the free list, the burlaps of which the bags were made were subjected to a duty. Bags are taxed in the present law. Senator will observe, in this bill the material out of which the bags are made is placed upon the free list.

Mr. JONES. I know; that is true.

Mr. SHIVELY. The duty on the bag has been reduced to 10 per cent, and, of course, on all exports you will have the benefit of the drawback clause.

Mr. JONES. I do not think the drawback applies where the sack is manufactured abroad and brought in here simply to carry out wheat in. It is not brought in and manufactured after it gets in here. The Senator from Massachusetts says that the burlaps were free under the Wilson bill as well as the bags. I am satisfied that we have never received the benefit of any drawback clause on the bags that are imported into this country, and I am satisfied we would not get it under this provision.

Mr. SHIVELY. Will the Senator permit me a moment further?

Mr. JONES. Yes.

Mr. SHIVELY. In section O of the administrative part of the bill there is a provision as follows-Mr. JONES. On what page?

Mr. SHIVELY. Page 268:

That upon the exportation of articles manufactured or produced in the United States by the use of imported merchandise or materials upon which customs duties have been paid, the fuil amount of such duties paid upon the quantity of materials used in the manufacture or production of the exported product shall be refunded as drawback—

Mr. JONES. Yes; but these bags are not manufactured in this country to any extent.

Mr. WILLIAMS. They will be now.

Mr. JONES. I think not.

Mr. WILLIAMS. We will show you.

Mr. JONES. We can not compete with the Calcutta people. I am satisfied of that. With the differential under this bill our people can not compete. Under the Payne-Aldrich law we had a greater differential than you are giving us now be-tween the duty on the burlap and the duty on the sack. The differential is greater than the differential that you allow here; so that we will not be able to manufacture these sacks. can not do it.

Mr. LANE. Mr. President, will the Senator allow me to make a brief statement?

Mr. JONES. Certainly.

Mr. LANE. I should like to say, for the information of the Senator, that a member of the firm who are the largest manufacturers of bags on the Pacific coast called upon me here while this matter was before the Finance Committee for consideration and assured me that if they were allowed the opportunity they could and would make all the bags required for the entire supply of this country.

Mr. JONES. Yes; I met the gentleman, and I also met him when the Payne-Aldrich bill was up. I find that under the differential allowed by that bill he has not been able to increase his product to any considerable extent, if any, at all. So I am satisfied that our people can not produce these bags in competition with the Calcutta people so as to come anywhere near supplying the quantity required. Therefore I say that whatever duty you levy on these bags is simply that much of a tax upon the farmer for exporting his wheat.

You estimate that you will raise \$320,000 revenue under this paragraph. That \$320,000 is simply that much of a tax placed upon a vehicle of export used in exporting the farmer's product. He can not possibly recover it in any way, shape, or form.

Mr. CLARK of Wyoming. Mr. President, will the Senator allow one question?

Mr. JONES. Yes.

Mr. CLARK of Wyoming. These bags, as I understand, are of a peculiar shape—a peculiar construction. They the grain sacks that are used in the Eastern States? They are not like

Mr. JONES. I think not at all. They are of a peculiar character of construction, especially suitable for export.

Mr. CLARK of Wyoming. And used only for the export business?

Mr. JONES. Only for the export business. That is all they are used for.

I offered an amendment to the Payne-Aldrich law when it was up, because it seemed to me there was no principle of protection involved and that as a revenue proposition it ought not to be imposed on the farmer. Of course it was voted down; but I am glad to say that some of my Democratic friends voted for it at that time, who I hope will vote for this amendment at this time. Those who voted for it when the Payne-Aldrich bill WAS PENDING WERE SENATORS BACON, BANKHEAD, CHAMBERLAIN, FLETCHER, FOSTÉR, FRAZIER, GORE, HUGHES, JOHNSTON, OVERMAN, OWEN, SHIVELY, STONE, and TILLMAN.

I really can see no justification for this tariff. I am satisfied that these facts and conditions probably were not called to the attention of the committee or of the members in caucus. But that is the situation. Our farmers must have these bags. They are not produced in our country, and I am satisfied that they will not be produced here. We can not compete with the Calcutta manufacturers of these grain bags. They are absolutely required in the export of our wheat. It does seem to me that an article brought into this country especially to aid us in exporting should not be burdened with a tariff.

I hope the Senator in charge of this schedule will feel disposed to accept this amendment; or, if not entirely satisfied as to what should be done, I should be glad to have him pass it over and have it reconsidered by the committee, in view of the

facts I have presented.

Mr. WILLIAMS. I will say to the Senator that I have no objection, and after consultation with other Senators here we have no objection, to carrying the matter to the committee.

Mr. JONES. Very well. Mr. WILLIAMS. But I wish to say to the Senator, because it ought to be now said, on the record, that he is totally mistaken about the condition under the Payne-Aldrich bill, as he will see if he will examine the differential.

The tax under paragraph 352 of the Payne-Aldrich bill is nine-sixteenths of 1 cent per pound, and added to that 15 per cent ad valorem. Then, coming to section 354, which deals with bags or sacks, the rate of the Payne-Aldrich bill is seven-eighths of 1 cent per pound and 15 per cent ad valorem. The only difference is the difference between seven-eighths and ninesixteenths.

Mr. JONES. I think the Senator will find that that is more than 10 per cent. I will look into that, however; and meanwhile I am glad to have it go to the committee.

Mr. WILLIAMS. It would have to be pretty cheap stuff.

Mr. JONES. It is cheap stuff. It is only 3 or 4 cents a sack. Mr. WILLIAMS. Seven-eighths, of course, is fourteen-sixteenths; the other is nine-sixteenths; and the difference between the two is only five-sixteenths. Now we have made free the cloth out of which these bags are to be made.

Mr. JONES. Yes; I know that.

Mr. WILLIAMS. And we have reduced down to 10 per cent the duty, which under the Payne-Aldrich bill was seven-eighths of a cent per pound plus 15 per cent ad valorem, and which under the bill as it came to us from the House was 25 per cent. We have reduced it by 15 per cent. We came to the conclusion that if there were any people here getting this stuff and making bags and sacks out of it, we wanted to give them some little differential between the cloth and the bag or sack. We thought 10 per cent was a very small one. We thought it was so small, in fact, that if the farmer was particularly industrious he would just get his supply of this stuff and cut it up and make his own bags out of it himself at less than these people would take the cloth and make the bag or sack out of it and let him have it; and we would disturb existing conditions that much less than we otherwise would do, while not granting anything above, really, a rather small revenue tax. The calculation is above, really, a rather small revenue tax. The calculation is that we would get \$320,000 a year for the Treasury out of it. Last year, under the Payne-Aldrich bill, \$\$47,000 was covered into the Treasury from this source.

Mr. JONES. The main argument urged against my amend-

ment when the Payne-Aldrich bill was up was that it would

bring no revenue.

Mr. WILLIAMS. I was going to say that we reduce the revenue half a million; it may be over.

Mr. JONES. I know the Senator has done that.

Mr. WILLIAMS. We reduce it five hundred and fifty-odd thousand dollars. Of course, when it comes to throwing away a little revenue here, and a little revenue there, and a little more in the other place, it carries a small amount in each place; but when you get through with it you have got to make it up

Mr. JONES. That is true, but if the conditions are as I have stated, and I am satisfied they are that way, I know the Senator realizes the injustice of placing a tariff upon the

article.

Mr. WILLIAMS. What I said was in defense of what we have done. But we will take the matter under consideration.

Mr. JONES. I did not intend to criticize the action of the committee because I knew that was the purpose of it, and I applaud that purpose. I will be glad to let the amendment go over that the committee may give it consideration.

Mr. CLARK of Wyoming. What is the cost of the bags? Mr. JONES. The cost of the bags to the farmer himself is 6 and 7 cents and up to 11 and 12 cents a sack.

Mr. CLARK of Wyoming. What is the cost laid down in this country?

Mr. JONES. The cost according to the items here I do not know. They claim that the Calcutta people can lay sacks down at about 7 cents apiece.

Mr. WILLIAMS. Does the Senator want the actual cost as laid down at the port upon which they are appraised?

Mr. CLARK of Wyoming. Yes.
Mr. WILLIAMS. In 1896 it was 3.8 cents; in 1905, 4.7 cents; in 1910, 4.8 cents; and in 1912, 6.3 cents per bag or sack.

Mr. JONES. That is per pound?

Mr. WILLIAMS. That is the average unit. The quantity given in pounds.

Mr. JONES. The quantity is given in pounds, and that is per pound according to my recollection.

Mr. WILLIAMS. It is per pound. I do not know how many pounds it would take to make a sack.

Mr. JONES. I understand that the sacks are imported for about 6 or 7 cents.

Mr. WILLIAMS. That is the price at which they appraise the duty at the port?

Mr. JONES. That is the price they import them at ordinarily; they can do it at that price.

Mr. CLARK of Wyoming. The Government appraises them at so much a pound. Is that the way the farmers buy them? The Calcutta people sell them, I suppose, at so much a hundred.

Mr. JONES. At so much a hundred sacks.

Mr. CLARK of Wyoming. I was trying to get at our real commercial value of the sack itself.

Mr. WILLIAMS. In America?

Mr. CLARK of Wyoming. In America. Mr. WILLIAMS. Not at the port of entry?

Mr. CLARK of Wyoming. Well, at the port of entry.

Mr. WILLIAMS. After the duty was paid?

Mr. CLARK of Wyoming. After the duty was paid.

Mr. WILLIAMS. I misunderstood the Senator. I did not understand that he was trying to get that fact.

Mr. CLARK of Wyoming. I was trying to get at what the farmers pay for the sacks.

Mr. JONES. The amendment will go over, then.

Mr. SIMMONS. And let the Secretary proceed with the read-

The VICE PRESIDENT. Does the Chair understand that the amendment is to be referred back to the committee?

Mr. JONES. The amendment is to be referred to the committee.

The VICE PRESIDENT. The understanding of the Chair is that paragraph 290 goes over, that the amendment of the Senator from Washington will be referred to the committee, and that the committee amendment will be agreed to. Chair hears no objection, and it is agreed to.

The reading of the bill was continued.

The next amendment of the committee was, in paragraph 292, page 86, line 25, before the word "fabrics," to strike out "Plain woven" and insert "Woven"; and on page 87, line 2, after the word "cloth," to strike out "35" and insert "30," so as to make the paragraph read:

292. Woven fabrics, not including articles, finished or unfinished, of flax, hemp, or ramie, or of which these substances or any of them is the component material of chief value, including such as is known as shirting cloth, 30 per cent ad valorem.

The amendment was agreed to.

The amendment was agreed to.

The next amendment was, in paragraph 293, page 87, line 4, before the word "woven," to strike out "All" and insert "Damasks and all"; in line 6, before the word "which," to strike out "of" and insert "into"; in the same line, after "which," to insert "two or more of"; in line 7, after the word "substances," to strike out "or any of them, is the component material of chief value" and insert "enter"; in line 8, after the word "section," to strike out "40" and insert "35"; and in line 9, after the words "ad valorem," to insert "woven figured upholstery goods, of which the component mat-"woven figured upholstery goods, of which the component material of chief value is flax, hemp, or ramie, 35 per cent ad valorem," so as to make the paragraph read:

293. Damasks and all woven articles, finished or unfinished, and all manufactures of flax, hemp, ramie, or other vegetable fiber, or into which two or more of these substances enter, not specially provided for in this section, 35 per cent ad valorem; woven figured upholstery goods, of which the component material of chief value is flax, hemp, or ramie, 35 per cent ad valorem.

The amendment was agreed to.

The next paragraph was read, as follows:

294. Istle or Tampico, when dressed, dyed, or combed, 20 per cent ad

Mr. NELSON. I desire to call the attention of the Senator who has this matter in charge to paragraph 423, page 130.

You have put there on the free list all binding twine manufactured from New Zealand hemp, manila, istle or Tampico fiber, sisal grass, or sunn, or a mixture of any two or more of them, and so forth. Here in paragraph 294 you tax the principal one of these ingredients, the one that comes nearest to sisal grass. You put a 20 per cent duty on it when it is dressed or combed. Of course it has got to be dressed or combed before it is made into twine, and you put a burden on the binding twine by putting on it this ad valorem rate of 20 per cent.

I call your attention to it. If you mean to give the farmers free binding twine you certainly ought not to impose this duty on istle or Tampico. If you turn to paragraph 423 on the free list, you will find that it is one of the items that goes to make binding twine. It is the fiber which is produced in Central America, and it is said to be fully as good as sisal grass. I suggest to the committee, if you aim to give the farmer free binding twine you certainly ought not to tax his raw material 20 per cent ad valorem.

Mr. WILLIAMS. Does the Senator think that binding twine

is made of this istle after it is dressed and dyad?

Mr. NELSON. I do not think it is made after it is dyed, but of course it has got to be dressed or combed before it can be spun into twine. The first process is dressing it or combing it before you finish the twine. It would be all right if you limit it to dyed. It is not dyed in twine. It is the words "dressed or combed" to which I refer. You ought not to put a tax of 20 per cent ad valorem on it because it is one of the elements of which binding twine is made. If you intend to give the farmer any benefit of that material, you ought to eliminate the tax.

Mr. WILLIAMS. Paragraph 294 is identical-

The VICE PRESIDENT. Does the Senator from Minnesota yield?

Mr. NELSON. Certainly; I abandon the floor.

Mr. WILLIAMS. I beg pardon; I thought the Senator asked me a question.

Mr. NELSON. Certainly; I will answer the question.
Mr. WILLIAMS. No; I thought the Senator asked me a question.

Mr. NELSON. No; I simply said to the Senator from Mississippi, or whoever has the schedule in charge, if you intend to give the farmers free binding twine in good faith and give them the full benefit, you ought not to put a tax of 20 per cent ad valorem on one of the main raw materials, so to speak, that enter into the binding twine.

Mr. PAGE. Mr. President-

Mr. WILLIAMS. If the Senator from Vermont will pardon me, will the Senator from Minnesota permit an interruption for a moment?

Mr. NELSON. Certainly.

Mr. PAGE. Will the Senator from Mississippi allow me just a word?

Mr. WILLIAMS. Yes, sir.

Mr. PAGE. The Senator from Minnesota will find, I believe, that the farmers are not materially injured if they have the istle in the raw state. Istle in the condition in which we receive it under this paragraph of the bill is something that enters into the manufacture of brushes.

I want to say that one of the leading industries of the little city of Burlington, in my State, is one which prepares istle for brushes. This matter was thrashed out very thoroughly four years ago on the Payne-Aldrich bill, and it was thought by giving 20 per cent on that which had been combed you would protect that industry, whereas if you take it in free in the raw you will give the farmer practically all he needs.

Mr. NELSON. But before it can be used in binding twine, it has to be dressed and combed. That is the first process.

Mr. PAGE. But that can be done in this country without my difficulty. We can dress it and comb it here. On the other any difficulty. hand, if you permit it to be brought in, as I think the leading manufacturers of brushes and combs are in Belgium, they will send it in and compete with our people here who prepare the raw material for brushes.

I hope the Senator from Minnesota, before he attacks an industry which is so important to Vermont, will look up and see if it is not fully protected when he gets the material in the rough for the farmers' purpose.

Mr. NELSON. Mr. President, I am not attacking the industry, nor do I offer any amendment. I simply say to the Senators on the other side who have the bill in charge, that if they intend to give the farmers the full benefit of free binding twine there ought not to be any tax on this fiber. That is my view of it. I shall offer no amendment and make no obstruction or cause delay. I simply make it by way of suggestion to the other side.

Mr. WILLIAMS. Mr. President, this is one of the few things in which we have adopted bodily the language of the Payne-Aldrich bill. The House adopted it.

Mr. NELSON. If the Senator will allow me, I will say I have no doubt it is oftentimes dangerous to adopt the language

Mr. WILLIAMS. There is no doubt about that; but if the Senator had listened to me for a moment, he would have found out why I made that remark and then his remark would have been unnecessary. This is one of the few particulars in which we adopted the language of the Payne-Aldrich bill in both paragraphs. The Payne-Aldrich law puts upon the free list-

All binding twine manufactured from New Zealand hemp, manila, istle or Tampico fiber, sisal grass, or sunn, or a mixture of any two or more of them, of single ply and measuring not exceeding 600 feet to the pound.

Then paragraph 359 of the Payne-Aldrich bill reads:

Istle or Tampico, when dressed, dyed, or combed, 20 per cent ad

Now, notwithstanding the fact that this seeming incongruity to which the Senator calls attention existed in that bill, it never interfered in the slightest degree with the free admission of binding twine, and therefore it will not interfere in the future.

The Secretary continued the reading of the bill, as follows:

Schedule K. Wool and manufactures of

Mr. SIMMONS. I will ask that Schedule K be passed over this afternoon and that we take up Schedule L.

There are Senators who desire to be here when Schedule K is taken up and who are temporarily absent from the Chamber at this time.

The VICE PRESIDENT. Schedule L will be proceeded with.

The Secretary resumed the reading of the bill at page 91, line 24.

The next amendment of the Committee on Finance was, in Schedule L, silks and silk goods, paragraph 319, page 92, line 2, after the word "length," to strike out "15 per cent ad valorem" and insert "30 cents per pound," so as to make the paragraph read:

319. Silk partially manufactured from cocoons or from waste silk and not further advanced or manufactured than carded or combed silk, and silk noils exceeding 2 inches in length, 30 cents per pound.

The amendment was agreed to.

The next amendment was, on page 92; to strike out paragraph 320, as follows:

320. Spun silk or schappe silk yarn, 35 per cent ad valorem.

And to insert the following:

And to insert the following:

320. Spun silk or schappe silk yarn valued at not exceeding \$1 per pound, whether single, two, or more ply, 30 cents per pound; if valued at exceeding \$1 per pound, in the gray, if in singles, on all numbers up to and including No. 215, 45 cents per pound, and in addition thereto ten one-hundredths of 1 cent per number per pound; exceeding No. 215, 45 cents per pound, and in addition thereto fifteen one-hundredths of 1 cent per number per pound; in the gray, if two or more ply, on all numbers up to and including No. 215, 50 cents per pound, and in addition thereto ten one-hundredths of 1 cent per number per pound; exceeding No. 215, 50 cents per pound, and in addition thereto fifteen one-hundredths of 1 cent per number per pound. The rates of duty on the foregoing yarns when colored, bleached, or dyed, shall be 10 cents per pound in addition to the rates herein provided for the respective yarns in their gray, or undyed state. When the foregoing gray, colored, bleached, or dyed yarns are on bobbins, cones, spools, or beams the rates of duty shall be 10 cents per pound in addition to the rates otherwise citargeable thereon. In assessing duty on all spun silk or schappe silk yarn, the number indicating the size of the yarn shall be taken according to the metric or French system, and shall in all cases refer to the size of the singles: Provided, That in no case shall the duty be assessed on a less number of yards than is marked on the skeins, bobbins, cones, cops, spools, or beams. But in no case shall any of the goods enumerated in this paragraph pay a less rate of duty than 35 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 93, to strike out paragraph 321. as follows:

321. Thrown silk not more advanced than singles, tram, or organzine, sewing silk, twist, floss, and silk threads or yarns of every description made from raw silk, 15 per cent ad valorem.

And to insert in lieu thereof the following:

And to insert in fieu thereof the following:

321. Thrown silk in the gum, in skeins, on bobbins, spools, cops, or
otherwise, if singles, 35 cents per pound; if tram, 55 cents per pound;
if organzine, 75 cents per pound; and if ungummed, wholly or in part,
or if further advanced by any process of manufacture, in addition to
the rates herein provided, 35 cents per pound. Sewing silk, twist, floss,
and silk threads or yarns of any description made from raw silk, not
specially provided for in this section, if in the gam, 75 cents per
pound; if ungummed, wholly or in part, or if further advanced by any
process of manufacture, \$1.05 per pound: Provided, That in no case
shall a duty be assessed on a less number of yards than is marked on
the skeins, bobbins, cops, spools, or beams.

The amendment was agreed to.

The Secretary. The next amendment of the committee is, on page 94, to strike out paragraph 322, in the following words:

322. Velvets, plushes, chenilles, velvet or plush ribbons, or other pile fabrics, composed of silk or of which silk is the component material of chief value, 50 per cent ad valorem.

And to insert in lieu thereof the following:

322. Velvets, chenilles, or other pile fabrics, not specially provided for in this section, cut or uncut, composed wholly or in chief value of silk, weighing not less than 5\frac{3}{2} ounces per square yard, \$1.25 per pound; weighing less than 5\frac{3}{2} ounces per square yard, but not less than 4 ounces, or if all the filling is not cotton, \$2.50 per pound; if all the filling is of cotton, \$1.75 per pound; all the foregoing weighing less than 4 ounces per square yard, \$3.25 per pound.

Mr. SMOOT. I merely wish to ask the Senator a question in relation to this paragraph. Why was it that the rate was reduced from \$1.50 a yard to \$1.25, and from \$2.75 to \$2.50 on items just read?

Mr. HUGHES. We tried to change the specific rate as nearly as possible to the ad valorem rate.

Mr. SMOOT. No; the present law provides specific rates on velvet chenilles and other items mentioned.

Mr. HUGHES. The House suggestion was an ad valorem

rate, and we were trying to avoid the suggestion that there was an attempt to raise the rate by means of a specific duty.

We brought it down to the House suggested rate.

Then I am a little wrong, because the way I Mr. SMOOT. figured it the House ad valorem rates were about the same as the present specific rates. In some cases they were just a little under and in some cases just a little over. Seeing that the balance of the items carry about the same rates as the present law, I wondered why the change should be made in those mentioned.

Mr. HUGHES. I did not make the mathematical calculation myself, but turned it over to a gentleman who has more skill than I have in that direction and I asked him to change the House ad valorems into specific rates. After he was through I went over it and satisfied myself that it was done correctly so far as my ability could check it up was concerned.

Mr. SMOOT. I am not objecting to the rate. That was not the question. What I wanted to know was why those items were treated somewhat different from the others. Of course the Senator's explanation is satisfactory to me. I merely wanted to know why it was done.

The Secretary resumed the reading of the committee amendment, in paragraph 322, beginning in line 11, page 94, and read as follows:

Plushes, cut or uncut, composed wholly or in chief value of silk, weighing not less than 9½ ounces per square yard, \$1 per pound; weighing less than 9½ ounces, \$2 per pound. Measurements to ascertain the widths of goods for determining weight per square yard of the foregoing articles shall not include the selvedges, but the duty shall be levied upon the total weight of goods including the selvedges. The distinction between plushes and velvets shall be determined by the length of the pile; those having pile exceeding one-seventh of 1 inch in length to be taken as plushes; those having pile one-seventh of 1 inch or less in length shall be taken as velvets. The distance from the end of the pile to the bottom of the first binding pick shall be considered as the length of the pile. But in no case shall any goods enumerated in this paragraph, including such as have india rubber as a component material, pay a less rate than 50 per cent ad valorem.

Mr. SMOOT. Mr. President that is a new provision in the

Mr. SMOOT. Mr. President, that is a new provision in the law. Does the Senator from New Jersey think that that would conflict with the cotton schedule and the hemp schedule, wherein provision is made for cotton and hemp goods which may contain silk or india rubber? I wil! not ask the Senator to answer that offhand now; he can do so subsequently.

Mr. GALLINGER. I suggest that it would be better to read the amendment through, and then any questions may be raised as to the amendment.

The Secretary resumed and concluded the reading of the amendment, as follows:

Velvet or plush ribbons, or other pile fabrics, not over 12 inches, and not less than three-fourths of 1 inch in width, cut or uncut, of which silk is the component material of chief value, not specially provided for in this section, containing no silk except that in the pile and selvedges, if black \$1.50 per pound, if other than black \$1.65 per pound; if containing silk other than that in the pile and selvedges, if black \$1.75 per pound, if other than black \$2.25 per pound; for each one-fourth of 1 inch or fraction thereof, less than three-fourths of 1 inch in width, there shall be paid in addition to the above rates 35 cents per pound. But in no case shall any of the foregoing pay a less rate of duty than 50 per cent ad valorem.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The next amendment was, in paragraph 323, page 95, line 18, before the word "silk," to insert "woven"; and in line 19, after the word "only," to strike out "40" and insert "45," so as to make the paragraph read:

323. Handkerchiefs or mufflers composed wholly or in chief value of woven silk, finished or unfinished; if cut, not hemmed or hemmed only, 45 per cent ad valorem; if hemstitched or imitation hemstitched, or

revered, or having drawn threads, but not embroidered in any manner with an initial letter, monogram, or otherwise, 50 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 324, page 96, line 3, after the word "manner," to strike out "40" and insert "45," so as to make the paragraph read:

324. Ribbons, bandings, including hatbands, beltings, bindings, all of the foregoing not exceeding 12 inches in width and if with fast edges, bone casings, braces, cords, cords and tassels, garters, suspenders, tubings, and webs and webbings; all the foregoing made of silk or of which silk or silk and india rubber are the component materials of chief value, if not embroidered in any manner, 45 per cent ad valorem.

The amendment was agreed to.

The Secretary read paragraph 325, as follows:

325. Clothing, ready-made, and articles of wearing apparel of every description, including knit goods, made up or manufactured in whole or in part by the tailor, seamstress, or manufacturer; all the foregoing composed of silk or of which silk or silk and india rubber are the component materials of chief value, not specially provided for in this section, 50 per cent ad valorem.

Mr. BRISTOW. Mr. President, I desire to inquire if paragraph 325, referring to "clothing, ready-made, and articles of wearing apparel of every description," covers exclusively goods made of silk?

Mr. HUGHES. The Senator will notice that the paragraph provides in line 8:

All the foregoing composed of silk or of which silk or silk and india rubber are the component materials of chief value.

That, of course, confines it to silk goods or to goods of which silk or silk and india rubber are the materials of chief value.

Mr. BRISTOW. Will the Senator please state just what articles of wearing apparel would be covered by the paragraph? Mr. HUGHES. It refers to high priced and expensive silk dresses and silk garments of all kinds, which are imported in great quantities into this country. It would also cover silk underwear; but I think it will be found—I have often thought

I would like to investigate as to that—that the imports under this bill will be largely Worth dresses and articles of that kind.

Mr. BRISTOW. The language is:

All the foregoing composed of silk or of which silk or silk and india rubber are the component materials of chief value, not specially pro-vided for in this section.

Mr. HUGHES. That, of course, applies to fancy silk raincoats and articles of that kind.

Mr. BRISTOW. If it only refers to expensive and luxurious

garments, I have no objection to it.

Mr. HUGHES. That, of course, is what it does refer to, and that is the object in leaving the rate of duty as high as it is, so that we can obtain revenue. We can obtain more revenue, I think, by raising the duty on these articles than by lowering it.

The reading of the bill was resumed, and paragraph 326 was read, as follows:

326. Woven fabrics, in the piece or otherwise, of which silk is the component material of chief value, and all manufactures of silk, or of which silk or silk and india rubber are the component materials of chief value, not specially provided for in this section, 45 per cent ad

Mr. SMOOT. Mr. President, I ask the Senator from New Jersey to allow that paragraph to go over. I will state to the Senator that my intention is to offer an amendment to the paragraph providing specific rates of duty, instead of ad valorem rates on the broad silks.

Mr. HUGHES. Very well.
Mr. SIMMONS. I will say that I stated to the Senator before we took up the schedule that that paragraph might go over.

The VICE PRESIDENT. Paragraph 326 will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 327, page 96, line 19, after the word "made," to strike out "35" and insert "25," so as to make the paragraph read:

read:

327. Yarns, threads, filaments of artificial or imitation silk, or of artificial or imitation horsehair, by whatever name known, and by whatever process made, 25 per cent ad valorem; beltings, cords, tassels, ribbons, or other articles or fabrics composed wholly or in chief value of yarns, threads, filaments, or fibers of artificial or imitation silk, or of artificial or imitation horsehair, or of yarns, threads, filaments, or fibers of artificial or imitation silk, or of artificial or imitation horsehair and india rubber, by whatever name known, and by whatever process made, 60 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 97, after line 2, to insert a new paragraph, as follows:

3274. In ascertaining the weight or the number indicating the size of silk under the provisions of this section, either in the threads, yarns, or fabrics, the weight or the number shall be taken in the condition in which found in the goods, without deductions therefrom for any dye, coloring matter, moisture, or other foreign substance or material.

The amendment was agreed to.

Mr. SIMMONS. Mr. President, that completes the silk schedule, and we may now go on with Schedule M.

The reading of the bill was resumed at Schedule M-Papers

and books.

The next amendment of the Committee on Finance was, in paragraph 328, page 97, after the word "paper," to insert "pulpboard in rolls, not laminated," so as to make the paragraph read:

328. Sheathing paper, pulpboard in rolls, not laminated, and roofing felt, 5 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 330, page 98, line 6, before the word "export," to strike out "such" and insert "the highest"; and in line 8, after the word "upon," to insert "either," so as to make the paragraph read:

"either," so as to make the paragraph read:

330. Printing paper (other than paper commercially known as handmade or machine handmade paper, ispan paper, and imitation iapan paper by whatever name known), unsized, sized, or glued, suitable for the printing of books and newspapers, but not for covers or bindings, not specially provided for in this section, valued above 2½ cents per pound. 12 per cent ad valorem: Provided, however, That if any country, dependency, province, or other subdivision of government shall impose any export duty, export license fee, or other charge of any kind whatsoever (whether in the form of additional charge or license fee or otherwise) upon printing paper, wood pulp, or wood for use in the manufacture of wood pulp, there shall be imposed upon printing paper, valued above 2½ cents per pound, when imported either directly or indirectly from such country, dependency, province, or other subdivision of government, an additional duty equal to the amount of the highest export duty or other subdivision of government, upon either printing paper, or upon an amount of wood pulp, or wood for use in the manufacture of wood pulp necessary to manufacture such printing paper.

The amendment was agreed to.

The amendment was agreed to.

Mr. LODGE. Mr. President, this paragraph is connected with the provisions in the free list and with the retaliatory or countervailing duties concerning which I desire to say something to the Senate.

I do not desire to delay the progress of the bill, but I want to feel that the paragraph is open to further discussion, for I did not expect that the paper schedule would be taken up to-night. I ask that the paragraph go over for the present.

Mr. HUGHES. I am perfectly willing to have it go over. I myself did not expect the paper schedule to come up. We only desire to get through with as much of the bill as we can.

Mr. LODGE. I did not expect the paper schedule to come up to-day, or I should have brought my papers with me and been prepared to go on.

Mr. HUGHES. I thought we might as well use the half hour

remaining by going ahead with such items as we may.

Mr. GALLINGER. Mr. President, we have made unusual progress to-day, and no one anticipated that the paper schedule would come up. I think the schedule ought to go over.

Mr. HUGHES. I am perfectly satisfied to have an

I am perfectly satisfied to have any paragraph go over, but I thought we might as well use the remaining half hour.

There are a number of paragraphs in the Mr. LODGE.

paper schedule which will require more or less debate.

Mr. SIMMONS. I think we can agree, if any Senator desires a paragraph to go over until to-morrow, that it may go over. Of course we have taken up this schedule unexpectedly.

Mr. SMOOT. I will say to the Senator that I have sent word to one or two Senators who are deeply interested in this schedule, but who are absent from the Chamber. I do not know exactly which paragraphs they wish to debate; but I do know that they want to be here at the time the schedule is being considered.

Mr. SIMMONS. We may return to any paragraph that Senators desire to return to in order that they may have an oppor-

tunity to offer amendments.

Mr. GALLINGER. Mr. President, the Senator from North Carolina knows that some of us on this side have been expediting the consideration of the bill as much as possible to-day, and would not the Senator agree to an adjournment at this hour? There are quite a number of Senators absent.

Mr. SIMMONS. Yes; if the Senator asks it, under the cir-

cumstances I can not resist him.

Mr. GALLINGER. I will make that request.

Mr. SIMMONS. We have done very well to-day. Mr. GALLINGER. I will make that request, Mr. President, and am glad that the Senator will agree to it.

Mr. SIMMONS. As I have said, we have done very well to-day, in view of the fact that we devoted about three hours to general discussion. I understand there is a desire to have a short executive session, I will say to the Senator.

In view of the importance of Senators knowing exactly what schedules we are going to take up, and to avoid any misunder-

standing as to what schedule we will go on with to-morrow, in view of the fact that we started on the paper schedule this afternoon, I desire to announce that I shall ask the Senate in the morning to take up the wool schedule.

DESERT-LAND ENTRIES, WASHINGTON.

Mr. JONES. Mr. President, before the Senate proceeds to the consideration of executive business I should like to ask unanimous consent for the consideration of a bill on the calendar, which will take, I think, but two or three minutes and will involve no debate. It is purely of local application, and has been reported by the Committee on Public Lands. unanimous consent for the present consideration of Senate bill 1673.

The VICE PRESIDENT. The Senator from Washington asks unanimous consent for the present consideration of a bill,

the title of which will be stated.

The Secretary. A bill (S. 1673) authorizing the Secretary of the Interior to grant further extensions of time within which to make proof on desert-land entries in the county of Grant, State of Washington.

The VICE PRESIDENT. Is there objection to the present

consideration of the bill?

There being no objection, the Senate, as in Committee of

the Whole, proceeded to consider the bill.

Mr. JONES. There was one amendment which was adopted in the committee, but apparently was left out by mistake in making the report. After the words "required to," in line 6, I move to insert the words "comply with the law and."

Mr. SMITH of Georgia. By what committee was the bill

considered?

Mr. JONES. By the Committee on Public Lands.

Mr. SMITH of Georgia. Was there a unanimous report in favor of the measure?

Mr. JONES. Yes.

Mr. SMOOT. There was a unanimous report, I will say to the Senator.

Mr. WALSH. Will the Senator from Washington make a brief statement as to why this bill should be passed, applying,

as it does, to a single county?

Mr. JONES. The matter was brought to my attention by some of the people who would be affected by the measure, who had made entries under an irrigation project which had failed, and by reason of the failure they were unable to make their proofs. Personally I am in favor of general legislation, and in the last Congress a general bill was introduced covering situations of that kind; but in another body it was insisted that such legislation should be made to apply to a particular locality. Apparently they did not desire to pass general legislation. So the bill has been put in this shape. While it was suggested by the Secretary of the Interior that general legislation should be passed, the committee thought it best to report the bill for this particular locality. Personally, as I have said, I should like to see the enactment of general legislation on the subject.

Mr. SHAFROTH. What is the nature of the bill?

Mr. JONES. It grants an extension of time for making desert-land proof in Grant County, Wash.

Mr. SMOOT. If I am not mistaken, the department sug-

gested general legislation.

Mr. JONES. The department did suggest general legislation. After the words "required to," in line 6, I move to insert the words "comply with the law and."

The VICE PRESIDENT. The amendment will be stated.

The Secretary. On page 1, line 6, after the words "required to," it is proposed to insert the words "comply with the law and."

The amendment was agreed to.

Mr. JONES. In line 5 I move to strike out the word "county" and to insert "counties," and after the word "Grant" to insert the words "and Franklin," which will make it apply to an adjoining county where similar conditions exist. mitted that amendment to the chairman of the Committee on Public Lands, and he said that would be satisfactory.

The VICE PRESIDENT. The amendment will be stated. The Secretary. On page 1, line 5, before the words "of Grant," it is proposed to strike out "county" and insert "counties," and in the same line, after the name "Grant," to insert

and Franklin," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior may, in his discretion, grant to any entryman under the desert-land laws in the countles of Grant and Franklin, in the State of Washington, a further extension of time within which he is required to comply with the law and make final proof: Provided, That such entryman shall, by his corroborated affidavit, filed in the land office of the district where such land is located, show to the satisfaction of the Secretary that because of unavoldable delay in the construction and operation of irrigation

works intended to convey water to the land embraced in his entry he is, without fault on his part, unable to make proof of the reclamation and cultivation of said lands, as required by law, within the time limited therefor but such extension shall not be granted for a period of more than three years, and this act shall not affect contests initiated for a valid existing reason.

The amendment was agreed to.

Mr. SMITH of Georgia. I understand the only effect of this bill will be to give certain claimants a longer time in which to

perfect their claims and get their patents.

Mr. JONES. If they make a satisfactory showing to the Secretary of the Interior.

Mr. SMITH of Georgia. If they make a satisfactory showing. Mr. SHAFROTH. How much longer does it grant them?

Mr. JONES. Three years.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading,

read the third time, and passed.

On motion of Mr. Jones, the title was amended so as to read: "A bill authorizing the Secretary of the Interior to grant further extensions of time within which to make proof on desert-land entries in the counties of Grant and Franklin, State of Washington."

#### HOMESTEAD ENTRIES FOR MINORS.

Mr. STERLING. Mr. President, since it is yet some minutes of 6 o'clock, I wonder if I may not call the attention of Sena-tors to Senate bill No. 2419? I do so, and ask for its immediate

The VICE PRESIDENT. The Senator from South Dakota asks unanimous consent for the present consideration of a bill

the title of which will be stated.

The Secretary. A bill (S. 2419) permitting male minors of the age of 18 years or over to make homestead entry or other entry of the public lands of the United States.

The Senate, by unanimous consent, proceeded to consider the bill, which had been reported from the Committee on Public Lands with amendments, in section 1, page 1, line 6, before the word "minor," to strike out "male," and on page 2, line 4, after the word "he," to insert "or she," so as to make the section read:

That in all cases wherein persons of the age of 21 years or over are now permitted to make homestead entry or other entry of lands under the public-land laws of the United States any minor of the age of 18 years or over and otherwise qualified under such laws shall be permitted to make such entry, subject to all the provisions of such laws in regard to residence upon and improvement and cultivation of such lands: Provided, however, That no minor shall be eligible to make final homestead proof and receive a homestead patent for any such lands until at least 14 months after having attained the age of 21 years, nor eligible to make final proof or receive patent on other than a homestead entry until he or she has attained the age of 21 years.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read

the third time, and passed.

The title was amended so as to read: "A bill permitting minors of the age of 18 years or over to make homestead entry or other entry of the public lands of the United States."

#### EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After eight minutes spent in executive session the doors were reopened, and (at 5 o'clock and 53 minutes p. m.) the Senate adjourned until to-morrow, Friday, August 22, 1913, at 11 o'clock a. m.

## NOMINATIONS.

Executive nominations received by the Senate August 21, 1913.

#### UNITED STATES ATTORNEY.

Edwin Lowry Humes, of Pennsylvania, to be United States attorney for the western district of Pennsylvania, vice John H. Jordan, whose term has expired.

# REGISTER OF THE LAND OFFICE.

A. F. Browns, of Sterling, Colo., to be register of the land office at Sterling, vice William H. Pound, term expired.

# PROMOTION IN THE ARMY.

## QUARTERMASTER CORPS.

Maj. Herbert M. Lord, Quartermaster Corps, to be lieutenant colonel from March 4, 1913, vice Lieut. Col. Beecher B. Ray, whose recess appointment expired by constitutional limitation March 3, 1913.

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Passed Asst. Surg. Charles C. Grieve to be a surgeon in the

Navy from the 22d day of January, 1913.

The following-named citizens to be assistant surgeons in the Medical Reserve Corps of the Navy from the 13th day of August, 1913:

Guthrie McConnell, a citizen of Pennsylvania, and

Howard A. Tribou, a citizen of Maine.

Carpenter Joel A. Davis to be a chief carpenter in the Navy from the 19th day of April, 1913.

#### CONFIRMATIONS.

Executive nominations confirmed by the Senate August 21, 1913. GOVERNOR GENERAL OF THE PHILIPPINE ISLANDS.

Francis Burton Harrison to be Governor General of the Philippine Islands.

POSTMASTERS.

NEBRASKA.

Andrew B. Anderson, Florence. J. E. Scott, Osmond. Orren Slote, Litchfield. Rainard B. Wahlquist, Hastings. NORTH DAKOTA.

Frank J. Callahan, McClusky. Andrew D. Cochrane, York. James J. Dougherty, Park River. P. J. Filbin, Steele. Charles E. Harding, Churchs Ferry. Carl Jahnke, New Salem. Robert A. Long, Drayton. J. H. McLean, Hannah. W. T. Reilly, Milton.

RHODE ISLAND.

Thomas H. Galvin, East Greenwich.

## SENATE.

# FRIDAY, August 22, 1913.

The Senate met at 11 o'clock a. m. Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved. GOODS IN BOND (S. DOC. NO. 166).

The VICE PRESIDENT laid before the Senate the following communication, which was read:

TREASURY DEPARTMENT, Washington, August 21, 1913.

The PRESIDENT OF THE UNITED STATES SENATE.

Sin: In compliance with a resolution of the Senate of the 1st instant, requesting for the use of the Senate certain information relative to goods remaining in warehouse without the payment of duty August 1, 1912, and August 1, 1913. I have the honor to advise you that the values and duties requested are as follows:

 Value of merchandlse in warehouse Aug. 1, 1912.
 \$71, 561, 698

 Duty on same under present tariff.
 40, 767, 828

 Value of merchandlse in warehouse Aug. 1, 1913.
 104, 576, 937

 Duty on same under present tariff.
 58, 256, 272

 Estimated duty under H. R. 3321 on merchandlse in warehouse Aug. 1, 1913.
 48, 499, 214

Respectfully.

JOHN SKELTON WILLIAMS, Acting Secretary.

The VICE PRESIDENT. The communication is in response to a resolution introduced by the Senator from Utah [Mr. SUTHERLAND]. What does the Senator desire to have done with the communication?

Mr. SUTHERLAND. I suggest that it be printed and lie on

The VICE PRESIDENT. The communication will be printed and lie on the table.

#### BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES: A bill (S. 3021) granting an increase of pension to Christina Nicholes; to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 3022) to remove the charge of desertion against Edward Burke; to the Committee on Military Affairs.

## AMENDMENTS TO THE TARIFF BILL.

Mr. PENROSE submitted an amendment intended to be proposed by him to the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes, which was ordered to lie on the table and be printed.

Mr. LA FOLLETTE submitted an amendment intended to be proposed by him to the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes, which was ordered to lie on the table and be printed.

THE TARIFF AND THE WOOLEN INDUSTRY (S. DOC. NO. 167).

Mr. PENROSE. I should like to make a request for the Mr. PENROSE. I should like to make a request for the printing as a document of an article relating to the tariff bill. I have here an article headed "The tariff and the woolen industry," by Prof. Thomas Walker, Page, professor in the University of Virginia, originally printed in the Quarterly Bulletin of the National Association of Wool Manufacturers for June, 1913. This gentleman was a member of the Tariff Board, the Democratic member. A similar production of his relating to the duty on wool was printed as a House document, and I thought this companion article would be of interest to the Senate. It is short. [After a pause.] At the request of the Senator from North Carolina [Mr. Simmons] I will suspend my request until he has had a chance to examine the article.

Mr. THOMAS. I should like to inquire of the Senator from Pennsylvania if the article by Mr. Page already printed is the same as that published in the April number of the North American Review?

Mr. PENROSE.
American Review?
THOMAS. "Our wool duties." Mr. PENROSE. What is the title of the article in the North

Mr. PENROSE. That article, I understand, was printed by order of the House as a public document. This article refers to the duties on the manufactures of wool.

Mr. THOMAS. My question had reference to the document

document.

Mr. PENROSE. This article has not been printed.

The VICE PRESIDENT. At the request of the Senator from Pennsylvania, the matter will lie over for the present.

Mr. PENROSE subsequently said: Mr. President, this morning I asked for the printing as a document of an article by Prof. Thomas Walker Page, entitled "The tariff and the woolen At the request of the chairman of the Finance Committee I delayed the request until he had an opportunity to examine the article, which he has done. He informs me that while he can not agree with the contents of it, he will not object to its publication. Therefore I renew my request.

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). Does the Senator desire the article read?

Mr. PENROSE. No; I do not desire it read. I desire to have it printed as a document. I wish to advise the Senate that this gentleman was the Democratic member of the Tariff Board and is now connected with the University of Virginia. He went through all the study of the wool, cotton, and other sched-He wrote a similar article on the duty on wool, which was published as a House document. It seemed only proper to me that this article should also be published as an accompanying

I suppose the reason the Senator from North Carolina does not concur in the views of the professor is that while he was supposed to be a minority member of the board, the evidence which he saw as the result of his elaborate investigations almost persuaded him that a duty on woolen manufactures was neces-

sary.

The PRESIDING OFFICER. Without objection, the article will be printed as a public document.

ARTICLE BY HON. ELIHU ROOT (S. DOC. NO. 168).

Mr. BRANDEGEE. I ask to have printed as a public document an article by Hon. ELIHU Root published in the current issues of the North American Review for the months of July and August, 1913, on "Experiments in Government and the Essentials of the Constitution."

The VICE PRESIDENT. Without objection, it is so ordered.

THE TARIFF.

The VICE PRESIDENT. The morning business is closed. Mr. SIMMONS. I ask unanimous consent that the Senate proceed with the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government,

and for other purposes.

Mr. WARREN. Mr. President—

Mr. LODGE. Mr. President, I suggest the absence of a

quorum. The VICE PRESIDENT. The Secretary will call the roll.

Ashurst Baron Bankhead

Borah Brady Brandegee Bristow

Catron Chamberlain Chilton

Clapp Colt Falt Falt Fletcher Gallinger Gronna James Jones Kenyon Kern La Follette Lane Lea	Lewis Lippitt Lodge McLean Martin, Va. Martine, N. J. Norris O'Gorman Page Penrose Perkins Pittman Pomerene	Ransdell Robinson Shafroth Sheppard Sherman Shields Shively Simmons Smith, Ariz. Smith, Ga. Smith, S. C. Smoot Sterling	Stone Sutherland Swanson Thomas Thompson Tillman Townsend Vardaman Walsh Warren Weeks Williams
---------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------

Mr. JAMES. My colleague [Mr. Bradley] is detained from presence here by reason of illness. He has a general pair with the Senator from Indiana [Mr. Kern]. I will allow this announcement to stand for the day.

Mr. SHEPPARD. My colleague [Mr. Culberson] is necessarily absent. He is paired with the Senator from Delaware [Mr. DU PONT]. This announcement will stand for the day.

The VICE PRESIDENT. Sixty-three Senators have an-

swered to the roll call. There is a quorum present.

Mr. WARREN. Mr. President, a few days ago I wandered over to the other side of this Chamber to make a friendly call on a distinguished old-time friend of mine, a Democratic Sena-Hearing that he intended to address the Senate on that day, I asked him if he was going to talk. He said, "No." I asked him why he and those with him did not talk; why they did not explain the tariff bill now before us, and defend some of its provisions. He replied smilingly and very promptly, and with tumultuous robustness, "We don't have to talk. We have the votes.

Well, I frankly acknowledged the corn and passed on. But, Mr. President, it occurred to me to ask how they came by those votes; how the minority-elected President and the few minorityelected Senators who completed the Democratic majority received the votes which caused this great robustness of reply to questions of that kind. Did they receive those votes on promises made to the people, and were those promises made to the people in line with what they now propose to do in this tariff bill? Let us see

Mr. KERN. Mr. President—
The VICE PRESIDENT. Does the Senator from Wyoming yield to the Senator from Indiana?
Mr. WARREN. I do.
Mr. KERN. I should like to inquire of the Senator whether

it has not been repeatedly charged in this debate from the Republican side that the Democratic Senators in the discussion of this bill have occupied more time than the Republican Senators, and whether complaint was not made because of that?

Mr. WARREN. Does the Senator admit that?

Mr. KERN. I am making the inquiry of the Senator from voming.

Mr. WARREN. I have not charged that, and I do not know that I heard that charge made.

Mr. KERN. It has been made repeatedly.

Mr. WARREN. What is the Senator's opinion about that? Mr. KERN. My opinion is that a very large part of the time has been consumed by Democratic Senators in the discussion of this measure. It has been fully discussed in every phase by them, as the Record will show. I repeat, complaint has been made repeatedly from the other side that Democratic Senators have delayed the bill by reason of their talking on it more than the Republican Senators.

Mr. WARREN. I presume the Senator is correct about that, but I assume he will not ask me to secure an affidavit that I did receive the reply which I mentioned.

Mr. KERN. Oh, no; I do not ask the Senator to procure an affidavit. I think he was taking seriously a playful remark

made by a Senator.

Mr. WARREN. I will say seriously in this connection that they certainly have not talked too much to suit me. I would rather have heard more from the other side.

Mr. GALLINGER. Mr. President, if the Senator will permit me the opportunity, I will say that I think it is conceded on both sides of the Chamber that neither our Democratic friends nor the Republicans have unduly delayed the consideration of the bill. The debate has been a legitimate debate, and it has pleased me to have our Democratic friends participate in it to

the extent they have done.
Mr. SIMMONS. Mr. President-

The VICE PRESIDENT. Does the Senator from Wyoming yield to the Senator from North Carolina?

Mr. WARREN. I do.
Mr. SIMMONS. All I desire to say about this matter is that while I agree with the Senator from New Hampshire that the debate has been legitimate on both sides, I do think that our Republican friends have shown a good deal of inconsistency in their statements.

Mr. WARREN. I should think—— Mr. SIMMONS. Pardon me a minute. At one time they twit us with consuming more time in the discussion than they have consumed, and they produce statements made up from the RECORD to show that we have consumed a good deal of the time that has been taken in the debate. At another time they twit us with a conspiracy of silence. I have not been able to deter-mine whether the other side of the Chamber meant to charge us with talking too much or with talking too little.

Mr. GALLINGER. If the Senator will permit me, the conspiracy of silence suggestion came from me when the Senator from North Carolina solemnly stated to the Senate that the other side of the Chamber had concluded not to talk, and I regretted that they appeared to have entered into an arrange-

ment of that kind.

Mr. STONE. I think we are talking to very little purpose

now, Mr. President.
Mr. SIMMONS. If that had been the only time when the Senator from New Hampshire used that expression it might have been pardonable, because I did state on that occasion that we were so anxious to make headway that day we had not talked, although some Senators on this side had desired to But that was not the first time we had heard from the other side the suggestion that there was a conspiracy of silence on this side, followed by the suggestion that we are taking up more time than the other side.

May I ask the Senator from North Carolina, Mr. WARREN. would be not think a great deal less of us on this side if from his standpoint we were not inconsistent with the views he has

expressed during this tariff debate?

Mr. SIMMONS. I would think that the Republican Party was not consistent; I would think the Republican Party had changed its spots.

Mr. WARREN. That is a frank concession perhaps. I want to ask one question, however, before the Senator leaves the floor. Does the Senator think that either side of this Chamber has been guilty of any filibustering on the tariff bill?

Mr. SIMMONS. I have stated repeatedly that I had made no such charge as that.

Mr. WARREN. I thank the Senator, because that has been charged, I think.

Mr. THOMAS. Mr. President—
The VICE PRESIDENT. Does the Senator from Wyoming yield to the Senator from Colorado?

Mr. WARREN. With pleasure.

Mr. THOMAS. I promise not to interrupt the Senator again; but I should like to inquire whether the Senator's view of public duty contemplates that Senators should carry out in legislation the pledges and promises of their party platform?

Mr. WARREN. Mr. President, I think they should; and I was just about to proceed along a line that will give my views

and an answer to the Senator's question.

Mr. THOMAS. I merely wanted to ascertain whether that

was the Senator's view.

Mr. WARREN. Mr. President, the Democratic national convention, held at Baltimore in 1912, declared in its platform the following:

We recognize that our system of tariff taxation is intimately connected with the business of the country, and we favor the ultimate attainment of the principles we advocate by legislation that will not injure or destroy legitimate industry.

Mr. President, wool growing is a legitimate industry; perhaps none more so in this world.

The Democratic candidate for the presidency, Mr. Wilson, an-

nounced in his speech at Pittsburgh:

The Democratic Party does not propose free trade or anything approaching free trade. It proposes merely a reconsideration of the tariff schedules, such as will adjust them to the actual business conditions and interests of the country.

But, Mr. President, the Democratic Party does propose absolute free trade for wool-a farmer's product of great impor-It not only approaches free trade, but actually and immediately accomplishes it so far as the farmer's finished product, wool, is concerned.

DEMOCRATIC ANTE-ELECTION PLEDGES BROKEN.

And thus are the ante-election pledges of party and presidential candidate broken, and the farmers-the flower of American

citizenship—outrageously sinned against.

The Senator from Mississippi [Mr. Williams], a frank, outspoken, and prominent member of the Finance Committee which has charge of the tariff bill now before us, maintains stoutly that he does not claim the purpose of the bill to be, throughout, a tariff for revenue only. He says:

Any tariff bill must necessarily, confronted with the conditions with which we are now confronted, involve a certain degree of protection,

And yet, Mr. President, the dominant party has selected for absolute slaughter the woolgrowing industry, and does not propose to let it down gradually by a partial removal of the

The wool industry is a highly protected one, and the men engaged in it are in the class which the Senator from Mississippi aptly described as those "who have been put by the Government in a position where they must be ruined or else gradually permitted to come down," and surely should be counted among those whom he would "let down gradually" if he would not kill them.

The Government not only provides protection in the way of a tariff, but on the other side of the equation it charges the flockmaster an extortionate price for grazing in the National forests and upon the public domain, and thus absorbs a great percentage of the returns. This proposed tariff law does not relieve the woolgrower from this grazing burden.

The distinguished junior Senator from Georgia [Mr. SMITH],

in speaking of the farmer, says:

I admit that the reduction on the things that he buys has not gone as far as I want it to go. I am perfectly frank about that. But our industries have purchased their machinery in markets that have added 50 per cent in many instances to a fair price for the machinery. We have cut that one-half. I hope it will be cut again before a great while. I hope that we will really bring the entire tariff to a revenue basis in the course of time.

Again, the Senator from Georgia says:

I have recognized existing conditions. I have felt that we could not afford to go as far as I would like to see the law go, lest serious injury would affect those industries in view of the position they have occupied in the past.

Still further, the Senator from Georgia says:

You could not levy a tax on a commodity produced here for revenue purposes only that might not bring some incidental protection. You could not levy a tax here the sole object of which was revenue on certain classes of goods that would not in a measure incidentally produce protection.

The Senator from Georgia speaks wisely, and I commend him. He would permit at least incidental protection, because some industries have purchased their machinery, and so forth, in protected markets, and this "would affect those industries in view

of the position they have occupied in the past."

Following this theory the woolgrower is clearly subject to the exceptions that the Senator from Georgia would make, for his plant and everything he has in the business has been pur-

chased in a protected market.

Wool has been continuously on the dutiable list since 1816, excepting the three or four years under the Wilson-Gorman Act. Hence American-grown wool has been protected more or less throughout over 95 years of the life of the Republic, while the manufactures of wool have been protected for 124 years. American people are the greatest consumers of wool per capita in the world, and during these years the Government has received large revenues in the way of duties upon imported wool, the difference between the amount grown here and the amount manufactured.

Although the tariff on wool has been changed nearly a score of times during the period named, nevertheless wool has been dutiable under the administration and management of all political parties which have controlled our Government during the past almost 100 years.

Indeed, the Confederacy during its reign in the South also gave its adherence to a protective tariff on wool.

WOOLGROWING ANCIENT AND HONORABLE INDUSTRY,

The woolgrowing industry has always been deemed not only an ancient but one of the most honorable of all avocations; yet it is to be stricken down, notwithstanding the promises and assertions made from highest authority in the Democratic Party that while reduction in duties must be made, free trade or anything approaching free trade would not be proposed. An attempt is sometimes made to justify this slaughter by the weak insinuation that woolgrowing is not a legitimate industry. Well, if not, why not? As to honor and legitimacy, there is not a flaw. It is an industry in which a man can succeed only by the sweat of his fac, hard labor, close economy, and industrious application of all of his faculties, mental and physical. No trusts nor combinations in woolgrowing. No watered stock nor paper profits to be imposed upon the public. Only hard, close "digging," seven long days in every week of every month in every year.

No millionaires or even semimillionaires are counted among flockmasters who have accumulated their fortunes in sheep raising and woolgrowing alone, although many, many men have turned all or a portion of their incomes from other sources

into the development of the industry.

The wool industry, Mr. President, dates back to the days of Adam and the world's creation. The Bible makes many references to the industry, and always in commendation of it. Some of the most beautiful psalms and metaphorical and parabolical allusions in the Bible are based upon sheep, shepherds, and wool. "The Lord is my shepherd, I shall not want," introduces one of the most beautiful series of verses in the world's literature. The Book of Genesis tells us that the younger son of Adam, "Abel was a keeper of sheep." Cain, his elder brother, wickedly slew Abel after a colloquy over the firstlings of his wickedly slew Abel after a colloquy over the firstings of file flock. Has it now come to pass that the Democratic Party, our older and stronger brother, is to slay us, the Republican Party, because we would protect the flockmaster? And will the end be as of old, that the countenance of the Lord shall be turned away from the slayer because of cruelty to the slain? We shall, of course, be duly and surely advised of this in time probably in the two even-numbered years next following the present year, 1913.

Mr. STONE. Mr. President, will my friend permit me? The Senator makes this Scriptural quotation: "The Lord is my shepherd; I shall not want." It seems to me that he perverts the real meaning of that text and misuses it. The Senator should have paraphrased the text and said something like this: "A high protective tariff is my shepherd, and, so long as it prevails, I shall not want." [Laughter.]

Mr. WARREN. I wish the Senator might go on with his interpretation of the Bible in that same strain.

Mr. MARTINE of New Jersey. Mr. President—
The PRESIDING OFFICER (Mr. Lea in the chair). Does the Senator from Wyoming yield to the Senator from New Jersey?

Mr. WARREN. I do.
Mr. MARTINE of New Jersey. I have heard the distinguished Senator from Wyoming designated as "the greatest shepherd since the days of Father Abraham." I suppose we should pay homage to him and hope to gain our aid and succorrevising the Biblical quotation for these latter days-from the shepherd of to-day, the shepherd from Wyoming.

Mr. WARREN. Do I still have the Senator's love, coopera-

tion, confidence, and respect?

Mr. MARTINE of New Jersey. Indeed, the Senator always has my respect. A man who can command so magnificent a personal presence, and a man who by his genius has been able to gather around him such a colossal herd as he now has roaming the plains of the western part of our country, indeed will command the respect of almost every one of his fellow citizens.

Mr. WARREN. The Senator from New Jersey always carries out the teachings of the Bible. I congratulate and thank

Christopher Columbus brought sheep over with him in his second voyage of discovery, and we have ransacked the world ever since to obtain different strains for importation and improvement.

Has it, then, remained for this day and date and for our friends on the other side, the Democrats, to uncover the illegiti-macy of this venerable and honorable industry? If so, why? How? With what proof?

GROWTH OF SHEEP AND WOOL INDUSTRY.

Sometimes it is said by the uninformed and the "opposed-ongeneral-principles" that the industry is dying out; that the numbers of sheep are decreasing, and so forth.

As to the number of sheep in the United States, we of course consult the census reports, investigations by the Department of Agriculture, market reports where wool and mutton are sold, and such other publications as are authentic.

A free-wool exponent, on the Senate floor a few days since, stated, with seeming indifference, perhaps, that in 1900 there were in the United States 61,503,713 sheep, while in 1910 there were only 52,447,861. These figures he perhaps took from the United States census report, but he did not take the pains to add the explanation given officially in that report immediately after the figures, as follows:

The total number of sheep reported as on farms and ranges on April 15. 1910, was 52,448,000, as compared with 61,604,000 on June 1, 1900, a decrease of 9,056,000, or 14.7 per cent. This decrease, however, is due partly to the change in the date of enumeration. Many lambs are born during the interval between April 15 and June 1. Furthermore, on many ranches in the West the lambs are not definitely

counted so early in the year as April 15, and it seems likely that in some such cases ranchmen failed to make any estimate of the lambs.

In view of the fact that, even after making necessary allowances, as discussed below, the number of ewes 1 year of age or over on June 1, 1911, was probably less than 1,000,000 short of the number on the same date in 1900, it seems likely that if the enumeration of 1910 had been made as of June 1 there would have been nearly as many lambs less than 1 year old as were reported 10 years before. * * * The number of ewes was reported in 1910 as 31,934,000 and in 1900 as 31,858,000, there being thus nominally a slight increase.

It is admitted both by the Department of Agriculture and the Census Bureau that errors may creep into the annual computation of the number of sheep in the country from the very nature of things, prepared as they are by different persons under dif-ferent administrations and under different rules and regulations, like the instance just cited, wherein one census was taken in April before the lambing season and the other one in June after the lambing season, it being well understood that nearly all of the lambs in the woolgrowing section are dropped during the months of April and May

Relating to this, I submit the following letter from the De-

partment of Agriculture:

UNITED STATES DEPARTMENT OF AGRICULTURE,
BUREAU OF STATISTICS,
Washington, D. C., August 18, 1913.

Bureau of Statistics, Washington, D. C., August 18, 1913.

Hon. Feancis E. Warren, United States Senate.

Sir: I have been requested by your secretary to explain how the figures relating to the number and value of sheep on farms in the United States, appearing on pages 691-692 of the 1912 Yearbook of the Department of Agriculture, were obtained.

The bases of the figures relating to numbers are the census returns as published on page 677 of the Yearbook. The Department of Agriculture's figures are estimates, not enumerations. Starting with any census year as a base, it estimates the percentage of increase or decrease in each succeeding year. Such percentages are obtained from voluntary correspondents and field agents of the Bureau of Statistics. Whenever a new census is taken the new census figures are adopted as a base for applying such percentages; there is, therefore, a readjustment every 10 years. In making the readjustments in 1901 and 1911 the census figures, which included lambs with sheep, were used as the base. The earlier census figures, I believe, did not include lambs.

The values per head are obtained by combining the average price per head of sheep under 1 year old, of ewes 1 year old and over, and of rams and wethers 1 year old and over, the relative importance of each class being considered in the combination. The estimates of average value per head are obtained from voluntary correspondents and field agents of the Bureau of Statistics.

NAT C. Murray, Acting Chief of Bureau.

NAT C. MURRAY, Acting Chief of Bureau.

That accounts for the great jump from 1901 and 1902, because before that time the annual crop of lamps was not counted, while after that time it was counted.

The Department of Commerce reports the following regard-

ing the matter:

DEPARTMENT OF COMMERCE, BUREAU OF STATISTICS, Washington, August 20, 1913.

Department of Commerce,
Bureau of Statistics,
Washington, August 20, 1913.

Hon. Francis E. Warren,
United States Senate, Washington, D. C.

My Dear Senator: Complying with the request made by your secretary, I take pleasure in furnishing you with a statement pertaining to the comparability of statistics pertaining to sheep for 1910 and 1900. The reports of the Census Bureau show that the total number of sheep reported as on farms and ranges on April 15, 1910, was 52,448,000, as compared with 61,504,000 on June 1, 1900, a decrease of 9,056,000, or 14.7 per cent. This decrease, however, is largely due to the change in the date of enumeration. In 1900 a law enacted by Congress provided for the ecusus of 1910 specified that the date of enumeration should be as of April 15. Any person acquainted with the live-stock industry would immediately notice the difference in date and be satisfied in their own mind that inasmuch as many lambs are born during the interval between April 15 and June 1 a large part of the decrease must be definitely charged to the fact that most of the spring lambs had not yet been born. If we eliminate from consideration lambs at both censuses, we find that the number of ewes reported in 1910 is 31,353,000 and in 1900 is 31,558,000, there being thus, nominally, a slight increase. It is very likely, however, that between April 15 and June 1 a considerable number of these ewes would have died or would have been sold. It is practically impossible to estimate the number which would thus have disappeared. It is also necessary to call attention to the fact that because of the change in date a slight change was made in the classification at the two censuses. This would practically result in further slight decreases, but it is clear that the decreases during the decade must have been comparatively small.

In the case of rams and wethers the statistics show that 7,995,000 were reported in 1900, as compared with 7,710,000 in 1910, thus shower, the number of classification been the same at the two censuse

Expert Special Agent, in Charge of Division of Agriculture.

Therefore a slight decrease, and only a slight one, occurred

But, Mr. President, there are far better and more practical ways to obtain the facts relative to the importance and value of the sheep industry: First, by accounting for the wool product, which is all duly weighed and goes into consumption; and second, by the statistics showing the amount of mutton shipped to market.

The total clip of wool in the States in 1912 was 304,043,400

There have been only six years during the entire history of our country's wool production in which the amount shown by these figures has been reached, and two of these years immediately preceded 1912.

The largest clip ever produced was in 1909, which amounted

to 328,110,749 pounds.

I submit herewith, Mr. President, the following figures taken from Government statistical reports, to show the increased growth of the wool crop and its increasing value from 1899 to date:

Some comparisons in scool production.

Wool produced in 1899pounds Value	276, 568, 000 \$45, 670, 000
Wool produced in 1909pounds	
Wool produced in 1912pounds	
Value         National Production         1899 to 1909         Per cent           Increase in value         1899 to 1909         do         do           Increase in value         1909 to 1912         do         do           Increase in value         1909 to 1912         do         do           Increase in production         1899 to 1912         do         do           Increase in value         1899 to 1912         do         do	4.6

RISE AND FALL IN NUMBERS OF SHEEP.

To students of the sheep industry the annual counts of sheep and of the wool and mutton product, taken together, have demonstrated very clearly that the number of sheep and the wool product diminish under an inadequate tariff, real or threatened. In all cases where the tariff has been reduced the numbers have decreased, although in some instances in years when sheep have decreased in numbers the wool has increased in volume, the reason for this being that after the flockmasters have sheared their sheep, if an undue number are then sent to the shambles, there is added to the regular wool clip the pulled wool from the skins of the slaughtered animals—the later growth of the same year.

For instance, the number of sheep reached the highest point ever known, up to that time, on January 1, 1884-50,626,626; but it is significant that although the count was more than a million higher on January 1, 1884, than on January 1, 1883, yet the total value in 1884 was over five and a half million dollars

lower than the total value in 1883.

Looking at the total yield of wool in 1884-85, we find that the amount reached 308,000,000 pounds, which was also a higher figure than ever reached before that time or in any year after that time until 1895, and, with that one exception, higher than any year up to 1902. The reason of this was that in 1883 any year up to 1902. The reason of this was that in 1883 legislation was enacted, which went into effect in 1884, reducing the tariff on wool materially. The number of sheep immediately commenced receding until, in 1889, the shrinkage amounted to over 8,000,000 head, and the total wool product shrank 43,000,000 pounds, or to a total of 265,000,000 pounds.

Proceeding to the next high mark in wool, which occurred in 1893, we find that sheep had increased to 47,273,553 head, and the value had increased from \$90,500,000 to \$126,000,000, and the wool had risen in volume to 303,153,000 pounds, this following legislation reducing the tariff. In 1894 wool was made free, and the sliding downward again proceeded until, in the beginning of 1897, sheep had decreased in numbers to

36,818,543, worth but \$67,020,942.

Then came the return of protection to wool and woolens, and the number of sheep increased from less than 37,000,000, worth only about \$67,000,000, with a wool product of only 259,153,251 pounds, in 1807, to nearly 60,000,000 sheep, worth over \$200,000,000, yielding over 300,000,000 pounds of wool and up to as high as 323,000,000 pounds, during the undisturbed, unthreatened existence of the Dingley tariff act.

It is true that after the election of 1910 the Democratic control of the House of Representatives and the introduction of bills there for the reduction of the tariff took place, the number of sheep and the quantity of the wool clip decreased to some extent, although this decrease was not all due to the reasons I have just given, but partially due to two dry summers and an exceedingly hard winter—the worst one in the history of the plains country in a number of the western heavy wool-producing States.

Mr. WALSH. Mr. President—
The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Montana?

Mr. WARREN. I do. Mr. WALSH. Will not the distinguished Senator from Wyoming add to the causes enumerated the absorption of the range by settlers?

Mr. WARREN. That is entirely true as to certain localities. will add it.

Mr. WALSH. Will not the Senator agree, also, that as a matter of fact it is the prime cause of the reduction in the last

three years?

Mr. WARREN. I will agree to that as to one or two States, or possibly three; but in some of the other States they have increased, and would have increased more except for what I have already stated.

Mr. WALSH. Will the Senator indicate to us some western

State in which that condition has not been operative?

Mr. WARREN. I will instance my own State, which has vibrated both ways. Owing to one of the reasons I have given, the hard winter, our sheep greatly decreased, as did also the settlement of the country. In the meantime, however, the wool clip of last year was nearly 3,000,000 pounds more than the year before, showing the partial return in the States that raise less wool. Lands that were not before used for sheep have been turned over to that purpose.

Mr. WALSH. I am interrupting the Senator simply for information. I assumed, as a matter of course, that the settlement of his State was abbreviating the range, and necessarily

reducing the number of sheep.

Mr. WARREN. It is in certain localities, as the Senator has

Mr. WALSH. I should be surprised to learn from the Senator that his State was an exception in that regard.

Mr. WARREN. It is not an exception, as the department states; but I say, as a net result, we had more last year than the year before.

Mr. President, the woolgrowers and wool manufacturers have been sometimes in harmony and often in hostility. After long-continued differences a common ground was arrived at in 1865, which, with some unimportant exceptions, continued until 1883, when the reduction in tariff heretofore mentioned was made and differences occurred between the wool growers and Secretary Hayes, of the Wool Manufacturers' Association. Fairly friendly relationship was restored, however, through the passage of the McKinley bill, having been cemented to some extent, perhaps, by the unfortunate rulings of the Treasury Department a little earlier, during Mr. Cleveland's administration, which both growers and manufacturers considered burdensome and unfair, because such rulings partially nullified the import duties on tops, broken tops, wastes, and so forth, and permitted for a time the importation of these commodities nearly equivalent to that of free wool and free partially manufactured

The distinguished Senator from Montana [Mr. WALSH] in his able speech submitted some figures and conclusions, quoted from the Agricultural Yearbook, showing very considerable shrinkages in the number of sheep during four recent years. I do not charge the Senator with an intention to mislead; but when the figures he quoted are considered in the light of the explanation offered by the Census Bureau, which I have here-tofore quoted, and in the light of the letters from the Department of Agriculture and the Census Bureau, also heretofore quoted, it is clearly seen that, through the changes in time and manner of taking the counts, and because of the growing tendency of the past few years on the part of flockmasters to dispose of all of their wether lambs and many of their ewe lambs in the fall of the year when they are but a few months old and before they are counted for the census, the real situation differs materially from the apparent in that we have maintained almost the full figure in number of sheep of shearing age. And this also accounts for and is proved by the continued large wool clip. In substantiation of this I offer the following:

Some comparisons in sheep numbers, 39, 852, 967 Total sheep______Less lambs 39, 644, 046 In 1912: Total sheep______Less lambs Shearing age_____ __ 38, 481, 000

So the real difference in numbers varies only a trifle over one and a quarter million head.

Value all sheep in 1899	\$170. 2	203. 119
Value all sheep in 1909	232, 8	41, 585
Value all sheep in 1912per cent	181, 1	70, 000
Decrease in value 1899 to 1909 per cent do		36 27
Increase in value 1899 to 1912do		6. 4

See Census Bulletin, Agriculture, p. 22, and Agriculture Yearbook, 1912, pp. 691-692.

Mr. PENROSE. Mr. President, will the Senator permit me at this point to interrogate him?

Mr. WARREN. Certainly.

Mr. PENROSE. Has the Senator any figures showing the number of sheep on the so-called ranges of the West, or in the country, say, west of the Mississippi River, and the smaller flocks east of the Mississippi River, or in the eastern part of the country, on farms?

Mr. WARREN. I have not included that, nor have I it here at hand just now. I have it in mind, however, and at my committee room.

Mr. PENROSE. The idea I had in asking the question was to bring out the thought that the growing of wool is not confined to being a western industry.

Mr. WARREN. Not at all.

Mr. PENROSE. The people of Pennsylvania have a very live interest in woolgrowing; and at one time the county of Washington, I think, led all other counties in the United States in the growing of wool.

Mr. WARREN. That is quite true; and it will astonish a great many people, if they will pick up the statistics, to find that while it goes up and down, a great many States are at times increasing and at others decreasing. I had occasion to go before a meeting of manufacturers to make a speech at one time. At that time I checked up every State in the Union, and there were only two States east of the Mississippi River that had not increased their number of sheep in the two years immediately before the time I made the computation.

Mr. PENROSE. The Senator from North Dakota [Mr. GRONNA] has handed me the figures I had in mind, and I will ask to have them put in the RECORD later on.

Mr. WALSH. Mr. President, I have before me the figures asked for by the Senator from Pennsylvania.

Mr. PENROSE. I have them here. I thank the Senator. Mr. WARREN. Mr. President, I have here a computation made for me by painstaking parties, which I carefully checked at the time and part of which I used in some remarks made in the Senate four years ago. I have added thereto such figures as will bring the computation down to date. At this point in my remarks I ask that the table referred to be inserted.

It is a table giving the history of wool ever since we commenced taking the census in 1840. It gives the production of our domestic wool; the amount, if any, exported; the amount that went into consumption. It also gives the imports and exports of foreign wool, that coming over and that going back. gives the foreign importation retained for consumption, the total wool consumption of the United States, and the percentage used of foreign and of home wool in that consumption.

The table referred to follows.

Table showing United States product, imports, etc., of wool.

WOOL PRODUCED, IMPORTED, EXPORTED, AND RETAINED FOR CONSUMPTION: QUANTITIES, 1840, 1850, 1860, AND FROM 1864 TO 1912.1

Year ended June 30—	Production.	Exports of domestic.	Domestic retained for consumption.	Imports.	Exports of foreign.	Foreign retained for consump- tion.	Total con- sumption, domestic and foreign.	Per cen of con- sump- tion, foreign.

The jump in numbers from 1900 to 1901, 1902, and 1903 was on account of adding the lambs to the count of sheep of shearing age.

THE MUTTON PRODUCT.

The Senator from Montana [Mr. WALSH] submitted some statements and figures relating to the mutton product, as fol-

Our sheep have been going, in numbers increasing annually, to the slaughtering pens, the Crop Reporter for February, 1913, giving the following numbers absorbed by the principal stock markets. In—

Tought in the state of the beamsher proces managed	
1909	10, 284, 905
1910	12, 406, 767
1911	13, 556, 108
1912	13, 743, 843

As stated earlier in my remarks, the tendency of late years on the part of flockmasters has been to ship their surplus stock at an earlier age than formerly, and hence lambs are sent to the slaughtering pens at the end of their first summer. the large losses from wintering lambs are avoided, and the product actually delivered in numbers to market can be substantially increased without really weakening the breeding and wool-producing flocks.

And so this increase of over 30 per cent in shipments to market during the last four years has not decreased in any like proportion the number of sheep of shearing age or the annual wool product. It simply shows that we are raising proportionately more lambs.

Apropos the quotation referring to the slaughtering pens, the records show that during the last 30 years the United States has, like England and some other countries, become a great consumer of mutton.

Mutton is not only one of the most healthful and palatable of foods, but its supply and consumption have greatly assisted in maintaining our meat supply so necessary to the creation and preservation of the brain and brawn of our citizens.

Except for the large mutton supply, the price of cattle and hog products would undoubtedly have been far and away in excess of even the present prices.

History informs us that in this vicinity and nearby, in early times, when a slave owner hired out his slaves under contract it was quite usual for the bond or contract to stipulate that such slaves during their period of employment should not be

compelled to eat terrapin or canvasback duck more than twice in any one week. With terrapin now costing from \$1 to \$2.50 per portion and canvasback duck from \$2.50 to \$5 apiece, difference in prices because of a great increase in population and a decrease in meat supply is painfully evident.

Mr. President, shall we crush out our sheep growers with a free-trade policy, and when they have ceased their efforts and engaged in other pursuits shall we depend upon foreign shipments of frozen meat at terrapin and canvasback duck prices? It is true that we did not in time properly protect the sea food and fowl just mentioned, but it is also true that we are now endeavoring to cover up lost ground by the establishment of Government terrapin farms, as instanced by those in Maine and Carolina, and by suitable game laws as to the wild game

In order to be altogether independent of foreign powers in war and peace, we must depend upon home production of wool. Wool, a contraband, is almost as necessary to our soldiers and citizens as are guns, powder, and bullets, and we should be indeed lost without it in a long-continued struggle in our northern climes.

NONE BENEFITED BY FREE WOOL.

Mr. President, if I were convinced that a majority of this Congress honestly believe that placing wool on the free list of this proposed law will be for the best interests of this country; if I were convinced that the majority honestly believe that the people will get better clothing, or as good clothing at a substantially lower cost, than they have been getting under the present tariff, I would acquiesce in the change without a protest, for I am willing, as I think every man is who reveres law and order, to undergo personal sacrifices if thereby the welfare of the many may be promoted.

But I am satisfied that no one will receive any substantial benefits from placing wool on the free list, for we have before us the examples of the removal of the tariff from coffee and from hides; the one, coffee, many years ago, and coffee has steadily gone higher and is higher now than ever before; and, later on, hides, which gave us no cheaper leather or shoes. These facts are notorious, and are examples of what we may expect.

A reasonable and substantial reduction in the tariff rates on wool and wool manufactures could be made without driving to the wall either industry. But I submit that this invidious dis-tinction of singling out wool alone to reduce immediately from high tariff rate to no tariff rate at all seems to me most uncalledfor, cruel, and unwise.

Indeed, it looks to me like tariff for politics only instead of tariff for revenue only.

Mr. PITTMAN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Wyom-

ing yield to the Senator from Nevada?

Mr. WARREN. I do. Mr. PITTMAN. I should like to understand the Senator with regard to his illustration of free hides. Do I understand him to draw the comparison to show that free wool will not reduce the price of raw wool?

Mr. WARREN. I did not make that observation. The object, I understand, if any, in reducing the tariff is to relieve the consumer. Am I right about that?

Mr. PITTMAN. Yes, sir.

Mr. WARREN. Very well. I contend that it will not relieve

the consumer, the wearer of clothes, in any great degree. There is no more reason to expect it than there was that the removal of the tariff on hides would reduce the price of shoes. We tried that experiment.

Mr. PITTMAN. Did the removal of the tariff on hides reduce the price of hides?

Mr. WARREN. Did it?

Mr. PITTMAN. Yes. I am asking that question of the Sen-

Mr. WARREN. Immediately when the duty was removed, foreign countries—that is, Argentina—in fact, before the bill was signed, effected one rise in price. After it was signed they made another, which nearly absorbed the difference. Later on, of course, the price of hides receded. But from causes upon which the raw material has but little effect, shoe manufacturers have not been able to lower, at least they have not lowered, their

Mr. PITTMAN. The question I ask is, Has the reduction of the tariff on hides generally reduced the price of hides?

Mr. WARREN. It did finally.
Mr. PITTMAN. It has finally reduced it?

Yes; if the Senator wishes to draw the com-Mr. WARREN. parison as to whether this will reduce the price of wool to the grower, there is no question but that it will very materially reduce it to the grower, but in my judgment there is no question as to the wearers of clothes that they will pay practically the same prices, because the raw wool that goes into a suit of clothes is so infinitesimal, the amount of the tariff is so small that it will cut no figure. It will be absorbed after the woolgrower, and between him and the consumer, the same as to all other commodities from which we have removed the tariff, such as coffee, hides, and so forth.

Now, if it so be that the American people go out of the raising of wool and we are dependent upon a foreign market, we may expect, perhaps, as high prices again, or probably higher prices upon wool and mutton eventually after our flocks are gone and

our flockmasters engaged in other pursuits.

Mr. SMOOT. Mr. President-

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Utah?

Mr. WARREN. I do. Mr. SMOOT. The question whether the ultimate consumer will receive cheaper clothing or not I think can be answered by a statement which was made by the Senator from Nevada [Mr. PITTMAN] yesterday. In his speech upon wool yesterday he called the attention of the Senate to the fact that the price of scoured wool in this country upon a certain day was 42 cents, as I remember, and in England it was 46 cents.

Mr. PITTMAN. No, that is a mistake.
Mr. SMOOT. Making a difference of 4 cents on scoured wool. Mr. PITTMAN. I wish to correct the Senator. I said that the average cost at a certain period of time in England was about 42 cents while the average cost in this country of various grades of wool was approximately 48 cents.

Mr. SMOOT. That is just as good a statement for me in

order to make a comparison on.

Mr. PITTMAN. Except that the Senator had it just reversed.

Mr. SMOOT. I reversed the figures.

Mr. President, the Senator says that there is a difference of only 5 cents on the average price of scoured wool in England and It takes of scoured wool to make a suit of the United States. clothes li ; any of us have on not to exceed 31 pounds. Three and one-half pounds at 5 cents, which the Senator names, makes a difference of 172 cents upon a suit of clothes. Does the Senator believe that the ultimate consumer is going to get that 172 cents? The wholesaler sells perhaps a \$20 suit of clothes for \$11. Does the Senator believe that the retailer is going to sell that \$20 suit of clothes for \$19.821? He never will do it. The price will be \$20 for the suit of clothes.

Mr. WARREN. I have some figures which I have not reached; I shall reach them soon, but I do not wish to cut off other Sen-

ators.

May I answer the Senator from Utah? Mr. PITTMAN.

Mr. WARREN.

Certainly.

The Republican Party have been contending Mr. PITTMAN. that the manufacturer had to pay the woolgrower the extra amount of the duty, and therefore he has retained that much extra duty on his manufactured article, thereby adding to his manufactured article. In selling it to the wholesaler he has figured it in the price to the wholesaler, and the wholesaler has figured that in the price to the retailer, and the retailer has figured that in the price to his customer.

Mr. SMOOT. Mr. President, there is where the Senator is

mistaken.

Mr. PITTMAN. But wait a minute. If there is a difference of only 5 cents in the price of scoured wool in England and in this country, then it goes to show that this country does not need any protection on raw wool.

I want the Senator to understand that the figures I have here do not correspond with the figures he quoted

I am answering the Senator's argument. Mr. PITTMAN. And one other thing. No matter whether it amounts to 5 cents a suit or \$5 a suit, there is no legitimate reason why the consumer should be required to pay even 5 cents more than the legitimate cost of an article for the purpose of delivering

a bonus to anyone else.

Mr. SMOOT. What I wish to say, Mr. President, is that neither the Senator from Nevada nor anyone else nor Congress can regulate the charges of the retailer to the ultimate con-The great trouble is with the costly distribution of goods in this country. It is not with the raiser of the wool; it is not with the manufacturer. I tell the Senator now that there is not a manufacturer of woolen goods in this country who would not be delighted to run his mill from one year's end to the other if he could make from 5 to 7½ cents a pound upon those goods. At 5 cents a yard, with 3½ yards to a suit, 17½ cents would be his profit upon the suit.

Mr. PITTMAN. Is it not a fact that the more he pays for

the raw wool the more he must have to charge to make that

7½ cents?

Mr. WARREN. I am just going into that very argument, and while I do not wish to cut off anybody else, at a later time in my remarks I should be very glad if the Senator wants to go into it.

Mr. WALSH. Mr. President-

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Montana?

Mr. WARREN. I do. Mr. WALSH. With the Senator's permission I should like to ask the Senator a question. I beg to assure him that I am not going to inject an argument into the midst of his interesting address.

Mr. WARREN. I shall be delighted to hear the Senator. Mr. WALSH. The last observation of the Senator from Wyoming, however, excites my very keen interest. It was to the effect, as I understood him, that in the opinion of the Senator a reduction in the duties on wool and woolen goods might very properly be made, but in the opinion of the Senator the reduction that is here made is too drastic; it goes too far.

Mr. WARREN. It is not a matter of reduction at all; it is

a matter of the removal of the duty.

Mr. WALSH. An abolition of the duty. The Senator coupled it with woolen manufacture?

Mr. WARREN. Yes.

Mr. WALSH. I should like to inquire of the Senator when it was that he reached the conclusion that a reduction of the

duties on wool might properly be made. Mr. WARREN. Mr. President, in th Mr. President, in the operation of the ordinary man's brain it seldom comes like a flash of lightning upon him if he should change his opinion. So I do not know that I would be able to state at what time. I simply stated here that undoubtedly, at present with the manufacturers in the status they are, with the improved machinery, and so forth, and with the prices, they could sustain some reduction, both manufacturers and woolgrowers, but a total striking out of the duty on wool at one fell swoop, when we were not given any reason to expect it, and when the Senator's party had never said they intended it in their campaign last fall, is what I am complaining about.

Mr. WALSH. I did not care for any accuracy in point of But as a matter of course I have followed the discussion in which the Senator has often participated upon this schedule with a great deal of interest, and this is the first time, according to my recollection. I have ever heard the Senator advance upon this floor, or ever heard of his having advanced on this floor, the idea that the duties ought to be reduced. Consequently, it was a matter of considerable interest to me. If I labor under

Mr. WARREN. I hope the Senator will not misquote me. What I said was that a reasonable and substantial reduction of the tariff rates on wool could be made without driving to the wall either industry.

Mr. WALSH. Do I understand the Senator to take the position to-day that the duties ought not to be reduced at all?

Mr. WARREN. I do not take that position at all. position now about that except what I have said. The Senator misquoted me, of course, accidentally.

Mr. WALSH. I certainly did not intend to misquote the Senator. I should, however, like clearly to understand the position of the Senator now if he will kindly inform us as to what his attitude is.

Mr. WARREN. Will the Senator vote with me upon a partial rate? Will he vote with me for any tariff on wool? He has formerly supported earnestly a tariff on wool. Has he changed his mind?

Mr. WALSH. I have not any assurance yet as to how the Senator will vote.

Mr. WARREN. I do not know that it is time to announce what I expect might be done on that question until the Senator is ready to say what he would do.

Mr. WALSH. I will say I shall make no bargain with any-

standard?

Mr. WARREN. Well, Mr. President, from his own judgment, if it were not that it is a part of a large number of items in the tariff bill, would the Senator advocate the immediate free-wool

Mr. WALSH. I asked the Senator a question and have not

had any answer yet.

Mr. WARREN. I was trying to get a little information from one of superior judgment, who evidently has changed his mind about what should be the tariff on wool.

I know it is claimed that placing a duty on wool passes the duty up along through the stages of manufacture to the consumer. Well, for the sake of argument, allowing that to be true, what does it signify? And why not the item of protection afforded the farmer, when his portion amounts simply to pennies instead of dollars from each suit of clothes? Why not his small share of only a fraction of a dollar on each ordinary suit of clothes? Why not the farmer, when you protect at every step from the farmer upward, and everybody connected with the wool industry from farm to consumer's back except the grower of the product? The wool is first made into tops, and upon them you have a duty. It then goes into yarns, and there again you have a duty. From there to cloths—under a duty, of course. Then through the dealers' hands, who attach their profit, into the wholesale clothiers' establishments—and they, too, are protected. Then out to the wholesale dealers and retail dealers, all of whom have their profits. Why should the farmer—the one who works the hardest throughout, the most hours, and for the least money—be the only one to have nothing at all in the line of protection for his industry, while the moment the product of his industry leaves his hands it is protected at every turn? And, indeed, he himself, in buying back his own farmgrown wool in the clothing necessary for himself and his family, has all of these duties to pay. Where is the logic? Where is the justice—the decency, even—in such invidious distinction?

I do not inveigh against the manufacturer's protection, but

I do not inveigh against the manufacturer's protection, but against leaving the farmer with no protection at all for his finished product, while his purchase of items with which to produce that product, and for his living expenses, must be made

in a protected market.

The Senator from Georgia [Mr. SMITH] and those who believe with him seem to forget that the woolgrower's investment has been made and that his business is now standing upon the same basis as that of manufacturers and others who have purchased machinery, and so forth, in a protected market. As a matter of fact, the farmer's business is in more need of protection along this line than most of the other industries. Everything which he uses on the farm and about it, and indeed the farm itself, was bought in a protected market. His sheep were bought in a protected market and reared under expenses of labor and supplies, tools, implements, etc., all in the protected market which the Senator mentions.

Thus the woolgrower is most grievously burt and must bear a burden from which manufacturers have been in part relieved by a retention of a part of their protective tariff.

BRIEF HISTORY OF WOOLGROWING.

The history of the woolgrowing industry has been told, written, and published many times, and it is not my intention at this time to go extensively into its details and rehearse what "you, yourselves, do know." It will be neither untimely nor out of place, however, to allude briefly to past events which mark the history of the industry in this country. The latest is the effect the proposed annihilation of protection on wool has had on the industry during the present year.

has had on the industry during the present year.

The wool clip of the State of Wyoming for the present year, estimated conservatively, amounts to over 30,000,000 pounds. The general condition of the wool markets of the world outside the United States should warrant the ready sale of the crop at an average price of 19 cents a pound. But the disruption of trade brought about by the impending elimination of the tariff on wool and woolens has made it impossible to dispose of but a portion of the year's production, and the average price realized has been around 14 cents per pound. The direct loss to the woolgrowers of the State of Wyoming in the one season through this expected legislation is two millions of dollars. The wool clip of the entire country for the present year, conservatively estimated, is 300,000,000 pounds, and the direct loss to the wool-raising farmers of the country in the one year by reason of the free-trade features of this bill as they affect wool, amounts to nearly or quite twenty millions of dollars on wool alone, to say nothing of the tremendous loss in value of sheep, land, and so forth.

This immense sum is lost to the producers, and the sorrow of it is that it will not benefit the consumer. No man nor woman buying a piece of woolen goods to-day can get it any cheaper on account of tariff agitation or prospective free trade, but every pound of wool going into these goods brought the grower 5 to 8 cents a pound less than it would had there been no radical change proposed in the tariff on wool or if the free-trade sword of Damocles had not been hanging over the industry since November last.

The woolgrowing business has been one of paradoxes, in that it has not always been what it seemed. When natural conditions appeared to favor growth and prosperity in the business, it has occasionally languished; and sometimes, though not often, it has improved in the face of adversity. It should have a bright future in store for it; but, regardless of what should be its fate, it may be annihilated and those engaged in it may be forced to follow the advice of Senators who have told the

woolgrowers, as they have told the sugar-cane growers, to get into some other business.

The growth of the woolgrowing business has been marked by many complexities growing out of changing conditions of agriculture in the various sections of the country; the competition of foreign products, and of domestic products also; the climatic extremes which one senson may have been favorable and the next disastrous to the industry; but most of all by the vagaries of the National Legislature in dealing with that product.

The history of our national legislation in relation to wool from the beginning of our present form of government for at least 75 years is a record of almost unexplainable changes in tariff rates.

I submit at this point a table showing the tariff duties on wool from 1789 to 1909.

The tariff duties on wool, 1789-1909.

Date of act of Congress.	Date of tariff.	Rates of duty.		
July 4,1789 Apr. 27,1816 May 22,1824	July 4,1789 July 1,1816 July 1,1824	Free. 15 per cent ad valorem. Value not exceeding 10 cents a pound, 15 per cent; value exceeding 10 cents a pound, 20 per cent; after June 1, 1825, 25 per cent; after June 1, 1825, 30 per		
May 19,1828	July 1,1828	cent. 4 cents a pound and 40 per cent, the ad valorem rate to be 45 per cent from July 1, 1829, and 50 per cent		
July 14, 1832	Mar. 3,1833	from July 1, 1830.  Value not over 8 cents a pound, free; value over 8 cents a pound, 4 cents a pound and 40 per cent ad		
Mar. 2,1833	Jan. 1,1834	valorem.  Duties of the preceding act in excess of 20 per cent to have one-tenth of such excess taken off every 2 years till Jan. 1, 1842, when one half the residue to be deducted, and the remaining half after June 30, 1842.		
Aug. 30,1842	Aug. 30, 1842	Value not over 7 cents a pound, 5 per cent; value over 7 cents a pound, 3 cents a pound and 30 per cent.		
July 30, 1846 Mar. 3, 1857		30 per cent ad valorem.  Value not over 20 cents a pound, free; value over 20 cents a pound, 24 per cent.		
Mar. 2,1861	Apr. 1,1861	Value less than 18 cents a pound, 5 per cent; value 18 cents and not over 24 cents a pound, 3 cents a pound;		
June 30,1864	July 1,1864	value over 24 cents a pound, 9 cents a pound; value 12 cents or less a pound, 3 cents a pound; value over 12 cents a pound and not over 24 cents, 6 cents a pound; value over 24 cents a pound and not over 32 cents, 10 cents a pound and 10 per cent ad valorem; value over 32 cents a pound, 12 cents a pound		
Mar. 2,1867	Mar. 2,1867	and 10 per cent ad valorem.  Class I, elothing wool, value 32 cents a pound or less, 10 cents a pound and 11 per cent ad valorem; value over 32 cents a pound, 12 cents a pound and 10 per cent ad valorem: washed wool, twice the ragular duty. Class II, combing wool, value 32 cents a pound or less, 10 cents a pound and 11 per cent ad valorem; value over 32 cents a pound, 12 cents a pound and 10 per cent ad valorem; value over 32 cents a pound.		
June 6,1872 Mar. 3,1873 Mar. 3,1883	Mar. 3,1875	pet wool, value 12 cents a pound or less, 3 cents a pound; value over 12 cents a pound, 6 cents a pound. All classes, scoured wool, treble the regular duty. All duties reduced 10 per cent. Duties of act of Mar. 2, 1867, restored.  Class I, clothing wool, value 30 cents a pound or less, 10 cents a pound; value over 30 cents a pound, 12 cents a pound washed wood, double the regular duty. Class II, combing wool, value 30 cents a pound or less, 10 cents a pound; value over 30 cents a pound, 12 cents a pound. Class III, carpet wool,		
Oct. 1,1890		value 12 cents a pound or less, 2½ cents a pound; value over 12 cents a pound, 5 cents a pound. All classes, scoured wool, treble the regular duty. Class I, clothing wool, 11 cents a pound; if washed double the regular duty. Class II, combing wool, 12 cents a pound. Class III, carpet wool, value 13 cents a pound or less, 32 per cent; value over 13 cents a pound, 50 per cent. All classes scoured wool, treble the regular duty.		
Aug. 1,1894 July 24,1897		Free. Class I, clothing wool, 11 cents a pound; if washed, double the regular duty. Class II, combing wool, 12 cents a pound. Class III, carpet wool, value 12 cents a pound or less, 4 cents a pound; value over 12 cents a pound, 7 cents a pound. All classes secured wool, treble the regular duty.		

(See Wright's Woolgrowing and the Tariff, pp. 344-346.)
WOOLGROWING IN COLONIAL TIMES.

At the close of our colonial and the outset of our national history we had no defined woolgrowing industry, sheep raising being but a small part of the general farm production of each farmer. Most of the farmers raised a few coarse-wool sheep for home manufacture of coarse clothing; and aside from a very few fine flocks, one of them owned by President Washington, there were no flocks of any considerable size, and the country depended upon England for its woolens.

The fact that there was no home wool industry to protect perhaps accounts for placing wool on the free list of the first national tariff bill enacted, which was in 1789. Indeed, importations of wool were encouraged in order to give the few woolen or carding mills of the country raw material with which to work. There was a tariff of 5 per cent on woolen goods in 1789, 10 per cent in 1792, 15 per cent in 1794, and 17½ per cent in 1804; but the tariff was of but little benefit to the manufacturing industry until it was raised to 35 per cent in 1812.

The high tariff rates imposed during the War of 1812 and the previous prohibition of importations brought about by the embargo and the nonintercourse act shut off the supply of wool and woolen goods from abroad and placed the country on its own resources, and from 1808 until the end of the War of 1812 the growers of wool and the manufacturers of woolen goods had the benefit of almost absolute protection by the practical prohibition of imports of both the raw material and the manufactured article.

The effect on both wool producing and manufacturing was immediate. Factories increased rapidly in number, the price of wool advanced, and for the first time in our history woolgrowing became an industry worthy of note. It was during this period that the merino was introduced into this country in any considerable number, and it has been estimated that between April 1, 1810, and August 31, 1811, some 20,000 highgrade merinos were brought into the United States from Spain and Portugal. The War of 1812 not only cut off the supply of woolens from abroad but created an increased home demand in order to supply our troops with clothing, and prices of wool went soaring, pure merino wool selling in 1814 for from \$2 to \$3 a pound and common wool bringing from 30 to 50 cents a pound. In that year the country contained 10,000,000 sheep, and the wool clip was from twenty-two to twenty-four million pounds.

Following the close of the War of 1812, a determined struggle was made by England to capture American trade, and as soon as the inhibitions of the war were removed our markets were flooded with English woolen goods; and this led to the enactment of the tariff of 1816, which placed a 15 per cent ad valorem rate on wool and 25 per cent on woolen goods. Preceding the imposition of those rates the importations of British wool and woolen manufactures into the United States were phenomenal. In 1815 the importations of wool and woolens amounted in value to \$50,000,000, and in 1816 to \$21,000,000. The flood was checked somewhat by the 1816 tariff, but the industry was crippled, and petitions poured in on Congress for higher tariff rates. In the face of the determination of England to absorb our markets and an inadequate duty to insure its protection, the woolen industry during this period gained strength. In 1824 a slight increase in tariff was secured; the wool tariff increased so that after 1826 it was 30 per cent, except that costing 10 cents or less, which remained at the old rate of 15 per cent; and the tariff on woolen goods raised to 30 per cent until 1825 and 33½ per cent thereafter.

The increased duties, however, did not prevent England from making a most desperate effort to destroy the wool growing and manufacturing industries of this country. The woolen trade of England was depressed, and many English firms sold their products in America for less than cost, large quantities of goods being sent over and sold at auction for what they would bring.

Niles's History of the Wool Industry thus describes the situation:

It is notorious that great sums of money were expended by the British to destroy our flocks of sheep, that they might thereby ruin our manufactories. They bought up and immediately slaughtered great numbers of our sheep. They bought our best machinery and sent it off to England, and hired our best mechanics and most skillful workmen to go to England simply to get them out of the country, and so hinder and destroy our existing and prospective manufactures.

In a memorial to Congress of the growers and manufacturers of wool, adopted at Woodstock, Vt., in December, 1826, it was stated:

Partly from England having glutted the South American market, partly from the repeal of the English duty on foreign wool, partly from the commercial and manufacturing distress which for 18 months past has pervaded that Kingdom, reducing the price of manufacturing labor to less than one-half the former rate, and partly from frauds committed on our revenue by English agents in this country invoicing their goods far below their cost and rendering the protection given by the tariff of 1824 a perfect nullity, our country has again been deluged with British goods.

An increase in the weel tariff was granted in the act of 1828.

An increase in the wool tariff was granted in the act of 1828, and for the first time a specific duty was placed on wool importations. This, despite the continued fierce competition of England, kept the woolgrowing and wool manufactures of the country on an up-grade, until in 1830 a period of prosperity dawned, the price of wool went up, and the business became one of the firmly established industries of the country, accumulating

sufficient strength to withstand the inroads upon it made by subsequent "compromise" and revenue tariffs and even free trade in the raw material.

Not content to "let well enough alone," the tariff act of 1832–33 and the "compromise" act of 1833–34 placed wool valued at not over 8 cents a pound on the free list and lowered the rates on the higher grades. These reductions were followed in each instance by heavy importations of wool and woolens—as usual, the woolgrower getting the worst of it—the increase in manufactured goods being but 75 per cent, while imports of raw wool increased 250 per cent.

WOOL INDUSTRY HARD HIT BY TARIFF REDUCTIONS.

The wool industry was hard hit by the panic of 1837, which brought a sharp drop in the price of wool, and wool manufacturers were demoralized. The decline in wool prices continued until 1843, when, under the stimulus of a specific duty on raw wool imposed by the protective act of August 30, 1842, prices began to go upward, culminating in 1853, when prices were double what they were in 1843.

Ohio fine-washed wool in 1843 was 33 cents per pound; in 1853, 66 cents.

The ideal tariff bill, from the viewpoint of free-trade and tariff-without-protection advocates, has always been, since its enactment and until recently, the Walker Act of 1846, which reduced the duties on manufactured goods and placed ad valorem rates on raw material. This policy was designed to have the consumer buy in the cheapest markets of the world and the producer of raw material sell in foreign markets, the theory being the pleasing one that we would sell our products in high markets and buy our supplies in low markets.

But, while the theory was alluring, the practical result was different. Representative Covode, of Pennsylvania, in a speech in the House in 1857, thus explained the workings of the Walker Act:

Walker Act:

The tariff of 1846 imposes a duty of 30 per cent on wool, while the duty on blankets is only 20 per cent, thus making a discrimination in favor of the foreign manufacturer and against our own of 10 per cent. Under this tariff the importation of blankets ran up last year to over \$6,000,000. Now, who is benefited by this condition of things but the foreign manufacturer and foreign woolgrower? Probably not one pound of American wool entered into the composition of this enormous amount of imported goods. Had the duty been so arranged as to enable our own manufacturers to make this article, it would have afforded a market at home for about \$,000,000 pounds of wool. Thus it will be seen that the interest of the woolgrower is to have a sufficient protection for the manufacturers to enable them to make all such goods, thereby securing a market for his wool at home, as it is not to be supposed that the American woolgrower will be able to go into the markets of the world in competition with the Russian and Australian producers.

The Walker tariff law was changed by the act of 1857, which placed nearly all raw materials on the free list. All wool costing less than 20 cents a pound was made free and the duty reduced from 30 per cent to 24 per cent ad valorem on wool costing more than that amount. The duty on woolen goods was reduced from 30 per cent to 24 per cent ad valorem.

ing more than that amount. The duty on woolen goods was reduced from 30 per cent to 24 per cent ad valorem.

The crisis and panic of 1857, which followed closely the enactment of the tariff law of that year, was particularly severe upon the wool manufacturing industry. Wool prices were nominal, and some grades were not salable at any price.

The free-trade tariffs of 1846 and 1857 not only failed to benefit the wool growing and manufacturing industries, but gave both a decided setback from the prosperous condition in which they were placed by the protective tariff of 1842. Under that act and prior to the passage of the Walker Act the country was on the verge of becoming an exporter of wool. The New York Evening Post is quoted in Niles's Register of the Wool Industry as saying, in 1844:

We have already referred to the fact, that is becoming every year more certain, viz, that this country is adapted by means of its extensive prairies to become in a few years a larger producer and exporter of wool than any other nation.

In fact, American wools—one lot from Oregon—began to appear in the London markets. But conditions soon changed and the Walker Act put a quietus on hopes that we might become exporters of wool.

FAVORABLE EFFECT OF PROTECTIVE TARIFF.

The Morrill tariff act of March 2, 1861, was a return to the protective system of tariff legislation. It increased duties generally about 10 per cent and changed many rates from ad valorem to specific. Wool duties were made specific, and the protective rates of this act, combined with the effects of the order issued by Secretary Stanton in 1862, which prohibited purchases of all articles of clothing for the Army from being made abroad if they could be purchased in the United States, brought about a great expansion in the wool growing and manufacturing industries. In the woolen industry the consumption of wool increased from 98,379,785 pounds in 1860 to 219,970,174 pounds in

1870, or 123.59 per cent. The domestic wool clip increased during the decade from 60,000,000 to 180,000,000 pounds. The number of operatives employed increased from 59,322 in 1860 to 110,859 in 1870, and the wages paid increased from \$13,361,-602 to \$40,357,238.

Joint conventions held by wool manufacturers and woolgrowers in 1865 led to a readjustment of the tariff through the act of March 2, 1867, by which the relative duties on raw wool and manufactures of wool were arranged on what was deemed

a scientific and equitable basis and ratio.

That act has been called the most important in the history of wool and woolens, in that it established a ratio for the duties on wool and woolen goods which, except for the reduction in duties in 1883 and the brief period of free wool of the Wilson-Gorman Act, has remained substantially the same to the present day.

Under the 1867 rates of about 10 cents a pound the woolgrowing industry flourished and the production of wool increased from 160,000,000 pounds in 1867 to 300,000,000 in 1884. Sheep numbered 39,385,386 in 1867 and 50,626,626 in 1884.

Tariff agitation in 1882 resulted in the creation of the tariff commission of that year, which prepared a bill that, with many changes and amendments, became a law July 1, 1883. The law proved unsatisfactory to both political parties. The changes made in the rates on woolen goods affected the wool growing and manufacturing industries disastrously.

The Mills bill of 1888, which provoked a most extended tariff discussion in the campaign of 1888, formed the issue in that campaign which resulted in the election of President Harrison

and a Republican Congress.

It is worthy of note that the wool schedule of the Mills bill was almost identical with Schedule K of the Underwood bill. It proposed placing wool on the free list and imposing a duty of about 40 per cent on woolen goods. The minority report of the Ways and Means Committee of the House, signed by William D. Kelley, Thomas M. Browne, Thomas B. Reed, William Mc-Kinley, jr., and Julius C. Burrows, in dealing with the wool schedule wight well apply to the reading Understanding schedule might well apply to the pending Underwood-Simmons bill. The report in part recites:

schedule might well apply to the pending Underwood-Simmons bill. The report in part recites:

Nowhere in the bill is the ultimate purpose of its authors more manifest than in its treatment of wool. It places the product on the free list and exposes our flocks and fleeces to merciless competition from abroad. In this respect the bill is but the echo of the President's message, and gives emphasis to the settled purpose of the majority to break down one of the most valuable industries of the country. It is public proclamation that the American policy of protection, so long adhered to and under which has been secured unprecedented prosperity in every department of human effort, is to be abandoned.

Why have the majority put wool on the free list?

First, the purpose is to bring down the price of wool. If this should be the result, we inquire at whose expense and loss? It must be at the expense of the American woolgrower, and to his loss, * * * The injury, by the confession of the majority, will fall upon the American woolgrower. He is to be the first victim. He can find no profitable foreign market, if he is unable to hold his own, and it is abourd to talk about enlarging the market for his product at home with the wool of the world crowding our shores unchecked by customhouse duties. * * *

The bill will greatly increase importations of the foreign product and diminish, if not wholly destroy, our own production. Every nation ought, if possible, to produce its clothing as well as its food. This nation can do both, if the majority will let it alone.

The majority asserts that we must produce our woolen goods at lower cost and be able to undersell the foreign product. And after this how is the lower cost to be secured? First, by fleecing the woolgrower, and next by reducing the labor cost in the manufacture. How are we to undersell the foreign product? By making the cost of manufacturing less than theirs. In other words, by cutting down the wages of our skilled and unskilled labor, not to the foreign standard simply,

How apropos this report to the present situation! We have a Democratic majority forced by a minority-elected President, who received 150,000 fewer votes in 1912 than Mr. Bryan received in 1908 and more than 1,300,000 less than a majority in 1912,

to put wool on the free list against its, the Congress's, intention, which was to levy a duty of 15 per cent upon wool importations.

The McKinley Act of 1890, the Dingley Act of 1897, and the Payne Act of 1909 maintained protective duties on wool and manufactures of wool practically unchanged for the period from 1890 to 1913, with the exception of the three years of free wool, 1894 to 1897, covered by the Wilson-Gorman Act.

THE 1894 FRUE-TRADE FIASCO.

I am not going to enlarge upon the effect of the Cleveland Administration and the free-wool provision of the Wilson-Gorman Act on the wool industry. Suffice it to say that previous to 1894 we were importing annually about 140,000,000 pounds of wool. During the fiscal year 1894, just previous to the enactment of the Wilson-Gorman law, the imports fell off to 55,000,000 pounds in anticipation of the repeal of the duty. During the three years 1895, 1896, and 1897, identical with the operation of the Wilson-Gorman law, the imports amounted to nearly

800,000,000 pounds, or an average of over 260,000,000 pounds a year, not only displacing what should have been the American production, but reducing the price received by the American woolgrower from 40 to 50 per cent. Under the blight of free wool the number of sheep in this country decreased in three years from 47,000,000 to less than 37,000,000, and the value of our flocks decreased from \$127,000,000 to \$67,000,000, a loss in value of nearly 50 per cent.

Not only was our market flooded with woolen goods, but under the reduced duties on shoddy and rags imposed by the Wilson-Gorman Act the imports of shoddy and rags increased from 48,606 pounds during the last year of the McKinley Act term to 6,556,199 pounds under the first year of the Wilson-Gorman

tariff.

In 1890, under a duty of 10 cents a pound, the imports of rags and shoddy amounted to 584,172 pounds.

During the four years of the operation of the McKinley bill, with a duty of 30 cents a pound on shoddy, the imports were

1,554,993 pounds.

During the three years of the operation of the Wilson-Gorman Act, with a duty of 15 per cent ad valorem, the importations were 46,016,762 pounds—the importations in 1897 alone, while the importers were trying to rush all they could into the coun-

try before the rates were raised, being 28,192,399 pounds.
Under the 12 years' operation of the Dingley Act, with a rate of 25 cents a pound, the total importation of shoddy was only

2,087,054 pounds.

Thus the average annual importation under a duty of 30 cents pound and with dutiable wool, was only 388,748 pounds. Under 15 per cent ad valorem and free wool as high as 15,338,920 pounds. Under 25 cents a pound and dutiable wool, only 173,754 pounds.

In view of these figures what may we expect when the bars

are all down and shoddy comes in absolutely free for the first

time in our history?

In reference to the domestic production of shoddy, the Tariff Board reported that the industry in the United States has made no decided growth during the last decade. The number of The number of establishments has declined and the value of products has increased only slightly.

The rate of duty of 25 cents a pound has almost completely kept out importations, and this, with the declining production at home, has tended during the past 10 to 15 years to give us better grades of home manufactured clothing than during any

previous period.

Concerning the production of shoddy in England, the Tariff

Board reported:

The greatest shoddy-producing center in the world is in and near Batiey and Dewsbury, England. Of the 900 rag-grinding machines in the United Kingdom, Yorkshire, in which Batiey and Dewsbury are located, has 881 machines, * * * In 1907 the United Kingdom is reported to have produced 137,056,000 pounds of shoddy valued at \$8,749,967.

The Underwood-Simmons bill places shoddy on the free list, which is a plain invitation to cheapen our clothing with adulterants made from the rags and refuse of England and other foreign countries. No one will gain by this operation but the rag merchant, the rag grinder, and shoddy manufacturer of England and France. The one who will lose correspondingly will be the wearer of cheap and moderate-priced clothing-the consumer. He may think he is buying serviceable articles, only to find that they will go to pieces in the first rainstorm or during the first damp day which overtakes him.

Placing shoddy on the free list is placing a premium on de-ception and fraud, with the innocent wearer of clothing as the

victim.

Shall we thus advertise ourselves as a shoddy Nation? UNITED STATES NOT A SHODDY NATION.

Mr. WALSH. Mr. President

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Montana?

Mr. WARREN. Certainly. Mr. WALSH. I should like to understand very much more clearly than I do now the position of the Senator with respect to that matter. My understanding is that a protective tariff is imposed for the purpose of stimulating home production. I gather that the Senator wants a duty on shoddy and on rags for some other reason than to stimulate the home production of shoddy and rags.

Mr. WARREN. The Senator has guessed just right.

Mr. WALSH. But why will not a protective tariff on shoddy and rags stimulate the production of shoddy and rags in this country, if it will stimulate the production of any other product-wool, for instance?

Mr. WARREN. We certainly keep out the foreigners, the greatest shoddy manufacturers of the world, in that way.

Mr. WALSH. Exactly. Then how do you protect the domestic consumer from the use of such goods as you describe, when you promote the production of shoddy and rags in this country? Mr. WARREN. In the first place, the production in this country is very slight, because of the lack of the material.

Mr. WALSH. But you do not prevent the use of it.
Mr. WARREN. In the next place, we are not a shoddy-wearing nation, if honesty is practiced in the making of clothes. Mr. WALSH. Then, as I understand the Senator, while we will not wear shoddy goods made from domestic shoddy, we will consume enormous quantities made from imported shoddy?

Mr. WARREN. Mr. President, the Senator is very ingenious; I will not say ingenuous. A certain amount of shoddy pressed into felts and coarse material can be absorbed without imposing upon the wearer of clothes. But to undertake to let into this country the product of all these other countries, to make this the dumping place, and to use it in clothing, is to wrong the wearers of clothing.

Mr. WALSH. One more question: Will not the Senator agree with me fully that the only legitimate way to meet that condition is to pass an appropriate act branding these goods so that the public may be informed as to the character of the goods

they buy

Mr. WARREN. Mr. President, I do not know what the record of the Senator has been heretofore regarding that particular matter, but I have had it under consideration. my desk a report of a hearing where I appeared before a committee of the House to advocate a thorough investigation with that end in view. I was one to respond favorably to a resolu-tion, introduced, I think, by a Senator from Montana, Mr. Clark, or possibly by the Senator from New York, Mr. Platt. am not entirely certain that I did not introduce one myself. Difficulties were met at that time. It was clearly a matter that would have to come up from the House, under the guise of being a revenue measure. If the Senator from Montana wishes to introduce that matter and follow it up, I shall be very glad to be of any assistance I can, as I have been before.

Mr. WALSH. A bill of that character is now before the Senate, introduced by my colleague; and as a matter of course I shall be very glad to have the earnest and valuable assistance

of the Senator from Wyoming.

Mr. WARREN. As the Senator knows, and as I think the Senator's colleague must admit, it is a matter that must come up from the House.

Mr. WALSH. I do not see why. I can not understand at

all why it should.

Mr. WARREN. I will simply say to the Senator that if he will look at the oleomargarine legislation, and what has been effected under it, he will see why. But why do not the Senator and his party include that regulation in with all the other various and sundry ministerial regulations now in the pending tariff measure?

Mr. WALSH. Before this colloquy is ended, I desire to say that it is perfectly obvious now, from the remarks of the Senator, that the protective tariff which has been imposed upon shoddy and rags has not met the condition, as he himself recognizes by his activity in behalf of such legislation as I suggest.

Mr. WARREN. I do not understand what the Senator means

by that. What does he mean?

Mr. WALSH. I understand that the Senator from Wyoming himself has been active in promoting such legislation as I suggest, recognizing that the duties already imposed upon rags and shoddy do not meet the evil, and that it has not been eradicated in consequence of them.

Mr. WARREN. Mr. President, on the contrary I have been showing here with figures, not with words, that the use of it here, as a result of the high rate, has receded, and receded

Mr. WALSH. That is not the point I am referring to. The Senator has now told us about how heretofore he has been ac-

Mr. WARREN. In what? Mr. WALSH. In endeavoring to get such legislation as I suggested was the appropriate remedy for the evil of imposing

shoddy goods upon the public.

Mr. WARREN. The legislation about which the Senator is speaking did not come up in the manner he presents it, as a shoddy measure. It came up as to all adulterants, without regard to whether they were cotton or wool, and proposed simply that they should be labeled with a description. Then, there came up the features of administration, and what might be the punishment for violation of the law, the penalty, and so forth. The Senator is a great lawyer, and I am not, and he perhaps may be able to set me right in this; but the great lawyers at that

time were not able to say that the matter could be digested and brought in in a revenue measure without some danger of its being declared unconstitutional, just as in the case of the oleomargarine bill. Many lawyers still think that is unconstitutional and ought to be tried out.

Mr. WALSH. As to that, I do not conceive that any lawyers can differ in respect to the power to initiate in this body an act requiring the branding of all goods in order that their character may be known to the purchasers. But that is alto-gether aside from the question. Whether the bill should originate in the other House or in this, I understand the Senator to say that the legislation has had his active support.

Mr. WARREN. Mr. President, the Senator must not misquote me. There has been no such legislation. What I said about it was that I had supported the resolution that called for an inquiry to see what might be done to effect such an end.

Mr. WALSH. Whatever was done had the concurrence and the approval of the Senator, because he recognized that the evil had not been met by the levy of a duty upon rags and shoddy.

Mr. WARREN. Very well, Mr. President; but that only incidentally touches shoddy. I wish to say now, with all respect to the Senator from Montana and to others, that I have never yet discussed the question of shoddy upon facts and history, with free-wool advocates, but that there was a shrinking and an attempt to divert me from shoddy itself into some side issue. I do not blame those who wish to divert attention from the shoddy question, and the legislation that has heretofore been mentioned.

Mr. WEEKS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Massachusetts?

Mr. WARREN. Certainly,

Mr. WEEKS. I suppose everyone will agree that the larger percentage of wool and the smaller percentage of shoddy which appears in clothing, the better off the average citizen is. I wish to ask the Senator from Wyoming if it is not a fact that under the present law the proportion of shoddy used in goods in England has increased, while the proportion used in goods in the United States has decreased?

Mr. WARREN. That is true; and it is measurably true as to all free-trade countries, but more especially in England.

Mr. WEEKS. Does it not follow from that that if we put shoddy on the free list we are likely to be in exactly the same position that Great Britain is, and that the proportion of shoddy that will appear in our woolen clothes will increase as a result? Mr. WARREN. Undoubtedly.

Mr. SMOOT. Mr. President, in proof of that I wish to call the attention of the Senator from Montana to a few figures.

During the time the McKinley law was in force, three years and eight months, there were imported into this country 908,923 pounds of shoddy. During the time the Wilson bill was in force, three years and four months, there were imported into this country 86,263,630 pounds of shoddy. During the 13 years from 1898, since the Dingley law was passed, there have been imported into this country only 6,751,577 pounds.

Mr. WILLIAMS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Mississippi?

Mr. WARREN. I do, with pleasure.
Mr. WILLIAMS. How much shoddy was made in this country during those respective periods? I understand the Republican theory is that you put on a duty in order to protect the home production of a product. To what extent did it protect the home production of shoddy?

Mr. WARREN. The Senator speaks of the general policy of

protection.

Mr. WILLIAMS. Yes.

Mr. WARREN. But I will say to the Senator that there are substances that we might protect the other way, by keeping

them out as far as we can.

Mr. WILLIAMS. Very well; but I wish to know what was the effect upon the domestic production of shoddy. If the Senator from Utah [Mr. Smoot] has those figures, they will be interesting.

Mr. SMOOT. One effect it has had, certainly, was that it kept the disease-bearing rags and shoddy of European countries out of the United States. Another effect was that the clothes made in the United States do not carry anywhere near the percentage of shoddy carried by clothes made in England

and Germany.

Mr. WILLIAMS. Can the Senator give me the domestic production and consumption of shoddy during the periods he has

referred to?

Mr. WARREN. I have already gone over that ground, and I have stated that there was no appreciable increase in the manufacture of shoddy in this country.

Mr. WILLIAMS. Where does the Senator get that informa-

tion?

Mr. WARREN. I get it in the Tariff Board report, I get it in the Statistical Abstract, I get it in any of the official figures. I supposed that was too well known to make it necessary to put the exact figures in here. I shall be very glad to furnish them,

Mr. PENROSE. Mr. President, I can give the Senator some

figures on this point.

Mr. WILLIAMS. If the importation of a thing is prevented, and the demand for it continues, it necessarily follows that the domestic production of it will increase.

Mr. WARREN. It has not so operated with us.
Mr. PENROSE. For the information of the Senator, if the Senator from Wyoming will permit me-

Mr. WARREN. Certainly. Mr. PENROSE. British we

British woolen mills, according to an official estimate, use 200,000,000 pounds of shoddy every year. consumption of shoddy in the woolen mills of the United States in the year 1909, a year of active manufacturing, was less than 80,000,000 pounds. The use of shoddy is decreasing under the protective system of the United States. It is increasing under the tariff-for-revenue system of Great Britain.

I have here a memorandum which states that British manufacturers import rags for shoddy from all the world. The United States imports almost no rags and shoddy, but exports to British manufacturers every year thousands of bales of rags for which there is no adequate market and no active use in this

Mr. WILLIAMS. Whence does the Senator get his figures about the production of shoddy in America and the consump-

tion of it by our mills?

Mr. PENROSE. From an official estimate. I can get the Senator the reference. I have not it here. I have here a good many figures where I have not a memorandum of the source

of my information, but it is official. Mr. WARREN. It is undisputed. The Senator can take that to be comparably true, because the fact is we are not naturally a shoddy country. We are not using shoddy, and we are not manufacturing shoddy at any increasing rate. The only way to increase its use is to let it come in free, and then if our

workingmen are out of work and too poor to buy good clothes, they are imposed upon by dealers selling them shoddy clothes. Mr. PENROSE. I can give the Senator from Mississippi a statement from the Tariff Board report, page 72, as follows:

The greatest shoddy-producing center in the world is in and near Batley and Dewsbury, England: Of the 900 rag-grinding machines in the United Kingdom, Yorkshire, in which Batley and Dewsbury are located, has 881 machines. In the whole of the United States there are only 346 rag-grinding machines.

Less than half the number in one district in England.

Mr. WILLIAMS. Of course it goes without saying that there are more poor people in England, comparatively, than in the United States, and therefore more people who would wear

sholdy.

Mr. WARREN. Why? Why are they poorer?

Mr. WILLIAMS. Because every old country that has exploited its resources to the full has a larger number of people. who must buy cheap goods of every description, if they buy any at all.

Mr. WARREN. Has the eastern or older part of this country

Mr. WARREN. And England has the whole world, and

opens up her ports to everybody.

Mr. WILLIAMS. There is a magnificent free trade in this country from the Atlantic to the Pacific.

Mr. WARREN. England ought to have less poor people and

more prosperity, if the theory of the Senators on the other side

Mr. WALSH. I desire to say, because reference was made to myself in this matter, that if the fact is as suggested by the Senator from Wyoming-and of course we all recognize that it is the fact—that there are in this country people too poor to buy woolen clothing made of the original long fiber, but able to buy clothing made of shoddy, which is nothing more than the short fiber. I should like to have some one tell me why we should legislate to deny to them the opportunity so to do. The only proper way to proceed in that matter is to have some act passed so that a man may know whether he is buying

clothing made of the long fiber, the original wool, or whether he is buying clothing made of shoddy, or renovated rags, or any other waste. So is not this discussion of shoddy and rags ufterly irrelevant to any consideration of the question of the duty on wool?

Mr. WARREN. As to the relevancy, I assume the Senator will give me the same privilege that I will give him. Each one settles the relevancy for himself. As to what advice I would give the poor man, I would tell him to buy honest goods so that

he would know he was getting his money's worth.

Let me ask the Senator a question. I have answered his. he is in favor of having these manufactures of woolens labeled why not put it in the tariff bill? There is a great deal of legislative, executive, and administrative matter in the bill. does not the Senator put it in there? I will vote for it there, if he will put it in.

Mr. WALSH. I dare say the Senator will, but I do not see any reason why we should encumber this tariff bill with general

legislation of that character.

Mr. WARREN. I simply ask the Senator why not put that in the bill. Why have you the present legislative matters in it? Mr. WALSH. I do not see why we should put it in. Why should we not pass it immediately after this bill is disposed of?

Mr. WARREN. Why should we legislate on cotton futures in the pending bill?

Mr. WALSH. Mr. President, that is a revenue matter. Mr. WARREN. This other will have to be a revenue matter, the Senator will find before he gets through with it.

Mr. WEEKS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Massachusetts?

Mr. WARREN. I do.
Mr. WEEKS. The statement just made by the Senator from Pennsylvania to the effect that Great Britain imports rags not only from all parts of Europe but from the United States compels one to the observation that in that free-trade country they are clothing their people in rags and the result is that they are paying old-age pensions. And the purpose of this bill will be put us exactly in the same position to wear shoddy and rags and to give old-age pensions to people who are not able to accumulate and take care of themselves.

Mr. CLARK of Wyoming. Mr. President—
The PRESIDING OFFICER. Does the Senator from Wyoming yield to his colleague?

Mr. WARREN. With pleasure.
Mr. CLARK of Wyoming. It occurs to me we are all agreed that we ought not to clothe the American people with shoddy. The purpose of a tariff on shoddy is not, as the Senator from Mississippi well knows, to protect shoddy manufacturers in this country. It is to that extent—

Mr. WILLIAMS. I did not say that it was its intent. I

said it was its effect.

Mr. CLARK of Wyoming. Well, whatever its effect, that is not the purpose of it. The purpose of it is to keep out as far as possible shoddy and rags gathered from the slums of the earth to put on the backs of our American people to wear. The purpose that is involved in the bill of the colleague of the Senator from Montana is that if a man does wear this stuff he shall purchase it with his eyes open, and as far as possible to keep it out of the American market.

It seems to me that the very history of the shoddy legislation shows that we have kept out by a tariff on shoddy a tremendous amount of this unwholesome material. By putting the shoddy on the free list the country invites an increased importation of it. The only question is whether it is advisable to import it or keep it out. If it is advisable to import in-creased quantities of it, then throw the ports open to it. If it is advisable to keep it out then let us close our ports so far as we can to it.

I do not think it is a question of revenue. I do not think it is a question of protection. It is simply a question of keeping an unwholesome product out from our country and our manufactories. That is the way it occurs to me.

Mr. PENROSE. Will the Senator from Wyoming permit an

interruption?

Mr. WARREN. Certainly.

Mr. PENROSE. While the Senator is giving these interesting figures on the extent of the woolgrowing and wool-manufac-turing industry, I should like to ask him how many men, in his opinion, are employed or directly or indirectly interested in woolgrowing. The impression has been put forth in this discussion by those advocating free wool that only a scanty number of shepherds here and there, at very low wages and not of very high character, are much concerned about the industry. If the Senator has the figures

Mr. WARREN. Does the Senator refer to those who are interested in sheep and woolgrowing and wool manufacture I do not refer to the manufacture of wool, Mr. PENROSE.

but to woolgrowing.

Mr. WARREN. Those who have given it a life study maintain that at least a million people are interested in woolgrow-Of course, there are not a million shepherds or a million herds of sheep, but that is estimated to be the number of those who are interested in the industry.

Mr. JAMES. I should like to ask the Senator a question. The PRESIDING OFFICER. Does the Senator from Wyo-

ming yield to the Senator from Kentucky?

Mr. WARREN. I shall after a moment. Now, as to the character of the sheep industry, it may serve the purpose of advancing the interest of this tariff bill to review the character of a certain class of workingmen. I know of no industry except of a very highly skilled or scientific nature but that has in its employment some low-priced and ignorant men. But, as I said yesterday, so far as the sheep herders are concerned in Wyoming, they are equally as intelligent as any other class of people. I said truthfully that many college graduates took up that avocation, some to learn it because they wished to interest themselves in it, others because it was a healthful avocation. I have here, which if it was not too long I would ask to put in the RECORD, a story in the Living Age copied from Blackwood's Magazine, written by a sheep herder doing the ordinary sheep herder's work. The reading of it will show a very highly educated man and a very fluent writer. I should be glad to loan it to the Senator from Pennsylvania or any Senator who believes that that industry may not have intelligence in its employees.

Mr. PENROSE. I do not believe that. I do not want to have

that impression conveyed.

Mr. WARREN. I know very well you do not. I now yield to

the Senator from Kentucky.

The Senator has been telling us about the de-Mr. JAMES. velopment of the sheep industry. Could the Senator tell us how many States of the Union produce more wool than the people in those States consume?

Mr. WARREN. I do not know that I have the statistics here at hand at this moment for that kind of a comparison. It would be very easy to figure it out. But perhaps the Senator will tell me what he wishes to follow that with?

Mr. JAMES. I want to ask the Senator if it is not true that only 10 States in the Union produce more wool than the people in those States consume?

Mr. WARREN. What would be the inference? Mr. JAMES. The inference is that the people of various States—for instance, of Kentucky, where they produce about 3,000,000 pounds of wool—are being taxed to buy 14,000,000 pounds of wool; and the industry, however much it has developed, the Senator, of course, can not deny that in the last 10 years the sheep production has fallen off about \$12,000,000. Mr. PENROSE. Will the Senator from Wyoming permit me?

Mr. WARREN. Will the Senator allow me a moment in

answer to the Senator from Kentucky?

I wish first to say that I have already proven that such figures of decrease are not correct. And, Mr. President, we have to support this Government. It is going to be done partially by taxation. I am one of those who believe that we can tax the foreigner when he comes in here for his license to trade and do business in our market; and if a man is not engaged in woolgrowing and he pays 15 or 20 cents, or a dollar even, more for a suit of wool clothing, he has contributed that much to help support the Government.

If there are so many States But now turn it another way. that do not raise wool, compare that with the manufacturing of woolens. There are surely fewer woolen manufacturers than there are sheepmen, and yet the sheep grower and everybody else is assessed on the Senator's theory to pay the tariff on

woolen goods.

Now, I will put a question to the Senator. How many States are there in the Union that grow more rice than they consume?

Mr. JAMES. There are very few States that grow more rice than they consume.

Mr. WARREN. Yet you tax them all.

So far as I am individually concerned, I am no Mr. JAMES. advocate of a tariff upon rice. It is only for the purpose of obtaining revenue. If rice were as universally used as clothing and as essential, then there might be something in the Senator asking me the question as to how many States produce more rice then they consume.

Mr. WARREN. Of course the Senator understands the situa-on. I have been in the game. I have heard it stated on this floor, on both sides by eminent men, that no man ever in the

Senate or House voted for a tariff bill that suited him in all its particulars. Of course we may all have things in any bill to which we may object. But the Senator's explanation of rice does not explain, because I do not know of a table in the country where rice does not appear as a matter of food.

Mr. JAMES. Mr. President-

Mr. WARREN. I yield to the Senator. Mr. JAMES. I think the Senator is entirely mistaken about rice being of as universal consumption as he states. I am not familiar with the West, but I would say that in Kentucky there are not 2 families out of 10 that use rice.

Mr. WARREN. There are a great many families that use

little or no wool, especially in a warm climate.

Mr. JAMES. The point I am trying to call to the attention of the Senator is that 38 States in the Union produce less wool than they consume, and I am going to put into the RECORD before this argument is through a statement of the inhabitants in each State and the number of pounds produced in each State and the amount of wool consumed by the people of each State, so that the public may know how much each State is being taxed for the purpose of growing the number of sheep that are produced there.

Mr. WARREN. I should like, if the Senator will give me notice then, to file as accurately as I can the number of States which have woolen and cotton factories, and the States which do not have such factories. The inhabitants of all the States must pay the tariff attached to the duty on cotton and woolen goods. If the Senator is logical he must of course take the tariff off of everything that is consumed or worn provided there are more people in every State engaged in other businesses, and so forth.

Now, suppose it is true, as the Senator states, that we have fewer sheep than produce the amount of wool used in each State, that is all the more reason why, if it is an industry which ought to be protected, we should protect it. It is not a matter of wool alone. The Senator did not do me the honor to remain while I was discussing the mutton end of the proposition. Where will we be in the matter of meat if we do not raise mutton in this country? The sheep industry in this country so far has never reached the stage, admittedly on all hands, where it will pay on the wool alone or on the mutton alone, but in raising wool and mutton together we greatly increase the mutton crop, we keep the price down, and that contributes to keeping the price of hog and cattle products down.

Mr. JAMES. If the Senator will permit me, I do not think he can liken an argument which he has just made that this tariff upon wool was solely for the benefit of the farmer to the proposition as to how many manufactories of woolen goods there are in the country. The point of the question I asked the Senator was to try to develop what he has to say, as he has argued that this tariff was for the benefit of the farmer, on the proposition as to the number of sheep upon the farms, as to the amount of wool produced in each State, as compared with the amount

that the people in that State consume.

Mr. CLARK of Wyoming. I hardly think that the suggestion of the Senator from Kentucky is entirely responsive to the situation. I hardly think that he should consider the amount of a particular article in a single State and compare it with the amount of that article consumed elsewhere. My own notion is that we should consider the amount of that article produced in the United States, and then the amount of that article consumed in the United States. My own belief is that we ought to raise everything so far as we can that is consumed here; in other words, that we ought to direct our money into such channels in our purchases that it would go to the benefit of the people of the whole United States rather than flow out of the United States in channels to other countries.

Now, if we can produce all the wool that we use here so much the better for this country. If we produce only one-half of the wool that is used here, even though that were all produced in one State, we must send out of the country the money for the other half that otherwise would be retained here. That is the

way it occurs to me.

Mr. JAMES. But I will state to the Senator-

Mr. CLARK of Wyoming. And if you come down to levying a tax with reference to a single State of the Union or upon products which may be produced in only one State of the Union, it seems to me it is begging the question.

Mr. JAMES. That may be the Senator's opinion, and of course it is, but I made the inquiry for the purpose of demonstrating that this argument which he has made that the tariff upon wool is all for the benefit of the farmer can not be sustained, because the great majority of the farmers, nine-tenths of the farmers of this country I may say, are burdened with this tariff upon wool instead of benefited, and it is only

the great sheep owners of certain regions of the United States that are favored by this tariff. The argument that it is for

the farmers as a whole can not be sustained.

Mr. CLARK of Wyoming. I was making no argument for Of course, I recognize that the Senator from Kentucky and myself can not meet on any common ground in regard to the farmer because the Senator from Kentucky has the view that it is the best thing for the people of this country to buy where they can buy the cheapest, no matter where they go for it. I take the opposite view, that a protective tariff even if it does raise the price to the consumer, and that is denied by some, is on the whole a benefit to that consumer and the whole country. Consequently we have no common ground upon which we may start an argument.

But I think the Senator will agree with me that if we can raise all we need to use here it is so much the better for this country, because it gives employment here where otherwise the employment would be abroad, because it keeps men at work here where otherwise they would be idle here and be at work abroad. It seems to me to be a broader question than is covered by mere State lines or any individual locality where

any particular product may be produced or manufactured.

Mr. JAMES. My position is simply this, that the taxing power of the Government can not be used except for the purpose of obtaining sufficient revenue to run the Government honestly and economically administered and that the power of taxation can not be legitimately or righteously used for the purpose of taking money out of the pockets of the masses of men in order

Mr. CLARK of Wyoming. I understand the Senator's argument, but I will say that in this bill the Democratic Party are deliberately slaughtering their sources of greatest revenue. Here you are throwing into the waste heap \$15,000,000 revenue by this very wool item, and on sugar two or three times that amount. Your revenue-producing-tariff theory you are carrying

Mr. JAMES. The Senator says we are throwing it into the waste heap. It may be that to leave in the pockets of the people-Mr. CLARK of Wyoming. I withdraw that phrase.

Mr. JAMES. It may be that when you fail to tax the people you are throwing it into the waste heap, but the more we throw into that sort of waste heap the happier the people will be.

Mr. CLARK of Wyoming. I will withdraw the phrase.

mean that you are sacrificing the revenue. This is supposed to be, as I understand it, a bill for the purpose of raising revenue for the Government, and you are throwing away a vast quantity of revenue on the various items. You are supplying that revenue, or attempting to supply it, by a direct tax. Under the estimates on the bill, if carried out to the fullest extent, you have a bare \$3,000,000 over and above what you estimate the expenses of the Government will be for the succeeding year.

Mr. JAMES. I can not agree with the argument made by the Senator that any Government is throwing away money which it fails by taxation to take from the people.

Mr. CLARK of Wyoming. Oh, Mr. President, I withdraw the word "waste."

Mr. JAMES. To leave it in the pockets of the people is not throwing it away

Mr. GALLINGER. Will the Senator permit me?
Mr. WARREN. Certainly.
Mr. GALLINGER. I have been quietly seeking light during this debate as to exactly what a tariff for revenue means, T think I understood the Senator from Kentucky to say that he was only exacting from the people taxes sufficient to maintain the Government and pay its running expenses. Now, does the Senator mean to say that he would not in a tariff law make any provision to equalize in any way the difference in cost between foreign countries and this country, but that he would put us in open unrestricted, unqualified competition with all other nations of the world?

Mr. JAMES. In making a tariff bill, I would not tax the whole country as the Senator would for the purpose of protection. I would have in view the purpose of obtaining revenue, and the purpose of obtaining revenue, of course, being the primary purpose for which the bill was framed, the question of protection would not and could not be considered. in this bill.

Mr. WARREN. At the same time it would follow as an incident of protection.

Mr. JAMES. If it follows, it is not the purpose that it should follow in the making of the bill.

Mr. WARREN. But it does follow.
Mr. JAMES. It may be incidental.
Mr. WARREN. The Senator admits it does follow.

Mr. JAMES. Not always; it sometimes follows.

Mr. WARREN. But generally.
Mr. JAMES. The difference between our party and yours is that you legislate for the purpose of enriching a favored few in giving them protection, or the right to tax all the people and lose sight of the Treasury, when the constitutional right of taxation exists not for favored interests, but for the Treasury of all the people, and we legislate for the Treasury, and do not look out for the favored few.

Mr GALLINGER. Mr. President, the Republican Party has been taking pretty good care of the Treasury all through its history. The only trouble we have had with the Treasury has been when the Democratic Party has been in power. But the Senator does not frankly answer my question. Did the Senator mean to say exactly what he did say, that he was in favor of a tariff for revenue only, without any reference to the difference between the cost of production in this country and European and Asiatic countries? Is that the attitude of the Senator?

Mr. JAMES. Just exactly as I said I was. My language I think is susceptible of fairly good understanding.

Mr. GALLINGER. I think I understood the Senator.

I am in favor of a tariff for revenue only. The purpose of the Democratic Party and my purpose in supporting the bill is not to give protection to anybody but to secure sufficient revenue to run the Government and at the same time to keep the markets of this country unmonopolized, untrustized, and uncontrolled as they have been trustized and monopolized and controlled by legislation of the Republican

Mr. GALLINGER. I do not know what "trustized" means, so I will not try to answer that.

Mr. JAMES. It is not very frequently that the Republicans

do know what that means.

Mr. GALLINGER. Does the Senator mean to say that if he could construct a bill that by levying an income tax and an internal-revenue tax of that kind would meet the expenses of the Government he would be unwilling to place anything in that bill which would protect the laboring people of this country in getting twice the wages that are paid abroad, and that he would open all our markets to foreigners to take possession Is that the Senator's position? of them?

Mr. JAMES. I am not in favor of protection in any form or in any shape because there never was an argument in favor of a protective tariff which could be advocated upon any other theory except that it takes from the pockets of all the people the money that they themselves earn and gives it to somebody

else who never earned it.

Mr. GALLINGER. The Senator is in open conflict with the views entertained by all the great Democrats of this country until a very recent period of its history

Mr. JAMES. I am not in open conflict with the platform of the Democratic Party adopted over here at Baltimore. I am

in absolute accord with that.

Mr. GALLINGER. I think not. When the Senator is advo-cating free wool I think he is in direct opposition to it.

Mr. JAMES. I think I demonstrated here at least to the satisfaction of a good many people, if not to the satisfaction of the Senator, that the Democratic Party had indorsed free sugar. At a future time I perhaps shall have something to say upon that point in the argument of the Senator.

Mr. WARREN. Mr. President, if I could reconcile the views of a free-trader Democrat with those of an old-line protectionist by permitting the debate to go on here all the afternoon, I should consider it the happiest and best afternoon of my life. But as we can not do that, and as the Senator has now propounded some interrogatories to me, I wish to make this ob-The Senator uses a phrase that has become now common and hackneyed. I say it with all respect, of course "taxing the pockets of all the people to benefit a few." Ever tax that you put on, whether you put it on for revenue or protection, brings the same result, if it enhances the cost of the thing you take it from, whether all are engaged in producing it or not. In the bill that is before us, in the items generally upon which you have preserved a tariff, you take it out of my pocket and yours and everyone else's to pay that tariff or tax, upon your theory. When you come to the tariff on wool I wish to remind you that it has reached nearly \$20,000,000 revenue to the Government in one year, and as my colleague has stated, \$14,000,000 or \$16,000,000 per annum generally. Now, how much revenue will rice produce on the tariff which you have assessed? We will now treat it as a matter of in-

come from revenue.

I maintain, Mr. President, that, taking the matter of revenue alone, that collected on wool and woolens stands next to that on sugar, and sugar is at the head of the list of all revenue

To strike off all the protection immediately from wool-one of those products that have been protected for nearly to ruthlessly strike it off, and still retain it upon rice and a few matters like that to obtain that revenue, does not seem to be logical, but sectional, if not political.

I might allude to whisky produced in Kentucky. The answer probably would be that that pays an internal-revenue tax. Nevertheless there are only a few States in the Union where they make whisky, while there are a great many States where they drink it.

Mr. JAMES. But the difference between whisky and wool

Mr. WARREN. There is a lot of difference. Mr. JAMES. The difference is that wool is a necessity and whisky is a luxury. There is no protective duty on whisky, but there is an internal-revenue tax, which is a burden to the production of whisky. If there were a consumption tax upon wool, there would not be any protection to the wool industry of the country.

Mr. WARREN. Mr. President, I remember a time when there was no tax on whisky and when the price of wool in this country was very high owing to Democratic legislation, and the scarcity of sheep and wool that followed. I do not know that it became an article of common necessity then, any more than it is now.

I shall, however, return to my remarks.

## INDUSTRY SAVED BY DINGLEY ACT.

The Dingley Act, of July 24, 1897, made a phenomenal change for the better from the distressing times of the Wilson-Gorman tariff period. Although our markets were overstocked with foreign goods, our home industries revived almost immedi-In 1896 the number of sheep was 36,818,643; the value, \$67,020,942. In 1898 the number was 39,114,453; the value, \$107,697,530. Thus in two years the number of sheep increased over 6 per cent, and the value 60 per cent.

Mr. President, it is constantly being thrown up to those who advocate adequate duties on wool and its manufactures that the wool industry has not prospered under the Republican tariff policy, and figures are quoted to show that we have fewer sheep in the country than we had four, five, or six years ago. In 1897, the last year of the Wilson-Gorman tariff, we had in this country 36,818,643 sheep, valued at \$67,020,942; in 1913 we have 51,482,000 sheep, valued at \$202,779,000. (See Statistical Abstract, 1912, p. 194.) Thus under the 16 years of the Republican tariff policy the number of sheep in the country has increased 14,663,357, or about an average of 900,000 a year. Their value has increased \$135,759,058, or about 100 per cent.

The amount and value of the wool production in the country

in 1899 was:

_____pounds__ 276, 567, 584 ____\$45, 670, 053 Production_ Value ____

The amount and value of the production in 1912 was:

Production _______pounds__ 304, 043, 400
Value _______ \$75, 819, 251

Thus the increase in annual production in 14 tariff years was 27,475,816 pounds, or 10 per cent; and the increase in annual value was \$30,149,198, or 663 per cent.

The census reports on wool manufacturing show that in 1900 the wages paid in wool manufactories amounted to \$57,933,817; in 1910 the amount was \$87,962,669, an increase in 10 years under the Dingley tariff policy of \$30,028,852, or over 50 per

The reports show that the value of wool manufactures in the United States in 1900 amounted to \$296,990,484; the value in 1910 was \$507,166,710, an increase of \$210,176,226, or 70 per cent. (See Statistical Abstract, 1912, p. 779.)

On the other hand, the importations of raw wool in 1897, the last year under the Wilson-Gorman tariff, amounted to 350,852,-026 pounds. The importations for 1912 were but 191,680,843

The importations of manufactures of wool in 1896, under the Wilson-Gorman Act, amounted to \$56,582,432, and in 1897 to \$49,162,992. The importations for 1912 under the Dingley Act policy amounted to but \$14,912,619.

The general trend of the period under the Dingley and Payne Acts has been in the direction of increased production over the period of the Wilson-Gorman Act in number and value of sheep and in quantity of wool.

The trend in the use of foreign wool and the use of foreign manufactures of wool under the Dingley and Payne Acts has been downward, while under the Wilson-Gorman Act it was phenomenally upward.

This brings to mind the reported saying of President Lincoln that, while he did not profess to understand the tariff question, yet it appeared to him that-

When an American paid \$20 for steel rails to an English manufacturer, America had the steel and England had the \$20. But when he paid \$20 for the steel to an American manufacturer, America had both the steel and the \$20.

UPS AND DOWNS OF WOOL INDUSTRY.

The woolgrowing industry has had many hard scares thrown into it during the period of protective duties, tending in great degree, at times, to "bear" wool prices and discourage those en-gaged in woolgrowing. Hanging over the industry for years was the reciprocity treaty with Argentina, proposing to let wool in from that country at reduced tariff rates. At all times has there been tariff agitation with wool as the storm center and point of attack-facts not overlooked each wool-selling season by some buyers in their efforts to beat down prices.

The woolgrowing industry also has had to contend during the past five years with the vicissitudes of droughts in summer followed by extremely severe winters, which in some parts of the western sheep-growing country decimated the flocks of the growers. Troubles of this kind, with consequent heavy losses, drive the woolgrower to send his remaining stock to the shambles, and the number of sheep in the country thus depre-

I note that the junior Senator from Montana [Mr. Walsh] referred to President Taft's alleged remark that Schedule B of the Payne-Aldrich Act was indefensible; and few Democratic speeches are made that do not quote that remark. If President Taft ever made the statement in the form attributed to him, it was neither a careful nor correct designation of Schedule K. In passing, I would say that practical business men do not now, and did not during his term as President, regard Mr. Taft as an infallible authority on the tariff. His education on the subject was gained largely in the classroom and not in on the subject was gained migery in the classicold and all the plowed field or the mercantile establishment, where practical truths rather than alluring theories are obtained.

If the views of the present Chief Executive had not also been acquired almost wholly within college confines, many of our

citizens would be less inclined than they now are to designate them as tinged with pedantry, and would have more confidence in seeing them put into effect in connection with the great business affairs of the present day.

President Taft may have thought and may have said that Schedule K was indefensible. If so, his view was that of one not familiar with the details of the woolgrowing and woolmanufacturing industries.

Later, when an exhaustive investigation was made by the Tariff Board of the woolgrowing and wool-manufacturing in-dustries, facts were placed before the country showing conclusively that Schedule K is defensible and that the rates of duty on raw wool carried by the Dingley and Payne Acts are not unreasonably high and are not beyond what is required to equalize the competition between the higher cost of production in this country and the lower cost in Argentina, Australia, and other large-producing foreign countries.

#### TARIFF BOARD FINDINGS.

The findings of the Tariff Board were made from investigations of the woolgrowing business covering 173 counties in 19 States. Nearly 1,200 wool growers were visited and interviewed by expert agents of the board, and special agents gathered information from Australia, South America, England, and the Continent.

In regard to wool manufacturing, information was obtained from 174 mills situated in 20 different States, representing 46,000 looms, 1,900,000 producing spindles, and 109,000 employees

Complete investigation was made in reference to wages and

efficiency of labor and machinery.

In its findings the board reported that it costs more to grow wool in the United States than in any other country; that the merino wools required in such great volume by our mills are the most expensive of all wools produced; that the highest average cost of production of such wool in the world is in the State of Ohio and contiguous territory; and that the lowest average cost of producing similar wool is in Australia.

The board also found:

That after crediting the flock with receipts from all sources other than wool, the latter product, in the case of the fine merino wools of the United States, is going to market with an average charge against it of not less than 12 cents per pound, not including interest on the investment.

That the fine wools of the Ohio region are sold bearing an average charge of production of 19 cents per pound.

That in the States east of the Missouri River wool production is incidental to general farming. Here producers, with the exception of certain named districts, lay more stress upon the output of the mutton than of wool, and in such cases the receipts from the sale of sheep

and lambs ordinarily cover the flock expense, leaving the wool for profit. The position of the fine-wool producers, however, not only of the Ohio region but of the far West, is radically different.

That in the western part of the United States, where about two-thirds of the sheep of the country are to be found, the "fine" and "fine medium" wools carry an average charge of at least 11 cents per pound, interest not included.

That if account is taken of the entire wool production of the country, including both fine and course wools, the average charge against the clip is about 9½ cents per pound.

That in South America the corresponding charge is between 4 and 5 cents per pound.

That in New Zealand and on the favorably situated runs of Australia it seems clear that at the present range of values for stock—sheep and mutton—the receipts from other sources than wool are carrying the total flock expense. So that taking Australasia as a whole it appears that a charge of a very few cents per pound lies against the great clips of that region in the aggregate. While the hoard can not, therefore, undertake to name an exact figure in that case, it is certain that the Australasian costs at large fall materially below the South American.

That in the western United States the capitalization per head of sheep (exclusive of land) is \$5.30, upon which a gross profit of 6.2 per cent was realized. The interest rate in that region ranges from 8 to 10 per cent per annum.

That the labor, forage, and necessary miscellaneous expense in the western United States exceed \$2 per head per annum, as against an estimated cost, covering the same elements of expense, of less than \$1 in Australia and about \$1.15 per head in South America.

As shown in this finding of the Tariff Board, no interest on investment nor wayers of the farmor and mambars of his femily.

As shown in this finding of the Tariff Board, no interest on investment, nor wages of the farmer and members of his family,

and so forth, were included.

Thus, with South America and Australia having an advantage over the United States in cost of production of from 43 cents to 5 cents per pound, it can not correctly be maintained that the duty on wool, which, after undervaluations, and so forth, are considered, nets about 4 cents per pound protection, is inde-

What will happen to the wool industry when the great woolproducing countries of Argentina and Australia have free access to our markets, with their advantage over us of a lower cost of

production of from 41 to 5 cents, is easily imagined.

It will be noted from the report of the Tariff Board that the

labor, forage, and necessary miscellaneous expense in the western United States exceed \$2 per head per annum, as against an estimated cost, covering the same elements of expense, of less than \$1 in Australia and about \$1.15 in South America.

In his speech on August 2, defending the pending tariff bill, the junior Senator from Montana [Mr. Walsh] said that it is growing more and more expensive to run sheep in the West, because of the narrowing of the range, and I agree with him.

The woolgrowers, therefore, can not reduce the forage expense in order to compete with Australia and South America, and I know they are averse to reducing the wages of their employees; so it will only be left for them to follow the advice of some of the advocates of the free-wool idea, and that is to get out of the wool-growing business.

AUSTRALIA AND ARGENTINA A MENACE.

In the Washington Post of July 18, 1912, there appeared a brief cable message from Melbourne, Australia, which to me was the most significant item of news in the paper. It was as

MELBOURNE, July 12.

Pounds.

The Right Hon. James Bryce, British Ambassador at Washington, speaking at a banquet at the Chamber of Commerce last night, said there was a great prospect of a substantial reduction in the American tariff. One of the first items, he said, was likely to be that in regard to wool. He would not be surprised if quite a substantial reduction were made, which would increase considerably the volume of the Australian exports to the United States.

It is needless for me to say that former Ambassador Bryce is one of the keenest observers of political affairs in the world, and perhaps more accurate than any other man in public life in determining what the effect will be of any given political or economic cause.

When he says that if a substantial reduction were made in the tariff on wool it would increase considerably the volume of Australian exports to the United States, he states with unerring precision the results which would follow the annihilation of tariff on wool proposed in the pending bill.

The results would be increased importation of wool from Australia into the United States. The same cause which would enable Australia to increase its wool shipments to the United States would enable South America to do exactly the same thing.

The wool clip of the world for 1912 was as follows:

United States	302, 343, 400
British America Mexico and Central America	11, 210, 000 8, 000, 000
South America	554, 622, 955 814, 077, 011
Asia	273, 146, 000 174, 919, 000
Australasia	832, 861, 846
Total, world	2, 971, 180, 212

The number of sheep in the world, according to the most recent available statistics and estimates, is as follows:

United States	52, 836, 168
Canada, Mexico, etc	6, 211, 512
Argentina, Uruguay, etc	109, 693, 142
	170, 516, 437
Asia	110, 058, 874
Australasia	51, 429, 279 117, 026, 774
Australiasia	111,020,114

The countries producing vastly more wool than they use are Argentina, with a clip last year of 368,151,500 pounds; Uruguay, 138,332,375 pounds; and Australia and New Zealand, 832,861,846 These are the wool-producing countries of the world where the industry can increase beyond their present production. These are the countries waiting eagerly to furnish wool to the United States as soon as our own industry is crippled or destroyed by the elimination of the protective tariff.

Australasia is in the market to sell nearly all of the wool raised. Thus, in 1912 the production was 832.861,846 pounds;

the amount exported practically the same.

Argentina also is a big wool producer and a small consumer. Practically the entire clip of Argentina is exported. The exports for 1909, the latest year on which the Tariff Board gives figures, aggregated 353,362,000 pounds, nearly the entire clip of The exports for 1912 amounted, according to the Annual Wool Review, to practically the entire clip, which was 368,151,500 pounds.

Thus we have two great woolgrowing countries-Argentina and Australia-in the market with over a billion pounds of wool, ready to crowd into the United States and capture our home market, which consumes 500,000,000 pounds annually, just as rapidly as our home woolgrowing industry recedes under the loss of the protective duty which stands between it and foreign competition.

Distance of Australasia and Argentina from us forms no protection, for ocean freight rates on wool from Buenos Aires to Boston range from 17½ cents to 23½ cents a hundred pounds.

Rates from Australia to Boston direct are from \$1 to \$1.371 per hundred pounds.

The average rate from the Rocky Mountain region to Boston is over \$1.75 per hundred pounds.

This, then, is the menace to the woolgrowing industry of this country of this wool-tariff removal. It cuts off the license fee we charge the Australian and Argentinian woolgrowers for doing business in this country, and gives them the opportunity to take advantage of the cheaper labor, lower rate of interest, and more advantageous climatic conditions they enjoy, so that they can, first, undersell our growers and destroy their industry; and, second, secure and hold the wool market of the United States.

If the sacrifice of the woolgrowing industry meant cheaper clothing for the people of the United States, the woolgrowers might submit with patriotic resignation, but those who have observed the effects of tariff reduction know that it does not mean cheaper goods for the consumer.

It will be observed that Mr. Bryce, in his prediction of what will follow tariff reduction, does not include lower prices to the He does predict that Australia will find a market in the United States for its surplus wool, of which it has over

800,000,000 pounds every year. It may be contended that our woolgrowing industry has nothing to fear from Australia because the industry in that country is not increasing in proportion to the increase in its population and its industries other than woolgrowing.

While, in fact, the industry in Australia has not kept pace with other industries and population, yet conditions are such that, with the encouragement of having our markets opened to the wool producers of the world, the Australia wool industry

can immediately take great strides forward.

Mr. PITTMAN. Mr. President—

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Nevada?

Mr. WARREN. I do. Mr. PITTMAN. The rates that the Senator from Wyoming has given are the rates of transportation by water from Australia and Argentina to the coast points of the United States, I assume?

Mr. WARREN. Yes.

Mr. PITTMAN. And the rates from the interior of the United States to the same coast points of the United States?

Mr. WARREN. As taken from certain railroad points. Mr. PITTMAN. Has the Senator from Wyoming the rates from the interior points in Australia to the seaport points in Australia, and from the interior points in Argentina to the shipping points in Argentina?

Mr. WARREN. I understand perfectly what the Senator desires to get at. Of course, there is there no regular rate from all the different points on a few sacks here and a few sacks there from the interior any more than there is here; but let me say that I have given that matter a good deal of attention. I find that in Australia, with its many seacoast points and streams that are navigable for flatboats and rafting, its wool can be gotten to water cheaper than our wool can be gotten to the railroad, because here sheep are in those sections away from the towns and generally pretty far from railroads, and there is a very large expense in getting wool by wagon haul from the shearing pens to the railroad. So I have offset one with the other.

Mr. PITTMAN. Has the Senator any figures on that?
Mr. WARREN. Mr. President, I have spent hours figuring
on it, but, as I have stated, there has to be a difference in the
rates from each shearing pen, perhaps, and from each farm. So it is difficult to arrive at anything but an average.

Mr. PITTMAN. Do not the great ranges of Australia and Argentina bear the same relation to their shipping ports as do the ranges of the West to the shipping ports of the United

States?

Mr. WARREN. They do not. Mr. PITTMAN. Why not?

Mr. WARREN. Because the interior of Australia is not settled up, as is the interior of the United States.

Mr. PITTMAN. How does that affect transportation?

Well, it is because there the sheep are raised not so far away from the water shipping points, while here they are raised in the very central and interior part of the

Mr. PITTMAN. If the Senator will permit me on that point, before we go any further I will say that the Tariff Board seems

to differ with the Senator.

Mr. WARREN. Let me say that I do not want to be put in the position of differing with the Tariff Board, and am not going to be. There are different statements in their report which should be considered together and not in pieces and apart, and I happen to remember that the Senator from Nevada, although his argument yesterday was largely—yes, almost entirely—based upon the report of the Tariff Board, expressed complete disagreement with it, and said it was a partisan board

and that he could not depend upon it. In fact, he discredited it.
Mr. PITTMAN. If the Senator will recollect, I said that in all of their mistakes they erred in favor of a high protective

tariff.

Mr. WARREN. And I do not agree with that. I remember that they were a bipartisan board, and while it is the Senator's privilege to say that they made a report from a high protective

standpoint, it is equally mine to say that they did not.

Mr. PITTMAN. If the Senator please, I will read from the Tariff Board report, page 333, what is said about the ranges so far as markets are concerned in Australia and the United States. They discuss the fact that in Australia they do not ship much mutton to market on account of the remoteness of the sheep runs from the seacoast ports, while in the United States, by reason of the transportation facilities in the interior, we ship a great deal of mutton. Here is the language of the report:

The fact that the average investment in the flock is lower in Australia and in South America than in the United States is due to the greater average distance of the sheep runs from the market.

Mr. WARREN. Well, that is true; they are farther from Boston than we are.

Mr. PITTMAN. They are farther from their local market.
Mr. WARREN. The Senator speaks of the distance of the
sheep runs from the market. Perhaps the Senator will not remember-he is a younger man than I am-but I can remember when it was unsafe to ship more than one full car of sheep into the Chicago market. There was no great market until we got down to Buffalo or Albany. It is only within a short time that there has been a market for shipping frozen meat-and that is the only way it can be shipped from Australia-but that business is now being carried on very extensively. I have some quotations here from the Tariff Board report as to Australia which I will put in the RECORD.

Mr. WALSH. Will the Senator from Wyoming permit me to

interrupt him?

Mr. WARREN. Certainly.

Mr. WALSH. I have had no desire in connection with any participation on my part in this debate other than to assist in eliciting actual facts. I can speak with some degree of familiarity with the conditions in my State, and there the shearing pens are, with very rare exceptions, at the railroad points.

Mr. WARREN. I am quite well acquainted with the condi-

tions in Montana.

Mr. WALSH. I should like to inquire of the Senator if they

are different in his State.

Mr. WARREN. I will say to the Senator that he is quite right so far as a good portion of his State is concerned. Montana is favored with a great many transcontinental railway lines; she is pretty well gridironed with railroads; and in that country they handle sheep differently. They handle them largely

in wagon camps, do they not, and from wagon camps?

Mr. WALSH. Oh, yes.

Mr. WARREN. Of course, they take their wagons, their men, and their supplies—at least they heretofore have done so, but they will not hereafter, according to the evidence the Senator has already submitted—and they graze their sheep wherever they may be down to the shearing pens, and therefore are near the railroad. That is not true now in Wyoming to any great extent, because of the settling of the country here and there, and because we have not the railroad facilities which Montana What is true of Wyoming is true of some of the other States. There is a large amount of money paid to get wool from the points where it is sheared to the railroads in my State and in some of the other States; but that is not so much true of Montana, where the business is carried on by wagon camps.

Mr. WALSH. Of course, 20 years ago the conditions to which the Senator adverts were quite common. For instance, it was common to haul wool from the Judith Basin to Fort Benton to ship it down the river, a distance of perhaps 150 miles; but those conditions do not exist to-day. The shearing pens, as I have said, are, with very rare exceptions, at or near the railroad

stations.

Mr. WARREN. That works both ways, Mr. President. Only 20 years ago we could graze sheep from any part of Wyoming down within 75 miles of Omaha, but we can not graze them now across one State.
Mr. PITTMAN.

Mr. PITTMAN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Nevada?

Mr. WARREN. I do. Mr. PITTMAN. I trust the Senator will pardon me for interrupting him again, but the question of freight rates is very important in this consideration. The only freight rates the Senator has really attempted to give us are the freight rates from the seaports of foreign countries to our seaports. We are contending that the transportation from the interior of our country to our own seaports is less, if anything, than the transportation from the interior of other countries to their seaports. by reason of more favorable transportation conditions existing in the United States than in those foreign countries. I will read what the Tariff Board says with regard to this very The Tariff Board, in discussing the reason why in Australia they do not ship mutton, but ship wool-

Mr. WARREN. Would the Senator as soon wait until I reach a little later point in my remarks where what he suggests would relate more clearly to the points I desire to make?

Mr. PITTMAN. It is only three lines.

Mr. WARREN. Very well. Mr. PITTMAN. The Tariff Board says this:

In Australia the receipts for mutton constitute a much smaller portion of the receipts than from other sources. This is partly due to the fact that the great sheep runs of the interior are unfavorably situated as regards marketing.

I thank the Senator for his courtesy.

Mr. WARREN. Mr. President, I notice that there seems to be quite a silence on the other side concerning the freight rate of 171 cents to 20 cents from Buenos Aires. I have known it to be less than that. If there is to be continued contention regarding the matter, I shall be glad to get bills of lading and freight bills to show what is really paid for bringing wool from certain points in New Zealand, Australia, and Argentina to the United States. I have seen many of them.

Now, I will make a few comparisons between the conditions in Australia and in our country. They may not be amiss at this

The aggregate area of the Australian woolgrowing States is 1,903,731,840 acres.

The aggregate area of the United States, exclusive of Alaska and our insular possessions, is 1,937,144,960 acres.

The Australian Commonwealth is approximately the same size as the United States.

The alienated lands in Australia amount to 130,393,166 acres; the leased lands, 787,211,488 acres; leaving an area of 986,127,186 acres unoccupied.

The alienated and reserved lands in the United States amount to 1,609,754,992 acres, leaving 327,389,968 acres unappropriated and unreserved.

A large part of the 986,127,186 acres of unoccupied land in Australia is suitable for sheep raising.

The Tariff Board, in its exhaustive study of the wool business

The Tariff Board, in its exhaustive study of the wool business in Australia, reports (p. 492, Report on Schedule K):

Woolgrowing on inland leaseholds in Australia has often been described as a "gamble" from the financial point of view. Such it must always remain to some extent, but the risks are everywhere being substantially diminished, while the profits continue sufficiently high to stimulate enterprise. The losses caused to the pastoral industry by the great drought which terminated in 1902 have been estimated at \$650,000,000. That disaster taught lessons of prudence which can never be forgotten. The industry is now being worked on safer lines, and the protective measures taken by those engaged in it will soon be strengthened by the Government rallway and water-conservation policies. In the opinion of men who have had a long acquaintance with the industry, Australia should ultimately be capable of carrying at least 150,000,000 sheep, while providing for a greatly increased export of mutton.

With an area of unoccupied land of over 900,000,000 of acres open for the extension of the sheep-raising industry; with a labor cost of \$1 per head of sheep against \$2 per head in the United States; with a cost of from 4½ to 5 cents less per pound for growing wool than in the United States; with the great market of this country of over 500,000,000 pounds per annum opened invitingly to the foreign woolgrower; and with a government administration friendly and helpful instead of hostile to the industry, we may well believe with Mr. Bryce that the volume of Australian exports to the United States will be greatly increased.

The production of wool in Australia, while not keeping pace with the population growth, has nevertheless been steadily in-

creasing during the last decade.

In 1903 the production in the Australian States aggregated 414,120,567 pounds; in 1912 it was 662,845,907 pounds.

In 1903 the number of sheep in the Australian States was

56,932,705; in 1911-12 the number was 92,742,034.

It is generally asserted that the woolgrowing industry of South America has reached its apex and that we have nothing to fear from competition from that source. The wool production of the two great South American woolgrowing countries, Argentina and Uruguay, has not increased in proportion to the increase in their recognition or in proportion to the increase. to the increase in their population or in proportion to increases in agricultural industries other than woolgrowing. But Argentina is preparing to take advantage of the opportunities for increased trade and profits which will be offered through the removal of the duty on wools sent to the United States. For some time past the Government of Argentina has been offering liberal inducements to stockmen to go into the sheep business in Patagonia.

Mr. PITTMAN. Mr. President, I understood the Senator from Wyoming to state that the cost of producing wool in Australia and in other foreign countries was less than in the United States.

Mr. WARREN. The cost of labor, certainly.

Mr. PITTMAN. That the net charge against wool is less in those countries than in the United States; is that correct?

Mr. WARREN. Yes.

Mr. PITTMAN. The Tariff Board-

Mr. WARREN. I remember the figures the Senator gave yesterday from the Tariff Board report, which, by the way, he discredited; and if he will remember or will look over his speech, he himself brought the figures in, showing that it cost \$2 or more per head in this country, if I mistake not, to about a dollar in other countries.

Mr. PITTMAN. The Tariff Board, on page 330, in Table 10, gives the net charge for producing wool in the State of Washington at one-half a cent a pound. On page 11 it gives the net charge for producing wool in the Argentine Republic at from

4 to 5 cents a pound.

Mr. WARREN. What figures does it give for Australia?
Mr. PITTMAN. In Australia it is a few cents a pound.
Mr. WARREN. I beg the Senator's pardon. In another place he will find that it is stated that in Australia they raise sheep at a profit of quite a few cents each without considering the wool at all.

Mr. PITTMAN. With the Senator's permission, I will read the extracts from the Tariff Board report to which I refer.

The Tariff Board says:

That in South America the corresponding charge is between 4 and 5 cents per pound.

That in New Zealand and on the favorably—

Note the word "favorably"-

situated runs of Australia it seems clear that at the present range of values for stock sheep and mutton the receipts from other sources than wool are carrying the total flock expense. So that, taking Australasia as a whole, it appears that a charge of a very few cents per pound lies against the great clips of that region in the aggregate.

Mr. WARREN. Well, what does that prove? Does that prove that the cost is less in this country than it is over there?

Mr. PITTMAN. It proves that they are producing wool in the State of Washington for less than they are producing it in Australia or in Argentina.

Mr. WARREN. How much do they produce in Washington? Mr. PITTMAN. They have in Washington about 1,150,000

Mr. WARREN. Oh, no, they have not nearly so many sheep as the Senator from Nevada claims. How much wool do they

Mr. PITTMAN. I will give you the exact amount. The figures given were for Nevada.

Mr. SMOOT. They have 61,574 sheep, and the total amount of wool is valued at \$46,540.70. The Senator compares that one State, where sheep are raised for mutton only, with the average of the sheep produced in Australia.

Mr. PITTMAN. Mr. President, if I may continue for just a

minute

Mr. WARREN. While the Senator is looking at the figures, let me say that the State of Washington has comparatively a mere handful of sheep, the long-wool sheep raised for mutton, as he proved yesterday; while Australasia has nearly 120,000,000 sheep.

Mr. WALSH, Mr. PITTMAN and Mr. SMOOT addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Wyo-

ming yield, and to whom?

Mr. WARREN. I can not yield to all three Senators at once.

I will ask that I may be allowed to finish this part of my remarks.

A comparison with a little handful of sheep in one little part of the United States, in Washington, where they raise a mutton sheep, hardly elucidates the proposition of our wool supply as a whole, which goes up into the hundreds of millions of pounds.

Another thing: While the Senator from Nevada is quoting Washington, perhaps he will quote Ohio, where the wool costs 19 cents per pound according to the authority from which he is

quoting

Mr. PITTMAN. I am willing to draw a distinction between Ohio and the other States, and the Senator knows it. The Tariff Board states, with regard to the Middle States and Eastern States, that it is an entirely different matter from the ranging of sheep through the West, where the product is chiefly wool.

Mr. WARREN. The Senator will find in the same computation that it costs 12 cents and a fraction in Wyoming, if I remember rightly, and 11 cents in another western State, and

Mr. PITTMAN. Yes; and it also shows the reason why in the computation. The reason given for that by the board is set out in the report. For instance, the State of Nevada raises its wool, as given by the Tariff Board report, at 4.1 cents a pound for the wool. That is less than it costs to raise it in South America. It is certainly only a few cents a pound in Australia; and it can not be contended that the manner of raising sheep in the State of Nevada is any different from the manner of raising of sheep in either Utah or Wyoming.

Mr. WARREN. I wish to say to the Senator from Nevada that I welcome all inquiries; but since nearly all of that matter was put before the Senate yesterday, I do not believe I wish to take in all of the Tariff Board report, especially as the Senator does not make the point he is trying to make, that we

can raise sheep cheaper in this country than they can in Australia.

Mr. SMOOT. Mr. President—

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Utah?

Mr. WARREN. The Senator from Montana first rose, Mr.

President. I yield to him.

Mr. WALSH. I. rose simply to say that there ought to be no controversy about an indisputable fact, namely, that Washington has 501,000 sheep rather than 62,000, as suggested by the

Senator from Utah.

Mr. SMOOT. Mr. President—
The PRESIDING OFFICER. Does the Senator from Wyo-

ming now yield to the Senator from Utah?

Mr. WARREN. I do, with pleasure.

Mr. SMOOT. The report was based upon the number of sheep I stated. The number of sheep reported upon was 61,574. Mr. WALSH. With the usual accuracy of the Senator from

Utah, I felt sure that he misspoke.

Mr. SMOOT. Of course if I did, I wish to say to the Senator that I had reference to the number of sheep that were reported upon, showing that the cost of wool upon that number of sheep was what the Senator from Nevada said. Right in that connection I wish to say that nearly the whole difference between the average cost of producing wool, of 9½ cents a pound, as the Tariff Board says, and that of a half cent in Washington, comes from the fact that they report 92.3 per cent as the percentage of increase of lambs in Washington. It was on that small number of sheep that they reported, and the class of sheep

which the Senator knows, perhaps, were kept around the home, where the increase of lambs would be very much larger than the increase of lambs in any herd of sheep that may have run upon the range.

Mr. PITTMAN. Mr. President, I do not think the Senator is intentionally unfair when he keeps referring to the small number of sheep that were considered in the State of Washington. As a matter of fact, the same proportion of sheep were con-sidered in the State of Washington that were considered in the State of Utah, or the State of Wyoming, or any other State. In other words, about 10 per cent of the sheep of each State were used as an example for all.

Mr. SMOOT. More than 10 per cent of the sheep in Utah

were reported on, and less than 10 per cent, we will say, of the whole, because the number of sheep reported upon is 3,151,731, and there are over 50,000,000 sheep in this country. Senator must admit that not as many as 10 per cent were reported upon in all of the States of the Union.

Mr. PITTMAN. Again the Senator is unfair, because the sheep they examined were the sheep in the Western States, which constitute only from 35,000,000 to 39,000,000, instead of 50,000,000. My statement that 10 per cent were selected as an example of the whole is correct.

Mr. SMOOT. Mr. President, the number reported upon is as Of course the States are named here in the report. wish to say that it seems to me the Senator had better not talk about unfairness, when he tries to give the Senate to understand that the cost of producing wool in this country is the cost of producing it in Washington, and then compares it, not with the lowest cost of wool in Australia or in South America, but with the average cost in Australia and the average cost in South

The Tariff Board reports that in Australia there are millions of sheep as to which there can be no charge whatever against the wool, as the furnishing of lambs and mutton from the herds more than pays all the expenses of maintaining the sheep. Therefore I say to the Senator that if he is going to pick out Washington, the State of lowest cost, and give figures based on the wool produced from 61,000 sheep, it seems to me he also ought to take the lowest cost of the millions of sheep in Australia.

Mr. PITTMAN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Wyoming further yield to the Senator from Nevada?

Mr. WARREN. I do. Mr. PITTMAN. I shall try not to interfere any more; but I think the Senator from Utah is again unintentionally unfair in stating that in the State of Washington they probably went into somebody's back yard and examined one little herd. As a matter of fact, there is a diagram in this report which, if the Senator had read it—and I know he has read it—shows that the examination in the State of Washington was as universal as it was anywhere else. If he will look at the map, he will see that they went all over the sheep area in making their examination, and the same way in the State of Nevada.

Mr. WARREN. Mr. President, if we are talking about the products of the whole world I think we would better not get

down into any back yard.

The PRESIDING OFFICER. Does the Senator from Wyoming decline to yield further?

Mr. WARREN. I understood the Senator was through. I did

not wish to cut off the Senator.

Mr. PITTMAN. I simply wish to say that the reasons given by the Tariff Board, as I stated on yesterday, for the difference in the net charge against raising wool in the Western States, are given in this language, which I think will be accepted even by the Senator from Utah:

The wide variation from Table XIII to Table XVIII in the net charge against wool depends in the main upon certain conditions which have already been discussed—the particular sort of flock kept, whether crossbred or pure wool; whether woolgrowing is combined with breeding; the importance for different purposes of the annual increase of lambs; the extent to which wethers are kept; the amount and quality of wool produced, and the methods employed in the farm operations.

Since the only source of regular income from wethers is wool and the costs of maintenance are not materially lower than for breeding ewes, it is evident that though the fleece of the wethers may be superior to that of the ewes the higher the proportion of wethers in a flock the greater is likely to be the net charge against wool, since under the conditions now prevailing in this region, the tables indicate that the fleece of a sheep alone does not pay for its maintenance.

An examination of that table will show that the trouble with Wyoming and the other States is that they are not pursuing the raising of sheep in accordance with the practical conditions of that country and in accordance with this suggestion of the Tariff Board.

Mr. WARREN. There are men in Wyoming who have been there longer than the Senator from Nevada has, who have been | Australia.

in the business of raising sheep for a great many years; and while doubtless he can show them all about how to raise sheep, I do not believe we can quite go into all the elementaries of it here this afternoon.

Mr. PITTMAN. Just one more question, Mr. President. The PRESIDING OFFICER. Does the Senator from Wyo-

ming further yield?

Mr. WARREN. I yield.

Mr. PITTMAN. I certainly respect the great experience of the Senator from Wyoming. I know he has had a great deal of experience in this matter. But I wish to say that his experience has been largely that of a seller, while my experience has been entirely that of a buyer. His experience has been under a high protective tariff, where all kinds of extravagance are encouraged, upon which the Tariff Board comments. My experience has been in a case where we want some economy in the industry, and not to have it run as a luxury for the pro-

Mr. WARREN. All that, of course, is declamation. I have been in the industry, it is true. I have been in it in the low times as well as in the high times, under free trade as well as under protection. I do not make any denial of that. It is one of the things in which I am interested, and my interest may or may not be a matter of common knowledge. I do not have to apologize for it.

We were speaking of Argentina a time ago. I have here a quotation from the Salt Lake City Tribune of August 4, 1913. happen to have met the gentleman, who was interested in advertising, or, in a way, exploiting, the ranges of South America. The Government over there, as I understand, requested from our Government the loan, if I may use the term, of an expert who went over there and examined into the conditions of all matters relating to sheep husbandry. Upon his return he was interviewed, and I suppose this is one of the interviews:

[By International News Service.] SAYS PATAGONIA IS GREAT SHEEP REGION—PROF. BAILEY WILLIS RETURNS FROM SOUTH AMERICA FOR SHORT VACATION.

NEW YORK, August 3.

Prof. Bailey Willis, who was loaned to the Argentine Government two and a half years ago by the United States Geological Bureau to conduct a survey of the Andes and Patagonia, arrived to-day on board the steamer Voltaire for a vacation. He will return at the end of the year to complete the work.

During the two and a half years the party of which he had charge surveyed in detail 20,000 square miles of unexplored territory and mapped out railroad routes for the development of the country, which will be built by British capitalists and the Argentine Government.

Besides the planning of railroad routes the expedition was commissioned to determine the resources of the treeless plains of Patagonia and the forested valleys of the Andes. Prof. Willis declared that Patagonia, which was no farther from Buenos Aires than Colorado is from Chicago, would become the greatest sheep-rearing region of the world, while the Andes would be one of the greatest cattle-raising districts.

The woolgrowing business of South America, while it has not grown as rapidly as other industries, shows an increase.

In 1896 the South American production was 473,768,540 pounds; in 1912, 554,662,955 pounds.

Of the production a large percentage is exported. For instance, of the Argentina clip of 340,400,000 pounds in 1910. 327,200,000 pounds were exported; and of the Uruguay clip of 126,800,000 pounds in 1910, 124,300,000 pounds were exported. A conclusion of the Tariff Board is that the production of sheep in the principal South American sheep countries may remain more or less stationary because the expected increase

remain more or less stationary because the expected increase in the Patagonian region will be offset by the absorption of lands for agricultural purposes in the central provinces; but it is also asserted that the business may increase with higher profits, and this is just what it is proposed to give them by the present bill. In competition with our wool industry Argentina and Uruguay can produce wool at from 41 to 5 cents per pound less than the United States.

Mr. WILLIAMS. Mr. President, I should like to ask what is the character of the wool grown in Patagonia?

Mr. WARREN. It is a very excellent quality, usually what is called "cross-bred" wool.

Mr. WILLIAMS. It is the wool that goes into carpets? Mr. WARREN. Not at all. It is that which goes into such

articles as the coat I have oh, and it can be transported to New York or Boston for 1 to 1½ cents per pound less than from the Rocky Mountain country, making a difference of at least 5 to 6 cents per pound of scoured wool.

We have protected our growers heretofore with a duty which has given the market to our home growers. As soon as the duty is removed we must come into competition with the wools of lower cost of production in South America, and if our wool-growers can not live under this competition they can take the advice of those who advocate free wool, go out of business, and allow the wool we use to be supplied from South America and

Possibly at the risk of repetition I would say that the report of the Tariff Board shows that woolgrowing in Argentina has been falling off slightly in the past two or three years. Government of the country proposes, however, to aid in not only bringing woolgrowing back to its previous basis, but extending and enlarging it to a very great degree. This is to be accomplished by leasing great tracts of public lands in Patagonia belonging to Argentina. Steps have already been taken to lease these areas of public land, and on May 14, 1912, the minister of agriculture of Argentina authorized the issuance of invitations in the United States and other countries to rent the public lands in the territories of Rio Negro, Chubut, and Santa Cruz for sheep raising. It is proposed to lease the lands at an annual rental of \$84 a square league, equal to 6,144 acres, and for a term of 30 years. This would be at the rate of about 11 cents per acre per annum. In our Western States where State lands are leased to sheepmen the annual rate of rental is from 5 to 20 cents per acre.

It is represented by the minister of agriculture of Argentina that Patagonia is primarily a sheep and cattle country, where agriculture must always be subordinate. The climate is semiarid. Rio Negro is in the latitude corresponding to South Dakota, Chubut corresponds to Montana, and Santa Cruz to the equivalent latitudes of Canada; but the extremes of cold are not so great in Patagonia as in the States referred to.

The altitude varies from sea level to 4,000 feet in the plateaus and 6,000 feet in mountain peaks. The country looks like the

high plains of Wyoming, Utah, Arizona, or Texas.

The pasture consists of native bunch grasses and many kinds Water occurs in springs, streams, waterholes, of edible bushes. and underground, but is wanting in some districts except when it rains. Its distribution is the controlling factor in regard to the value of lands. There are well-watered protected valleys, plains with numerous transient ponds, high plateaus with water and pasture spring and autumn, and other districts where water is very scarce or salt. It is the purpose of the Argentine minister to subdivide the public lands so as to include under each lease lands of different kinds comprising ranges for different seasons, where practicable in one fence, or in lots within driving distance.

Wool on the ranch sells for 7½ to 9½ cents per pound. about one-half the rate paid in this country, being \$16 to \$25

per month for the herders.

It is estimated by the minister of agriculture that a net income of 17 per cent per annum on the amount invested can be realized by investors in sheep raising in Patagonia under the terms offered by the Government.

It is expected also that the arrangement will in a short time

double the area of lands now devoted to sheep growing and will greatly increase the wool production of the country.

TARIFF DUTIES PAID BY FOREIGNER,

Mr. President, we have heard frequently from the supporters of this bill that the wool tariff imposes a hardship on the many for the benefit of the few.

Now, we contend that the duty paid on importations of wool comes largely out of the pocket of the foreign producer as his license for trading in our market, and does not come out of the pocket of the consumer.

But if the contention of the other side were correct, what is the extent of the burden imposed on the people of the country

by the imposition of a tariff on wool?

The aggregate amount of duties collected during the last fiscal year on unmanufactured wool was \$14,454,234. We have 93,402,000 people in the United States, or probably more than that now, which would make the figures more favorable. Therefore, if the people paid this duty the amount for each individual for the fiscal year 1912 was between 15 and 16 cents.

The amount of duties collected on manufactures of wool was

\$12,599,246, and if this was paid by the American people the average payment per individual for 1912 was 13 cents. If the entire duty collected on wool and manufactures of wool were paid by the people of this country the burden for the last fiscal year would have been less than 29 cents per person.

No matter who paid the duty, foreigner or American, the amount collected finally went into the hands of the people of this country, as it was paid out to maintain our Government

institutions.

I contend, Mr. President, that the \$27,053,480 collected last year in wool and wool manufactures duty was a tax paid by the foreign producer for the privilege of entering our markets and that it was a benefit rather than a burden on our own MAGNITUDE OF INDUSTRY THREATENED.

Mr. President, in conclusion I wish to call attention briefly to the magnitude of this sheep and wool industry, the existence of which is threatened by this bill.

The latest obtainable statistics show: Pounds. 626, 872, 774 52, 823, 168 2, 971, 180, 132 302, 343, 400 500, 000, 000

The United States uses more wool than any other nation in the world.

Touching the importance of woolgrowing in our country with which to supply our mills, I quote the following from the report of the Revenue Commission appointed in 1865 to consider and report upon our entire revenue system; not as a wool commission, but to consider our entire revenue system. The members of the commission personally were not particularly interested in woolgrowing or manufacturing, but in the exhaustive report they made the following was included. they made the following was included:

The home production of wool is necessary to render us properly independent of foreign powers, in peace and in war, in obtaining our supplies of an article on which the lives and health of all of our people depend. It is necessary to national economy, for no great agricultural country can afford to import its most important and costly raw material.

And-

Finally, it is necessary to extend and complete the circle of diversified industries on which the wealth and independence of nations so much depend.

It would be a sad condition for our country, and especially in time of war, if we were dependent upon foreign countries for that most needed, if contraband, article—wool for clothes which, next to food, is our most essential product.

SUGGESTED TARIFF ACTION.

Mr. President, I suggest:

First. The Government is ours, and must be supported, and it takes cash to support the Government.

Second. The best way to obtain it is to make the foreigner

pay a license for the privilege of doing business in this country.

Third. The laborer is worthy of his hire, and we must give protection sufficient to insure work for all who are willing to work and wages sufficiently large to pay for food, clothing, and the education of children, with a little laid by for sickness or a rainy day. This insurance we must sustain for all of our millions of working men and women.

Fourth. The amount of revenue from wool duties is large; the per capita or per-suit-of-clothing wool duty is almost infinitesimal, since but 2 to 4 pounds of clean wool go into a suit

of clothes.

Fifth. Cost of living will greatly increase because of higher meat prices if our mutton supply is lessened, just as meat will be lower if we increase that supply.

Sixth. Diversified interests—agricultural and manufacturing—are vital to the progress and high development of the nation.

Seventh. Practically all of the people of this country are producers; every man who works is one. All are consumers; but those who are consumers and not producers are the "idle who need not be taken into account.

Mr. President, I can recall no period but one in our history when so determined an effort was made to cripple the industries of this country and transfer them to foreign countries as will, in the opinion of thousands of good citizens, be the result of the operations of the pending bill should it be enacted as reported from the Finance Committee. That period was during colonial times, when even then England was jealous of us on account of our industrial and commercial growth.

It was in that period that Parliament in 1699 enacted a law prohibiting the exportation of wool or woolen manufactures from the English Colonies in America in competition with those of the mother country. It was in that period that Lord Chatham is quoted as saying:

The English colonists in North America have no right to manufacture a nail or horseshoe.

In 1719 the House of Commons enacted in resolution form "that erecting any manufactories in the Colonies tended to lessen their dependence upon Great Britain."

Can it be possible that this great political party which now has full control of the executive and legislative branches of the Government will, unwittingly or otherwise, by reason of this tariff legislation it has determined to adopt, turn us backward toward conditions which prevailed in colonial days when we were at the mercy of the manufacturing and business interests of England?

Mr. President, our country is prosperous. Daily we have statements to that effect from Senators on the other side and we have evidence of the correctness of their statements in the Government reports of the volume of imports and exports of merchandise for the fiscal year just ended. These reports show

that our commercial transactions are greater in volume than

ever before in our history.

These conditions, I firmly believe, are the result of the policy of protection which has been in force the past 16 years.

Mr. STONE obtained the floor.

Mr. PENROSE. Mr. President—
The PRESIDING OFFICER (Mr. Martine of New Jersey in the chair). Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. STONE. I rose only to express the hope that we might proceed with the bill.

Mr. PENROSE. I thought I would indulge in a few reflections on the bill, Mr. President.

Mr. STONE. We are always delighted to hear the Senator.

The PRESIDING OFFICER. Does the Senator from Missouri yield, then, to the Senator from Pennsylvania? Mr. STONE. I yield the floor, Mr. President.

Mr. PENROSE. Mr. President, the Senator from Wyoming IMr. WARREN] has given a most interesting and luminous address to the Senate, very naturally largely from the point of view of the woolgrowers. In the remarks I shall make I propose more particularly to direct the attention of the Senate to the view of the manufacturer, particularly the eastern manufacturer, in the woolen industry. At the same time I wish to impress upon the Senate the fact that as far as the eastern point of view is concerned, as I know it, there is no conflict with the side of the woolgrower.

This is an industry which covers a continent, beginning with the growing of wool on the larger scale in the western part of the country and ending with the manufactures of the eastern seaboard. But we must not underrate the fact that not only is the industry one harmonious proposition from the wool on the sheep's back to the mill, and any comprehensive tariff must necessarily embrace the whole situation, but in addition to that, the eastern part of our country must not be overlooked as a

woolgrowing section.

I have some figures here which are quite remarkable, showing the wool product of the United States for the year 1912. It may not be realized that Maine produced 937,500 pounds of wool in that year. Ohio produced 16,875,000 pounds of wool, nearly half the product of Montana and nearly half the product of Wyoming, showing that it is not alone the wide areas of the West which are interested in woolgrowing, but that the great

Eastern States have a real interest in it.

The industry of woolgrowing is necessarily being curtailed in the western country. The establishment of the forest re-serves and the restrictions imposed upon them, the fencing in of the country, have all contributed to curtail the industry to some On the other hand, it has been slowly but steadily increasing east of the Mississippi River. There are large stretches of country in States like Ohio and Pennsylvania that are even better adapted to the growing of wool and the raising of sheep than the country along the slopes of the Rocky Mountain Range. Unless this industry is destroyed by the pending tariff legislation, we can well look in the next 10 years to a most remarkable increase in the raising of sheep east of the Mississippi River. The raising of sheep for food and for the fleece ought to be a part of the industry of every large farm. The State of Michigan, I find from these figures, produced 10,125,000 pounds of wool during 1912. The State of Pennsylvania produced in the same year 4,095,000 pounds of wool. At one time the county of Washington, in Pennsylvania, ranked as the leading woolgrowing county in all the United States, and it is still a substantial part of the agricultural wealth of the people of that great section of southwestern Pennsylvania.

The table referred to is as follows:

Wool products (washed and unwashed) of the United States, 1912.

Mr. JAMES. Will the Senator from Pennsylvania yield for question?

Mr. PENROSE. Yes.

Mr. JAMES. How many pounds of wool does the Senator

say Pennsylvania produced last year? Mr. PENROSE. Four million and ni Mr. JAMES. How many pounds did Pennsylvania produce in 1909?

Mr. PENROSE. I could not answer that question.
Mr. JAMES. I will state to the Senator that the figures supplied us by the census show that Pennsylvania produced in 1909 6,300,000 pounds of wool. If the figures the Senator now gives to the Senate as to the production of wool in Pennsylvania last year are correct, Pennsylvania has fallen off one-third in the

production of wool.

Mr. PENROSE. The Senator is entirely correct in that state-Washington County, to which I have referred, with the neighboring county of Greene, which are the chief centers of the wool industry in Pennsylvania, have exhibited a falling off. It is due to two reasons. One has been the development of great natural resources, like the discovery of oil and natural gas and the establishment of great industrial plants, which have caused many of the farmers to abandon their farms, or to lease them partly unworked, and in recent times—in the last two years-the persistent agitation for free wool and tariff reduction, which has terrified everyone engaged in the industry. But, notwithstanding these circumstances, the industry in Pennsylvania is quite a substantial one and of material interest to the agricultural people of that great Commonwealth. There is no section of the State where the people are more gravely dis-turbed regarding this tariff bill than are the farmers of the counties of Washington and Greene in the State of Pennsylvania,

Mr. WALSH. I should like to address a question to the Senator.

The VICE PRESIDENT. Will the Senator from Pennsylvania yield to the Senator from Montana? Mr. PENROSE. I will.

Mr. WALSH. Can the Senator tell us the number of sheep there are in Pennsylvania at the present time?

Mr. PENROSE. Yes; I am going to get to that, if the Senator will wait for a minute.

Mr. WALSH. Can the Senator give us the figures for 1899? Mr. PENROSE. No; I did not want to burden the Senate

with too many figures.

Mr. WALSH. Inasmuch as the Senator has told about how the woolgrowing business is developing east of the Mississippt River, I want to invite his attention to the fact that Indiana in 1899 had 1,200,899 sheep and in 1909 it had 659,802 sheep.

Mr. PENROSE. The Senator is about right, I believe. I

have already stated that the industry has gone down. But it is still a vital substantial subject of interest to the farmers of the East.

Mr. JAMES. If the Senator will permit me, in regard to the statement he made, that the falling off in the production of wool in Pennsylvania was due to the development there and in part to the agitation of the Democratic Party for free

Mr. PENROSE. Yes, Mr. President; I know no one in Pennsylvania who argues for free wool.

Mr. JAMES. I thought the Senator attributed the falling off of the production of the wool to the agitation about free wool.

Mr. PENROSE. Partly that and partly—
Mr. JAMES. I was wondering whether in 1911, when we passed through the House a bill that had a tariff upon wool, that affected the people of Pennsylvania so quickly as to be

reflected in the production of wool in 1912.

Mr. PENROSE. I can answer the Senator very briefly. tariff was so low as to be inconsequential, and the provisions of the bill regarding the manufactured product were so destructive, that it was evident to everyone that there would not be any market for wool if the bill passed,

Mr. JAMES. The Tariff Board report, however, does not agree with the Senator as to why the production of wool has

fallen off in Pennsylvania, because this report says:

The production of early lambs is found profitable in New Jersey at the present time, as it is in eastern Pennsylvania. In these regions woolgrowing is a matter subordinated to mutton production.

Mr. PENROSE. That may be entirely correct. Pennsylvania is quite a large territory, divided into the west and the eastern parts by the Allegheny Mountains. The chief section of the State where sheep are raised is west of the Allegheny Mountains, and I was referring to the western section of the State.

Mr. JAMES. I thought the Senator was talking about the

State as a whole.

Mr. PENROSE. Then I failed to make myself clear. I was talking about the State as a whole, but I stated, as regards the very large production of the sheep industry, that it is located in the western part of the State. It may be that on the dairy farms and the farms in the eastern part of the State near the

great centers sheep are raised for meat.

Regarding the sheep condition in Pennsylvania I can say that the State of Pennsylvania, like most of the States east of the Mississippi River, does not now possess so many sheep as it once had because of the favorable conditions for woolgrowing on the wide grazing areas of the far West and the Rocky Mountains and on account of industrial development. But Washington County and other counties in Pennsylvania are still famous for the quality of their sheep and wool, and there were, all told, 650,000 sheep of shearing age in Pennsylvania on April 1, 1912. The average weight of the fleece of these on April 1, 1912. The average weight of the neece of these sheep in that year was 6.30 pounds, and the total clip of wool, washed and unwashed, for 1912 was 4,095,000 pounds, equivalent to 2,170,350 pounds of scoured wool, of an average value in 1912 of 54 cents a pound, almost the highest price commanded anywhere in the United States. The total value of the Pennsylvania clip of 1912 was \$1,171,989. Our clip was 60 per cent fine and 40 per cent medium, correspond-ing in that regard with the famous clip of our neighboring State of Ohio, which had 2,700,000 sheep in 1912, yielding 16,875,000 pounds of wool, washed and unwashed, equivalent to 8,606,250 pounds of scoured wool, selling, as our Pennsylvania clip did, for 54 cents a scoured pound and bringing a total return of \$4,647,375.

These industries of the farmers of Pennsylvania, Ohio, and our other States are altogether too important to be sacrificed, either by free trade in the wool itself or by the equally certain and even more disastrous result of inadequate duties on the finished woolen fabrics-duties wholly insufficient to cover the difference in wages and cost of production between this country

and abroad.

The figures are of some interest, and I will ask to have inserted the international trade in wool during 1911.

The table referred to is as follows:

International trade in wool in 1911.

Mr. PITTMAN. Mr. President-

The VICE PRESIDENT. Does the Senator from Pennsylvania yield to the Senator from Nevada?

Mr. PENROSE. Yes.

Mr. PITTMAN. Does the Senator believe that taking the duty off raw wool would decrease the number of sheep that are naturally raised in his State?

Mr. PENROSE. I believe it would practically obliterate the sheep industry in the section where it is chiefly located. In the southwestern part of the State already the farmers are beginning to get rid of their sheep. While I am not advised as to the present price of wool and how much it has gone down, if any, I know in that section no one wants to own any sheep with this bill hanging over his head.

Mr. PITTMAN. How does the Senator explain this state-

ment of the Tariff Board, found on page 302:

In all the States not included in the western and the Ohio districts the board finds that sheep are maintained primarily, as a rule, for their utility as consumers of forage that would otherwise go largely to waste, for their fertilizing value on the fields and pastures, for the production of market lambs, and only incidentally for their wool.

Mr. PENROSE. The Senator has acquired renewed confidence in the Tariff Board report. Yesterday he was rather disposed to doubt it and ignore it. There is nothing inconsistent in that report and the statement I have made. The Senator from Kentucky [Mr. James] raised a similar point. The section of Pennsylvania which is the center of this sheep industry is a part of the Ohio district. Southeastern Ohio and southwestern Pennsylvania are two sections of the eastern part of the United States particularly adapted to the raising of sheep. All the Tariff Board means to say in the report is that in the eastern part of Pennsylvania and other eastern States sheep are raised for the meat. But Pennsylvania comprises a very large territory. A continental mountain range divides the meat proposition from the wool proposition, as far as the sheep industry is concerned.

I merely refer to this interest of the East in woolgrowing because the Senator from Wyoming [Mr. WARREN] referred to an occasional conflict which had occurred in the past between the grower and the manufacturer. In my opinion there is no real conflict at the present time, and there should never have been a conflict of that character in the past.

As far as the people of Pennsylvania are concerned, the overwhelming majority of them are, as I am, consistent protectionists. They do not believe in spotted protection. They believe in extending to the grower a protective duty which will permit him to continue in his industry, and they believe in similar protective duties on the manufactured products of the East. They do not come here like people have come heretofore asking for

free hides and heavy duties on shoes.

I have referred to the fact that the sheep growers of Pennsylvania will view with grave alarm the passage of this measure, and that they are endeavoring to get rid of their stock. The same remark applies with even greater force to the manufacturers east of the Allegheny Mountains and more particularly east of the Susquehanna River. There are grounds for this apprehension. I have here an article from a trade publication, entitled "Men's Wear," under date of June 25, 1913, which I will ask the Secretary to read.

The VICE PRESIDENT. The Secretary will read as re-

quested.

The Secretary read as follows:

MEN'S WEAR, JUNE 25, 1913.

SOME ADVERTISEMENTS RECENTLY APPEARING IN AN ENGLISH TRADE PUBLICATION.

The following advertisements were recently printed in an English

The following advertisements were recently printed in an English trade journal:

"Englishmen recently returned from America, after careful study of prospects for British ready-to-wear clothing, would like to get in touch with a first-class house making the very best productions only and specializing in overcoats, raincoats, and sporting clothing; also high-grade woolens, with the view to opening up the American market. Excellent prospects right now to get well in."

"Two young gentlemen, resident in Manchester and shortly leaving for Canada and the United States, are open to represent woolen manufacturers, wholesale clothiers, Bradford goods, general drapery, and men's-year houses."

"Traveler, well acquainted with woolen trade, shortly starting regularly for America, would represent high-class manufacturer. Commission and part expenses."

Mr. PENROSE. I should like to have the Secretary now read from the same trade journal, under date of June 25, 1913, a statement from Mr. Theodore Justice, of Philadelphia, one of the pioneers of the wool manufacturing industry, who is well known all over the United States and who has just returned from Europe.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

MEN'S WEAR, JUNE 25, 1913.

EUROPEAN MANUFACTURERS ELATED.

Theodore Justice, formerly of the firm of Justice, Bateman & Co., wool dealers, writes from Budapest that European woolen manufacturers are clated by the Underwood tariff bill, and if they do not double the size of their mills it will be because they think the new schedule too

are clated by the Underwood tariff bill, and if they do not double the size of their mills it will be because they think the new schedule too favorable to last.

Mr. Justice is studying tariff conditions across the water. He gives the opinion that the administration bill removed 80 per cent of protection from American labor employed in woolen mills, to say nothing of the loss to manufacturers. He explains his figures in this way:

"Under the Payne law wages at the time of Wilson's inauguration were 40 per cent higher than at the time of McKinley's inauguration, when the Wilson-Gorman tariff law was in effect. The Underwood bill provides 40 per cent less protection to wool labor—not the manufacturer—than the Wilson bill did. Therefore the Underwood bill brovides 40 per cent protection."

A west of England cloth manufacturer said to Mr. Justice:

"I would give all the markets of the world that I now have in exchange for the American market as it was under the Taft administration. Even with your high tariff my sales to the United States have doubled. If there were any hope that the Underwood bill would last eight years, I would double the size of my mill. The worst of it is that your workingmen have votes, and when they are idle in the mills they are busy at the polls. If I did not think there would be a reaction, I would go ahead at full speed. We are surely pleased with what President Wilson and Mr. Underwood have done."

As to European wages, Mr. Justice says:

"I find wages in Austria for work similar to that in the United States only 25 per cent; and in Great Britain, 49 per cent. While labor in Hungary receives only one-quarter of what is paid in the United States, commodities are as high. Shoes are dearer and ready-to-wear clothing is about the same as at home under Taft's administration."

A correspondent of the Nottingham Guardian, Nottingham, England, in an article covering the English wool frade, says, in part:

tration."

A correspondent of the Nottingham Guardian, Nottingham, England, in an article covering the English wool frade, says, in part:

"The ideas of some seem to be in the clouds respecting the likely demand of America for home-grown wools when once the tariff comes into operation, but it certainly will take time before American users adjust themselves to the new conditions. There is every likelihood of very largely increased shipments of semi and fully manufactured textiles being shipped to the United States from West Riding under the proposed new duties, and American manufacturers will have to face very different competition from what they have experienced during the last 15 years."

Mr. STONE. Mr. President-

The VICE PRESIDENT. Does the Senator from Pennsylvania yield to the Senator from Missouri?

Mr. PENROSE. I do. Mr. STONE. Who is the author of the paper just read?

Mr. PENROSE. The author is Mr. Theodore Justice, of Phila-delphia. The gentleman who has been interviewed in that report is a man of very high standing and undisputed authority on the wool business

Mr. STONE. I did not quite catch it.

Mr. PENROSE. Does the Senator want to have the article read over again?

Mr. STONE. No; I was asking the Senator a question

Mr. PENROSE. I can not hear the Senator, and he does not seem to have understood the article.

Mr. STONE. I understood the article to be a statement of some gentleman by the way of interview, or otherwise, favoring the passage of this bill.

Mr. PENROSE. Oh, Mr. President, the Senator is entirely mistaken. If he has sufficient interest in the matter, I think the article had better be read again, or else he had better take it and read it.

Mr. STONE. Oh, no.

Mr. PENROSE. The Senator is entirely mistaken.

Mr. STONE. I thought he made an argument against something which he said he was in favor of.

Mr. PENROSE. No; I have stated that the manufacturers as well as the growers of Pennsylvania have viewed with great alarm the passage of this measure, and there is some justification for it if we consider the difference in the wages between the employees in the wool industries in the United Kingdom and in the United States.

I shall ask to have these figures inserted. I do not suppose they will be disputed, because they are from the report of the Tariff Board on Schedule K, Table 47, page 926. I will, however, merely call to the attention of the Senate some four or five most remarkable differences in wage rates. In the occu-pation of wool sorters I find here the excess in the United States over Great Britain in wages is 71.5 per cent; for wool washers, scourers, and driers the excess is 66.5 per cent; card strippers and tenders, 43.3 per cent; comb tenders, 84.3 per cent in excess in favor of the wage earner in the United States. For drawing-frame tender in the case of women it is 131.7 per cent. In the case of worsted-frame spinners for females it is 184.4 per cent; in the case of female winders it is 107.9 per In the case of a female woolen weaver it is 175.2 per

cent, and so on along the line. I insert the entire table at this point.

The table referred to is as follows:

Comparative wages in American and English woolen mills. [From the report of the Tariff Board on Schedule K, Table 47, p. 826.1

	Sex.	A*erage full-time earnings of 55.6 hours,		Excess

This was published prior to the advance in American mills of from 5 to 20 per cent in 1912.

Mr. PENROSE. How the gentlemen on the other side expect American wages to be maintained with that difference between the United Kingdom and Germany and the manufacturing establishments along the Atlantic seabcard it is impossible for me to imagine.

I have here, Mr. President, something new in the advertising line and in an American journal. One page has reference to bankruptcy sales, and another column is headed "General business troubles." But that may be only a coincidence. On the page to which I desire to refer we have an advertisement which is new for the first time in many years in any journal in the United States. I quote from the Daily Trade Record of Thursday, June 26, 1913:

We have been appointed exclusive selling agents for the United States of America by the following prominent foreign manufacturers:
Sir Titus Sait, Bart., Sons & Co. (Ltd.), Saltaire, England. Men's-wear fabrics. Manufacturers of fine fancy worsteds and Belwarp serges, guaranteed to maintain their color against sun and sea in any

I will ask the Secretary to read the advertisement. It is a most astonishing advertisement, and one that did not appear until after the 4th day of March, when this destructive measure seemed to be certain to be imposed upon the American people.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

[From the Dally Trade Record, Thursday, June 26, 1913.]

[From the Dally Trade Record, Thursday, June 26, 1913.]

We have been appointed exclusive selling agents for the United States of America by the following prominent foreign manufacturers:

Sir Titus Salt, Bart., Sons & Co. (Ltd.), Saltaire, England; men's wear fabrics. Manufacturers of fine fancy worsteds and Belwarp serges, gnaranteed to maintain their color against sun and sea in any climate. J. Benn, jr., Bradford, England; manufacturer of medium-priced serges, staple fancies, mobelrs, and dress goods. Fisher, Firth & Co., Colne Valley, England; manufacturers of the celebrated Colne Valley cassimeres. G. & G. Kynoch, Keith, Scotland; manufacturers of all-wool fancy Scotch tweeds. James Johnston & Co., Elgin, Scotland; manufacturers of exclusive novelities in Scotch tweeds. Robinson & Bairstow, Balldon, England; manufacturers of popular-priced serges and gabardines. Globe Manufacturing Co., Bradford, England; manufacturers of fancy piece-dye worsteds. Samuel Turner & Sons (Ltd.), Rochdale, England; manufacturers of white flannels and men's wear cassimeres.

G. H. Hirst & Co., Batley, England; manufacturers of beavers, kerseys, and cloakings. Moss Bros. (Ltd.), Hebden Bridge, England; weavers, dyers, and finishers of corduroys. Von Hagen & Cole, Verviers, Belgium; manufacturers of medium and low-grade fancy worsteds. Gebruder Junkers, Rheydt, Germany; manufacturers of low-grade fancy worsteds. F. Brandts, Gladbach, Germany; manufacturer of low-grade fancy suitings. Aaron & Jacob Löw, Beer's Sons, Brunn, Austria; manufacturers of low and medium grade cassimeres and tweeds. Fabrics and patterns suitable for the American market have been in preparation for several months under the personal supervision of Mr. William J. Hill. Collections will be shown as soon as tariff action permits the quotation of definite prices. Special arrangements have been made for the prompt delivery of sample requirements.

#### SERGES.

Stocks of leading numbers of serges are now in transit and will be carried in bond, from which sample requirements will be delivered, regardless of existing tariff rates.

W. H. DUVAL & Co. WM. J. HILL, Manager Foreign Department, 79 Fifth Avenue, New York.

Mr. STONE. Is the Senator through?

Mr. PENROSE. I am not by any means through.

Mr. STONE. Oh.

Mr. PENROSE. I regret that the Senator is impatient. Mr. STONE. I saw that the Senator had taken his seat.

Mr. PENROSE. I am just getting warmed up. I regret to see the irritation which this newspaper announcement has caused in the demeanor of the Senator from Missouri.

Mr. STONE. I had supposed-

Mr. PENROSE. It evidently sounded an alarm. Mr. WILLIAMS. The Senator does not really think that anybody ever listens to the reading of a newspaper article.

Mr. PENROSE. It is an advertisement. Mr. STONE. I suppose it to be a very able argument so far as made by the Senator.

Mr. PENROSE. I always try to listen to the arguments of the Senator from Missouri with great attention when they are

not a filibuster. Mr. STONE. I have listened to you.

Mr. PENROSE. I hope the Senator will return the same reciprocity.

Mr. STONE. I thought the Senator intended that advertise-

ment to be his peroration-

Mr. PENROSE. No; I am really just beginning, Mr. President.

And that everybody on the other side of the Chamber would be satisfied with the effort, and we could go on with the bill. Still I am always so delighted to hear the Senator that I apologize for interrupting.

Mr. PENROSE. I can understand, Mr. President, that the Senator from Missouri should exhibit disturbance when he has read to him as he had just had an advertisement, dated recently, from a selling agency representing itself to be the agent of foreign manufacturing concerns in England, in France, in Germany, and in Belgium, inviting persons to prepare to purchase their products as soon as the pending Democratic bill shall become a law, and in the meanwhile to crowd all they can into the bonded warehouses of this country. Much as the Senator may be determined to press to final passage this bill, it is possible that he has a passing compunction in his mind as he deliberately hands over the American market to the foreign manufacturer and to the cheap labor of Europe, and contemplates the spectacle of the paralysis of every industry in the East and the condition which will confront the grower of wool in the West.

Mr. President, the tariff discussions which have been going on in the United States for the whole history of the Government have certainly for half of that period largely centered around the wool industry and the duty on wool. I have here a volume which contains, among other notable documents, the report of Which contains, among other hotable doctments, the report of Alexander Hamilton, who was then Secretary of State, made "in obedience to the order of the House of Representatives of the 15th day of January, 1790, * * * to the subject of manufactures, and particularly to the means of promoting such as will tend to render the United States independent of foreign nations for military and other essential supplies."

This, Mr. President, is one of the most remarkable documents, as it is the first, in the history of the tariff discussion in the United States; it is a classic which can not be improved upon from the protectionist point of view. Mr. Hamilton was asked by the House of Representatives to make a report on the subject of manufactures, and particularly on the means of promoting such manufactures as would render the United States independent of foreign nations for military and other essential supplies, and his fertile mind, approaching a virgin field of discussion, produced a document which can not be improved and which hardly can be extended by any protectionist writer in the discussions current in political controversies to-day.

It applies with just as much force, Mr. President, as it did at the beginning of our national history, when the House of Representatives passed the resolution in 1790; and the Republican Party has been just as consistently found in advocacy of the doctrines here laid down as it is possible for any party to be regarding a great national fiscal policy.

This volume, Mr. President, also contains, among other tariff papers, the report of Mr. Robert J. Walker, as Secretary of the Treasury, upon one of the earliest and, in my opinion, the only consistent tariff bill which was ever proposed by the Democratic Party. Mr. Walker did advocate duties for revenue only on an ad valorem basis, the amount of the ad valorem to be fixed by the requirements of the Government. We do not find in his measure sectional protection hidden under general provisions of reduced duties and free trade; we do not find in his advocacy and argument discussion as to the amount of imports which shall be permitted or what proportion of an article the American consumer can use of foreign make and what of domestic make; we do not find any deceptive, alluring suggestions thrown out to the voter before the campaign that no legitimate industry will be disturbed, but we have the flat-footed, logical, theoretical doctrine that the Government should be run on ad valorem duties for revenue only proportioned to the expenses of the Government.

While the Democratic Party has, therefore, wavered and backed and filled in the low-duty, free-trade propaganda the Republican Party can stand consistently on the doctrine laid down by Hamilton in the statesmanlike document to which I have referred.

Mr. President, I only refer to it because Hamilton seems to have considered among military necessities the encouragement of the wool industry. It was a little too early for him in 1790 to know that Bonaparte had to clothe the French Army with English wool, when he was endeavoring to put an embargo on English trade and keep all of England's merchandise out of continental Europe. That was one of the results of France not having what was a military necessity-wool-to clothe her troops and to clothe her people. However, Hamilton makes this remarkable statement about the wool industry in those days:

Besides manufactories of these articles, which are carried on as regular trades and have attained a considerable degree of maturity, there is a vast scene of household manufacturing which contributes more largely to the supply of the community than could be imagined without having made it an object of particular inquiry. This observation is the pleasing result of the investigation to which the subject of this report has led, and is applicable as well to the Southern as to the Middle and Northern States. Great quantities of coarse cloths, coatings, serges, and fiannels, linsey-woolseys, hosiery of wool, cotton and thread, coarse fustians, jeans and muslins, checked and striped cotton and linen goods, bedticks, coverlets and counterpanes, tow linens, coarse shirtings, sheetings, toweling and table linen, and various mixtures of wool and cotton and of cotton and fiax are made in the household way, and in many instances to an extent not only sufficient for the supply of the families in which they are made but for sale, and even in some cases for exportation. It is computed in a number of districts that two-thirds, three-fourths, and even four-fifths of all the clothing of the inhabitants are made by themselves. The importance of so great a progress as appears to have been made in family manufactures within a few years, both in a moral and political view, renders the fact highly interesting.

It is, Mr. President, from these humble beginnings that the

It is, Mr. President, from these humble beginnings that the wool industry in the United States has reached its present magnitude-dimensions which are sufficient, so far at least as the manufacturing part of the industry is concerned, and it may be of the woolgrowing also, to supply all the wants of the American people at a reasonable price.

Early the States, in the days when we had tariffs against each other, recognized the importance of encouraging this particular industry. They had their tariffs, their bounties, and their laws to encourage in the different Colonies the industry of wool manufactures. Why we should now, at this late day in our national history, deliberately throw away a proper and consistent source of revenue and have to seek it in other and more direct and inconvenient ways, and at the same time expose to curtailment and perhaps very largely to destruction a great industry essential to our national independence is to me incomprehensible as the doctrine of any sane political party.

Mr. President, I offered a few days ago an amendment to Schedule K of the pending bill. It is the same measure substantially that was offered by me in the last Congress to the then pending wool bill. Those who were in the Senate at that time may recall that most of the majority voted for the measure; that it was carried and put in the then pending bill. Later on in the proceedings the then minority joined with some of the Republicans and put in another amendment, but the amendment did at the time receive substantial recognition and has been introduced by me in order to complete the tariff record of this session.

I will say candidly, Mr. President, that it has not been my intention to offer any amendment, with perhaps a few excep-tions, to the pending bill. I take it, although I am not authorized to speak for any Republican Senator but myself, that such is the general sentiment on this side of the Chamber. I fully realize that no amendment offered by me or by my party associates has any chance of passage at this session of Congress. I also feel that it will be at least four years, if there is any revulsion of public sentiment upon these economic questions, before the Republican Party will be in a position to take up tariff legislation. Four years is a considerable period in indus-trial development. Business conditions are likely to be greatly changed, and should another party be in power four years from now the business conditions will have to be met afresh. I do not think that the historian or the American people will devote very much time to an investigation of what the minority may have done at this session of Congress in a futile way regarding amendments or speeches upon this particular pending bill. Should the people of the United States again sustain the party of protection, the conditions that will then present themselves will have to be met and dealt with. At the same time, in connection with this particular schedule, there is some reason for the introduction of the amendment. the introduction of the amendment.

In the first place the Tariff Board has reported on this schedule and made what is admitted to be an exhaustive, careful, and thorough report. In the second place there have been other amendments introduced or will be introduced as substitutes for Schedule K. In view of these facts, in view of the fact that I did introduce the amendment in the last Congress, and in view of the further fact that it represents, so far as I can ascertain, very largely the thought upon the subject of protection, more particularly as regards the manufacturer, I have deemed it desirable to introduce the amendment to complete the tariff record, so far as this subject is concerned, at this session

Mr. President, this bill revising the woolen Schedule K, which I have introduced, is offered from the standpoint of those who believe in the protective-tariff policy, which during the greater part of our national existence has been the policy of the United States.

The bill of the majority now before the Senate is so arranged in the woolen schedule as to give the preference—and a very marked preference—to European manufacturers. The substimarked preference-to European manufacturers. tute schedule which I have presented gives a distinct advantage to American manufacturers in competition for American busi-

I believe this to be in accord with the desire of a very great majority of the American people, and, like all sincere protec-tionists from Washington and Hamilton to the present time, I believe that the protective policy is of benefit to all of the American people of all States and sections. One result of the protective policy, which even its opponents have acknowledged to be a good result, is the diversification of national industries and particularly the spread of manufactures. An economic policy which builds mills and factories in the towns and multiplies the opportunities for employment of the dwellers there multiplies also the market for the products of the farms. Every new manufacturing industry which, under the protective system, gains a foothold in our great industrial States adds to the value of every farm in the Mississippi Valley and elsewhere. That the protective policy is the best policy for the entire Nation always has been, is, and always will be the profound conviction of all sincere protectionists.

# PROVISIONS OF THE BILL,

In the proposed revision of Schedule K, which I introduced last year and have introduced in substantially the same form this year, a specific duty of 18 cents a pound on the clean content of wool is the method adopted to protect and encourage American woolgrowing. This method has been employed because it seemed to meet with the approval of the woolgrowers. A specific form of duty is, of course, to be preferred to an ad valorem form wherever practicable.

The specific form of the proposed duty on wool commended itself strongly to my judgment. But there must be grave doubts of the practicability of basing the duty on the clean content from the point of view of administration or as protec-tion to the woolgrowers. This practical difficulty is sufficient to offset, or more than offset, the theoretical advantages of the clean-content method, although the Tariff Board gives it in passing a qualified support (p. 12). The whole subject of the proper form, as well as of the proper amount, of the duty on wool may advantageously be left open until the opportunity comes for another revision of the tariff from the projectionist standpoint.

SPECIFIC DUTIES ON TOPS AND YARNS.

One important merit of this proposed substitute for the woolen schedule of the Democratic tariff bill is the specific form of the duties on tops and yarns. The Tariff Board, in its report, declares that specific duties both on yarns and on tops are wise and practicable, saying (p. 17):

If a specific duty be placed on the scoured content of the raw wool, it would then be possible to levy a specific duty on tops and yarns. The system of specific duties, as is well known, has many advantages for administrative and revenue purposes. It has a further advantage from the point of view of adjusting duties to difference in cost of production at home and abroad. The duty could then be maintained at a constant and definite figure corresponding to a definite and constant difference in cost of manufacture. Under an ad valorem system the amount of duty varies with every fluctuation in the market value of the raw material, while the difference in cost of manufacture remains relatively constant.

Mr. WARREN. Mr. President, will the Senator permit me

to interrupt him there?
The VICE PRESIDENT. Does the Senator from Pennsylvania yield to the Senator from Wyoming?

Mr. PENROSE. I do.
Mr. WARREN. The Senator has alluded to tops, the rate of duty on which is a very vital issue to the woolgrower, because of the manner in which they are treated in the pending bill. Tops sometimes are as low in price in the market as 30 cents, and again they may be as high as a dollar a pound, the labor being the same to the manufacturer of tops in either case. the proposed duty of only 5 per cent on tops, the price of wool will not only be reduced to the woolgrower in this country to the world's level of wool, but he will have to reduce his price for wool as much lower than the foreign wool, as is the real difference in the cost of making the tops in this country and abroad, and at that, from the woolgrower's standpoint, the duty contained in the bill on tops is insufficient. I want to ask the Senator if he thinks there would be any benefit to the manufacturers in having that rate so low?

Mr. PENROSE. Mr. President, I have always thought that

the interests of the grower and the manufacturer were identical. As patriotic Americans they are interested in the prosperity of the industry in all its forms and phases.

EXPERT APPROVAL OF SPECIFIC DUTIES.

This official view of the practicability and wisdom of a specific form of duties as applied to tops and yarns is confirmed in the memorial presented by Mr. John P. Wood, of Philadelphia, president of the National Association of Wool Manufacturers, before the Committee on Ways and Means, January 27, 1913. In that memorial a special committee of manufacturers states in a report on the subject of tops and yarns (p. 35):

An examination into the costs of wool combing abroad reveals the fact that in Bradford the commission fee for combing merino tops is 4½ cents, and we believe that a safe estimate of 2 cents per pound would embrace the expenses of the merchant, making a total cost of conversion from raw wool into finished tops of 6½ cents per pound. In our country abundant testimony is at hand to show that in the woolen trade conversion costs are 100 per cent more than those of Europe, so that to equalize by duties the increased cost of combing raw wool into tops, considering solely the merchants' and wool-combers' expenses and eliminating enhancements which may be incident to a duty on raw wool, a rate of 7 cents per pound would be required to accomplish this object.

This committee of manufacturers, out of its practical knowledge, describes the conversion cost of tops as "with but slight variations from year to year, in this country as well as abroad, a fixed amount." As to the conversion cost of yarns and the requisite protective duty, the committee of manufacturers further says (pp. 36-37):

In England and upon the Continent the business is largely subdivided between the merchant who owns the combed wool or tops and the commission spinner who spins the worsted yarns for a fixed fee per quantity. The merchant, as in the case of tops, has to bear the interest on the materials, the warehousing and transportation demands and the clerical and office outlays incidental to this business. The spinner in turn takes care of the wages expended about his plant, with necessary supplies for its operation, light and power, insurance, interest, and the general overhead charges incident to this kind of mechanical operations.

The costs of commission spinning for various sizes and counts of worsted yarns are thoroughly established in Bradford, and we would quote on standard sizes in twofold yarns to-day:

Quality. Cents per pound. 36s

These commission prices carry with them a profit to the spinner, which profit, it might be fairly said, would be an amount sufficient to embrace the merchant's charges before referred to, so that the net cost of converting combed wool or tops into finished worsted yarns of standard sizes would be reckoned upon the commission charge for various counts based on the conditions thus named.

Taking the manufacturing costs in this country as double those of Europe, a duty of these amounts on these specific numbers or such sub-

division of the same as to count or size would be necessary to safe-guard the American market against the product of foreign machinery.

In the spinning of yarns we have eliminated a factor which we previously referred to as having a marked influence upon costs in the combing of wools, and that is the question of quality and length of fiber. In the converting of tops into the sizes of worsted yarns to which they can economically be spun, the conversion cost varies but little between a fine and a coarse quality of stock; therefore the difference between conversion costs abroad and here can be closely approximated in a constant figure from year to year.

AN INCONSISTENCY

AN INCONSISTENCY.

The bill proposing to revise Schedule K, which has been offered by the distinguished Senator from Utah, and is described by him as based on the report of the Tariff Board-I make any criticism with the greatest respect for the Senator's knowledge of the subject, which is superior to mine—fails, in my opinion, to conform with the recommendations of that board in the character of its duties upon tops and yarns. The Senator from Utah, with great intelligence, safeguards the interests of his woolgrowing constituents by his specific duty of 15 and 13 cents a pound on the clean content of raw wool. This specific cents a pound on the clean content of raw wool. duty is in accord with the Tariff Board report; but in proposing his duties on those important manufactured products, tops and varns, the Senator from Utah departs from the sound principle which he has applied to the case of raw wool, and provides that the protective duty on tops shall be 10 per cent ad valorem and the protective duty on yarns 30 per cent ad valorem in addition to the specific compensatory duties. The use of ad valorem rates to protect the manufacturers of tops and yarns, while the woolgrowers are protected by a specific duty, is a very grave and wholly unnecessary inconsistency in a measure professedly constructed from the protective standpoint. Not only does the Tariff Board distinctly state that (p. 17) "if a specific duty be placed on the scoured content of the raw wool, it would be possible to levy a specific duty on tops and yarns "not only does the Tariff Board declare this to be entirely practicable, but it holds the specific duty to be fair and effective and preferable in every way, in the words which have just been quoted. Indeed, one of the most salient features of the entire Tariff Board report is the emphasis which is everywhere laid upon specific duties as more scientific and more just both to the American producers and to the Government.

The Senator from Utah acknowledges and accepts this principle as applied to the woolgrowing industry of the Western States, but he rejects it as applied to the manufacture of tops and yarns, where the Tariff Board declares that a specific rate of duty for protective purposes is wholly feasible. This inconsistency is a serious fault, to my mind, in the bill proposed by the Senator from Utah. In the measure which I am offering, the recommendations of the board in this respect are consistently followed. There is a specific duty of 18 cents a pound on the clean content of the raw wool, a specific duty of 29 cents a pound on tops and a specific duty on yarne, graduated account. a pound on tops, and a specific duty on yarns, graduated according to their fineness, all constituting a faithful effort to fulfill the recommendations of the Tariff Board, the results of its long

and patient inquiry.

COMPOUND DUTIES.

For the purpose both of revenue for the Government and of adequate protection to American producers specific duties are so strongly preferable that I would have arranged such duties on cloths and dress goods in the bill which I have offered, if the judgment of men with practical knowledge of the industry had not been confirmed in my own consideration of the subject, that such treatment of these finished fabrics was entirely impracticable. In every protectionist tariff revision of recent years the application of specific duties to woolen cloths and dress goods has been sought and studied, but the effort has invariably The situation has been well stated in the report of the failed. The situation has been well stated in the report of the Tariff Board, where, after an earnest approval of the specific system, the board adds (p. 710):

But no satisfactory method of classifying woven fabrics in the case of manufactures of wool with a view to the assessment of specific duties has yet been devised. Efforts have been made to classify woolen and worsted fabrics according to weight per yard and picks per inch as the proper basis for adjusting rates to relative differences in cost. This method, however, fails to take into account either the great variations in the quality of yarn going into a fabric of a given class or the great variations in the finishing of cloth after the process of weaving is completed. From an examination of many fabrics it appears that no system of classification along such lines has yet been worked out which would act in a fair and equitable manner.

It would seem, then, that in so far as woolen and worsted fabrics are concerned, the only present practicable method of levying duties is to adopt in some measure a system of ad valorem duties. Such advalorem duties would necessarily be in addition to any compensatory duties levied because of the duty on the raw material. * * * * A system of graduated duties, increasing regularly with different increments of value, could be made equitably to equalize the difference in the cost of production on the more expensive fabrics without placing prohibitory rates on fabrics of lower grade.

Unable to secure a satisfactory form of specific duties as ap-But no satisfactory method of classifying woven fabrics in the case

Unable to secure a satisfactory form of specific duties as applied to cloths and dress goods I have adopted the alternative

suggested by the board and have applied to these fabrics a system of graduated compound duties, partly specific, partly ad valorem, adjusted according to the value of the goods. Not only is this plan approved by the Tariff Board, but it is recommended as the most just and effective method by President John P. Wood, of the National Association of Wool Manufacturers, in his memorial to the Committee on Ways and Means. Mr. Wood there says (p. 22):

there says (p. 22):

The infinite variety of articles embraced in the woolen schedule makes it quite impossible to specify the exactly proper rate for every group, and so to define each group that it would include only such articles as the rates for that group exactly and properly apply to. We have already pointed out that ad valorem rates wholly fail to meet the requirements of the case. The nearest to a general statement that can be made is that the present ad valorem rates, in addition to whatever compensatory allowance is necessary to cover the wool duty, are in most cases the least that would be sufficiently protective to continue the industry in its present propertions and with its present rates of wages; that in the case for which it is not practicable to devise duties wholly in specific form the rates should be compound with at least half of the total sum specific; that for yarns and tops the rates should be specific, and they can readily be levied in that form with more exact justice to all interests than by any other method.

An important feature of compound duties as applied to the

An important feature of compound duties as applied to the lower-priced fabrics is stated by Mr. Wood as follows (p. 23):

lower-priced fabrics is stated by Mr. Wood as follows (p. 23):

In the case of some of the cheaper forms of dress goods and cloths the present ad valorem rates would not be protective, because, as has already been explained, the conversion cost does not decrease in the same ratio as the raw-material cost; hence a percentage of total value that would be adequately protective for goods of medium value when applied to those of low value would not produce amounts proportionate to the difference in manufacturing cost of the cheaper goods. Under the present tariff, as has always been thoroughly understood by those who have given the subject more than superficial attention, the deficiency in the ad valorem rate on low-priced goods is made up in the specific rate, which for such goods is and was always intended to be partly compensatory and partly protective.

REDUCTIONS IN THIS BILL.

REDUCTIONS IN THIS BILL.

Mr. President, as regards the reductions in this bill, it makes very considerable reductions. I invite the attention of the Senate to the extent of the reductions in a few figures which I shall give.

Mr. GALLINGER. Before the Senator does that, can the Senator in just a sentence suggest the relative reductions made by the Senator's bill as compared with those made by the bill of

the Senator from Utah [Mr. SMOOT]?

Mr. PENROSE. No; I can not do that. I think perhaps the Senator from Utah could do that. I have no comparison on that point. I am now referring to the reductions made from the Payne law, the present law:

the Payne law, the present law;

On cloths, for instance, the duties have been reduced from in the neighborhood of 10 per cent of the rate of duty under the existing law on the high-priced and expensive fabrics, which may be classed as luxuries, to as much as approximately 125 per cent of the rate of duty under the existing law on the lower and cheaper grades. On blankets of the higher grades there are reductions running from 12 per cent to 24 per cent, and on some of the cheaper qualities, where the value runs from 20 cents to 40 cents per pound, the present duties in many cases have been almost cut in half.

The duties on yarns show a reduction of from 8 per cent to 45 per cent of the rate of duty under the existing law under the different conditions of the market. In the same way the duties on tops will show reductions running from 35 per cent to a little over 50 per cent of the rate of duty under the existing law.

In answer to the inquiry of the Senator from New Hampshire

In answer to the inquiry of the Senator from New Hampshire [Mr. Gallinger] as to a comparison of rates under the bill introduced by me and that of the distinguished Senator from Utah, I ought to say that they may be rather hard to compare, because I think I have a higher duty on wool than the Senator from Utah has; have I not?

Mr. SMOOT. I think the Senator's duty on wool is somewhat higher. Of course, that carried into the compensatory duties on cloth will make his cloth a little higher.

Mr. PENROSE. We should have to figure from the same rate of duty on the raw product to make an accurate comparison.

These are real and substantial reductions. They constitute a vigorous revision of the schedule. It is my firm belief, however, that the rates proposed are high enough to save woolgrowing and wool manufacturing from serious injury. course the rates proposed are higher than those of the woolen schedule in the bill advocated by the majority of the Senate. But the majority bill, it should be borne in mind, is very frankly nonprotective, while the measure which I have presented seeks to give American farmers and ranchmen and American mills at least a fair chance in competition with foreign producers.

THE WOOL-CONTENT PROPOSITION.

Both the bill of the Senator from Utah revising Schedule K and the bill presented on behalf of the minority of the Committee on Ways and Means in the last Congress based the compensatory duty "on the wool contained" in the partly or wholly manufactured product. The motive of this provision of these other measures is undoubtedly well intentioned, but the provision itself in its practical effect is open to very serious objection. The protective duty on any class of woolen goods should be sufficient to cover the difference in the cost of conversion between our own country and competing foreign countries. This difference is a constant quantity and is practically the same, so far as popular-priced woolens are concerned, for

all-wool or part-cotton fabrics.

An ad valorem rate of duty sufficient to cover that difference in conversion cost for all-wool fabrics would be insufficient in the case of part-cotton fabrics of really durable and meritorious quality but of lower value because of the lower cost of the cotton material. In such a case that part of the specific duty that is not actually required to compensate the manufacturer for the duty which he has paid on his raw wool is necessary to make up for the deficiency in the ad valorem duty as an adequate protective duty for the manufacturer. Thus, inadvertently the framers of these other measures offer bills which are not adequately protective, as experience under such legislation would quickly and conclusively demonstrate.

Another grave defect in the wool-content provision of both bills referred to, that the compensatory duty should be allowed only "on the wool contained" in partly or wholly finished manufactures, is that, although the customs officials can distinguish between cotton, a vegetable product, and wool, they can not distinguish between new wool and shoddies, low grades of which are frequently of less value than cotton. This method of basing the compensatory duty on the actual wool content would, in effect, discriminate against honest cotton-warp goods with a pure wool weft of enduring quality in favor of cheap shoddy trash receiving the full compensatory duty. As the Tariff Board says in its report (p. 626):

Goods made with a cotton warp and wool weft may be easily recognized and rated, but it frequently happens that both warp and weft contain more or less of cheaper materials. There are, of course, well-known and simple tests for discovering the cotton content of a fabric, but their application to imported cloths in the customhouse would involve considerable difficulty. Moreover, there is no test known that will disclose the proportion of noils, shoddy, mungo, etc., to new wool in many varieties of fabrics.

A provision like that referred to in these two other bills would tend inevitably to degrade the character of the clothing of the American people, who, under the present tariff system, have come into the fortunate position of wearing proportionately more new wool and less shoddy than any other people in the world. This is a fact of absolute record, proved by the official investigations of our Government. The United Kingdom, with only one-half as many inhabitants as the United States, has nearly three times as many rag machines for the manufacture of shoddy as this country.

I read this morning, during the colloquy between the Senator from Wyoming [Mr. WARREN] and the Senator from Montana [Mr. Walsh], an extract from the report of the Tariff Board,

on page 72. I will read it again:

The greatest shoddy-producing center in the world is in and near Batley and Dewsbury, England. Of the 900 rag-grinding machines in the United Kingdom, Yorkshire, in which Batley and Dewsbury are located, has 881 machines. In the whole of the United States there are only 346 rag-grinding machines.

SHODDY IN AMERICA AND IN ENGLAND.

British woolen mills, according to an official estimate, use 200,000,000 pounds of shoddy every year. The consumption of shoddy in the woolen mills of the United States in the year 1909—a year of active manufacturing—was less than 80,000,000 pounds. The use of shoddy is decreasing under the protective system of the United States; it is increasing under the tarifffor-revenue system of Great Britain.

I will ask to have the following extract from Men's Wear of June 25, 1913, regarding English fabrics, read by the Secretary.

The VICE PRESIDENT. There being no objection, the Secretary will read as requested.

The Secretary read as follows:

ENGLISH FABRICS.

An important selling agent, who has just returned from abroad, said recently: "I have been all through certain mill districts in England, and I never before in my life saw such development of the art of manipulation as I have seen in their fabries. They are past grand masters in making goods which look like what they are not.

"Now," he added, "these goods will not go with the American people. They may for a season, but they will not last. They are not good enough. It is an astonishing thing the amount of shoddy which English manufacturers put into all their cloths. Now, of course, I am talking about the great bulk of business done by England, for everyone knows that, on the other hand, there are English manufacturers who make wonderful fabrics, but the product of these latter mills we will probably see little of in this country."

Mr. PENROSE. British manufacturers import rags for shoddy from all the world. The United States imports almost no rags and shoddy, but exports to British manufacturers every year thousands of bales of rags, for which there is no adequate market and no active use in this country.

Some of the woolen fabrics made by British mills are of excellent quality and workmanship, but a great many fabrics, an immense proportion of the total production, are made from shoddy and other cheap substitutes for wool. These "cheap fabrics were heavily imported during the life of the Gorman-Wilson law. They are sure to be imported under the proposed rates of the pending bill, which are a great deal lower than the Gorman-Wilson duties-lower, practically, by the difference between 50 and 35 per cent.

This pending measure puts a premium upon the importation of shoddy goods, enormous quantities of which will unquestionably be shipped from Europe as soon as the reduced rates become effective. This will have two very serious results. One will be an impairment of the quality of the clothing of the American people, which is exactly what the country experienced under the Gorman-Wilson law of 1894-1897. Another result will be that American manufacturers, who now use shoddy sparingly or not at all, will be forced to meet their foreign competitors as nearly as possible on even terms and will, therefore, be forced to perfect themselves in the manipulation of these cheap-wool substitutes, an art in which English manufacturers working under the tariff-for-revenue system are confessedly the most experienced and adept in the world.

ONE FLAT RATE AN ERROR.

The pending Democratic tariff bill in its woolen schedule provides for a flat rate of 35 per cent on all cloths and dress goods in "chief value" of wool. Not only is this rate far too low to span the difference in the cost of conversion of these fabrics between the mills of our own country and the mills of competing low-wage foreign countries, but the application of a single flat rate to all kinds and values of woolen goods is a serious fault of technical construction. This defect in the proposed bill has been authoritatively pointed out by a former member of the German tariff commission which framed the last German tariff— Mr. Julius Forstmann, the president of the Forstmann & Huffmann Co., of Passaic, N. J. For the past 10 years Mr. Forstmann has been a resident of the United States. Before that time he was for 10 years the managing partner in one of the leading German wool manufacturing establishments, founded by his great-grandfather in 1803.

Mr. Forstmann is thoroughly informed as to the art of wool manufacturing and he is also familiar, through his practical experience, with the scientific methods of tariff construction practiced in Germany. Mr. Forstmann, on behalf of the fine American woolen trade which his mill represents, protests against the pending Democratic measure as wrong both in de-

tail and in general purpose. He says:

In the recommendation of a flat rate on partly and wholly manufactured woolen products, a fundamental mistake has been made. The flat rate is wrong from every point of view. It is wrong because of the greater cost of manufacture of fine fabrics, fully explained in my brief to the Ways and Means Committee. It is wrong from a fiscal point of view, because it needlessly sacrifices revenue.

Some of the Democratic leaders have bitterly complained against Republican Congresses that they were willing to receive recommendations from American manufacturers as to the framing of previous tariff laws. Apparently the authors of this pending bill could have profited by consulting with practical American manufacturers more freely and fully than they have done. In other countries able representative business men are not only permitted to express their views as to the framing of tariff laws, but are earnestly invited and urged to give the Government the benefit of their thorough knowledge and experience. That is the practice in vogue in Germany, whose methods of tariff making have so often been applauded as worthy of the emulation of the United States. German tariff commissions are made up jointly of certain representatives of the Imperial Government and certain chosen representatives of the great national industries.

Mr. WARREN. Mr. President, I do not know but that the Senator has already stated this; but Mr. Forstmann, if I remember correctly, has manufactories to-day on both sides of the

Mr. PENROSE. On both sides; that is correct.
Mr. WARREN. Both in Germany and in America.

Yes; I think I stated that, I did not eatch it. Mr. PENROSE.

Mr. WARREN. I did not catch it.
Mr. PENROSE. It was in this capacity, as an expert representing the wool manufacture, that Mr. Forstmann sat on the recent German tariff commission and aided in the framing of the German tariff laws, designed, like the present American law. to give native manufacturers a distinct preference in the home market.

Mr. WARREN. May I interrupt the Senator right there?

Mr. PENROSE. Yes.

Mr. WARREN. Germany formerly pursued about the same course in regard to woolgrowing that this Nation has pursued; but when they made wool absolutely free they had 30,000,000 sheep, and now they have 7,000,000.

Mr. PENROSE. Our number of sheep will go down in the same, if not greater, proportion within a year after the passage

of this bill.

THE TARIFF BOARD AND ITS WORK.

A swift cooling of Democratic enthusiasm for a tariff commission or a tariff board became manifest in the year 1911, when the report of the Tariff Board on the wool and woolen industry was published. The board had devoted a year or more to the study of this industry, and its report, therefore, was fuller and more comprehensive than was the case with the other industries examined. A great many exceedingly important facts were officially established by the board—facts thoroughly well known to those engaged in the woolen manufacture but unfamiliar to many of the public men of the country and to the people as a whole.

In this report of the Tariff Board practically all of the main protectionist contentions in regard to the wool and woolen industry were formally substantiated. For one thing, the woolen manufacture was proved to be a highly competitive industry in which no trust or combination existed or ever had existed (pp. 14, 15). This gave the official quietus to a favorite piece

of campaign fiction.

The Tariff Board found that the woolen mills of the United States were numerous and large enough to produce all of the woolen goods required by the American people. Even in the worsted branch of the wool manufacture, the development of which started late and was long retarded by unfavorable Treasury rulings, the industry had been brought fully up to date. On this point the Tariff Board report said (p. 15):

It is true that some years ago a greatly increased demand for worsted fabrics, assisted by the high tariff on worsted goods and their by-products, made the manufacture of such goods very profitable and the investment alluring, but this led to a rapid increase of worsted machinery in this country and the building of great modern mills in rapid succession in various parts of the East. A very considerable part of this increase was due to the influx of foreign capital and the transfer of experienced cloth manufacturers from other countries. The result has been a great increase in competition.

Besides nailing the delusion of a Woolen Trust the Tariff Board report destroyed the partisan assertion that enormous rates of duty, ranging from 150 to 250 per cent, in Schedule K were availed of by grasping American manufacturers. Tariff Board made a special investigation of this branch of the subject, and as a result declared that the prices of woolen fabrics that enter into popular use (p. 14) "are not increased by the full amount of the duty." The board made a collection of representative samples of English woolen fabrics, matched them with American-made cloths with which they were fairly comparable, and then ascertained the mill prices of these fabrics in

America and England for the same date.

Exposing the assertion about the enormous duties, the board discovered that while the nominal rates of duty on English fabrics entirely excluded by the tariff would reach an ad valorem figure of 150 or even 200 per cent (p. 14), the comparable American fabrics sold in the market at only from 60 to 80 per cent more than similar goods sold for abroad. The board considered particularly 16 samples of foreign goods, none of them imported, and found that though the nominal duties on such fabrics equaled 184 per cent the price for which similar American fabrics were selling exceeded the foreign price by only about 67 per cent. "This," significantly declared the Tariff Board (p. 14), "is the result of domestic competition." In other words, in this much-attacked industry the principle of American competition was fully effective toward a reduction in the price of goods, just as believers in protection had steadily maintained from the time of Washington to the time of McKinley.

WHY OUR GOODS COST MORE.

Moreover, a large part of the 67 per cent excess of the American price over the foreign price of these comparable woolen fabrics was due not to any charges of the American manufacturers but to the higher prices which the manufacturers were required to pay for their raw material because of the protective duties against foreign wools. "The manufacturer," says the Tariff Board (p. 15), "who imports his wool must pay the full amount of the duty, and this means either additional working capital or an additional interest charge to be paid. Wools grown in the United States are increased in value by the duty, but not by the full amount of the duty."

Moreover, the cost of the product of the American woolen manufacturer is enhanced by the higher cost of erecting and equipping American woolen mills—a cost 45 or 50 per cent greater on the average than in England. The wool duty aver-

ages about 45 per cent. The cost of a mill, building and equipment, as has just been said, is 45 or 50 per cent greater. in the important item of labor the American manufacturer pays from 100 to 200 per cent more than his foreign competitors. And labor in the American woolen mills, as the Tariff Board has ascertained and stated, is no more efficient or productive than the same kinds of labor in European mills equipped with the same kinds of modern machinery. There is, of course, a limit to the speed to which textile machinery can be run with-There is, of course, a out impairing the quality of the product, and this maximum speed, the board found, had been reached in England as well

Even the unskilled labor of raw immigrants, the Tariff Board demonstrated, received more money in American woolen mills than the most skilled and experienced English, Scotch, and Irish operatives in the woolen mills of the United Kingdom.

I have already had printed in the RECORD a table showing the enormous difference in wages between England and the United States. Skilled operatives in American woolen mills, according to the figures gathered by agents of the Tariff Board, are paid from two to four times as much for doing the same kind of work as are skilled operatives of the same type on the other side of the Atlantic. It is labor, therefore-almost entirely the higher cost of labor-in one form or another that makes the price of woolen fabrics measured by their cost of manufacture higher in this country than it is abroad.

TWICE THE CONVERSION COST.

A particularly careful inquiry into the cost of conversion of yarns and fabrics was made by the Tariff Board in American and English woolen mills, and as a result of this the board in its report declared that-

Although there are wide variations in both countries from mill to mill, the conversion cost for the same quality and count of yarns in the United States is about twice that in England.

So as to woolen cloths and dress goods. The board on this point states that (p. 17)-

The cost of turning yarn into cloth in the United States compared with England is all the way from 60 per cent to 170 per cent higher, according to the character of the fabric. For a great variety of fabrics, the American conversion cost is from 100 to 150 per cent greater than the English cost.

It should of course be understood that the fact that the difference in the cost of manufacturing cloth is 100 per cent or more does not mean 100 per cent of the market value of the cloth. It does mean that the cost of spinning, weaving, and finishing the cloth is 100 per cent greater. The laborers in America get a great deal more money, but it does not follow that the manufacturers receive a great deal higher profit than is customary abroad. On the contrary, textile manufacturers who have had experience both in America and in Europe have often declared that the competition in this industry in this country is far sharper and more persistent than it is in Europe, and that mill dividends here, on the whole, are less than they are abroad.

One interesting part of the inquiry of the Tariff Board dealt with the manufacture of ready-made woolen clothing, an art in which it is acknowledged that America leads all the world. Agents of the board studied carefully the cost of production at every stage of this industry. For example, they worked out all the items in the manufacture of a good suit of all-worsted clothing made to sell at retail at \$23 upward (pp. 18-22). took 3.6 vards of woolen cloth to make this suit, and for the manufacture of this cloth 9.7 pounds of Ohio wool were re-

All the woolen cloth in this suit was sold by the mill for \$4.78, out of which, as the Tariff Board showed, there was a profit of only 23 cents for the cloth manufacturer. The price paid by the cloth manufacturer to the woolgrower for the 9.7 pounds of wool was \$2.23, out of which, as the Tariff Board showed, the woolgrower's profit was 68 cents.

If the tariff were reduced enough to efface the cloth manufacturer's profit of 23 cents and the woolgrower's profit of 68 cents, there would be a possible saving of 91 cents in the cost of this typical suit of American-made clothing, for which \$23 or upward is paid to the retail clothing merchant by the man who

buys and wears the suit.

Free raw wool and the 35 per cent cloth duty, as embodied in the pending Democratic tariff bill, would more than efface all the 23-cent profit of the American cloth manufacturer and the 68-cent profit of the American woolgrower besides. This would, of course, in the long run, extinguish both branches of the industry unless the people who work in the American woolen mills would accept wages approximately equal to those paid in an English woolen mill, and the people who work on American farms and ranches would accept wages equal to those paid in Australia, Argentina, and South Africa. This is what the radical Democratic tariff program ultimately comes to-it is the man who works who pays the price.

THE LESSON OF EXPERIENCE.

The authors of this Democratic tariff bill are apparently blind and deaf to all the preachings of experience. Less than 20 years ago a tariff measure, differing from the one now proposed only in that it was markedly less extreme and more moderate in its rates of reduction from existing duties, passed the House and Senate in the second year of another Democratic administration. Under that administration, and only in part, and in small part, because of financial disturbances abroad, a terrible disaster came upon all American industries.

One of the wisest and greatest of American statesmen at that time well said that the money cost of the Gorman-Wilson tariff, the derangement which it brought to American business, and the loss which it imposed upon American wage earners were greater than the cost of a serious foreign war. Senator George F. Hoar, of Massachusetts, in the debate upon the Gorman-

Wilson law, declared that the-

warfare is upon the savings bank, upon the life insurance, upon the yeoman on the farm, and upon the workman in the mill. The alliance is between the spirit of sectionalism in the South and that spirit of the North which never has known the impulse of a true nationality.

These may seem severe words, but they were fully justified by the actual consequences of that fatal experiment in tariff for revenue only, which wrecked the second administration of President Cleveland and caused a desperate party, groping about for another issue, to commit itself in 1896 to the quickly ex-

ploded notion of free silver coinage at 16 to 1.

The staggering results of the Gorman-Wilson tariff law are sharply illustrated in the record of disaster wrought by it under Schedule K, the woolen schedule, for which I have offered a safe and moderate substitute for the extreme measure now again before the Senate. It is sometimes urged, and doubtless in good faith, by the enemies of the protective tariff system that the business disaster of 1894-1897 in this country was largely due to and simultaneous with severe financial depression in Great Britain and on the Continent of Europe. But this theory, with which our opponents seek to comfort themselves for the complete breakdown of their legislation of nearly two decades ago, is utterly demolished by the hard facts of record in the experience of the woolen manufacture under the Gorman-Wilson law, which, indeed, is not unlike the experience of other great American industries.

Great Britain, our principal competitor in the woolen as well as other trades, did not suffer from adversity, from financial or any other causes, throughout the life of the Gorman-Wilson tariff law. On the contrary, that earlier Democratic tariff which, it should be borne in mind, was much higher and more nearly protective than the radical bill now proposed, conferred an immeasurable boon upon the British woolen as well as other forms of foreign manufacture. Under the Gorman-Wilson tariff, and because of the Gorman-Wilson tariff, British woolen mills exulted in the greatest prosperity they had ever known.

WHAT THE GORMAN-WILSON LAW DID.

The Gorman-Wilson law made woolen cloths and dress goods dutiable at 40 per cent if valued at 50 cents a pound and at 50 per cent if valued at more than that figure. The 50 per cent rate was applicable to most of the imports, and it is to be compared with the single 35 per cent rate imposed on cloths and dress goods by the bill of the present majority of the Committee on Finance. Like the bill now proposed, the Gorman-Wilson law was throughout based in general on the ad valorem system of levying duties. This of itself proved a most costly blunder, for the ease with which fraudulent undervaluations were effected reduced the 50 per cent rate in practice so heavily and constantly that an enormous flood of foreign woolen fabrics, in large part of a cheap, shoddy, inferior character, poured into the United States. As an expert observer of the workings of the Gorman-Wilson policy said at the time:

The reason why the existing tariff is working so disastrously to the American wool manufacture may be stated in one sentence: It is due to the substituting of purely ad valorem duties for the compound duties of previous laws. This change in the form of the duties has been unfortunate in its effects upon the domestic industry, demoralizing to the general trade of the country, and disastrous to the revenue of the Government.

Government.

The variations in the styles, grades, and costs of woolens are so multifarious and so constant that local appraisers, however honest and alert, can not ascertain the costs with certainty or uniformity. Where the disposition of the appraiser is to grant the importer an illicit advantage the machinery of the law is unable to cope with the evil.

Different standards are applied by different appraisers at different ports to the ascertainment of the market value of identical goods; the amount of duties assessed varies widely in consequence, and the content of the content of the property of the standards widely in consequence, and the content of the c

stitutional requirement that all taxation shall be uniform becomes a

dead letter.

These conditions have compelled private citizens to organize in self-defense, to employ their own agents to trace undervalued goods into the market, to gather the evidence that they are invoiced below market

value, and force it upon the consideration of appraising officers, and to aid, urge, and demand that Government officials shall enforce the law. The spectacle of private citizens organizing in this manner to protect themselves against the consequences of defective laws defectively administered is without a parallel in any civilized government. (Bulletin National Association of Wool Manufacturers, 1896.)

And yet the leaders of the Democratic Party learned nothing by those three years of bitter experience. They have again brought out an ad valorem tariff bill, which differs from its ill-fated predecessor of 1894 only in that its attacks upon American industries are more savage and extreme, calculated to work greater injury to American trade and to confer greater benefits upon the trade of Europe.

ROBBING AMERICA TO ENRICH EUROPE.

The Gorman-Wilson law, with its radically reduced duties and faulty ad valorem rates, closed at one time or another onehalf of the woolen mills in the United States and turned practically one-half of the American woolen-goods market over to European manufacturers. Terrible distress ensued in American manufacturing communities. Thousands of employees of the idle mills were destitute dependents upon public charity. Even though wages were reduced again and again American woolen mills could not compete with the mills of Great Britain or the Continent, where less than a dollar a day was high pay for an able-bodied man in the textile trades and 50 cents for a skilled woman operative.

The National Association of Wool Manufacturers, in summing up the actual experience of the industry under the Gorman-

Wilson tariff, said in 1896:

Wilson tariff, said in 1896:

These two years, in which they have had unrestrained and unfettered access to the wools of the world, have been the most disastrous in the history of American wool manufacture, not excepting the collapse that followed the close of the War of 1812 or the panic of 1857. These three occasions have heretofore stood in men's minds for the worst that could happen to this particular industry, in consequence of commercial panic or change in economic law. Neither of them furnishes a standard by which to measure the extent of the present disaster. * * All of the old standards were broken down. The volume of imports soon became appalling. * * It was like the breaking loose of the Johnstown Reservoir—it swept everything before it.

That was the condition in the United States. At that same period the British woolen manufacturers and British journals were hailing the Gorman-Wilson law as a great and glorious benefaction and were exultantly pointing to the high prosperity that the new American tariff had brought to the rich mill owners of the United Kingdom, in contrast with the paralysis and suffering brought by the same law to the populous manufacturing communities of the United States. The Bradford (Yorkshire) Observer, in its annual review of the woolen trade for 1895, described the year as "the most extraordinary of the waning century," and attributed British prosperity chiefly to-

The more reasonable tariff adopted by the United States. * * * Not for years had such a thing happened as that a loom should stand idle with a warp in it for want of somebody to attend to it. Hundreds of households have been stranded because their maids of all work have thrown away the cap and print dress to don the weaver's harden skirt

At this same time thousands of looms in America were standing idle, and the skilled men and women who used to tend them were driven to seek the help of charity. An article in the Lon-don Times, written by a distinguished British manufacturer, further emphasized the enormous benefit that had been conferred upon the English woolen industry by the authors of the American Gorman-Wilson tariff law. This writer in the Times

There is room for doubt whether outside the West Riding of Yorkshire it is at all generally realized that the year 1895 witnessed a revival in the worsted industry of such magnitude as to be a matter not only for local but for national congratulation. After long years of depression, the varying, sometimes doubtless intermitted gloom of which had lately become painfully intense, the great manufacturing district of which Bradford is the center was visited last year by the full sunshine of prosperity. Roughly speaking, the Wilson tarlif, which came into effective operation in the last month of 1894, in place of the strangling system of duties associated with the name of McKinley, reduced the customhouse charges upon the principal products of the Bradford district imported into the States from 100 per cent of their value to 50 per cent.

The Times went on to note with manifest gratification that the value of worsted coatings imported from the Bradford mills into the United States had increased "fully 600 per cent." Helmuth Schwartze & Co.'s annual report on wool at the same time declared that-

the dominant factor in the past 12 months has been the recovery and rapid development of the export trade of wool and woolens to the United States, under the stimulating influence of free wool and reduced duties on goods.

Such quotations from British authorities might be multiplied indefinitely to show the keen appreciation of British manufacturers and editors for the unexampled generosity with which the Democratic framers of the Gorman-Wilson law had crippled and destroyed the industries of their own country in order that

expectant British manufacturers might heap up larger dividends and more easily support the honors and dignities with which their sovereign was wont to reward successful business men. Ruin and misery at home, prosperity, wealth, and luxury abroad were the concrete results of the Gorman-Wilson tariff for revenue only.

If such results followed the enactment of the Gorman-Wilson law, the duties of which were in excess of those of the present bill by a considerable percentage, what must we contemplate to be the result under free wool and the still lower duties of the pending bill when it shall become a law?

WORSE THAN THE GORMAN-WILSON LAW.

Now another Democratic tariff bill is in the making, and because of it another "full sunshine of prosperity" is about to dazzle the mill-owning magnates of the British Isles at the expense of thousands of wage earners in America. The pending Democratic tariff measure goes far beyond the Gorman-Wilson law in the lavish subsidies which it bestows upon the manufacturers of Great Britain and the Continent. Here is a comparison of the rates of the pending bill and of the Gorman-Wilson tariff on the principal products covered by the woolen schedule-and the woolen schedule is fairly typical of all:

	Present Democratic tariff bill.	Gorman- Wilson law.
Tops	Per cent. 5 15 35	Per cent. 20 30 to 40 1 40 to 50

1 Most of the imports under the Gorman-Wilson law actually paid the rate of 50

Since the Gorman-Wilson era wages in American woolen mills have advanced on the average about 30 or 40 per cent. There has been no corresponding increase in the wages paid to the employees in the woolen mills of Great Britain; indeed, there has scarcely been any appreciable increase in British wages at Is it surprising that British manufacturers are urging their public men and newspapers to avoid any congratulatory comment on the pending tariff-revision measure until it has finally passed both Houses of Congress and received the signature of the President? From the British standpoint this bill is almost too good to be believed.

It actually carries many rates of duty much lower and more favorable to British interests than the New York importers rep-resenting these foreign manufacturers dared to ask for in their arguments and briefs presented to the Committee on Ways and Means and to the Committee on Finance. This bill of the Democratic majority is distinctively a bill against America and for

Europe.

THE WOOL-CONTENT QUESTION.

Mr. President, I have here correspondence conducted between the Secretary of the Treasury and myself when I was chairman of the Finance Committee during the last Congress, regarding the difficulty and impracticability of making the specific duties on manufactures of wool applicable to the wool contained in such manufactures, and as it explains the matter very fully and gives the opinion of the appraisers in Boston, Philadelphia, and New York, I ask to have it inserted in the RECORD for the information of the Senate as part of my remarks.

The VICE PRESIDENT. In the absence of objection, permis-

sion is granted.

The matter referred to is as follows:

TREASURY DEPARTMENT, Washington, July 12, 1912.

Hon, Boies Penrose

Hon. Boies Penrose,

United States Senate.

My Dear Senator: I have your letter of July 11 in which you request that you be furnished with the reports of the appraisers and of the Bureau of Standards with respect to the practicability of making the specific duty on manufactures of wool applicable to the wool contained in such manufactures for the temporary use of the members of the Finance Committee, if consistent with the rules of the department. I am very glad to forward these reports in accordance with your request. It is to be noted that some of the replies are limited to the specific question raised as to whether or not the amount of virgin wool can be distinguished from shoddy, mungo, or flocks, and do not cover the main issue as to the ascertainment of the amount of wool as a whole.

Will you please have the reports returned to the department when they shall have served your purpose?

Yours, very truly,

J. F. Curis,

Assistant Secretary.

DEPARTMENT OF COMMERCE AND LABOR,
OFFICE OF THE SECRETARY,
Washington, June 15, 1912.
Sir: Replying further to your letter of June 5, 1 am plensed to state
that the Bureau of Standards can make analysis of the proportion of

wool contained in union fabrics. This determination is a comparatively simple laboratory analysis and can be made with a good degree of accuracy. The possibility of making determinations of wool in garments is not so well assured. In the first place, it would involve injury to the garments, unless they were furnished with projecting samples of the fabric which could be removed for the purpose of analysis.

The determination of shoddy, mungo, and waste components can not as yet be made with accuracy. The present methods available are not entirely satisfactory to the Bureau of Standards and would require further investigation before the bureau would be in a position to state definitely that such analysis could be depended upon. It is a matter which the Bureau of Standards has had under consideration for some time and upon which work is now in progress.

Any further assistance which the bureau can render you will be gladly supplied.

Respectfully,

CHARLES EARL,

Acting Secretary.

CHARLES EARL, Acting Secretary.

The honorable the SECRETARY OF THE TREASURY.

TREASURY DEPARTMENT,
UNITED STATES CUSTOMS SERVICE,
OFFICE OF THE APPRAISER OF MERCHANDISE,
Port of New York, N. Y., June 6, 1912.

Hon. James F. Curtis, Assistant Secretary of the Treasury, Washington, D. C.

Sir: In reply to your letter dated June 5, regarding the contemplated tariff provision on wool and woolens, it would be impracticable, indeed impossible, to ascertain the amount of virgin wool contained in cloth or clothing. The shoddy, mungo, and waste components are intermixed with the wool in the yarn in such a fashion as to make it practically impossible to separate the same and determine the quality of virgin wool in the gloth.

impossible to separate the same and determine the quality of virgin wool in the cloth.

I also call your attention to the fact that it would be impossible to determine the quality of the virgin wool which has gone to make up the cloth. Very different qualities of wool are used in making yarns for cloths, which vary very considerably in value. These could not be distinguished one from another with any reasonable accuracy.

Respectfully,

Francis W. Bird. Appraiser.

FRANCIS W. BIRD, Appraiser.

TREASURY DEPARTMENT,
UNITED STATES CUSTOMS SERVICE,
OFFICE OF APPRAISER OF MERCHANDISE,
Port of Boston, Mass., June 10, 1912.

The honorable the Secretary of the Treasury, Washington, D. C.

The honorable the Secretary of the Treasury,

Washington, D. C.

Sir: Replying to department letter 86638, dated the 5th instant, requesting information, in connection with the contemplated revision of the tariff on wool and woolens, as to the possibility of making the specific duty on manufactures of wool applicable only to the virgin wool contained therein, I beg to report as follows:

For purposes of this report manufactures of wool may be separated into three main divisions, viz, worsteds, woolens, and felts.

Worsted cloths are easily analyzed, for the reason that the yarns of which they are composed are made from long-staple wool, which has been combed, thereby removing all the short fibers; and if both warp and filling are of such yarns the weight of the fabric, less the size and dye contained therein, is the net weight of the fabric, less the size and dye contained therein, is the net weight of the fabric, less the size and dye contained therein, is the net weight of the prigin wool. If the warps are of vegetable fibers, or in part of slik, introduced to form figures or stripes, the same are easily removed by chemical processes. Woolen cloths are much more difficult to analyze, on account of the varying length of the fibers, processes of manufacture, and mixture with mungo, shoddy, or flocks. Many of the higher grades of woolen fabrics are entirely of virgin wool, but on account of the fulling process used during their manufacture the fibers are matted to a certain extent, and the disintegration of the material by mechanical processes would so destroy the condition of the original fibers that much of the resultant product would seem to be shoddy.

Shoddy is the best of the so-called artificial wools, being the wool fiber recovered from worn but all-wool, long-staple materials, and which has never been fulled, or, if so, only slightly. The length of the fiber varies from one-half inch to 1½ inches, according to the original length of the staple in the fabric from which the shoddy is made. Dyed shoddy can

TREASURY DEPARTMENT,
UNITED STATES CUSTOMS SERVICE,
OFFICE OF THE APPRAISER OF MERCHANDISE,
Port of Philadelphia, Pa., June 12, 1912.

The honorable the Secretary of the Treasury, Washington, D. C.

Sir: Referring to the communication of the department of June 5, 1912, concerning the feasibility of making the specific duty on manufactures of wool applicable only to the wool contained in such manufactures, I respectfully report that I have submitted the question to all those in the office whose skill and experience entitle them to give an

expert opinion on the question, and find that it is the consensus of opinion that it would not be possible to determine, with any useful degree of accuracy, the amount and particularly the class of virgin wool in cloths and still less in garments or articles of wearing apparel. In the case of cloths made of worsted yarn, which is only wool with no admixture of shoddy, mungo, or waste, it might be possible, though certainly at a great expenditure of time and labor in each case to make a working approximation of the amount and class of wool, but in the case of cloths made of woolen yarns, which may and generally do contain the baser components, any approximation that could be made, even after painstaking examination and analysis, would be nothing but a mere guess in which probably no two experts would agree.

This being true of cloths in the piece, it of course holds true a fortiori for made-up garments and wearing apparel and other articles. Unless a part of the article could be taken for disintegration and analysis, which in many cases would involve the practical destruction of the sample selected, the amount and character of the contents could be ascertained only by inspection, and all our experts are agreed that the results so obtained would differ so widely that no reliance could be placed on them for any practical or dutable purpose, and would only open the way to encless disputes and litigation.

Respectfully,

F. P. Vincent, Appraiser.

F. P. VINCENT, Appraiser.

Mr. PENROSE. Mr. President, to sum up briefly, I have explained that the bill which I have offered as a substitute for the wool and woolen schedule of the pending Democratic measure is a revision from the standpoint of those who believe in the protective-tariff policy as the best policy for all the people of the United States. The bill is in accord with the desire of the very great majority, for only a minority of the voters at the late election supported the party which declared for a tariff for revenue only, while a great majority sustained the two political parties, Republican and Progressive, whose platforms, although differing in detail, both declared unequivocally for a tariff for both revenue and protection.

The bill places a specific duty of 18 cents a pound on the clean content of raw wool. The specific form of duty is preferred, but doubts are entertained of the practicability of basing the wool duty on the clean content. The whole subject of the form and the amount of the duty on wool might be advantageously left open until a protectionist revision of the tariff is at hand.

I have quoted both from the Tariff Board report on wool and woolens and from statements of the National Association of Wool Manufacturers to prove that specific duties on tops and yarns were practicable—the method which has been adopted in this bill. I have criticized in a friendly spirit the bill of the Senator from Utah for a serious inconsistency in that, while protecting the woolgrowers by a specific duty, the bill provides ad valorem duties for tops and yarns, a discrimination against manufacturers not recommended by the Tariff Board. I have explained that my bill places specific duties on tops and yarns and would have placed specific duties on finished fabrics also if the plan had not proved impracticable. As an alternative the method suggested by the Tariff Board of compound duties partly specific, partly ad valorem, and graduated according to value has been embodied in the bill.

This proposed substitute makes considerable reductions from the existing law. On cloths, for example, the duties are reduced from 10 per cent of the present rate on the high-priced to as much as approximately 125 per cent of the present rate of duty on the lower-priced fabrics. There are reductions on blankets of the higher grades from 12 per cent to 24 per cent, and on the cheaper grades the present duties are almost cut in half. Yarns show a reduction of from 8 per cent to 45 per cent under different market conditions, and tops from 35 to more than 50 per cent. These are real and substantial reductions, but it is believed that the rates proposed will save woolgrowing

and wool manufacturing from serious injury.

The cost of conversion in the woolen manufacture is practically a constant quantity in popular-priced all-wool and partcotton fabrics. An ad valorem duty sufficient for one class of goods would not be sufficient for another. Customs officers can discriminate between wool and cotton in fabrics, but can not distinguish between new wool and shoddy. Therefore the proposals in the certain other bills offered by Republicans as a substitute for Schedule K would, in effect, discriminate against honest cotton-warp fabrics with a pure-wool weft in favor of cheap shoddy fabrics. The Tariff Board report shows that there are nearly three times as many rag-grinding machines in the United Kingdom as there are in the United States. Moreover, 200,000,000 pounds of shoddy are used every year by wool manufacturers in Great Britain as against 80,000,000 pounds in the United States. The admission of foreign fabrics at reduced rates would degrade the woolen clothing of the American people, as happened under the Gorman-Wilson tariff law, and would force American manufacturers, who use shoddy sparingly, to use a great deal of it in order to be on an equality with their foreign competitors.

The Tariff Board report shows that its careful inquiry has

contentions regarding the woolen industry; that the tariff is not added to the price and paid in full by the consumer; that competition keeps down American prices; that American goods cost more because of the higher cost of labor, mill buildings, and equipment and supplies and materials; and that unskilled immigrants in the woolen mills of the United States are paid wages as high as those earned by the most skilled and experienced English, Scotch, and Irish immigrants in the woolen mills of the United Kingdom.

The Tariff Board report gives an analysis of a typical readymade suit of wool clothing made to sell at retail at \$23 and upward, the entire cost of the woolen cloth in which was \$4.78 and the entire cost of the raw wool \$2.23, the profit of the wool manufacturer on the wool required to make this suit being 23 cents and the profit of the grower of the wool that entered into

it being 68 cents

The experience of the American wool manufacturer under the Gorman-Wilson Democratic tariff of 1894-1897 has been referred to. Under this tariff one-half of the American market for woolen goods was monopolized by foreign manufacturers, and at one time or another one-half of the American woolen mills were idle and their employees were dependent on public charity. The Bradford (Yorkshire) Observer and the London Times describe this same period as the most prosperous which English woolen manufacturers had ever known. Comparison has been made of the rates on woolen goods in the Gorman-Wilson law with those of the pending Democratic bill, showing that the duty on tops, which in 1894-1897 was 20 per cent, is only 5 per cent in the present bill; that the duty on yarns, which was 30 to 40 per cent, is now only 15 per cent; and that the duty on cloths and dress goods, which was from 40 to 50 per cent, is now only 35 per cent in the proposed measure. Is it surprising that British manufacturers are urging their public men and newspapers to avoid any congratulatory comment on the pending tariff-revision measure until it has finally passed both Houses and received the signature of the President? From the British standpoint this bill is almost too good to be believed. It actually carries many rates of duty much lower and more favorable to British interests than the New York importers representing these foreign manufacturers dared to ask for in their arguments and briefs presented to the Committee on Ways and Means and to the Committee on Finance. This tariff bill of the Democratic majority is distinctively a bill against America and for Europe.

Mr. WARREN. Mr. President, I have listened with interest to the recital of the feelings of our friends in the British Isles which the Senator from Pennsylvania [Mr. Penrose] has alluded quite fully, and I ask to have read at the desk a short article which was printed in the New York Press, relating to

the same subject.

The VICE PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

[From the New York Press.]

Let all Americans pray that when the new tariff is in operation there will not happen to us all the things the British are confident will happen to us.

We have been examining, for instance, a commercial call to the British in a flaming poster-pamphlet for the most part printed, appropriately enough, in vivid red ink. On the outside front page there is an inviting picture of the Atlantic coast, with a high stone sea wall, behind which our market hitherto has rested secure from commercial investion.

Invasion.

But now the picture shows the wall battered down in front of New York Harbor and fleets of thips steaming in a continuous mass from the British Isles across the Atlantic Ocean to the seizure of the richest market in the world—the market of the United States. And, further, to explain that illuminating picture there are under it these words:

"The cut in the tariff wall is bringing British manufacturers on the run."

run."

Here is some more of the British advertisement:

"A cut in the tariff on imported goods of 100,000,000 people who have the largest spending power per capita of any nation in the world is making John Bull get busy."

In the way of encouraging dilatory British manufacturers and merchants to join those already busy with their plans to flood our markets, the advertising circular explains more in detail:

"John Bull has always loved the American markets.

"A hundred millions of people who have the largest spending power per capita of any nation in the world, speaking the same language as his own, governed by similar laws and customs, employing similar trading, transportation, and advertising systems, appeal to him as providing the happiest hunting ground for trade the world has to offer him.

"He has always assiduously cultivated it, in spite of high protective tariff designed to keep him and others out. Witness a few figures:

Total value of imports from the United Kingdom to the United States

Total value of imports from the United Kingdom to the United States during the past five years.

1908	\$190, 355, 47	ā
1909	208, 612, 75	8
1910	271, 029, 77	2
1911	261, 289, 10	6
1912	272, 940, 70	0

The Tariff Board report shows that its careful inquiry has | "Note the steady increase—excepting the falling away in 1911—an formally substantiated practically all the chief protectionist increase of \$82,585,235 in five years.

"This enormous increase has been achieved under the existing tariff. What will be the figures under the new tariff, which reduces the duties on many articles and makes a breach in the tariff wall of which scores of British manufacturers are at this moment preparing to take advantage? Every boat is bringing British merchants over to survey the field and make arrangements for marketing their goods.

"Do you want to share in this coming trade? Do you want to share in this expenditure of British money?"

Thus we see that in the expectation of our British kinsmen this country, with its flourishing industries, is to be, in the way of sport, a happy hunting ground for our always sport-loving cousins across the sea. In the way of a feast after the sport it is to be fish, fowl, and meat—everything from cysters to plum pudding.

Yes; that is the feast the British appear to expect us to be for them. But they ought not to permit their joy of anticipation to be too immoderate. They ought to temper their chop-licking jubilation with the thought that, if we are to be such easy game for them, then before they pick the last bone of the feast we make for them, then before they pick the last bone of the feast we make for them, those of us not yet devoured shall rebuild that wall and put the revelers outside of it, as once before we did when they came in droves to gorge on the home markets of the United States.

Mr, PENROSE. Mr. President, I have been greatly interested

Mr. PENROSE. Mr. President, I have been greatly interested in the clipping which the Senator from Wyoming [Mr. WARREN] has had read to the Senate, and, bearing on the same subject, I should like to ask the Secretary to read quite a remarkable extract from the Evening Call, of Woonsocket, R. I., published on July 29, 1913, being an interview with a gentleman who is not known to me but may be known to the Senator from Rhode Island [Mr. LIPPITT].

Mr. STONE. Does the Senator desire to have the two col-

umns he holds in his hand read?

Mr. PENROSE. I should like to have them read for the instruction of the Senator from Missouri. I am afraid he would not read the article if it were merely printed in the RECORD.

Mr. STONE. I will neither read it nor hear it read. Mr. PENROSE. Then, I will read it myself.

Mr. STONE. It is an absolute waste of time. Mr. PENROSE. I regret to see that the Senator from Missouri feels that the dissemination of knowledge is a waste of time. The article is as follows:

Louis Le Poutre, of Roubaix, France, the controlling owner of the Lafayette Worsted Co., of Woonsocket, makers of yarn, is here on a brief business trip. The Le Poutre interests, besides owning the Woonsocket plant mentioned, which employs 600 to 800 operatives, employ over 3,000 people in the big mills at Roubaix, and, in addition, have large plants in Germany. When he discussed the present tariff situation, Mr. Le Poutre did not hesitate to say that if the tariff is reduced as at present contemplated by President Wilson and Democratic leaders at Washington, he and other European manufacturers will flood the United States market with goods made much cheaper than similar goods here, owing to the low labor costs in Europe.

I am not surprised that the Senator from Missouri does not care to have facts of this character read in the open Senate. The article continues:

Concerns like those controlled by the Le Poutre interests, and which have plants in America and also in Europe, will, he says, be obliged to shut down their mills in this country, largely increase the outputs of their European factories, and flood the markets here with goods made across the water and landed here cheaper than they can be made here. He says that the United States is being laughed at in Europe because of the present glan to demolish large sections of the tariff wall—

I may say in this connection, Mr. President, that we have become a laughingstock in other matters in a recent period-

I may say in this connection, Mr. President, that we have become a laughingstock in other matters in a recent period—and says there is great rejoicings in France, Belgium, Germany, and England among mill operatives as well as manufacturers.

Mr. Le Poutre said that men who manufacture both here and abroad are satisfied that the new duties will greatly hurt the worsted manufacturing in the United States, leaving the woolen and worsted mills in this country only a chance for the production of coarse cloths.

Mr. Le Poutre was asked by a reporter of The Evening Call:

"What will be the effect of the tariff of 20 per cent on woolen yarns and 35 per cent on woolen cloths?"

"The woolen industry has considerably expanded in this country," he replied, "especially during the past 15 years. We can say that, so far as spinning and also weaving of the wool are concerned, the workmanship is as good here as in any other country, and the labor is as capable, excepting perhaps in the finer numbers and fine cloths.

"The average general cost annually and the cost of labor in this country are double those in Europe. This question has been greatly debated and generally admitted.

"If they want to establish a tariff duty by taking as the basis the maintenance of present wages pald here, I contend that 20 per cent duty on yarns is insufficient, excepting for the coarser yarns, for which the labor is not so important. As an example, we can purchase the two-fifties French system, which is a standard number everywhere, at 71 cents in France and Germany. By adding 14 per cent for the 20 per cent duty and 4 cents for transportation and commissions, we find that it will cost 89 cents. The present price in the market here, reduced already because of the fear of the future, is 99 cents—a difference against America of at least 10 cents per pound.

"It can readily be seen that we will not be sufficiently protected with the proposed tariff, and that it is not a duty simply of 20 per cent that is necessary, but a scale of duties that would pr

"The American manufacturer has not this advantage. We are to make a terrible jump from one extremity to the other. Those who are, like myself, so situated that they manufacture both here and abroad are convinced that the new duties would kill the worsted industry here, leaving only a chance for the production of coarse cloths, with only a fraction of the help employed. That is my opinion, and I submit it with all sincerity."

Mr. LIPPITT. Mr. President, I do not intend to undertake an extended discussion of the subject of wool and the woolen tariff. It is a subject that has been discussed very largely in the past in all of its general phases, and I do not feel that it is necessary to discuss it in detail at this time. The brilliant and exhaustive exposition of the subject which has just been made by the Senator from Pennsylvania [Mr. Penrose] is an additional reason for not now attempting to cover the whole ground. I do, however, want to consider two particular branches of the subject, which have been considered in the remarks of the Senator from Pennsylvania and previously, I think, in the remarks that have been made here by the Senator from Utah [Mr. Smoot]. I desire to add my evidence, such as it may be, as a sort of cumulative testimony as to these particular branches of the subject. Another reason for considering them is because there is a disagreement between the dominant party in the two branches of Congress as to the treatment which they should have. I refer particularly to the duties that are proposed for tops and for flannels.

In paragraph 295 combed wool or tops is given a duty, as the bill came from the other House, of 15 per cent, and the duty has been changed, as the bill now appears in the Senate, to 5 per cent, a reduction of two-thirds of the duty. I want to consider the reasons for that and the effect of it, not particularly as it applies to the woolen manufacturer, for I think his interest in the matter, while considerable, is small as compared with the interest which the woolgrower has in it. Therefore the remarks that I am about to make are more particularly in-Therefore tended to show the effect that the proposed reduction will have upon the fortunes of the men growing wool, for, if I understand the situation aright, it is equivalent not merely to putting wool upon the free list, but to offering a bounty of in the neighborhood of 3 cents a pound for the importation of foreign wool as against the use of the domestic article.

I desire to consider, therefore, with reference to this point, the cost of making tops in this country, in the first place, as it is shown in the Tariff Board's report. That particular feature in the Tariff Board report is considered principally on pages 100. 640 to 644. It is also considered in somewhat less detail in other parts of the report. In all the places where it is considered the evidence which the Tariff Board give is so indefinite and so general in its character that while we can obtain much useful information from it, we can not, without some additions to what is set forth there, use it as a complete exposition of the subject.

They give, on page 643, a table which is the nearest to a complete statement of the subject that I can find in any part of the report. It applies to the making of fine tops by what is known as the French system, as distinguished from the English system.

I presume most of the Senators here understand what a top

is, although, in spite of all the discussion that has occurred in regard to it, only a few days ago one of the Members of this body asked me what a top really was. I will say, therefore, if there are any others in the same mental condition, that in turning a raw material into yarn there are four processes which are alike in their principle and purpose as applied to all the materials of which yarns are spun. Whether the article to be spun is cotton or flax or silk or wool it is necessary, in the first place, to clean it; in the second place, to lay the fibers parallel; in the third place, to reduce it from the bulk in which it appears in the market to the size that it is desired to appear in the yarn; and, in the fourth pace, simply to twist it. That is all there is in the process of making textile yarns for the manufacture of cloth.

In the case of wool the top represents the product of the econd of these processes. To make wool and turn it into a second of these processes. top it first has to be cleaned, or scoured, as it is called, sorted to remove the inferior parts of the growth of the animal, and then it is put through sometimes a card and sometimes a comb for the purpose of laying the fibers parallel to each other. Combing is the more perfect method of accomplishing this result, and is naturally more expensive than the less perfect form of doing it, which is represented by carding. The process is very much the same as the process by which one combs his hair. It is simply drawing some teeth through the wool, or drawing the wool by the teeth, to lay the fibers side by side.

The resultant article in the case of wool, for some unknown reason—for the origin of the name, so far as I can find out, is lost in obscurity—is called, technically, in the trade a top.

Coming back to the table upon page 643 of the Tariff Board report, to consider what it costs in this country to make a top by the processes which are considered in the table, we find that the costs in four different cases ran from 7.25 cents a pound to 7.32 cents a pound—not a great difference. But those figures do not represent the costs of all the processes necessary for turning wool into tops, and they do not represent all the conditions to-day.

A year ago, when this report first came out, I spent a very considerable amount of time in trying to satisfy myself as to what the board really reported the cost of a top to be. it was necessary to add to this table something for the cost of sorting, something for the interest upon the difference in the cost of a plant in this country and in Europe—because in another part of the report the board shows that that difference is about 60 per cent-something for the cost of storing and handling the raw wool and for the interest and storage charges of holding it and carrying it, something for the actual conditions under which a mill operates, and something for the increase in wages that has occurred since the report was made. The figure of 71 cents a pound is a theoretical figure based upon the costs that the Tariff Board obtained, but edited to show the cost of a mill running full time. The woolen business is of such a character that it very seldom happens that a mill does run full time, and actual costs can not be taken on that theoretical supposition. The board itself makes a very elaborate exposition of this subject on a previous page, where it shows that the difference in cost that may result between a mill that runs full time and one that runs only a part of that time is, in some cases, as great as the difference between 3.24 cents a pound and 10.85 cents a pound. Those are very extreme cases, however, the lowest cost being in the case of a mill that ran overtime-more than full time-and the highest cost being in the case of a mill that ran very much less than full time.

Making the proper additions to the cost which the board gave, 7½ cents a pound, I came to the conclusion that the Tariff Board report showed that for the kind of top that was there being considered it cost 10.91 cents a pound.

I then took occasion to ask a gentleman in Philadelphia, Mr. Walter Erbin, of the firm of Harding & Erbin, if he would make an examination of this subject, based upon the same Tariff Board table I had used, for the purpose of seeing how his results would compare with mine. In every industry like woolen manufacturing there are certain men who become recognized among their fellow craftsmen as experts in certain directions. The very remarkable mathematical mind of Mr. Erbin has made him recognized throughout the trade as an expert in the statistics of woolen manufacturing. He made a most exhaustive and elaborate calculation from the various statements that were made in the report upon the same subject. He considered the figures in three different ways, and as a result of that he reported to me that under one method of figuring the cost of making a top was 10.47 cents a pound, under another method it was 11.51 cents a pound, and under a third it was 12.3 cents a pound. He further gave me a very exhaustive statement of the cost of doing the same thing in his own mill, which showed that his cost was 11.33 cents a pound.

I also asked some other friends of mine in New England—and this was all done without knowledge on their part of the costs of the other people—if they would make me a report upon the same subject. The firm of Hill & Nichols, well known as dealers in and manufacturers of tops, said they considered it cost 13.12 cents, and the firm of Brown & Adams said it cost 12.97 cents.

The average of all these seven costs, taken in different ways and by different people, shows that the cost of that kind of a top is 11.80 cents a pound.

We now have to consider what we know in regard to the cost of tops abroad, as represented by the Tariff Board report. The figures there are very indefinite, as would be naturally expected, and more so than the figures in regard to the American cost. The best exposition of the foreign cost is in a table given on page 644, where they show that the cost per pound in a mill on the Continent varied from 3.75 cents a pound to 4.45 cents a pound. But they say that in considering these figures it must be remembered that the mill was not running at its full canacity.

In other words, they have presented the cost of an American mill theoretically based upon its point of maximum efficiency; but they have given us the cost of a foreign mill admittedly based upon a point which is one of inefficiency. So it is manifest that that mill, on the same basis that they have used for the American cost, must have been able under similar conditions to make a wool top for a cost even lower than the figures they present. The lowest figures are 3.75 cents a pound. They

do not include the other items, which, in order to arrive at a complete cost, I have been compelled to add to the table of American cost. So, after all, we are not left in a very well-informed condition of mind, so far as the mere figures go.

But the Tariff Board give additional testimony, in a way, because they repeatedly say in different forms that wool combing can be done abroad for substantially one-half what it can be done for in America. On page 642 they say that English combers state:

We can do for a penny a pound what costs the Americans twopence.

And the board go on to say:

Actual figures seem to indicate the truth of this.

Again, at the bottom of page 644, the board say:

Actual records show that tops can under certain circumstances be made abroad at about one-half the American cost.

They also say (p. 641):

It will be seen that the lowest charge in the United States (for commission combing) is about double the lowest charge in England.

The figures of 3.75 cents a pound which I have quoted for the continental cost as compared with 7.25 cents that the board presents as the figures for the corresponding part of the American cost show that that cost is about one-half the American cost.

It seems to me, therefore, that we can assume that the Tariff Board reports the foreign cost to be one-half the American cost, although the board, after saying in various ways that it is one-half, go on then to say as the summing up that they think it is eight-tenths of the American cost.

We therefore have this proposition as I have arrived at it from my consideration of the matter: That it costs in this country 11.8 cents a pound to produce tops; that it costs abroad one-half of that, which is 5.9 cents a pound, or substantially 6 cents; and that the amount of protection that would have to be given to American tops to put them on a parity with foreign tops would be equivalent to 6 cents a pound.

My idea of the proper way to make a duty of that kind is to make the duty 6 cents a pound. But the duty that has been proposed is an ad valorem duty of 5 per cent so far as the Senate is concerned and of 15 per cent so far as the House is concerned.

We therefore, to complete our examination of this subject, have to consider what a duty of 5 per cent and 15 per cent would amount to. There are complete tables published and frequently distributed among the woolen trade which show the selling price of tops abroad for a great many years back. Taking No. 60 quality, which the Senate will understand is the English name for a quality that is suitable for spinning a No. 60 yarn, we find that the lowest price for that in recent years was 33 cents a pound in March, 1901, and 59 cents a pound in October, 1907, although it also sold in the spring of this year at substantially the same price.

Five per cent duty upon the selling price of 33 cents a pound would be 1.65 cents. On the high price of 59 cents a pound it would give a duty of 2.95 cents; and on the average of these two prices it would give a duty of 2.3 cents a pound. In other words, we find that the duty on this average of the selling price abroad of No. 60 tops would be 2.3 cents a pound, and the difference in the cost between the two is 6 cents a pound.

Let me go on. On a 15 per cent duty figured on the same prices the duty on the low price would be 4.95 cents a pound; on the high price, 8.85 cents a pound, which would be full protection and a little more; and the average would be 6.9 cents a pound. In other words, taking that grade of top, we find that the duty at 5 cents a pound is less than half of the protection that would be required to put the two articles on a parity here and abroad, and that a duty of 15 cents a pound, as proposed by the House, would be protective and give a margin of nine-tenths of a cent a pound on the average of the extreme selling prices, but would be 1.05 cents less than protective on the low foreign price.

Considering further the way it would apply to No. 56 quality, which is a little lower quality, we find that the high price is 53 cents, in June, 1906, and the low price is 31 cents, in July, 1901, and that the average of these prices is 42 cents a pound. Five per cent duty on the low price would be 1.55 cents a pound, and on the high price 2.65 cents a pound, and on the average price 2.10 cents a pound, showing that on that quality where the duties required for an equalization of cost purposes would be 6 cents a pound it is in reality only one-third that.

At a 15 per cent duty it would be 7.95 cents at the high price of the top, 4.65 cents at the low price, and 6.3 cents at the average price. In other words, on a 56 quality with the Senate committee duty there would be 4 cents a pound inducement to importation, and at the House duty of 15 per cent the for-

eign and domestic cost would be on a parity with a margin of safety of three-tenths of a cent a pound on the average

foreign price.

Assuming that my exposition of the subject is correct and that the costs are substantially as I have stated them, the thing I want to call attention to is that this is not so much a subject of his the woolgrowers. the woolgrowers. Mr. Presidentsubject of interest to the manufacturer as it is of interest to

The VICE PRESIDENT. Does the Senator from Rhode Island yield to the Senator from Montana?

Mr. LIPPITT. With pleasure. Mr. WALSH. Before the Senator passes to the consideration of that portion of his argument, I should like to inquire of him why it is that these tops can be manufactured cheaper in England than they can be manufactured here.

Mr. LIPPITT. Mr. President, that has been so often explained that it scarcely seems necessary to say anything further in regard to it. Of course it is due to the difference in labor cost and the difference in the cost of the plant and to other similar reasons.

Mr. WALSH. Let us take the labor cost. I suppose that constitutes the chief difference. Will the Senator kindly tell us what is the labor cost to manufacture tops in this country?

I have given a very careful statement of the

methods by which I arrived at my conclusion.

Mr. WALSH. I followed that carefully. Mr. LIPPITT. And the basis for the And the basis for the conclusion is the figures in the Tariff Board report. I would prefer, if the Senator wants to have that question answered, that he would himself

go to the tables, where he can find it in great detail.

Mr. WALSH. I find given there 2.68 cents per pound as the labor cost of producing a pound of tops. If the total labor cost of producing a pound of tops in this country is 2.68 cents, as given by the Tariff Board, it would occur to me, assuming that labor is one-half as expensive in England as it is here, that the difference in the labor cost can not exceed a cent and a half a pound. Am I correct in the conclusion?

Mr. LIPPITT. If the Senator's premises are correct, his conclusion is correct; but his premises are not correct, because in the table which I have been considering the labor costs were in reality about 4.27 cents a pound at the time that table was Since then there has been an increase in the cost of made up. labor in New England, which adds forty-two one-hundredths of

a cent a pound to the labor cost of that article. I do not care to go into a discussion of these labor costs at this time. I do not want to detain the Senate any longer than is necessary. It is a subject that has been so exhaustively discussed from every phase of it that I do not care to undertake it in connection with this part of my address.

Mr. SIMMONS. Mr. President, I do not wish to enter into the discussion, but I had an expert examine the Tariff Board report and give me the cost of producing tops in Germany and England. He advised me that the common charge in Germany for making high-grade Australian tops is 4.86 cents per pound, and that the cost in a representative German mill on Australian 60s was 3.45 cents per pound, including interest. The commission charges on high-grade tops run from 55 to 65 per cent higher than in Germany. A fair statement of the cost of making tops in the United States is about 80 per cent greater than in Europe. In 1912 the import value of tops was 71.2 cents per

Mr. LIPPITT. It does not cost 71 cents a pound to make

tops.

Mr. SIMMONS. I am not talking about the cost; I am talking about the value. In 1912 the import value of tops was 71.2 cents per pound. According to the above-

Mr. LIPPITT. What tops were those? Will the Senator

kindly state the kind of tops and at what duty?

Mr. SIMMONS. In 1912, the import price.

Mr. LIPPITT. What kind of tops?

*Mr. SIMMONS. He does not state. I assume that he was referring to the same kind that he spoke of in connection with the cost of making tops.

Mr. LIPPITT. Of course that is a very important matter. The instant we come to a discussion of the cost of tops—

Mr. SIMMONS. Will the Senator allow me to finish the statement? According to the above, it costs 3.45 cents to make tops in Europe and 6.21 cents in the United States. The difference is 2.76 cents, or a little less than 4 per cent of the import price per pound.

Mr. LIPPITT. Mr. President, I would like to say, in regard

to the statement the Senator makes

Mr. SIMMONS. The bill allows 5 per cent,

Mr. LIPPITT. I would like to say, in regard to that statement, that the Senator starts off by saying that his expert does not include in his statement all the cost of making tops. It is so common to talk of the cost of making tops as representing merely the cost of taking sorted and scoured wool and putting it through a mill and figuring that the cost of getting it from one end to the other of the combing process, as regards labor and supplies, is the total cost of that top. As I have been explaining for half an hour, and longer than I had intended to take in the matter, that does not represent the cost of tops. We must have the complete and the entire cost. I have given the basis of my figures. I will only say that I gave them as careful examination as it was possible for me to do. Although I am not a woolen manufacturer, and never have been, I am so thoroughly accustomed to the methods of making figures of this kind that I think I was fairly well qualified to do it.

I had those figures checked by a number of independent and skillful manufacturers, whose result corresponded fairly with mine. I will admit to the Senator from North Carolina that

there are tops that can be made—
Mr. SIMMONS. If the Senator will pardon me-

Mr. LIPPITT. If the Senator will wait until I finish my sentence.

Mr. SIMMONS. Surely. Mr. LIPPITT. I was going to say to the Senator from North Carolina that there are classes and kinds of tops that can be made for a lower figure than those with which I have been dealing, but he proposes to enact one uniform duty for all classes of tops, whether their cost is low or high. Therefore, in considering its effect upon importations we can not confine our consideration to a class of tops that is of low cost, because the duty is the same upon tops that are of high cost. Importations are not made upon averages of cost. They are not made upon that proportion of the article which is most fully protected by the duty. They are always made upon that proportion of the article which is least protected by the duty.

I will go so far along the line of argument that the Senator from North Carolina is pursuing as to say that I will agree with him that there are some classes of tops that in all probability under a 5 per cent duty it would not be profitable to import so long as any part of our combing machinery in this country is in active operation. I must insist that there are a very large class of tops the domestic cost of which would be so much lower than the cost of importation under this 5 per cent duty that there would inevitably be larger importations.

Mr. WARREN. May I ask the Senator a question?

Mr. LIPPITT. I yield to the Senator from Wyoming. Mr. WARREN. In that case the manufacturer desiring material from abroad would naturally buy tops instead of wool, unless the price of the domestic wool was enough lower than the foreign wool laid down here to make up the difference.

Mr. LIPPITT. I was going on, if I had not been interrupted,

to make a statement in regard to that subject.

Mr. SMOOT. Mr. President—
Mr. LIPPITT. I yield to the Senator from Utah.

Mr. SMOOT. I merely wanted to refer to the figures quoted by the Senator from Montana as to the labor cost per pound of tops in the United States. He quoted from the Tariff Board report, at page 642. The cost was for sorting, scouring, carding, combing, and the miscellaneous outside labor. It is true that the report gives the cost at 0.0268 per pound, but the report calls particular attention to the kind of tops, because it is made from quarter bloods, and a quarter blood is a very low-grade sheep.

Mr. LIPPITT. Mr. President, the inference that I was

going on to draw from my analysis-

Mr. SIMMONS. Will the Senator pardon me just a moment? Mr. LIPPITT. I do not want to decline and, of course, I will not decline to yield to the Senator from North Carolina, but what I want to say is that I am well aware that a discussion of the details of the cost of tops and of the various forms of tops themselves might be undertaken here which would last two or three hours.

Mr. STONE. Then, Mr. President, I hope Senators on this

side will not indulge in it.

Mr. LIPPITT. I know the disinclination of the Senator from Missouri to take up time,

Mr. SIMMONS. I shall not take more than a minute of the Senator's time.

Mr. LIPPITT. May I complete my statement before I yield to the Senator?

Mr. SIMMONS. Certainly.
Mr. LIPPITT. What I am trying to do is to put on record for his consideration when this bill comes to conference what I personally think about this question of the cost of tops. I think that it will serve a much more useful purpose if we do not go into an elaborate discussion of the subject, but for the Senator to take my statements and give them some careful thought. Nevertheless, if the Senator would like to pursue the subject further I will yield to him.

Mr. SIMMONS. The Senator understands that I am not interrupting him in a controversial spirit at all. I simply desired to give some data that has been furnished to me. If it is not correct I would be very glad to have the Senator give us a

correct statement with reference to this data.

The Senator assumed a little while ago that I had not selected any particular count for comparison. Upon examining the memorandum I read from I find that it was based upon Australian No. 60. The German cost of that grade of top made of that wool was 3.45 cents, and the American cost, according to the board's report, 6.21 cents; and the price of the top-and I assume the expert was speaking about that top—was 71 cents a pound, making a difference of 2.76 cents against the American producer in the cost. Upon that basis the difference of 71 cents on the import price as stated would be only 4 per cent, while this bill provides 5 per cent. I wish to call the Senator's attention to the fact that in the report for the year 1912 of the unit value of tops the price is fixed at 81 cents a pound, which is about 10 cents more than the price stated in this memorandum. Therefore the difference against the American would not be so great as 4 per cent upon that basis of price.

Mr. LIPPITT. Mr. President, in reply to the remarks of the Senator from North Carolina, as I gather from his figures of the foreign cost they are taken from page 644, where there is a table giving the lowest cost of the foreign mill as 3.75 cents and the average of cost as 3.98 cents; and the report states in connection with those costs that that mill was not running The board has gone into a very elaborate analysis full time. of the difference in cost that occurs from a mill running full time or running short time. To rely upon figures to show foreign cost where the statement is distinctly made that it was not the lowest foreign cost is what I have spent three-quarters

of an hour in trying to show is not a safe practice.

Now, to go on with my exposition of this subject, in addition to the figures which I have given, showing that tops can be imported at a duty of 5 per cent, I may say that under the Wilson law of 1894 there was a duty of 20 per cent on tops, and there was a material importation under that duty. fact which I am trying to make prominent in connection with the fact that the importation of tops is possible is that that is a matter of much greater consequence to the grower of wool than it is to the manufacturer of wool, because if in some process between the point of buying wool and the spinning of yarn there is a point where the article can be imported at a preference over importing raw wool, you might just as well offer an equivalent bounty to the manufacturer to buy that foreign wool so far as the woolgrower is concerned.

I think that, so far as the manufacturer is concerned, if he has a mill that is equipped with the preparatory machinery up to the process of combing, or if his is a combing mill, which is a condition that also prevails in this country-some mills simply make combed tops for sale to those who are going to spin them into yarn; some mills have the preparatory machinery to make combed tops themselves and carry on all the processes from the purchase of the wool to the ultimate delivery of the cloth-in either case if they have this preparatory machinery it will, of course, be an injury to the manufacturer to have to stop it; but if the man is a manufacturer of cloth, a weaver of cloth, and he can buy foreign tops for 3 cents a pound less, as I think can be done in some cases under the provision of this 5 per cent ad valorem, he will be 3 cents a pound better off than if he purchased the raw wool itself. That is the phase of the subject which appeals to me as something that will be of great interest to the gentlemen representing the agricultural sections of this country. We have talked about free wool. 5 per cent duty on tops is not free wool, but is a bounty-paid wool so far as the grower is concerned.

In regard to the importation of tops, I simply want to offer one further suggestion in regard to its possibilities, and that is something which I found in the Daily Trade Record of August 13, 1912, referring to Australia. It says that the bonus granted the Federal Government on wool tops exported from Australia amounts to 12 pence per pound, and that they are mostly taken by Japan. One and one-half pence per pound bounty paid by Australia for the purpose of establishing the top-making industry there instead of merely exporting raw wool is equiva-lent to 3 cents a pound; and that is equivalent to the total duty that this bill proposes to place on a very large quantity of tops. Any tops that are 60 cents per pound in cost at a 5 per cent duty would have simply the same protection that 12 pence bounty

paid by the Australian Government would offset; and the producer of the wool again is put not merely in the disadvantageous position of being 3 cents a pound to the bad when there is 6 cents per pound difference in the cost of tops between here and abroad, but he will also be in the disadvantageous position of having the 3 cents a pound duty balanced by the payment of a bounty by Australia.

Mr. SIMMONS. That is a bounty. That is not an export

Mr. LIPPITT. It is not an export tax. It is a bounty that applies to all countries. If Australia treats all countries alike, there is nothing in this bill that would enable us to put a retaliatory duty upon it.

Mr. SIMMONS. That was what I wanted to understand. Mr. LIPPITT. I presumed that that was what the Senator

from North Carolina had in mind.

Mr. SIMMONS. I wanted to understand from the Senator whether Australia paid this bounty, as he calls it, for the production of the tops consumed in that country or whether it only

pays it on tops exported from that country.

Mr. LIPPITT. I will say to the Senator that, so far as I know, there are no tops in Australia. Australia is not a manufacturing country. She is a producer of raw wool; but evidently the Australians are very anxious to establish an indus-try of this kind there and, following the American practice, which has been of such benefit to this country, they do what is in effect putting a protective tariff on tops, and, it being an export article, that protection is in the form of a bounty.

Mr. SIMMONS. I understand that Australia is a great producer of raw wool, and that it is not a manufacturing country; but I understood the Senator to say that they did comb it and that they put a bounty on combed Australian wool. Did

I misunderstand the Senator?

Mr. LIPPITT. They put a bounty of a penny and a half a pound upon combed Australian wool as an inducement for them to export the wool in a combed condition instead of exporting it raw

Mr. SIMMONS. That is exactly what I thought. Now, does the Senator lose sight of the fact that under this bill, where there is an export duty or bounty provided by a foreign coun-

try we add the amount of that duty or bounty to the tax?

Mr. LIPPITT. I do not lose sight of the fact that if a foreign country imposes an export duty-if that is what the Senator wants to get at-which applies to this country alone, then the retaliatory provision of the pending bill would apply; but if a foreign country has an export tax or bounty applying to all countries alike, the retaliatory provision in this bill would not lie against that country. That is the distinction, as I under-

Mr. CUMMINS. Mr. President-

The VICE PRESIDENT. Does the Senator from Rhode Island yield to the Senator from Iowa?

Mr. LIPPITT. I yield to the Senator from Iowa. Mr. CUMMINS. The Senator from Rhode Island began a statement some time ago, and I think was diverted, so that he did not complete it, at least he did not furnish the comparison which I desired him to institute. He gave the high price of tops of a certain character and the low price of tops during a certain period. Would he give the Senate the high price of scoured wool and the low price of scoured wool for the corresponding dates concerning which he gave us the prices of the

Mr. LIPPITT. ,I regret to be obliged to say that I have not

those statistics here. They are very easily obtained.

Mr. CUMMINS. I assumed that the statistics were before the Senator, and I thought that it would be very interesting to know the difference between the market value of scoured wool of the kind from which the tops were made and the price of tops. That would furnish us, I think, some fair guide as to what it costs in that country to convert scoured wool into tops.

Mr. LIPPITT. Mr. President; I regret that I have not that information at hand. It is, however, information that is very frequently published, and can be found in almost any of the daily or weekly trade papers which particularly give informa-tion with regard to the wool industry.

Mr. CUMMINS. I know, Mr. President, that that is true; and would not have interrupted the Senator had I not assumed that he had before him the tables showing that comparison.

Mr. LIPPITT. Now, Mr. President, to take up the next topic to which I want to call the attention of the Senate, paragraph 298, which provided, as the bill came from the House, for a duty of-

Mr. WALSH. Mr. President-

The VICE PRESIDENT. Does the Senator from Rhode Island yield to the Senator from Montana?

Mr. WALSH. Before the Senator passes from the subject of tops, I should like to ask him a question if it would not be particularly objectionable to him.

Mr. LIPPITT. Certainly; I yield to the Senator. Mr. WALSH. I ask the question because we all recognize how very familiar the Senator is with the textile industry. only purchasers of tops, of course, are the spinners of yarn. That is the entire market, is it not?

Mr. LIPPITT. Yes, sir; so far as I know. Mr. WALSH. The purchasers of tops may be engaged exclusively in the spinning of yarn or they may spin yarn and subsequently weave it into cloth. Can the Senator tell us how many establishments in this country are engaged in the manufacture of tops with a view to the selling of tops to yarn

spinners or weavers, and how many customers they have?

Mr. LIPPITT. I will say to the Senator that I can not give him the exact information; but the manufacture of tops as a finished article of the factory has been a branch of the industry that has been continually and rapidly increasing of late years, not merely here, but in all parts of the world where the manufacture of worsted cloth is carried on. There seems to be a growing habit of differentiation—"specializing" perhaps would be the better name for it. I can not give the Senator the exact information in regard to the number of establishments, but there is a considerable market in this country for tops.

Mr. WALSH. I got the impression from some testimony given by Mr. William Whitman before one of the committees of the Senate only a short while ago, that his mills, the Arlington Mills, were the principal producer of tops for the market in this country, the other great producer being the American Woolen Co., and that they practically were the only companies manufacturing tops for the market. If that is the case, I should like to hear from the Senator why-

Mr. LIPPITT. I hope the Senator will not go ahead with the question, because it is founded upon the assumption that that is

the case. I will merely say for his information that that is absolutely not the case.

Mr. WALSH. Then let me put the question in a different way and ask the Senator why he should deny to the manufacturers of yarn, the spinners of yarn, in this country an opportunity to buy their tops abroad, rather than to buy them from

the manufacturers of tops in this country?

Mr. LIPPITT. I know of no better way to answer that question than by saying that I am in favor of the protective policy. If I were simply in favor of the protective policy as applied to cloth, I naturally would be in favor of so arranging the duties that the cloth manufacturer could have free trade up to the point where he made his cloth and be protected afterwards; but that is not my understanding of any proper application of tariff duties, and, with a very few exceptions, it is not the disposition of the cloth makers of this country themselves. The great bulk of the manufacturers of wool recognize the propriety of the same treatment of wool as is given to the manufactured article.

Now, Mr. President, if I may be allowed to go on with my

next topic-

Mr. SIMMONS. Mr. President, I am sure the Senator does not want any inaccurate statement of fact to go into the Record, and I think the Senator made a statement a few moments ago that is not accurate.

I was not quite sure about it at the moment; but I have looked the matter up. It is in reference to the bounty or export tax placed by Australia upon tops. While raw wool is free under this bill, tops are dutiable, and the Senator is mistaken, I think-

Mr. LIPPITT. What is the number of the paragraph which

the Senator has in mind?

Mr. SIMMONS. Paragraph E, page 254, from which it appears that if any country imposes an export tax or gives a bounty upon exportations from that country into this country, then, under that paragraph, that bounty is added to the tariff or tax imposed on its admission into this country. vision does not apply, as the Senator seems to think, merely to countries that charge an export tax as against this country alone, but it applies to the exportations of all countries to this country where a bounty is paid or an export tax is imposed.

Mr. LIPPITT. If the Senator is correct in his interpreta-

tion of that provision, of course it changes

Mr. SIMMONS. If there is any question about it, I will read it into the RECORD, if it will not take too much of the Senator's time. I do not think I can possibly be mistaken about the

meaning of it. The language is very plain, I think.

Mr. LIPPITT. I will confess to the Senator that it is so long since I have read that passage that I am not able at the moment to contradict the statement of the Senator from North Carolina. If he is correct, what I have said about the bounty

of Australia would not apply; if he is not correct, it would

apply.

Mr. SIMMONS. I am correct; and I will read it if the Senator desires. I merely call his attention to it now because I was sure he did not want an incorrect statement to go into the

Mr. LIPPITT. I can only say that in my statement I had the great authority of the Senator from Utah [Mr. SMOOT], and I

thought I was correct.

Mr. SMOOT. Mr. President, when the Senator from Rhode Island asked me if there was in the pending bill a provision that wherever a foreign country granted a bounty on the exportation of a manufactured article from that country the amount of that bounty or export tax would be added to the regular duty imposed on its admission to this country, I told him that my understanding was that wherever there was a discrimination against this country it would be added. For instance, if Australia gave a bounty to the manufacturers of Australian tops when those tops were shipped to the United States and did not give a bounty when they were shipped to any other country, that would be a discrimination against the United States.

But wherever Australia granted a bounty for the manufacture of tops in Australia for general exportation, whether to the United States or to any other country, my understanding is

that that would not be added.

Mr. SIMMONS. Does the Senator get that understanding after reading the act? Let me read the act. I think it is important that I should. Clearly the Senator is mistaken, if that is his construction.

Mr. SMOOT. I do not say that it is my construction after

reading it.

Mr. LIPPITT. To save time, unless there is objection, I suggest that the paragraph to which the Senator from North Carolina refers may be included in my remarks without reading.

Mr. SIMMONS. Then I ask that paragraph E, page 254, be

included in my interruption.

The VICE PRESIDENT. In the absence of objection, it will be so ordered.

The matter referred to is as follows:

The matter referred to is as follows:

E. That whenever any country, dependency, colony, province, or other political subdivision of government shall pay or bestow, directly or indirectly, any bounty or grant upon the exportation of any article or merchandise from such country, dependency, colony, province, or other political subdivision of government, and such article or merchandise is dutiable under the provisions of this act, then upon the importation of any such article or merchandise into the United States, whether the same shall be imported directly from the country of production or otherwise, and whether such article or merchandise is imported in the same condition as when exported from the country of production or has been changed in condition by remanufacture or otherwise, there shall be levied and paid, in all such cases, in addition to the duties otherwise imposed by this act, an additional duty equal to the net amount of such bounty or grant, however the same be paid or bestowed. The net amount of all such bounties or grants shall be from time to time ascertained, determined, and declared by the Secretary of the Treasury, who shall make all needful regulations for the identification of such additional duties. and merchane

Mr. LIPPITT. Mr. President, I was about to discuss the change that has been made by the Senate committee in paragraph 298 with regard to flannels. As that paragraph came from the House there was a duty upon flannels of 25 per cent ad valorem; but flannels composed wholly or in chief value of wool valued at above 50 cents a pound were made dutiable at 35 per cent ad valorem.

Mr. HUGHES. Mr. President, I was not in the Chamber when the Senator was speaking on the subject of tops. I simply wish to ask him if he has made any investigation or has any information with reference to the actual percentage of cost of

making tops?

Mr. LIPPITT. I will say to the Senator from New Jersey that I spent nearly an hour in trying to tell what I knew on that subject.

Mr. HUGHES. Will the Senator tell me, roughly, what he finds the percentage of cost to be?

Mr. LIPPITT. I should prefer not to go into all of that again.

Mr. HUGHES. Just the percentage.

Mr. LIPPITT. I will say that, arguing from the table on page 642, I think, of the Tariff Board report, I made the cost of the kind of tops referred to in that table 11.9 cents a I also stated that three or four other people whom I had give me information, either from the report itself or from their own factories, gave me figures that were in substantial accord with that, and that the average of seven different fig-

ures of that kind was 11.8 cents a pound.

To return to paragraph 298, the Senate committee has proposed a change in the duty upon flannels costing above 50 cents a pound by which it would be reduced from 35 per cent to 25 Thirty-five per cent duty is exactly the same as all woolen cloth, with some few exceptions, is given under this bill. As the bill came from the House high-cost flannels and woolen cloth of the same quality would have received exactly the same duty, 35 per cent ad valorem; but under this bill the duty on high-priced flannels has been reduced 10 per cent.

What I wish to say on that subject is that the cost of making a flannel of the same construction and quality is no less than the cost of making a piece of woolen cloth of that construction and quality that has not been napped. The major difference between the two kinds of cloth is that one has been napped in finishing and the other has been treated in a different manner. I can not see the justice or the propriety of leaving a duty of 35 per cent on the woolen cloth and putting only 25 per cent upon the flannel, which is made in the same way and at the same

I have here a few samples of some of the very beautiful flannels that are made in this country and that would be included in this duty. I do not know exactly what the committee had in mind in making the change; but it rather seems to me, without making any insinuations, that the committee could not have been thoroughly informed as to the wide range of very beautiful fabrics on which they were making this discrimination.

Further than that, the description which is given of these goods above 50 cents a pound that shall pay only 25 cents duty is that they are "flannels." It would seem quite within the range of possibility that woolen cloth which had not been napped, by being simply named flannel, might be brought in under that paragraph at 25 per cent, instead of 35 per cent.

I referred a few days ago to the great controversy that went

on in the cotton trade over the word "etamine." The courts decided in that case that unless a fabric was called an etamine it was not an etamine; it made no difference what its construction was. The word was used in the tariff of that day exactly the same as the word "flannels" is used in this paragraph now. I do not know, of course, whether the court would take the opposite side of that position and say that what is called a flannel is a flannel. But it is a construction of the paragraph that is very well open to consideration.

Therefore I simply wanted to bring to the attention of the Senators who are going to act as the conferees on the part of this body what seemed to me to be a discrimination against high-grade flannels, as compared with woolen goods, when the duty has been made 25 per cent on one and 35 per cent on the

The woolen business is peculiar in one respect. It has brought to this country a very large percentage of foreign capital, particularly in the State of Rhode Island-a condition which, so far as I know, has not prevailed to anything like the same extent, if at all, in the other sister textiles. I have especially in mind a factory which, shortly after the passage of the Dingley bill, an Englishman, believing the policy of that measure would be the permanent policy of the United States, brought to Rhode Island. On a meadow that had been used for nothing more important than the occasional pasture of cattle, and beside a stream whose waters from time immemorial had run unused to the ocean, he built a mill, and in conjunction with that factory he built a model New England mill

He had for many years been employed in manufacturing cloth in England to be sold in this country, and had prospered in doing so. He invested in this plant, to become a part of the wealth of this Nation, money which had been made from the export of English goods to America.

With it he bought all the great variety of things that go into the construction of such an establishment-American brick and wood, and iron, American engines, boilers, and electrical machines, shafting, and machinery. He employed in doing so American masons, bricklayers, carpenters, machinists, painters, and men in all the other departments of the building trades. To construct his houses and gardens, he again distributed among the workers in all the great varieties of employments that are necessary to construct a home, from the day laborer to the architect, part of the money that he had brought here.

Since his factory has started the mill and its employees have been constant customers for American products. The mill has been run on American coal, and the workers of it have been fed on the products of American farms. I will not attempt to enumerate all the varied products for which the establishment of this plant has, in some proportion or other, helped to increase the market. But I do not believe I would exaggerate if said that there was not a section or State, and scarcely a village perhaps, whose people have not to some extent shared in the benefit of this industry.

The raw material which it uses is mohair, and the amount which it uses furnishes no immaterial part of the demand for that product in America. Not long ago the manager told me that when they first came here the market for this article was so uncertain that the growers consigned it to commission houses to be sold for such a price as they might be able to get, but that to-day they were frequently able to make contracts for their production before it was clipped.

We have seen in the preparation of this bill the representatives of the great State of Texas urging the placing of a duty of 20 per cent on what has become to that State, far distant from Rhode Island, an important and profitable industry. Not long ago I saw a statement in the daily press that the farmers of Utah were rejoicing in the fact of the profit they had made this year from their clip of mohair. I will read what the New York Times of May 11, 1912, had to say about that matter. This is dated Salt Lake, Utah, May 11, 1912:

Some enterprising stockmen several years ago concluded that the Rocky Mountains furnished a good place for breeding goats, and sent for some fine specimens to Switzerland and other mountain regions abroad. It was found that the goats could live on parts of the ranges where sheep or cattle would not thrive.

I should like particularly to emphasize the benefit that came to that State by the utilization of its waste land:

This was particularly true of San Juan County, in the southeast corner of the State, which is largely given over to sand. There are now 20,000 goats in San Juan getting a good living and yielding profits. One herd in near-by Kane County numbers 13,000. It has been found that the goats are less subject to severe climatic changes than the sheep or even the cattle, and they have come through the recent winter with few losses, whereas many of the other animals have died.

The clip from the goats now here is expected to give a profit of about \$60,000 this year.

I wonder, Mr. President, how many of the farmers of the State of Texas, whose representatives have been not the least active in voting for the Democratic tariff policy, or even the farmers of the State of Utah, whose representatives have been consistent supporters of the policy that made their rejoicing possible, realize in how direct a way their market was the result of the triumph of Republican protection in 1897.

The managers of that factory are still running in England to-day for the European trade a factory making the same fabrics they make in this country under the same conditions, on the same machinery, but out of Asiatic mohair. They have recently submitted figures showing that under this proposed bill they can make these fabrics in their English factory and land them in New York with the duty paid at prices from 6 to 15 cents a yard less than they can make them for in their Rhode Island mills. And they say that if that law is enacted this circumstance will compel them largely, if not entirely, to supply the American market with their English-made goods, which means throwing people out of empolyment in Rhode Island and taking away the market from the farmers of Utah and of Texas.

Mr. President, I had a letter vesterday from an employee of this factory. I thought I had it here, but in some way it has become mislaid. It was written without any solicitation on my part. In that letter he stated that already three-quarters of the looms running in that establishment had been stopped, that 100 families had left their homes here and returned to England, and that more than 100 of the other people, including himself, were trying to obtain positions as motormen and various positions of that kind.

This is but one of several large manufacturing plants that have within a few years been built with foreign capital in the little State of Rhode Island and on account of the Republican tariff policy. I shall not undertake to read the names in detail, but they are factories whose owners have come from France and Belgium and England. All told, they employ some seven or eight thousand people. That means, perhaps, a population of 30,000 people. It has been strenuously urged in this Chamber that the tariff had nothing to do with the adversity that existed when the Democratic Party was in power in the nineties and the prosperity that has come about since the Republican policy was put upon the statute books in the form of the Dingley law in 1897.

I am not one of those who believe that the change in our tariff policy was the only cause of these different conditions, but I am one who believes it was a very considerable cause, and I submit that the coming here of such industries as these, whose benefits are felt from one end of this country to the other, is a forcible illustration of the different ways in which these two policies operate.

Mr. STONE. Mr. President, it is 6 o'clock. I should like to make an inquiry of some of the Senators on the other side. I hardly know just whom to address, but I will address myself to Senators who are on the Finance Committee. The Senator from Pennsylvania [Mr. Penrose] is the ranking member of the minority; the Senator from Utah [Mr. Smoot] is a very active and leading member of that committee; and the Senator from New Hampshire [Mr. Gallinger] is a member of the committee and the titular leader of the minority of the Senate. I should like to ask of these gentlemen, if they can tell me, about how much more time is likely to be occupied in this debate. Do any of these Senators know whether other Senators are contemplating delivering set speeches on this schedule?

Mr. PENROSE. I should like—

Mr. STONE. I wish to say I am merely trying to get

information.

Mr. PENROSE. In return, I should like to ask the Senator from Missouri whether it is the intention of the majority to reply to some of the unanswerable arguments that they have been listening to.

Mr. STONE. It has been suggested to me that it would be

very difficult to reply to an unanswerable argument. Mr. PENROSE. I have often seen the attempt made, even

if it were impossible.

Mr. STONE. So far as I am concerned, what I want to do is to make some progress with the bill and get to a vote. It seems to me that we have had it sufficiently debated. many speeches were made at this session on wool before this schedule was taken up. It has been the subject of exhaustive discussion. We have had several very able and prolonged speeches; the whole day has been taken-I am far from saying it has been wasted-in speech making by our friends on the other side. They were very able speeches, I will say, but really, with all due deference, I am compelled to say, without anything new in what they have been saying. We have heard these same speeches during this session of Congress. It is merely piling We have heard these same one speech of the same kind upon another speech of like kind. I am curious to know, if some Senator will do me the kindness of telling me, whether there are some more of them to be made to-morrow.

Mr. GALLINGER. Mr. President—
Mr. WARREN. If the Senator will allow me, I want to suggest that there will be some more speeches on the woolgrowers' side. We have had three very good speeches on the other side of the Chamber. They are not all in print yet, and they will have to be answered, of course. It will take some little time; but I want to say to the Senator from Missouri, if I may still be permitted, that compared with the times hereto-fore when Schedule K has been considered I think the Senator to which the debate will lead, it is my opinion that it will only be a very short matter, and that the Senator will have distinguished himself in putting Schedule K through in only a fraction of the time that has been occupied whenever it has been up for consideration before.

Mr. STONE. Will the Senators on the other side and the Senate agree that at 5 o'clock to-morrow we shall take a vote

on this schedule?

Mr. GALLINGER. Mr. President, as the Senator honored me by mentioning my name, and as I have been endeavoring to guide somewhat the discussion on this side of the Chamber, I will say to the Senator that unquestionably there are other speeches to be made on this schedule.

Mr. STONE. There are other speeches to be made?

Mr. GALLINGER. Yes. Whether they will be concluded to-morrow or not, I can not say, but possibly they may be concluded. On the general subject of the tariff, before we come to a vote on the final passage of the bill, there will be some speeches made, perhaps not many.

Mr. STONE. I am speaking of this schedule. Mr. GALLINGER. The Senator is speaking of this schedule. I feel, Mr. President, that we got along admirably yesterday; that we made great progress. These speeches had to be delivered, and the others that have been prepared will have to be delivered. I do not think the Senator to-night ought to ask that we should agree to a time to vote on this schedule. I feel sure that if the Senator will remain patient, as he always does, the progress will be satisfactory to the Senator himself.

I think it is safe to say, Mr. President, that on this side of the Chamber there is the same feeling which exists on the other side, that we ought to press this matter as rapidly as the importance of the subject demands. But we of course expect from the other side what was accorded to that side in the debate four years ago, an opportunity to express our views in a proper way. I know the Senator would not wish to curtail that privilege.

Mr. STONE. I do not wish to curtail it, and I could not if I wished. I think the information I desired to elicit I have obtained. I am not at all gratified with what I hear, but I hope

to get through with it. I did want to know just how long this interminable debate would last.

Mr. GALLINGER. I will venture to suggest, Mr. President, that if the Senator does not unduly press the matter he will be more gratified to-morrow evening than he is this evening, so far as progress is concerned.

Mr. STONE. That is all. I ask that the bill be laid aside for the day.

The VICE PRESIDENT. The bill will be laid aside.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consider-

ation of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After six minutes spent in executive session the doors were reopened, and (at 6 o'clock and 15 minutes p. m.) the Senate adjourned until to-morrow, Saturday, August 23, 1913, at 11 o'clock a. m.

#### CONFIRMATIONS.

Executive nominations confirmed by the Senate August 22, 1913.

PROMOTIONS IN THE ARMY.

CORPS OF ENGINEERS.

Lieut. Col. George A. Zinn to be colonel. Maj. William W. Harts to be lieutenant colonel. Capt. Francis A. Pope to be major. First Lieut. James J. Loving to be captain. Second Lieut. Paul S. Reinecke to be first lieutenant.

#### INFANTRY ARM.

First Lieut. George A. Herbst to be captain. First Lieut. Philip J. Lauber to be captain. First Lieut. Thomas M. Hunter to be captain. First Lieut. Gad Morgan to be captain. Second Lieut. Barton K. Yount to be first lieutenant. Second Lieut. Denham B. Crafton to be first lieutenant. Second Lieut. William E. Selbie to be first lieutenant. Second Lieut. John L. Jenkins to be first lieutenant. Second Lieut. Charles H. White to be first lieutenant.

APPOINTMENTS IN THE ARMY.

GENERAL OFFICERS.

Col. John P. Wisser to be brigadier general. Col. Thomas F. Davis to be brigadier general.

COAST ARTILLERY CORPS.

Charles Linnell Austin to be second lieutenant.

MEDICAL RESERVE CORPS. To be first lieutenants.

Frederic Victor Beitler. John Jordan Boaz. Paul Eugene Bowers. Carl Raimund Hiller. Peter McCall Keating. Harvey Adams Moore. Firmadge King Nichols. Blanchard Beecher Pettijohn. Palmer Augustus Potter. Llewellyn Powell. James Albert Robertson. Edward Percy Simpson. Frederick Albert Tucker. Edward Mason Parker.

POSTMASTERS. MICHIGAN.

E. T. Belding, Mancelona. Isaac C. Wheeler, Manton.

NORTH DAKOTA.

John M. Baer, Beach. W. O. Lowden, McHenry. Pearl Miller, La Moure.

OHIO.

W. T. Alberson, New Philadelphia. Benjamin G. Trew, Shawnee. George J. Windle, Sebring.

OKLAHOMA.

Marion B. Carley, Geary. C. J. Woodson, Okarche.

PENNSYLVANIA.

Robert E. Urell, Mansfield.

TENNESSEE.

John T. Clary, Bellbuckle.

# HOUSE OF REPRESENTATIVES.

FRIDAY, August 22, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the follow-

ing prayer:

God our Father, strengthen, we beseech Thee, our minds, our hearts, our hands to do Thy will as it is revealed unto us day by day; that no cloud may obscure the light of Thy countenance from our spiritual vision; that we may pass from victory unto victory, until Thou shalt call us from the endearing scenes of earth to the enchanting visions of the blest, and we will hallow Thy name forever. Amen.

### THE JOURNAL.

The Journal of the proceedings of Tuesday, August 19, 1913, was read.

Mr. STEPHENS of Texas. Mr. Speaker, I desire to amend the Journal in this respect. I was appointed, together with the gentleman from South Dakota [Mr. BURKE], on a special committee to investigate the question of tuberculosis among the Indians, and also on the question of irrigation of arid lands in the Yakima Indian Reservation in the State of Washington, those two objects, and I see that only one is covered in the Journal. I desire for the Journal to include both.

The SPEAKER. The Speaker supposes that he is responsible for that mistake in just announcing the one, believing the other

would go with it.

Mr. STEPHENS of Texas. It may be necessary that both

should appear.

The SPEAKER. Without objection, the Journal will be changed in that respect.

Mr. MANN. The RECORD is correct, and perhaps the Journal,

but it was not read.

The SPEAKER. If the Journal does not contain the other half of the title it will be fixed. Without objection, the Journal as corrected will stand approved.

There was no objection.

ADJOURNMENT UNTIL TUESDAY NEXT.

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet on

The SPEAKER. The gentleman from Alabama asks unanimous consent that when the House adjourns to-day it adjourn to meet on Tuesday next. Is there objection? [After a pause.] The Chair hears none.

### GOVERNOR OF THE PHILIPPINE ISLANDS.

Mr. TOWNSEND. Mr. Speaker—
The SPEAKER. For what purpose does the gentleman from

New Jersey rise?

Mr. TOWNSEND. I rise for the purpose of asking unanimous consent to make a brief statement of personal interest to each Member of the House.

The SPEAKER. The gentleman from New Jersey asks leave to make a personal statement of a few minutes. Is there

bjection? [After a pause.] The Chair hears none. Mr. TOWNSEND. Mr. Speaker, yesterday afternoon there was deposited in the general post office copies of the invitation which I am about to read. The committee signing this invitation thought it would be wise to have this announcement made, as it seems impossible to determine when the post office will deliver the invitations. It reads as follows:

In honor of Mr. Harrison of New York, governor of the Philippine Islands, an informal reception will be given by the House of Representatives, Saturday evening, August 23. You are cordially invited.

At the home and lawn of Mr. Kent, 1925 F Street NW., August 23, 1913, 8 o'clock.

Mr. SPEAKER CLARK, Mr. UNDERWOOD, Mr. MURDOCK, Mr. TOWNSEND, Mr. MANN, Mr. PALMER, Mr. KENT,

Committee.

This will enable gentlemen having other engagements to cancel

them. [Applause.]

Mr. MANN. Mr. Speaker, in this connection and in behalf of this side of the House I desire to congratulate the President and the country upon the appointment of Francis Burton Harrison to the high position of governor of the Philippine Islands. I believe that no better selection could have been made out of the entire population of the United States, and that the action of the President is a guaranty to the country that the Philippine question will receive careful and honest consideration. [Loud applause.]

TEMPERING HOT WINDS IN TEXAS, ETC.

Mr. MURRAY of Oklahoma. Mr. Speaker, I request unanimous consent after the regular order of the next day's session to address the House upon the subject of tempering the hot winds in western Texas, Oklahoma, and Kansas and making it possible to produce crops in those sections, and that without the expense of irrigation.

The SPEAKER. How much time does the gentleman ask? Mr. MURRAY of Oklahoma. Thirty minutes.

Mr. MURRAY of Oklahoma. Thirty minutes.

Mr. UNDERWOOD. Mr. Speaker, I understand the gentleman's request is not to interfere with the regular business?

Mr. MURRAY of Oklahoma. Yes.

The SPEAKER. The gentleman from Oklahoma [Mr. Mur-

RAY] asks unanimous consent that at the next session of the House, after the routine business, reading of the Journal, and House, after the routine business, reading of the Journal, and so forth, that he have 30 minutes in which to address the House on the subject of tempering the hot winds—

Mr. BUTLER. To the shorn lamb.

Mr. BATHRICK. To the House of Representatives.

The SPEAKER (continuing). Of Texas, Oklahoma, and Kansas, not to interfere with public business. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object-Mr. QUIN. Mr. Speaker, reserving the right to object-

Mr. RAKER. Mr. Speaker, reserving the right to object, I understand that this request will not interfere with the special

The SPEAKER. No; that is a part of the request.

Mr. QUIN. Mr. Speaker—
The SPEAKER. The gentleman from Mississippi [Mr. Quin]

is recognized.

Mr. QUIN. Reserving the right to object, I want to ask the gentleman from Oklahoma [Mr. MURRAY] if he can not include the boll weevil in that request? [Laughter.]

The SPEAKER. Is there objection?
Mr. THOMAS. Mr. Speaker, I expect I am too late now, but want to suggest that if you might put the gentleman from Oklahoma [Mr. Murray] in cold storage in Washington City that that would temper the hot winds in Oklahoma. [Loud laughter.

Mr. MANN. Mr. Speaker, reserving the right to object, the House a few days ago, by unanimous consent, gave to the gentleman from Oklahoma [Mr. Morgan] permission to address the House at the session one week ago. That session was adjourned out of respect to the memory of the late Senator from Alabama, Mr. Johnston. Last Tuesday I renewed that request. Objection was made by the gentleman from Florida [Mr. CLARK]. My colleague from Illinois [Mr. McKenzie] the other day asked unanimous consent that he might have leave to insert an article in the RECORD. Objection was made from that side of the House. My colleague [Mr. BRITTEN] asked unanimous consent last Tuesday that he might extend his remarks in the RECORD. Objection was made from that side of the House. The gentleman from Minnesota [Mr. Smrth] last Tuesday asked unanimous consent that he might extend his remarks in the Record. Objection was made from that side of the House. Now, if these courtesies are to be granted, they are to be granted without favor as from two sides of the House. While the Democratic side of the House is not responsible for the objection of some individual Member of it, it is out of the question to suppose that the minority will permit by unanimous consent Members of the majority to speak and to insert articles in the RECORD while that permission is denied to Members of the minority. I shall not object to this particular request at this time, but unless the same courtesy can be extended to Members of the minority, it can not be expected that the gentlemen will succeed in requests of this kind in the future.

The SPEAKER. Is there objection?
Mr. MURDOCK. Now, Mr. Speaker, I want to ask the gentleman from Oklahoma [Mr. Murray] how much time he is

going to take? The SPEAKER. Thirty minutes. That is, he is allowed 30

Mr. MURDOCK. My understanding is that a contestedelection case, the MacDonald case from Michigan-

The SPEAKER. A contested-election case is a matter of the highest privilege.

Mr. MURDOCK. And will have the right of way? The SPEAKER. Of course, it will have.

The SPEAKER. Of course, it will have.

Mr. BARNHART. Mr. Speaker—
The SPEAKER. For what purpose does the gentleman rise?
Mr. BARNHART. I want to say something, and I do not know whether I want to reserve the right to object or not. If that privilege is passed—
The SPEAKER. It is not passed. The Chair has not asked whether there was objection or not.

Mr. BARNHART. Mr. Speaker, reserving the right to object, I want to say a word about this matter of the insertion of newspaper articles, pamphlets, and so forth, in the Congres-SIONAL RECORD. I am at the present time trying to secure an estimate of the cost to the Government of publishing all sorts of communications, relevant and irrelevant, that are offered from time to time under unanimous consent, inserted in the CONGRESSIONAL RECORD, and broadcasted to the country under the franking privilege at very great expense to the Government. Conspicuous among these during the past year was an article of faith by a Democrat, or alleged Democrat, from my own State that occupied pages and pages of the Congressional

Mr. BORLAND. What sort of an article was that? Mr. BARNHART. It was a sort of an article of political faith. It ought to have been omitted from the RECORD, and in a conversation with divers and sundry Democrats and some Republicans we have reached a sort of an agreement that hereafter we are going to know what these articles mean which are inserted by unanimous consent, and unless they apply directly to the proceedings in hand objection will be made.

Mr. MURDOCK. Now, Mr. Speaker, what does the gentleman mean when he says "Unless they apply directly to the proceedings of Congress"? Suppose a banker in Chicago writes a pamphlet upon the currency question and a request is made that that be printed in the RECORD, would that come under the

prohibition?

Mr. BARNHART. I should think it ought. Mr. MANN. That would have to be disposed of by a Demo-atic caucus. [Laughter on the Republican side.] cratic caucus.

The SPEAKER. The regular order is, Is there objection?
Mr. MURDOCK. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman from Indiana [Mr. Barn-Hart] just what this cabal or combination is?

The SPEAKER. The regular order is putting the question. Is there objection? [After a pause.] The Chair hears none,

and it is so ordered.

#### MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 2419. An act permitting minors of the age of 18 years or over to make homestead entry or other entry of the public lands

of the United States; and

S. 1673. An act authorizing the Secretary of the Interior to grant further extensions of time within which to comply with the law and make proof on desert-land entries in the counties of Grant and Franklin, State of Washington.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the bill 1353) to authorize the board of county commissioners of Okanogan County, Wash., to construct and maintain a bridge across the Okanogan River at or near the town of Malott.

The message also announced that, in accordance with the provisions of the act entitled "An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1914," approved June 30, 1913, the Vice President had appointed as members of the Joint Commission to Investigate Indian Affairs the following Members of the Senate: Mr. Robinson, Mr. Lane, and Mr. Townsend.

The message also announced that in accordance with the provisions of the act entitled "An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with the various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1914," approved June 30, 1913, the Vice President had appointed Mr. Robinson and Mr. Townsend as members on the part of the Senate of the commission to investigate the question of tuberculosis among the Indians in connection with an inquiry into the necessity and feasibility of establishing, equipping, and maintaining a tuberculosis sanitarium in New Mexico, and to inquire into the necessity and feasibility of procuring impounded waters for the Yakima Indian Reservation.

## ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 1353. An act to authorize the board of county commissioners of Okanogan County, Wash., to construct, maintain, and operate a bridge across the Okanogan River at or near the town of Malott.

#### SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:

S. 1673. An act authorizing the Secretary of the Interior to grant further extensions of time within which to comply with the law and make proof on desert-land entries in the counties of Grant and Franklin, State of Washington; to the Committee on the Public Lands.

S. 2419. An act permitting minors of the age of 18 years or over to make homestead entry or other entry of the public lands of the United States; to the Committee on the Public Lands.

#### LEAVE OF ABSENCE.

Mr. Davis of Minnesota, by unanimous consent, was granted leave of absence for one week, on account of important business.

The SPEAKER. The Chair lays before the House a request from Mr. EDWARDS for leave of absence, which the Clerk will report.

The Clerk read as follows:

House of Representatives of the United States, Washington, D. C., August 19, 1913.

Hon. Champ Clark, Speaker House of Representatives, Washington, D. C.

Speaker House of Representatives, Washington, D. C.

Dear Mr. Speaker: In response to telegrams advising me of the critical illness of my brother, Hon. Robert H. Edwards, I am leaving for Savannah, Ga., this afternoon.

I realize the importance of all Democrats being closely in attendance upon their duties in Washington at this time, and of course I hate very much to be absent. I feel, however, that I should go to the bedside of my brother.

I will appreciate it very much if you will see that a leave of absence is granted to me indefinitely on account of this illness, and will also appreciate it if you will have this letter incorporated in the Record, in order that the Record will show the cause of my absence.

Thanking you, I am,

Yours, respectfully,

The SPEAKER Is there objection? [After a payer] The

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

#### CONTESTED-ELECTION CASE.

Mr. POST, from the Committee on Elections No. 1, submitted a privileged report (H. Res. 231, H. Rept. 60) of that committee in the contested-election case of William J. MacDonald against H. Olin Young, which was referred to the House Calendar and ordered to be printed.

Mr. POST. I give notice, Mr. Speaker, that I shall call up

the case on Tuesday of next week.

The SPEAKER. The gentleman from Ohio [Mr. Post] gives notice that he will call it up next Tuesday.

CLERK AND JANITOR FOR THE COMMITTEE ON BOADS.

Mr. LLOYD rose.

The SPEAKER. For what purpose does the gentleman rise? Mr. LLOYD. For the purpose of offering a privileged resolution from the Committee on Accounts.

The SPEAKER. The gentleman from Missouri [Mr. Lloyd] submits a privileged resolution from the Committee on Accounts. The Clerk will report it.

The Clerk read as follows:

House resolution 119 (H. Rept. 55).

Resolved. That the chairman of the Committee on Roads be, and he is hereby, authorized to appoint a clerk for said committee at an annual salary of \$2,000, and a janitor to said committee at the rate of \$60 per month, to be paid out of the contingent fund of the House until otherwise provided by law.

Mr. LLOYD. Mr. Speaker, this resolution provides for the usual clerk and janitor that are given to the large committees The Committee on Roads was created at the of the House. beginning of this session of Congress, and it is necessary for it to have these officers.

Mr. BARTLETT. Mr. Speaker, may I ask the gentleman a

question on this subject?

Mr. LLOYD. Certainly.

Mr. BARTLETT. I have no objection to the resolution, but there are a number of committees that are entitled to session clerks, ordinarily committees to investigate the various departments of the Government. May I inquire if those committees have yet been provided with session clerks at this session of Congress?

Mr. LLOYD. They have not.

Mr. BARTLETT. I understand that there are certain committees that have matters that ought to be investigated by them. and that the reason there have been no investigations of those matters by the committees to investigate expenditures in the various departments is because they have no clerks. Is that true?

Mr. LLOYD. I think that is true.

Mr. BARTLETT. Does not the gentleman think it important also if those committees are to investigate the departments which they were appointed to investigate and which they are expected to investigate that they be given the machinery by which they can do so?

There is a resolution now pending before the Mr. LLOYD. Committee on Accounts-

Mr. BARTLETT. And it has been pending all this session, as I understand-

Mr. LLOYD. Providing for annual clerks for these several committees. There will be some action taken on that resolution within the next few days.

Mr. BARTLETT. I am not a member of any of these expenditure committees, but I suggested to the chairman of one of them the importance of making an investigation of certain matters, and the chairman said he could not do it, because he had no clerical help.

Mr. MANN. Mr. Speaker, will the gentleman from Missouri yield?

The SPEAKER. Does the gentleman from Missouri yield to the gentleman from Illinois?

Mr. LLOYD. Yes.

Mr. MANN. As I understand, this resolution proposes to provide the ordinary employees for a committee of the class to which the Roads Committee belongs?

Mr. LLOYD. Yes.

Mr. MANN. From what time does the employment date? Mr. LLOYD. It will be from the date of the appointment of

the clerk. It will be after this date, of course.

Mr. MANN. The employees have not yet been appointed?

Mr. LLOYD. No, sir.

Will the gentleman yield? Mr. MURDOCK.

Mr. LLOYD. Yes. Mr. MURDOCK. Do I understand the gentleman to say that it is contemplated to give clerks to all the expenditure com-

Mr. LLOYD. No; a request of that kind has been made in resolution that is now pending before the Committee on Accounts. No action has been taken as to whether they shall

be annual clerks or session clerks.

Mr. MURDOCK. They have neither at present? Mr. MURDOCK.

Mr. LLOYD. Neither.

The SPEAKER. The question is on agreeing to the resolution. The resolution was agreed to.

CLERK TO COMMITTEE ON ELECTION OF PRESIDENT, VICE PRESIDENT, AND REPRESENTATIVES IN CONGRESS.

Mr. LLOYD. Mr. Speaker, I have another privileged resolution.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

House resolution 188 (H. Rept. 57).

Resolved, That the Committee on Election of President, Vice President, and Representatives in Congress be, and is hereby, allowed an annual clerk at a salary at the rate of \$2,000 per annum, from June 3, 1913, to be paid out of the contingent fund of the House until otherwise provided by law.

Mr. BOOHER. Mr. Speaker, I should like to ask the chairman of the committee a question. Is not this committee already provided with a session clerk?

Mr. LLOYD. No; it is provided with no clerk at the present time.

Mr. BOOHER. It has always had a session clerk.
Mr. LLOYD. It has always had a session clerk, and the gentleman will remember that during the last Congress the question was raised as to whether this committee should have an annual clerk or a session clerk. The Committee on Accounts at that time recommended a session clerk. In the last Congress the Committee on Election of President, Vice President, and Representatives in Congress was one of the active committees of the House. It was active during the whole of the Congress. It had legislation of the most important character which went upon the statute books, and we are assured that there are at the present time a number of very important matters pending before that committee; that it has a vast amount of correspondence, and the chairman of that committee insists that he ought to have an annual clerk. The Committee on Accounts, which two years ago recommended only a session clerk, are now led to believe that this committee is of sufficient importance to entitle it to an annual clerk.

Mr. BOOHER. Mr. Speaker, I think the argument of the gentleman from Missouri [Mr. Lloyp] is a complete answer to his request to have this clerk appointed. He says now that at the last session of Congress a great deal of business was before this committee. He does not complain that it was not properly attended to. It was properly attended to. Every bill that was before the committee was reported out and passed by this House. Now, if a session clerk was sufficient in the last Congress, it seems to me that this clerkship ought not to be raised to a

\$2,000 position for the reason given by my colleague, and I hope the resolution will be defeated.

Mr. LLOYD. Mr. Speaker, during the last Congress it is true, as I stated, that there was a session clerk, who was paid \$6 per day during the session. This does not add very much to the expenses, as far as the House of Representatives is concerned. We do not hesitate now to say that if other committees, numbers of them, are to receive salaries of \$2,000 a year for their clerks, having annual clerks, that this committee is one, beyond any question, that is entitled to the same recognition

Mr. BURKE of South Dakota. Will the gentleman yield?

Mr. LLOYD. Certainly.

Mr. BURKE of South Daketa. I would like to ask the gentleman from Missouri if he does not think that any committee of this House that needs a clerk during the session ought not to have an annual clerk?

Mr. LLOYD. I think that is a very important question and worthy of consideration by the membership of this House. I am inclined to the view that any committee that is entitled to be appointed, that does any considerable service for the House of Representatives, is entitled to an annual clerk. That is my candid judgment about it. We have committees that ought not to be appointed at all that are not entitled to any clerk whatever.

Mr. BURKE of South Dakota. I want to say to the gentle-man that I am a member of one of the expenditure committees in this House. It has a clerk who, I think, is as faithful and as efficient, who works as many hours in the day and as many days in the year, as the clerk of any committee, and it has occurred to me that a clerk employed as a clerk of that committee is employed ought to be on the annual roll. It also occurs to me that if a committee needs a clerk at all he ought to be a clerk who can be employed annually, so that you will not be taking on some man who is inexperienced at every session of Congress. A clerk who has been connected with the committee for some time becomes very efficient and very useful to the committee, and therefore I believe in the interest of economy and good administration, if a committee of this House needs a clerk during the session, that clerk ought to be put on the annual roll.

Mr. BATHRICK. Will the gentleman yield?

Mr. LLOYD. Certainly.

Mr. BATHRICK. Does this Committee on Elections No. 1-Mr. LLOYD. This is not the Committee on Elections No. 1: it is the Committee on Election of President and Vice President,

Mr. BATHRICK. Does the committee have any jurisdiction over matters except those that may arise in connection with the election of President and Vice President?

Mr. LLOYD. Yes; it has jurisdiction of woman suffrage, and these matters go to that committee. It has jurisdiction of all constitutional questions affecting the election of President and Vice President; on all questions of primaries as to how Presidents shall be elected; and the question of campaign contributions also goes to that committee.

Mr. BATHRICK. Is not the most of the work of that committee finished in the year in which the President and Vice

President are elected?

Mr. LLOYD. No; it is a continuous work. I am assured at the present time, although I have made no careful investigation, that there are a number of important bills now pending before the committee that vitally affect the interests of the country.

Mr. BATHRICK. Now, if the gentleman will permit an observation, which I have tried on several occasions to find an opportunity to say, I do not object to any committee having sufficient help to properly conduct its business, but I wish to say that I am carrying, and have carried for over a year since have been in the House, an expense of \$500 from my own funds to take care of the business of my office; and if we continue to extend these courtesies or necessities to chairmen every time they come in and want a new hand or a new appointment to make for their committee, we ought to take into consideration the wants of the Members of the House who are not chairmen of committees.

Mr. HUMPHREYS of Mississippi. Will the gentleman yield?

Mr. LLOYD. Certainly. Mr. HUMPHREYS of Mississippi. How many committees are there without annual clerks?

Mr. LLOYD. About 20.

Mr. HUMPHREYS of Mississippi. This resolution provides for a clerk to one of these committees. It is not the intention of this committee to report any legislation at this session of Congress?

Mr. LLOYD. It is the intention of the committee to report legislation.

Mr. HUMPHREYS of Mississippi. At this session?

Mr. LLOYD. Yes. Perhaps I did not understand the gentleman. Does the gentleman mean to ask if the Committee on Accounts expects to report the resolutions referred to the Com-

Mr. HUMPHREYS of Mississippi. No; I asked if the Committee on Election of President and Vice President was to report any matters for legislation to Congress

Mr. LLOYD. It is not authorized at this time, but that does

not prevent the committee from doing work.

Mr. HUMPHREYS of Mississippi. There are about 20 committees of this House that are provided with session clerks, and of them you propose to select one and give that one an annual clerk. I submit this to the gentleman, that one of two propositions must be true, that if the committee has any work to do it ought to be provided with an annual clerk, and if there is no occasion for the existence of the committee it ought not to exist and ought not to have any clerk at all. Now, it occurs to me it would be the part of wisdom for the Committee on Accounts not to press this to-day but to take up this matter on a broader scale and to examine and to see which of these committees ought to have annual clerks and report a general resolution providing an annual clerk for every one of them, and in that investigation ascertain which committees ought not to exist and abolish those committees. Therefore I hope the genexist and abolish those committees. tleman will take that course and not select one committee out of 20 to be provided for to-day, as in my opinion the facts will develop there is no more reason why that committee should have an annual clerk than would apply to several of these other committees.

I do not mean by that to suggest that this committee is not entitled to a clerk. I think it is. I think the others are, too. Probably every one of these committees that exist ought to have an annual clerk. It is impossible here, certainly it is impossible or very difficult, to bring a man to Washington for \$125 a month in a long session to work for six months, and when Congress adjourns the 1st of July he must give up his job, and in a short session he stays three months and gives up his job. The result is you are not able to bring from your district a man who is competent to discharge the duties of committee clerk, and you

have to pick him up here in Washington.

Mr. BATHRICK. Will the gentleman yield to me in the time of the gentleman from Missouri?

Mr. HUMPHREYS of Mississippi. I am imposing on the gentleman from Missouri [Mr. LLOYD].

Mr. LLOYD. That is all right.

Mr. BATHRICK. Is not the gentleman aware that many Members of this House have equal difficulty in securing a person from their district who can take care of the work of that office for the salary of \$125 a month, and is not the gentleman aware that many Members of this House are paying from their own funds money in order to get their work done properly?

Mr. HUMPHREYS of Mississippi. Absolutely; and for that reason these clerks ought to be made annual clerks, and ought to be given a salary that is sufficient in amount to secure a man to do the work; but that reason applies not to any single com-

mittee, but to many of the committees.

Mr. BATHRICK. Does not the gentleman think it applies equally to clerks of Members of the House who are not chairmen of committees?

Mr. HUMPHREYS of Mississippi. No; I do not.

Mr. LLOYD. Mr. Speaker, the argument-

Mr. BATHRICK. I disagree with the gentleman. Mr. LLOYD. Mr. Speaker, the argument presented by the gentleman from Mississippi is a splendid argument in favor of the resolutions now pending before the Accounts Committee, but that committee has carefully investigated this matter and believes this committee is entitled to its clerk.

Mr. MANN. Mr. Speaker, will the gentleman yield? Mr. LLOYD. I do.

MANN. Mr. Speaker, the Committee on Election of President, Vice President, and Representatives in Congress has become one of the important committees of the House. morning the Committee on Elections reported the MacDonald case, and, as I understand, they decided that the failure to comply with the publicity law by filing a statement of receipts and expenditures required by that law is not any reason for refusing to seek or retain a seat in the House. Under that decision, which I take it will be accepted and become a rule of the House hereafter, it is quite certain the publicity law will need to be revised, as the present provisions of the law practically amount to nothing so far as any offense is concerned of a failure to comply with it. Nobody has ever and probably nobody ever will be prosecuted under the existing law even if a prosecution lies, which I doubt. That will require a revision of the law, which I understand the chairman of that distinguished committee, the gentleman from Missouri [Mr. RUCKER], has undertaken to prepare, and therefore I think that the committee is entitled to an annual clerk, that being an

important legislative committee.

I do not agree with some of the gentlemen that all of the committees ought to have annual clerks. Those committees which have to deal with permanent legislation, where the propositions drag out from year to year, and which require constant and long-continued consideration by a committee, ought to have an annual clerk. Those committees which are simply making investigations probably do not require an annual clerk. Some of the committees which only act upon sporadic cases of legislation probably do not require an annual clerk. I think that this committee is entitled to the annual clerk proposed.

Mr. BROCKSON rose.

Mr. LLOYD. Mr. Speaker, I yield to the gentleman from Delaware [Mr. Brockson].

The SPEAKER. The gentleman from Delaware [Mr. Brock-

son] is recognized for five minutes.

Mr. BROCKSON. I desire to inquire of the chairman of the committee why he provides a separate janitor for this committee? Is it the practice to have a separate janitor for all the committees?

Mr. LLOYD. All the big committees have a separate janitor. Mr. BROCKSON. Notwithstanding the fact that a number of janitors are employed about the building?

Mr. LLOYD. Yes, sir. There is an amendment there which I would like to have the Clerk report.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, in line 3, by striking out the word "allowed" and inserting he words "authorized to appoint," and in line 2 strike out the words from June 3, 1913."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.
The SPEAKER. The question is on agreeing to the resolution.

The resolution as amended was agreed to.

PURCHASE AND EXCHANGE OF TYPEWRITERS.

Mr. LLOYD. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 164 (H. Rept. 59).

Resolved, That the Chief Clerk of the House of Representatives be, and is hereby, authorized to contract, with the approval of the Committee on Accounts, for the purchase or exchange of typewriters for the use of the House, upon such terms as he may deem prudent and equitable, and for such period of time as may be authorized by the Committee on Accounts.

The SPEAKER. Is there objection to the consideration of the resolution?

Mr. MANN. Mr. Speaker, reserving the right to object, is the title "Chief Clerk of the House of Representatives" the correct one?

Mr. LLOYD. The Chief Clerk has authority to make those

purchases. I think that is the proper officer.

I know he is the chief clerk in the Clerk's office. Mr. MURDOCK. Mr. Speaker, reserving the right to object, I would like the gentleman to tell us about the history of the typewriter contract. My understanding is that when the House Office Building was constructed the typewriters were purchased as furniture. Is that correct?

Mr. LLOYD. I think, if you put it that way, it is correct.

When the House Office Building was constructed, and we went into the offices there, every individual Member was permitted to have a typewriter at the Government expense.

Mr. MURDOCK. Now, right there. Then after all the offices of the building were equipped, thereafter were new typewriters purchased from time to time or were new typewriters traded in?

Mr. LLOYD. New typewriters were purchased sometimes and exchanged sometimes, but the purpose of this resolution is to authorize the Clerk to make a contract of exchange. There is a question now as to whether he has a right to exchange typewriters, and he has an opportunity to make a splendid contract by which typewriters when they become old and inefficient for use may be exchanged for new ones.

Mr. MURDOCK. Of course, with a cash addition. Now, I

want to know what appropriation carries that cash addition for typewriters when a typewriter is purchased and an old

typewriter is given in exchange?
Mr. LLOYD. The furniture account.

Mr. MURDOCK. Still the furniture account?

Mr. MANN. Mr. Speaker, the gentleman's resolution apparently does confer this right to make contracts on the chief clerk in the Clerk's office.

Mr. LLOYD. I am willing to accept an amendment to leave out the word "chief." Mr. MANN. The rule provides that the Clerk shall make all contracts, and that when he is absent the Chief Clerk shall act in his place.

Mr. LLOYD. Yes. As an amendment, Mr. Speaker, I wish to strike out the word "chief" where it appears in line 1.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend by striking out, in line 1, the word "chief."

Mr. LLOYD. Mr. Speaker, unanimous consent was not

The SPEAKER. Is there objection to the present considera-on of this resolution? [After a pause.] The Chair hears tion of this resolution? [After a pause.] none. The Clerk will report the amendment.

The Clerk read as follows:

Amend, line 1, by striking out the word "chief."

The SPEAKER. The question is on agreeing to the amendment.

The SPEAKER. The question is on agreeing to the resolution as amended.

The resolution as amended was agreed to.

STENOGRAPHER TO THE COMMITTEE ON WAR CLAIMS.

Mr. LLOYD. Mr. Speaker, I offer the following privileged resolution from the Committee on Accounts.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

House resolution 141 (H. Rept. 58).

Resolved, That there shall be paid out of the contingent fund of the House for the services of a stenographer to the Committee on War Claims during the sessions of the Sixty-third Congress compensation at the rate of \$75 per month, payment to commence from the time said stenographer entered upon the discharge of his duties, which shall be ascertained and evidenced by the chairman of said committee.

Mr. LLOYD. Mr. Speaker, let the committee amendment be

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend by striking out all of the resolution after the word "House," in line 2, and inserting the following: "the sum of \$150 to V. L. Almond for services rendered as stenographer to the Committee on War Claims from June 5, 1913, to August 5, 1913."

The SPEAKER. The question is on agreeing to the amend-

Mr. MANN. Mr. Speaker, I did not quite understand what the amendment was.

Mr. LLOYD. This resolution provides for a stenographer for the Committee on War Claims. It has been customary heretofore to give the Committee on War Claims a session ste-The amendment of the Committee on Accounts provides for two months' salary for the stenographer, and the Committee on War Claims agreed to get along without a stenographer for the rest of the period of the extra session.

Mr. MANN. That is, the resolution provides for only Mr. LLOYD. Only two months' salary at the rate of \$75 per

Mr. MANN. Why is not a stenographer authorized and necessary to do this committee work?

Mr. LLOYD. The clerks can perform the duty. It is not

necessary to have the stenographer.

Mr. MONDELL. Mr. Speaker, will the gentleman yield to me for a question?

The SPEAKER. Does the gentleman from Missouri yield?

month.

Mr. LLOYD. Yes, Mr. MONDELL. There has been some discussion as to the practice of providing annual clerks in place of the session clerks that are usually provided. What is the ordinary or usual pay

of a session clerk?

Mr. LLOYD. A session clerk of an expenditure committee receives \$125 per month. A session clerk of any other committee receives \$6 per day.

Mr. MONDELL. An annual clerk, if provided for, would receive what amount?

Mr. LLOYD. Whatever the House would agree upon.
Mr. MONDELL. I mean, ordinarily.
Mr. LLOYD. About \$1,500. That is what they are asking.
Mr. MONDELL. Then, so far as the expense is concerned, in these days when we are in session all the time, there is no difference in the matter of expense between \$125-per-month clerks by the month and a \$1,500 clerk by the year. On the other hand, as to those clerks who are paid \$6 a day, if the

House is to remain in session the greater part of the year they are receiving higher compensation than they would if they were on an annual salary.

Mr. MANN. They are not getting anything now.

Mr. LLOYD. They would receive \$6 a day during the session. Mr. MANN. There are no \$6-a-day clerks now, are there?

Mr. LLOYD. Yes.

Mr. MANN. They are not, according to my understanding, carried in the appropriation act.

Mr. LLOYD. They receive \$6 a day, except the clerks to

expenditure committees.

Mr. MANN. The appropriation bill carries no provision for them during the special session?

Mr. LLOYD. No. No provision of the bill carries the salaries of session clerks at the extra session.

Mr. MANN. That is what I say.

Mr. MONDELL. But they are provided for and carried along, are they not?

Mr. LLOYD. The question raised by the gentleman from Illinois [Mr. MANN] was that they are not paid.

Mr. MANN. I asked if they were paid.

Mr. MONDELL. Do I understand that there are no \$6-a-day session clerks now?

Mr. LLOYD. There is but one session clerk at \$6 a day, and there are no \$125-per-month session clerks.

The SPEAKER. The question is on agreeing to the amend-

The amendment was agreed to.
The SPEAKER. The question is on agreeing to the resolution as amended.

The resolution as amended was agreed to.

PAY OF CERTAIN WITNESSES.

Mr. LLOYD. Mr. Speaker, I have one more privileged resolution. It is the last one.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 169 (H. Rept. 56).

Resolved, That the Clerk of the House is hereby authorized to pay, out of the contingent fund, to J. Fred Essary, Carl D. Groat, and Daniel O'Connell the sum of \$2.25 each, for attendance as witnesses before the special committee appointed under authority of House resolution 59, Sixty-third Congress, first session.

Mr. LLOYD. Mr. Speaker, this resolution simply provides for the payment of the three witnesses who appeared in the Glover contempt case.

Will the gentleman yield? Has not the Com-Mr. MANN. mittee on Accounts authority to approve bills for the attendance of witnesses before committees without bringing resolutions into the House?

Mr. GARNER. Not for this special committee.
Mr. LLOYD. Not for special committees.
Mr. GARNER. Not unless authorized by the House, and this committee were not authorized to expend any money whatever. Mr. MANN. I thought they were authorized to subpæna

witnesses Mr. LLOYD. No.

The SPEAKER. The question is on agreeing to the reso-Intion.

The resolution was agreed to.

BUST OF WILLIAM PITT.

Mr. THACHER. Mr. Speaker, I ask unanimous consent that Senate joint resolution 64, which is now on the Speaker's table, be taken up for present consideration by the House.

This joint resolution was unanimously agreed to by the Senate, and is favorably recommended by the Library Committee. It gives permission to the President, at his personal request made to Congress, to accept a bust of William Pitt, to be placed in the White House.

Mr. BARTLETT. Is a similar resolution pending in the

Senate?

Mr. THACHER. Yes.
The SPEAKER. The gentleman from Massachusetts [Mr. THACHER] asks unanimous consent to take from the Speaker's table a joint resolution to authorize the President to accept a bust of William Pitt.

Mr. UNDERWOOD. Mr. Speaker, if the gentleman will yield

for a question-

Mr. MANN. Reserving the right to object— Mr. UNDERWOOD. Yes; I understand that a similar bill has been reported from the Committee on the Library, although it is not on the calendar.

Mr. THACHER. It has, Mr. UNDERWOOD. And that the Committee on the Library have acted favorably on this matter.

Mr. THACHER. We have recommended it.

Mr. UNDERWOOD. And your purpose in asking unanimous consent is merely to expedite the passage of the resolution

Mr. THACHER. That is all.

Mr. MANN. Mr. Speaker, reserving the right to object, I aid not know that the Committee on the Library had acted upon the House joint resolution, because I am sure there has not been a quorum of the committee in the city for some time.

I should have no objection to Lady Paget and other ladies presenting a bust of William Pitt to the United States, but I question very much the propriety of inaugurating a custom of placing in the White House busts or representations of foreigners in any form whatever. The White House is now overcrowded with pictures of Presidents and their wives. In my opinion the White House ought to remain sacred to the representation of Americans.

There are many places where a bust of William Pitt can be properly placed without seeking to place it in the one place of all others in the United States that ought to be kept solely for American citizens, and for the present I shall object.

The SPEAKER. The gentleman from Illinois objects.

Mr. THACHER. Mr. Speaker, may I have the privilege of replying to the distinguished gentleman from Illinois?

The SPEAKER. You can not reply to an objection.

Mr. MANN. I am perfectly willing to reserve the right to

Mr. THACHER. In the first place I want to contradict one statement made by the distinguished gentleman from Illinois. May I have that privilege?

The SPEAKER. The gentleman from Illinois has withdrawn

his objection temporarily.

Mr. THACHER. The gentleman from Illinois stated that he knew that we had had no quorum of our committee in Washington for some time back. Two of the members of that committee, the gentleman from Texas [Mr. Slayden] and the gentleman from Missouri [Mr. Bartholdt], are attending The Hague peace convention as delegates.

The other three Members are the gentleman from New York [Mr. Ten Eyck], the gentleman from Pennsylvania [Mr. Burke], and myself. It is quite true that there was no quorum actually present in Washington. The President sent a message asking the gracious consent of Congress. That was on the 4th of August, and that message was read in this House. sume the Members here heard it read. I tried to get hold of the gentleman from Pennsylvania [Mr. Burke]. I caused to be sent to him a copy of this joint resolution and a copy of the President's request, and he authorized his signature to the favorable recommendation of the resolution.

Mr. MANN. If the gentleman from Massachusetts will allow me, I did not mean to criticize the committee for having made a report because there was no quorum. If the gentleman so understood me, and perhaps it was quite natural, I want to say that I did not mean it in that respect at all. I supposed that the committee had made no report, because I knew that there

was no quorum here.

Mr. THACHER. I thought the gentleman did not quite understand the fact that I had consulted with the gentleman from

Pennsylvania [Mr. Burke].

Mr. MANN. As far as that is concerned, the gentleman might

consult them all and it would make no difference.

The SPEAKER. The rule or decision is that it takes an actual quorum gathered together at one place.

Mr. MANN. But, Mr. Speaker, I was not making any point

upon that at all.

The SPEAKER. The Chair understands that; the Chair was stating it for the information of all Members of the House, because this question was elaborately argued last summer in the matter of the Coosa River Dam proposition.

Mr. TEMPLE. Mr. Speaker, will the gentleman yield?

Mr. THACHER. Yes. Mr. TEMPLE. This is a request to place a bust of William

Pitt in the White House.

Mr. THACHER. A request came from the President of the United States asking permission of Congress, which he has to have, to accept a gift of the bust of William Pitt, whom he called the friend and champion of America, to be put in the White House.

Mr. TEMPLE. It seems to me that when it comes as a request from the President of the United States we ought to bear in mind those who have had the opportunity of visiting Windsor Castle that in the chamber known as the King's closet in that castle there is a fine oil painting of Thomas Jefferson, a signer of the Declaration of Independence. It seems to me that if that can be put in the King's closet at Windsor Castle, we might

put in the White House, at the request of the President of the United States, a bust of William Pitt. [Applause.]

Mr. MADDEN. Will the gentleman yield?

Mr. TEMPLE. If I have any time.

Mr. THACHER. I will yield to the gentleman.
Mr. MADDEN. I just want to say that I wonder whether Windsor Castle is not the private property of the King, and that he has a right to put there anything he sees fit.

Mr. THACHER. Mr. Speaker, I trust that my good friend from Illinois will withdraw his objection.

Mr. MANN. If the gentleman from Massachusetts wants to address the House I will reserve the objection.

Mr. THACHER. The gentleman from Illinois said we had

no room in the White House for a statue of William Pitt.

Mr. COOPER. Will the gentleman permit an interruption at that point?

Mr. THACHER. Certainly.

Mr. COOPER. The gentleman has used the name of William Pitt. Is it William Pitt, Lord Chatham, or his son William Pitt, the great parliamentary leader?
Mr. THACHER. The Earl of Chatham, that is his title, I

The SPEAKER. It is the Earl of Chatham.

Mr. COOPER. Yes; the elder Chatham, our friend during the

Mr. THACHER. That is true. Pittsburgh, Pa., and Pittsfield, in my own State, were named after the elder Pitt, who was born in 1708.

Mr. COOPER. When the gentleman asks permission to have put in the White House a statue or a bust of William Pitt, that would permit a bust or statue of William Pitt, the younger, and that is not the man at all.

Mr. THACHER. It is the elder Pitt, as I think we all understand. Now, I want to say a further word in regard to this matter. If there was one man at the time of the American Revolution who helped the cause of America it was William Pitt. We have found room here in this Hall to put a picture of a foreigner, Gen. Lafayette, and I do not believe the gentleman from Illinois objects to that. Lafayette came over here when he was a young man. I want to say also that this picture was painted by a foreigner. He came over a young man, gave up the best part of his life to assist in the cause of liberty.

In regard to William Pitt I want to give the gentleman a few facts. He was born in 1708. At the age of 27 he became a member of Parliament. Some 10 years afterwards he became paymaster of England, where he made a record for honesty in office much above that of some of his predecessors. He refused to take a single cent that did not properly belong to him. He refused to take any interest on Government deposits, which it had been generally the custom for his predecessors to take, and put the money in the Bank of England without receiving any interest. His record was fine throughout, a model of everything that was honest and statesmanlike.

Benjamin Franklin was his friend and he fought for the cause of American liberty just as much as though he had been here fighting on the battle field. In 1778 he came into Parliament an old man on crutches and made a speech in the cause of America. After the close he fell in convulsions and died a few weeks after, just as John Quincy Adams was taken out from this House of Representatives and died a few months afterwards. I think, on looking into the life of William Pitt, we will find he was a champion of the cause of liberty in England and in America, also, and I certainly trust that if not at this time that at some time later this will be passed.

Mr. SLOAN. Will the gentleman yield?

Mr. THACHER. Yes.

Mr. SLOAN. Is this the same William Pitt, Lord Chatham, who said during the course of the American Revolution that the colonists ought not and should not have the right to make even a horseshoe nail?

Mr. THACHER. William Pitt said he would never consent to taxing Americans without their consent.

Mr. SLOAN. I was taking a specific statement.

Mr. THACHER. I do not recall it.

Mr. SLOAN. I recall it distinctly.

THACHER. I think the gentleman is mistaken, and I would be glad to have the gentleman show me that statement.

Mr. SLOAN. The gentleman can ind it in any most of for Mr. MANN. Mr. Speaker, I have as great an admiration for mr. Mann. Mr. MANN. Mr. Speaker, I have as great an admiration for William Pitt, Earl of Chatham, as any man on earth now living or who ever has lived, but I do not believe we ought to have this reproduction in the White House. It is easy enough to find a place to put the bust, and for the present I object.
The SPEAKER. The gentleman from Illinois objects.

#### EXTENSION OF REMARKS.

Mr. Speaker, I ask unanimous consent to Mr. BRITTEN. extend my remarks in the RECORD.

The SPEAKER. On what?

Mr. BRITTEN. I desire to show by statement my personal observation of what I consider the extreme necessity of the manufacture of torpedoes, from observations made by me during a recent visit to the torpedo station at Newport.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD on the subject

Is there objection? of torpedoes.

of torpedoes. Is there objection?

Mr. SAUNDERS. Mr. Speaker, I do not think this is a good time for the discussion of that subject, and I object.

Mr. UNDERWOOD. Mr. Speaker, if this concludes public business to come before the House this morning, the gentleman from Maryland [Mr. Lewis] desires to address the House for 30 minutes, and I ask that he be given unanimous consent to

address the House for 30 minutes.

The SPEAKER. The Chair will state to the House that there is a special order on this Hetch Hetchy bill, which was to have come up on the 15th of the month and was to be a continuing order. Now, the gentleman from Alabama [Mr. Underwood] asks unanimous consent that the gentleman from Maryland [Mr. Lewis] be permitted to address the House at this time for Is there objection?

Mr. RAKER. Mr. Speaker, I understand that if this request for unanimous consent is given the gentleman from Maryland

it will not interfere with the regular order?

The SPEAKER. It will not affect it at all. Mr. UNDERWOOD. Mr. Speaker, I will say I would not make this request at this time to get in the way of the gentleman's bill if it were not for the fact that I intend to move that the House adjourn before 2 o'clock, because we are going to hold a Democratic caucus.

Mr. MANN. I understood the Hetch Hetchy bill was not to be brought up this morning.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I want to say I shall not object to the request of the gentleman from Alabama that the gentleman from Maryland may address the House because I told the gentleman from Maryland [Mr. Lewis] I would not object. Hereafter I shall object to any insertions in the Record, or extension of any remarks of any kind, until the Democratic side is willing to concede to the

Republican side of the House ordinary courtesy.

The SPEAKER. Is there objection?

Mr. MADDEN. Mr. Speaker, reserving the right to object,
I do not see any reason why one Member of the House should be given unanimous consent to address the House and another Member of the House refused such consent. My colleague has tried two or three times now to get the consent of the House to extend his remarks in the RECORD on the subject of torpedoes.

It is a subject in which all the American people are interested, and I have not any doubt but that the gentleman would be able to discourse upon it intelligently and instructively; but I shall object to any persons being given the right to address the House unless the gentleman from Illinois is given unanimous Mr. SAUNDERS. Mr. Speaker, will the gentleman yield to me? consent to extend his remarks.

Mr. MADDEN. I have not the floor, I think.
Mr. UNDERWOOD. I will yield to the gentleman from

Virginia.

Mr. SAUNDERS. Evidently these remarks grow out of the fact that I objected a few moments ago to the extension of remarks in the RECORD relating to the necessity for additional battleships and torpedoes. I objected for the reason that I did not regard this as an appropriate time to insert such matter in the RECORD, and not, of course, for any personal reasons relating to the gentleman from Illinois [Mr. BRITTEN].

I do not possess the pleasure of the acquaintance of the gentleman from Illinois. Hence there is nothing personal in my ob-jection to his request. If the gentlemen on the other side of the Chamber think that there is any reason why the subject of parcel post should not be discussed at this time, it is perfectly competent and proper for them to object to the request of the gentleman from Alabama [Mr. UNDERWOOD].

The SPEAKER. Is there objection? Mr. MADDEN. Mr. Speaker, I object.

Mr. MANN. Mr. Speaker, reserving the right to object, as I stated-and the gentleman from Virginia [Mr. SAUNDERS] probably was not in the Hall at the time—every request made from this side of the House for more than a week to speak and extend remarks in the Record has been objected to by Members

on that side of the House. It is a pretty poor excuse to say that this is not a good time in which to discuss torpedoes.

Mr. MADDEN. Mr. Speaker, I objected.

#### ADJOURNMENT.

Mr. UNDERWOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 c'clock and 12 minutes p. m.) the House, under its previous order, adjourned until Tuesday, August 26, 1913, at 12 o'clock noon.

#### EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

 A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Arkansas River, Ark., below Dardanelle, Ark., with a view to the improvement of the navigation of said river (H. Doc. No. 202); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report on examination of Licking River, Ky., with a view to the prevention of a cut-off at the town of Farmers, consideration being given to any tender of cooperation on the part of local interests (H. Doc.

No. 201); to the Committee on Rivers and Harbors and ordered to be printed.

### REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. CARTER, from the Committee on Indian Affairs, to which was referred the bill (S. 2711) to provide for the acquiring of station grounds by the Great Northern Railway Co. in the Colville Indian Reservation in the State of Washington, reported the same without amendment, accompanied by a report (No. 54), which said bill and report were referred to the

Committee of the Whole House on the state of the Union.

Mr. POST, from the Committee on Elections No. 1, to which was referred the resolution (H. Res. 231) declaring William J. MacDonald duly elected a Representative from the twelfth congressional district of Michigan, reported the same without amendment, accompanied by a report (No. 60), which said bill and report were referred to the House Calendar.

Mr. FLOOD of Virginia, from the Committee on Foreign Affairs, to which was referred the bill (S. 2319) authorizing the

appointment of an ambassador to Spain, reported the same without amendment, accompanied by a report (No. 37, pt. 2), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

### CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 3085) granting a pension to Virginia M. Gaspard, and the same was referred to the Committee on Invalid Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials

were introduced and severally referred as follows:
By Mr. RUBEY: A bill (H. R. 7516) to prohibit interference with commerce among the States and Territories and with foreign nations, and to remove obstructions thereto, and to prohibit the transmission of certain messages by telegraph, tele-phone, cable. or other means of communication between States and Territories and foreign nations; to the Committee on Agriculture.

By Mr. LONERGAN: A bill (H. R. 7592) appropriating money for the improvement of the Connecticut River between Long Island Sound and Hartford, Conn.; to the Committee on Rivers

and Harbors.

By Mr. GARNER (by request): A bill (H. R. 7593) to establish in the Department of Agriculture a bureau to be known as

the market bureau; to the Committee on Agriculture.

By Mr. RAYBURN: A bill (H. R. 7594) to amend the act of Congress entitled "An act to authorize the construction of a bridge across the Red River and to establish it as a post road," approved January 28, 1910; to the Committee on Interstate and Foreign Commerce.

By Mr. KAHN: A bill (H. R. 7595) providing for the free importation of articles intended for foreign buildings and exhibits at the Panama-Pacific International Exposition, and for the protection of foreign exhibitors; to the Committee on Ways and

By Mr. CONNELLY of Kansas: A bill (H. R. 7596) to increase the limit of cost of the United States post-office building at Beloit, Kans.; to the Committee on Public Buildings and

By Mr. KINKAID of Nebraska: A bill (H. R. 7597) to authorize the Secretary of the Interior to provide special rules and regulations for the opening to homestead entry of lands eliminated from the Nebraska National Forest Reserve by presidential proclamation March 1, A. D. 1913; to the Committee

on the Public Lands.

Also, a bill (H. R. 7598) permitting minors of the age of 18 years or over to make homestead entry or other entry of the public lands of the United States; to the Committee on the Public Lands.

By Mr. MAHAN: A bill (H. R. 7599) granting two condemned cannon to the city of Rockville, Conn.; to the Committee on Military Affairs.

Ry Mr. Talvana and Talvana a

By Mr. TAVENNER: A bill (H. R. 7600) regulating the salary of rural letter carriers; to the Committee on the Post Office and Post Roads.

By Mr. CARY: A bill (H. R. 7601) authorizing the Navy Department to offer and pay rewards for the detection of viola-tions of the antitrust act of July 2, 1890; to the Committee on

By Mr. THOMAS: A bill (H. R. 7602) for the benefit of railway postal clerks; to the Committee on the Post Office and Post

Also, a bill (H. R. 7603) to erect a statue of Jefferson Davis in the Jefferson Davis Home Park, at Fairview, Ky.; to the Committee on the Library.

Also, a bill (H. R. 7604) to correct the military record and provide for the granting of pensions to survivors of certain battalions of Kentucky Militia; to the Committee on Military

Also, a bill (H. R. 7605) for the erection of a public building at Central City, Muhlenberg County, Ky.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 7606) for the erection of a public building at Russellville, Logan County, Ky.; to the Committee on Public Buildings and Grounds.

By Mr. L'ENGLE: A bill (H. R. 7607) to provide for the examination and survey of St. Lucie Inlet, Palm Beach County, Fla.; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 7608) to provide for the examination and survey of New River, Dade County, Fla.; to the Committee on Rivers and Harbors.

Also, a bill (H. B. 7609) to provide for the examination and survey of Lake Worth Inlet, Palm Beach County, Fla.; to the Committee on Rivers and Harbors.

By Mr. RUBEY: A bill (H. R. 7610) to establish a fishcultural station in Shannon County, in the State of Missouri; to the Committee on the Merchant Marine and Fisheries.

Also, a bill (H. R. 7611) to fix the mileage of Senators, Representatives, and Delegates in Congress; to the Committee on

Also, a bill (H. R. 7612) to amend section 2 of an act approved April 19, 1908, entitled "An act to increase the pension of widows, minor children, etc., of deceased soldiers and sailors of the late Civil War, the War with Mexico, the various Indian wars, etc., and to grant a pension to certain widows of the deceased soldiers and sailors of the late Civil War"; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7613) to provide for the securing of deposits in postal savings banks in cities and towns of less than 10,000 inhabitants, by personal bonds or the bonds of bonding companies, when such deposits shall be deposited in National or State banks located in such cities or towns; to the Committee on the Post Office and Post Roads.

Also, a bill (H. R. 7614) to extend the provisions of the pension act of May 11, 1912, to the officers and enlisted men of all State militia and other State organizations that rendered service to the Union cause during the Civil War for a period of 90 days or more, and providing pensions for their widows, minor children, and dependent parents, and for other purposes; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7615) to authorize the payment of pensions monthly; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7616) providing that the United States

shall in certain cases make compensation for the use of high-

ways for carrying free rural-delivery mail; to the Committee on the Post Office and Post Roads.

By Mr. BURKE of Wisconsin: A bill (H. R. 7617) to provide for warning signals for vessels working on wrecks or engaged in dredging or other submarine work; to the Committee on the Merchant Marine and Fisheries.

By Mr. STEENERSON: A bill (H. R. 7618) to amend the new three-year homestead law; to the Committee on the Public Lands.

By Mr. FERRIS: A bill (H. R. 7019) providing for the purchase of a site and the erection thereon of a public building at Anadarko, in the State of Oklahoma; to the Committee on Public Buildings and Grounds.

By Mr. BYRNS of Tennessee: A bill (H. R. 7620) to provide for the appointment of a district judge in the middle and eastern judicial districts in the State of Tennessee, and for other purposes; to the Committee on the Judiciary.

By Mr. SLOAN: A bill (H. R. 7621) authorizing the President of the United States to appoint certain persons in the Regular Army and place them upon the retired list; to the Committee on

Military Affairs.

By Mr. RUBEY: A bill (H. R. 7622) to prohibit interference with commerce among the States and Territories and with foreign nations, and to remove obstructions thereto, and to prohibit the transmission of certain messages by telegraph, telephone, cable, or other means of communication between States and Territories and foreign nations; to the Committee on Agriculture.

## SENATE.

# SATURDAY, August 23, 1913.

The Senate met at 11 o'clock a. m. Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved. PETITIONS AND MEMORIALS.

Mr. SHEPPARD. I present a resolution adopted by the Legislature of Texas relative to the marketing of farm products. I ask that the resolution may be printed in the RECORD and referred to the Committee on Agriculture and Forestry.

There being no objection, the resolution was referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

printed in the Record, as ionows:

Whereas there are thousands of dollars lost to the farmers of Texas every year through inadequate marketing facilities and imperfect knowledge in regard to the same; and Whereas every farmers' organization in Texas has declared in favor of State and Federal aid to better marketing conditions; and Whereas this legislature in the present session has appropriated \$15,000 to be used in gathering and distributing information, in regard to more efficient methods of marketing farm crops: Therefore be it

Resolved by the House of Representatives of the Legislature of Texas, That our Representatives and Senators in Congress be urged to give the subject of marketing farry products, and especially those of a perishable nature, their most earnest consideration to the end that some method may be devised to prevent the enormous waste that now annually takes place between the producer and consumer of farm products; and be it further. further

Resolved, That a copy of this resolution, properly indorsed, be sent by the chief clerk of the house to each of the Texas Representatives and Senators in Congress as well as to the Secretary of Agriculture.

I hereby certify that the above resolution was unanimously adopted.

W. R. LONG,

Chief Clerk House of Representatives.

Mr. TOWNSEND presented a memorial from sundry students in summer session at the University of Michigan, Ann Arbor, Mich., remonstrating against the imposition of a duty on books of all kinds imported into the United States, which was ordered to lie on the table.

Mr. OLIVER presented petitions signed by sundry citizens of the State of Pennsylvania, praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which were ordered to lie on the table.

Mr. LEA presented a petition signed by sundry citizens of the State of Tennessee, praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which was ordered to lie on the table.

### BILLS INTRODUCED,

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MYERS:

A bill (S. 3023) relating to the duties of registers of United States land offices and the publication in newspapers of official land-office notices; to the Committee on Public Lands.

By Mr. JONES:

A bill (S. 3024) waiving the age limit for the appointment as assistant paymaster in the United States Navy in the case of Chief Commissary Steward Stamford Chapman, United States Navy; to the Committee on Naval Affairs.

By Mr. CRAWFORD:

bill (S. 3025) granting a pension to Roland J. Patrick (with accompanying paper); to the Committee on Pensions.

# AMENDMENTS TO THE TARIFF BILL.

Mr. JONES. I submit an amendment to the tariff bill relative to the provision for an inheritance tax. I ask that the amendment may lie on the table and be printed and that it also may be printed in the RECORD.

There being no objection, the amendment was ordered to lie on the table and to be printed and also to be printed in the

RECORD, as follows:

RECORD, as follows:

Amendment intended to be proposed by Mr. Jones to the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes, viz: Add a new section, as follows:

Sec. —. That a tax shall be, and is hereby, imposed upon the transfer of any property, real or personal, or of any interest therein or income therefrom, in trust or otherwise, to persons or corporations, within the United States or any of its possessions (except the Philippine Islands). In the following cases:

First. When the transfer is by will or by the intestate laws of any State or Territory or of the United States from any person dying selzed or possessed of the property while a resident of the United States or any of its possessions (except the Philippine Islands).

Second. When the transfer is by will or intestate law of property within the United States or any of its possessions (except the Philippine Islands), and the decedent was a nonresident of the United States or any of its possessions at the time of his death.

Third. Whenever the property of a resident decedent, or the property of a nonresident decedent within the United States or any of its possessions (except the Philippine Islands), transferred by will, is not specifically bequeathed or devised, such property shall, for the purpose of this section, be deemed to be transferred proportionately to, and divided pro rata among, all the general legatees and devisees named in said decedent's will, including all transfers under a residuary clause of such will.

Fourth. When the transfer is of property made by a resident, or by

said decedent's will, including all transfers under a residuary clause or such will.

Fourth. When the transfer is of property made by a resident, or by a nonresident when such nonresident's property is within the United States or any of its possessions (except the Philippine Islands), by deed, grant, bargain, sale, or gift made in contemplation of the death of the grantor, vendor, or donor or intended to take effect in possession or enjoyment at or after such death.

Fifth. When any such person or corporation becomes beneficially entitled, in possession or expectancy, to any property or the income thereof by any such transfer, whether made before or after the passage of this act.

by any such transfer, whether made before or after the passage of this act.

Sixth. Whenever any person or corporation shall exercise a power of appointment derived from any disposition of property made either before or after the passage of this act, such appointment when made shall be deemed a transfer taxable under the provisions of this act in the same manner as though the property to which such appointment relates belonged absolutely to the donee of such power and had been bequeathed or devised by such donee by will; and whenever any person or corporation possessing such power of appointment so derived shall omit or fail to exercise the same within the time provided therefor, in whole or in part, a transfer taxable under the provisions of this act shall be deemed to take place to the extent of such omission or falliure, in the same manner as though the persons or corporations thereby becoming entitled to the possession or enjoyment of the property to which such power related had succeeded thereto by a will of the donee of the power failing to exercise such power, taking effect at the time of such omission or failure.

Seventh. The tax imposed hereby shall be, except as otherwise prescribed in paragraph 2 of this section, as follows: ferred, is of the value of less than \$5,000, at the rate of 1 per cent upon the clear market value of such property; if of the value of \$5,000 and the rate of 1 per cent upon the clear market value of such property; if of the value of \$5,000 and the rate of 1 per cent upon the clear market value of such property; if exceeding \$50,000 and not exceeding \$25,000, at the rate of 5 per cent upon the clear market value thereof; if exceeding \$1,500,000 and not exceeding \$1,500,000, at the rate of 1 per cent upon the clear market value thereof; if exceeding \$1,500,000, at the rate of 1 per cent upon the clear market value thereof; if exceeding \$1,500,000, at the rate of 1 per cent upon the clear market value thereof; if exceeding \$1,500,000, at the rate of 5 per cent upon the clear market value thereof; if exceeding \$1,500,000, at the rate of 50 per cent upon the clear market value thereof; if exceeding \$1,500,000, at the rate of 50 per cent upon the clear market value thereof; if the value of over \$15,000,000, at the rate of 50 per cent upon the clear market value thereof; if the value of very \$15,000,000, at the rate of 50 per cent upon the clear market value thereof; if the value of 1 per value of 2 per value value value of 2 per value value value value value value of 2 per value value

upon such payment and delivery of such schedule, list, or statement said collector or deputy collector shall grant to such person paying such duty or tax a receipt or receipts for the same in duplicate, which shall be prepared as hereinafter provided. Such receipt or receipts, duly signed and delivered by such collector or deputy collector, shall be sufficient evidence to entitle such executor, administrator, or trustee to be credited and allowed such payment by every tribunal which by the laws of any State or Territory is or may be empowered to decide upon such executor, administrator, or trustee shall refuse or neglect to pay the aforesaid duty or tax to the collector or deputy collector as a foresaid within the time hereinbefore provided, or shall neglect or refuse to deliver to said collector or state the such executor, administrator, or trustee shall refuse or neglect to pay the aforesaid or the same of the schedule, list, or statement of such legacles, property, or personal estate, under oath as aforesaid, or shall neglect or refuse to deliver the such cases aforesaid, or shall neglect or refuse to deliver the such cases aforesaid, or shall neglect or refuse to deliver the such cases aforesaid, or shall all not ruly and correctly set forth and state therein the clear value of such beneficial interests therein unruly or shall not truly and correctly set forth and state therein the clear value of such beneficial interests therein unruly or shall not truly and correctly set forth and state therein the clear value of such beneficial interests or where no administration upon such property or personal estate shall have been granted or allowed under existing laws, the collector or refused and shall assess the duty thereon, and the collector shall commence appropriate proceedings before any court of the Culter States, in the name of the United States, against such person or persons as may have the actual or constructive custody or possession of such property or personal estate, or any part thereof, and shall subj

PAR. 6. That in all States having a local inheritance-tax law the amount of such local inheritance tax shall be deducted from the normal amount to be collected under the provisions of this section.

Mr. BRANDEGEE submitted five amendments intended to be proposed by him to the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes, which were referred to the Committee on Finance and ordered to be printed.

# PANAMA CANAL EQUIPMENT.

Mr. POINDEXTER submitted the following resolution (S. Res. 169), which was read:

Resolved, That the Isthmian Canal Commission be, and they are hereby, directed to transmit to the Senate information showing as nearly as may be practicable the amount, character, and value of construction machinery, equipment, and material which will be available on the completion of the Panama Canal and which it would be possible to transfer to Alaska for use in railroad and dock construction and coal mining.

Mr. POINDEXTER. I ask unanimous consent for the consideration of the resolution.

Mr. SIMMONS. I shall not object, provided it does not lead to debate. If the Senator will withdraw it in that event I will not make an objection.

Mr. POINDEXTER. I do not think it will lead to any debate.

The VICE PRESIDENT. The Senator from Washington asks unanimous consent for the present consideration of the resolution.

Mr. SMOOT. Let it be read again. The Secretary again read the resolution.

Mr. BRANDEGEE. I should like to ask the Senator from Washington if the execution of this request would involve any

Mr. POINDEXTER. I can not imagine what expense would be involved in it. They have a large, well-organized clerical force, and undoubtedly they have this information already in hand. I imagine that the transmission of the information to the Senate would not involve any expense.

Mr. BRANDEGEE. The transmission, of course, would not involve anything but putting a frank on an envelope and mailing it, if they have the information. I assume it will involve going over the whole equipment on the canal in order to ascertain what could be dispensed with and what is necessary, and in that there is something in the nature of an investigation. I would rather have it, if the Senator would not object, provided if it can be done without expense or some. limited expense. I am willing to have the resolution passed, if the Senator prefers it, as it is.

Mr. POINDEXTER. I would prefer it the way it is. I do not think it will involve any expense for the reason that those in charge of the construction of the canal undoubtedly have

this information in their possession.

Mr. BRANDEGEE. I think the resolution ought to distinguish between the entire amount of machinery and equipment which is now upon the canal and the amount which could be dispensed with and moved to Alaska. As I heard it read, it made no such distinction, but asked for a statement of the entire amount there available and which could be transported to Alaska. The whole of it could be transported to Alaska or any other place if we want to spend enough money to get it there. I suppose the idea is to find out what possibly could be taken to Alaska that may not be needed to be retained upon the canal.

Mr. POINDEXTER. The resolution asks for the amount and character that would be available at the finishing of the canal. Mr. BRANDEGEE. The whole of it would be available, would it not?

Mr. POINDEXTER. That is what we are inquiring. imagine that they have a large amount of machinery and equipment which would not be useful or available for the construction of docks or railroads in Alaska. The very language of the resolution necessarily discriminates between such as would be useful and available for the purposes mentioned and that which would not be.

Mr. BRANDEGEE. I see the Senator's point. I do not ob-

ject to the adoption of the resolution.

The resolution was considered by unanimous consent and agreed to.

## THE TARIFF.

The VICE PRESIDENT. The morning business is closed. Mr. SIMMONS. I ask unanimous consent that the Senate proceed to the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Govern-

ment, and for other purposes.

Mr. SIMMONS. I yield to the Senator from Tennessee [Mr. LEA].

NATIONAL CONSERVATION EXPOSITION AT KNOXVILLE, TENN.

Mr. LEA. I ask unanimous consent for the present consideration of the bill (S. 2065) to provide for participation by the Government of the United States in the National Conservation Exposition to be held at Knoxville, Tenn., in the fall of 1913. A similar measure carrying a larger appropriation than this was passed at the last session.

Mr. SIMMONS. I shall not object, provided it does not lead to debate and if the Senator will withdraw it in that case.

I will withdraw it if it leads to debate. Mr. LEA.

Mr. CATRON. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst Bacon Bankhead Brady Brandegee Bristow Bryan Catron Chamberlain Chilton Clapp Clark, Wyo.	Colt Crawford Cummins Fall Fletcher Gallinger Gronna Hughes James Johnson Jones Kenyon	La Follette Lane Lea Lewis Lippitt Lodge McCumber McLean Martin, Va. Martine, N. J. Myers Nelson	O'Gormai Oliver Overman Owen Page Perkins Pittman Poindext Pomerene Reed Robinson Saulsbur,
Clarke, Ark.	Kern	Norris	Shafroth

Sheppard Sherman Shields Shively Simmons Smith, Ariz. Smith, Ga. Smith, S. C. Smoot Smoot Sterling Sutherland

Thomas Thompson Tillman Townsend Vardaman Walsh Warren Weeks

Mr. JAMES. My colleague [Mr. Bradley] is prevented from attendance here by reason of illness. He has a general pair with the Senator from Indiana [Mr. KERN]. I will allow this announcement to stand for the day.

Mr. SHEPPARD. My colleague [Mr. Culberson] is necessarily absent, and is paired with the Senator from Delaware [Mr. DU PONT]. This announcement may stand for the day.

The VICE PRESIDENT. Seventy-three Senators have answered to the roll call. There is a quorum present. The Senator from Tennessee asks unanimous consent for the present consideration of Senate bill 2065.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to appropriate \$50,000 to enable the Government of the United States and its experiment stations to cooperate with and make an exhibit at the National Conservation Exposition illustrative of the functions of the Government and the experiment stations and their educational value in connection with the development and wise use of the natural resources of the United States, especially the advancement of scientific agriculture and the increase of productivity of the soil through improved cultivation and crop selection and the prevention of avoidable wastes; the reclamation of wet and dry lands by drainage and irrigation, respectively; the more economical development and utilization of mineral wealth; the judicious use of and prevention of needless destruction in woodlands for maintaining timber supply and protecting headwaters of streams; the development and utilization of water power; the use and improvement of inland waterways; the preservation of fish and game; the preservation and protection of life in connection with industrial operations; and the economic investigations and operations of the Government with reference to mines and mining, geology, topographic and other surveys, public roads, rural-life improvement, education,

child welfare, and public health and sanitation.

A United States Government board of managers is authorized to be appointed, to be charged with the selection, purchase, preparation, transportation, arrangement, safe-keeping, exhibition, and return of such articles and materials as the heads of the several departments, respectively, decide shall be embraced in the Government exhibit herein authorized. The President of the United States may also designate additional articles of peculiar interest for exhibition in connection with the said Government exhibit. Said Government board of managers shall be composed of three persons now in the employ of the Government and shall be appointed by the President, one of whom shall be designated by the President as chairman of the said board and one as secretary and disbursing officer. The members of said Government board, with other officers and employees of the Government who may be detailed to assist them, including officers of the Army and Navy, shall receive no compensation in addition to their regular salaries, but they shall be allowed their actual and necessary traveling expenses, together with a per diem in lieu of subsistence, to be fixed by the Secretary of the Treasury, while necessarily absent from their homes engaged upon the business of the board. Officers of the Army and Navy shall receive said allowance in lieu of the subsistence and mileage now allowed by law; and the Secretary of War and the Secretary of the Navy may, in their discretion, detail retired Army or Navy officers for such duty. Any provisions of law which may prohibit the detail of persons in the employ of the United States to other service than that which they customarily perform shall not apply to persons detailed for duty in connection with said National Conservation Exposition. Employees of the board not otherwise employed by the Government shall be entitled to such compensation as the board may determine, and such employees may be selected and appointed by said board. The disbursing officer shall give bond in such sum as the Secretary of the Treasury may determine for the faithful performance of his duties, said bond to be approved by said Secretary. The Secretary of the Treasury shall advance to said officer from time to time, under such regulations as he may pre-scribe, a sum of money from the appropriation for the Government exhibit herein authorized, not exceeding at any one time the penalty of his bond, to enable him to pay the expenses of said exhibit as authorized by the United States Government

board herein created, Mr. SMOOT. I me I merely ish to ask one question of the Senator from Tennessee. I notice the report says:

This committee, having conducted a hearing of the officers of the National Conservation Exposition and others, is of the opinion that the exposition should have the approval of the United States.

I suppose the Senator does not understand that the approval of this exposition by the United States places any responsibility on the Government of the United States further than the appropriation provided for.

Mr. LEA. None in the world; and the bill so provides,

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes

Mr. LIPPITT. Mr. President, I should like to have the attention of the Senator from North Carolina [Mr. Simmons] for a moment. In the course of my remarks yesterday in connection with the subject of the bounty paid by Australia the Senator from North Carolina had paragraph E of the administrative part of the bill read into my remarks, he claiming that the countervailing duty that is provided for in that paragraph could be used to counteract the payment of the bounty on tops from Australia. I have since given that subject a little more careful examination than I had the opportunity to do when it was first proposed, and if the Senator will read that paragraph he will see that the Secretary of the Treasury is only authorized to act in case the bounty is paid upon the exportation of any article. If the bounty is paid by the Government of Australia for the manufacture of the article, and applies alike to the article, whether it is used in Australia or whether it is exported, as I read the paragraph it would not be effective.

Now, I do not know exactly in what form that bounty is paid. The only information that I had about it was what has appeared in the daily press. I think it is probable that the bounty is paid by the Government of Australia upon tops manufactured. In such case the situation would be as I described it. If, however, it is only paid in case the tops are exported, which If can not imagine is the case, then the position of the Senator from North Carolina would be correct.

I have brought up the subject for two reasons: One as to its effect upon the woolgrower in this country and the other to show the great efforts which some countries make to en-courage the very things which I think are being discouraged under the policy which is being inaugurated here. I simply wanted to bring to the attention of the Senate the situation as

understand it.

Mr. SIMMONS. Mr. President, my recollection is that before I asked to have the paragraph incorporated in the Senator's remarks, after stating the substance of it, I had asked the Senator from Rhode Island whether he referred to an export duty, and whether that export duty was in the nature of a bounty or otherwise. Of course, this country would have no concern about a bounty paid by a foreign government upon productions in that country unless that bounty was in the nature of a burden upon the exports to this country. bounty paid is in the nature of an export duty, or if it is a bounty confined to exports, then, under this paragraph, the amount of that bounty would be added to the duty fixed in this

Mr. LIPPITT. The way the Senator from North Carolina describes it and the way I have described it I think are the same. We understand the situation alike.

The VICE PRESIDENT. The Secretary will proceed with the reading of the bill.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 295, page 87. line 20, before the words "per cent," to strike out "15" and insert "5," so as to make the paragraph

295. Combed wool or tops and roving or roping made wholly or in part of wool or camel's hair, and on other wool and hair which have been advanced in any manner or by any process of manufacture beyond the washed or scoured condition, not specially provided for in this section, 5 per cent ad valorem.

Mr. WARREN. Mr. President, I desire to ask the Senator in charge of this schedule of the bill if he will not allow that paragraph to be passed over for the present? I have at my office some figures which I wish to present a little later in the

Mr. STONE. Very well; let the paragraph be passed over. The VICE PRESIDENT. The paragraph will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 296, page 87, line 21, before the words "per cent," to strike out "20" and insert "15," so as to make the paragraph read:

296. Yarns made wholly or in chief value of wool, 15 per cent ad valorem.

The VICE PRESIDENT. The question is on the committee

The amendment was agreed to.

Mr. SHEPPARD. Mr. President, on yesterday during the debate it was intimated that an alleged flood of foreign goods came into this country after the enactment of the Wilson tariff law. One would think that the lowering of the tariff rate by that law led to a great increase in importations. I wish to call attention to the exact figures. .

Under the McKinley tariff law, which was enacted in 1890, the largest amount of importations free of duty was in 1892, and their total amount was \$458,000,000 in round numbers. At no time during the operation of the Wilson tariff law did the

imports free of duty reach that amount.

Mr. WARREN. Does the Senator from Texas mean \$458,000,000 or 458,000,000 pounds?

Mr. SHEPPARD. The value of the goods imported free of

duty in 1892 under the McKinley law was \$458,000,000 in round numbers

Mr. WARREN. The Senator means of all imports?

Mr. SHEPPARD. Yes; of all imports admitted free of duty.

I will give the imports subject to duty in a moment.

The highest value of imports free of duty was reached in 1892 under the McKinley law and was \$458,000,000, in round numbers. The amounts free of duty under the Wilson law were as follows, in round numbers: In 1894, \$378,000,000; in 1895, \$376,000,000; in 1896, \$368,000,000; and in 1897, \$381,000,000. The amount of dutiable imports under the McKinley law

reached the highest value in 1891, and that value was \$466,000,-000, in round numbers. At no time during the operation of the Wilson law did the imports of goods subject to duty reach that amount or anything like it.

The amount of imports subject to duty under the Wilson law were, in round numbers, in 1894, \$257,000,000; in 1895, \$354,000,000; in 1896, \$390,000,000; and in 1897, \$407,000,000.

I think these figures will speak for themselves.

Mr. WARREN. Mr. President, my attention was called away when paragraph 296, the short paragraph, was read, and I think that ought to go over with the paragraph relative to yarns

Mr. STONE. Mr. President, the Senator from Wyoming asks that paragraph 296 be passed over with the preceding paragraph. I understand he wishes that paragraph passed over only

Mr. WARREN. Only temporarily, so far as I am concerned. I want to make a very few remarks, and I have some figures that are at my office which I should like to give a little later in the day

Mr. STONE. As I understand the Senator, it will not delay

us in going on with the rest of the schedule?

Mr. WARREN. I am speaking only on my own account. merely wish to delay the consideration of the paragraph a

Mr. SMOOT. Mr. President, I did not understand what object the Senator from Texas [Mr. Sheppard] had in quoting the

figures of importations under the McKinley law.

Mr. SHEPPARD. It was intimated in the Chamber on yesterday that the lower rates of the Wilson law had caused a flood of foreign goods to enter this country; that they had

caused an increase in the importations. Mr. SMOOT. All that was said yesterday, as I remember, was that the Wilson law caused a flood of woolen goods and wastes to come into this country, and that is the absolute truth. More woolen goods and more wool waste entered the United States under the Wilson law than at any former time in our history for the same length of time. The Senator from Texas is quoting the amount of importations of all goods that were upon the free list. Why, Mr. President, under the present law the goods coming into this country free have, I suppose, reached the largest proportion under any law since a tariff bill was first

Mr. SHEPPARD. I also gave the value of goods imported

subject to duty.

Mr. SMOOT. Certainly, Mr. President; and under the present law 51 per cent and a fraction of all the goods imported

into this country come in free.

Mr. SHEPPARD. I understand that, but I say I also gave the value of the goods that came into this country subject to a duty under the Wilson law, and they were smaller in volume than the importations under the McKinley law subject to a duty.

Mr. SMOOT. Certainly, Mr. President; because people at that time did not have the purchasing power that they pre-

wiously had; and not only that—

Mr. SHEPPARD. Did they have it as to woolen goods?

Mr. STONE. Mr. President, I appeal to both Senators to know if they do not think that this debate has at least a very

remote connection with the matter that we now have immediately before the Senate.

Mr. SMOOT. No, Mr. President, it has an immediate connection with it.

Mr. STONE. I think that we ought to go on and make a

little progress. Mr. SMOOT. Another thing I want to say to the Senator from Missouri is that I do not think that he ought to be impatient, because I have said very little upon this schedule so far. The Senator from Texas made a statement to refute a

statement made yesterday, and that statement—
Mr. STONE. I admit that the Senator from Texas has started the ball rolling, but I hope the Senator from Utah will

not keep pushing it along.

Mr. JAMES. Mr. President, in view of the fact that the Senator from Utah has made but three speeches of three hours each on this matter, I think he ought to be permitted to proceed.

Mr. SMOOT. I am very thankful to the Senator from Ken-

tucky for suggesting such a thing. Mr. SHEPPARD. Mr. President

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Texas?

Mr. SMOOT. I do.

Mr. SHEPPARD. I want to say that I am not disturbed in the slightest by the statement of the Senator from Missouri [Mr. Stone] to the effect that Senators are trying to take up time. I have taken up less time than almost any other Senator; and if I have anything to say, I propose to say it, regardless of any insinuations that may be offered here. I had a contribution which I thought was worthy of being made in this debate, and so I made it, as I propose to make any other, if I think it worthy. It is a matter of indifference to me what Senators may think about it.

Mr. SMOOT. All I want to do is to keep the record straight, and I would have been through long, long before this time if the Senator from Missouri [Mr. Stone] had not interrupted.

I simply desire to say, Mr. President, that the statement made

yesterday was that under the Wilson law there was a flood of importations into this country of wastes and of woolen goods;

and I say that that is absolutely the truth and that the figures of the Treasury Department will so prove.

Mr. HUGHES. Mr. President, does the Senator claim that the Senator from Pennsylvania [Mr. Penbose] did not on yesterday give the impression that under the operation of Wilson law there was a general paralysis of industries in this country, and that practically all the manufacturing business of this country was turned over to foreign manufacturers? Did he not make a direct statement of that character in the course of his speech?

Mr. SMOOT. I do not know whether it was a direct statement, but I assume that that is what he said and what he meant; and so far as the woolen business is concerned it is true. Mr. HUGHES. In the absence of the Senator from Pennsyl-

vania I do not like to attempt to quote him. I can only say Mr. SMOOT. I think he was referring particularly to the woolen industry.

Mr. HUGHES. The impression made upon me was that he was referring to the condition of every industry in this country

Mr. SMOOT. Mr. President, he was speaking on the woolen schedule; he was referring to woolen goods; and he spoke of the woolen business. The Senator must remember that several Senators referred to the immense increase in the importation of wastes and woolen goods during the 3 years and 8 months of the operation of the Wilson law over any period in the history of the United States. The importation of such goods during the 3 years and 8 months of the operation of the Wilson law was nearly twenty times more than for the 13 years since that time.

Mr. SHEPPARD. Was that due to the smaller purchasing power of the people and to panicky conditions?

Mr. SMOOT. No matter how hard times may be, people must have clothing; the law compels them to wear clothes; and, of course, if all of our clothing manufactures are virtually paralyzed the people have to get goods from some other part of the world.

Mr. SHEPPARD. But when I showed that all importations subject to duty came in under the Wilson law in less amount than under the McKinley law the Senator says it was due to the fact that the purchasing power of the people had been diminished. If the purchasing power was diminished as to all other goods, why was it not diminished also as to woolen goods? It makes no difference whether or not the statement of the Senator from Pennsylvania was true as to woolen goods, the fact remains that the enactment of the Wilson law did not on the whole cause a great increase of importations and a flood of foreign

goods into this country.

Mr. SMOOT. If the Senator would only study this question and find out what the American production was during those years, what the foreign importations were, and add them together, he would find that the purchasing power of the people was restricted.

Mr. SHEPPARD. Why did they buy so much more woolen

goods, then?

Mr. SMOOT. They did not buy more woolen goods.

Mr. SHEPPARD. The Senator has just said that they

Mr. SMOOT. Oh, they bought more foreign woolen goods, but they did not buy nearly as many American-made goods. The production in this country fell off immensely.

Mr. SHEPPARD. Where are your figures?

Mr. SMOOT. I can give them to the very pound, if the Senator desires.

I rose simply to correct a statement made here in relation to the woolen-goods industry in this country, and I shall let it rest at that.

The VICE PRESIDENT. Does the Chair understand that by agreement concurrence in the committee amendment to paragraph 296 is to be set aside?

Mr. JAMES. I understood the Senator from Wyoming [Mr.

WARREN] to request that the paragraph be passed over.

The VICE PRESIDENT. The paragraph goes over; but the Chair wants to have the record straight, and desires to know

whether, by agreement, concurrence in the committee amendment to that paragraph is to be set aside?

Mr. THOMAS. I will inquire of the Senator from Wyoming

what is his understanding?

Mr. WARREN. Mr. President, there need not be any mis-nderstanding. Paragraph 296 depends very much on the understanding. paragraph which precedes it. If any change should be made in paragraph 295, it would involve a change in paragraph 296. Of course, I may say that Senators on the other side ought not to get frightened, fearing immediate changes. I myself am not fearing that any change will be made; but I should like to submit some reasons why there should, in justice, be a change.

Mr. THOMAS. Perhaps the Senator did not understand the

inquiry of the Chair. We are not frightened at all up to this

time.

Mr. WARREN. I was not certain that the amendment had

been adopted, my attention being diverted at the time,
Mr. THOMAS. We are quite willing that the paragraph shall go over as though the amendment had not been acted upon at all.

Mr. WARREN. I understood that the two paragraphs were

to be passed over for the present, to be taken up later.

The VICE PRESIDENT. But the inquiry of the Chair is as to whether the paragraphs being passed over concurrence in the committee amendment in paragraph 296 is to be set aside, or whether the action on that amendment is to stand and then the paragraph go over?

Mr. WARREN. The paragraph ought to go over, but I do not care to make any motion to reconsider the amendment, although much depends on the preceding paragraph. I think the Senator from Missouri understood that they were both to lie over together. When we return to them, they can be taken up

in whatever condition they may then be in.

Mr. STONE. I understood the Senator to say that his attention was diverted when the committee amendment in paragraph 296 was agreed to, without debate or any suggestion in regard to it, and he immediately stated that he would like to have paragraph 296 passed over, along with the preceding paragraph, and that both should be taken up together. I will state that I have no objection.

The VICE PRESIDENT. Then, the Chair understands that the paragraph goes over as though the amendment were not

agreed to?

Mr. STONE.

Mr. STONE. Oh, well, it is immaterial.
Mr. WARREN. It does not make any difference either way.
The reading of the bill was resumed.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 297, page 87, line 26, after the words "ad valorem," to insert "cloths if made in chief value of cattle hair or horse hair, not specially provided for in this section, 25 per cent ad valorem; stockings, hose and half hose, made on knitting machines or frames, composed wholly or in chief value of wool, not specially provided for in this section, 20 per cent ad valorem; stockings, hose and half hose, selvedged, fashioned, narrowed, or shaped wholly or in part by knitting machines or frames, or knit by hand, including such as are commercially known as seamless stockings, hose and half hose, and clocked known as seamless stockings, hose and half hose, and clocked

stockings, hose and half hose, all of the above, composed wholly or in chief value of wool, if valued at not more than \$1.20 per dozen pairs, 30 per cent ad valorem; if valued at more than \$1.20 per dozen pairs, 50 per cent ad valorem; press cloth composed of camel's hair, 10 per cent ad valorem," so as to make the paragraph read:

the paragraph read:

297. Cloths, knit fabrics, felts not woven, and all manufactures of every description made, by any process, wholly or in chief value of wool, not specially provided for in this section, 35 per cent ad valorem; cloths if made in chief value of cattle hair or horse hair, not specially provided for in this section, 25 per cent ad valorem; stockings, hose and half hose, made on knitting machines or frames, composed wholly or in chief value of wool, not specially provided for in this section, 20 per cent ad valorem; stockings, hose and half hose, selvedged, fashloned, narrowed, or shaped wholly or in part by knitting machines or frames, or knit by hand, including such as are commercially known as seamless stockings, hose and half hose, and clocked stockings, hose and half hose, all of the above, composed wholly or in chief value of wool if valued at not more than \$1.20 per dozen pairs, 30 per cent ad valorem; if valued at more than \$1.20 per dozen pairs, 50 per cent ad valorem; press cloth composed of camel's hair, 10 per cent ad valorem.

Mr. LODGE, Mr. President, I wish to call attention to the

Mr. LODGE. Mr. President, I wish to call attention to the fact that in the case of a particular kind of cloth called casket cloth, owing to the way it is made up abroad, the effect of the use of the words "wholly or in chief value of wool" will be to throw it into the cotton schedule with 15 per cent duty.

I shall not undertake to argue the case at any length, but I

desire to print a statement that relates to it.

The VICE PRESIDENT. In the absence of objection, that order will be made.

The matter referred to is as follows:

NEPONSET WOOLEN MILLS, Canton Junction, Mass., May 29, 1913.

Senator Henry Cabor Lodge,

Washington, D. C.

Dear Sir: I own a woolen mill at Canton Junction, Mass., making cloth (sometimes called "faced unions") for covering caskets and coffins.

I have just discovered that I shall be put out of business on account

offins.

I have just discovered that I shall be put out of business on account of the wording of the new tariff bill in Schedule K, paragraph 279, "Cloths, knit fabrics, felts not woven, and all manufactures of every description made, by any process, wholly or in chief value of wool not especially provided for in this section, 35 per cent ad valorem." The particular phrase in this paragraph is, "wholly or in chief value of wool." These words throw 70 per cent of my production into Schedule I, paragraph 257. This leaves a protection of 12½ per cent on account of being a dyed fabric—total protection, 15 per cent.

Our particular fabric—known under the name of casket cloth—can not be used for any purpose other than the covering of coffins, the machinery to produce it being brought over from England, the duty for it being a dyed fabric—total protection, 15 per cent.

The cloth is made with a cotton warp and a low woolen yarn for filling, the latter having a varying percentage of cotton waste. It is also necessary to add a proportion of new cotton to help the spinning.

also necessary to add a proportion of new cotton to neip the spin ning.

The cost of labor is very high, owing to the great amount of work essential to obtain a finished appearance equal to the highest grade of imported broadcloths. The foreign manufacturers are past masters at this kind of work and get an appearance even better than ours. They are also expert manipulators, and will be able to have the chief value cotton and have their goods passed under the cotton schedule. Most manufacturers are able to push their sales and help out on an increased production, thereby reducing the manufacturing cost. I can not ask people to die and thus increase my sales, and my machinery is not adapted to the manufacture of other lines of cloth, and prices are cut low. I am obliged to sell goods 2 yards wide at 37 cents per yard, and 70 per cent of my business is at this price.

I respectfully ask that, under the special conditions and high cost of production, you will give me the woolen protection, either by changing the paragraph mentioned or by a special clause that will put casket cloths and faced unions into the woolen schedule.

Yours, very truly,

Mr. SMOOT. Mr. President, just a word in connection with

Mr. SMOOT. Mr. President, just a word in connection with that item. What the Senator from Massachusetts has said is well taken. The casket cloths are composed mostly of cotton, mixed with the finest kind of wool and wool waste.

Mr. LODGE.

Low-grade woolen yarns. Yes. The reason of that is that they are not Mr. SMOOT. designed to stand wear, but they have to be highly finished face goods.

Mr. LODGE. They have to be finished like broadcloth.
Mr. SMOOT. Yes. While there is considerable wool in it, it
is mostly on the face. This cloth will fall in the cotton schedule,

as the Senator says.

Mr. LODGE. I will add that it requires special machinery,

which has to be imported.

Mr. SMOOT. They are very highly finished goods, and a great deal of labor is required to face-finish them.

Mr. LODGE. That is true.

I also wish to call attention to the fact that the effect of this amendment, as I understand it, will be to give to the heavy, stockings a measure of protection, but just the reverse in the case of the light stockings. I think the Senator from Connect-

icut [Mr. McLean] has figures which show that.

Mr. McLean. What paragraph is the Senator referring to?

Mr. LODGE. I am speaking now of the amendment in paragraph 297, page 88, dealing with the question of stockings. I

say that I think the Senator has figures there to show that for the heavy stockings some protection is given, but with the same

kind of stockings of light weight the reverse is true.

Mr. McLEAN. I think the same principle applies to hose that applies to knitted underwear. It was my purpose to call the attention of the Committee on Finance to the same lack of logic in the rate on knitted wear in paragraph 300.

Mr. LODGE. Very well; then I will let it go until that

paragraph is reached.

The VICE PRESIDENT. The question is upon agreeing to the amendment proposed by the committee.

The amendment was agreed to.

Mr. STONE. Mr. President, I desire to say at this point that it is probable that a little later an amendment will be offered to this paragraph, following the amendment just agreed to, with a view to covering woolen gloves as woolen hose are covered in this paragraph. That amendment is not proposed now, however. I am merely stating that the probability is that it will be offered.

Mr. SMOOT. That would take them out of paragraph 300, in which they now fall?

Mr. LODGE. Yes.

Mr. McLEAN. The same principle is involved in paragraph

Mr. LODGE. The amendment suggested by the Senator from Missouri would take out the articles for which the Senator from Connecticut has the figures and put them in here, where I suppose they belong, because it is the combination of dozens and weight that makes the difficulty.

Mr. McLEAN. Do I understand from the Senator from Missouri that the committee will consider that the same principle

is involved in paragraph 300?

Mr. STONE. Yes. As I understand, woolen gloves would fall under the 35 per cent duty provided in paragraph 300. they should be classified specially in paragraph 297, with a definite rate applying to them, of course it would take them out of paragraph 300, since they would be specially provided for.

Mr. McLEAN. I simply wish to call the attention of the Senator to the fact that the same principle applies equally to the kuitted underwear, the lighter weights receiving no protection at all under the flat rate of 35 per cent ad valorem.

Mr. STONE. That is another question. I was merely advising the Senate that a particular amendment probably would be proposed. Of course we can take it up when we reach it.

Mr. McLEAN. If the Senator says he will take under con-

sideration all the products involved in that section, I have nothing more to say. Otherwise, I should like to call the attention of the committee to the matter.

Mr. STONE. I do not know what the Senator means by taking them under consideration. The committee has had them under consideration.

Mr. McLEAN. I will explain to the Senator what I mean.

Perhaps I may as well do it now as later.

Mr. STONE. Does the Senator wish to address himself now to paragraph 300?

Mr. McLEAN. Paragraph 300; yes.
Mr. STONE. Why not wait until we get to it?
Mr. McLEAN. Very well.

The next amendment of the Committee on Finance was, in paragraph 298, page 88, line 16, after the word "Blankets," to insert "not specially provided for in this section," so as to read: 298. Blankets not specially provided for in this section, and flannels, composed wholly or in chief value of wool, 25 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 298, page 88, line 18, after the words "ad valorem," to strike out "flannels composed

wholly or in chief value of wool, valued at above 50 cents per pound, 35 per cent ad valorem."

Mr. LIPPITT. Mr. President, I should like to ask the Senator in charge of this part of the bill the reason for striking out the end of that paragraph, which, in effect, gives flannels valued at over 50 cents per pound 25 per cent duty, whereas similar woolen goods are given 35 per cent duty. In the very next paragraph women's and children's dress goods are given a duty of 35 per cent and woolen cloths generally are given a duty of 35 per cent.

Many of these flannels costing over 50 cents a pound are exactly similar to the women's dress goods, except that they have been napped a little; and in many cases the napping is so slight that it is almost impossible to determine whether the piece of goods is a flannel or otherwise. It seems to me, with-out meaning to question in any way the thoroughness of the committee's research, that they scarcely could have been thoroughly posted in all the great variety of fabrics that will be

affected by this change, and that will be put upon an entirely different footing from other similar goods.

I have here a number of samples that are very interesting as illustrating that point; and I really should like to know just what the committee had in mind when they made the change.

Mr. STONE. The committee had this in mind: Flannels are in universal use as articles of comfort and necessity, and because they are articles necessary to comfort we felt that a duty of 25 per cent ad valorem was a sufficient duty to be levied upon them. We have put on the free list blankets valued at less than 40 cents a pound, and we felt that as a revenue duty this was sufficient.

I have not considered the matter at all from a protective point of view as far as I am concerned. So far as my poor labor goes, I have not been engaged in making a protective tariff, but a revenue tariff, as I understand. But even from the protective standpoint, I should say that the duty left here is adequate.

Mr. LIPPITT. The Senator in his remarks speaks of these goods as though they partook of the nature of blankets. I think if he will glance even for a second at the fabrics I have here

Mr. STONE. Mr. President, I will say to the Senator that I suppose we did not have those exact samples before us, but we had numerous samples of like kind.

Mr. LIPPITT. Certainly the Senator does not think there is any relation between a blanket and that very delicate and fine

piece of dress goods [exhibiting sample]. Mr. STONE. Oh, I do not think blankets are made of that flannel; but I think those flannels keep people warm in the winter when they are going about, as blankets keep them warm

in the winter when they are in bed. Mr. LIPPITT. That is entirely true of every piece of cloth in the entire schedule. What I am trying to point out to the Senator is that under this bill whereas he puts on one piece of cloth that keeps people warm, men's wear goods, a duty of 35 per cent, and he puts on another piece of cloth that keeps women warm, women's dress goods, in the very next paragraph, a duty of 35 per cent, in the case of all these exactly similar pieces of goods, which, if they had not happened to be put through a napping machine for the purpose of giving them a rough face, would also pay a duty of 35 per cent, because that additional labor has been put upon them, he puts a duty of only 25 per cent upon them, and gives as a reason that the revenue is not needed; but he does not say why if it is not needed in one case it is needed in the other exactly comparative Now he speaks about these things as though they were case. blankets.

Mr. STONE. No; I did not. The Senator is too much ac-

customed to saying offensive things of that kind.

Mr. LIPPITT. Mr. President, the Senator from Missouri is not entirely free from the charge of saying offensive things. I have a very distinct recollection of a case very recently when he went out of his way to say them. I wish to say that if stating the facts hurts the Senator's sensitive feelings, I can not I should think he would be sensitive.

Mr. STONE. The Senator always provokes the retorts to which he now objects. If he would behave himself, perhaps he would not have so much occasion to be chastised.

Mr. LIPPITT. I will not go into the relative habits of the

Senator from Missouri and myself.

We were discussing the question of whether the Senator did or did not use an expression from which it could be fairly inferred that he had blankets in mind. I may have misunderstood him. I can only say that that was the inference which I drew from it.

Of course, I know the Senator has at his back the votes necessary to make this change, but I felt that I could not let the matter go by without pointing out the relative injustice of I am not talking about whether he is making a protective tariff or what kind of a tariff it is; but at all events, whatever principle it is made upon, it ought to be a consistent tariff. What I have particularly in mind, which I think is perfectly evident to anybody who will examine these fabrics, is that, so far as that particular amendment goes, it is not consistent.

Mr. STONE. Mr. President, let us have a vote. Mr. SIMMONS. Mr. President, I wish to say that, in my judgment, it is absolutely consistent. Of course, if we were making a tariff for protection, then the rule of consistency would be different from the rule of consistency when you are making a tariff for revenue on the one hand, and on the other hand, a tariff to relieve the people from unnecessary burdens upon the essential things of life.

Mr. President, there are no two articles manufactured in this country that are so essential to the comfort and the health of people as blankets and flannels. The Senator has very well said the blanket is to keep people warm at night. There is absolutely no substitute for it. The flannel is essential to keep people warm during the day. In making this tariff we considered that fact.

It was not necessary that we should make the tariff upon blankets and fiannels identical with the tariff upon ready-made clothing. There is nothing in the theory of a tariff for revenue which requires that sort of consistency. We considered in the question of consistency the question of revenue and the question of the necessity of the people.

If you consider it from the standpoint of consistency, applying the protection theory, I notice here that the average ad valorem duty imposed by the present law upon ready-made clothing is somewhat higher than that imposed upon blankets,

I discover that in 1910 the average was 81.33 per cent on ready-made clothing and in 1912 79.56 per cent on ready-made clothing, while the tariff upon blankets in 1912 was only 72.69

er cent. But that, I say, is unimportant from our standpoint. If the Senator will look at the revenue derived from these two articles under the present law he will see another reason why we saw fit to make a heavier reduction in the duty on blankets than in the duty on ready-made clothing. As I said, they are very nearly the same under the present law, though a little higher, about 7 points higher, on ready-made clothing than on blankets. If the Senator will examine the bracket under the head of blankets he will discover that last year under the present rate of duty there was imported into this country only \$52,000 worth of blankets, and the revenue received by the Government was only \$37,000. It was a prohibitive duty in effect. He will discover in the next bracket, under the head of flannels, that the amount of importations last year was only \$128,000 worth, and the Government realized only \$120,000 in revenue. If he will examine the bracket with reference to ready-made clothing, however, he will discover that last year under the duties now imposed the importations amounted to \$2,191,000 and the revenue received was \$1,742,000.

Therefore, from the revenue standpoint, we did not see the same necessity for a heavy cut in the duty on clothing that we saw in the duty on blankets, because the one was prohibitive and the other was not; the one yielded considerable revenue and the other practically none. We have so adjusted these duties that they will in our judgment produce revenue to the Government, as well as give the people of this country two of the prime necessaries of health, comfort, and happiness at a cheaper rate.

Mr. LIPPITT. I am very glad to know the reasons why in the Senator's mind the duty was changed upon blankets. But the Senator perhaps misunderstands the situation I have presented. I have not said a single word about the duty upon blankets

Mr. SIMMONS. I spoke of blankets and flannels, and I understood the Senator to be speaking about the paragraph on blankets and flannels. They are both in the same paragraph

and at the same rate of duty.

Mr. LIPPITT. What I have been trying to call to the Senator's attention was that a large number of the flaunel fabrics that cost more than 50 cents a pound have no relation. to blankets at all. If my inference from the Senator's remarks was correct that he was speaking of flannels used as underwear. then those fabrics have no relation to flannels of that kind. They are neither blankets for keeping people warm at night nor underwear for keeping them warm in the daytime. They are dress goods, outside garments, exactly the same as are described in the next paragraph as women's and children's dress goods, except that they have been put through a napping machine and have a little different face.

So far as I understand, however, the Senator is not interested in the protective features of the bill and he is discussing it from a revenue standpoint. But if that fabric had not been put through a napping machine it would have been no more nor less apt to be imported than though it had been, and the revenue from it would be a duty of 35 per cent. But when the duty is 35 per cent in one case and 25 per cent in the other, manifestly we will not get the same revenue from the fabric as though it paid the 35 per cent of all its sister fabrics.

I do not care to continue the discussion further. I think I have expressed-

Mr. SIMMONS. Neither do I. Let us have a vote.
Mr. LIPPITT. I think I have explained the situation. I
will say that from the protective standpoint it is one that is of great interest to several of the mills in my section of the country. They do not understand why this one particular fabric that in all the considerations of this bill up to the time it came here have been put upon a parity with other fabrics of the same kind should be singled out in this instance, I felt my-

self that it was due probably to some little misunderstanding of the character of goods that were affected, and I can not say that my mind has been entirely disabused of that idea from the explanations which have been given about it.

Mr. TOWNSEND. Mr. President, if I understood the Senator from North Carolina, he was making a comparison between the item in paragraphs 297 and 298 and 300. He had reference to ready-made clothing. The thing that struck me as inconsistent in the comparison between paragraphs 298 and 299 was in the one case the duty is 25 per cent evidently upon the same kind of cloth.

Mr. SIMMONS. I am speaking of paragraph 300 and paragraph 298. I did not mention paragraph 299. The figures I quoted-

Mr. TOWNSEND. I know the Senator did not, and that is why I thought the Senators were not discussing the same item.

In the one case the duty is 25 per cent and in the other case it is 35 per cent. I am not familiar enough with it to see why there should be that difference on practically the same class of

Mr. SIMMONS. I do not understand the Senator. Does he say the rate in paragraph 299 is different from that in paragraph 300?

Mr. TOWNSEND. No; I am not talking about paragraph 300 at all. I am talking about paragraphs 298 and 299.

Mr. LODGE. As I understand it, the flannels in the portion stricken out by the committee will be made from dress goods in the main.

Mr. LIPPITT. That is the way I understand it. They represent some of the finest and most delicate of the products of the woolen industry.

Mr. LODGE. Exactly; and those dress goods are put at 35 per cent ad valorem, and this particular kind of flannel is put at 25 per cent.

Mr. LIPPITT. This particular kind of dress goods is put at

Mr. SIMMONS. The Senator certainly understands that paragraph 298 has reference only to the material and paragraph 299

to made-up goods. Mr. LIPPITT. Certainly not. Mr. LODGE. Paragraph 299 is not made-up goods.

Mr. LIPPITT. Paragraph 299 applies to these very fabrics, unless they have been napped.

Mr. SIMMONS. I beg pardon.

Mr. LODGE. But the point is that dress goods of a certain kind are put 10 per cent lower than dress goods of another kind. The House had it arranged properly, so far as the classification

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment was, in paragraph 300, page 89, line 6, after the word "wool," to insert "or of wool and india rubber," so as to make the paragraph read:

300. Clothing, ready-made, and articles of wearing apparel of every description, including shawls whether knitted or woven, and knitted articles of every description made up or manufactured wholly or in part, and not specially provided for in this section, composed wholly or in chief value of wool, or of wool and india rubber, 35 per cent ad valorem.

Mr. LODGE. Before the amendment is disposed of I wish to call attention to one item that is included in it under the the term "articles of wearing apparel of every description." Under that clause what are known as wool hats under the previous law have a duty of 44 cents a pound and 69 per cent ad valorem, making an equivalent ad valorem of 82 per cent. That has been cut down from 82 to 35. Under that 82 44 per cent, which was the equivalent, in the year 1912 there were 87,675 pounds imported as against 9.616 pounds in 1907, the importation rising very rapidly under the present duty. work is largely handwork. We have to compete with longer hours abroad, child labor, and also with the difficulty of the short season. This reduction is destructive to this industry, which is carried on by small concerns. There are no large concerns in it. They are all small concerns, and they have had a very hard struggle under the present rate.

I merely desire to call attention to this particular injury, as there are some small factories of that kind in my State, and to ask that a fuller statement, which I hold in my hand, may

be printed with what I have just said in regard to it.

The VICE PRESIDENT. If there be no objection, that will be done.

The matter referred to is as follows:

NEW YORK, May 17, 1913.

Hon. HENRY CABOT LODGE, United States Senate, Washington, D. C.

DEAR SIE: We desire to record our protest against paragraph 300 of Schedule K of the proposed new tariff act—which replaces paragraph

382 of the present schedule—the effect of which is to reduce the tariff duty on wool hats and wool-hat bodies, finished or partly so, from a specific duty of 44 cents a pound and 60 per cent ad valorem to a flat ad valorem duty of 55 per cent.

Under the present tariff, which was equivalent in the fiscal year 1912 to 82.44 per cent ad valorem (Report of Department of Commerce and Labor, No. 15, p. 61), the number of wool hats entered for consumption during the year ending June 30, 1912, more than trebled the number entered for consumption during the previous fiscal year.

The following statement of importations is taken from the reports on commerce and navigation and the Department of Commerce and Labor, showing the following importations of wool hats from 1907 up to and including the fiscal year 1912:

Year.	Pounds.	Cost.
1907	9,616	\$15,900
1998	32,593	51,363
1909	28,923	49,439
1910	19,557	33,305
1911	19,630	47,145
1911	87,675	171,923

The foreign manufacturer, by reason of his cheaper labor, notwithstanding the present duty, is able to compete in this market with the product of our own mills.

The specific duty of 44 cents a pound on the wool hats imported during the fiscal year ending June 30, 1912, was equivalent to 22.44 per cent ad valorem. (Report of Department of Commerce and Labor.)

The free-wool provision of the pending tariff act would offset this equivalent and justify a reduction of the tariff on wool hats to a 60 per cent ad valorem basis, but it is proposed, without any corresponding offset or equivalent, to cut this duty to 35 per cent ad valorem.

The industry can not survive the reduction.

Approximately 41 per cent of the factory cost of the typical wool hat is made up of direct and indirect labor cost. The division of factory costs is approximately as follows:

	GL CGH
Wool	3
Trimmings (band and sweat)	2
Direct labor	2
Indirect labor, including packing, boxing, casing, and other fact	ory
costs	1

It would impose an unreasonable hardship and injustice upon manufacturers to have the tariff law go into immediate effect without an opportunity to dispose of this surplus accumulation and to readjust factory operations to the new tariff conditions.

The wool-hat industry in this country is conducted by individuals, firms, or corporations, none of whom have been formed by consolidation or merger with any other concerns heretofore existing. Such corporations as exist are either family affairs or concerns organized by local subscriptions in towns where they are located. The competition is genuine and keen.

We urge, therefore, that you will use your best efforts to obtain the modification of paragraph 305 to provide for the 50 per cent ad valorem duty, and that in any event in good faith and fair treatment to American manufacturers the time in which the new tariff is to take effect shall allow at least a period of six months for clearances and read-fustment.

fustment. Yours, very truly, EMMONS BROS. Co., M. EMMONS, President.

Mr. McLEAN. Mr. President, the senior Senator from Missouri [Mr. STONE] is absent, and if the chairman of the committee will kindly give me his attention I will endeavor to explain to him what is considered by the knit-goods manufacturers to be a great injustice in this 35 per cent ad valorem duty upon knitted underwear. I have here a comparative statement of the cost in this country and in France and England with regard to knitted underwear. Perhaps I can best explain the point by reading to the Senator a comparison of the cost and the effect of a flat duty with regard to the cost per dozen. In France on, or a nat duty with regard to the cost per dozen. In France on, say, style 100, size 40, weight 4 pounds per dozen, cost \$4 per dozen, the duty would be \$1.40, which would make the total cost of the light-weight underwear \$5.45 abroad. In this country the cost is \$7.24 per dozen. When you come to the heavy weights, taking 11 pounds per dozen, the foreign cost would be \$17.13, the duty \$5.99, making the total cost \$23.12. The American cost is \$20.22. Here you will see that there is an adequate protection. 820.22. Here you will see that there is an adequate protection. But no consideration whatever is paid to the fact that the labor cost in the construction of both the light and heavy weights is practically the same. Consequently the ad valorem flat rate of 35 per cent upon light weight furnishes no protection at all.

I will ask to have this statement put in the RECORD in order that the committee may take notice of it if they desire to do so. The matter referred to is as follows:

Comparative costs under proposed Wilson tariff bill between foreign and American made men's knit underwear manufactured from worsted and worsted merino yarns.

	Style.	Weight, size 40.	For- eign cost.	Duty.	Total cost.	Cost to manu- facture in Amer- ica
French	{ 100 159/57 250/11 400/13	4 pounds	\$4.00 6.30 10.62 17.13	\$1.40 2.20 3.71 5.99	\$5. 40 8. 50 14. 33 23. 12	\$7.24 8.67 13.66 20.22

The above figures as to the present foreign cost on the four garments mentioned were obtained from a large importer of foreign goods and are prices which prevailed in January, 1913. In figuring the cost of these four garments, if made in America under the present cost of labor, the price of wool was figured on a free-wool basis. The above figures show on their face that the proposed Wilson-Underwood bill is not scientific. The lightweight goods could not be made in this country, whereas the heavier goods have a fair protection on them, providing the duty of 35 per cent was actually collected.

Mr. McLEAN. I will not offer an amendment at this time, but unless a change is made I shall offer an amendment when the bill is in the Senate. I want to say to the Senator from North Carolina that I ask it for precisely the same reason that he asked to have the tariff raised on lumber in 1909. He was then, as now, in favor of a tariff for revenue only, and in the debate preceding the fixing of a rate on lumber on April 30, 1909, the Senator from North Carolina used the following language:

The bill under consideration reduces the duty upon rough lumber—that is, sawed board—from \$2 to \$1 per 1,000 feet. The equivalent ad valorem rates are, respectively, about 1 per cent and 5½ per cent.

I am opposed to this reduction and in favor of retaining the present duty upon lumber, because the present rate is upon a revenue basis, and because the proposed reduction will probably not reduce the price of lumber to the farmer and the home builder, or, if at all, only slightly and in a comparatively limited area, while it would work great hardship to the lumber industry and the sections of the country in which this industry is conducted by enlarging the market zone of Canada for this product.

I ask the Committee on Finance to put a reasonable protective duty on these goods, because it is a great industry in my State; in the first place, because of the revenue that the Government would derive by if, and, in the next place, because it will not increase the price of the article to the consumer, as stated by the Senator from North Carolina in his opposition to lowering the rate on lumber; and, thirdly, because reasonable protective duty is placed upon this article it will greatly enlarge the market zone for foreign products.

Mr. SIMMONS. Mr. President, I want to call the attention of the Senator from Connecticut to the fact that under the present law, as is shown by imports entered for consumption for the year ending June 30, 1912, on knit fabrics, not wearing apparel, valued at not more than 40 cents per pound the quantity imported last year was 111 pounds, the value was \$4, and the revenue \$5.79. The rate of duty was 144.75. Of knit fabrics valued at above 40 and not above 70 cents per pound, the quantity imported was 1,007 pounds, valued at \$658. The duties collected amounted to \$772.08, at an ad valorem duty of Valued above 70 cents per pound the impor-117.44 per cent. tations were 7,780 pounds, valued at \$8,428, revenue \$8,058.60; average ad valorem equivalent, 95.62.

Mr. McLEAN. I am aware of those figures.

Mr. SIMMONS. I do not know, Mr. President, what is the difference in the cost of producing this article here and abroad. I have not investigated that. We have not been trying to bal-ance the difference in labor cost here and abroad because we were not trying to make a protective bill. But I imagine that in all the statements we have heard here about the labor cost abroad and the labor cost here are predicated upon the wages paid abroad and the wages paid here. I have made some investigation as to that, and I find that in this country the labor cost of a product does not always depend upon the amount of wages paid, because there is frequently very little relation between the amount of wages per diem per man and the labor cost of a product.

That is true in agriculture and that is true in manufacturing. Farmers paying the same price for labor find at the end of the year that their crops have cost entirely different amounts per unit. One factory paying the same labor cost finds that the labor cost of its product is more than that of another in this And so in Europe the amount of wages paid per diem country. per man does not measure the labor cost of the article.

Mr. McLEAN. If the Senator will pardon me, I do not think

he has my point.

Mr. SIMMONS. I do not desire to enter into any debate. was just saying that as incidental to the statement that we had not considered the labor cost in making up this bill. We have not sought to adjust duties upon that basis.

Mr. McLEAN. If it is the purpose of the Senator to give protection to heavyweight goods and to remove protection from lightweight goods, I have nothing more to say. I was calling

attention to the fact that it stands to reason-

Mr. SIMMONS. Mr. President, where you adopt a tariff system to apply to different weights and the one is more valuable than the other the ad valorem catches it as a rule.

Mr. McLEAN. But the labor cost is practically the same. Mr. SIMMONS. I do not know as to that. I stated to the Senator that I had not made any investigation about the labor cost, and we have not framed this bill upon that basis.

Mr. McLEAN. I think it is safe to assume that the labor cost would be substantially the same in a lightweight garment as in a heavyweight garment, but no consideration at all is taken of added value because of the material. Why not fix it so that it will bear some semblance of justice?

The Senator understands perfectly well Mr. SIMMONS. that if there is an added value to a thing, if it is dutiable ad valorem, then the ad valorem takes up and catches that addi-

Mr. McLEAN. That is precisely the point that I am trying to impress upon the Senator. The rate as fixed—35 per cent—does give adequate protection to the heavier weights. The very fact that the value is added appreciates the effect of the ad valorem duty, and the protection is sufficient.

Mr. SIMMONS. Now, the Senator from Connecticut is talking about protection. He says one gives adequate protection and the other does not give adequate protection. I have stated to the Senator that we were not trying to give protection in the

duties that we impose here.

Mr. McLEAN. If it is the purpose of the committee to expose one product to competition from precisely the same mill and to give to the other protection, I have nothing more to say.

Mr. SIMMONS. Well, Mr. President, our position does not involve that, as explained by me repeatedly this morning.

Mr. McLEAN. That is the effect of this rate. Mr. SIMMONS. I do not care to go into it again.

The Senator from Connecticut has referred to my position upon lumber, and in the very beginning of this debate the Senator from Pennsyvania referred to my position upon lumber. I stated then, and I want to state again, that if the Senator from Connecticut and other Senators will read all I said upon that occasion, they will find that my contention was that under the Payne-Aldrich tariff law heavy protective duties were levied and maintained upon nearly all of the things that enter into the cost of production of lumber-upon the ax and the saw with which the tree is felled, upon the carriage with which the log is hauled, upon the iron and steel rail and the engine of the logging road with which it is transported to the mill, upon the machinery in the mill with which it is sawed into boards, upon the tin and the sheet iron in the drying kilns; and my contention was that these protective duties imposed by the Payne-Aldrich law were a burden and a charge upon the cost of manufacturing lumber, and that the manufacturer of lumber should at least be given a rate that would recoup him for the additional cost upon his product imposed by the high duties upon the things that enter into its production.

That was my contention then, and that is my contention now. I said then, "If you will reduce the duties upon the products that enter into the cost of producing lumber, if you will take the duty of of them than I will not the cost of producing lumber. the duty off of them, then I will vote for free lumber, and do it gladly."

Mr. President, this bill has done practically the very things which I said if done when we were considering the Payne-Aldrich bill I would vote for free lumber. I wish to say again that, in view of that fact, I am going to vote and I have voted for free lumber, and I have done it with a great deal of pleasure.

Mr. BRANDEGEE. Mr. President, I call the attention of the Senator from North Carolina to the fact that the President of the United States, on the 8th day of April, 1913, addressed

Congress and said:

It would be unwise to move toward this end headlong, with reckless haste or with strokes that cut at the very roots of what has grown up amongst us by long process and at our own invitation. It does not alter a thing to upset it and break it and deprive it of a chance to change. It destroys it. We must make changes in our fiscal laws, in our fiscal system, whose object is development, a more free and wholesome development, not revolution or upset or confusion.

Mr. President, it was said repeatedly by the President and by the leaders of his party in the campaign that the intention of

his party, if given power, would be to revise the tariff so as not to injure a single legitimate industry, and that those who were attempting to make the people of this country apprehensive that any legitimate industry which, in the language of the President, had grown up according to our own invitation and under our own laws would be injured was an improper attempt on the part of Republicans to distort and misrepresent his position and

that of his party.

Now, the Senator from North Carolina, the distinguished chairman of the Committee on Finance, stands on the floor of the United States Senate and says that in the make-up of this bill there has been no attempt whatever to even ascertain the difference between the cost of production here and abroad; that there has been no attempt to incorporate a single protective feature in this entire bill; that there has been no attempt to protect any industry that has grown up in this country for the last 40 years under the invitation provided by the laws of the country, the acts of Congress; and that instead of abiding by what the President said in his solemn message to this Congress within four months, of not proceeding to destroy anything, but to make the changes in the fiscal policy of this Government gradual, so that things might be developed and not be upset and reduced to confusion, they boldly state that their intention is to destroy at one swoop the entire system of protection.

If the Democratic Party can consistently claim that this is a wise, discreet, and conservative policy, intended simply to readjust inconsistencies in the existing law, so as not to injure a single legitimate industry, they can turn a more complete somersault than any political party has even succeeded in doing in

this country and still retain power.

Mr. THOMAS. And land on their feet. Mr. SIMMONS. Mr. President, I have stated that we were not making a protective bill. I had not supposed the Senators on the other side thought we were making a protective bill. had supposed that they had been assailing this bill on the ground that it was not a protective measure. To say that we have not considered the conditions of an industry would be to say what is not true with reference to the bill. We have considered the conditions of industry, but we have not considered

these conditions with the view of making a protective measure on the basis of cost of production.

Mr. President, so far as the President of the United States is concerned, he does not need any defense from me or from any other Senator on this side of the Chamber. There has never been a President of these United States, with the possible exception of one, that the people of this country were so strongly behind as the present Chief Executive of this Nation.

There has never been a man in the White House who enjoyed more fully and more completely the confidence of the people of this country with respect to his ability, to his patriotism, and

to his honesty of purpose.

The President of the United States has on various and sundry occasions stated his position with reference to tariff legislation and has made himself perfectly clear. He has not apologized; he has not modified nor retracted anything he has stated. The President of the United States regards, as I happen to know, the bill now pending before the Senate as a fair, just, and full interpretation and expression of his position with reference to the tariff. That being so, Mr. President, I am content; and I am satisfied that Senators on the other side will not be able to show that the President has been at any point inconsistent.

Mr. BRANDEGEE, Mr. President, I did not say that the committee or any member thereof had said that they had not considered the industries of this country in the make-up of this bill. So the Senator has set up a man of straw and valiantly conquered him, more or less irrelevantly, in my opinion. I did say was that I understood the Senator to say, not only to-day but upon a previous occasion, that in the make-up of this bill the majority had not given any consideration whatever to the difference in the cost of production of a commodity in this country and abroad; that their intention was not to equalize the cost of production between an article made in this country and one made abroad nor to equalize the wages paid . to labor, but that their contention-

Mr. SIMMONS. The result would be a protection bill if we

tried to do that.

Mr. BRANDEGEE. Exactly; I have not misunderstood the Senator; he boldly reaffirms what I have stated he said, and which he did not deny. He says that he has made no attempt to make this a protective bill in any respect.

I have not criticized the President of the United States. Senator has pronounced a glowing panegyric upon the President of the United States. I will, however, say, now that the Senator has called attention to the matter, that if the President of the United States approves this bill after what he said in his

message to this Congress on the 8th day of April the President of the United States has turned just as complete a somersault as have the members of his party; but I have no doubt that, with his usually successful and compulsory seductiveness, he will have the entire majority, both in this branch and in the other, trailing submissively in his rear, and that they will be pleased upon this, as upon all other occasions, to give each other complete absolution and to pass bouquets and various flowers to each other until, finally, after the people have had one more chance to express their opinion upon this concoction of absurdities and inconsistencies, there will be placed a little wreath of lilies of the valley upon the corpse which will be interred three years from now. [Laughter.]
Mr. SIMMONS. Mr. President, I only wish to say, in reply

to the Senator, that not only the President, in my judgment, approves this bill as a fair interpretation of his position and of the Democratic position, but I think when the Senator from Connecticut lays up to his soul the unction that this bill is not satisfactory to the people of this country and that they will at some early day, as soon as they have an opportunity, express their disapproval and condemnation of it, the Senator is exceed-

ingly blind to the actual situation in the country.

I am myself as thoroughly convinced that the people of this country are to-day more strongly behind this bill and that, taking them as a whole, it comes nearer giving general satisfaction to the people of this country than any other tariff bill that has ever been framed or presented to a Congress by any party since the foundation of the Government, with the exception of the Walker tariff bill.

Mr. BRANDEGEE. Before it has taken effect.

Mr. SIMMONS. Yes; Senators on the other side of the Chamber said early in the beginning of this discussion that we were going to have a panic as the result of this bill. That was following upon the heels of the argument that has been made for nearly a quarter of a century that we had a panic in 1893 because of the anticipated passage of a Democratic tariff bill that did not become a law until a year after the panic began, and Senators have said that we were to have a repetition of that condition this year, and they have been waiting from day to day ever since this bill was introduced into the House of Representatives, with the solid backing of the Democratic membership of that body behind it, for business disturbance and then a panic. From day to day they have predicted that it would come, while every day the conditions in the country have grown better and better, until to-day, with only a few weeks before this tariff bill goes into effect, there is a condition of prosperity in this country that we have not witnessed in any time in recent There is not a cloud upon the horizon; there is not a responsible business man not interested in the tariff and trying to bring about some increase in duty who does not agree that the country, notwithstanding this bill is about to go into effect, is upon a sound and safe industrial, commercial, financial, and economic basis.

If we had a panic one year before the Wilson bill was passed in anticipation of it, then I want to ask Senators, if this bill is going to produce a panic, why has that panic been so long delayed, and how do they explain the fact we are now after months of discussion about to enter upon a new tariff system with no sign of panic, greatly to the disappointment and

chagrin of some Senators on the other side of this Chamber?

Mr. BRANDEGEE. Mr. President, the Senator need not, because we are considering Schedule K, go "woolgathering" in any such manner as he has been doing in the last few moments. I never have said to the Senate or to anybody else that we were going to have a panic as the result of the passage of this bill.

Mr. McLEAN. I plead not guilty.
Mr. BRANDEGEE. I do think that the glowing conditions of prosperity which the Senator has so ably and truthfully pictured as having existed when the people made the mistake of putting him and his friends into power last November, and which, as the Senator has now borne testimony, exists right down to this minute-I think that that is the greatest tribute to the wisdom and the excellence of the laws under which the country has lived under the administration of the Republican Party

Mr. SIMMONS. Will the Senator let me add, and it is conclusive evidence that the people have no fear of this bill?

Mr. BRANDEGEE. Mr. President, the Senator states that no panic has been produced, although this bill impends over the prosperity of the country like a cloud. The Senator and his friends have been saying for weeks that "the interests" were in a conspiracy to produce a panic for the purpose of discrediting this bill.

Of course it was absurd, as a great many of their statements are absurd, about the intention of the interests to pull down the temple about their own ears. Instead of trying to produce a panic, everybody is talking as cheerfully as he can for the purpanic, everypody is taiking as cheerfully as he can for the purpose of warding off as much as possible of the baleful consequences that are bound to come upon the country. The people who have their notes in the bank to pay for their stocks of goods are trying to prevent any panic which would result in calling their loans. Everybody who is stocked up with goods is trying to whistle as he passes through the umbrageous shade of this impending horror, and to cheer himself up, so that at least he will gain time enough to work off upon the public a portion of the product which he has manufactured with the savings of his business before the floodgates and the bonded warehouses are opened and foreign goods made by cheap labor are dumped upon him in competition in the market where he has produced his goods at higher prices, better wages, and upon American standards of living.

I do not want any panic, and my party does not want any panic. We have not provided any panic at all. The country is prosperous to-day. I congratulate the Senate and the country upon the fact that we have the testimony of the chairman of the Committee on Finance embalmed in the Congressional RECORD, so that if this bill, when put into operation, does not produce conditions which the country will say are an improve-ment upon existing conditions—which, from the Senator's statements, I should judge were about as good as we had a right to anticipate—the people of the country can then turn back to the words the Senator has to-day uttered and contrast their condition then with their condition now as testified to upon the highest Democratic authority and see how much they owe to the Democratic Party and whether it has justified the tem-porary lease of minority power which has been accidentally

conferred upon it. Mr. SMOOT. Mr. President, the picture just painted by the Senator from North Carolina of the wonderful prosperity that is to follow the enactment of this bill into law reminded me of what took place when the Wilson bill was under consideration. I wish to call his attention to the remarks made by Hon. William M. Springer in the House of Representatives when that bill was before that body. This was the prophecy then

made:

Pass this bill and thousands of feet heretofore bare and thousands of limbs heretofore naked or covered with rags will be clothed in suitable garments; and the condition of all the people will be improved. It will give employment to 50,000 more operatives in woolen mills; it will increase the demand for wool, and prices will increase; and with increased demand for labor, wages will increase. Those who favor its passage may be assured that they have done something to promote the general weal, something—

To scatter plenty o'er a smiling land.

That is almost as pretty a picture as the Senator from North Carolina painted this morning as to what we may expect in the way of prosperity in this country upon the passage of the pending bill.
Mr. JAMES.

Mr. President, the Senator from Connecticut makes a very dire prophecy about the future of the Democratic Party. He proceeded to bury us in three years, I believe, and he was kind enough to put some lilies of the valley upon our

graves.

The Senator having attended such a sad and disastrous political funeral last November, his mind naturally turns to graves and to flowers and to funerals. But I wish to say to the Senator that if the Democratic Party does suffer the misfortune of going to the graveyard of which he has spoken, we shall at least be buried in States larger than Vermont and Utah.

I take with a grain of salt all of this assault upon the Democratic Party about a failure to keep its promise to the people and about a betrayal of the people when it comes from one who was himself guilty, with his party, of the greatest betrayal known to the history of American politics; that of the passage of the Payne-Aldrich bill; a betrayal so great that it destroyed his party and left it with two little States as the only evidences that it ever did exist.

Of course the Senator does not want any panic. Of course all these utterances made by the distinguished Senators who have just spoken and by other Senators upon that side, telling us of failures and of lockouts, are for the purpose only of helping the prosperity of the American people. But the Senator will find out that when this bill is passed the country will continue to enjoy even greater prosperity than it now enjoys and that the party to which he belongs can be buried in a State even smaller than Utah at the next presidential election. The Democratic Party is keeping the faith and fulfilling its platform promises upon which we triumphed, and we shall appeal without fear and in full confidence to the American people upon our record here; and that appeal, in my judgment, will find triumphant vindication and approval at their hands.

Mr. BRANDEGEE. Mr. President, I think the Senator from Kentucky has exceeded even the iridescent dream read by the Senator from Utah as dreamed by the Hon. Mr. Springer on a

previous occasion.

Mr. BORAH. Mr. President, I simply rise to say that I do not know what started this filibuster, but I am not in sympathy

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in

the chair). What is the pleasure of the Senate?

Mr. STONE. Let us proceed with the reading of the bill.

The PRESIDING OFFICER. The question is on the committee amendment in line 6, which has already been read.

The amendment was agreed to.

The reading of the bill was resumed, and the Secretary read paragraph 301, on page 89, as follows:

301. Webbings, suspenders, braces, bandings, beltings, bindings, cords, cords and tassels, and ribbons; any of the foregoing made of wool or of which wool or wool and india rubber are the component materials of chief value, 35 per cent ad valorem.

Mr. STONE. Mr. President, I offer an amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated. The Secretary. In paragraph 301, page 89, line 8, before the word "beltings," it is proposed to insert the word "belts"; also, in line 11, after the word "value," it is proposed to insert "and not specially provided for in this section," so as to make the paragraph read:

301. Webbings, suspenders, braces, bandings, belts, beltings, bindings, cords, cords and tassels, and ribbons; any of the foregoing made of wool or of which wool or wool and india rubber are the component materials of chief value, and not specially provided for in this section, 35 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 302, page 89, line 15, after the word "description," to insert "not specially provided for in this section," so as to make the paragraph read:

302. Aubusson, Arminster, moquette, and chenille carpets, figured or plain, and all carpets or carpeting of like character or description, not specially provided for in this section, 35 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed, and the Secretary read to the end of paragraph 309, on page 90.

Mr. STONE. Mr. President, I offer an amendment to para-

graph 309 in the nature of a substitute.

The PRESIDING OFFICER. The amendment will be stated. The Secretary. It is proposed to strike out all of paragraph 309, as printed in the bill, and to insert:

309. Oriental, Berlin, Aubusson, Axminster, and similar rugs, and carpets of every description woven whole for rooms, the value of which exceeds 30 cents per square foot, 50 per cent ad valorem; when valued at 30 cents per square foot and under the same duty shall be assessed as that which applies to the same or similar grades of carpets, plus 5 per cent ad valorem.

Mr. WARREN. Mr. President, may I ask the Senator in brief what is the effect of the proposed amendment? Does it raise the

Mr. STONE. It lowers it. The general effect is to lower the To answer the Senator more specifically, it leaves the duty as it appears in the text of the bill.

Mr. WARREN. Does it raise the duty as to any of the

grades included under it?

Mr. STONE. I was going to say that on whole-woven carpets valued at more than 30 cents per square foot the duty is left at 50 per cent ad valorem, just as in the printed paragraph. On like carpets valued at less than 30 cents per square foot the duty is reduced.

The PRESIDING OFFICER. The question is on the amend-

ment offered by the Senator from Missouri.

The amendment was agreed to.
The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 311, page 90, line 13, after the word "wool," to strike out "flax," and in line 14, after the words "part of," to strike out "any" and insert "either," so as to make the paragraph read:

311. Carpets and carpeting of wool or cotton, or composed in part of either of them, not specially provided for in this section, and on mats, matting, and rugs of cotton, 20 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 312, page 90, line 19, first two paragraphs of this schedule if the Sena before the word "wholly," to strike out "made" and insert ming [Mr. Warren] is prepared to take them up.

"composed," and in the same line, after the word "in," to strike out "part" and insert "chief value," so as to make the paragraph read:

312. Mats, rugs for floors, screens, covers, hassocks, bed sides, art squares, and other portions of carpets or carpeting, composed wholly or in chief value of wool, and not specially provided for in this section, shall be subjected to the rate of duty herein imposed on carpets or carpeting of like character or description.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 91, to strike out paragraph 314, in the following words:

314. Hair of the Angora goat, alpaca, and other like animals, and all hair on the skin of such animals, 20 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 315, page 91, line 7, after the word "animals," to strike out "25" and insert "5," so as to make the paragraph read:

315. Tops made, from the hair of the Angora-goat, alpaca, and other like animals, 5 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 316, page 91, line 9, after the word "animals," to strike out "30" and insert "15," so as to make the paragraph read:

316. Yarns made of the hair of the Angora goat, alpaca, and other like animals, 15 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 317, page 91, line 12, before the words "per cent," to strike out "40" and insert "35," so as to make the paragraph read:

317. Cloth and all manufactures of every description made of the hair of the Angora goat, alpaca, and other like animals, not specially provided for in this section, 35 per cent ad valorem.

The amendment was agreed to.

Mr. THOMAS. On behalf of the committee I offer an amendment to paragraph 317, which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The PRESIDING OFFICER. The amendment will be stated. The Secretary. On page 91, line 10, after the word "made," it is proposed to insert "by any process, wholly or in chief

value.'

The amendment was agreed to.

The next amendment was agreed to.

The next amendment was, in paragraph 318, page 91, line 16, after the word "surface," to insert "and woven figured upholstery goods"; in line 17, before the words "of the," to strike out "partly" and insert "in chief value of wool or"; in line 18, after the word "alpaca," to strike out "and " and "partly" and insert "or". insert "or"; and in line 19, after the word "velvets," to strike out "50" and insert "40," so as to make the paragraph read:

318. Plushes, velvets, and all other pile fabrics, cut or uncut, woven or knit, whether or not the pile covers the entire surface, and woven figured upholstery goods, made wholly or in chief value of wool or of the hair of the Angora goat, alpaca, or other like animals, and articles made wholly or in chief value of such plushes or velvets, 40 per cent ad valorem

The amendment was agreed to.

The next amendment of the committee was, on page 91, after line 20, to insert a new paragraph, as follows:

3181. The provisions of this schedule (K) shall be effective on and after the 1st day of January, 1914.

Mr. SMOOT. I have heard it stated, of course not on the floor of the Senate, that the committee have that paragraph under consideration and that there is some likelihood it will be changed so as to have the rate take effect upon wool on a certain day and another date for woolen goods. I should like to ask the Senator from Missouri if there is any suggestion of that kind under consideration?

Mr. STONE. I think it would be very well to have the para-

graph. adopted as it is and let that matter go into conference.

Mr. SMOOT. The suggestion is a proper one, and I have no objection to it, but I simply call the attention of the Senator to this. If it went to conference, could there be a date upon woolen goods later than the 1st day of January, 1914, because the latest provision in the Senate committee amendment is the 1st day of January, 1914?

Mr. STONE. It is an entirely new paragraph inserted by the Senate committee, and I should think that the conferees could

make any change they desired.

Mr. SMOOT. I think they can change it anywhere between the date of the passage of the act and the 1st day of January. 1914, but I do not believe they could under the rules extend it beyond that time.

The PRESIDING OFFICER. The question is on agreeing to

the amendment of the committee.

The amendment was agreed to. Mr. STONE. Mr. President, I ask that we go back to the first two paragraphs of this schedule if the Senator from Wyo-

Mr. SMOOT. Before that is done I wish to make a short statement.

I have proposed a substitute for this schedule, and I expected to-day to take it up for consideration and to be voted upon; I also expected to take an hour or so to explain its provisions. But I am not feeling very well to-day. I have a severe headache, and for that reason and that only I shall withhold offering it to-day; but I will offer it when the bill reaches the Senate.

Mr. STONE. Does the Senator not think it preferable to

offer it in the Senate?

Mr. SMOOT. It would not be preferable to me, but I shall

offer it in the Senate, as I said.

Mr. LA FOLLETTE. Mr. President, I introduced yesterday an amendment in the nature of a substitute to this schedule which I propose to offer. I have prepared still another, but as both of them start with raw wool at a less rate of duty than that proposed by the Senator from Utah in the substitute which he will offer, and as I think they should follow his rather than precede it, I shall reserve offering them, and some observations which I propose to submit with them in explanation of their provisions, until we have reached this schedule in the Senate and until after the Senator from Utah has proposed his

Mr. STONE. Now, Mr. President, I will ask the Senator from Wyoming [Mr. Warren] if he is ready to proceed? WOOL TOPS.

Mr. WARREN. Mr. President, I seek recognition now at the suggestion of the Senator at present in charge of the schedule, and I shall take only a few minutes. I wish to address myself to the matter of tops, and, of course, yarns follow. I do this entirely in the interest of the woolgrower, the manufacturer not considered. In view of the fact that wool is the only industry in this bill, highly protected now and heretofore, which is proposed to be absolutely torn down and made free, and that almost immediately, I think we should be entitled to at least some patience in presenting our case and to careful and prayerful consideration thereof, either here on the floor now or by the committee before final passage of the bill.

The woolgrowers feel that the knife has been plunged to its very hilt into their hearts, and they do not like to have the knife turned in the wound and the corpus delicti mutilated. This matter of only a 5 per cent ad valorem duty on tops does

exactly that.

Many years ago I had my attention called to this matter of tops through differences which arose between an editor of a wool and cotton periodical and one of the former presidents of the Wool Manufacturers' Association. The matter called out a good deal of personal feeling and differences, and my sympathies were all against any large duty upon tops. I investigated it with an idea to greatly reduce the duty on tops. So I was not animated by any desire to have a high duty upon that product.

The investigation showed me most plainly, as it has nearly or quite everyone who has worked it out carefully, that if we pass this bill with 5 per cent only on tops the imports to this country will not be in raw wool but will be in tops, because nearly all the cloths are made from yarn, and yarn is made from tops, so that the large proportion of the wool must first

be made into tops.

I understand that the Senate committee in considering this subject has expected to provide that the American woolgrower may be put upon an equality with the foreign woolgrower so that he may be in the world's market. It is impossible, however, to do this if you admit wool free, because of a difference in transportation. That is something I can not perhaps ask the committee to consider and remedy at this time with the views its members have, but in the matter of tops, this proposed differentiation will oblige us in this country to sell the domestic wool as much lower than the foreign wool as the difference is in making up the tops; that is to say, if they are made for 3 to 6 cents a pound less in a foreign country than here, our wool has to go low enough to make up that difference, and added to that we lose the benefit in American labor of so many men as would be engaged in making those tops. In other words, American-grown wool would be shipped to England, made into tops, and returned here, or its equivalent in cost, in order to establish a parity between the domestic and foreign wool.

Mr. HUGHES. The Senator remembers the statement as to

Mr. Heefles. The schaff lemembers the statement as to the difference in the cost of tops made by the Senator from Rhode Island [Mr. Lappitr] yesterday.

Mr. WARREN. I think in his estimate the cost of tops ran from 13 cents in one calculation and grade to as low as 6 cents in the other, made in this country. I have not looked over his remarks.

Mr. HUGHES. My recollection is that the report of the Tariff Board makes the cost of producing woolen tops very

low in this country.

Mr. WARREN. The Tariff Board report is such that it takes a combination of different parts of the report, because they report on the scouring of wool as separate from the combing, and so forth. But I have examined the report of the Tariff Board very closely, and one can deduce at once from it that the difference is against us.

Mr. HUGHES. What does the Senator say is the cost of mak-

ing tops abroad?

Mr. WARREN. The cost of making tops runs from 3 cents and something to 7 cents over there, on different calculations and grades, and the cost here runs from about 6 cents to 13 cents

Mr. HUGHES. In no case would there be a difference of 10 cents.

Mr. WARREN. Oh, no. If the Senator thought I said that there was a difference of 10 cents per pound, there was a misunderstanding. I did not mean that, nor did I intend to say it. Mr. HUGHES. That is what I understood the Senator to

Mr. WARREN. Paragraph 295 of the bill as it passed the House provided that "combed wool or tops, and roving or roping made wholly or in part of wool or camel's hair, and on other wool and hair which have been advanced in any manner or by any process of manufacture beyond the washed or scoured condition, not specially provided for in this section, 15 per cent ad valorem."

The Senate Finance Committee amended this paragraph to

make the rate 5 per cent ad valorem.

The rate of duty carried in the Payne-Aldrich Act of 1909 was 24% cents per pound plus 30 per cent, on combed wool or "tops" valued at not more than 20 cents per pound, or 36% cents per pound plus 30 per cent if valued at more than 20 cents per pound.

Freights from foreign countries to our wool markets, from which the factories purchase their supplies, range from 17 cents to \$1.05 per 100 pounds, while the average rate of the western woolgrower, in localities where most of the wool is grown, is at least an average of \$1.75, running, as it does, from \$1.32 to \$1.98 per 100 pounds railroad freight.

Now, it takes about 3 pounds of grease wool from our ranges to make 1 pound of scoured wool. Therefore the difference is three times that amount on scoured wool, or 2½ to 5 cents per

pound.

The Tariff Board, which made a thorough investigation of the cost of turning wool into tops in this country and England, found that 80 per cent is the approximate excess of the American cost over the English.

The tariff rate on tops under the Dingley and Payne Acts practically has excluded tops from importation into this counry, thus protecting the market for our domestic wool production and creating a field for the investment of capital in mills, and, in addition, and far more important, providing employment for a large number of American workmen engaged in converting unwashed grease wool into a fully cleansed and condensed

product of manufacture ready for the spinner.

I have procured two different calculations of the cost of making tops from grease wool in England and the United States. One was made by manufacturers, and as manufacturers, excepting those who themselves make tops, would benefit by buying tops in a foreign market instead of wool if the labor in the foreign country could be performed for less than in America, I assume their figures would be lower instead of higher than the average in computing the difference in cost. The other set of figures was made for me by a prominent wool dealer, who buys both domestic and foreign wool, and who would prefer to see manufacturers buy, first, home-grown wool, or, second, foreign unmanufactured wool, rather than to see the foreign country perform all the labor and get the benefit of making tops. This dealer's figures make the difference in cost between foreign and domestic tops nearly twice as much as the first mentioned.

And so I have had careful computations made as to what result would obtain from a 5 per cent and a 10 per cent and

also a 15 per cent ad valorem rate.

On a 5 per cent duty basis England would have the advan-tage of us by at least 3 cents a pound. At 10 per cent England would still have the advantage. But on a 15 per cent England would still have the advantage. But on a 15 per cent basis there would be ample difference to protect the American grower. It is quite possible that 12½ per cent might, on an average, cover the ground.

In this connection I would ask to have inserted in the Record in connection with my remarks a communication to the chairman of the Senate Finance Committee, signed by over 100 responsible firms and individuals engaged in the wool business in Boston.

The communication referred to is as follows:

BOSTON. July 24. 1913.

Hon. F. McL. Simmons, Chairman Senate Committee on Finance, Washington, D. C.

Hon. F. McL. Simmons,

Chairman Senate Committee on Finance, Washington, D. C.

Dear Sir: Referring to H. R. 3321. Schedule K. paragraphs 295 and 296, we, the undersigned, engaged in the wool business in Boston, desire to call to your attention that it is our honest practical opinion that the proposed duty of 5 per cent on tops and roving and 15 per cent on yarns, if it becomes effective, will result in very large importations of these partially manufactured products of wool and a relatively much lessened importation of raw wool.

It necessarily follows that wool of domestic growth will sell on a lower basis to meet this competition than it would bring if the competition was more largely with foreign wool in the raw state.

Mr. WARREN. It would be impossible to say just what percentage of the number of persons employed in mills which manufacture tops solely or as a part of their business would be deprived of their avocation should the industry be annihilated here and transferred to England, Germany, and France. Those familiar with the business believe that upward of 10 per cent, or 16,000 persons out of the more than 160,000 employed in our mills, would be deprived of work if protection equal to the difference in cost of production at home and abroad should be denied.

The loss to the woolgrower would be direct and disastrous, for the market for the greater part of the domestic clip would suffer this difference. Our wool would substantially fall below the world's price because of this handicap. This we can provide against in the pending bill by accepting the House figures rather than those of the Senate committee. Another handicapthat of transportation-we can not so easily remedy, and because of this we certainly ought to remedy this "tops ance as we go along.

Of course, I understand that with the discipline and perfect party organization with which the honorable chairman and the committee in charge of this bill are backed, it is perfectly useless for me to offer an amendment. I do not propose to offer an amendment. I know very well that none would be accepted unless they should take it over and offer it from the other side as one of their own, and I must say that I admire

such organization.

If I have noticed the doings of the Senate accurately, there has not yet been a single roll call in which the solid Democratic Party, with the exception that has been officially made for two Senators, have not followed their leaders and have not carried the point at issue. So I shall move no amendment now, but I want to plead for the woolgrower that, after you have taken away his protection, you leave him on a basis at least equal, or as nearly

equal as may be, in raw-wool value to that of other countries.

Mr. HUGHES. Mr. President—

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from New Jersey?

Mr. WARREN. I do.

Mr. HUGHES. I wish to get the Senator's idea in reference to this matter. I realize, of course, as everyone must, that this

book show that the duty is somewhere around 100 per cent, and we have reduced it to 5 per cent.

Mr. WARREN. This being Saturday and a half holiday, we ought to have a desire to finish this schedule to-day, and I do not care to go into a technical discussion.

Mr. HUGHES. I do not want the Senator to do that, but I simply wanted to get his point of view with reference to the suggestion he made a minute or two ago, for my own information.

Wool in the raw state is vastly different of course from tops, and we would be greatly handicapped from the standpoint of transporting large numbers of tops. Do I understand the Senator's idea is that with a low duty on tops it would tend to bring imported wool into this country in the shape of tops?

Mr. WARREN. Entirely.

Mr. HUGHES. That is something which ought to be considered, but is it not true that the difficulties the Senator anticipated by the senator and the senator an pates in the way of bringing in wool in the grease would not be obviated by bringing it in scoured; that is preliminary of course to turning it into tops?

Mr. WARREN. I thank the Senator for that suggestion. That is exactly what the woolgrowers are now considering and have been considering, for that matter, in the West, whether it would be possible to do the scouring in a way that might make the product acceptable to the manufacturer and cheaply enough to cover costs of plants for that purpose, and so forth.

Mr. HUGHES. I catch the Senator's idea. He is speaking,

then, not of the transportation of home-grown wool but of for-

eign wool.

Mr. WARREN. I am speaking of how much more it will cost us to get our home-grown wool to the market than it costs to get the foreign wool to our market. In other words, our market, where our manufacturers buy, is such that it costs more to lay down at the factory our home-grown wool from where the largest quantity is supplied than it costs to get it from a foreign country.

I can not expect the committee at this stage of the bill to remedy that. What I do ask is that, having to suffer, as we must, this transportation disadvantage, and having to accept free trade as against the advantages of the other side, we may not have to endure this further disadvantage and loss which a 5 per cent duty only on tops would inflict upon the American

woolgrowers.

The first difficulty they will try to struggle through with by themselves, but as for this second one, 5 per cent tops, it would seem mischievous and triffing to insit upon the Senate cut. Probably what made the trouble, as has been suggested, is that tops were formerly put away up into the sky as to their tariff rate. If I can go back a little and take a moment, I will explain how that originally happened.

Years ago there was a constant friction between woolgrowers and manufacturers. The Woolgrowers' Association had as its president Judge Lawrence, of Ohio, formerly a Member of Congress and formerly, I believe, Comptroller of the Treasury or an assistant. He was for a high tariff, watching closely, of course, the holes in the wall where foreigners were taking advantage of us. In the first Cleveland administration, through a ruling of the Treasury Department, broken tops were allowed to come in with the lowest rate of wastes. The consequence was that the best tops could be mutilated a little and sent in almost at free-

trade rates. That, of course, being taken up later on by Judge Lawrence and his association, he undertook to obtain a rate so high that no tops could be brought in under any circumstances at a profit, on the ground that he wanted, first, to prevent fraud; second, to protect the woolgrower in his products; and, third, to insure the labor of making tops in this country.

For instance, the rate under the Payne-Aldrich Act was 24% cents per pound plus 30 per cent on combed wool or tops valued at more than 30 cents per pound, and 36% cents a pound plus 30 per cent if valued at more than 20 cents per pound. That was entirely above any necessity of protection so far as the real comparison between raw wool and the other was concerned.

But that went into the Dingley bill. Judge Lawrence, whom followed as president of that association, became so angry because I was, as he termed me, a low-tariff man in consid-

ering the Dingley bill, that he never spoke to me afterwards.

Mr. THOMAS. Who was that, may I inquire?

Mr. WARREN. Judge Lawrence. Now, looking at it from any standpoint—and I have here before me, in fact—

Mr. STONE. Did the Senator change his position from a low-tariff man after he and Judge Lawrence—

Mr. WARREN. I am still a low-tariff man. I am a lowtariff man, but not a no-tariff man.

Let me say to the committee, if I had my way I would put is a radical reduction. I recollect that the figures in the hand- a revenue tariff on every article of import that comes into this country, not so much, perhaps, for the amount of revenue as to keep the book account straight. Make it nominal, if you please, in many or most cases, but have everything that comes into this country listed and make it bring some revenueenough, at least, to carry on the expense of assessing and col-I think it would harm no one. It would be so lecting it, trifling that the foreigner would be glad to pay it, as a sort of license; and it would give us the information we want as to the quality, quantity, prices, and so forth, of imports.

I have here a communication, a part of which I may insert in my remarks, from Samuel S. Dale, who is well known as one who opposed bitterly the Payne tariff bill; who has been opposed to high tariffs on wool; who has been for a very low

tariff. He closes as follows:

The Finance Committee's schedule discriminates against the woolgrower, whose product is free, and against the worsted drawing and spinning industries, whose products, roving and yarn, are subject to rates proportionately lower than the rate on finished cloth. These inequalities should be corrected in order that, so far as is possible, all producers may be equal under the tariff law and the country may be spared from further agitation over Schedule K.

Saml. S. Dale, Boston, Mass.

Mr. GALLINGER. Mr. President—
The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from New Hampshire?

Mr. WARREN. I do. Mr. GALLINGER. I was attracted by the observation of the Senator that if he had his way in constructing a tariff bill he would put an import duty on everything that comes into the country. It seems to me if that were done, including tea and coffee and those articles, it would produce a very large revenue, however low the duty might be, and the great industries of the country would have no chance whatever.

Mr. WARREN. Perhaps the Senator did not give due weight to my observation. While I would make them nominal as to a great many things, sufficient only to carry the expense of noting and printing the information for bookkeeping, and so forth, I do not think the Senator and I would differ as to the change and rise of rates necessary from the nominal to the protective in every article, because I desire to plead guilty now, as of old, to being a protectionist, although in this case the protection that I am asking for in this matter of tops is merely to take off one of the inequalities so that the bill may make good what it has proposed to do; that is, give us the world's market at least for our wool product in this country.

As nearly as we can figure it, out of the 160,000 men employed in making cloth, the making of tops in this country

would employ 10 per cent, or 16,000 people.

That is an item to be considered after you have considered the woolgrower. Do you want to cut out that many laborers from doing that work in this country and allow it to be done in another country because the labor there is less than here and because your too low tariff permits them to do all of this labor?

As I have said before, all I can do is to appeal. I should be glad if this committee on its own volition would offer either to strike out their amendment or to name a slightly lower figure than that of the House; but if they are not disposed to do it, if they are not willing to do it, if they feel that even an observation from this side would injure their organization in some way, then I want to appeal in the most earnest manner in which it is possible for a man to appeal, that when they go to conference they may do there as we have had to do a great many times, as the honorable chairman of this committee knows. have had some experience with conferences where we compose our differences and I have, as probably the chairman and other Senators have, sometimes been rather liberal in cuts downward or in rises upward in committee, so that I might have the backing of the Senate to a difference with the House large enough, so that if we found stubborn resistance we could compose our differences somewhere between the higher and the lower figure.

Now, if it should be that out of conference there should come a bill with a 5 per cent duty only, you will have done what I said in opening, not only plunged in the knife, but turned the blade and lacerated the victim after accomplishing the destruction.

If it should go as low as 10 per cent there will be quite large imports. If you go lower than 12½ per cent, you are going to work extreme hardship upon the woolgrower. I hope you will recede from that amendment and allow the House figure to stand as to tops.

Mr. JAMES. Mr. President-

Mr. WARREN. Did the Senator wish to interrupt me?

I thought the Senator was through. Mr. JAMES.

Mr. WARREN. While I am on the floor, as we are at the end now of the wool schedule, I want to speak of one other matter.

I have been waiting to see if the honorable senior Senator from Montana [Mr. MYERS] would come in, because one of the points of his able speech the other day on the free-wool side of the question was that we were the only country in the world except darkest Russia that had any tariff on wool. I may be mistaken, but I have hunted through all the authorities, and I find that Mexico has a tariff on raw wool, Cuba has a tariff on raw wool, Canada has a tariff on certain grades of wool and certain prices, and so on.

I submit herewith a list which I wish to include in my re-

COUNTRIES WITH WOOL TARIFFS.

Mexico: Raw wool, about 11 cents per pound. Cuba: Raw wool from United States, 20 per cent; other countries, 40

per cent.

Canada: Wool, Leicester, Cotswold, Linconshire, Southdown, combing wools, or wools known as luster wools and other like combing wools, such as grown in Canada, 3 cents per pound; worsted tops, 15 per cent; yarns, 30 per cent. (Canadian customs tariff, Apr. 12, 1907.)

Australia: Wool yarns, 10 per cent:
Venezuela: Wool, 7 cents per pound,
Haiti: Wool, 4 cents per pound,
Germany: Combed wool, 47 cents per pound.
France: Combed wool, 32.50 francs per pound.
Italy: Combed wool, 15 lire per pound.

Mr. SIMMONS. Does not the Senator think—Lam merely.

Mr. SIMMONS. Does not the Senator think-I am merely asking him for his opinion-that all the countries that he has named, with the possible exception of Canada, in imposing these

duties do it merely for revenue purposes?

Mr. WARREN. I am not raising that question now, because the honorable Senator who makes the inquiry and I are diametrically opposed in theory, for, of course, I would make a revenue bill with protection considered, and he would make a revenue bill with protection not considered. However, in speaking of free wool and the condition that we are in in competition with other countries, and so forth, I felt it proper to correct what I thought was a misstatement about wool.

There are France, Italy, and other countries that regulate the rates of duty on wool on the basis of whether it is raw or manu-

factured or partly manufactured.

Mr. JAMES. But France has unwashed, washed, and scoured wool free, has it not?

Mr. WARREN. What is the Senator's question?

Mr. JAMES. Has not France unwashed, washed, and scoured wool free?

Mr. WARREN. Yes; France has raw wool free.

Mr. CATRON. Mr. President, I simply wish to state that a few days ago I introduced an amendment to this bill intended as a substitute for Schedule K. I do not desire to call it up now, but I give notice that I shall present it when the bill reaches the Senate, and shall insist on a vote upon it, unless some of the other amendments which would suit me better which have been offered to the schedule shall be adopted.

Mr. JAMES. Mr. President, I desire to place in the RECORD, without reading it, a table showing the population of the various States and the total production, importation, and consumption of wool by States, according to the Thirteenth Census of the

United States, in 1910.

I also desire to file another paper, without reading it, showing the number of farms in each State, the number of sheep in each State, and the number of sheep on each farm in each of the various States.

I also desire to state that the census of 1910 shows that there were 6,351,502 farms in the United States, and that only upon 598,047 farms were there reported sheep, according to the census, which shows that the tariff, which we are told is placed upon wool for the benefit of the farmer, taxes 10 farmers who do not

The PRESIDING OFFICER. Without objection, the tables referred to by the Senator from Kentucky will be printed in the

RECORD.

The tables referred to are as follows:

Population of the United States, by States; total production, importa-tion, and consumption of wool by States, according to the Thirteenth Census of the United States, 1910.

[590,996,078 pounds wool consumed in 1909, or 6.4 pounds per capita.]

Pulled wool		40,000,000	
Grand total		321, 362, 750	

The wool production is taken from the Agricultural Yearbook for 1910, and the item "Pulled wool, 40,000,000," being wool pulled from sheepskins, is not distributed to States.

This item is about one-seventh of all the wool produced, and if distributed equally among the States will increase the production figures of each State by one-seventh—an amount not appreciable in the general comparison with the consumption of each State.

Number of farms in United States, census of 1910.

State.	Number of farms.	Number of sheep.	Average number of sheep on each farm.

Mr. SMOOT. Mr. President, I started last evening to prepare a statement similar to that presented by the Senator from Kentucky [Mr. James] as to rice, showing the number of farms producing rice, the amount produced, and the number of States which produced it, following exactly the same line as has the Senator from Kentucky with wool; but I was called away from that work about 10 o'clock and could not return to it. This morning I was called to the depot at 7.30 o'clock and was unable to prepare the statement. I will, however, prepare it at some time in the future.

Mr. JAMES. I will suggest, Mr. President, that I very much hope the Senator will prepare that table. The reason I prepared these particular tables was that I wanted to make it easy for the various Senators who veted for a tax upon wool to explain to the people just how many pounds of wool, in addition to what they produced in a particular State, they had to have imported there in order to supply the consumption; so that they could explain, without any difficulty of research, just how much the burden was upon the consumers of each State, and where it was not a burden how much the benefit was. It was merely in order to make easy those explanations to the public that I have furnished these tables. As an example, in my own State of Kentucky we produced in 1910, as shown by the census, 3,800,000 pounds of wool, and our 2,289,905 population consumed 14,655,392pounds of wool. In other words, we had to import into the State 10,855,392 pounds of wool more than we produced to supply our people, upon which the tariff tax had to be paid.

Mr. SMOOT. And the object I had, Mr. President, in preparing the other table was that I wanted to make it very easy for the Senator from Kentucky and others who voted for a duty upon rice to show that its burden rested upon nearly nine-tenths of the States and of the people of those States who do not produce a pound of rice.

Mr. JAMES. I hope the Senator from Utah, in making that table about rice, will not take the position that rice is as essen-

tial to the living of our people as is clothing.

Mr. SMOOT. Mr. President, there are more pounds of rice consumed in this country to-day than there are pounds of wool used.

Mr. WALSH. Mr. President, I desire to recur to the paragraph of this schedule under consideration, the paragraph in relation to tops, and to say in that connection that I am unable

to agree with the distinguished Senator from Wyoming [Mr. WARREN] that the woolgrower is to any extent whatever interested in the restoration of the 15 per cent duty upon this prodnct which the House bill carries. I desire to introduce what I have to say upon this subject by asking that there be read from the desk an editorial which appeared in the Boston Journal of May 19, 1913. I ask for its reading the more readily, Mr. President, because of its containing some criticism of the Democratic attitude and the Democratic procedure in relation to this measure. It will be discerned from it that it comes from no friendly

Mr. BRISTOW. Mr. President, if the Senator from Montana will yield just a moment before he enters upon the discus-

The PRESIDING OFFICER. Does the Senator from Mon-

tana yield to the Senator from Kansas?

Mr. WALSH. I do. Mr. BRISTOW. I see the Senator from Kentucky [Mr. James] has escaped. I desired to make an interrogatory of him before he left. I believe the Senator from Kentucky has friends present, so I will make the interrogatory, and he may answer when he returns. He has very kindly placed in the RECORD—so he said—a statement of the number of States that produce sheep and the number of sheep in the States, showing from his point of view the number of people that are taxed for the benefit of the sheep growers. I wanted to ask him to place in the Record also the number of manufacturers of cloth and ready-made clothing in the United States, and also a statement of the number of people who wear clothes, in order to show the number of people that he is proposing to tax for the benefit of those manufacturers of ready-made clothing. This bill places a duty of 35 per cent on ready-made clothing and, according to the theory of the Senator from Kentucky, those duties are for

clothes. Mr. WILLIAMS and Mr. WARREN addressed the Chair.

The PRESIDING OFFICER. To whom does the Senator from Kansas vield?

the purpose of protecting the manufacturers of ready-made

Mr. BRISTOW. I yield to the Senator from Mississippi, through the courtesy of the Senator from Montana.

Mr. WALSH. I have the floor, Mr. President. Mr. THOMAS. The Senator from Montana h Mr. THOMAS. The Senator from Montana has the floor. The PRESIDING OFFICER. The Chair realizes that the floor belongs to the Senator from Montana, but he yielded the floor to the Senator from Kansas. Mr. WALSH. I had expected-

Mr. WILLIAMS. I ask the Senator from Montana to yield to me for one or two pertinent or impertinent observations.

The PRESIDING OFFICER. Does the Senator from Mon-

tana yield to the Senator from Mississippi?

Mr. WALSH. I desire to be accommodating upon this matter, but I suggest to the Senators that I have the floor and have something to say

The PRESIDING OFFICER. The Chair recognizes the Sen-

ator from Montana.

Mr. WALSH. I regret that this general discussion should be injected into the midst of my remarks. If any Senator simply desires to ask a question, I shall be very glad to yield.

The PRESIDING OFFICER. Does the Senator from Mon-

tana yield to the Senator from Mississippi?

Mr. WALSH. I do.

Mr. WILLIAMS. I wanted to suggest that perhaps the Senator from Kansas [Mr. Bristow] had inadvertently overspoken himself. He said something about our levying a tax for the benefit of the manufacturers of ready-made clothing. Of course the Senator from Kansas knows that that is not true. He knows that we propose to reduce the taxes which the Republican Party have levied upon the people.

Mr. BRISTOW. Mr. President—
The PRESIDING OFFICER. Does the Senator from Montana yield further?

Mr. WALSH. I do.

Mr. BRISTOW. I shall not pursue the discussion any further, because I recognize that the Senator from Montana wants to complete his remarks, and I will take the matter up later.

Mr. WARREN. Mr. President, will the Senator from Montana yield to me for a second?

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Wyoming?

Mr. WALSH. Yes. Mr. WARREN. I want to address myself for a moment to the Senator from Kansas [Mr. Bristow] and to say that yesterday, when the Senator from Kentucky [Mr. James] proposed to insert in the RECORD certain papers and figures which, I

judge from what he says, have now been inserted, I asked him to advise me so that I might record with them some figures similar to those proposed just now by the Senator from Kansas. I think the Senator from Kentucky probably did not hear me. I hope the Senator from Kansas will take occasion to put such figures into the RECORD. I should be obliged to him if he would do that later on.

Mr. BRISTOW. Well, Mr. Pro Montana will yield just a moment Well, Mr. President, if the Senator from

The PRESIDING OFFICER. Does the Senator from Montana yield further?

Mr. WALSH. I yield. Mr. BRISTOW. I will say that I do not intend to put any such figures in the RECORD. I do not think there is anything in such figures—there is no argument in them. They are simply ridiculous fulminations that are based upon an entirely erroneous theory in regard to tariff taxation.

Mr. WARREN. That is true; but inasmuch as one side has been presented it is well enough to look at both sides of the

picture and compare them.

Mr. BRISTOW. That is true.
Mr. WALSH. Now, I ask that the Secretary read the editorial which I have sent to the desk.

The PRESIDING OFFICER. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

#### HOW ABOUT WOOL TOPS?

The Secretary read as follows:

HOW ABOUT WOOL TOPS?

There is a product of wool nanufacture called "wool tops." How it gained the name of "tops," in the first place, is shrouded in some mystery, but during the last 20 years it has demonstrated its right to the title by coming out on top at the various revisions of the indefensible Schedule K. "Wool tops" are the product of the first processes of manufacturing worsted. The cost of turning wool into tops is very small compared with the cost of making wool cloth. And yet when the Dingley bill was framed in the Senate in 1897 "tops" came out on top with a duty as high as that put on finished cloth. There was a scandal over it and it was shown that the paid agent of the wool manufacturers had gained admittance to the secret sessions of the Finance Committee while the Dingley bill was being framed. The correspondence between this agent and his employer was published and showed that the agent had received explicit instructions to let the committee know what the employer needed on "tops." What he "needed" was to have "tops" kept out of the country, and the Dingley duty did this most effectively. This is shown by the fact that, although more than 200,000,000 pounds of wool was imported in 1910, only 2,248 pounds was in the form of "tops." This small quantity must have been brought in by mistake, for it was valued at only \$870, but the duty collected was \$1,243.

That illustrates the way American tariffs have been framed in the past. Are they being framed much better now? Look at "tops" in the Underwood bill. That Democratic measure as it passed the House last week put 15 per cent ad valorem on "tops." What does that mean? The price of foreign "tops" varies from 30 to 70 cents a pound. Fifteen per cent is consequently from 4½ to 10½ cents a pound. There are plenty of "tops" makers in this country who are looking for orders to turn wool into "tops" at 5 to 7 cents a pound, or, say, an average of 6 cents a pound. In other words, the Underwood duty on "tops" is from 75 to

Mr. WALSH. Mr. President, the journal from which the Secretary has just read is published in the city of Boston, the center of the wool-manufacturing industry in this country. paper is an old one, founded in 1833; it is independent in politics; it has a circulation of 95,000 daily; and is owned and published by Frank A. Munsey. I speak of these matters so that the article will not be understood at all to be a party expression, nor an expression of anyone in sympathy politically with this particular bill. It calls our attention to the fact that the subject of tops has furnished scandals heretofore in the construction of tariff bills, and we will do well in the preparation of the measure now under consideration to see that no room is given even for a suggestion of the character which the editorial conveys. I opened this discussion by remarking that the woolgrower, from my point of view, has no interest whatever in raising the duty prescribed by the amendment proposed by the Senate committee, and I think it can be demonstrated upon indubitable grounds that the rate proposed is altogether adequate to furnish whatever protection is necessary, even

from a protective standpoint. Mr. HUGHES. Mr. President-

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from New Jersey?

Mr. WALSH. I do.

Mr HUGHES I should like to ask the Senator if it is the practice now to scour wool where it is grown or if it is shipped in the grease?

Mr. WALSH. It is practically all shipped in the grease.

I desire, Mr. President, to say that if we accept the declaration of the Tariff Board in relation to the cost of producing tops there is no possibility of escaping the conclusion that 5 per cent is all the advantage that is necessary to cover any difference in the cost of production here and abroad. I am going to trespass upon the patience of the Senate long enough to read a few extracts which indicate the views of the Tariff Board. From page 640 I read as follows:

On the other hand, the commission rate for combing would, under normal conditions, cover not only interest on the plant, but whatever profit the comber is able to make besides. To a certain extent the interest and profit of the commission comber may be taken to offset the greater expense of the spinner who makes his own tops, so that the commission rate would approximate the actual net cost of the manufacturer who carried all the processes through in his own establishment.

The distinguished Senator from Rhode Island [Mr. Lippitt] on yesterday thought that it was necessary to add something to the cost of making tops as given by the Tariff Board to cover interest upon the investment and other like expenses; but the Tariff Board itself says that all those items are taken into consideration by the commission man who does the combing for a fee, and therefore the charges made for custom combing necessarily measure the actual cost, and a slight profit, of course, is added. The Tariff Board continues:

Furthermore, the cost per pound of tops will vary according to the relative proportion of tops and noils secured from the process. The scale for commission combing in Bradford, England, differentiates its charges according to the percentage of the units. For instance, the charge for combing merino wools above 56s, quality is 4½ cents per pound where the proportion of tops to noils is 5 to 1 or over. The charge, then, increases as the proportion of noils increases. In general, however, the proportion of noils is seldom greater than 1 to 5—

So we can understand that the Bradford charge for combing is 4½ cents per pound for merino wool-

and this may be taken as the regular commission charge for fine quality wools. On 56s, quality for "carding crossbreds," corresponding to our one-half blood, the charge is 3½ cents; for 50s. corresponding to three-eighths blood, 3½ cents; for 36s. to 46s. equivalent to our low one-quarter blood, the charge is 3 cents; and for low grade prepared, but not carded, the rate is 2½ or 2½ cents.

We have the English rate. Now, as to the American:

There is no standard scale for commission combing in this country. The following, however, may be taken as representative charges: Unwashed Territory wools, half blood or above, 7½ cents a pound; Australian half blood and merino wools, not finer than 70s, quality, and domestic wools, half blood or above, 7 cents per pound; high-quarter blood to half blood, 6 cents (an extra charge is made on unwashed Territory wools); high-quarter blood, 5½ cents; quarter-blood and common combing wools, 5 cents.

So that you have the combing charges in this country and in England for the purpose of comparison. The board continues:

In attempting to arrive at the cost of tops from a consideration of actual mill records for a given period of time, we have found the widest divergencies due to the difference in output. For a six-months period in one mill the average cost of production for all tops was only 4.28 cents per pound, while for another six-months period in the same mill running upon practically the same quality of tops the actual average cost was 9.37 cents a pound.

That is, in America.

The lowest actual cost we have found for making low-quarter blood tops in any given period was 3.24 cents for a six-months production on a greater than normal output. This, however, is an extreme case which could seldom be duplicated by any mill even under the most favorable circumstances.

Accordingly, Mr. President, the Tariff Board gives us the commission charge for combing in this country at 7½ cents, running from 33 cents, the lowest cost, up to something in the neighborhood of 11 or 12 cents.

That is a matter of no great consequence, Mr. President. The important question is the labor cost, because we ought not to impose a tariff here as a premium upon inefficiency of methods. If the methods are so inefficient in this country as to increase the cost and add another element to the difference, as a matter of course no one will assert that we ought to take that into consideration; and even if we did the duty provided here would be adequate, as I shall show, even to take care of that.

Mr. President-Mr. WARREN

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Wyoming?

Mr. WALSH. Yes.

Mr. WARREN. Does the Senator think that we are so inefficient as that?

Mr. WALSH. I certainly do not. I propose to show di-

Mr. WARREN. I myself have been rather distressed, I confess, at the very low estimate which the Senator from Montana and the Senator from Nevada [Mr. PITTMAN], who is not now in the Chamber, have placed upon those who are engaged in the that effect on yesterday; but I am giving the Senate the actual

woolgrowing and the wool-manufacturing industry in this country. I may be wrong, but I have labored under the impression that we had some very skillful men-

Mr. WALSH. Mr. President, I must interrupt the Senator. Will the Senator kindly quote anything that I have stated to the effect that anybody in this country was inefficient or of low

Mr. WARREN. If I understand the English language, the Senator was intimating it very broadly when I asked to inter-

Mr. WALSH. I was reading from the report of the Tariff

Board; I was not giving my views.

Mr. WARREN. I think the notes will not show that the Senator was reading at that particular moment from the report of the Tariff Board.

Mr. WALSH. Of course, if the Senator will call my attention to anything that I did say and it does not express my ideas, I shall gladly withdraw it or say that I was mistaken.

Mr. WARREN. The Senator on yesterday—

Mr. WALSH. I certainly do not care to have the charge made upon this floor that I have made any intimation of want of character or want of efficiency on the part of anybody connected with the manufacturing of wool in this country.

Mr. WARREN. I am very glad to have that declaration.

Mr. GALLINGER. Mr. President-

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from New Hampshire?

Mr. WALSH. I do.

Mr. GALLINGER. Mr. President, I have no special interest in this schedule beyond believing that there ought to be protection to wool and woolens; but I want, if the Senator will permit me, to observe that, as I have been listening to this debate and to other debates, I have noticed that whenever a question is in controversy Senators quote the Tariff Board. That seems to be authority from their point of view. Now, I make this observation simply for the purpose of expressing the hope that when we get to the final consideration of this bill we will create a tariff commission which will be valuable to us in future deliberations.

Mr. WALSH. Mr. President, I interject here, before passing to the next subject in the argument, that in the practice of the law I have always made it a point to endeavor to establish my case, if I could, from evidence provided by the other side. feel that the Tariff Board, as was suggested in the discussion here the other day, would probably, from the manner in which it was constituted, at least present the case not unfavorably to the doctrine of high duties upon these commodities.

Now let me go on. I was going to say, Mr. President, that in the regulation of the rate to my mind practically the only consideration which we are entitled to regard with any particular favor is the difference in the labor cost of making tops in this country and abroad. What is the difference? The Tariff Board gives it at 2.68 cents per pound, as shown by the table which is given at page 642, to which I adverted yesterday.

Mr. WARREN. Mr. President, is that both for washing and combing?

Mr. WALSH. For sorting, scouring, carding, and combing; the elements are all given. I will say now that the usually accurate Senator from Utah [Mr. Smoot] was quite in error yesterday in suggesting that this was the estimate only for low quarter-blood wool. The language of the-

Mr. LIPPITT. Mr. President-

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Rhode Island?

Mr. WALSH. I do.

Mr. LIPPITT. I do not want to interfere with the course of the argument the Senator is making on the labor cost, but it is necessary, in considering that question, to bear in mind the distinction that is usually made in figures of that kind between what is called the direct labor cost and the indirect labor cost. If the Senator will look at the table-I think it is on the next page—where the board give the cost of combing tops at 7½ cents, and will figure through to get the labor cost of all items—not merely the direct labor cost, but all the items of labor cost he will find that they state that the labor cost is 4.27 cents a pound, although they do not include in that table any cost for sorting or scouring the wool, which is in itself somewhere in the neighborhood of 11 cents a pound. For the purpose of the discussion we are now engaged in, we must have the entire cost from the time of purchasing a pound of wool until the top is made. That is nowhere given in the Tariff Board report, except in a fragmentary way; it is nowhere collected as a whole. I merely wanted to make that statement.

Mr. WALSH. I recall that the Senator said something to

labor cost of making tops, as given by the Tariff Board, embracing sorting, scouring, carding, and combing. Now, let me continue. They say with respect to this matter:

The above figures

That is the figures 2.68 cents.

The above figures include tops of fine merino to low quarter bloods.

Then they continue:

A comparison of a large number of mills shows this to be true and that the general expense and fixed charges are nearly equal to the labor cost, so that, excluding interest, the cost of tops in a mill running full time may be taken as ranging from 4 to 5 cents per pound on tops from low quarter bloods to high quarter bloods.

Now I read from the next page-

Mr. SMOOT. That was the statement I made yesterday, and I read it from the Tariff Board report.

Mr. WALSH. Yes; I understand. Mr. SMOOT. And I do not believe I misquoted a word from

Mr. WALSH. Mr. President, on yesterday I said in the course of the discussion of this subject by the Senator from Rhode Island [Mr. Lippitt] that the Tariff Board gave the labor cost of making tops in this country at 2.68 cents, and the Senator erroneously remarked in that connection that that was the cost in the case of low quarter bloods only. I am simply endeavoring to have the RECORD straight.

Mr. President, I have not the RECORD here, and Mr. SMOOT. do not know whether it is in the RECORD this morning or not. wish to say to the Senator, however, that I read from page

642 of the Tariff Board's report, and stated that-

A comparison of a large number of mills shows this to be true, and that the general expense and fixed charges are nearly equal to the labor cost; so that, excluding interest, the cost of tops in a mill running full time may be taken as ranging from 4 to 5 cents a pound on tops from low quarter bloods to high quarter bloods.

The Senator from North Carolina asked me what "low quarter bloods" and "high quarter bloods" meant. I said it was the designation of the grade of wool taken from certain grades of sheep.

Yes. Now that we have the matter straight, Mr. WALSH.

let us not follow it any longer. The Senator was in error in attaching the comment to which he refers to the figures—2.68 which I gave.

Let me continue:

Let me continue:

A comparison of the actual records of two similar plants—one in England and the other in the United States—showed the combing cost for the period of output in question (not including sorting) to be 2 cents in England and 4.27 cents in this country. The American plant, however, was making a slightly higher grade of tops. From the figures in both cases interest and depreciation were deducted, as the English charges were so disproportionately low as to show a difference in book-keeping method on these items.

Another comparison from actual records in England and the United States showed for a year's period an average of receipts of 4 cents a pound in England and 7 cents a pound in the United States; while the profit per pound in the two cases was practically the same, it being very close to 1 cent per pound in each case. This is not an unusual profit per pound in England, and in the case just cited it amounted to 25 per cent of the commission charge in England, as against 14.3 per cent in the United States.

It is further interesting to note that the direct labor cost, excluding labor for repairs, power plant, etc., was in the case of these two plants 69 cents per 100 pounds in England and \$1.76 in the United States, being slightly less than 25 per cent of the total cost in England and 33 per cent of the total cost in England and 33 per cent of the total cost in England and were furnished the board in England to the effect that the direct labor cost is not more than 20 per cent of the total.

Mr. President, when the total labor cost of making a pound

Mr. President, when the total labor cost of making a pound of tops is 2.68 cents, what shall we say is the difference in the labor cost in this country and in England? If, as I suggested yesterday, you can get labor in England for one-half what it costs here, the difference in the labor cost can not exceed 11

cents per pound.

What will a duty of 5 per cent ad valorem produce; that is what will a duty of 5 per cent ad valorein produce; that is to say, what is the actual import price of tops? The report accompanying this bill, sent here for our guidance, gives the unit as something like 80 cents. But we should be entirely wrong in assuming that that would be the price were the importations considerable in number. The present rate is and was intended to be substantially prohibitive. But the Tariff Board gives us the cost of tops, or what the market price was.

Mr. SIMMONS. Let me call the Senator's attention to the fact that the 81 cents per pound given as the cost in the tables accompanying the bill to which the Senator has referred does not include the duty. That is the invoice cost of the product.

Mr. WALSH. Certainly. I am speaking of the invoice price. At page 645 of the Tariff Board report is a table which gives the fluctuations in the cost of tops in this country and abroad. The domestic half-bloods since 1907 have ranged from 65 cents to 80 cents per pound. The domestic three-eighths bloods have ranged from about 57 to about 68 cents per pound. The foreign

three-eighths bloods have ranged from 58 to 73 cents per pound. The general range is from 45 cents for the very lowest grade to about 87 cents for the very highest grade.

So that we have here the actual cost of tops, the foreign price and the domestic price. The foreign price is what we are chiefly concerned in now. That is the invoice price, which runs from 40 cents for the lowest grades up to about 85 to 90 cents for the highest grades, the general average being somewhere between 60 and 70 cents per pound, perhaps

But let us take the lowest grades, and the duty charge is 5 per cent of 40 cents, or 2 cents a pound. It must be conceded upon this record that the actual cost of producing low-grade tops from the low-grade wools does not exceed altogether from 4 to 5 cents, or possibly as high as 6, and the labor cost is not more than 20 per cent of the total cost of the product. So your

very lowest grades are amply protected by a 5 per cent duty.

Take the higher grades, commanding 80 cents a pound. Five per cent of 80 cents is 4 cents per pound. No one pretends that the difference in the labor cost, or indeed the total labor cost

for that matter, reaches anything like 4 cents per pound.

Mr. WARREN. Oh, Mr. President, I think the Senator should temper that remark. Men have claimed it. The Senator says no one will claim it. I do not believe he wants to be put in that position. It has been claimed by a great many men. It has been claimed here on the floor of the Senate, for that

Mr. WALSH. Perhaps, then, I had better say that it is impossible to reach the conclusion from the evidence before us that the labor cost in the case of the production of the highest

grade of tops is greater than 4 cents.

Mr. WARREN. If the Senator will allow me, I wish to say that I myself am neither discrediting the Tariff Board report nor am I undertaking to adopt it; but I do say that in order to represent it fully one must take the tables together, as stated a moment ago by the Senator from Rhode Island; and if we are figuring out tops or anything else we must take the different sections together.

There have been quotations made from that report by various Senators which remind me of the old saying that you can prove anything, any theory or doctrine, from the Bible if you are permitted to select parts of sentences, and so forth. But I have not been able to figure out-and I have submitted the matter to a great many people—any such slight cost as the Senator says.

Will the Senator permit me to go a little further? In opening his remarks the Senator cited the Boston Journal. Of course the Senator will not undertake to say that that is especially a

wool periodical.

Mr. WALSH. I did not offer it as such.

Mr. WARREN. It is merely one of the daily papers. I have read it, off and on, for a great many years. It changes ownership often, and changes its politics and ideas. I do not wonder that the Journal should speak of it as a scandal in former times when the rate was so very high, as I quoted it here. It was very much like the shoddy matter we spoke of yesterday, which was evidently adopted with the idea of keeping out tops, because

Mr. WALSH. Let me say to the Senator from Wyoming that I really supposed he was going simply to make a remark. I do not feel as if-

The PRESIDING OFFICER. Does the Senator from Montana decline to yield further?

Mr. WARREN. I do not wish to trespass upon the Senator's

time.

Mr. WALSH. I simply wish to say that it would be scarcely fair to get into a long discussion with me in the midst of my argument.

I myself have been rather liberal in per-Mr. WARREN. mitting others to break in on me, but I shall await my time.

WALSH. Mr. President, inasmuch as it seems to be absolutely demonstrated from the evidence before us that the rate carried by this bill is adequate, I wish to direct attention for a few moments to a consideration of the persons who will get the benefit of any increase over the rates provided by the amendment proposed by the Finance Committee. The fact is that if they are not the exclusive manufacturers, practically the only firms manufacturing tops for commercial purposes in this country are the Arlington Mills and the American Woolen Co. They manufacture them for sale to other spinners and weavers.

In the years 1895 and 1896 the Arlington Mills, with which William Whitman, prominent in connection with tariff legislation for 40 years, was intimately associated, constructed what he represented, and accurately, too, in a letter to Mr.

Dingley, to be an enormous mill for the manufacture of tops. The way in which he came to build that mill contains an impressive lesson to us in connection with this tariff measure.

The Wilson bill of 1894 had been passed, reducing materially, as does this bill, the duties upon manufactured woolens. then became necessary for the Arlington Mills to look about to see whether new economies could not be introduced into the business in order that they might meet the conditions which then confronted them. The result was that the Arlington Mills were constructed. Mr. Whitman was the chief factor in that great work, and he naturally felt very proud of it. He had every cause to be. He felt so proud of it that he wrote a book about it, called Tops, a copy of which I have on my desk before me. The considerations that prompted the establishment of that mill are set forth as follows in the book:

that mill are set forth as follows in the book:

The management of the Arlington Mills was first brought to the investigation of the foreign methods of specialization in the summer of 1894, when legislation was pending to remove the duty on foreign wool, and otherwise so to change the status of the manufacture as to amount to an economic revolution. It appeared necessary to prepare to adapt American methods to new conditions; and the treasurer of the Arlington Mills visited Europe during the summer in question and acquired all the information possible upon the system of manufacturing there prevailing. He became convinced that to secure the best possible results in this country radical changes were necessary, beginning at the very foundation. It was made clear to him that the most successful combed-wool manufacturers abroad depended primarily upon the cheapness and perfection with which their wool tops were produced, and also that this cheapness and perfection combined were only possible when the manufacture was specialized on a large scale.

And therefore the mills were built. He says further concerns.

And therefore the mills were built. He says further concerning their capacity:

It is calculated that there can be delivered from this building, with these improved expediting processes, 300,000 pounds of tops a week, requiring for their production between 600,000 and 800,000 pounds of greasy wool per week. The top mill is thus capable of consuming the entire wool clip of the States of Ohio and California, which, next to Texas, are the two largest woolgrowing States of the Union. The fleeces of 20,000 sheep will pass through its machinery every day that it is in full operation. Its capacity is equal to one-eighth of the total wool clip of the United States.

Mr. President, the connection of Mr. Whitman with the duty upon wool tops is a matter which has been presented to this body upon a number of occasions. The letters which passed between him and Mr. North, who was introduced into the privacy of the Senate Finance Committee while it was engaged in the preparation of the Dingley bill, were read by the Senator from Missouri [Mr. Reed] at an early stage of the consideration of this bill. I do not purpose to go over those letters now, but I am going to invite the attention of this body to some further revelations in relation to that matter which have lately come to the attention of the public.

Before going into that I wish to refer to these letters, showing the individual and personal interest of Mr. Whitman in this particular schedule.

In a letter to Mr. North, under date of April 6, 1897, he said:

Mr. North, no change ought to be made in the top schedule. It is right just as it stands. It is an enormous reduction from the McKinley law. No possible legislation in connection with the woolen schedule could be so dangerous to the woolen industry as legislation that would favor the importation of tops, and all the representatives of the woolgrowers would oppose legislation that would in any way favor the importation of tops.

Of course they would, under a system pursuant to which wool is not admitted free.

wool is not admitted free.

I depend upon you to look out for my interest in this regard. You know how anxious I have been that tops should be made dutiable at less rates than the McKinley law, and you also know how important it is, not only to me but to the whole worsted industry of the United States, that such rates of duty should be imposed upon tops as will enable them to be made here and not be imported from foreign countries. If there is a single point in reference to this that you do not understand, you ought to communicate with me at once, so that it may be explained. There would be no difficulty in my satisfying the members of the subcommittee on this point, and if there is the slightest danger of any change I must see these gentlemen before it is too late.

If they understand the matter properly, they will make no change. The prosperity of the woolen industry in this country depends wholly upon the ability of the domestic manufacturers to manufacture the tops here. What a ridiculous position we would be in under any legislation that would favor importing tops and discontinuing making them here.

A little explanation of this matter is necessary. Under the

A little explanation of this matter is necessary. Dingley law tops fell under a clause which provided for a duty upon all manufactures of wool advanced in any degree beyond the scouring stage. Mr. Whitman thought it would be advisable to have a paragraph dealing specifically with tops. He proposed such a measure, and it was included in the bill; but when it came to the Senate, for reasons which will be adverted to at some other time, when I hope to address the Senate at length upon this subject, it was excised, and the provision in the Mc-

Kinley bill was incorporated in the Dingley bill.

When the bill got into conference Mr. Whitman was exceedingly solicitous and anxious indeed about the provision which

covered the subject of tops, and he wrote Mr. North as follows-I read only the postscript of a letter dated July 10, 1897:

P. S.—I am unable to go to Washington and have no one to look out for my interests there but yourself, and I depend upon you. Of course Messrs. Aldrich and Dingley will do all they can, but I depend upon your letting them know what I need. I depend upon you. Dress goods, yarns, and tops.

So, Mr. President, we have learned, I think, who the people are who are most vitally interested in the duty upon tops, for which such a struggle is made upon this floor. But a thing to which I desire to invite attention now, which was revealed a long time ago, is that this same Mr. North, who at that time was secretary of the National Association of Wool Manufacturers, drawing from that organization, which was vitally interested in this wool schedule, a salary of \$4,000 a year, was so fortunate as to have his services in the Finance Committee so highly appreciated by his employers that a number of them gathered together and made him a gift of \$5,000 shortly after the passage of the Dingley Act. In further appreciation of his arduous work they increased his salary on the 1st of January following, 1898, from \$4,000 to \$6,000 a year. He drew that salary of \$6,000 during the year 1898. At about that time a very determined effort was made by Mr. Whitman to have this man installed in the responsible position of Director of the Census. It was unavailing. But in the month of July of the year 1898, while he was still drawing a salary of \$6,000 a year from the National Association of Wool Manufacturers, he had friends powerful enough to secure him the place of chairman of the Industrial Commission recently created. He held that position for about a year, when, in 1899, although it was felt that a man directly interested in any statistics that would be prepared that would be made the basis of future tariff legislation should not be installed in the position of director, he was made chief statistician of the Census. He held that position until the year 1903, when he became Director of the Census. Mind you, all this time he was drawing a salary of \$4,000 a year from the National Association of Wool Manufacturers, drawing meanwhile a salary from the Federal Government in these responsible positions these responsible positions.

Mr. Whitman very frankly admitted upon the witness stand that while Mr. North was thus engaged in aid of the majority members of the Senate Finance Committee, if he was, in fact, then in the employ of the Federal Government, it would be utterly wrong for him to convey to Mr. Whitman or to anyone else from day to day the transactions of that committee. His actions in that regard were, however, excused upon the ground that he was not in the employ of the Government at all and was receiving no compensation from it. Yet it was disclosed that although he got no salary from the Government for his services, his daily expenses all of the time he was thus employed, his living expenses here, and his transportation from this city to the city of Boston and back were all paid out of the Treasury, and the vouchers are on file in the office of the Secretary of the United States Senate.

So I say we ought to regard with a great deal of care and a great deal of caution any suggestion that the duty on tops ought to be elevated to 15 per cent, or anything like 15 per cent, or anything in advance of the rate proposed by the Senate Finance Committee, which is entirely adequate, as appears from the record made by the Tariff Board, to take care of this particular item.

Mr. WARREN. Mr. President, I am sorry to see that the Senator from Montana [Mr. WALSH] has allowed the old and reasonable prejudice, if prejudice is ever reasonable, created by the old very high rates on tops, to influence him as far as it seems to have done. The rates at the time of which he has spoken were 24% cents per pound plus 30 per cent ad valorem on one class of tops and 36% cents per pound plus 30 per cent on another, which is quite different from 11 cents to 4 cents per pound, as proposed by the present measure under the amendment of the Senate committee, which is only 5 per cent ad valorem.

I hope the Senator will permit me to refer for a moment to an interruption of yesterday with which the Senator favored me when I had the floor, in which he inquired just when I had changed my mind and consented to the idea that we could submit to a lower tariff rate on wool and woolens. I could hardly see how that information would be necessary to the Senator or how it bore on the question then at issue, and, of course, I was not willing to consider that it was thrown in to embarrass me; but I could not help thinking at the time how natural it is for us to change our minds. Sometimes it becomes very evident that new converts are a good deal more radical than the old-timers when a man changes his religion or his politics or his ideas on finance or public economy.

The Senator, if I remember rightly—and I think I have the documents here—participated with the Wool Growers' Association, I think at Helena, the capital of his great State, when it met in 1908, just before the matter of the Payne-Aldrich tariff bill was to come up in the Congress of the United States. He was there made a member of the committee on resolutions, perwas there made a member of the committee on resolutions, performed his duty very satisfactorily, and, as I learn, made quite an extended, and, as he always does, able speech. His partner—I believe it was his partner, Mr. Penwill—was also there, and participated. As I am informed, they unanimously adopted, among other resolutions, this one:

Resolved, That we approve the present tariff on wool and hides, and deprecate any attempt to alter or modify the same.

This was the Dingley tariff bill.

Mr. President, as Montana is a neighboring and adjoining State and as she has industries that lie alongside and are similar to those of Wyoming, and undoubtedly these two are the two greatest wool and sheep growing States in the Union, I naturally looked with much interest to what was done at that meeting.

In my duties here in the consideration of the various measures that come up, while I always wish to be first for the country at large, I nevertheless think it is no discredit to be especially anxious to provide for the State I have the honor in part to represent and those near it, and especially those interested

in the same lines of business.

Standing as I did here, backed up by a resolution from a committee made up from both Democratic and Republican members, of which the Senator from Montana was a most distinguished Democratic member, and a greatly honored member, I, with others, stood by the tariff bill as they asked us to stand by it.

It is difficult to say just when a man changes his mind, as I explained yesterday; but while the Senator was asking me when I changed my mind, possibly he would have been willing to tell us when he changed his. At that time I was in a re-sponsible position here, and if he had changed his mind soon enough and had informed me then of a different opinion, I might have voted differently on the duty on tops, which were at the extravagant figure I have read-more than fifteen times as high as in this bill. It is always honorable to change one's

I am sorry that in thus changing his mind the Senator has become embittered, as it seems to me-and I say it with all respect—against the item of tops, because, for sooth, in times past it has been an article of scandal, and there have been personal differences, and even while I do not charge it, disreputable prac-

tices. I have no interest in all or any of that,

I have no interest whatever in wool manufacturing and no interest in tops except for the woolgrower. I plead for them If the Senator thinks that his State believes that there should be no tariff on wool, of course he is in the right path to take the course he does. But I beg to say that I have given the matter great attention. I have heard from a great many of our woolgrowers; I read the papers that come from Montana; I read the observations that are made on the actions of their Senators here. I am always pained to see anything that is not commendatory. I do not believe that woolgrowers as a whole, in that State or any other, feel as the Senator does about it—that the woolgrowers are in no danger because of the small 5 per cent tariff duty on tops.

Mr. SMOOT and Mr. JAMES addressed the Chair.
The VICE PRESIDENT. The Senator from Utah.
Mr. SMOOT. Mr. President, I do not intend to keep the
Senator from Kentucky off the floor for many minutes.

Mr. JAMES. Go ahead.
Mr. SMOOT. I do not propose to say very much upon this top question at this particular time. I will, however, when I discuss the substitute that I have proposed for this schedule,

go into that question in detail.

As the distinguished Senator from Montana has read a newspaper article taken from the Boston Journal in relation to the top question and the duties required upon that article, stating that the Journal was established in 1893 as I heard it, I can not help but take the time of the Senate long enough to read what the Wool Record, of Bradford, England, thinks upon this sub-

I know that it is very unpopular at this time to have an American citizen who may be interested in any kind of business have anything whatever to say about the rates in a tariff bill. The importers and foreign manufacturers are the ones listened to to-day. I want to read from the Wool Record, and I wish to say to the Senators that the Wool Record was established in

the year 1837, nearly 60 years before the Boston Journal was established.

Mr. WALSH. No; the Boston Journal was established in

1833. It beat it by four years.
Mr. SMOOT. The Wool Record is located at Bradford, the great wool center of England. The Boston Journal, as the Senator said, is located at Boston, one of the great wool centers of the United States. I will read the editorial of this great journal in its issue of July 3, 1913. I received it from England but a few days ago.

and but a few days ago.

The cable intelligence that the Democratic caucus have decided to recommend a further reduction in the duties appertaining to Schedule K, and to place tops, noils, wastes, and blankets on the free list has this week formed the subject of much discussion in wool circles, both in London and Bradford, and visions both bright and otherwise have been seen. We certainly think that the news need not be taken too seriously. Of course, some are for and others are against such a bill, but we doubt if these partly and fully manufactured articles will be placed on such a favorable footing. If such a thing had to happen as that tops should be put on the free list, it would mean very little wool being shipped to the United States, the bulk of American users preferring the combed article. It is hard to conceive that even the Democratic section of the House of Representatives would favor such a move, for it would at once bring to a complete standstill a good deal of American textile machinery, besides leading to the throwing out of work of a large number of employees. Even with only a 15 per cent duty on tops, large shipments of that commodity are certain to be made, for we can not see that the United States top makers can successfully compete with Bradford firms on so low a duty. We are convinced that whatever duties ultimately become law, a big trade is going to be done in something, and everything seems to indicate that large shipments will be made in practically all lines of wool and textiles. Naturally the idea of placing tops on the free list finds no approval among American wool buyers in Coleman Street, for they see that it will be impossible to produce tops on anything like a basis at which Bradford top makers will be able to offer them.

Mr. President, that is the latest issue of the Wool Record

Mr. President, that is the latest issue of the Wool Record that I have received, and it says that even with 15 per cent duty there will be large quantities of tops imported into this country

At this time I am not going into the question of the Tariff Board's report and show by it the actual difference of cost of making tops in this country compared with that of making them in foreign countries, but when I do I do not propose to take the lowest priced top made in this country and compare it with

the highest priced made in a foreign country.

I received last night the quotations on tops at Bradford, ingland. With wool the highest it has been for years on ac-England. count of the shortage of the wool crop of last year of 240,000,000 pounds, tops are quoted to-day at Bradford, England, at from 30 cents to about 62 cents per pound. A great quantity of tops that would be shipped into this country would be the grade of tops that would produce the number of yarns that enters into the great bulk of the goods made in this country. All will concede that to be a fact, and the Bradford price would be from 35 to 40 cents per pound on this class of tops. Five per cent on 35 cents is  $1\frac{3}{4}$  cents a pound, and 5 per cent upon 40 cents is 2 cents a pound.

The Senator wanted us to believe that the only difference in the cost of producing tops in this country and in England was the cost of labor. Mr. President, that can not be true. There is not a mill that does not cost more to erect in this country than it costs in England. All the machinery that is used for the manufacturing of tops costs more in this country than in England. The interest upon the increase of both is a charge against the cost of tops. The incidental expenses, the interest charges, the overhead charges, and all the expenses incident to maintaining and supplies are establishment of that kind are maintaining and running an establishment of that kind are higher in this country than they are abroad. All these things must be taken into consideration instead of merely the ques-tion of the difference in the cost of labor in arriving at the difference of cost of making tops.

Therefore, Mr. President, I believe that with the 5 per cent duty upon tops it will not only allow tops to be imported into this country in great quantities, displacing American wool, but it will have an effect upon the price paid for American wool, for every pound of tops that is imported into this country means the displacement of at least 3 pounds of American wool in the grease; and if they can be imported for less than they can be made here, just the amount that they can be imported less than they can be made here in this country will affect the price

of American wool.

The American woolgrower has but one market, and that market is the woolen manufacturer in this country. If he is placed in a position where he can not purchase wool, of course it is going to affect the price that the farmer receives for that article.

I suppose there is nothing that can be said or no plea which can be made by any human being that will change the mind of the committee reporting this amendment into the Senate.

Mr. THOMAS. No; we are ready to vote.

Mr. SMOOT. The Senator from Colorado shakes his head and says, "No; we are ready to vote." We have heard that statement in this Chamber beginning the very first day that the bill was discussed and repeated until this moment, when the Senator from Colorado reiterates it, positive of his position, knowing that he has the votes back of him to force it through. no matter what the result may be to the farmer, the wool-grower, or the manufacturer of this country.

Mr. JAMES. Mr. President, I placed in the Record about an hour since a table showing the number of sheep produced in the various States and the number of pounds of wool produced and the number of pounds of wool consumed. I then answered some questions submitted by the Senator from Utah and some other Senators, and the Senator from Montana [Mr. Walsh] took the floor and I went down to eat lunch. The Senator from Kansas rose and made this observation:

I see the Senator from Kentucky [Mr. James] has escaped. I desired to make an interrogatory of him before he left.

Mr. President, I am frank to admit that if I had known the Senator from Kansas was going to speak perhaps I should have escaped. I do not think he ought to find fault with anyone who seeks refuge from the Chamber when he proceeds to speak. But he ought not to have charged me at that particular moment with fleeing from the Chamber because of the fact that I feared he intended to speak or propound a question to me. had no idea of it. The truth of it is the question he propounded is not a new one with the Senator. It was propounded to me yesterday by the Senator from Wyoming [Mr. WARREN].

But the question he wanted to ask me was this, that as I had made it easy for the people in his State and in mine to know how many pounds of wool were produced there, to know how many pounds of wool had to be imported, if any, to supply the people there, I should have also supplied a table showing the number of manufacturers of clothing in the various States, and then the number of people who wear clothes.

Mr. President, I should be very glad to do that. I should be very glad to submit such a table. The Senator can do it himself, but if he will not do it, I am willing to do it for him-to take this bill under consideration in the Senate and to show the rates of the present law upon woolen clothes and to show the reduction made upon those same articles in our bill, a reduction from 100 and more per cent down to an average of 25 per cent.

I am willing to leave to the people of Kansas or Kentucky, or any other State in the American Union, what they shall say on a vote that will be cast against this bill for the maintenance of the existing rates of the present law.

Now take the State of Kansas. Kansas in 1910, according to the census, had 1,690,940 people. She produced 1,312,000 pounds of wool and her people consumed 10,829,074 pounds of wool.

In other words, there had to be imported into the State of Kansas 9,500,000 pounds of wool more than was produced there in order to supply the inhabitants of that State.

I put this in the RECORD in order to make it easy for the Senator from Kansas to point out to the people the pounds of wool produced there, the pounds of wool consumed by the people there, and then let him figure up for that constituency that have to pay this burden just how much additional tax he places upon them in order to give protection, as he calls it, to an industry that had, in 1910, 272,000 sheep, or an average of 11 sheep to each farmer.

There is not a great civilized government in this world that does not place wool upon the free list. It is a great basic product, and every time you give a protective tariff upon wool you give to the manufacturer a compensatory duty of four to one upon the cloth, and all of it has to be paid by the people who use the product of the wool industry.

Mr. President, it might also be asked of the Senator from Kansas why his party provides a tariff upon cotton clothes and places cotton upon the free list. This bill places the great necessities of life upon the free list and the Senator can not make me shrink from a comparison of the number of factories and those who consume clothes, as provided by this bill under consideration.

But I beg only that accompanying that shall be the rates of the existing law and the proposed rates of this bill and then let the American people say whether or not a vote cast against

this bill is a proper one.

Mr. BRISTOW. Mr. President, the Senator from Kentucky has very kindly stated, and I presume with accuracy, the number of pounds of wool that are produced in the State of Kansas, and then has estimated the number of pounds of wool that are consumed in the form of clothing by the people of that State.

I desire to say to him that in this bill he removes the tax that would serve as a protection for the men who produce the have heard it advocated in the other House, that if there was a

wool, and he still imposes a tax upon every pound of wool that is consumed by the people of that State. Instead of relieving the people of Kansas from the tax that is imposed upon the clothing that they wear, he takes from them the protection from the product which they produce and retains the tax upon the clothing that they wear.

And because some of us contend that the man who produces the wool should be treated with as much consideration as the man who takes the wool and weaves it into cloth or transforms it into a garment, the Senator assumes to reprimand us for such an attempt. This schedule, from the time the wool leaves the farmer's hands until it is consumed and worn out by his family, there is a protective tax imposed upon every process. who touches it from the day that it leaves the farm until it goes into the gutter has a protective duty on his work. The only man who is not given consideration in the handling of wool is the man who grows the sheep upon the American farm.

Mr. LANE, Mr. President-The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Oregon? •

Mr. BRISTOW. I do.

Mr. LANE. I should like to say that I am becoming confused in this argument. Yesterday I heard, or thought I did, an advertisement spread into the Record by the Senator from Pennsylvania [Mr. Penrose] showing that the woolen manufacturers of England were going to make an onslaught in this country with manufactured woolen articles and that the result was going to be disastrous to the American people; and here at this time we hear the Senator from Kansas state the oppo-

site of that. I say I am becoming confused.

Mr. BRISTOW. The Senator need not become confused as to what I have said. I am not complaining of the duties fixed upon the clothing here, and I am not asking that they be increased. I am not complaining here that the manufacturer of woolen goods has not been properly protected. I do not know whether he has or not; but this I do know, that he has been given consideration, he has not been placed on the free list, and I have been arraigned here because I am contending that the farmer has as much right to consideration from the American Congress as the manufacturer who takes the farm product as his raw material and begins to transform it into other products.

When the wool is taken to the factory the first process is to wash it and get the grease out of it, and the man who washes it and takes the grease out of it is given a protective duty of 15 per cent on the labor he expends in taking the grease out of that wool. Then it is combed into what they call tops, that we have been hearing so much about this morning, and the man who produces the tops from the wool has in this bill a protective duty of 5 per cent. It is contended here by men who claim to be experts that that is not enough. I do not know whether it is or not, but he gets a duty; though it may be small, he gets something.

And then you go to yarn, and this hill gives the man who takes the tops and transforms them into yarn 15 per cent pro-

tection for his work and labor.

Then the next step is the making of cloths, knit fabrics, and so forth, and the man who takes the yarn and transforms it into cloths and knit fabrics gets 35 per cent in this bill. I presume that that 35 per cent represents some of the tax that has been laid upon the yarns and the tops. In that 35 per cent I suppose is included some compensation to the man who weaves the cloth for the tax that has been paid upon the yarn from which the cloth is made. If the Senator's logic is good as to the farmer—that is, if a duty on raw wool increases the duty to be placed on cloth because it has to be carried into the cloth duty as a compensatory duty-the same ought to be true as to the duty on yarns and tops. He therefore puts a higher duty on the cloth because there is a duty on the yarn and the tops.

Mr. JAMES, Will the Senator yield a moment? Mr. BRISTOW. From his point of view, therefore, should be not take the duty off the yarn because by so doing he could reduce the duty on cloth?

Mr. JAMES. Why did not the Senator follow that policy upon cotton cloths when his side of the Chamber were making a tariff? With the cotton of the farm harder to produce than wool, in a hotter climate, under circumstances where toll is really burdensome, why was it the Senator put cotton on the free list and put a tax upon the manufactured product?

Mr. BRISTOW. Because the American people produce more cotton than any other country in the world and export over a million pounds, and it would not have done him any good to put it there.

Mr. JAMES. I have heard it stated here several times, and

tariff upon a certain character of cotton produced in this coun--long staple cotton, sea-island cotton-it would mean many million dollars to those who raise cotton in this country.

Mr. BRISTOW. I have not given that careful consideration. but it might be to the interest of this country to put a tariff on the long-staple cotton. I am not ready to say it would; I would want to give it consideration. If it is for the best interest of our country to place it there, I would vote for it without any hesitation.

Mr. SMOOT. I suppose the Senator remembers very well that there was an amendment offered to the Payne-Aldrich bill placing a duty upon that same class of cotton, and it would have been placed upon that class of cotton in the Payne-Aldrich bill if it had not been for the Democratic vote on the other side of the Chamber.

Mr. JAMES. It is the first time that I have heard that the Democrats were in control of the Senate until the 4th of last March. I thought the Republican Party had been in control of

the Senate for the last 16 years.

Mr. BRISTOW. Mr. President, I will advise the Senator that if it had not been for Democratic votes many of the duties concerning which he complains in the present law would not have been there, and one of them was a duty on iron ore.

I can tell the Senator another thing Mr. BRISTOW. Iron ore was placed on the dutiable list by Democratic votes in this Chamber, and the present chairman of the Committee on Finance cast one of them.

Mr. JAMES. It is the first time that I have heard that the majority party undertook to escape its responsibility by trying to throw the burden upon the minority party, but the Sena-

Mr. BRISTOW. Oh-

Mr. JAMES. Just a moment. I want to say to the Senator that if the people had not elected a majority of Republicans to the Senate four years ago there would not have been on the statute books this iniquitous and burdensome tariff law that

robs ninety-nine men in America for the benefit of one.

Mr. BRISTOW. It may be that the Senator is not advised as to the revision of the tariff in 1909, but I think he is; and I think the Senator knows that when some of us were fighting here for reduced duties and against duties that we did not believe were justified, we would have been successful if the Democratic Party-Democratic Senators, I should say; I am not charging this to the Democratic Party or to the Republican Party; I am talking about conditions as they exist-if Democratic Senators had not voted for duties then which they are denouncing now. As I say, the duty on iron ore is one of them

and lumber was another.

Mr. SHERMAN. Will the Senator from Kansas yield to me? The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Illinois?

Mr. BRISTOW. I yield to the Senator for a moment. Mr. SHERMAN. I am ready, Mr. President, to accept the statement made by Senators who represent the adverse party. The conditions governing the production of sea-island cotton, in my judgment, have now reached a stage that, in order to properly grow and market the sea-island cotton in this country, some fair degree of protection ought to be put upon it; and I will announce in the presence of Democratic Senators that I am ready, if they will add a paragraph of that kind to the bill, to vote for adequate protection of sea-island cotton now and hereafter. I believe that would be just. I happen to have had occasion at one time in my life to look into the matter, and I believe if the Senator from Kansas had the information which some of us possess on that question he would answer in the affirmative as readily as have I.

Mr. STONE. Now, Mr. President, I should like to dispose

of these two paragraphs.

Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. The Senator from Kansas has not yielded the floor.

Mr. BRISTOW. I am not through at all, I wish the Senator to understand. I have a few more things which I expect to say. I believe I had reached the production of cloth, upon

which a duty of 35 per cent is imposed by this bill.

We next come to blankets, upon which a duty of 25 per cent is imposed. I suppose the committee found it necessary to put a duty of 25 per cent upon blankets because there is a duty upon yarns. Of course if there had been no duty upon yarns or upon tops it would not have been necessary to impose a duty of 25 per cent upon blankets; but imposing a duty upon the raw material out of which the cloths and blankets are made—that is, the yarns—it is necessary to impose a higher duty on the cloth and blankets, in order to compensate the The duty on wool is not one that touches my constituency with

manufacturer of blankets and of cloth for the duty that he has to pay when he buys his yarns.

Mr. JAMES. We put some blankets upon the free list, as the Senator from Kansas doubtless has observed.

Mr. BRISTOW. I notice that there are some few, which are probably made mostly of cotton.

Mr. SMOOT. That was a political rate.

All of yours were political rates.

Mr. BRISTOW. Now, we come to women's and children's dress goods, and upon women's and children's dress goods the committee find it desirable to impose a duty of 35 per cent ad valorem-quite a comfortable duty, more than a third of the value. I suppose that this duty of 35 per cent is found necessary because of the duty imposed upon yarns from which the cloth and the dress goods are made. So, in order to protect the manufacturer of yarns, a higher duty—a duty of 35 per cent-is imposed upon the clothes which the women and chil-

Then we come to ready-made clothing. As to the millions of pounds of cloth-if I may have the attention of the Senator from Kentucky [Mr. James] about this matter, in which he has become so interested in regard to the people of Kansasas to the millions of pounds of wool which the people of Kansas have consumed, every pound of it is burdened by a tax put there by the Senator from Kentucky by his vote and which now meets his approval. There is a compensatory duty imposed on every pound of this clothing because the Senator from Kentucky found it necessary to give a protective duty to the manufacturer of yarn; but he holds up his hands in horror when a Senator from Kansas asks that the producer of wool be treated with the same consideration with which the Senator from Kentucky has treated the manufacturers of cloth and of yarn.

You can go through this bill and take up every item and every paragraph in it that relates to farm products and that principle prevails, and there is no schedule that manifests more clearly

its indefensible discrimination than does Schedule K.

Schedule K was attacked by a great Senator, Mr. Dolliver, upon this floor four years ago, and his speech on that occasion has had many feeble imitations here since this session began. Many Senators have tried to pattern after it and have read into the RECORD the same letters, have undertaken to formulate the same denunciations against Schedule K, and yet these same Senators in this bill take those reductions off the protection which the farmer got in Schedule K of the present law and mighty little of it off of the protection which the manufacturers got in that law. When you deduct from this measure the duty on wool and the compensatory duties that were imposed on cloth and clothing because of that duty on wool, which it was alleged simply made the manufacturer good, you leave the actual protective duties to the manufacturer very much where they were.

I am not one who believes that those compensatory duties that were imposed in Schedule K of the present law were justified; I do not believe that they were imposed in a proper way; I think they were far greater than they ought to have been; but when you take them out and come to the protective duties pure and simple which are given the manufacturers in this bill the reductions are not so important as to justify the proud boast that we have so frequently heard by the friends of this meas-So that the burden of the reduction which is claimed here is taken not from the manufacturer but from the producer of

The Senator from Montana [Mr. Walsh] spoke with force and commendable emphasis in denouncing the connection of Mr. North with the making of the tariff bill four years ago, but I have not been much interested in the discussion of Mr. North's connection with the tariff bill since the exposition made by former Senator Dolliver, of Iowa, because the power which he exhibited in exposing the scandal connected with that has never been approached by any Senator upon this floor. It is only the Senators who have come into the Chamber since that speech was delivered who have ever presumed to follow it up and to undertake to imitate it.

I invite the attention of the Senator from Montana, who has so vigorously denounced Mr. North, to the fact that this bill, which he is supporting with such carnestness, preserves a protective duty upon every item in which Mr. North was interested. There is not a manufacturer whom Mr. North represented here or anywhere else who has not a protective duty in this bill on the product which he turns from his looms. The only man who greatly suffers from the action of the framers of this bill is the

much personal interest. Kansas is not a large wool-producing State. I have made these remarks because I believe that this bill is discriminatory and unjust; and, furthermore, I do not want anyone to believe for a moment that he can force me to vote for a bill which I believe is wrong, for the reason there is now a law upon the statute books of which I disapprove and against which I voted. If such reasoning as that were to prevail, then a man would be compelled to vote for things which he believed were wrong, because a wrong had been done at another time in the consideration of another measure.

The question for consideration here is not whether this is a better or a worse bill than the present law, but whether or not this is a just bill and one that is worthy of the approval of Senators who are called upon to approve or condemn it. So far as I am concerned, when I cast my vote on this measure, it will be an indorsement or a failure to indorse the measure on its merits. I will not be coerced into voting for things that I believe to be iniquitous, because the bill contains a number of things for which I should be glad to vote if I were given the oppor-

While I am on my feet, I may say that for some reason that has not yet been explained, those in control of the national legislation this year have seen fit to group these tariff schedules into one bill, instead of bringing them in as separate bills as they did a year ago.

If this bill had been brought in schedule by schedule, as has been advocated for some years by leaders on both sides of the aisle of this Chamber, there are schedules here which, with some slight changes I would gladly support; but because the majority have apparently seen fit to crowd them into one bill, in order to force through Congress legislation which I believe to be unjust and pernicious, will not be sufficient reason for me to support such iniquitous legislation. Why could we not have had schedule by schedule presented to us as we had a year ago? Why this change? If that was a good system of legislation then, why is it not now? That is for the Senators who are responsible for this legislation to answer. It seems to me that the reason for abandoning schedule-by-schedule revision is that certain leaders felt that if the tariff were revised in that way there were some schedules carrying certain provisions which they desired to pass that could not be passed. was the reason, I believe, for grouping the schedules in former They have been grouped together in order that Congresses one schedule might carry another through.

We felt that we were getting away from that system, which has been denounced with vehemence, as I have said, on both sides of this Chamber; but, no; the same policy, the same purpose to force into the law provisions and measures that could not be forced there without such a grouping of schedules has been thought desirable, and, therefore, they have been grouped.

Mr. JAMES. Will the Senator yield to me right there? Mr. BRISTOW. Certainly.

Mr. JAMES. Of course, with 13 schedules in a tariff bill one schedule might be passed upon the theory that a certain amount of revenue would be produced by another schedule, but as matters went along the second schedule might be dedefeated entirely and the rates in the schedule first considered having been based upon the theory that the second schedule would be adopted there might be a large loss of revenue, and then you would have to go back and revise the first schedule. That is the trouble about revising the tariff schedule by schedule, as the Senator can very easily see.

As I understood the Senator, he said this bill was not perfect. Of course no tariff bill is ever perfect, but the question the Senator must answer when the roll call comes is whether or not this bill is a better bill, taking it as a whole, than the existing law. If it is, in my judgement, the Senator can not excuse himself to the satisfaction of the good people of Kansas by saying this is not a perfect bill. They are going to ask him Is it a better bill and less oppressive upon the people than the existing law? That is the issue the Senator from Kansas must

Mr. BRISTOW. Mr. President, I deny the issue. That is not the question which I expect to answer. If the Senator wants an answer, however, I can give him my opinion. The pending bill is not any better than is the existing law. I voted against the Payne-Aldrich bill; I denounced it; I do not believe in it; but as excessive and as unreasonable as some of the duties in that bill were, it was a consistent measure, because it undertook to protect American industries, although in protecting them there were injected into the measure provisions which I believe to be iniquitous.

The pending bill protects some of the same industries, though not all of them to so great an extent. It sacrifices the agricultural interests of this country in a manner that has never been approached or undertaken in any tariff legislation of the past; and I is chairman of the Progressive State committee, and it is the

because of its unjustifiable discriminations I have declared against this measure.

The Senator from Minnesota [Mr. Nelson] has just handed me a memorandum, stating that the Walker tariff, which was praised so extravagantly by the Senator from North Carolina [Mr. SIMMONS] this morning as being the best of all tariff measures, the one now pending more nearly approaching it in excellence than any other, imposed duties of 20 per cent on barley, beef, corn and corn meal, flaxseed, hams and bacon, rye and rye flour, oats and oatmeal, wheat and wheat flour.

Mr. WARREN. Mr. President, and that bill was based upon

the idea of protecting raw materials, the farmers' product, all

the way up.

Mr. BRISTOW. I do not pretend to be a tariff expert; I have a very limited knowledge of the Walker bill, but I think the Walker bill-and in this I agree with the Senator from North Carolina-was a much better bill than the pending one. It was certainly drawn upon a much more justifiable principle.

As to the schedule-by-schedule theory of revising the tariff, I realize the force of the argument the Senator from Kentucky [Mr. James] has made. I have heard it before; it is the usual argument to sustain the old system; it is the argument which has been made for combining all the schedules into one bill. That policy, however, was abandoned last year by the House of Representatives; and the Senator from Kentucky was then a Member of that body and a distinguished member of the Ways and Means Committee that prepared the schedule-by-schedule tariff bills. I presume he believed then that a schedule-by-schedule revision to be a better system. Under that plan each schedule would stand upon its own merits. Why has he changed his views this year?

The argument as to the effect a reduction or an increase in the duties imposed by one schedule might have upon the revenues would be a potent and powerful argument to me in behalf of a bill which the committee would report on any one schedule. That is true, and I believe it would be given full weight by the

Senate or by the Congress.

The objection to the old system, as I have said, was that it enabled those interested to force into a tariff bill duties that ought not to be there, because Senators or Members of the House would not vote against a measure having in it more provisions in which they believed than it had provisions in which they did not believe, and upon that theory the Democratic Congress has gone back to the old machine methods of tariff making.

I want to say to the Senator from Kentucky and to the Senator from North Carolina that if Senators on this floor would vote their convictions and use their own judgment upon the items of this bill, it would not pass; and, failing to pass, the tariff would then be revised, and revised at this session in harmony with the best judgment of the Congress, upon whom the responsibility of revising it depends. No Senator can excuse himself for voting for a measure he believes to be wrong because it is alleged that that is the best he can get. It is not the best we can get if every Senator will follow his conscience and his convictions independent of party caucuses and partisan influences that swerve him from what he believes to be his line of duty. So far as I am concerned, I propose to vote for the paragraphs in this bill which I believe are right and against those which I believe to be wrong; and when the bill is finally made up, if I do not believe it to be a just measure, I intend to vote against it.

Mr. STONE. Mr. President, the Senator from Kansas [Mr. Baistow] has made a great speech, and, to the general delight of all, has finally concluded it. Unless there is some other Senator who feels that he ought to deliver himself of some burden of concealed wisdom, and that that is of more importance than the winding up of this business, I should like now to proceed with the consideration of the immediate matter before the Senate.

Mr. WEEKS. Mr. President, I should like to take a short time before consent is given to proceed, as requested by the Senator from Missouri.

Mr. STONE. I beg the Senator's pardon.
Mr. WEEKS. Mr. President, a short time ago the Senator from Montana [Mr. Walsh] called as a witness the Boston Journal, and, if his other statements were not more accurate than the ones which he casually made about the Boston Journal, they should at least be revised. I do not think it is of great importance whether the Boston Journal is 20 years old or 50 years old; but it is more than 50 years old, to my certain knowledge. Evidently the Boston Journal was called as a witness because the Senator from Montana supposed it to be an independent paper owned by Mr. Frank A. Munsey.

As a matter of fact, it is not owned by Mr. Munsey at all. far as the public knows it is owned by Mr. Matthew Hale, who organ of the Progressive Party in New England. So it is neither Mr. Munsey's paper nor an independent paper.

The article which was quoted was not signed, and therefore it is impossible to say whether it was written by a tariff expert or by some one who does not know the difference between a wool top and a spinning top. I suspect the latter, but I do not think it should be giver any great weight in this debate. I think the Boston Journal has leanings toward the protective policy, and, as such, it deserves credit; but its owners would not claim for it expert standing on this subject; therefore I do not think the article quoted is entitled to any particular weight by the Senate.

The Senator from Montana referred once more and in practically the same language, and using the same facts which have been known to the public for the past 16 years, to the relations between Mr. Whitman, of the Arlington Mills, and Mr. North. I did not note anything new in the quotations which he used, but they were evidently made to prejudice opinion on the particular

topic which is now being considered.

It is true that Mr. Whitman is largely interested in the Arlington Mills, that he did construct the first mill for the manufac-ture of tops in this country, and that he has been an active advocate of the protective tariff for a great many years. He has appeared before the committees of Congress at different times. He appeared before the subcommittee having in charge this particular schedule, I am told, and I have no doubt he made an illuminating and informing statement to that committee on the matter in which he was interested; but the statement made by the Senator from Montana that the Arlington Mills and the American Woolen Co. are substantially the only manufacturers of tops in this country is very far from correct. It is true they are large manufacturers of tops, but the American Woolen Co. has, I am informed, at times been a large purchaser of tops, and there are a great many manufacturing concerns in the United States which manufacture their own tops as well as yarns and cloths. There are also many-I do not recall the number-engaged entirely in manufacturing tops.

Incidentally this industry is in the poorest condition it has been during the last 25 years. The woolen industry, except in special cases, has never been a particularly profitable one in the United States; and the stock of the Arlington Mills, to which the Senator from Montana [Mr. Walsh] has referred, is now selling at the lowest price it has sold for many years. dentally it has recently reduced its dividend one-half, a statement which usually brings joy to the hearts of the Democrats. I would rather see it prosperous, whoever owns it or whoever controls it, because if it is prosperous those who are connected with it are sure to be so, not only the owners of the mills but

I have not taken any time in the discussion of this particular schedule. It has been pretty fully discussed by other Senators who have given much time and consideration to it. I am well aware that the business men of this country, knowing that the Senate is in the hands of the Philistines, and that we are not going to get in the end any different results than have been reported, are desirous of having this bill passed. As far as I am concerned I should be glad, as soon as reasonable state-ments can be made of the reasons why particular schedules should not be adopted as they have been proposed, to have a vote on all schedules and on the bill-the sooner the better, in my judgment, from the standpoint of the Senate and the standpoint of the country at large. But I do not wish by my silence to have it inferred that I am in any way in approval of the rates proposed in this particular schedule.

Massachusetts is very largely interested in the woolen and worsted industry. Boston is the great wool center of the United States. Massachusetts is the leading State in the manufacture of the control o facture of woolen and worsted goods. A large percentage of our people are vitally interested in it. In my judgment this is the industry which is going to be most immediately and seriously affected by the passage of this bill. As I have just said. the woolen and worsted business is not in a very prosperous condition at best, and it has not been during the last 10 years, when duties have been high, as everyone knows. Just now, and indeed for the last several months, this business has been prostrated to a degree not known since 1895. I doubt if there are many woolen or worsted mills in this country that are running more than half time to-day; and no mill can make a profit running at one-half of its capacity.

I am opposed to every feature of this schedule-as opposed to putting wool on the free list as I am to other parts of it. think putting wool on the free list is entirely without justifica-tion. The world's production of wool does not vary greatly. It has not increased materially in this country, if at all, during the past 10 years, when the duty has been very high. If there is to be increased production anywhere, it is going to be in other countries, where lands are cheaper than they are in this country. Putting wool on the free list is going necessarily, in my judgment, to reduce somewhat the production in this country, if not largely so; and it is going to increase the production, if there is an increase, in other countries. Therefore we are throwing away the revenue which we have been getting from the importations of wool without any compensating benefit to the users of woolen goods in any form, unless the total production is largely increased, which I doubt.

There is a large amount of capital invested in the wool business which will be affected by the proposed change. raisers of wool are entitled to reasonable protection, and the proposed action will, in effect, put a bounty on foreign wool and result in the importation of tops instead of wool.

But even if wool is put on the free list, I believe the other duties have not been arranged in such a way as to produce the results to which manufacturers are entitled. The question of tops has been very fully debated to-day or will be later. I think there is too great proneness for those who believe in a higher rate to take one class of tops as an example, and those who believe in the proposed rate to take a lower class of tops for their example. But I doubt if there is a manufacturer of tops in the United States who will claim, or any evidence can be submitted here to show, that the average top can be produced at the rate proposed in this bill. I have no doubt that the average is very much higher, and certainly the average cost in Great Britain is higher than the rate proposed by the bill. But even if the top rate were satisfactory, no provision has been made to provide for rovings, which are the next step in the production of cloths. The cost of producing rovings adds at least 50 per cent to the cost of producing tops, and rovings should be limited in the number of yarns in them, so that there may be a differentiation between rovings and yarns.

There is no way of telling, as this bill is framed, whether a certain product is a roving or a yarn. The result is that they go from the top stage, through rovings, of which there are 6 or 8 different numbers, up to the yarn stage, of which there are some 20 numbers, with exactly the same rate of duty on tops and on rovings, and possibly going over into the yarn numbers; then it is proposed to put a duty of 15 per cent on yarns.

There should be in framing the bill a differentiation between tops and rovings and between rovings and yarns, and when it comes to yarns there should be a variation in the rate of duty imposed on coarse yarns and fine yarns. The Bradford commission price for producing yarns varies greatly, because the cost of producing yarns of a very fine quality is materially greater than the cost of producing coarse yarns.

From all these standpoints I believe this schedule should be revised. I believe there should be a duty on wool. I believe the rate on tops should be increased; that there should be a distinct and separate rate on rovings; that there should be an increased and equalized rate on yarns. Even admitting that wool should be put on the free list, these intermediate changes should be

made by the framers of the bill.

I have taken all the time I propose to take at this time, and I have simply taken this to voice what I believe is substantially the unanimous sentiment of the people of Massachusetts, and this applies to dealers in wool, to manufacturers of tops, rovings, yarns, and cloth alike. Without exception, as far as I know, they believe that the rates in this schedule are inadequate, and that they are so framed that they will produce great inequalities.

Mr. STONE. Mr. President, I ask that we may have a vote on the committee amendment in paragraph 295.

The amendment was agreed to.

Mr. STONE. I understood that the committee amendment in paragraph 296 had been agreed to; but in order that there may be no question about it, I ask that it may now be submitted.

The VICE PRESIDENT. The question is upon agreeing to

the committee amendment in paragraph 296.

The amendment was agreed to.

The amendment was agreed to.

Mr. STONE.

Mr. STONE. That concludes the wool schedule.
Mr. SMOOT. That concludes it, with the understanding that
if the Senator from Wyoming desires to speak upon paragraph 296 he may do so.

Mr. STONE. I will say that the Senator from Wyoming asked that paragraphs 295 and 296 might both go over, so that if he desires to do so he may speak upon the two together.

Mr. SMOOT. And the remarks he will make will cover the

Mr. STONE. Yes. I should like, before we take up the next schedule, to revert to paragraph 324 of the silk schedule and to offer an amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated. The Secretary. In paragraph 324, page 95, line 23, before the word "beltings," it is proposed to insert "belts."

The Secretary. Also, on page 96, line 3, after the word "manner," it is proposed to insert "and not specially provided for in this section."

The amendment was agreed to.

Mr. SIMMONS. Mr. President, the next schedule is the one relating to papers and books. The one following that deals with sundries. Those two schedules and the free list are the only schedules left undisposed of.

The chairman of the subcommittee having in charge Schedule M and Schedule N is detained from the Senate on account of sickness in his family. I ask that those two schedules may be passed over, and that the Senate may now take up the free list, beginning on page 123.

Mr. LODGE. Do I understand the Senator is going to pass over the paper schedule?

Mr. SIMMONS. Yes. The Senator from Maine [Mr. Johnson], who is the chairman of the subcommittee, and who has given great study to that subject, is not in the Chamber to-day on account of illness in his family. I should not like to take up the schedule in his absence. Of course if there is an insistence about it we will do it, but I should much prefer to take up the free list.

Mr. LODGE. Certainly.

Mr. SIMMONS. If any Senator who desires some item in the free list passed over happens to be absent or is not ready we will consent to its going over.

Mr. LODGE. Is the Senator going to pass over the sundries

schedule also?

Mr. SIMMONS. Yes. The Senator from Maine [Mr. Johnson] is also chairman of that subcommittee. There are only three schedules left now-sundries, papers and books, and the free list.

Mr. SMOOT. I am quite positive there are some Senators who desire to speak upon some of the items in the free list who had no idea it would be reached to-day. If I knew the particular paragraphs in which they were interested I would ask that they might go over, but I am not informed as to which those paragraphs are.

Mr. SIMMONS. I think there will be no difficulty about it. If any Senator should come in and state that he was absent and should want to discuss a paragraph that we had passed, we would return to it without any objection on this side

Mr. LODGE. Mr. President, there is one article in the free list which I do not suppose we shall reach, even if we begin on the free list at this moment, but which is also involved in the third paragraph of the paper schedule. It involves a question not of rates but of the countervailing duties in regard to the exportation of wood and wood pulp from Canada.

When that is reached, if the Senator desires, Mr. SIMMONS.

we will pass over it.

Mr. LODGE. I shall be very glad to discuss it, if the Senator is willing. I am ready to go on with it, I supposed we should take up paper this afternoon.

Mr. SIMMONS. I should very much prefer that the Senator

from Maine should be here when that is discussed.

Mr. LODGE. I will wait, of course, for the Senator from Maine, if that is the desire. There are some items in the free list which I should like to discuss. Of course I had no idea that that would come before the sundries and the paper schedule, and I have not my papers here, so that there are some things I shall have to ask to have passed over for myself. I do not know how it is with other Senators.

Mr. SMOOT. Mr. President, I desire to say that the senior Senator from Pennsylvania [Mr. Penrose] expected to offer his proposed substitute for Schedule K before its consideration was completed in the Committee of the Whole. He had no idea that we would get through with the schedule to-day. So if the Senator is back on Monday or Tuesday, before the bill gets into the Senate, no doubt the Senator having the bill in charge will allow him to offer his substitute then.

Mr. SIMMONS. Of course, if at some time before the Senate gets through with the bill the Senator from Pennsylvania desires to offer a substitute, there can be no objection to that course.

Mr. SMOOT. I simply wanted to have that understood, because the Senator from Pennsylvania was compelled to leave the city to-day.

Mr. SIMMONS. Then I ask that the Secretary may read

the bill, beginning with the free list, on page 123.

The reading of the bill was resumed, beginning under the heading "Free list," on page 123, line 21.

The next amendment of the Committee on Finance was, in paragraph 401, page 124, line 11, after the word "machines," to strike out the word "and"; and in the same line, after the

word "gins," to insert "beet and sugar-cane machinery," so as to make the paragraph read:

401. Agricultural implements: Plows, tooth and disk harrows, headers, harvesters, reapers, agricultural drills and planters, mowers, horserakes, cultivators, thrashing machines, cotton gins, beet and sugar-cane machinery, wagons and carts, and all other agricultural implements of any kind and description, whether specifically mentioned herein or not, whether in whole or in parts, including repair parts.

The amendment was agreed to.

The next amendment was, in paragraph 402, page 124, line 16, after the word "and," to insert "all," and in the same line, after the word "albumen," to strike out the comma, so as to make the paragraph read:

402. Albumen, blood, and all albumen not specially provided for in this section.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 124, line 19, to insert a new paragraph, as follows:

403½. Alizarin, natural or synthetic, and colors obtained from alizarin, anthracene, and carbazol.

Mr. SMOOT. I ask that that paragraph may be passed over. Mr. SIMMONS. That is satisfactory.

The VICE PRESIDENT. Paragraph 4031 will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 404, page 124, line 21, after the words "sulphate of," to insert "perchlorate of," so as to make the paragraph read:

404. Ammonia, sulphate of, perchlorate of, and nitrate of.

The amendment was agreed to.

The next amendment was, on page 144, line 22, to insert a new paragraph, as follows:

4045. Antimony ore, stibuite and matte containing antimony, but only as to the antimony content.

Mr. THOMAS. Mr. President, when the paragraph of Schedule C relating to antimony was before the Senate the suggestion was made by the Senator from Utah that antimony matte would be included instead of excluded from that section. I have since examined into the matter, and I am convinced that the Senator is right. So this paragraph will be taken back by the

committee and we probably shall make a change in it.

The VICE PRESIDENT. Paragraph 404½ will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 405, page 125, line 23, after the word "horses," to strike out "asses, cattle"; in the same line, after the word "mules," to strike out "sheep, swine, and goats" and insert "and asses," so as to read:

Horses, mules, and asses straying across the boundary line into any foreign country, or driven across such boundary line by the owner for temporary pasturage purposes only, etc.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 412, page 127, line 10, after the word "means," to insert "steel boxes," and, in the same paragraph, page 128, line 10, after the word "repairs," to insert "at the rate at which the article itself would be subject if imported," so as to make the paragraph read:

the article itself would be subject if imported," so as to make the paragraph read:

412. Articles the growth, produce, or manufacture of the United States, when returned after having been exported, without having been advanced in value or improved in condition by any process of manufacture or other means; steel boxes, casks, barrels, carboys, bags, and other containers or coverings of American manufacture exported filled with American products, or exported empty and returned filled with foreign products, including shooks and staves when returned as barrels or boxes; also quicksilver flasks or bottles, iron or steel drums of either domestic or foreign manufacture, used for the shipment of acids, or other chemicals, which shall have been actually exported from the United States; but proof of the identity of such articles shall be made under general regulations to be prescribed by the Secretary of the Treasury, but the exemption of bags from duty shall apply only to such domestic bags as may be imported by the exporter thereof, and if any such articles are subject to internal-revenue tax at the time of exportation, such tax shall be proved to have been paid before exportation and not refunded; photographic dry plates or films of American manufacture (except moving-picture films), exposed abroad, whether developed or not, and films from moving-picture machines, light struck or otherwise damaged, or worn out, so as to be unsuitable for any other purpose than the recovery of the constituent materials, provided the basic films are of American manufacture, but proof of the identity of such articles shall be made under general regulations to be prescribed by the Secretary of the Treasury; articles exported from the United States for repairs may be returned upon payment of a duty upon the value of the repairs at the rate at which the article itself would be subject if imported under conditions and regulations to be prescribed by the Secretary of the Treasury; Provided, That this paragraph shall not apply to any article

ported without payment of internal-revenue tax shall be reimported it shall be retained in the custody of the collector of customs until internal-revenue stamps in payment of the legal duties shall be placed thereon: And provided further. That the provisions of this paragraph shall not apply to animals made dutiable under the provisions of paragraph 405.

The amendment was agreed to.

The reading of the bill was resumed, and the Secretary read

down to paragraph 416, on page 129.

Mr. LODGE. I ask that paragraph 416 may be passed over. My colleague [Mr. WEEKS] has left the Chamber, and I know he desires to be heard upon it. I do not wish to speak upon it

Mr. SIMMONS. That is satisfactory.

The VICE PRESIDENT. May the Chair inquire of the Senator from Massachusetts whether there is any objection to agreeing to the committee amendment before the paragraph goes

Mr. SIMMONS. I should have asked that that paragraph go over if the Senator from Massachusetts had not done so, as the committee desires to consider somewhat further its own amend-

The VICE PRESIDENT. Paragraph 416 will be passed over. The reading of the bill was resumed, and the Secretary read down to paragraph 423, on page 130.

Mr. SMOOT. I ask that paragraph 423 may be passed over. The Senator from North Dakota [Mr. Gronna] requested that

that he done

The VICE PRESIDENT. Paragraph 423 will be passed over. Mr. NELSON. In reference to paragraph 423, I suggest to the Senators in charge of the bill that they strike out the 600-foot limitation and make it "700 feet to the pound," because there is a good deal of the better quality of manila twine that runs that much to the pound.

Mr. THOMAS. I will state to the Senator that the paragraph went over upon the request of the Senator from Utah.

Mr. NELSON. Has the paragraph gone over? Very well. Before I sit down, then, I wish to suggest to the Senators on the other side who have charge of the bill that the limitation should be entirely removed; that binding twine ought to be free, whether it runs 600 or 700 or 800 feet to the pound. I am not sure but that some of it, the best quality of manila twine, will run 750 feet to the pound; and I should be glad if

the committee would make the proper amendment.

Mr. KENYON. Mr. President, I wish to inquire of the Senator from Minnesota why it would not be advisable to strike out all of that paragraph after the word "twine," if the intention is to put all binding twine on the free list? I know that was the desire of the Senator Property Parks.

that was the desire of the Senator from North Dakota.

Mr. NELSON. I think it would be best to strike it all outto strike out the limitation altogether. If you retain it, however, I suggest that it ought to be "not more than 750 feet to

Mr. McCUMBER. Mr. President, the trouble with the suggestion of striking out the limitation is that twine might be imported as binding twine which could not be used for that purpose and would be used for other purposes. As this is intended to refer only to binding twine, there ought to be a limit on the size, and I think if it should be made 750 feet to the pound it would cover everything that could be called binding twine.

The reading of the bill was continued.

The next amendment of the Committee on Finance was, on page 130, after line 16, to insert a new section, as follows:

4271. Blankets, composed wholly or in chief value of wool, valued at less than 40 cents per pound.

Mr. SMOOT. Let that go over, Mr. President. The VICE PRESIDENT. The paragraph will go over.

The reading of the bill was continued.

The next amendment of the committee was, in paragraph 430, page 130, line 25, after the word "use," to strike out the remainder of the paragraph, in the following words:

Press cloths, composed of camel's hair, imported expressly for oil-milling purposes and marked so as to indicate that it is for such purposes, and cut into lengths not to exceed 72 inches and woven in widths not under 10 inches not to exceed 15 inches, and weighing not less than one-half pound per square foot.

The amendment was agreed to.

The reading of the bill was continued.

The next amendment of the committee was, in paragraph 433, page 131, line 13, after the word "muster," to strike out "engravings"; in line 14, before the word "lithographic," to strike out "etchings"; in the same line, after the word "prints," to strike out "bound or"; in the same line, after the word "unbound," to strike out "and charts"; and in line 15, before the

word "which," to insert "or in bindings over 20 years old, and charts," so as to make the paragraph read:

433. Books, maps, music, photographs, lithographic prints, unbound or in bindings over 20 years old, and charts, which shall have been printed more than 20 years at the date of importation, and all hydrographic charts, and publications issued for their subscribers or exchanges by scientific and literary associations or academies, or publications of individuals for gratuitous private circulation, not advertising matter, and public documents issued by foreign governments.

Mr. LODGE. Mr. President, I wish to discuss those committee amendments. I do not understand why engravings, etchings, and charts should be taken from the free list. It seems to me that those are objects of general interest, educational and artistic. I suppose they are put somewhere on the dutiable list. The paragraph of the free list now reads:

Books, maps, music, photographs, lithographic prints, unbound or in bindings over 20 years old, and charts.

Mr. HUGHES. The change was merely one of phraseology, so far as charts are concerned.

Mr. LODGE. I see it was a change only in phraseology. Lithographic prints, to which I have no sort of objection, were added, but I do not see why engravings and etchings, which are far more valuable artistically than lithographic prints, should be taken from this clause. I hope that will not be done.

Mr. STONE. I suggest to the Senator that for the present, in the absence of the Senator from Maine [Mr. Johnson], we

may pass over the paragraph.

Mr. LODGE. I am perfectly willing to let it go over, but I should like to call the Senator's attention to another point. The committee has added "or in bindings over 20 years old, and charts." I think the intention of that amendment is entirely proper. Books of great value are often sent abroad and bind-I think the intention of that amendment is entirely ings of great cost are put upon them. I think it would be just as well if the bindings were made here; but, anyway, I see no reason why they should not pay a revenue duty. But it is so worded as to leave a very serious ambiguity; that is, whether it is only the binding or whether it covers the book also. Take a case like this—I happened to take it from an English catalogue: A first folio Shakespeare worth \$20,000, of course free under our law, as it always has been, would come in free. If you put a binding on it, in the particular case I am referring to, worth \$15, I do not think it is perfectly clear that you would not tax that book at the value of \$20,000. That is not the intention of the framers of the paragraph, of course. Such has never been the intention. I think there is an ambiguity, which I wish the committee would look into if they are going to take the amendment back. I have not attempted to reword it.

Mr. STONE. It seems to me that books, maps, and so forth, unbound, or in bindings over 20 years old, would indicate that

they had been printed more than 20 years.

Mr. HUGHES. I will say to the Senator that that language was added in order to correct a practice. It has been the custom, I understand, to send books abroad and have them bound. The books have been printed in this country and they are re-bound on the other side, and merely because they were printed more than 20 years ago they would be admitted free, whereas the object in putting them on the free list was to permit books more

than 20 years old to come in free.

Mr. LODGE. Certainly; I understand that.

Mr. HUGHES. This discriminated very much against our bookbinders, and they complained about it.

Mr. LODGE. I will take that in conjunction with paragraph

Books of all kinds, bound or unbound, not specially provided for, 15 per cent ad valorem.

That is limited in the case of the English language to books

less than 20 years old.

Mr. THOMAS. I will say to the Senator from Massachusetts that paragraph 337 will probably be reported to the Senate in a different form.

Mr. HUGHES. In any event the Senator will notice that if that language stays as it is, it would provide that books of all kinds, bound or unbound, not specially provided for, would have 15 per cent ad valorem. This applies only to books with bindings of a certain age.

Mr. LODGE. No; the way you have it worded it applies to

bindings over 20 years old.

Mr. HUGHES. But if they are in bindings over 20 years old they must have been printed more than 20 years.

Mr. LODGE. That brings me just to the point. If the binding is over 20 years old it does not follow that the book is over 20 years old. Very frequently an old binding is purchased and placed by book fanciers on a book; in order to have the binding in the same period as the book when written.

Old print bindings command an immense price, and very often they are taken off the book to which they belong and applied to some book of great value. It does not necessarily follow that that is an exception to paragraph 337. Of course, the purpose of these clauses always has been to limit the books that had to bear a duty to books printed in the English language and that were less than 20 years old. That was the dutiable class.

Mr. HUGHES. Then it was found that books were collected

in this country and sent abroad to be cheaply bound and brought

in free of duty.

Mr. LODGE. I am entirely in sympathy with the purposes of the amendment, as I said in the beginning, putting a duty on new bindings, but I am afraid the way it is worded leaves great ambiguity.

Mr. HUGHES. The paragraph will go over.

Mr. LODGE. I hope those paragraphs will be amended by the committee so as to make it clear that the object is to place the duty on binding that is less than 20 years old. The paragraph is going back. I only desired to call the attention of the committee to it and to express the hope that they will consider those two paragraphs in conjunction.

The next amendment of the committee was, in paragraph 434, page 131, line 22, after the word "Books," to strike out "and pamphlets printed chiefly in languages other than English; also books," and in line 24, after the word "blind," to insert all textbooks used in schools and other educational institutions; Braille tablets, cubarithmes, special apparatus and objects serving to teach the blind, including printing apparatus, machines, presses, and types for the use and benefit of the blind exclusively," so as to make the paragraph read:

434. Books and music, in raised print, used exclusively by the blind, and all textbooks used in schools and other educational institutions; Brallle tablets, cubarithmes, special apparatus and objects serving to teach the blind, including printing apparatus, machines, presses, and types for the use and benefit of the blind exclusively.

Mr. NELSON. Mr. President, I trust the Senator in charge of this paragraph will let it be passed over. The amendment reported by the committee, I think, ought to be modified. I should like to have it passed over in order that the committee may give it further consideration.

Mr. LODGE. There will be a good deal of debate on para-

graph 434.

The VICE PRESIDENT. Paragraph 434 goes over. Para-

graph 433 has also gone over.

The next amendment of the Committee on Finance was, in paragraph 435, page 132, line 7, after the word "use," to strike out "and" and insert "or"; and, in line 11, after the word "use," to strike out "and" and insert "or," so as to make the paragraph read:

435. Books, maps, music, engravings, photographs, etchings, lithographic prints, and charts, specially imported, not more than two copies in any one involce, in good faith, for the use or by order of any society or institution incorporated or established solely for religious, philosophical, educational, scientific, or literary purposes, or for the encouragement of the fine arts, or for the use or by order of any college, scademy, school, or seminary of learning in the United States, or any State or public library, and not for sale, subject to such regulations as the Secretary of the Treasury shall prescribe.

The amendment was agreed to.

The Secretary continued the reading of the bill.

The next amendment of the committee was, on page 132, to strike out paragraph 438, in the following words:

438. Bran and wheat screenings.

Mr. McCUMBER. I ask that that paragraph may go over.

The VICE PRESIDENT. Paragraph 438 goes over.

Mr. THOMAS. Mr. President, I wish merely to call the attention of the Senator from North Dakota to the fact that paragraph 438 was stricken out because the items there are included in the subsequent paragraph relating to wheat and wheat flour and the products of wheat.

Mr. McCUMBER. I presume that is true; but I want to look

into it, if the Senator has no objection.

Mr. THOMAS. Very well.

The Secretary continued the reading of the bill.

The next amendment of the Committee on Finance was, in paragraph 450, page 133, line 15, after the word "separators," to insert "sand-blast machines, sludge machines," so as to make the paragraph read:

machines, typewriters, shoe machinery, cream separators, sand-blast machines, sludge machines, and tar and oil spreading machines used in the construction and maintenance of roads and in improving them by the use of road preservatives, all the foregoing whether imported in whole or in parts, including repair parts. 450. Cash registers, linotype and all typesetting machines,

Mr. SHERMAN. I should like to have paragraph 450 passed over for the present.

Mr. SIMMONS. Does the Senator object to action upon the committee amendment to that paragraph?

Mr. SHERMAN. I wish to be heard on only one item of the paragraph. After it has been passed over it can be taken up for consideration at any time. The Senator from Ohio [Mr. BURTON] is not here.

Mr. SIMMONS. I ask that the committee amendment to that paragraph be acted on now.

Mr. SMOOT. But not that the paragraph be finally passed

Mr. SIMMONS. Not finally passing upon the part which the Senator wishes to discuss.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.
Mr. LODGE. Now it is to be passed over.
The VICE PRESIDENT. The paragraph will be passed over. The next amendment of the committee was, on page 133, after line 19, to insert as a new paragraph:

4501. Cast-iron pipe of every description.

Mr. SMOOT. Let that go over to-day. The VICE PRESIDENT. Paragraph 4501 goes over.

Mr. SIMMONS. Did we not discuss that very elaborately and take a vote upon it?

Mr. SMOOT. Not upon the wording of this paragraph, "cast-iron pipe of every description." The junior Senator from Pennsylvania [Mr. OLIVER] is not here, and I think he desires to

submit a few remarks on it.

The VICE PRESIDENT. Paragraph 450½ will be passed

The next amendment of the committee was, in paragraph 452, page 433, line 22, after the word "Catgut," to insert "for surgical use, and," so as to make the paragraph read:

452. Catgut, for surgical use, and whip gut, or worm gut, unmanufactured.

The amendment was agreed to.

The next amendment was, on page 133, after line 23, to insert as a new paragraph the following:

4521. Cement, Roman, Portland, and other hydraulic.

The amendment was agreed to.

The reading of the bill was continued.

The next amendment was, in paragraph 460, page 134, line 14, after the word "tar," to insert "dead or creosote oil," and in line 15, after the word "as," to insert "anthracene and anthracene oil," so as to make the paragraph read:

460. Coal tar, crude, pitch of coal tar, wood or other tar, dead or creosote oll, and products of coal tar known as anthracene and anthracene oil, naphthalin, phenol, and cresol.

The amendment was agreed to.

The next amendment was, on page 135, line 10, to strike out paragraph 471, in the following words:

471. Coral, marine, uncut, and unmanufactured.

The amendment was agreed to.

The next amendment was, in paragraph 476, page 135, line 16, after the word "kryolith," to insert "natural," so as to make the paragraph read:

476. Cryolite, or kryolith, natural.

The amendment was agreed to.

Mr. SMOOT. Let that paragraph go over.

The VICE PRESIDENT. Paragraph 476 goes over with the amendment agreed to.

The next amendment was, on page 135, after line 22, to insert as a new paragraph:

4813. Glaziers' and engravers' diamonds, unset, miners' diamonds, and diamond dust.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 485, page 136, line 15, before the word "birds," to insert the word "fowls," so as to make the paragraph read:

485. Eggs of fowls, birds, fish, and insects (except fish roe preserved for food purposes): Provided, however, That the importation of eggs of game birds or eggs of birds not used for food, except specimens for scientific collections, is prohibited: Provided further, That the importation of eggs of game birds for purposes of propagation is hereby authorized, under rules and regulations to be prescribed by the Secretary of the Treasury.

Mr. LODGE. Mr. President, I presume the word "fowls" is to be inserted there in order to make sure that eggs of poultry are put on the free list. Of course the hen is a bird, but the word "poultry" seems more natural.

Mr. WILLIAMS. What was the question?

Mr. LODGE. I was asking about the insertion of the word "fowls." I suppose it was done to make sure that the eggs of poultry were placed on the free list. Mr. WILLIAMS. I think that is right.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

Mr. WILLIAMS. I ask to recur to paragraph 416 for a mo-

The VICE PRESIDENT. The Chair will state that the para-

graph has gone over by agreement.

Mr. WILLIAMS. I understand that; but I want to offer an amendment to perfect it, and I thought then it could go over as perfected. Of course it will have to be recurred to by unanimous consent, if at all, because it was passed over in that way. I desire to move to amend the committee amendment by striking out the words "nor in any manner loaded so as to increase the weight per yard."

I have consulted with members of the committee, and we think we have made a mistake in the insertion of that language.

So I desire to move to strike it out.

Mr. LODGE. I do not rise to object to the amendment, but that whole paragraph was passed over, and I think the amendment had better be reserved until we again take it up. nothing with that paragraph at all, but passed it over.

Mr. WILLIAMS. I thought I had obtained unanimous consent to recur to it, for the purpose of perfecting it. If I have not obtained unanimous consent, of course, I will not proceed. I understood the presiding officer to put the question to the

The VICE PRESIDENT. The question was not put; but there was no objection made.

Mr. WILLIAMS. That is what I understood. Did the Chair

ask if there was objection?

Mr. LODGE. It was agreed by unanimous consent to pass

the paragraph over.

Mr. WILLIAMS. I understood that; but I then asked unanimous consent to recur to it, for the purpose of perfecting the committee amendment, so that when it is passed over it is passed over as we want it to be, and not as we do not want it

Mr. LODGE. I have no objection to the amendment. Mr. WILLIAMS. Then, I move to strike out the words "nor in any manner loaded so as to increase the weight per yard."

The VICE PRESIDENT. The amendment to the amendment

will be stated.

The Secretary. In paragraph 416, page 129, line 13, after the word "process," it is proposed to amend the amendment of the committee by striking out the words "nor in any manner loaded so as to increase the weight per yard."

The VICE PRESIDENT. The question is on agreeing to the

amendment to the amendment.

The amendment to the amendment was agreed to.
The VICE PRESIDENT. The paragraph now goes over.

Mr. McLEAN. Mr. President, I should like to call the attention of the Senator in charge of this portion of the bill to the fact that if paragraph 471, on page 135, is stricken out without providing a substitute narrowsch, the content of the paragraph (the paragraph the paragraph to the paragra providing a substitute paragraph, the sequence in the numbers will be broken.

Mr. LODGE. That is a matter that can be attended to in conference.

Mr. McLEAN. It can easily be remedied by advancing the numbers of the succeeding paragraphs until we get to paragraph 4814.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 486, page 136, line 23, after the word "corundum," to insert "and crude artificial abrasives, not specially provided for," so as to make the paragraph read:

486. Emery ore and corundum, and crude artificial abrasives, not specially provided for.

Mr. SMOOT. I ask that that paragraph may be passed over. The VICE PRESIDENT. The paragraph will be passed over. The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 492, page 137, line 10, after the words "Flax straw," to insert "flax, not hackled or dressed; flax hackled, known as 'dressed line,' tow of flax and flax noils; hemp, and tow of hemp; hemp hackled, known as 'line of hemp,'" so as to make the paragraph read:

492. Flax straw, flax, not hackled or dressed; flax hackled, known as "dressed line," tow of flax and flax noils; hemp, and tow of hemp; hemp hackled, known as "line of hemp."

Mr. McCUMBER. I ask that paragraph 492 be passed over. Mr. SIMMONS. I ask the Senator if he would have any objection to discussing it this afternoon?

Mr. McCUMBER. I wish to offer an amendment to the para-

graph, which I can not draw at this time. I do not desire to

discuss the duty on flax, I will say to the Senator, any further than I have done.

Mr. SIMMONS. Very well,
The VICE PRESIDENT. The paragraph will be passed over. The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 137, after line 19, to insert a new paragraph as follows:

4961. Fulminates, fulminating powder, and other like articles not specially provided for in this section.

The amendment was agreed to.

The next amendment was, on page 137, after line 21, to insert a new paragraph, as follows:

4963. Furs and fur skins, undressed.

The amendment was agreed to.

The next amendment was, on page 137, after line 23, to strike out paragraph 498, as follows:

498. Glass enamel, white, for watch and clock dials.

Mr. LODGE. Mr. President, I should like to ask why glass enamel used in the manufacture of watch and clock dials, on which there has been a very heavy reduction of duty, has been stricken from the free list and put on the dutiable list? Perhaps it is not put on the dutiable list; I have not been all through the free list, but I understand that it is on the dutiable The committee withdrew the watch paragraph.

Mr. HUGHES. This item has been put in Schedule B. The reason it was stricken from the free list was because of the difficulty in the administration of the law and because of the

conflict with the other paragraph in Schedule B.

Mr. LODGE. Glass enamel used for watch and clock dials is on the free list now, and, as I have said, the duty on watches and clocks has been immensely reduced. It seems to me, inasmuch as the watch paragraph has been withdrawn the enamel paragraph ought to be taken into consideration by the committee in connection with perfecting the watch paragraph, which, as I have said and as the Senator is aware, has been withdrawn.

Mr. SMOOT. The Senator will find that it falls now in

paragraph 98.

Mr. HUGHES. Yes; paragraph 98.

Mr. SMOOT. An amendment was reported and agreed to adding glass enamel to the fusible enamel covered by that paragraph, so that it will carry a duty of 20 per cent.

Mr. LODGE. It will carry a duty of 20 per cent.

Mr. HUGHES. That has been adopted and is not in controversy, as I understand. The watch paragraph was taken back not for that reason, and this amendment was reported, I will say to the Senator, because, as I have said, it was found impossible to permit this glass enamel for watch dials to come in free without throwing the door open for all glass enamel. That is the difficulty.

Mr. LODGE. It has been done for a good many years without letting in all glass enamel.

Mr. HUGHES. It did let in all glass enamel.

Mr. LODGE. It does seem to me that it ought to be taken into consideration with the watch paragraph; and I will ask that the paragraph be passed over for the present, until the watch paragraph is taken up.

The VICE PRESIDENT. Paragraph 498 will be passed

The reading of the bill was resumed.

The next amendment of the Committee on Finance was. in paragraph 505, page 138, line 24, after the word "Gum," to insert "Amber in chips valued at not more than 50 cents per pound," so as to make the paragraph read:

505. Gum: Amber in chips valued at not more than 50 cents per pound, copal, damar, and kauri.

Mr. SMOOT. I ask that the paragraph go over, in order that I may have an opportunity to offer an amendment to it, not for any discussion.

The VICE PRESIDENT. There is no objection, as the Chair understands, to the committee amendment. The question is on agreeing to the amendment.

The amendment was agreed to.

The VICE PRESIDENT. The paragraph will be passed over. The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 139, beginning in line 1, to insert a new paragraph, as follows.

505%. Gunpowder, and all explosive substances, not specially provided for in this section, used for mining, blasting, and artillery pur-

The amendment was agreed to.

The next amendment was, in paragraph 518, page 140, line 2, after the word "water," to insert "and colors obtained from indigo," so as to make the paragraph read:

518. Indigo, natural or synthetic, dry or suspended in water, and colors obtained from indigo.

Mr. SMOOT. Let that paragraph be passed over.

The VICE PRESIDENT. Paragraph 518 will be passed over. Mr. SIMMONS. Mr. President, I do not suppose the Senator has any objection to action upon the committee amendment.

Mr. SMOOT. The reason I asked that the paragraph go over is that I want to call the attention of the Senate to the words

and colors obtained from indigo."

Mr. SIMMONS. Then the Senator is objecting to the commit-

tee amendment.

It is the amendment to which I am objecting, Mr. SMOOT. because I do not believe that the committee has really gone into the subject sufficiently to realize where that wording will lead.

Mr. SIMMONS. Very well; it is satisfactory that the paragraph go over.

Mr. SMITH of Georgia. We will be glad to have the Senator indicate his objection, so that we may consider it.

Mr. SMOOT. I have no objection whatever to indigo going on the free list. The only objection I have is to the amendment inserting the words "and colors obtained from indigo," because that language will conflict with the provision affecting other colors' now on the dutiable list, and I can not see how the provision is going to be administered.

Mr. SMITH of Georgia. Can the Senator indicate some of the

colors?

Mr. SMOOT. Oh, there are a good many of the coal-tar dyes

which are derivatives of indigo.

Mr. SMITH of Georgia. Does not the paragraph imposing a duty on coal-tar dyes provide for an exception where they are otherwise specially provided for? The purpose of the committee was to put these derivatives on the free list.

Mr. SMOOT. That is the trouble. One paragraph imposes a duty on the article not otherwise specially provided for and the other provides that it shall be free. I am not objecting, as I have said, to indigo going on the free list, for that is proper and right; but the wording of the amendment is going to result in a conflict.

Mr. STONE. Let the paragraph be passed over.

The VICE PRESIDENT. The paragraph will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 522, page 140, line 9, after the word "pyrites," to insert "iron in pigs, iron kentledge, spiegeleisen, wrought iron and scrap and scrap steel; but nothing shall be deemed scrap iron or scrap steel except secondhand or waste or refuse iron or steel fit only to be remanufactured; ferromanganese; iron in slabs, blooms, loops or other forms less finished than iron bars, and more advanced than pig iron, except castings, not specially provided for in this section," so as to make the paragraph read:

522. Iron ore, including manganiferous iron ore, and the dross or residuum from burnt pyrites; iron in pigs, iron kentledge, spiegeleisen, wrought iron and scrap and scrap steel; but nothing shall be deemed scrap iron or scrap steel except secondhand or waste or refuse iron or steel fit only to be remanufactured; ferromanganese; iron in slabs, blooms, loops or other forms less finished than iron bars, and more advanced than pig iron, except castings, not specially provided for in this section.

The amendment was agreed to.

The next amendment was, in paragraph 532, page 141, line 1, after the word "Lard," to insert "lard compounds, and lard substitutes," so as to make the paragraph read:

532. Lard, lard compounds, and lard substitutes.

The amendment was agreed to.

The next amendment was, in paragraph 534, page 141, line 3, after the numerals "534," to strike out "All leather not specially provided for in this section and leather board or compressed leather; leather cut into shoe uppers or vamps or other forms suitable for conversion into boots or shoes" and to insert "Sole leather, leather board or compressed leather, grain, buff, and split leather, all dressed upper leather, including patent, japanned, varnished, or enameled upper leather and shoe-lining leather, all of the foregoing for boot and shoe manufacturing purposes; leather cut into vamps or other forms suitable for conversion into boots or shoes; belting, harness and saddle leather, leather waste, skins for morocco, rough leather, tanned but not finished"; in line 16, after the word "or," to insert "in"; and in line 17, after the word "unfinished," to strike out "composed wholly or in chief value of leather," so as to make the paragraph read:

534. Sole leather, leather board or compressed leather, grain, buff, and split leather, all dressed upper leather, including patent, japanned, varnished, or enameled upper leather and shoe-lining leather, all of the

foregoing for boot and shoe manufacturing purposes; leather cut into vamps or other forms suitable for conversion into boots or shoes; belting, harness and saddle leather, leather waste, skins for morocco, rough leather, tanned but not finished; boots and shoes made wholly or in chief value of leather; leather shoe laces, finished or unfinished; harness, saddles, and saddlery, in sets or in parts, finished or unfinished. harness, finished.

Mr. WEEKS and Mr. PAGE addressed the Chair.

The VICE PRESIDENT. The Senator from Massachusetts. Mr. WEEKS. I should like to have that paragraph go over. Mr. STONE. Which paragraph?

Mr. WEEKS. Paragraph 534. Mr. PAGE. I was about to ask the same favor, Mr. President. Mr. GALLINGER. Before that paragraph goes over, I should like to ask the Senator in charge of the bill whether or not the paragraph on page 117, paragraph 376, which has been stricken out, has been included in this paragraph 534, on page 141? Is paragraph 534 intended to include that, or does some other provision cover it?

Mr. SMOOT. It is in paragraph 534.

Mr. GALLINGER. It is not worded in the same way.
Mr. THOMAS. That is included in the phraseology of the amendment to paragraph 534. I will call the Senator's atten-

tion to line 12, page 141.

Mr. GALLINGER. I observe it is included, and I hope the paragraph will go over, because it ought to be very seriously considered.

Mr. THOMAS. It goes over, as I understand, by request of the Senator from Massachusetts [Mr. Weeks].

The VICE PRESIDENT. Paragraph 534 will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 141, after line 24, to insert a new paragraph, as follows: 5371. Limestone-rock asphalt; asphaltum, and bitumen.

The amendment was agreed to.

The next amendment was, in paragraph 543, page 142, line 7, after the word "of," to insert "natural," so as to make the paragraph read:

543. Manganese, oxide and ore of, natural.

The amendment was agreed to.

The next amendment was, in paragraph 548, page 142, line 15, after the word "section," to insert:

after the word "section," to insert:

Provided, That meat and meat products brought to the United States shall be subject to the same inspection by the Bureau of Animal Industry of the Department of Agriculture as prescribed by the act of June 30, 1906, for domestic cattle and meats, unless the Secretary of Agriculture shall be satisfied that the government of the country whence the meat or meat products are exported maintains and enforces a system of inspection equal to our own, or satisfactory to him as being competent to protect the public health, in which case the certificate of such government that such inspection has been made shall be sufficient.

So act to reals the recognity read.

So as to make the paragraph read:

So as to make the paragraph read:
548, Meats: Fresh beef, veal, mutton, lamb, and pork; bacon and
hams; meats of all kinds, prepared or preserved, not specially provided
for in this section: Provided, That meat and meat products brought to
the United States shall be subject to the same inspection by the Bureau
of Animal Industry of the Department of Agriculture as prescribed by
the act of June 30, 1906, for domestic cattle and meats, unless the
Secretary of Agriculture shall be satisfied that the government of the
country whence the meat or meat products are exported maintains and
enforces a system of inspection equal to our own, or satisfactory to him
as being competent to protect the public health, in which case the certificate of such government that such inspection has been made shall be
sufficient.

Mr. McCUMBER. I ask that paragraph 548 may go over for the purpose of giving me an opportunity to prepare an amendment.

Mr. CUMMINS. Mr. President, before it goes over, I think it only fair that I should present, probably not the same kind of amendment in the mind of the Senator from North Dakota, but one which was printed a long time ago and was referred to the Committee on Finance. It relates to the proviso that has been offered by the committee. I ask the Secretary to read it.

The VICE PRESIDENT. The amendment will be stated. The Secretary. It is proposed to strike out the proviso offered by the committee, and to insert in lieu thereof the following:

following:

Provided, however, That none of the foregoing meats shall be imported into the United States from any foreign country unless and until the President, after due investigation, has found and proclaimed that the Government of any such foreign country has established and is maintaining a system of meat inspection which is the substantial equivalent and is as efficient as the system established and maintained by the laws of the United States in the Department of Agriculture; and especially that the system of such foreign country provides for the examination of all cattle, sheep, swine, and goats before they are allowed to enter into any slaughtering, packing, meat canning, rendering, or similar establishment in which they are to be slaughtered and the meat or meat products thereof are to be used for food: And provided further, That no meat imported into the United States from any foreign country shall be sold in the United States until it is examined and inspected, after arrival and before sale, by inspectors appointed by the Secretary of Agriculture; and the provisions of an act making

appropriations for the Department of Agriculture for the fiscal year ending June 30, 1908, relating to post-mortem examinations and inspections of the carcasses and parts thereof of cattle, sheep, swine, and goats are hereby made applicable to carcasses, parts thereof, and meats so imported into the United States from any such foreign country.

Mr. CUMMINS. Mr. President, if the amendment the Senator from North Dakota has in mind does not relate to meat inspection, I shall be very glad to submit my views with regard to the subject now, and have this part of it acted upon. It is more convenient for me to do it now than it may be when the paragraph is again reached.

Mr. McCUMBER. I will reply to the suggestion of the Senator from Iowa that the amendment I had in mind was one which would make this section similar to the section which provides for the free importation of wheat, namely, providing for a duty against the meats of any country equivalent to the duty levied by that country upon American meats, and it has no reference whatever to the matter of inspection.

Mr. CUMMINS. I believe that meat ought not to be upon the free list, but if free, should be under the conditions suggested by the Senator from North Dakota.

Mr. LA FOLLETTE. Mr. President—
The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Wisconsin?

Mr. CUMMINS. I do.

Mr. LA FOLLETTE. I should be very glad, indeed, to hear the Senator this afternoon, if it is more convenient for him to address himself to this paragraph at this time than it would be at a later period; but I shall ask to have the paragraph passed over with a view to offering something upon the paragraph later. I shall be very glad, however, to defer that request until after the Senator has spoken.

Mr. CUMMINS. Very well. As there seems to be a desire to have it go over, if I am not here when the amendment is reached, I desire to have it voted upon without any argument

on my part.

I do not think the Senator from Iowa WILLIAMS. quite understands the situation. I do not think there is any desire to have it go over. The desire is to have him deal with it now, as far as he can.

CUMMINS. I think there is. My idea was, if the amendment I have proposed does not interfere with the amendment suggested by the Senator from North Dakota, to have the inspection part of it disposed of to-night.

Mr. WILLIAMS. I think we ought to do that.

Mr. CUMMINS. But I think the Senator from Wisconsin has it in mind, possibly, to consider that part of it,

Mr. LA FOLLETTE. Yes; but I very cheerfully consented, so far as I was concerned, to the Senator proceeding this afternoon if it suits his convenience.

Mr. CUMMINS. But I would rather defer what I have to say than to debate the amendment now and have it voted upon at some other time.

Mr. LA FOLLETTE. I understood the Senator to say that it might not be convenient for him to be here at all when it is taken up again.

Mr. CUMMINS. It may not be.

Mr. LA FOLLETTE. In that event, of course, the Senate would miss the opportunity to hear the Senator's views upon this paragraph. I am sure all of us would be very glad to hear them

Mr. CUMMINS. I do not know whether it will be convenient or not. I know that I shall be necessarily absent for a day or two while the bill is under consideration. I shall hope to be here. But in order that Senators may know my reasons for the amendment I have offered, I shall very briefly call to their attention the scope of the amendment proposed by the commit-tee and the scope of the amendment I have offered as a substitute for the committee amendment.

I do not believe meat should come into the United States unconditionally free; but if meat is to come to the United States to be consumed by the people of the United States, it seems to me we ought to have the same protection against foreign meat that we have provided against domestic meat. There can be no reason why we should allow the foreigner to supply us with diseased meat and exclude our own people from supplying us with the same kind of meat. It certainly can not have been in the mind of the committee to place upon the introduction of foreign meat into the United States a less rigorous condition than we have already attached to the introduc-tion of domestic meat into the channels of interstate com-

If I show favor to one or the other, I intend to show it to our own people, although I am not contending that, so far as inspection is concerned, there should be any favor shown to either.

The purpose of my amendment is to put the foreigner on exactly the same footing that we have already arranged for the domestic manufacturer.

Now let us see. The amendment suggested by the committee reads in this way:

Provided. That meat and meat products brought to the United States shall be subject to the same inspection by the Bureau of Animal Industry of the Department of Agriculture as prescribed by the act of June 30, 1906, for domestic cattle and meats, unless the Secretary of Agriculture shall be satisfied that the government of the country whence the meat or meat products are exported maintains and enforces a system of inspection equal to our own, or satisfactory to him as being competent to protect the public health, in which case the certificate of such government that such inspection has been made shall be sufficient. sufficient.

The first thought that arises in one's mind when he is examining this language must be that, while we have established a system of ante-mortem examination and inspection with regard to our meat-manufacturing industries, we are about to allow foreign meats to enter our country without any ante-mortem examination unless it happens that the country from which they come has established such a system. I want the Senate to be perfectly clear upon that point, because I am sure the committee has made a mistake in the matter.

Mr. WILLIAMS. Mr. President, if I understand the Senator, he wants the Government of the United States to make an ante-mortem examination of meats in the Argentine Republic and in Australia, and in Germany, and in France, and in Canada, and in all the balance of the world.

Mr. CUMMINS. The Senator from Mississippi is not so clear as he usually is, because I have not suggested anything of the kind, and of course I recognize the futility of suggesting anything of the kind.

Mr. WILLIAMS. I so understood him, because the Senator said that while we subjected our own cattle to an ante-mortem examination, we were not going to subject foreign cattle to that examination.

Mr. CUMMINS. Precisely; I did so say.
Mr. WILLIAMS. And the amendment which the committee has offered says that these cattle shall not be admitted free unless

Mr. CUMMINS. These are not cattle. This is meat. Mr. WILLIAMS. I mean meat; that this meat, then, shall not be admitted free unless it has been subjected to an examination the same as or equal to that to which we subject our cattle-that is, subjected to this examination by the government of the country of export before it comes-or unless the Secretary of Agriculture thinks the system of examination to which the cattle and meat are subjected in their own country is sufficient to protect the public health.

That is the committee amendment, and there is no quarrel with it unless it be one of two things: Either that we ourselves should make an ante-mortem examination of the meat-of course you have to make it of cattle, because that is what an ante-mortem examination of meat necessarily is; it is cattle while living—or that there should be an examination of the viscera at the port of entry. I take it, however, that the Senator does not mean that there should be an examination of the viscera at the port or anything of that kind. He does not want

nat. That is the system Germany invokes.

Mr. CUMMINS. I am not establishing a system. I am simply taking the system we already have established in this country.

Mr. WILLIAMS. That is precisely what the committee amendment does

Mr. CUMMINS. I am sure the Senator from Mississippi is wrong with regard to it, and if he will review the amendment he will see that he is wrong. I will undertake now to analyze it a little further.

The paragraph, to be understood, must be read as a whole: Meats: Fresh beef, veal, mutton, lamb, and pork; bacon and hams; meats of all kinds, prepared or preserved, not specially provided for in this section: Provided, That meat and meat products brought to the United States

I pause there to say that of course they are brought here after the animals from which the products come are killedshall be subject to the same inspection-

That is, the meats shall be subject to the same inspectionby the Bureau of Animal Industry of the Department of Agriculture as prescribed by the act of June 30, 1906, for domestic cattle and

This is the requirement, then, that when the meats reach this country they shall be subjected to the same inspection that we require for our own meats, as provided in the law of 1906, although that law was reenacted at a later time and possibly changed a little. However, that is immaterial. But in this amendment the committee has provided simply for an inspection of the meat after it reaches the United States; that is all. You have given the Secretary of Agriculture authority to waive that requirement in a certain contingency; and now I shall proceed to read further. This examination on immediate to be made. to read further. This examination or inspection is to be madeunless the Secretary of Agriculture shall be satisfied that the Government of the country whence the meat or meat products are exported maintains and enforces a system of inspection equal to our own, or satisfactory to him as being competent to protect the public health, in which case the certificate of such Government that such inspection has been made shall be sufficient.

Suppose the Secretary of Agriculture decides that the country from which the meat comes has no adequate system of inspection, what then? He then inspects the meat as it reaches the ports of the United States. If the meat passes the inspection it must be admitted into the United States, and there is no opportunity whatever to make an ante-mortem examination, nor could the authorities of this country require that an autemortem examination should be made.

If it were true that all the protection we need against impure meat can be given through a post-mortem inspection, I should have no complaint to make of the committee amendment. But we all know—I do not know it very well except from reading the literature upon the subject—that there are some diseases against which people can not be fully protected save by ante-mortem examination or inspection. Therefore in our country, before an animal can be slaughtered in any packing plant, it must be inspected alive; and if it fails to pass the inspection it is not permitted to be manufactured into food.

The Senator from Oregon [Mr. LANE] questions that. I know what I am speaking of, because, fortunately, I have the regulations before me.

Mr. LANE. Mr. President, I was merely questioning this: I desire to call the Senator's attention to the fact that all animals brought into the stockyards are slaughtered on the same floor; and those which are diseased and unfit for human food, in the opinion of the inspector, are sent out to be used as ferti-

Mr. CUMMINS. Certainly.

Mr. LANE. The ante-mortem examination does not amount to so much. It is the post-mortem examination which is the more important, and decides whether or not the meat shall be used for human food.

Now I did not shake my head at the Senator to confuse him or dispute his statement. The other proposition is one just as strong as the contention which he makes. If there is no means of ascertaining what form of post-mortem examinations they make of a meat supply in a foreign country then you are in as great a danger as you are from the other contention, and it is equally urgent.

Mr. CUMMINS. Of course if it were any ailment of the human body I would accept the view of the Senator from Oregon as conclusive, but inasmuch as this refers to another kind of animal I must differ from him with regard to the value of the ante-mortem inspection.

I repeat, Mr. President, there is no reason for making a favorite of the butcher in Argentina or the butcher in Canada. If we are to expose our own people to the free competition of the world, we certainly ought to care enough about the health and the welfare of our own people to take exactly the same precautions against diseased meat when the foreigner tries to feed us as when our own people try to feed us.

Mr. LANE. If the Senator will allow me just a moment more, I will state the point to which I wished to call his attention. I did not raise it to dispute or to embarrass the Senator

Mr. CUMMINS. The Senator does not embarrass me in the least.

Mr. LANE. Anyway I do not dispute the point the Senator is trying to make. The meat of the animal, as a rule, does not show the effect of disease. In diseased cattle unfit for human food a diseased condition manifests itself in the viscera. In a number of cases a steer or cow will look to be fat and well fed and upon an ante-mortem examination would be an ideal subject out of which to make beef, but on a post-mortem examination it is frequently found to be infected with tubercular tissue in the lungs and unfit for food.

Mr. CUMMINS. I have not questioned the latter statement. I think it requires both an ante-mortem and a post-mortem inspection in order to be sure that we have pure meat; and why in the world we require our own packers and butchers and our own farmers to submit to ante-mortem examination and do not require such an examination from the foreigner is more than I can understand. It is utterly impossible for me to conceive why this discrimination is made in favor of the importer of

Mr. GALLINGER. Mr. President-Mr. CUMMINS. I yield to the Senator.

Mr. GALLINGER. This is a matter that greatly interests If I understand the Senator from Iowa, he is absolutely right in his contention. I would not interrupt the Senator, but would wait if I were not called out of the Chamber.

Mr. CUMMINS. I am very glad to yield to the Senator. Mr. GALLINGER. The Senator's idea is that we should insist that every foreign country from which meat is sent to us shall have substantially the same ante-mortem examination that

Mr. CUMMINS. A simple reading of my amendment will indicate just what I desire, and my objection against substituting a mere inspection after slaughter and after the meat has traveled across the ocean in order to reach the American shore,

The amendment which I have proposed is:

The amendment which I have proposed is:

That none of the foregoing meats shall be imported into the United States from any foreign country unless and until the President, after due investigation, has found and proclaimed that the Government of any such foreign country has established and is maintaining a system of meat inspection which is the substantial equivalent and is as efficient as the system established and maintained by the laws of the United States in the Department of Agriculture.

Mr. GALLINGER. It seems to me, Mr. President, that that amendment ought to be agreed to without objection, and we ought to insist that meat sent to us from abroad should be as carefully inspected as the meats that our own people produce.

Mr. CUMMINS. I supposed that it would be accepted. I did not dream that when it was known that this proposal of the committee allowed meats to come here subject only to postmortem examination there would be objection to so strengthening the regulation as to require that the foreign country should maintain the same efficient system of inspection that we maintain for ourselves.

Mr. LANE. Mr. President-

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Oregon?

Mr. CUMMINS. I do.

Mr. LANE. I wish to say to the Senator that I agree with him in his desire and wish that every possible safeguard shall be thrown around it, and if this does not cover it I would be very glad to join with him in getting the best possible provision we can.

Mr. CUMMINS. I am very glad to hear the Senator from Oregon say that. I am attempting to show—and it can be shown so clearly that it is impossible to dispute it—that this does not require more than a post-mortem inspection, and that if meats were to come in from every part of the world, from countries that had no system of inspection, they would enter our market subject only to the post-mortem examination required by our law.

The chief difference between the amendment proposed by the committee and the amendment which I have proposed is that if the meat does not come from a country that has established a system of ante-mortem examination it can not enter our markets, and even after it does enter our markets then it is subject to the same post-mortem inspection that we have provided for With regard to the post-mortem inspections I have no quarrel at all with the amendment proposed by the committee

Mr. WILLIAMS rose.

Mr. CUMMINS. Does the Senator from Mississippi desire to

Mr. WILLIAMS. No; I desire to read the Senator's amendment and reply to the Senator when he gets through.

Mr. CUMMINS. Very well. I have but a few v

Very well. I have but a few words more to say about it.

In the law of March 4, 1907, making appropriations for the Agricultural Department for the year ending June 30, 1908, there is found this provision:

there is found this provision:

For meat inspection: That hereafter, for the purpose of preventing the use in interstate or foreign commerce, as hereinafter provided, of meat and meat-food products which are unsound, unhealthful, unwholesome, or otherwise unfit for human food, the Secretary of Agriculture, at his discretion, may cause to be made, by inspectors appointed for that purpose, an examination and inspection of all cattle, sheep, swine, and goats before they shall be allowed to enter into any slaughtering, packing, meat-canning, rendering, or similar establishment in which they are to be slaughtered and the meat and meat-food products thereof are to be used in interstate or foreign commerce; and all cattle, swine, sheep, and goats found on such inspection to show symptoms of disease shall be set apart and slaughtered separately from all other cattle, sheep, swine, or goats, and when so slaughtered the carcasses of said cattle, sieep, swine, or goats, and when so slaughtered the carcasses of said cattle, sieep, swine, or goats shall be subject to a careful examination and inspection, all as provided by the rules and regulations to be prescribed by the Secretary of Agriculture, as herein provided for.

All that I ark is that before meat shall come from any

All that I ask is that before meat shall come from any other country into the United States the country from which it is exported shall have established either this system for inspection or some other system equally efficient. If it had been thought that a post-mortem inspection would preserve the country from impure meat, there would have been no provision in the law for the ante-mortem inspection. This statute was passed a long time ago, and the Department of Agriculture has established in this country a system of inspections before slaughter, and after slaughter another system of inspections. I hope the Senate will not confuse the two things. They are perfectly distinct. The inspections are carried on for the same general purpose, and carried on because one is not adequate without the presence of the other.

In order to show that I want to indicate what the Department of Agriculture has done. I have in my hand a public document of the Sixty-second Congress, third session. It is a letter from the Secretary of the Treasury, transmitting a statement prepared by the Secretary of Agriculture showing the number of persons employed in meat inspection, the amount paid each, and so forth, for the fiscal year ended June 30, 1912. It is a very comprehensive document, and indicates better than anything I could say just what the country is doing in order to prevent impure meats from entering interstate commerce.

I wish also to refer to a bulletin issued by the Department of Agriculture, giving instructions that are to govern the branding of carcasses and the primal parts of animals after they are slaughtered.

I read a little of it. It is order 150, regulation 17, section 5:

Beef carcasses.—In each instance the brands shall be affixed so as to mark the following primal parts: Rounds, loins, ribs, chucks, flanks, plates, and briskets: also the kidney fat and cod fat. Other primal parts may be marked if required by local conditions.

Then proceeds the same kind of regulation with regard to calf carcasses, sheep carcasses, shipper pigs, and hog carcasses, canners, and so forth.

I have mentioned these things in order to show that there are two branches of this great preventive system: First, the antemortem inspection, and second, the post-mortem inspection; and the committee, unfortunately, has provided for the introduction of foreign meats upon a post-mortem examination only.

I repeat that because I do not believe it is generally understood by my friends on the other side that there is an attempt here to favor the foreign manufacturer of meats as against the home manufacturer of meats.

I, of course, do not expect the activities of the United States to extend to any foreign country, but it is within the power of any foreign country to establish just as efficient a system of inspection as we have, and my amendment is that unless it is so done and unless the President is so advised and unless he issues his proclamation accordingly, no meats can come in from that country, and even after that examination is had and the meats come here, then they ought to pass the same inspection precisely that our meats pass after slaughter and before they are shipped in the way of commerce.

This being accomplished, we have treated the foreign manufacturer exactly as we have treated the home producer of meats; and unless we do exclude meats from countries that have no such system we will have given a premium to the packers of Argentina and the packers of Canada in their effort to supply the people of this country with meat.

While I do not think it is a sound economic proposition, I am conscious of a good deal of sympathy with the desire to supply the people of the country with the necessities of life at the lowest possible cost; but there is no economy in supplying the people with impure meat, and there is no justice in giving a bounty upon the importation of meat. At least treat our own people as though they were entitled to the same consideration that we are endeavoring to extend to the people of other countries.

Mr. PAGE. Before the Senator takes his seat-

Mr. CUMMINS. I yield to the Senator.

Mr. PAGE. I should like to ask him if it is not a fact that after diseased cattle have been slaughtered it is possible to so far remove the indication of disease that the inspector would find it impossible to detect it?

Mr. CUMMINS. I did not intend to enter into the technical part of it, but there are diseases that can be detected by an ante-mortem inspection that can not be detected at all in the meat after slaughter. That is the very purpose of the ante-mortem inspection. I assume that if there were attached here a condition that all meats should be accompanied with the viscera of the animal out of which the meats come there might be an additional protection, but that of course is absurd, and we have the meat here in the carcass, chilled or frozen. The way the meats will come into the United States will be either chilled or frozen, depending upon the distance over which the meats travel, and when they thus reach the United States, although the animals from which they were made may have been so diseased that the meats are utterly unfit for human food, the inspector here will be oftentimes incapable of detecting or exposing that disease.

If the Senate desires to encourage that sort of thing, I shall have to revise my opinion of my very good friends upon the other side. I do not think they want to do anything of the sort.

Mr. LANE. Mr. President— Mr. CUMMINS. I yield to the Senator from Oregon.

Mr. LANE. I wish to confirm the statement of the Senator from Iowa. An examination of fibers and muscles will not show whether the animal has been diseased; but in very few cases will it show the indications of disease. The Senator is right. The presence of the disease can be ascertained by an examination of the animal before it is slaughtered and by an examination of the viscera after it is slaughtered; the more important, I think, is the examination of the viscera. We should require both.

Mr. CUMMINS. Mr. President, I hope that this will not be looked upon on the other side of the Chamber as a hypercritical suggestion upon my part. This is real. We all know that vast expense has been incurred in the effort to secure pure meat, and if we allow our foreign rival to escape a part of that expense—the expense involved in these investigations—he will bring his meat here under unfair conditions and without regard to the effect upon the public health.

I therefore submit this amendment, reasserting that the chief difference between it and the amendment proposed by the committee is that in mine whatever system is in force in the United States as to ante mortem inspection its equivalent must be found to exist in the country from which the meats come; as to inspection after arrival in America, there is no substantial difference between the committee amendment and my own.

Mr. WILLIAMS. Mr. President, the fatal errors about the Senator's amendment are, in my opinion, twofold: First, he gives no credence at all to the certificate of any country where a system of inspection is maintained identical with or equal to ours. We have been making the welkin ring with our complaints of foreign governments not accepting our certificates as sufficient evidence of the fact of the proper inspection, ante mortem and post mortem, of our meat.

The next defect in the Senator's amendment is that, no matter whether the foreign country has a system of inspection equal to ours or not, he proposes to subject the meat, after it arrives here, to a reinspection by the officers of this Government, even in the case of countries which have a system of cattle and meat inspection fully equal to our own.

What is the consequence? Some of the meats are brought in cans, some of them are imported in barrels, and they can not be reinspected except by uncanning and unbarreling.

The Senator seems to have misunderstood the committee amendment. He seems to think that the foreign system of inspection, to which the committee refers, is simply post-mortem inspection, whereas the very language of the committee amendment is to the contrary. I read it:

Provided, That meat and meat products brought to the United States shall be subject to the same inspection by the Bureau of Animal Industry of the Department of Agriculture as prescribed by the act of June 30, 1906, for domestic cattle and meats—

That refers to the inspection of the meat. Then this follows:

Unless the Secretary of Agriculture shall be satisfied that the government of the country whence the meat or meat products are exported maintains and enforces a system of inspection—

Inspection of what? Why, both of cattle and meats—equal to our own.

Because up above it says that meat shall be subject to the same inspection as is "provided by the act of June 30, 1906, for domestic cattle and meats."

Now, the language is:

Unless the Secretary of Agriculture shall be satisfied that the government of the country whence the meat or meat products are exported maintains and enforces a system of inspection—

Not the inspection of meat merely-

equal to our own, or satisfactory to him as being competent to protect the public health.

And so forth.

In which case, under the comity of nations, a system of inspection equal to our own there existing, or a system of inspection satisfactory to the Secretary of Agriculture as representing our Government, so as to avoid making it maintain a system identical with ours, which they probably would not want to do—they have their own notions and it might go further than ours—then, in that case, under the comity of nations, the certificate of the government of the country whence the meat is imported to this country shall be accepted as sufficient, just as we insist that our certificate of the fact that our meat has been inspected shall be accepted as sufficient.

Another defect about the Senator's amendment is that after the Senator once finds a country which has a system of cattle and meat inspection to suit him, then he lets all meats come in from that country, whether they have been actually inspected by the Government or not, because he does not require the certificate of that Government to accompany the meats. For example, there is any amount of meat killed in the United States which is never inspected by the Federal Government. Therefore the countries over there demand not only that we shall have a competent system of inspection, but that the certificate of the Government to the fact that the meat has been inspected shall accompany the importations of it into those countries. Under the Senator's amendment, after you had once got yourself satisfied and the President had proclaimed that the system of inspection in the foreign country was sufficient, then the meat could be sent here without a certificate. It might be meat which had not undergone inspection.

Mr. President, if, to "make assurance double sure," the Senator has any doubt about the system of inspection in the foreign country covering cattle as well as meat, if he has any doubt about my conclusions being right, that the inspection refers back to the act of June 30, 1906, and to the language "cattle or meat," that can be cured by putting in the words "of cattle and meat," following the word "inspection," in line 23, so that it would

read:

Unless the Secretary of Agriculture shall be satisfied that the Government of the country whence the meat or meat products are exported maintains and enforces a system of cattle and meat inspection—

Instead of merely a "system of inspection"-

equal to our own, or satisfactory to him as being competent to protect the public health, in which case the certificate of such Government that such inspection has been made shall be sufficient.

If there is any defect in this committee amendment at all, it is that there might be added to it the words "and no meat under any circumstances shall be imported without the certificate of the country whence it was exported.

Mr. CUMMINS. Mr. President, I am inclined to think that the criticism of the Senator from Mississippi upon my amendment with regard to the necessity of a certificate accompanying the meat is sound. I think it ought to have that provision in it, and before the amendment is voted upon I will modify it in

that way. I had not thought of that particular point.

Mr. WILLIAMS. Now, Mr. President—

Mr. CUMMINS. If the Senator will wait a moment—

Mr. WILLIAMS. I am willing for this paragraph to be passed over, and the Senator and I can get together, or the Senator and the subcommittee can get together, and we can draw an amendment that will satisfy us both, I suppose.

Mr. CUMMINS. Just a moment before we do pass it over. Let us not obscure the issue. Under the amendment of the committee meats could come here from a country having no system of inspection at all of any kind, and we must accept those meats if they pass the post-mortem inspection provided for in the amendment. That is the thing I desire to avoid. I want those meats to come here, if they come at all, from a country with a system of ante-mortem examination.

Mr. WILLIAMS. Now, let us see if we understand each

other. Does the Senator want to fix it so that no meat can be

imported from Mexico?

Mr. CUMMINS. Well, I have not particularized as to countries. I know that we do this thing in order to protect our people from our own manufacturers, and I assume that we ought to require the same thing of a foreign manufacturer.

Mr. WILLIAMS. Mr. President, one other point and I shall cease talking. There seems to be an impression in the minds of some Senators that this amendment here is to provide for the inspection of cattle. That is provided for under the existing law, which applies not only to cattle in interstate commerce but to cattle in foreign commerce as well, and the Department of Agriculture has a very rigid inspection of live cattle brought into the country. That, however, has nothing to do with this amendment, but I found that idea in the minds of some of the Senators and I wanted to dissipate it. That is under a different law. I do not think the Senator's amendment is as good as the committee amendment. It may be that the committee amendment might be strengthened, and I am perfectly willing that it shall go back to the committee for that purpose, and I shall be very much pleased at any time to call the subcommittee together and have the Senator appear, and we will sit as a subcommittee and concoct an amendment that will be satisfactory.

Mr. CUMMINS. I will be glad to attend in answer to any

summons of that kind.

Mr. McCUMBER. Mr. President, as I will undoubtedly submit an amendment to this particular paragraph, I desire to present it now, so that it may be considered by the committee. I would prefer, if it were possible, that a duty should be present it now, so that it may be considered by the committee. I would prefer, if it were possible, that a duty should be levied equal in amount to the duty levied by any other country upon our meats; but I am inclined to think that would be in

conflict with the favored-nation clause of some of our treaties, and hence that we would have to be specific in the general law. I present the amendment with the statement that I will ask for a vote on it during the consideration of the particular paragraph.

The VICE PRESIDENT. The Secretary will state the amendment.

The Secretary. On page 142, at the end of line 26, it is proposed to add the following proviso:

Provided further, That any of the foregoing specified articles shall be subject to a duty of 20 per cent ad valorem when imported, directly or indirectly, from any country, dependency, or other subdivision of Government, which imposes such a duty on such articles imported from the United States.

Mr. BRANDEGEE. Mr. President, I desire to ask the Senator from Iowa whether the act of June 30, 1906, referred to

provides for ante mortem inspection?

Mr. CUMMINS. It does. The act of June 30, 1906, is the agricultural appropriation bill for that year, and the part of it relating to inspection is practically, if not exactly, reproduced in the appropriation act of March 4, 1907, and is the present law upon the subject. It does provide for ante-mortem inspection.

Mr. BRANDEGEE. In what respect does the act of 1908 differ?

Mr. CUMMINS. There is no difference; the two are substantially identical.

Mr. SIMMONS. I ask that the Secretary proceed with the reading of the bill.

Mr. NORRIS. Mr. President— Mr. SIMMONS. I understand that action is not desired on the pending paragraph this afternoon.

Mr. LA FOLLETTE. I have asked that that paragraph go

Mr. SIMMONS. I understood that the Senator from North Dakota [Mr. McCumber] and the Senator from Wisconsin [Mr. LA FOLLETTE] had asked that it be considered hereafter.

Mr. NORRIS. Before the paragraph goes over, I desire to make an observation. I should like the attention of the senior Senator from Mississippi [Mr. WILLIAMS]. In regard to this particular proviso 1 think the words commencing at the end of line 23, "or satisfactory to him as being competent to protect the public health," ought to be stricken out of the proviso.

It strikes me that, containing these words, the proviso certainly gives to the foreign shipper of meats an advantage over the producer in this country. It is set forth in the beginning

of the proviso:

That meat and meat products brought to the United States shall be subject to the same inspection by the Bureau of Animal Industry of the Department of Agriculture as prescribed by the act of June 30, 1906, for domestic cattle and meats, unless—

Here are the two exceptions-I have no fault to find with the

Unless the Secretary of Agriculture shall be satisfied that the Government of the country whence meat or meat products are exporte maintains and enforces a system of inspection equal to our own are exported

It seems to me that is all right; I do not see how anyone could find fault with that; and, if it ended there, I would have no criticism to make. That is one exception. Here is the other one, and these are the words that I think should be stricken

Or satisfactory to him as being competent to protect the public health.

In our law there is no such exception existing.

Mr. WILLIAMS. Yes; but we make our own law.

I understand that. Mr. NORRIS.

Mr. WILLIAMS. The purpose of that was this: We can not enforce identity of legislation

I understand that. Mr. NORRIS.

WILLIAMS. And so we are compelled to leave it to somebody to determine when different legislation is competent to accomplish the purpose which we wish, which is to protect the public health, and in that event we thought the Secretary of Agriculture was the proper person to determine it.

Mr. NORRIS. If the Senator will listen a moment, I think that situation is completely met by the first exception, namely, that the inspection law of the foreign country must be equal to our own. It does not have to be identical, and nobody is contending that it should be. Let us take, for instance, a producer

Mr. WILLIAMS. One moment. It says "the same," and then it says "equal to," and then it says "shall be satisfactory

country had the remainder of the law, but did not have that particular provision, it would not be equal to ours, would it?

Mr. NORRIS. If the Secretary of Agriculture found that the foreign law of inspection was equal to ours, even though it had something ours did not have or omitted something that ours did have, he would have the right to admit the meats, even though the language I want stricken out was stricken out. Let us take our own people, and suppose we have a Secretary of Agriculture who has an idea of meat inspection that does not come up to the prescribed rule laid down by the law of Congress—we may have such a Secretary at some time; and I say that without intending to cast any reflection upon any Secretary of Agriculture—there may be a difference between honest men's minds as to what the inspection should be, but in this country we have provided by law what that inspection shall be; and the Secretary of Agriculture will enforce that law, even though he thinks the law is too severe. That applies to everybody in this country who produces meat products and puts them into interstate commerce.

With the foreigner, however, it would be different. The Secretary would then say: "You have not complied with our law over there, but so far as my judgment is concerned your law is good enough, and I will let it go through," and with this amendment he would have a right to do it. In this country must comply with a law that we have laid down. That would give to the foreigner the right to come in if the Secretary was willing that he should do so, whether he had an inspection law that was equal to our own or not. That is a discrimination

that I do not believe the Senator wants to make.

Mr. WILLIAMS. Our intent, at any rate, was that whether their inspection law was equal to ours or not, even if in our opinion it was not so good a system of inspection as ours, still if in the opinion of the Secretary of Agriculture it was a system competent to protect the public health the meat should be

allowed to come in for the use of the American people. It is not the easiest thing in the world, you know, to do what we are trying to do here. Nations have been quarreling for I do not know how many years about the abstract proposition, which does not disturb anybody's peace or comfort, as to what degree of longitude is to be taken as a beginning in making maps. They have never agreed about it yet. They can not agree about an equal unit of coinage; and they never will make statutes that are equal to one another upon the subject of meat inspection.

One will be superior, in the opinion of a foreign country, and ours will be superior in our opinion. But who is going to judge of the quality? This language was put in here afterwards for the very purpose which seems to strike the Senator as being a discrimination against our own people. It is not, because if Congress changed our present inspection laws it might change them for the worse.

Mr. NORRIS. Why, of course.

Mr. WILLIAMS. The system might not be so good as it is now.

Mr. NORRIS. And it might make them better; but Congress has the right to do that, and the Secretary of Agriculture has not.

Mr. WILLIAMS. But we have conferred upon the Secretary of Agriculture, in all of our domestic quarantine laws and every-

thing else, most exhaustive powers.

Mr. NORRIS. Exactly; but we have not conferred on him in this particular line the right to say whether or not meat produced in this country which applies for admission into interstate commerce shall go into interstate commerce. We have prescribed by law when it shall go in and when it shall stay out.

Mr. WILLIAMS. Mr. President, we prescribe by law to our own citizens a certain inspection, because we have the sovereign power to do it. We can not prescribe to foreign nations, under any comity of nations that exists anywhere, that they shall adopt certain legislation.

Mr. NORRIS. Nobody contends that.

Mr. WILLIAMS. All we have a right to do is to say that for the purpose which we have in view, to wit, the protection of the people of America in their public health against diseased or bad meats or meats which have not been subjected to an inspection sufficient to satisfy us that they are not dangerous, they shall not be included among the meats admitted free under this paragraph.

By the way, we did not draw up this paragraph by ourselves in 10 minutes. We took some little thought about it, and we consulted the Bureau of Animal Industry about it. We have not acted like children at play at all. So when we got through we did not stop where the Senator wants us to stop, because it occurred to us that there still might be nations that had inspection laws which were not so good as ours, in our opinion at

any rate. And yet which, in the opinion of the Secretary of Agriculture—for the right to give the opinion had to be lodged somewhere—were of such a character as to protect the public health of the American people from bad meat,

Mr. NORRIS. Does the Senator mean to say that his committee had the intention of admitting meat from foreign countries where the inspection was not so good as is required of our own

people to get their meat into interstate commerce?

Mr. WILLIAMS. Absolutely, provided it was good enough to satisfy the Secretary of Agriculture that the meat coming from there would not injure our people.

Mr. NORRIS. Of course, then, the Senator has undertaken

to do exactly what he has done.

Mr. WILLIAMS. Yes.

Mr. NORRIS. He has provided here that meats that come from a foreign country need not bear so critical an inspection as meats that are produced in this country, provided the Secretary of Agriculture is of the opinion that it would not hurt anybody to eat them.

Mr. WILLIAMS. Or provided the Secretary of Agriculture is of the opinion that the system of inspection they have is good

enough to protect the public health.

Mr. NORRIS. Yes; that it is good enough to protect the public health. Let me call the Senator's attention to this condition: Suppose a bill were brought in here, and were up for consideration to-day, that would change all the law we have on the subject by simply substituting for it these words:

That no meat produced in the United States shall be permitted to enter into interstate commerce unless it has been inspected in such a way that it is satisfactory to the Secretary of Agriculture as being competent to protect the public health.

Does the Senator suppose we would pass a law of that kind? Yet that is the kind of law we are going to pass, if we pass this bill, with regard to meat coming from a foreign country.

Mr. WILLIAMS. We would not pass such a law, for the very simple reason that must be plain and palpable and obvious to anybody—that we, as a Congress, have the power to prescribe the exact regulations which we desire; and therefore it would be stupid, or it would be cowardly, one or the other, to permit the Secretary of Agriculture to act as the legislature in our stead. But we have no legislative power abroad.

Mr. NORRIS. Why, of course not; but you are going to let the Secretary of Agriculture be the legislature as far as imported meats are concerned. It is true that we can not legislate for foreign countries. We can legislate for our own, however; and we can provide by law rules and regulations that must be complied with by the foreigner before he is permitted to bring his products into this country. That is what we ought to do.

Mr. WILLIAMS. There is no doubt about that; and we could provide in this very act, if we chose, that no meat should be admitted into America at all unless the country whence it was imported had adopted in its exact language the law of the United States.

Mr. NORRIS. I understand that.

Mr. WILLIAMS. But that was not the intention of the committee, and that is why the committee did not do it.

Mr. NORRIS. And that is not my intention. I would not want to have the committee do that. I think you have gone as far as you ought to go when you make the first exception, and say that unless the Secretary of Agriculture shall be satisfied that the government of the country whence the meat or meat products are exported makes and enforces a system of inspection equal to our own we will not regard it as sufficient.

Mr. LODGE. Mr. President-

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Massachusetts?

Mr. NORRIS. Certainly.

Mr. LODGE. I simply wanted to suggest to the Senator that other countries have compelled us in the past to make regulations satisfactory to them by excluding our meats at times, as we all know. We have had great controversies with Germany, and also at one time with England, as to the regulations governing the inspection of our meats.

This amendment, if the Senator will pardon me a moment, contains two antagonistic propositions. One is that the foreign system shall be, in the judgment of the Secretary, which we must invoke, equal in efficiency to our own. The other practically wipes out that provision, and says that any system which the Secretary thinks is competent to maintain the public health shall be accepted.

Mr. WARREN. May I ask the Senator from Massachusetts a question? I will not ask him what the regulation is now, but has not England demanded of us a great deal of the time that our hogs, sheep, and cattle shall go there alive and be slaughtered in England rather than taken in there as meat?

Mr. LODGE. Certainly. We have had many controversies about it; we have had to satisfy them as to the character of our inspection and regulation, and there is no reason why they should not satisfy us.

Mr. WILLIAMS. Well, they do.

Mr. LODGE. I say satisfy us-satisfy the law that Con-

gress passes, not the Secretary.

Mr. WILLIAMS. In reference to what the Senator from Wyoming has just said, of course some of these nations, desirous of prohibiting the entry of American meat, and not desirous of saying so in so many words, went to very great extremes. Germany demanded an inspection of the viscera, because she knew it was practically an impossibility, and therefore prohibited our meats. She had a right to do that. We would have a right to say here, if we wanted to, that that should be done, of course; but we do not want to. We are not trying to make this provision impracticable of administration. We are trying to get meat for the American people from abroad free of duty, but at the same time we are trying to take every proper measure to see that it is healthful.

Mr. LODGE. Germany was obliged to abandon' those ex-

treme positions.

WILLIAMS. I understand: I was simply illustrating

how that would be.

Mr. WARREN. Not only have we done that, but we have by legislation provided for our own people a very exacting law and regulation. I assume the Senator from Mississippi and his party expect that we shall be as particular as to the meat from other countries as we are with the packers in our own country who are delivering food to us across State lines.

Mr. WILLIAMS. I have no fear that the Secretary of Agriculture will ever admit meat from a country that does not

establish a system that protects the public health.

Mr. CUMMINS. Mr. President-

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Iowa?

Mr. NORRIS. I yield. Mr. CUMMINS. I hope the Senator from Nebraska will not lose sight of the fact that the part of the committee amendment to which he has referred relates only to the admission of meats upon a certificate, and without any examination on the part of this country. I have not objected to that part of the amendment so much as I have to the other, which admits meats into this country without any ante-mortem inspection.

Mr. NORRIS. Of course I was not discussing the Senator's

amendment.

Mr. CUMMINS. I did not know whether it had caught the

eye of the Senator from Nebraska.

Mr. NORRIS. I understood, of course, the Senator's argument; but this particular amendment applies to an entirely different point.

Mr. CUMMINS. The proviso there, or the subsequent part of the amendment, simply allows meats to come in without any home examination provided the Secretary of Agriculture finds there is a foreign system of inspection something like our own.

Mr. NORRIS. He does not even need to find that it is some-

thing like our own if it satisfies him.

No; something like our own, or what he Mr. CUMMINS.

thinks to be sufficient to protect our people.

Mr. NORRIS. He may, as a matter of fact, know, and it may be public knowledge, that it has not any resemblance to our system of inspection. It may be nowhere near so good. If the man who happens to be Secretary of Agriculture thinks it is good enough, he can issue an order that will permit meat from that country to come in on the certificate of the Government of the country that it has made the inspection which he has said, in his judgment, is good enough.

Mr. SHERMAN. Mr. President, may I make an inquiry?

The VICE PRESIDENT. Does the Senator from Nebraska

yield to the Senator from Illinois?

Mr. NORRIS. I yield to the Senator. Mr. SHERMAN. I wish to clear up my mind on one point as to this amendment, or either amendment. Will meats bearing a foreign certificate thereby become incapable of being excluded from the port of entry if they have spoiled in transit?

I have known of a good many cases where meat at the initial point of shipment was all right, but at destination it was not. If it comes to our port with a foreign certificate, under this paragraph, as written, will it or not be admitted? If it comes from a government whose system of inspection has been approved by the Secretary of Agriculture-and on that I am making no question-it comes bearing a foreign certificate, but when it reaches the port of entry here it may have been spoiled in transit, from various causes, such as defective re-

frigeration, climatic causes, defects in the construction of the vessel, storms, and the like. That frequently happens in

After the meat has received its certificate from a foreign government, is it not, under that certificate, proper to admit it,

and would it not be admitted?

Mr. NORRIS. Mr. President, while the Senator's question has no bearing on the point that I was making in regard to this particular amendment, it seems to me clear, since he has propounded the query to me, that the certificate of the foreign Government would go only to show, and would be evidence only to show, that the inspection provided for by the foreign country had been made in regard to the particular meat in question. It might be excluded for other reasons, of course. The point I make on this amendment is that if we pass this proviso without any change we provide one rule and one law for American meat in interstate commerce and an entirely different one that may be less exacting when the meat comes from a foreign country.

I desire to offer and have pending for the consideration of the committee or the Senate when this paragraph is taken up, as I understand it is going over, an amendment to strike out the words commencing with the word "or," in line 23, and ending with the word "health," in line 25.

The VICE PRESIDENT. The amendment will be stated. The Secretary. It is proposed to strike out of the committee

amendment, commencing on line 23, page 142, the following

Or satisfactory to him as being competent to protect the public health.

Mr. WILLIAMS. Mr. President, I wish to offer an amendment to be pending when this paragraph comes back. I want to give notice of it now, so as to have no doubt about the point I make. After the word "inspection" I move to insert the words of cattle and meat."

I do that so that there will be no doubt of the character of

the inspection.

Mr. CUMMINS. May I ask the Senator from Mississippl just

where that will come in?

Mr. WILLIAMS. Right after the word "inspection." Mr. GALLINGER. Mr. President, I am sure that our friends on the other side feel that we have made good progress to-day in the consideration of the bill.

Mr. KERN. Will the Senator yield to me for a certain mo-

tion?

Mr. GALLINGER. It is 6 o'clock, and I would be glad to yield.

Mr. KERN. I move that the Senate adjourn.

The motion was agreed to, and (at 6 o'clock p. m.) the Senate adjourned until Monday, August 25, 1913, at 11 o'clock a. m.

# SENATE.

## Monday, August 25, 1913.

The Senate met at 11 o'clock a. m.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of the proceedings of Saturday last was read and approved.

CALLING OF THE ROLL.

Mr. SMOOT. Mr. President, I suggest the absence of a quo-

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Martine, N. J. Nelson Norris O'Gorman Oliver Overman Ashurst Bacon Bankhead Gallinger Hughes James Smith, Ariz. Smith, Ga. Smith, S. C. Borah Brady Brandegee Johnson Jones Kenyon Kern Smoot Sterling Stone Sutherland Bristow Page Perkins Pittman Pomerene Bryan Chamberlain Chilton La Follette Swanson Thomas Thompson La Follette Lane Lea Lewis Lippitt Lodge McCumber McLean Martin, Va. Clapp Clark, Wyo. Clarke, Ark. Cummins Ransdell Tillman Townsend Vardaman Walsh Robinson Sheppard Sherman Shively Fletcher Simmons Williams

Mr. SHEPPARD. My colleague [Mr. Culberson] is unavoidably absent. He is paired with the Senator from Delaware [Mr. Du Pont]. This announcement may stand for the day.

Mr. JAMES. I wish to announce that my colleague [Mr.

BRADLEY] is detained from presence here by reason of illness, He has a general pair with the Scuator from Indiana [Mr.

KERN]. I will ask that this announcement may stand for the

Mr. SMOOT. I desire to announce that the junior Senator from Wisconsin [Mr. Stephenson] and the senior Senator from Delaware [Mr. DU PONT] are detained from the Senate on account of illness. I will allow this notice to stand for the day.

The VICE PRESIDENT. Sixty-four Senators have answered

to their names. There is a quorum present.

#### RAILROAD LAND GRANTS.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting, in response to a resolution of the 19th instant, a circular containing a schedule of land-grant and bond-aided railroads of the United States, together with a map showing such railroads and their connections, which, with the accompanying paper, was ordered to lie on the table.

### POST-ROAD IMPROVEMENT.

The VICE PRESIDENT laid before the Senate a communication from the Postmaster General and the Acting Secretary of Agriculture, transmitting, pursuant to law, a joint report on the progress of post-road improvement, which, with the accompanying paper, was referred to the Committee on Post Offices and Post Roads.

## PETITIONS.

Mr. PERKINS presented petitions of sundry citizens of Artesia, Bay City, Long Beach, Los Alamitos, and Anaheim, all in the State of California, praying for the adoption of a proposed tariff referendum, which were ordered to lie on the table.

Mr. McLEAN presented a petition of Housatonic Valley Pomona Grange, No. 10, Patrons of Husbandry, of South Kent, Conn., praying for the enactment of legislation providing for the enlargement of the parcel-post system, which was referred to the Committee on Post Offices and Post Roads.

## BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WALSH .

A bill (S. 3026) to authorize the issuance of a patent to E. T. Broadwater for the south half of the southeast quarter of section 13 and the east half of the northeast quarter of section 24, township 32 north, range 21 east, Montana meridian; to the Committee on Public Lands.

A bill (S. 3027) granting a pension to Mary E. Perry; to the

Committee on Pensions.

By Mr. LIPPITT:

A bill (S. 3028) granting a pension to Rosanna B. Harris; A bill (S. 3029) granting an increase of pension to Thomas

A bill (S. 3030) granting an increase of pension to Lewis Walker

A bill (S. 3031) granting an increase of pension to Joseph A.

A bill (S. 3032) granting a pension to Caroline McGoue;

A bill (S. 3033) granting an increase of pension to Esther Harrigan:

A bill (S. 3034) granting an increase of pension to Mary A.

Johnson; and A bill (S. 3035) granting a pension to Timothy McCarty; to the Committee on Pensions.

By Mr. McLEAN

A bill (S. 3036) for the relief of certain widows of soldiers

now drawing pensions; and A bill (S. 3037) granting an increase of pension to Julia E. Booth (with accompanying papers); to the Committee on Pen-

By Mr. SHERMAN:

A bill (S. 3038) for the relief of Thomas Riley; to the Committee on Military Affairs.

A bill (S. 3039) granting a pension to Kate A. Trapper; and A bill (S. 3040) granting an increase of pension to George T. Smith; to the Committee on Pensions.

By Mr. SHAFROTH:

A bill (S. 3041) providing for the retirement of the nationalbank notes, the gold certificates, and the United States notes now outstanding by the issuance of United States notes redeemable in gold and for the establishment of a 50 per cent gold redemption fund; to the Committee on Banking and Currency.

Page; and A bill (S. 3043) granting an increase of pension to Anna T. Russell; to the Committee on Pensions.

A bill (S. 3042) granting an increase of pension to Aaron B.

HEARINGS BEFORE THE COMMITTEE ON PRIVILEGES AND ELECTIONS.

Mr. KERN submitted the following resolution (S. Res. 170), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Privileges and Elections, or any subcommittee thereof, be authorized during the Sixty-third Congress, to
administer oaths, send for books and papers, to employ a stenographer
at a price not to exceed \$1 per printed page, to report such hearings as
may be had in connection with any subject which may be pending before said committee, to cause the proceedings before said committee to
be printed, if by said committee deemed expedient; that the committee
or subcommittee may sit during the sessions or recess of the Senate,
and that the expense thereof shall be paid out of the contingent fund
of the Senate.

#### THE TARIFF.

The VICE PRESIDENT. The morning business is closed.

Mr. SIMMONS. I ask unanimous consent that the Senate proceed with the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. THOMAS. I ask unanimous consent to turn to paragraph 404½ on page 124. It was passed over temporarily on Saturday. I wish to offer an amendment to it.

The VICE PRESIDENT. The paragraph will be read.

The Secretary. The proposition of the committee was to insert as a new paragraph:

404%. Antimony ore, stibuite and matte containing antimony, but only as to the antimony content.

Mr. THOMAS. In the first line of the paragraph I move to strike out the comma after the word "ore" and to insert the word "and"; and in the same line, after the word "stibnite," to strike out the words "and matte.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. THOMAS. I now ask unanimous consent to revert to paragraph 146, page 42, Schedule C, which relates to the same subject. In the first line of the paragraph, after the word "metal," I move to insert "and matte containing antimony, but not containing more than 10 per cent of lead," so as to read:

146. Antimony, as regulus or metal, and matte containing antimony, but not containing more than 10 per cent of lead—

And so forth.

The amendment was agreed to.

Mr. THOMAS. I now ask the Senate to turn to paragraph 485, page 136. In line 15 of that page, and the first line of the paragraph, I move to strike out the word "fowls" and to insert the word "poultry," so as to read:

Eggs of poultry, birds, fish, etc.

The VICE PRESIDENT. Without objection, the vote whereby the committee amendment inserting the word "fowls" was agreed to will be reconsidered, and the committee now proposes an amendment which will be stated.

The Secretary. Before the word "birds" strike out the proposed amendment of the committee, the word "fowls," and

in lieu thereof insert the word "poultry."

The amendment was agreed to.
The VICE PRESIDENT. Where shall the bill be taken up?
Mr. SIMMONS. Paragraph 549 is the next paragraph.

The Secretary resumed the reading of the bill on page 143, line 1, paragraph 549.

The next amendment of the Committee on Finance was, on page 143, line 5, to strike out paragraph 550 in the following words:

550. Meerschaum, crude or unmanufactured.

The amendment was agreed to.

The reading of the bill was continued to the end of line 4 on page 144, the last line read being the following:

557. Myrobolans, fruit.

Mr. SMOOT. Mr. President, I should like to ask the Senator having charge of this portion of the bill why the word "fruit" is added in that paragraph? The myrobolan is a fruit.

Mr. THOMAS. The Senator from Utah will notice that the paragraph has not been modified by the Senate committee, and consequently I am unable to answer the Senator's question. We

simply accepted it without examination. Mr. SMOOT. I desire to say, however, that there has been no misunderstanding in relation to the importation of myrobolans, for never in the history of tariff legislation has a question in regard to their importation arisen. Everybody knows that the myrobolan is a fruit, and so I can not see why the word "fruit" is added in that paragraph. There is a comma after the word "myrobolans," and then the word "fruit" is added. I think if the phraseology is retained as it is it will result in a discussion and perhaps a conflict as to its meaning.

Mr. THOMAS. The Senate committee made no investigation of the subject at all; but, as I have said, simply accepted the paragraph as we did not see any reason why it should be

Mr. SMOOT. Then I move that the word "fruit" be stricken from paragraph 557, page 144, line 4.

Mr. SIMMONS. Mr. President, I understand the Senator to say that the myrobolan is a fruit?

Mr. SMOOT. There is no doubt about it. Mr. SIMMONS. If that be so, what harm would that desig-As the Senator from Colorado [Mr. Thomas] has said, I do not think any special investigation was made by the subcommittee as to that, and I do not see any harm in the word "fruit" being added. Is any part of the myrobolan not a fruit?

Mr. SMOOT. Of course a part of the tree is not a fruit,

Mr. SIMMONS. It does not refer to the tree. The Senator from Utah does not understand that it refers to the tree, does he?

Mr. SMOOT. Not at all; but I want to call the Senator's attention to the fact that in the present law the paragraph simply reads "Myrobolans," and now the framers of this bill have put a comma after the word "myrobolans" and have added the word "fruit." If it is desired that the phraseology shall apply only to fruit, then strike out the comma.

Mr. SIMMONS. I think the Senator from Utah is right in that suggestion. It should read "Myrobolans fruit," striking out the comma.

at the comma. I think the punctuation is wrong.

The VICE PRESIDENT. The amendment proposed by the

Senator from Utah will be stated.

The Secretary. In paragraph 557, page 144, line 4, after the word "Myrobolans," it is proposed to strike out the comma, so as to read:

557. Myrobolans fruit.

The VICE PRESIDENT. Is that satisfactory to the Senator from Utah?

Mr. SMOOT. 'It will be perfectly satisfactory to me if that

amendment is made, Mr. President.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Utah.

The amendment was agreed to.

The reading of the bill was resumed, and the Secretary read paragraph 558, as follows:

558. Cut nails and cut spikes of iron or steel, horseshoe nails, hobnails, and all other wrought-iron or steel nails not specially provided for in this section; wire staples, wire nails made of wrought iron or steel, spikes, and horse, mule, or ox shoes, of iron or steel, and cut tacks, brads, or sprigs.

Mr. McLEAN. Mr. President, some time ago I introduced an amendment which, in substance, proposes to insert after the words "cut nails," in line 5 of that paragraph, the words nail rods." I call the attention of the committee to the fact that in paragraph 115, page 33, nail rods, which are the raw material from which the horseshoe nails are made, carry a duty of 10 per cent ad valorem. It seemed to me that if the nails were to come in free, the Swedish iron, from which such nails are made, should also come in free. As I understand, very little of that iron is produced in this country. If it is the purpose of the committee to lay a duty upon the rod and to let the finished product come in free, I have nothing more to say.

Mr. THOMAS. Mr. President, the committee will further

consider that paragraph and also the suggestion of the Senator from Connecticut, for which I thank the Senator.

The VICE PRESIDENT. The Chair understands the paragraph goes back to the committee

Mr. THOMAS. Yes, Mr. President. The VICE PRESIDENT. Is it the request that the whole

paragraph shall go back to the committee?

Mr. THOMAS. I do not think it necessary to take the entire paragraph back to the committee if that mere change is the only suggestion in regard to it. I would suggest that the whole paragraph be approved subject to further consideration of the suggested amendment of the Senator from Connecticut [Mr.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 559, page 144, line 11, after the word "darning," to insert "and needles for shoe machines," so as to make the paragraph read:

559. Needles, hand sewing and darning, and needles for shoe ma-

The amendment was agreed to.

The reading of the bill was resumed and continued to the end of paragraph 561, which is as fellows:

561. Nuts: Marrons, crude; coconuts in the shell and broken coconut meat or copra, not shredded, desiccated, or prepared in any manner.

Mr. GALLINGER. Mr. President, I call attention to the spelling of cocoanut in that paragraph. As spelled there it is manifestly incorrect. The word, of course, should be spelled e-o-c-o-a-n-u-t. That correction of spelling should be made both in line 20 and in line 21.

Mr. THOMAS. That is an error, of course, in both those

lines, and I move that the spelling be corrected.

The VICE PRESIDENT. The Chair is going to rule that the spelling in the bill is a matter that can be corrected without

action by the Senate.

Mr. GALLINGER. Still, Mr. President, the Secretary might not have observed the incorrect spelling, and therefore it is well to call attention to it.

Mr. THOMAS. Idem sonans.

The VICE PRESIDENT. The suggestion of the Senator from New Hampshire was timely, but it is not necessary that the correction of spelling be put to a vote of the Senate.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 144, after line 24, to strike out paragraph 564, as follows: 564. Oatmeal and rolled oats and oat hulls.

The amendment was agreed to.

The next amendment was, in paragraph 566, page 145, line 3, after the word "palm-kernel," to insert "perilla," so as to read: 566. Olls: Birch tar, cajeput, coconut, cod, cod liver, cottonseed, croton, ichthyol, juglandium, palm, palm-kernel, perilla.

The amendment was agreed to.

The reading of the bill was resumed, and the Secretary continued the reading of paragraph 556, as follows:

Soyn-bean, and olive oil rendered unfit for use as food or for any but mechanical or manufacturing purposes, by such means as shall be satisfactory to the Secretary of the Treasury and under regulations to be prescribed by him; Chinese nut oil, nut oil or oil of nuts not specially provided for in this section; petroleum, crude or refined, and all products obtained from petroleum, including kerosene, benzine, naphtha, gasoline, paraffin, and paraffin oil; lubricating oils not specially provided for in this section; and also spermaceti, whale, and other fish oils of American fisheries, and all fish and other products of such fisheries.

Mr. SMOOT. Mr. President, in line 10 of the paragraph the words "lubricating oils not specially provided for in this section" constitute a new provision in any tariff bill. There are many oils that are used for lubricating that are also used extensively for other purposes, as Senators must know. Really I do not see how this provision is going to be administered. I know from experience that we use oils in woolen mills for lubricating purposes, and they are also used in the manufacture of woolen goods. I am quite sure that when the committee's attention is called to this they will consent to strike those words out of the paragraph, because if they are not stricken out it will be absolutely impossible to administer the law affecting lubricating oils. I ask the Senator from Colorado if he is not willing to have those words stricken out of the paragraph.

I want further to say to the Senator that every oil that is used for lubrication is already provided for in the bill, and this constitutes a duplication of words which will simply bring confusion

Mr. THOMAS. I was going to suggest to the Senator that he let the paragraph be adopted as to the remaining portions, and the committee will take the particular matter to which he has referred under consideration.

Mr. SMOOT. That will be satisfactory. I am quite sure that when the committee do take it under consideration they will arrive at the same conclusion that I have.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 571, page 145, line 21, after the word "jute," to insert "hemp, and flax"; and, in line 25, after the word "bags," to strike out "used chiefly," and insert "suitable," so as to make the paragraph read:

571. Paper stock, crude, of every description, including all grasses, fibers, rags, waste, including jute, hemp, and flax waste, shavings, clippings, old paper, rope ends, waste rope, and waste bagging, and all other waste not specially provided for in this section, including old gunny cloth and old gunny bags, suitable for paper making.

Mr. SMOOT. Mr. President, before passing upon that amendment I merely want to ask a question, so as to make sure what is the meaning of the provision. In line 21 the committee want is the heating of the provision. In line 21 the committee have added the words "hemp, and flax," and then follow the words "waste, shavings, clippings, old paper, rope ends," and so forth. If they mean hemp and flax waste, then, of course, there should not be a comma after the word "hemp."

Mr. THOMAS. There should not be a comma after the word

"hemp."

The VICE PRESIDENT. The amendment will be stated. The Secretary. In the committee amendment, in paragraph 571, page 145, line 21, it is proposed to strike out the comma after the word "hemp." Mr. LODGE. Ought there to be a comma inserted after the word "flax"; or is it meant to read "flax waste"?

Mr. SMOOT. "Flax waste."

Mr. SIMMONS. Yes; "flax waste."

Mr. LODGE. Then the suggestion of the Senator from Utah is correct.

Mr. SMOOT. The comma ought to be stricken out.

Mr. SIMMONS. It is very clear that the comma ought to be stricken out.

The VICE PRESIDENT. The question is on agreeing to the amendment to the committee amendment striking out the comma after the word "hemp."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed, and paragraph 572 was read, as follows:

572. Printing paper (other than paper commercially known as handmade or machine handmade paper, japan paper, and imitation japan paper by whatever name known), unsized, sized, or glued, suitable for the printing of books and newspapers, but not for covers or bindings, not specially provided for in this section, valued at not above 2½ cents per pound, decalcomania paper not printed.

Mr. LODGE. I ask that paragraph 572 may be passed over.

t is connected with the paper schedule, which we have entirely passed over, and I think they ought to be taken up together.

Mr. SIMMONS. That may be done if the Senator so desires.

Mr. LODGE. They can all be taken up together when the paper schedule is considered.

Mr. SIMMONS. Ver. I think it will be better to debate them.

Mr. SIMMONS. Yes; I think it will be better to debate them

at one time

The VICE PRESIDENT. Paragraph 572 will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 575, page 146, line 10, after the word "cut," to insert 'flaked," so as to make the paragraph read:

575. Pearl, mother of, and shells, not sawed, cut, flaked, polished, or otherwise manufactured, or advanced in value from the natural state.

The amendment was agreed to.

The reading of the bill was resumed, and continued to the end of paragraph 578, which is as follows:

of paragraph 578, which is as follows:

578. Philosophical and scientific apparatus, utensils, instruments, and preparations, including bottles and boxes containing the same, specially imported in good faith for the use and by order of any society or institution incorporated or established solely for religious, philosophical, educational, scientific, or literary purposes, or for the encouragement of the fine arts, or for the use and by order of any college, academy, school, or seminary of learning in the United States, or any State or public library, and not for sale, and articles solely for experimental purposes, when imported by any society or institution of the character herein described, subject to such regulations as the Secretary of the Treasury shall prescribe.

Mr. SMOOT. Mr. President, one word on that paragraph. I call attention to the words in line 25, page 146, and the words in line 1, page 147, reading "and articles solely for experimental purposes." The expression is too vague to be used in a tariff bill. I believe it would be impossible to forecast just what class of articles would be entitled to the benefit of it. It seems to me it might be construed to include everything that an institution such as indicated in the paragraph might use for its chemical and physical laboratories or work rooms. It might be held to include furniture, fixtures, and everything required in an experimental process in any such institution. I ask the committee to consider those words and see if they are not too broad in their scope

Mr. THOMAS. The Senator, of course, has noted that the articles referred to in the paragraph are to be admitted under "such regulations as the Secretary of the Treasury shall prescribe."

Mr. SMOOT. But when there is a specific statement in a law, the Secretary of the Treasury can not change the law.

Mr. THOMAS. I understand the Senator to say that the language is not sufficiently specific to prevent abuse. I may have misunderstood the Senator.

Mr. SMOOT. That was not my intention, I will say to the

Senator, if I did say it.

Mr. SIMMONS. I do not think the trouble the Senator anticipates can possibly arise. Of course, the paragraph must be construed as a whole. If the language which he criticizes were standing separate and apart, no doubt his deductions would be proper and sound; but, taking it in connection with the whole context, I think any tribunal would construe the articles referred to as articles of a similar character and kind with those referred to above, and used for similar purposes as those re-ferred to above. The Senator will notice that the paragraph begins:

578. Philosophical and scientific apparatus, utensils, instruments, and preparations, including bottles and boxes containing the same, specially imported in good faith for the use and by order of any society or institution incorporated or established solely for religious, philosophical, educational, scientific, or literary purposes.

I think, being embraced in that paragraph and following the words I have quoted, the word "articles," as used in the sentence to which the Senator refers, would be taken in connections. tion with those general designations above and that its meaning would be limited and restricted.

Mr. SMOOT. Mr. President, let me call the Senator's attention to the fact that instruments—

Mr. SIMMONS. If the Senator will permit me, I will say that, rather than to consume time in further discussion, we will investigate the matter, and if we think, after investigation, that it is subject to the criticism of the Senator we will bring in an

Mr. SMOOT. Just one other word, so that the Senator him-self will get a clear understanding of what my construction of Mr. SMOOT. the language is. For instance, it specifically names instruments, including boxes and bottles, and so forth. Then below

And articles solely for experimental purposes.

Where? In religious, philosophical, educational, scientific, or literary institutions. Let me say to the Senator that many of those institutions educate certain students in agriculture, and tools can and must be used in that connection. for experimental purposes. Under this paragraph, in my opinion, wherever the authorities of an institution wanted to import any kind of an instrument, whether it were in the chemical department, the agricultural department, or any other depart-

ment of the institution, they could import it free of duty.

Mr. LA FOLLETTE. Mr. President, if the Senator will permit me, does not the Senator think that if the articles are imported for educational purposes, and to be used in connection with training the youth of this land, they ought to be imported free, whether they be tools or instruments, or whatever they may be?

Mr. SMOOT. If there were a limit, Mr. President-

Mr. LA FOLLETTE. They will be imported under such regulations as the Secretary of the Treasury sees fit to impose, and it seems to me clear that he will make such requirements as will insure their being used for educational purposes.

Mr. SIMMONS. I think the Senator is entirely correct in

that

Mr. LA FOLLETTE. I do not think the committee will have any difficulty with the paragraph when they come to reconsider it.

Mr. SIMMONS. I think any court or board of appraisers construing this language would, under the ordinary rules of legal construction, necessarily interpolate into the sentence the words "similar articles" as having reference to the articles enumerated before.

Mr. GALLINGER. Mr. President, I see some danger in the

provision as it is printed.

If the Secretary of the Treasury could trace the use of whatever instruments are enumerated in this paragraph, he might then regulate it. But unless we entirely depend upon the good faith of these institutions, which perhaps we ought to do, I can see very clearly that they could import pretty much anything, saying that it was for experimental purposes. I do not know what they want to experiment with. These articles are designated here as "philosophical and scientific apparatus, utensils, instruments, and preparations." I assume that they have been experimented with and that they have passed into commerce, and that no further experimentation would be required.

The danger is, from my viewpoint, of a great many of these instruments and preparations being brought into our country ostensibly for experimental purposes, when, as a matter of fact, they would not be used for those purposes. But as the committee is going to take up the matter I do not think it is worth while to discuss it any further. Possibly I am wrong in my interpretation of what may happen.

Mr. JAMES. Does the Senator think it very probable that these institutions, incorporated for religious, philosophical, educational, scientific, or literary purposes, would engage in the importation of these instruments for the purpose of defrauding the

Government out of its revenue?

Mr. GALLINGER. I do not think they would. I am frank to say to the Senator that I think they would act in good faith and not engage in smuggling or fraud.

Mr. SIMMONS. While at first blush I think there is no necessity for any change, if the Senator from Utah insists upon it, we will consider the question whether the paragraph should be amended. But I should like to have the paragraph adopted with that understanding.

Mr. SMOOT. That is satisfactory to me. Mr. JAMES. Since the bill provides the Since the bill provides that works of art and many other things may be brought in here free, provided they are to be placed in institutions where they are to be open to

the public, it seems to me as though we might risk permitting educational and religious and literary institutions to import scientific instruments for the betterment of humanity, without throwing upon them a suspicion that they would become smugglers of that property in order to avoid the payment of a tax.

Mr. SMOOT. If that is the case, the proper thing to do

would be to put them all upon the free list. I have no objec-

tion to that if the Senator desires to do it.

Mr. JAMES. We do place them on the free list so far as these particular institutions are concerned; but we separate or distinguish between institutions of this character which are generally institutions of charity and those which are institutions for the purpose of making money.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, on page 147, after line 5, to insert a new paragraph, as follows: 5801. Photographic and moving-picture films, sensitized but not exposed or developed.

The amendment was agreed to.

The reading of the bill was resumed.

The reading of the bill was resumed.

The next amendment was, in paragraph 584, page 147, line 16, after the words "carbonate of," to insert "cyanide of"; in line 17, before the word "sulphate," to strike out "and"; in the same line, after the words "sulphate of," to strike out "crude or refined"; and, in line 18, after the words "hydrate of," to strike out "crude or refined," so as to make the paragraph read:

584. Potash: Crude, or "black salts"; carbonate of; cyanide of; sulphate of; hydrate of, when not containing more than 15 per cent of caustic soda; nitrate of, or saltpeter, crude; and muriate of.

The amendment was agreed to.

Mr. McCUMBER. Mr. President, I ask that paragraph 585

may go over for the purpose of amendment.

Mr. SIMMONS. Mr. President, on Saturday afternoon we passed over some paragraphs by consent, because we took up this schedule rather unexpectedly to many Senators, To-day, however, while I do not wish to lay down any rigid rule, I should like to have us conclude the consideration of the various paragraphs wherever we can. Has the Senator any special objection to proceeding with the discussion and consideration of

paragraph 585 at this time?

Mr. McCUMBER. We have been passing over a number of paragraphs, with the general understanding that those that would require argument of any kind or those in which amendments might be offered would be taken up by themselves, and that we would get through with the unobjected portions first. I really think the Senator will gain time if he will first eliminate from discussion all of the portions of this schedule to which no objections will be urged. I think it will give us a little time to prepare the amendments and be ready to discuss them, and that the argument will be much more brief than if we were to take them up singly.

Mr. SIMMONS. If the Senator says he is not prepared now,

I will make no further insistence. I simply wished to call attention, not so much in the case of this particular paragraph as in others, to the fact that I thought we were operating Saturday under a somewhat different rule from the one which ought to obtain to-day, because on Saturday evening we suddenly en-tered upon the consideration of a schedule before it was reached

in regular order.

Mr. McCUMBER. I was about to ask that question of the Senator, but when we came to paragraph 572 I noticed that it was requested that it might go over, and the request was granted. I therefore assumed that the chairman had taken it for granted that all these objected ones should go over until we had disposed of the unobjected paragraphs.

Mr. SIMMONS. That paragraph went over because we wanted to consider it in connection with Schedule M, which has not yet been reached. As I stated, however, I do not wish to lay down any hard and fast rule about the matter.

Mr. McCUMBER. There are only two or three items that I

shall want to have go over.

Mr. SIMMONS. I was simply calling attention to the situation. I had hoped that to-day we would not pass over any more paragraphs than absolutely necessary. If the Senator is not ready, however, I shall not object to this one being passed over.

Mr. McCUMBER. If I thought it would facilitate the prog-

ress of the bill, I would go right ahead now and make my dis-cussion upon this paragraph; but I believe we will gain a little time if we take it up separately, later.

Mr. SIMMONS. Very well.

The VICE PRESIDENT. Paragraph 585 is passed over.

The reading of the bill was resumed.

combinations with acids and compounds, not subject to duty in this section" and insert "Quinia, sulphate of, and all alkaloids or salts of cinchona bark," so as to make the paragraph read:

588. Quinia, sulphate of, and all alkaloids or salts of cinchona bark. Mr. JOHNSON. Mr. President, I ask that that paragraph

may be passed over for the present.

The VICE PRESIDENT. Paragraph 588 will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 598, page 149, line 14, after the word "Santonin," to insert "and its combinations with acids, not subject to duty under this section," so as to make the paragraph read:

598. Santonin, and its combinations with acids, not subject to duty under this section.

Mr. SMOOT. Mr. President, the House reported that paragraph with the single word "Santonin" The Senate has added "and its combinations with acids, not subject to duty under this section."

In chemistry a salt is a combination of an acid with a base. It seems to me that if you use the word "acids" it is only reaching about halfway what the committee intended, or else the word should not be used at all. I ask the Senator having this part of the bill in charge if the paragraph would not be very much better if it remained just as the House had it? There never has been any question as to the administration of it. Everybody knows just what it is; and it does seem to me that with the wording here there would be a conflict.

Mr. JOHNSON. Mr. President, the committee suggested this change because santonin does come into this country in combination with acids, and with acids which are not dutiable. It is proposed to admit santonin in combination with such acids free of duty. It may be combined with other acids which are duti-

able, however.

Mr. SMOOT. If that be the case, I can not see why the committee used the words "not subject to duty under this section." If, however, the object is as stated by the Senator, it seems to me it ought to be specifically stated, and the words "not subject to duty under this section" should be stricken out.

Mr. LODGE. Mr. President, the paragraph certainly is wrongly punctuated. The comma after "acids" ought to come out, because the paragraph applies only to acids not subject to duty, as I understand. If santonin is in combination with an acid that is subject to duty, the paragraph does not apply; it does not go on the free list.

Mr. JOHNSON. I think the Senator from Massachusetts is entirely correct. The comma should come out.

Mr. LODGE. The comma certainly ought to come out. What-

ever is done with the amendment, the comma ought to come out. The Secretary. In the committee amendment, in paragraph 598, page 149, line 14, after the word "acids," it is proposed to strike out the comma.

The amendment to the amendment was agreed to.

Mr. SMOOT. Mr. President, certainly the Senator will admit that there is no use in putting those words in the section, because if that is the case, all the Senator wants to cover is santonin and its combination with acids. If that is all there is to it, there is no need of putting the balance of the words in this paragraph.

Mr. JOHNSON. If santonin is in combination with an acid that is free of duty, the combination comes in free; but if it is in combination with an acid that is dutiable, it does not come

in free. I wish to have that made plain.

Mr. SMOOT. I simply wanted to call attention to it. The VICE PRESIDENT. The question is on agreeing to the

committee amendment as amended.

The amendment as amended was agreed to.

The next amendment was in paragraph 599, page 149, line 16, to strike out "Cardamom" and insert "Cardamon."

Mr. THOMAS. Our attention has been called to the fact, and investigation shows it is correct, that the original spelling of the word and not the amendment is correct. We therefore ask that the amendment be disagreed to.

The amendment was rejected.

The next amendment was, in paragraph 599, page 149, line 22, after the word "seedlings," to fisert "4 years old or less," so as to make the paragraph read:

599. Seeds: Cardamom, cauliflower, celery, corlander, cotton, cummin, fennel, fenugreek, hemp, hoarhound, mangelwurzel, mustard, rape, St. John's bread or bean, sorghum, sugar beet, and sugar cane for seed; bulbs and bulbous roots, not edible and not otherwise provided for in this section; all flower and grass seeds; coniferous evergreen seedlings 4 years old or less; all the foregoing not specially provided for in this section.

The amendment was agreed to.

The next amendment was, in paragraph 588, page 148, line 24, after the numerals "588," to strike out "Quinine, and its after the word "dip," to strike out "containing five one-hun-

dredths of 1 per cent of arsenic or more, not specially provided for in this section," so as to make the paragraph read:

600. Sheep dip.

The amendment was agreed to.

The reading of the bill was continued to line 3, on page 150, the last line read being as follows:

602. Shrimps, lobsters, and other shellfish.

Mr. SMOOT. Will the Senator state why the word "lobis included in the paragraph?

Mr. THOMAS. It was included by the House.
Mr. SMOOT. I know that the House included it.
Mr. THOMAS. We made no further investigation of it, but accepted it as the House sent it to us.

Mr. SMOOT. Of course, "and other shellfish" would cer-

tainly include lobsters.

Mr. THOMAS. It would include shrimps also.

That is hardly a shellfish. Mr. SMOOT.

Mr. THOMAS. I do not know.

Mr. SMOOT. There is not any question about lobster being a shellfish, of course.

Mr. WILLIAMS. Is there any question about shrimps being shellfish?

Mr. SMOOT. I do not know.

Mr. WILLIAMS. When we can say one and other shellfish, what is the trouble about saying two and other shellfish?

Mr. SMOOT. There is no special trouble if that is what you want to say, but I do not think it is necessary.

The reading was continued.

The next amendment of the committee was, in paragraph 609, page 150, line 14, after the words "arseniate of," to insert cyanide of," so as to make the paragraph read:

609. Soda, arseniate of, cyanide of, sulphate of, crude, or sa and niter cake, soda ash, silicate of, nitrate of, or cubic nitrate.

The amendment was agreed to.

The reading of the bill was continued, as follows:

610. Soya beans.

Mr. JONES. I wish to ask the Senator in charge of the bill whether he is sure that the spelling of that bean is correct? I received quite a number of letters in reference to that matter urging that soya beans might go on the free list, and it is my recollection that it is spelled s-o-i-a. Unless the Senator is sure of the spelling, it might make some difference.

Mr. SHIVELY. The spelling in the present law has been maintained in that respect. I think it is right just as it is.

Mr. JONES. Very well, then, unless I should find something

to the contrary

Mr. SIMMONS. I will state to the Senator from Washington that I myself raise some of those beans, and I have been very much interested in them. I have discovered in reading the literature that the word is spelled in various ways, but in this

way more frequently than in any other.

The reading of the bill was continued to line 2 on page 151. Mr. THOMAS. I think in the last paragraph read the Secretary read "foreign postage or revenue stamps."

there is no word "postage" there.

Mr. JAMES. The language is "foreign postage or revenue

Mr. THOMAS. The word "postage" does not appear in the handbook. It is my mistake.

The reading of the bill was continued.

The amendment of the committee was, on page 151, after line 18, to insert as a new paragraph the following:

615. Steel ingots, cogged ingots, blooms and slabs, die blocks or blanks, and billets, if made by the Bessemer, Siemens-Martin, openhearth, or similar processes, not containing alloy, such as nickel, cobalt, vanadium, chromium, tungsten, or wolfram, molybdenum, titanium, iridium, uranium, tantalum, boron, and similar alloys.

The amendment was agreed to.

The reading of the bill was continued.

The next amendment was, in paragraph 618, page 152, line 9, to strike out the words "all salts thereof" and insert "its combinations with acids, not subject to duty under this section." so as to make the paragraph read:

618. Strychnia or strychnine, and its combinations with acids, not subject to duty under this section.

Mr. JOHNSON. Mr. President-

Mr. SMOOT. I was simply going to call the Senator's attention to the amendment offered to that paragraph by the commit-tee and to state that the use of the words "its combinations with acids" eliminates strychnine from the paragraph and will make strychnine dutiable. If that is the object the Senator had in

view I have nothing more to say.

Mr. JOHNSON. It seems to me that the language will not bear the interpretation the Senator puts upon it. The words

used are "strychnia or strychnine." I suggest that the comma be stricken out after "acids."

Mr. SMOOT. A Senator asked me if strychnine comes in free as combinations of acids. I am speaking of strychnine

Mr. JOHNSON. It is here upon the free list specifically mentioned.

Mr. STONE. The Senator from Utah is mistaken.

Mr. SMOOT. It is my opinion that with the wording here it will come in dutiable. I am not going to say more. I will look it up and wait until the bill gets into the Senate before offering an amendment.

Mr. LODGE. I think the comma ought to come out after the word "acids."

Mr. JOHNSON. I have already made that suggestion.

Mr. LODGE. I beg the Senator's pardon. I did not hear him.

The SECRETARY. In line 10, strike out the comma after acids.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was continued.

The next amendment was, in paragraph 621, page 152, line 16, after the word "Swine," to insert "cattle, sheep, and all other domestic live animals suitable for human food not otherwise provided for in this section," so as to make the paragraph

621. Swine, cattle, sheep, and all other domestic live animals suitable for human food not otherwise provided for in this section.

Mr. McCUMBER. I ask that the paragraph may go over. The VICE PRESIDENT. The paragraph will go over.

The Secretary continued the reading of the bill.

Mr. WILLIAMS. I understand that the Senator from North Dakota has asked that paragraph 621 shall go over. Why should we do that? We discussed it very freely when we reached the other paragraph in the agricultural schedule. Why can we not let it be disposed of? If the Senator has any amendment to offer, let him offer it now. We took half a day on it back yonder some days ago.

Mr. McCUMBER. Mr. President, I do not know when the half a day was taken up. Of course I have taken no time on it as yet, and I thought it would be better and we would save a little time if I would discuss those paragraphs together when we get through with the schedule, and eliminate from the discussion all the paragraphs except those that would oblige argument. I still believe we will gain time by that course. take it up and take time on this paragraph, but possibly I would repeat some of the arguments upon some other paragraph.

Mr. WILLIAMS. When we had under consideration the paragraph as passed by the House to which the free listing provisions were a substitute the whole subject went through the fullest discussion, and the hope was that the time we then consumed would prevent the consumption of time later on. I shall not object to the request of the Senator to let the paragraph go over, but it does seem to me there ought to be an end of litigation somewhere.

Mr. McCUMBER. The Senator will find, as I think he has found in the past, that I have never taken excessive time upon any one schedule. I will state what I have to state in the form of an amendment, and will give my reasons very briefly for the amendment, and will then let it go to a vote.

Mr. STONE. Very well. Let the reading proceed.

The reading of the bill was continued to line 22, on page 152, the last line read being the following:

624. Tallow.

Mr. SMOOT. I should like to suggest to the Senator having this paragraph in charge that he insert the word "animal" before "tallow" in the paragraph, so that it will apply only to animal tallow.

Mr. WILLIAMS. Is there any other sort of tallow?
Mr. SMOOT. There is, Mr. President. There is a tallow known as vegetable tallow, which is used for entirely different purposes, and there have been conflicts already in the importation of it. In a case of the United States against Davis, Turner & Co. it was specifically stated that it was "a mixture chiefly composed of saponified fat, unsaponified fat, and alkaline silicate," and it was commercially known as vegetable tallow.

Mr. WILLIAMS. I understand the court has decided that

vegetable tallow is not tallow. It is just something or other that is called vegetable tallow, but it is not tallow; and there is no trouble about what this means. It means animal tallow.

Mr. SMOOT. It is not animal tallow; that is what the court says. If you want that kind of tallow to come in free, well and good. I am not complaining of that, but if you want only animal tallow to come in free the word "animal" ought to be

Mr. WILLIAMS. The Senator is hypercritical. The Payne-Aldrich bill used the word "tallow."

Mr. SMOOT. I am perfectly aware of that. Mr. WILLIAMS. It did not say "animal tallow." But it seems somebody wanted to get a certain kind of vegetable tallow in free, and it seems the courts decided against them. The matter is res judicata. It seems that the court took the view that the framers of the Payne-Aldrich bill took, and this committee took, that tallow means tallow and does not mean something made out of vegetables. Any dictionary will show that tallow means just what every boy who was raised in the country knows it means. I do not see any necessity for inserting the word "animal."

Mr. SMOOT. All I wanted was that there should be no question about it and that it should simply apply to animal tallow. Mr. WILLIAMS. There is no question about it. The courts

decided it; it is settled.

The next amendment of the Committee on Finance was, in to strike out "of nutgalls, of Persian berries," and the comma and insert "and"; in the same line, after the word "bark," to strike out the comma and the words "of sumac" and insert a strike out the comma and the words "of sumac" and insert a semicolon; and, on page 153, line 1, after the word "chestnut," to strike out the semicolon and insert a comma, so as to make the paragraph read:

626. Tanning material: Extracts of quebracho and of hemlock bark; extracts of oak and chestnut, and other barks and woods other than dyewoods such as are commonly used for tanning not specially provided for in this section; nuts and nutgalls and woods used expressly for dyeing or tanning, whether or not advanced in value or condition by shredding, grinding, chipping, crushing, or any other process; and articles in a crude state used in dyeing or tanning; all the foregoing not containing alcohol and not specially provided for in this section.

Mr. BRANDEGEE. Let'that go over. The paragraph fixing the duty upon these extracts, paragraph 317, was passed and I should like to consider the two paragraphs together. They-

Mr. STONE. All right; let it go over. The VICE PRESIDENT. Paragraph 626 goes over.

The next amendment was, on page 153, to strike out paragraph 631, as follows:

631. Terra alba, not made from gypsum or plaster rock.

The amendment was agreed to.

The next amendment was, in paragraph 644, page 155, line 14, before the word "residents," to insert "such," so as to make the paragraph read:

the paragraph read:

644. Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall include only such articles as were actually owned by them and in their possession abroad at the time of or prior to their departure from a foreign country, and as are necessary and appropriate for the wear and use of such persons and are intended for such wear and use, and shall not be held to apply to merchandise or articles intended for other persons or for sale: Provided, That in case of residents of the United States returning from abroad all wearing apparel, personal and household effects taken by them out of the United States to foreign countries shall be admitted free of duty, without regard to their value, upon their identity being established under appropriate rules and regulations to be prescribed by the Secretary of the Treasury: Provided further, That up to but not exceeding \$100 in value of articles acquired abroad by such residents of the United States for personal or household use or as souvenirs or curios, but not bought on commission or intended for sale, shall be admitted free of duty.

The amendment was agreed to.

The next amendment was, on page 155, after line 18, to strike

646. Wheat flour and semolina: Provided, That wheat flour shall be subject to a duty of 10 per cent ad valorem when imported directly or indirectly from a country, dependency, or other subdivision of government which imposes a duty on wheat flour imported from the United States.

And to insert the following:

646. Wheat, wheat flour, semolina, and other wheat products: Provided, That wheat shall be subject to a duty of 10 cents per bushel, that wheat flour shall be subject to a duty of 45 cents per barrel of 196 pounds, and semolina and other products of wheat 10 per cent ad valorem when imported directly or indirectly from a country, dependency, or other subdivision of government which imposes a duty on wheat or wheat flour or semolina or any other product of wheat imported from the United States.

Mr. McCUMBER. I ask that that paragraph may go over.

Mr. STONE. Very well; go on.

The VICE PRESIDENT. Paragraph 646 goes over.

The next amendment was, in paragraph 647, page 156, line 8, before the word "wire," to strike out "Barbed" and to insert "All barbed"; in line 9, after the word "than," to strike out "No. 6" and insert "twenty one-hundredths of 1 inch in diameter"; in line 10, after the word "than," to strike out "No. 14 wire gauge" and insert "eight one-hundredths of 1 inch in diameter"; in line 13, after the word "than," to strike out "No. 6" and insert "twenty one-hundredths of 1 inch in diam-

eter"; and in line 14. after the word "than," to strike out "No. 14 wire gauge" and insert "eight one-hundredths of 1 inch in diameter," so as to make the paragraph read:

647. All barbed wire, galvanized wire not larger than twenty one-hundredths of 1 inch in diameter and not smaller than eight one-hundredths of 1 inch in diameter of the kind commonly used for fencing purposes, galvanized-wire fencing composed of wires not larger than twenty one-hundredths of 1 inch in diameter nor smaller than eight one-hundredths of 1 inch in diameter, and wire commonly used for baling hay or other commodities.

The amendment was agreed to.

The next amendment was, in paragraph 649, page 156, line 21, after the words "hop poles," to insert "hop poles," so as to make the paragraph read:

make the paragraph rend:

649. Wood: Logs, timber, round, unmanufactured, hewn or sawed, sided or squared; pulp woods, kindling wood, firewood, hop poles, hop poles, fence posts, handle bolts, shingle bolts, gun blocks or gunstocks rough hewn or sawed or planed on one side; hubs for wheels, posts, heading bolts, stave bolts, last blocks, wagon blocks, oar blocks, heading blocks, and all like blocks or sticks, rough hewn, sawed, or bored; sawed boards, planks, deals, and other lumber, not further manufactured than sawed, planed, and tongued and grooved; clapboards, laths, pickets, palings, staves, shingles, ship timber, ship planking, broom handles, sawdust, and wood flour; all the foregoing not specially provided for in this section.

Mr. JONES. I ask that that paragraph be passed over. The VICE PRESIDENT. The paragraph will be passed over at the request of the Senator from Washington.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 650, page 157, line 7, after the word "Cedar," to insert "including Spanish cedar"; and in line 10, after the word "cedar," to insert "(Juniperus virginiana)," so as to make the paragraph read:

paragraph read:
650. Woods: Cedar, including Spanish cedar, lignumvitæ, lancewood, ebony, box, granadilla, mahogany, rosewood, satinwood, and all forms of cabinet woods, in the log, rough, or hewn only, and red cedar (Juniperus virginiana) timber, hewn, sided, squared, or round; sticks of partridge, hair wood, pimento, orange, myrtle, bamboo, rattan, reeds unmanufactured, india malacca joints, and other woods not specially provided for in this section, in the rough, or not further advanced than cut into lengths suitable for sticks for umbrellas, parasols, sunshades, whips, fishing rods, or walking canes.

The amendment was agreed to.

Mr. TOWNSEND. Mr. President, when we passed the paragraph including mahogany lumber I gave notice that I would bring the matter up at this point, but I am satisfied, after having discussed the subject at that time and in view of the action of the Senate, that it would do no good now to offer an amendment to that paragraph, so I am not going to do so.

Mr. LODGE. I ask that the next paragraph, paragraph 651, It is part of the paper schedule and involves be passed over.

the whole question of countervailing duties.

The VICE PRESIDENT. Paragraph 651 will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 652, page 158, line 17, after the word "camel," to insert "Angora goat, alpaca"; in line 18, after the word "animals," to insert "not specially provided for in this section"; and in line 19, after the word "animals," to insert "and paper twine for binding any of the foregoing. This paragraph shall be effective on and after the 1st day of December, 1913," so as to make the paragraph read:

652. Wool of the sheep, hair of the camel. Angora goat, alpaca, and other like animals, not specially provided for in this section, and all wools and hair on the skin of such animals, and paper twine for binding any of the foregoing. This paragraph shall be effective on and after the 1st day of December, 1913.

The amendment was agreed to.

The next amendment was, in paragraph 653, page 159, after the word "section," at the end of line 2, to insert "This paragraph shall be effective on and after the 1st day of December, 1913," so as to make the paragraph read:

653. Wool wastes: All noils, top waste, card waste, slubbing waste, roving waste, ring waste, yarn waste, bur waste, thread waste, garnetted waste, shoddles, mungo, flocks, wool extract, carbonized wool, carbonized noils, and all other wastes not specially provided for in this section. This paragraph shall be effective on and after the 1st day of December, 1913.

The amendment was agreed to.

Mr. LODGE. The next paragraph as passed by the House has been stricken out and in lieu thereof the committee report a substitute paragraph. I should like to have that amendment passed over. It is a separate matter, and I think it will lead to a good deal of debate.

The VICE PRESIDENT. Paragraph 654, with the com-

mittee amendment, will go over.

The reading of the bill was resumed and continued to the end of paragraph 657, on page 162, which is as follows

657. Works of art, productions of American artists residing temporarily abroad, or other works of art, including pictorial paintings on glass, imported expressly for presentation to a national institution or to any State or municipal corporation or incorporated religious

society, college, or other public institution, including stained or painted window glass or stained or painted glass windows, and except any article, in whole or in part, molded, cast, or mechanically wrought from metal within 20 years prior to importation; but such exemption shall be subject to such regulations as the Secretary of the Treasury may prescribe.

Mr. THOMAS. I ask that paragraph 657 be referred back to the committee.

The VICE PRESIDENT. Paragraph 657 will be passed over

and referred back to the committee.

Mr. LODGE. I ask that paragraph 658, which is really connected with paragraph 654, be also passed over, so that the two paragraphs may be taken up together.

The VICE PRESIDENT. Paragraph 658 will be passed over. The reading of the bill was resumed and continued to the end of paragraph 659, on page 164.

Mr. LODGE. That finishes the free list, and I presume we

are not going on now with section 2.

Mr. KENYON. I offer an amendment in the nature of a new

paragraph, to be known as paragraph 660.

Mr. THOMAS. If the Senator will allow me, I want to make a verbal correction. In paragraph 656, page 162, line 7, the word "section" should be stricken out and the word "paragraph" inserted.

The VICE PRESIDENT. The amendment will be stated.

The Secretary. On page 162, line 7, it is proposed to strike out the first word in the line, the word "section," and in lieu insert the word "paragraph."

The amendment was agreed to.
The VICE PRESIDENT. The amendment proposed by the
Senator from Iowa [Mr. Kenyon] will be stated.
The Secretary. On page 164, after line 5, it is proposed to

insert a new paragraph, as follows:

insert a new paragraph, as follows:

660. Whenever it shall be found by a Federal court of competent jurisdiction, and said finding is unchallenged either by appeal or writ of error, or if challenged and said decision is sustained by the court of last resort, that any article or commodity upon which a duty is levied under this act is under the control of a monopoly or combination formed or operating in violation of the act of July 2, 1890, or substantially under such control, no further duty shall be levied or collected on such article or commodity, and the same shall therefore be admitted free of duty.

It shall be the duty of the Attorney General to advise the Secretary of the Treasury of the termination and result of all actions, either civil or criminal, brought under said act of July 2, 1890, commonly known as the Sherman Antitrust Act, and whenever the Secretary of the Treasury shall receive such information from the Attorney General it shall be his duty to promulgate the necessary orders and rules to carry out the provisions of this section.

Mr. STONE. I inquire where that amendment is to come in? The VICE PRESIDENT. As section 660, at the end of the free list.

Mr. KENYON. Mr. President, I know it is futile to discuss the amendment, and I am not going to do so. As we are now legislating under a secret caucus system, there is but little use in any discussion, and I will merely ask for a vote. I ask for the yeas and nays on the amendment.

The year and nays were ordered, and the Secretary called the

name of Mr. ASHURST.

Mr. BRISTOW. Mr. President, I should like before the vote is taken to ask the Senator from Iowa to explain briefly, at least, the full effect of his amendment.

The VICE PRESIDENT. The Chair has no power to stop

a roll call.

Mr. BRISTOW. But I was on my feet addressing the Chair at the time the roll call was commenced.

Mr. CLARK of Wyoming. I do not think any response has

been made.

The VICE PRESIDENT. The Secretary informs the Chair that there has been no response. So the roll call will be stonned.

Mr. TOWNSEND. I suggest the absence of a quorum.

The VICE PRESIDENT. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators

answered to their names:

Page
Penrose
Perkins
Pittman
Poindexter
Pomerene
Ransdell
Reed Brandegee Bristow Jones Kenyon Kern La Follette Bryan Catron Stone Sutherland Thomas Thompson Tillman La Follette
Lane
Lea
Lewis
Lippitt
Lodge
McCumber
Martin, Va.
Martine, N. J. Catron Chamberlain Chilton Clapp Clark, Wyo. Crawford Townsend Vardaman Walsh Reed Robinson Cummins Shafroth Williams Fletcher

Mr. McCUMBER. I desire to announce the necessary absence of my colleague [Mr. GRONNA]. He is paired with the Senator from Illinois [Mr. Lewis].

The VICE PRESIDENT. Sixty-four Senators have answered

to the roll call. There is a quorum present.

Mr. SIMMONS. When the Senator from Iowa originally offered this amendment, probably not exactly in its present form but in substance the same as the amendment he now offers, I understood that it would be referred to the committee and that we would give consideration to it. I ask now if the Senator is not willing that it should take that course?

Mr. KENYON. Mr. President, I introduced a similar amendment, perhaps not precisely the same in phraseology, six weeks ago; so, of course, there has been ample time for its considera-

tion by the committee.

Mr. SIMMONS. I will state to the Senator from Iowa that since then there has been no meeting whatever of the committee. It was our purpose to go on with the bill until it was about finished, and then to have a meeting of the committee for the purpose of taking up and considering all the matters we had passed over, this being one of them. I will say to the Senator that the subcommittees are going to begin to meet to-night.

Mr. WILLIAMS. That can not be done.

Mr. KENYON. I have not been able to hear all the Senator said.

Mr. SIMMONS. There is so much confusion that I can hardly hear what is being said.

Mr. JAMES. I ask for order, Mr. President. The VICE PRESIDENT. Senators will be seated.

Mr. KENYON. This amendment being in line with the Democratic platform, I assumed that it would be adopted without much discussion.

Mr. SIMMONS. I simply wished to ask the Senator if he was willing that the matter should take the course that other new amendments have taken in this bill, and go to the committee?

Mr. KENYON. Of course this is not a new amendment. It was introduced six weeks ago.

Mr. SIMMONS. There has been no meeting of the committee

since the amendment was offered, as I explained to the Senator.

Mr. KENYON. I asked for a vote on it before, and I under-

stood the Secretary had commenced to call the roll.

Mr. PENROSE. Mr. President, will the Senator permit me to

make a query?
Mr. KENYON.

Mr. KENYON. Certainly. Mr. PENROSE. I expect to vote for this amendment, but I should like to ask the Senator from Iowa just how it would work out. Suppose a certain concern was declared a trust, but

a similar product was made by a large number of other concerns in the country, where would you draw the line?

Mr. KENYON. I have not covered the trust proposition. I have covered only cases falling under the second section of the act, where there is a monopoly, so decreed by a Federal court. I have not attempted to cover the trust question.

Mr. BORAH. Mr. President, I understood the roll call had begun. Is that true?

The VICE PRESIDENT. It is not; because there had been

no answer to the roll call.

Mr. SIMMONS. Mr. President, I move as a substitute for the motion of the Senator from Iowa that the amendment be referred to the Finance Committee.

Mr. LODGE. Upon that I ask for the yeas and nays.

Mr. McCUMBER. Mr. President, I believe that opens up the subject. I therefore should like to have a little explanation from the Senator from Iowa as to the effect and operation of the amendment which he offers.

I will put this case: Suppose there is a monopoly that controls a large percentage of a product, enough of it so that it is able to control prices, and yet other smaller concerns are manufacturing the product, would not the operation of this amendment place the product of the trust or combination or monopoly as well as the product of those who were not connected with the monopoly upon the free list?

Mr. KENYON. Undoubtedly; and of course that might work some hardship to the small manufacturer.

Mr. McCUMBER. It might work some hardship on the smaller concerns.

Mr. KENYON. I have provided in this amendment that where a court has decreed something to be in the control of a monopoly the article shall then be placed on the free list. Of course it is true, as the Senator suggests, that there may be some small concerns which would be injured by that course.

Mr. McCUMBER. Then here is another case which might

not come under the classification of a monopoly under the anti-

trust law, but I will present the case to the Senator. Suppose there is a patented article that is manufactured by but one firm or one individual under a patent and under a protection given by the laws of the United States to the patentee or his assignee, would not that product also come under the provision of the Senator's amendment?

Mr. KENYON. No; not at all; because a court could not properly decree that to be a monopoly in violation of the Sher-

Mr. STONE obtained the floor.

Mr. SUTHERLAND, Mr. President—
The VICE PRESIDENT. Does the Senator from Missouri The VICE PRESIDENT. Do yield to the Senator from Utah?

I will yield if the Senator wishes me to do so. Mr. SUTHERLAND. I simply wanted to ask the Senator from Iowa a question. I will postpone it until the Senator is

Mr. STONE. I wish to say that so far, in the consideration of the schedules, when Senators on the other side or on this side have asked that a paragraph should be passed over, or that for reasons stated it should be further considered by the committee, those who were in charge of the conduct of the bill have not objected. Now an amendment has been proposed. It seems to me some Senators are inclined to change the rule that has heretofore obtained during the consideration of this measure. I am of the opinion that some of them think perhaps they see a chance here of some political advantage-a chance to make it a

sort of political question.

So far as I am concerned, Mr. President, I am ready to vote on the amendment now. I am not one of those who get fright-ened and run away because they hear a little noise. I am ready to go on now, speaking purely from the individual point of view. But I do say that when the chairman of the Finance Committee, who has been exceedingly courteous and obliging, asks that this amendment should go over for the further consideration of the committee, it is a rather ungracious thing in itself for any Senator to object to it. I think if he desires it to go over it should go over, just as requests made this morning several times by Senators on the other side were immediately acceded to. Just why a different rule of procedure should be insisted upon now I do not know, and it strikes me with dis-

Mr. KENYON. Mr. President, I am not going to ask for anything out of the regular order. If the Senator asks that the

amendment go over, I shall not object.

Mr. STONE. No; personally, I do not care whether it goes over or not. I stand ready to vote upon it. But what I do say is that since the chairman of the committee has asked that it may go over for further consideration by the committee itself. I do not believe any Senator on the other side should protest against it or object to it.

Mr. KENYON. As far as I am concerned, I do not object

to its going over.

The VICE PRESIDENT. Is there objection to the reference

of the amendment to the committee?

Mr. SUTHERLAND. Mr. President, before the matter goes over I should like to ask the Senator from Iowa a question, so that I may understand his amendment.

Is it the understanding of the Senator from Iowa that if this amendment should be adopted, and it were found by a court that some concern monopolized the trade in a given article as between two States, that would automatically put the article upon the free list?

Mr. KENYON. I have left that absolutely where the court determines it. That is all up to the court in a suit under the Sherman Antitrust Act. I limit it to that because I have real-

ized all these difficulties that would otherwise arise.

Mr. SUTHERLAND. I consider the matter a somewhat grave one, and I desire to understand it if I can. The language of the Sherman antitrust law, with reference to this particular subject, is not fresh in my mind; but I have an impression that the act would be violated if the control of a particular article were monopolized as between only two States, and it would not be necessary that it should be monopolized in all the States.

Mr. KENYON. I can not agree with the Senator at all as to that. To monopolize, according to the definition given in the Century Dictionary, is to create a monopoly of an article, to have an exclusive right of trading in it; as, to monopolize all the corn in a district. A monopoly in the traffic between two States would not, in my judgment, be such a monopoly as would be a violation against which a court would enter a

Mr. SUTHERLAND. It would be sufficient to violate the first section of the act if there were a restraint of trade between two States.

Mr. KENYON. This amendment does not touch the first section of the act—only the second section of the act.
Mr. SUTHERLAND. I know it does not.

Mr. WALSH. Mr. President, I am very much interested in the colloquy occurring between the Senators, but I am unable to hear it

The VICE PRESIDENT rapped with his gavel.

Mr. SHIVELY. Mr. President, will the Senator from Utah yield to me a moment?

Mr. SUTHERLAND. Certainly.

Mr. SHIVELY. The amendment submitted by the junior Senator from Iowa contemplates placing an article on the free list after there has been a judicial determination that it has been the subject of control by a monopoly. Does not that put the article on the free list just at the time that it is assumed the court has dissolved the monopoly and restored competition?

Mr. KENYON. There are instances where the court has not dissolved the monopoly. If this matter is to be discussed, I shall be glad to go into the discussion. If we are to have a vote,

or if it is to go over, there is no use in discussing it.

Mr. SIMMONS. Mr. President—

Mr. SUTHERLAND. Mr. President, I thought I had the floor.

Mr. SIMMONS. I think the Senator from Iowa [Mr. KEN-YON | has the floor.

Mr. SUTHERLAND. No; the Senator from North Carolina is mistaken

Mr. KENYON. Yes; he is mistaken. Mr. SIMMONS. I may be. Then I Mr. SIMMONS. I may be. Then I ask, if I may interrupt the Senator from Utah, if he has the floor?

Mr. SUTHERLAND. I yield to the Senator.

Mr. SIMMONS. I was going to suggest that as the matter has gone over

Mr. SUTHERLAND. Mr. President, the matter has not gone

Mr. SIMMONS. I thought there was consent that it should go over.

Mr. SUTHERLAND. The request is pending.

Mr. SIMMONS. Very well. If the matter has not gone over, shall not make the observations I intended to make.

Mr. SUTHERLAND. Mr. President, I wish to make a very brief observation about this matter before it is acted upon,

either by way of sending it over or voting upon it.

If I understand the amendment, and as I understand it at present, I should not feel justified in voting for it. If I understand the effect of the amendment, it would be to punish the innocent producers of a given article in common with those who are guilty. If the court determines that a particular article is under the control of a monopoly, then it goes automatically upon the free list and protection is denied to those who are producing the same article, however innocent they may be of sharing in the monopoly.

Mr. BORAH. Mr. President—
The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Idaho?

Mr. SUTHERLAND. I do.

Mr. BORAH. If there is a monopoly of an article, it involves the power to fix prices. Therefore the independent producer has not very much opportunity in the field, anyway. seems doubtful if this amendment will be effective, yet I do not see that the amendment will hurt the independent who is already under the surveillance of the monopoly.

Mr. SUTHERLAND. The decision of a court in a civil proceeding that there is a monopoly would carry with it an injunction against the further maintenance of the monopoly and put an end to it. The effect of this amendment would be to punish persons in no way responsible for the wrong after the monopoly had been ended; at least it is presumed that it would be ended by the decision of the court restraining its further operation.

But however that may be, the second objection which it occurs to me to make to this suggestion is that in addition to imposing this as a punishment upon those who are guilty of creating a monopoly the Government is punishing itself by depriving itself of revenue which may amount to a very considerable sum. Why should the Government of the United States deprive itself of perhaps millions of dollars of revenue as a punishment to persons who are engaged in monopolizing trade? Why not punish the persons in a more direct way by imprisoning them or by large fines, which would add to instead of taking from the Treasury?

It does not seem to me it is a wise thing for the Government of the United States deliberately to deprive itself of a large amount of revenue as a part of the punishment of a criminal offender.

Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Kansas?

Mr. SUTHERLAND. I do.

Mr. BRISTOW. The Senator from Utah suggested that when the court found a monopoly to exist it dissolve it, and that ended it. When was a monopoly ended in that way, and what was it?

Mr. SUTHERLAND. I do not at the moment recall any case; but certainly the court has the power to issue an injunction in

such a case

Mr. BRISTOW. The Standard Oil Co. and the American Tobacco Co. and the Aluminum Co. of America have been pronounced monopolies. They run on just the same, however, and this bill protects the product of every one of those concerns except the Standard Oil Co.

Mr. President Mr. REED.

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Missouri?

Mr. SUTHERLAND. I do,

Mr. REED. I am thoroughly in sympathy with choking a monopoly to death by any possible means; but I wish to ask the Senator from Utah just what would have been the effect, in his opinion, upon the revenues of the Government if at the time the Tobacco Trust was declared to be a trust we had immediately permitted all tobacco to come in free? How much would it have cost the Government, in that event, to have imposed that particular punishment upon that trust?

Mr. SUTHERLAND. I do not remember the figures involved.

Mr. REED. A very large sum.
Mr. SUTHERLAND. It would have been a very large sum.

Mr. SMITH of Georgia. Twenty-five million dollars. Mr. REED. Twenty-five million dollars, I am informed.

Mr. SMITH of Georgia. In the same connection, I should like to ask the Senator what would become of our own people, producing tobacco here in this country, with an internal-revenue tax on our home tobacco and \$25,000,000 of revenue thrown away on our foreign tobacco?

Mr. BRISTOW. Mr. President, the Senator from Georgia suggested that if the amendment offered by the Senator from Iowa had prevailed we would have lost \$25,000,000 because of the tariff duties imposed on tobacco. Of course, we would not have lost the internal-revenue tax on tobacco. Now, why should not all the revenue be collected by an internal-revenue tax on tobacco instead of having a protective-tariff duty to bring us \$25,000,000? Is tobacco entitled to any more consideration than any other agricultural product? The Senator from Georgia is afraid that we will lose revenue because of the removal of the protective duty on tobacco; yet this bill takes it off the other farm products and puts them on the free list. Why should tobacco be treated with more consideration than other farm products

Mr. SMITH of Georgia. If the Senator will allow me, I only threw out the suggestion that if with the decree rendered against the tobacco company at once all tobacco imported into the United States had gone on the free list we would have lost \$25,000,000 from import cuties, and we would have left at the same time our internal-revenue tax upon our domestic products. So we would have had a tax upon our domestic product, while our markets would have been open to tobacco from the world

If as a matter of justice to our domestic product of tobacco, we had followed with a removal of the internal-revenue tax on tobacco, how much more that would have added to the loss of . our revenue I do not know.

I was simply calling attention to the subject that our minds might view it broadly and see what we would do.

Mr. BRISTOW. May I inquire of the Senator could not a provision be made whereby the imported tobacco would bear the

same consumption tax as the domestic product?

Mr. SMITH of Georgia. I was simply calling attention to the situation which this amendment would produce and making an inquiry, and I suggested that there was room for reflection before we voted upon it.

Mr. BRISTOW. The internal-revenue tax on tobacco is a consumption tax, and it can be imposed on foreign tobacco as

well as on domestic tobacco.

Mr. O'GORMAN. Mr. President, I understood a request was made to have this amendment referred to the committee. have heard some intimation that there are Senators present who are prepared to discuss the merits. For myself I consider this proposal so important that it should at least in the first instance have the advantage of consideration by the Finance Committee, and if it be necessary to repeat the request I ask unanimous consent that the amendment go to the Finance Committee for consideration and report.

Mr. JONES. I wish to ask the Senator a question. I merely wish to ask him if the Democratic caucus in considering the

important propositions of the bill considered the advisability of putting some provision of this character in it?

Mr O'GORMAN. I can not definitely answer the Senator's question, but I simply desire to repeat that for myself this is a very important question and no attempt should be made to dispose of it without giving the committee an opportunity to consider and report upon it.

Mr. GALLINGER obtained the floor.

Mr. SUTHERLAND. Will the Senator from New Hampshire allow me?

Mr. GALLINGER. I will yield to the Senator. Mr. SUTHERLAND. I wish to supplement what I said on this subject by calling attention to the language of the Sherman Antitrust Act with reference to monopolizing trade. The second section provides that-

Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons to monopolize, any part of the trade or commerce among the several States or with foreign nations shall be deemed guilty of a misdemeanor.

And so on.

So, as I understand it, if the monopolization has extended, for example, to only one-tenth of the trade, the other nine-tenths of the trade are to be penalized by this provision. If it is monopolized between two or three of the States of the Union, that is a monopolization among the several States-it does not have to be among all the States in the Union-and the producers in all the remaining States are to be penalized by a provision of this kind on account of acts affecting only two or three States.

Mr. GALLINGER. Mr. President, there is one point which troubles me and I should like to ask the Senator from Iowa a question. The general purpose of the amendment quite appeals to me. Let me ask the Senator this question: Suppose the court declares that a certain concern is engaged in producing goods which is a monopoly or combination under the law, the article so produced would, I suppose, automatically or speedily go on the free list. Suppose that the combination is dissolved under the findings of the court, and there is not any further monopoly or combination, what, then, about the duty on the goods produced by that former combination? How would we arrange that matter?

Mr. KENYON. If the combination had been built up by the aid of tariff duties and then had been dissolved, I think we need not be overcareful in considering the interests of those

who built up the monopoly.

Mr. GALLINGER. The difficulty in my mind is this: Where the monopoly is found guilty not only the product of that monopoly but the product of all independent corporations would go on the free list and they would all in a sense be punished. If the monopoly was dissolved, would you keep those products on the free list until we legislated to the contrary?

Mr. KENYON. I realize that this argument can be properly made; some plan might be devised so that tariff duties would be put back where a competition actually came to exist, but I had not believed that it would work a particular hardship to anyone who did not deserve to suffer some hardship.

Mr. GALLINGER. There may be other objections, but I will say that that is the most serious point which has occurred to me in reference to the proposed amendment.

Mr. KENYON. I think it is a matter of serious consideration.

Mr. CUMMINS.

CUMMINS. Mr. President—
VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Iowa?

Mr. GALLINGER. I am through, Mr. President.

Mr. CUMMINS. Mr. President, the principle sought to be enforced in this amendment I think is sound, and I expect to vote for it. I think it is only fair to myself to say that I believe there is another way of reaching the result that would be more effective. I say it because four years ago I introduced an amendment to the tariff bill attempting to reach the same conclusion. It was voted down at that time. I reintroduced it at this session and it is now upon the table as a proposed amendment to this bill.

The plan that I thought was most effective was a judicial proceeding based upon the allegation that substantial competition had ceased to exist in the United States with regard to a certain article or commodity or a series of articles or commodities, and a trial upon that issue and a decree certified to the Secretary of the Treasury upon which the article or commodity or series of articles or commodities would be placed upon the free list. Then, if thereafter conditions should change and competition, which is the real thing sought to be secured or maintained, should appear, by a similar process the decree of the court would be modified or set aside and the article again

put upon the dutiable list in accordance with the will of

I believe that would be a more practicable method of reaching the result desired by my colleague than the one proposed here, although I regard the principle as so important that I would have no hesitation in voting for the amendment as it now is.

think, however, there has been a little misapprehension among some of my brother Senators here with regard to the scope of this amendment. I do not think it is confined to the second section of the antitrust law. I think a decree under the first section of the antitrust law would call into operation the consequences of the amendment. It provides:

That any article or commodity upon which a duty is levied under this act is under the control of a monopoly or combination.

A combination to restrain trade or commerce among the States is one of the things prohibited by the first section of the act, whether it has reached the full extent of a monopoly or not.

But if this matter does go over I want to suggest to my colleague one thought. Suppose in proceeding under the antitrust law a decree is rendered against the defendant, and then we have some court that will have the courage to carry out the real design of the law and appoint a receiver and sell the property of the offending combination or corporation, selling it to those who will buy and who will continue, of course in disintegrated parts, the same business. That is the procedure which really ought to be adopted. We have been altogether too careful of these combinations and monopolies. We have been too tender of their supposed right. I think in nearly all of them there ought to have been a receiver appointed and the property ought to have been sold at a receiver's sale, so that whoever wanted to buy could buy and continue the business. In that event, of course-assuming that the property was sold to different people-competition would at once begin, and a punishment such as would be inflicted here would fall not upon the guilty but upon those who might buy.

very much hope that it will be the future of the antitrust law that we shall add to it a real penal provision, a provision for imprisoning those who are guilty of violating it, and then proceed to sell the property that is condemned by the law, so that those who have committed the crime can have no benefit arising from their guilty acts. Then we will have, I think, the real object of the antitrust law fulfilled, namely, the institution of competition in the stead of monopoly.

Mr. BRISTOW. Mr. President, I should like to inquire of the Senator from Iowa how we are to get any practical and effective results from the dissolving of these monopolies. Supreme Court declared that the Tobacco Trust was a monopoly and that the Standard Oil Trust was a monopoly, and then it also declared that the merger of the Union Pacific and the Southern Pacific Railroad was in violation of the Sherman antitrust law; but as soon as the decisions were rendered the Department of Justice conferred with the parties affected, who sought to find out how they could avoid the effect of the decree and carry on the monopoly the same as they did before the

Mr. CUMMINS. I am not now defending the Department of Justice in trying to devise some plan of disintegration and reconstruction. I can not be drawn into any kind of defense of what has taken place. All that I say is that in the tobacco decree the Circuit Court of Appeals in the State of New York held that the plan did institute competition and did disintegrate and destroy monopoly. I do not concur in that opinion. I do not think it has done the work that it ought to have done.

My only suggestion was that inasmuch as the purpose of the antitrust law is to maintain competition in the business of the United States we ought to do everything we can to further that purpose, and if a monopoly is established and decreed, then it ought to be so dissolved as to bring about a condition of competition. I have enough faith in the Government of my country to believe that it will profit by the mistakes that have occurred in the past, and that the law will be administered some time in the interest of the American people and to accomplish the real purpose of those who frame the law.

Mr. BRISTOW. Mr. President

Mr. CUMMINS. I yield to the Senator.
Mr. BRISTOW. If the Senator will yield again, I know the Senator's views upon this question and I know how strong he feels upon it. It may be that at some time when the courts render a decision declaring the Sherman antitrust law violated the decree of the court and the law may be permitted to take its course without the Department of Justice conniving with those who have been found guilty in undertaking to perpetuate the condition that existed before the decision under some other form.

Mr. LEWIS. Mr. President-

Mr. BRISTOW. In the case of the Tobacco Trust and the Standard Oil Trust and the dissolution of the Union Pacific and the Southern Pacific merger it seems to me that that has been the result. The control of traffic is the same and the control of the business is the same in every one of these cases, so far as the effect upon the public is concerned, as it was before the decision was rendered.

Mr. LEWIS. Will the Senator allow me?

Mr. CUMMINS. I yield to the Senator from Illinois. Mr. LEWIS. I thank the Senator from Iowa for yielding. May I take advantage of his courtesy to ask the Senator from Kansas who has just spoken what evidence does the distinguished Senator have upon which he can charge the Department of Justice with having connived with those violating railroads in perpetrating any act that neutralized the decree of the court and perpetuated a monopoly? From what source does my distinguished friend get his information? From the newspapers?

Mr. BRISTOW. Yes; and the ultimate decision as to what these corporations could do in the disposition of the stock. The Senator from Illinois knows that the financial interests that controlled those two railroads before control them now; that the dissolution is a mere paper dissolution, and that as far as the effect on property owned is concerned it has been of little

consequence

Mr. LEWIS. I concede the fact very largely as the distinguished Senator says, in so far as the decision is concerned. I admit that when the decisions were rendered their final effect was a nullity, in so far as any result was secured by the American people. I regret to say the decisions perpetrated offenses on the people, cast upon the courts reflections of con-

tempt, and brought the law to a plane of derision.

Yet I ask my distinguished friend if, admitting that fact, he feels justified in his high position to charge the present Attorney General and the Department of Justice with having "conwith those who had violated the law in perpetrating that violation and continuing it? I ask him has he had the opportunity to confer with the Attorney General to get the facts, and does he not know that the President of the United States has given his approval to whatever disposition of the subject was finally had and could only have been approved because justice could have been arrived at under the circumstances? Has the Senator conferred with the Attorney General and obtained the real information apart from current rumors?

Mr. BRISTOW. I have not conferred with the Attorney General. I have only taken my information from what I have read as to the final agreement that was ultimately approved and which I think perpetuated, in fact, the condition which existed before the decision was rendered. The conditions now are the same so far as commerce goes as they were before the decision in the Standard Oil case, and the Tobacco case has not been materially changed, and the same is true as to the Merger

Mr. LEWIS. Then, as I understand the distinguished Sena-tor, he was giving his conclusion as to what he feels was the effect of what has transpired and not assuming to give information on the facts?

Mr. BRISTOW. I learn from the public press that the Attorney General conferred very extensively with the parties in interest in the Merger case.

Mr. LEWIS. But the Senator failed to seek information from

the only source he should have gone to.

Mr. BRISTOW. There was no need of such consultation. results of these conferences were published and the published accounts have never been questioned. A final agreement was reached whereby the stock should be controlled by certain parties instead of being put upon the market and sold as the decree of the court provided.

Mr. LEWIS. May I ask, Does the Senator charge the present Department of Justice with conniving-conniving at a wrong

upon the people perpetrated by the courts?

Mr. CUMMINS. Mr. President, may I suggest that it is rather fruitless now to enter upon an argument as to the merits of

the Southern Pacific and Union Pacific case?

Mr. LEWIS. I rather think I am violating the courtesy of the distinguished Senator from Iowa, who yielded to the interruption, when my distinguished friend from Kansas and myself enter upon a colloquy at this particular time. Later I shall address the Senate on the subject. I must have a reply from the Senator, however, as to his meaning.

Mr. CUMMINS. I suggest as there is no duty on railroads

the amendment would not apply to a case like the Union Pacific

Railroad.

Mr. BRISTOW. If the Senator will permit me, I suppose that instead of using the word "connive" I had better have used another word, because the general impression which follows that language would be that designedly the Attorney General sought to aid these men to continue to violate the law. I would not charge the Attorney General with that, but I do think as a result of his conferences and as a result of the agreement that the public has been robbed of any benefit that might have come to it from such decision. Nothing has been accomplished by that long legal controversy that attracted so much attention.

Mr. LEWIS. I think we now understand the Senator from

Mr. CUMMINS. Mr. President, I have suggested the scope of the amendment that I proposed four years ago and that is before the Senate again, but I desire before I take my seat to congratulate my colleague upon the soundness of the principle that he has embodied in his amendment. I congratulate him and the country also because he has succeeded in awakening the interest and attention of Senators to the very important and vital subject, and if from this effort to relieve the country from the oppression of monopolies their power is curtailed we are all to be congratulated. Inasmuch as my colleague has asked that the matter go over or be referred to the Committee on Finance, I hope that his request will be accepted by Senators and that when the Finance Committee shall have considered the subject carefully and brought in whatever provisions it may think will meet the condition, we will then have an opportunity to discuss the whole matter comprehensively as well as analytically. It is one that well deserves the most serious consideration of the Senate.

Mr. WALSH. Mr. President, as I understand the parliamentary situation at the present time, this matter is before the Senate on a motion to refer the amendment of the Senator from Iowa to the Finance Committee.

Mr. SIMMONS. Will the Senator permit me? Mr. WALSH. Certainly.

Mr. SIMMONS. That amendment was before the Senate, and I moved to refer it to the Finance Committee.

Mr. LODGE. The amendment has gone over.

Mr. SIMMONS. The Senator from Iowa, I understood, announced that he was content that it should go to the Finance Committee, and-

Mr. KENYON. I did. Mr. SIMMONS. And in substance withdrew his amendment for the time being

Mr. LODGE. The amendment has gone over by unanimous consent, I understand.

Mr. SIMMONS. It has gone over, as I understand, at the request of the Senator from Iowa, and I hope we may

Mr. KENYON. It is my understanding that it is to be referred to the committee. I offer no objection to that course.

Mr. STONE. Let us go on with the bill.

The VICE PRESIDENT. The Chair for half an hour has been anxious to inquire whether anybody objected to the amendment going to the Finance Committee, and he is going to ask that question now. The Chair hears no objection. The order for the yeas and nays will be vacated, and the amendment will be referred to the Finance Committee.

Mr. SIMMONS. As we have finished the free list except those paragraphs which have been passed over, I ask that we return to Schedule M-papers and books-at the point where

we left off when we took up the free list.

Mr. LODGE. I think the two first paragraphs of the paper schedule have been read. Am I right?

Mr. SIMMONS. Yes; the Senator is right. Mr. LODGE. We stopped at paragraph 330, and I made the request that paragraph 330 be passed over. I understand that is the situation, and that we went no further in the paper schedule at that time.

Mr. SIMMONS. I think the Senator is correct about that. The PRESIDING OFFICER (Mr. Walsh in the chair). the Senator from Massachusetts will pardon the Chair, the Secretary informs him that paragraph 330 was read; and after it was read and the committee amendment agreed to, it was then passed over for further consideration.

Mr. LODGE. That is my memory of just what happened. Mr. SIMMONS. The Senator is correct about that. Does the Senator desire to take up that paragraph now?

Mr. LODGE. I am ready to take it up if the Senator wishes.

I understand we are at the paper schedule.

Mr. SIMMONS. Very well.

Mr. LODGE. Mr. President, paragraph 330 must really be taken in conjunction with paragraph 651 of the free list, which places paper under 21 cents a pound upon the free list and

imposes certain countervailing conditions. This does the same in regard to the paper over 21 cents, which is to bear 12 per cent ad valorem, and it also imposes countervailing conditions. Those additional duties or countervailing duties are based upon the following conditions in the foreign country: "The imposition of any export duty, export license fee, or other charge of any kind whatsoever in the form of an additional charge or license fee or otherwise." Those are the conditions upon which the countervailing duty is to be imposed, and they are sub-stantially the same in the free list, except that there the countervailing duty is to rest only upon chemical pulp, about which I shall say something later.

I wish first to take up the inadequacy of the statement of conditions on which the countervailing duty in paragraph 330 shall come into operation. In the case where the export of wood or wood pulp is forbidden from the Province or dependency-that is, from Canada, for it all relates to Canada-there is no opportunity to impose the countervailing duty; no provision is made for that case of prohibition arising; and yet that condition is much more hostile and much worse for our trade than the imposition of an export duty or of a license fee.

As a matter of fact, in Canada they are prohibiting the export of wood or wood pulp. The cases in which it is obtained are only those in which an American company has erected a mill in Canada-I do not mean its only mill, but a mill in

Subsequent to the passing of the reciprocity act the Province of New Brunswick also prohibited the exportation of wood from its Crown lands.

The Treasury Department, in ruling on the reciprocity act in Treasury Department Circular No. 48, Division of Customs, dated July 26, 1911, allowed paper from freehold lands to come in free, but subjected paper made from wood from Crown lands in these Provinces to the duties provided for in the Payne Tariff Act.

By an order in council dated July 12, 1912, the Province of British Columbia removed the restrictions from certain specified Crown lands west of the Cascade Range, and the Treasury Department, by order of August 12, 1912, ruled that paper made from wood cut on these specified tracts was entitled to free entry. It has since been ascertained that this land was leased to the Powell River Paper Co., a company with an output of 200 tons per day, the only large paper company in British Columbia and the only manufacturer of news print paper. This company ships neither wood nor pulp to the United States

Immediately agitation was started by the large paper manufacturers in the other Provinces, and on December 31, 1912, the Province of Quebec, by lieutenant governor in council, passed the following order:

EXECUTIVE COUNCIL CHAMBER, Quebec, 31st December, 1912.

Quebec, 31st December, 1912.

Present: The lieutenant governor in council.

It is ordered that the obligation to manufacture in Canada any timber cut on Crown lands, as enacted by article 13 of woods and forests regulations, shall not apply to the timber cut from the 1st day of May, 1911, and which will be cut hereafter on the timber limits hereinafter described, and that all pulp wood cut from the 1st day of May, 1911, or which will be cut hereafter on the said timber limits, or the paper, paper board, or wood pulp manufactured from the wood cut on such timber limits, may be exported free of any export duty, or any other charge of any kind whatsoever, or any prohibition or restriction in anywise relating to such exportation.

Lake Kenogami (Plessis), No. 21; Mesy South, No. 26; Riviere-aux-Ecorces, No. 20; Mesy, No. 25; River Pikauba, No. 16; Township Dequen, No. 149; Caron, No. 29; Riviere-aux-Ecorces west; Riviere-aux-Ecorces east.

Dequen, No. 149; Caron, No. 29; Riviere-aux-Beorees west; aux-Ecorees east.

River St. Maurice, No. 6 west; River St. Maurice, No. 10 west; River St. Maurice, No. 11 west; River St. Maurice, No. 12 west; Riviere-au-Rat. No. 1 south; River Wesseneau. A, B, C, D.

St. Maurice west, No. 13; St. Maurice west, No. 14; Trench west, No. 1; Croche west, No. 4; Arriere Croche, B.

Lake Clair, No. 2 west; Lake Clair, No. 2 east; Mattawan, No. 2 south. No. 5 south. No. 5 rear south, No. 6 south, No. 6 rear south, No. 7 south, No. 5 north, No. 7 north; Croche, No. 1 east. No. 3 east, No. 3 rear east, No. 1 west, No. 2 west, No. 3 west, No. 5 west; Bostonnais, No. 1 north; Bostonnais, No. 2 north, half west.

**Clerk Executive Council ad Interim.**

The lands exempt from prohibition as to export in this order are said by the Canadian papers to belong to four companies. It is certain that a large part of the land belongs to such companies.

The first paragraph of the order exempts lands in the Lake Kenogami region which are leased by the Price-Porritt Co. This company has paper mills at Jonquiere, with a capacity of 236 tons news print per day.

The River St. Maurice district lands are leased to the Laurentide Co., with paper mills at Grand Mere, capacity 210 tons news print per day, and to the Belgo Canadian Pulp & Paper Co., with a capacity of 145 tons per day.

At the present time I do not know who leases the Lake Clair district, but the Canadian papers state that the Wayagamack Paper Co. is freed of restrictions by the order, and it is prob-

able that this region is leased by them.

These companies manufacture their own paper, and do not ship wood or pulp board to the United States. Porritt Lumber Co. ships some pulp to the United States, but this is shipped from Rimouski, where they have a pulp and no paper mill, and the wood does not come from the exempted lands.)

The Montreal Daily Star, January 3, 1913, commenting on the action of the Quebec Government, says of these companies: "These are the only four in the Province which draw their material from the Crown lands." Whether this is true I do not know, but the figures cited above show that three of these four companies have a capacity of 591 tons of news print per day (the Wayagamack Co. is a new company, and its capacity is unknown to me at the present time), while all the other paper companies in Quebec, 15 in number, have a total capacity of only 369 tons, including in their output not only news but wrapping, manila, building, board, and book.

The purpose and effect of this order of the Quebec Government is thus characterized in the Quebec Chronicle of December

31, 1912:

By this it is thought that the limit holders will be enabled to get free entry for their paper, but will, it is understood, see that no wood is exported from their holdings, even though the restrictions are re-moved. It remains to be seen if the astute Uncle Sam is likely to be flimflammed by any such transparent device.

It is a matter of common knowledge in Canada that appeal is being made by Canadian paper manufacturers in Ontario and New Brunswick to the provincial Government, and that it is expected that these Provinces will follow the example of Quebec.

The orders of these two Provinces-British Columbia and Quebec—are clearly only a subterfuge; and are intended not to give free raw material to the United States, not to bring in one single foot of pulp wood or even one pound of wood pulp, but are intended simply to evade the United States customs and to compel citizens of the United States who desire to continue or engage in the business of the manufacture of paper to do so on the Canadian side of the line if they propose to look to Canada for their wood supply.

The Province of Quebec covers subtantially 340,000 square iles, which is apportioned as follows:

Square sapportioned as rollows.	are miles.
Owned by Province Crown lands in timber Owned by Province Crown lands burned, waste, and culled Private lands under seigniory Private lands under letters patent	200, 000 106, 000 16, 000 18, 000
Total	340,000

Of the 34.000 square miles of private land much is under cultivation, and only 8,000 square miles is in timber of all kinds.

It appears from these figures that the Province of Quebec has left but one twenty-fifth of her timber area open to the United States for the furnishing of raw material, and of that twentyfifth sales have been made within the last year as high as \$20 per acre, which is more than double the price for which lands have been selling upon the American side of the line, and the price makes it prohibitory as to a wood supply for American mills. From these free lands the Canadian manufacturer can export his paper into this country free, while the American manufacturer is compelled to pay duty for shipping his paper into the Canadian Provinces.

Previous to the year 1910 the Province of Quebec had leased many thousand square miles of Crown lands to owners of paper mills located in the United States. These leases contained certain restrictions and obligations, but in none of them was there any attempt to prohibit the exportation of pulp wood.

During the year 1910, however, an absolute prohibition was placed upon importations of wood cut from Crown lands.

Immediately after the passage of the Canadian reciprocity act New Brunswick, which had also leased to Americans Crown lands which the manufacturers desired for a supplemental wood supply, and in some cases had cut from them, passed a prohibition order which absolutely prohibited the importation of wood.

Mr. President, I think I have shown by what I have said what the attitude of Canada was at the time of the passage of the reciprocity act. I wish now to show the ground they are taking with reference to this bill.

The Saguenay Lumber Co., which, as I understand, is a Maine company, with headquarters at Portland, addressed the follow-

ing letter to the premier of the Province of Quebec, signed by Mr. Morton, its treasurer:

PORTLAND, ME., January 6, 1913.

The honorable PREMIER OF THE PROVINCE OF QUEBEC, Quebec City, Quebec.

Quebec City, Quebec.

Siz: Your letter of November 28 was duly received acknowledging ours of the 27th.

I am informed that under date of December 31, 1912, an order in council was passed removing all prohibition or restriction in anywise relating to the exportation of pulp wood, paper, paper board, or wood pulp from certain specified Crown land timber berths or licenses.

As our timber holdings in the Province or Quebec are all Crown lands, acquired and held, we believe under precisely the same conditions governing those cited in the order in council, above mentioned, we presume we are upon proper application entitled to enjoy the same exemption.

tion.

Will you kindiy advise us at once on this point? We desire the information for use, not only to our own advantage but also to the advantage of the provincial revenues.

Yours, very respectfully,

SAGUENAY LUMBER CO.,
Per C. W. MORTON, Treasurer.

Here is the reply from Mr. Gouin, who is the prime minister of the Province of Quebec:

Office of the Prime Minister, Province of Quebec, Quebec, January 21, 1913.

C. W. Morton, Esq., Treasurer Saguenay Lumber Co., Portland, Me.

Dear Sir: In reply to your letter of the 6th instant I must state that the order in council of December 31, 1912, to which you refer, has been adopted in favor of four companies which convert into paper, in the Province of Quebec, the timber they cut on Crown lands. As you are not in the same position, we can not make the same exception for your company. Yours, truly,

Then here is a telegram from the Riordon Paper Co., signed by their sales manager:

Riordon Paper Co. (Ltd.). Confirmation. We sent you a telegram this date per C. P. R. Telegraph Co., G. N. W. Telegraph Co., of which the following is a correct copy:

MONTREAL, February 3, 1913. ARTHUR C. HASTINGS, 50 Church Street, New York City:

We saw Hon. Jules Allard to-day, who stated any present or future manufacturer of paper in the Province be given equal privilege with four companies already given free wood, but not for pulp; declined free our wood for sulphite export, although Laurentide sulphite be free.

THE RIGHDON PULP & PAPER CO. (LITD.).
T. J. STEVENSON, Sales Manager.

There is the actual situation. The Canadians are prohibiting the export of either wood or pulp wood or wood pulp unless the American company has a mill on the Canadian side. That is a far severer and more discriminating burden than an export duty or a license fee, and I think that it ought to be met in some way by an amendment to the pending bill. That policy of prohibition has been begun in many of the Provinces, and it is being extended.

As to the countervailing duty proposed in the free list, paragraph 651, the countervalling duty, if imposed, is to rest entirely upon chemical pulp. There is very little chemical pulp exported from Canada. Chemical pulp costs more than the paper which is made free. Print paper is exempted from duty up to 2½ cents a pound, and chemical pulp costs in the neighborhood of 3 cents a pound. As I have said, it costs more than the paper that you make free of duty.

When you impose a countervailing duty on chemical pulp alone, you impose a countervailing duty that is of no value whatever; it amounts to nothing. The Canadian Provinces can disregard it; they can exclude us; they can put on bounty fees; they can put on export fees; they can do anything they please and all our retaliation in paragraph 651 is confined, as I read it, to chemical pulp, which amounts, as I have said, to absolutely nothing. It is brutum fulmen; it would have no result whatsoever.

If we are going to impose a countervailing duty, as I think we should-I think the policy outlined in paragraph 330 and in paragraph 651 is a sound policy—we should make it so that it will work. If the intention of the committee framing the bill and the intention of the Congress is to give these great advantages to one of Canada's chief products only on condition that she treats us in the same way, surely we ought to make our countervailing duties effective.

Mr. WILLIAMS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Mississippi?

Mr. LODGE. Certainly.

Mr. WILLIAMS. I suppose, of course, the Senator has read this paragraph very carefully; but he seems to have neglected to notice a part of the first clause of the proviso.

Mr. LODGE. To which paragraph is the Senator referring?

Mr. WILLIAMS. Paragraph 651, which provides that-Mechanically ground wood pulp, chemical wood pulp, unbleached or bleached, and rag pulp-

Shall come in free.

Then follows the proviso:

Provided, That if any country, dependency, province, or other subdivision of government, shall impose an export duty or other export charge of any kind whatsoever, either directly or indirectly (whether in the form of additional charge, or license fee, or otherwise), upon printing paper, rag pulp, mechanically ground wood pulp, chemical wood pulp, or wood for use in the manufacture of wood pulp—

Then follows this provision-

the amount of such export duty or other export charge upon an equal amount of rag pulp, mechanically ground wood pulp, or chemical wood pulp, or upon an amount of wood for use in the manufacture of wood pulp necessary to manufacture such chemical wood pulp, or upon an amount of printing paper ordinarily manufactured from such wood pulp, shall be imposed as a duty—

Mr. LODGE. Shall be imposed as a duty on what?

Mr. WILLIAMS. I read:

Upon chemical wood pulp when imported directly or indirectly from such country, dependency, province, or other subdivision of government.

Mr. LODGE. That is precisely what I have said. The burden is imposed only upon chemical wood pulp.

Shall be imposed as a duty upon chemical wood pulp.

We do import very little chemical wood pulp from Canada and there is no probability that we ever shall.

Mr. WILLIAMS. The language of the House bill was "chemically ground wood pulp" and we have changed it to "chemical wood pulp."

Mr. LODGE. That does not make any difference; the word "chemical" is used. The case of prohibition is covered here, but not in paragraph 330; and prohibition certainly ought to be inserted in paragraph 330. Paragraph 651 provides that—

If any country, dependency, province, or other subdivision of government shall prohibit the exportation of printing paper, rag pulp, mechanically ground wood pulp, chemical wood pulp, or wood for use in the manufacture of wood pulp—

That includes everything-

there shall be imposed a duty of one-tenth of 1 cent per pound upon chemical wood pulp when imported directly or indirectly from such country, dependency, province, or other subdivision of government.

The countervailing duty is not imposed on all the articles, but only on one article, and that the one which Canada does not export and will not export; in other words, that provision is made perfectly useless by being limited to chemical wood pulp.

I have here a statement about the manufacture of bleached wood pulp. I do not desire to delay the Senate by reading the whole of it, but, as it is not very long, I will ask to have it I merely desire to call attention to the following printed.

A ground wood pulp mill having a capacity of 30 tons of pulp per day can be built, including cost of water power, for approximately \$150,000, while a bleached sulphite pulp mill of the same capacity will cost \$450,000.

That is chemical wood pulp.

The value of ground wood pulp f, o, b, the mill is approximately three-fourths of a cent per pound, while the value of bleached sulphite pulp f, o, b, the mill is 22 to 3 cents per pound.

The one is more expensive than the paper which you make free and the other is not more than a third as expensive.

I ask that the statement to which I have referred may be printed in the RECORD at this point.

The PRESIDING OFFICER. In the absence of objection,

permission is granted. The matter referred to is as follows:

STATEMENT IN REGARD TO THE MANUFACTURE OF BLEACHED SULPHITE

PULP.

In this Schedule M of the new tariff bill, relating to pulp, paper, and books, there seems to be a complete misunderstanding of the difference between mechanically ground wood pulp and fine chemical bleached sulphite pulp. This is probably due to the fact that the bleached sulphite pulp is a comparatively newcomer in the United States in the paper industry.

The first mill completed and now running was started in 1889, and owing to the newness of the art and the imperfection of the machinery used in the entire process, it was several years after that before these defects were remedied and the mill was running steadily and evenly, making this grade of pulp.

As is well known, in manufacturing ground wood pulp the mills are necessarily located where there is ample power and on rivers. The logs are run down the river and are taken into the mill by specially contrived machinery and brought to the saws, where they are cut into about 2-foot lengths, without further handling, and then barked. They then go by carriers to the grinders, which are simply revolving grindstones, against which this wood is held by hydraulic pressure and ground into pulp. It is then collected and splinters of wood separated from the pulp by machinery. The pulp is then ready for use in the manufacture of paper and is carried by pipes in a fluid state to paper engines, where it is used. The apparatus is very simple of construction, and the buildings, however well built, are generally only of one story, easily constructed and easily maintained.

A ground wood pulp mill having a capacity of 30 tons of pulp per day can be built, including cost of water power, for approximately

SIGORD—SENATE.

\$150,000, while a bleached sulphite pulp mill of the same capacity will cost \$450,000.

The value of ground wood pulp f. o. b. the mill is approximately three-fourths of a cent per pound, while the value of bleached sulphite pulp f. o. b. the mill is 22 to 3 cents per pound.

Into 4-foot lengths, piled, and seasoned for about six months. They are then taken by hand and carefully barked, removing not only the outside bark but the yellow skin next to the wood. They are then spilt and the knots are bored out of the wood. If there are any bad ends which have shrinkage of about 22 per cent is the measured cord. The wood is then taken by a carrier to the chippers. These cut the log into uneven chips. In order to remedy this and to have even material to cook, the chips are carried into a chip crusher, and after being crushed are elevated revolving screen with slots of a suitable size to allow wood the right size for cooking to drop through. The larger pieces of wood are thrown out of the end of the screen and go through what is called a rechipper. All these chips are then carried to the top of the digester building by a timb large and the state of the control of the top of the digester building by a timb large and the state of the control of the top of the digester building by a timb large and lined with cement, which cement is further protected by aciderated the state of the control of the control

It should also be borne in mind in comparing this process with the ground-wood process that in making bleached sulphite pulp there must be a large chemical apparatus; probably a comparatively small mill, say 25 to 30 tons capacity, would make more bisulphite liquor than all the chemical manufacturing establishments in the United States put together. To do this the apparatus must be of first-class construction. All pumps and pipe connections and coolers must be of bronze and lead. The water used must be cold, and mills go to large expense sinking artesian wells for the purpose of having cold water in summer. The apparatus must be kept in constant and perfect repair, as any leak makes sulphuric acid, which causes a loss and injury to the pulp.

as any leak makes sulphuric acid, which causes a loss and injury to the pulp.

Attention was called to the shrinkage of 22 per cent in the cleaning of the wood as additional cost in this process. It should also be stated that in bleaching the pulp and in the further handling of it after it is bleached, there is a loss of some 10 to 12 per cent, or in other words, out of 10 tons cooked there will be a shrinkage of 1 ton, which of course materially adds to the cost of the finished pulp.

In the making of this pulp, the waste from sawmills, viz, slabs, can be used and are used in large quantities. There are in the South to-day a great many sawmills which could convert their slabs into sulphite pulp. It costs more for labor to handle and clean them, but when prepared they are the best wood of the tree. The fiber is longer on the outside of the tree, and there is less incrustating matter around the fiber to dissolve out, as can readily be seen by looking at the crosscut of a spruce log.

the fiber to dissolve out, as can readily be seen by looking at the crosscut of a spruce log.

It will be noticed that in making bleached sulphite pulp, we do the equivalent, at least, of everything that is done in making good book papers, and as this pulp sells from 2\frac{3}{2} cents per pound to 3 cents per pound, it will be seen that none of it can be used in news print or any paper, except in the fine papers that are dutiable under the new tariff.

Bleached sulphite pulp must be of good quality or it is useless. It must be clean and white and have a good color and good felting quality or it can not be used in fine papers. It is not wanted in cheaper papers, as it has not the strength of unbleached fibers and costs more.

We claim for these reasons that we should be put into the same class with fine papers, and that it will work no hardship to any other branch of the paper or pulp industry, but enable American mills making fine papers to obtain pulp of domestic manufacture and not be wholly dependent on foreign mills.

MOUNT TOM SULPHITE PULP CO.,

MOUNT TOM SULPHITE PULP CO., THE RUSSELL CO., General Managers, By Chas. C. Springer, Vice President.

Mr. LODGE. Mr. President, it is perfectly clear to my mind that the committees of both Houses, in giving to Canada these great advantages, these great opportunities for trade, intended to put us on an equality. They have recognized the danger of prohibition in paragraph 651, but they have done nothing about paragraph 330, and paragraph 330 covers dutiable papers. In regard to such papers, they can impose any burden they please on wood to be used in the manufacture of paper, wood pulp, or pulp wood; they can impose any prohibition they please on every part of it, and there is no means of retaliation.

In paragraph 651 you mention particularly prohibition as one of the things to be specially encountered; and I think there certainly can be no greater obstacle to trade and nothing more unfair than to have the country to whose products we are opening our market escape prohibiting the export of articles we need when countervailing duties could be placed upon her if she imposed an export duty or demanded an export fee. On the other hand, it is futile to confine your retaliation in the freelist paragraph 651 to chemical wool pulp. You might just

as well not write the clause. I have called these facts to the attention of the committee; I

am not now contesting the low rate; I am not now contesting the action you have seen fit to take in placing print paper valued at less than 2½ cents a pound on the free list; but I think that you ought to carry out your own policy, which is clearly laid out in those paragraphs, in such a way as to be effective; in other words, paragraph 330 is ineffective because you omit prohibition, and paragraph 651 is ineffective because you confine your retaliation to chemical pulp.

It is inconceptable to me that any complition cheef attacks.

It is inconceivable to me that any committee should attempt

to evade the countervailing duty by any scheme of any kind or any trick of phraseology, and certainly not by a scheme so obvious as the one I have indicated. I think if there are to be countervailing duties at all they ought to be made effective countervailing duties. In paragraph 330 prohibition ought to be mentioned as one of the grounds for the countervailing duty, and in paragraph 651 the countervailing duties ought to apply to all articles and not to one; they ought to apply to all articles of this kind that are exported from Canada; not be confined alone to an article which is in only a small amount exported from Canada, which is an article of very high price and which, think, ought not to be on the free list at all; but that is another question.

Mr. President, I have drawn up no amendment on the subject

and I do not mean to offer one at this time, but I hope the committee will take these points into consideration. I have not

made these criticisms with any view of delaying the Senate, but in perfect good faith for the consideration of the committee, and I think they deserve consideration if the policy of countervailing duties, which both Houses have adopted, is to be carried out effectively.

Mr. WEEKS. Mr. President, I do not wish to delay the proceedings unduly, but this is a very important question from the standpoint of New England, and I desire to supplement somewhat the observations which have been made by my colleague [Mr. Lodge] on this question, especially as to other features

than those on which he has dwelt.

There are really three questions involved in this legislationfirst, whether it is wise or unwise to entirely remove the duty on paper selling for less than 21 cents a pound; second, whether the countervailing duties proposed in this bill sufficiently protect the paper makers of this country; and third, whether we are opening a channel by which a large proportion of the raw material of this country will eventually be manufactured in Canada rather than in the United States. It is those questions to which I particularly wish to address myself.

It is a very complicated proposition from the standpoint of Canada, because the Canadian Government may regulate what shall be done so far as her imports into Canada are concerned, but she can not regulate what shall be done by the Provinces of Canada with their own products; and it will be noted that the action which has been taken by the different Provinces is local action, applying to the products of the Province itself, with which Canada, as a distinct Government, has nothing whatever to do, as I understand.

The paragraph comes from the Committee on Finance just as it passed the House. It provides, among other things, that news print paper "valued at not more than 21 cents per pound' shall be free from duty. But it also provides for more than

that.

To pass the tariff bill with this paragraph unamended will be an act of the rankest injustice. We should not lose sight of the fact that the provincial governments of Canada are placing more and more restrictions every day on the manufactured products of the Canadian forests. We can not object to what the Canadian Provinces do for their own people, but I most emphatically protest against any legislation enacted by Congress that will be the means of enriching Canada at the expense of the United States. The real effect of this para-graph as it now stands is that it turns over to Canada the raw products of our rich and great forests for the purpose of manufacture. If the bill becomes a law with this paragraph unamended, along with many others in like circumstances, its title should be changed so as to read: "An act to ruin Ameri-can industries, and for other purposes." No other interpretation can be given it.

The pulp and paper mill industry is of great proportions in New England. Maine is a factor in this valuable industry. The entire country is benefited by its present enormous growth. In the State of Maine alone some \$40,000,000 of capital is invested in more than two score of plants. Thousands of men are employed and the benefits to the State and Nation in labor,

freight, and many other channels are enormous.

Northern Maine contains millions of acres of unbroken forests. This virgin territory slopes toward and is drained by the St. John River. A conservative estimate places in that territory about 50,000,000 cords of pulp wood. This would produce 2,000 tons of news print paper each day for many generations to come. On the other side of the St. John River, in Canada, plans are now being promulgated for the construction of great paper mills. And thus we see what the effect will be if we pass this paragraph in an unamended form. It would be simply the delivery of 4,000,000 acres of Maine forests to the paper companies along the St. John on the other side of the border, the placing of a great store of raw material for manufacturing into the finished product to the profit of foreign markets, and the loss of a great American industry to the gain of a foreign nation for all time. To allow the paragraph to pass in its present form will also retard the great development of our natural resources in that section of the country. The great strides in the development of water power for manufacturing purposes now so general will cease. In other words, it means that the Congress of the United States grants to Canada what it refuses to give to the people of its own countryan opportunity to continue in business

In 1908 a select committee of the House of Representatives was appointed to conduct investigations concerning pulp, pulp wood, and paper. That committee made an exhaustive investigation under the leadership of Hon. James R. Mann. That report, among other things recommended, pointed out the importance to our country of utilizing the Canadian forests of

The proposed paragraph in its unamended form casts aside this recommendation, together with our own forests thrown in for Canada's benefit

The Mann report recommends:

The Mann report recommends:

That in the long run it will be mutually profitable, both to the publishers and other users of cheap paper in the United States, to the mills producing print paper, to the owners of American spruce forests, to the owners of the Canadian spruce forests, and to the mutual good feeling and respect of our two countries if a considerable reduction be made in the tariff on the cheaper grades of print paper, dependent, however, upon receiving from Canada (so far as the supply comes from her) the removal of all discriminations now existing in that country or its Provinces against the exportation of pulp wood into the United States and the prevention of future discriminations in the exportation of either ground wood or paper.

Mr. collegeme LMr. I special has pointed out in what way this

My colleague [Mr. Lodge] has pointed out in what way this

will be prevented if the bill passes unamended.
We must not lose sight of the fact that the Mann committee recommended a revision of the then existing tariff-the Dingley law-to the following schedule: One-tenth of 1 cent a pound on paper valued at not over 24 cents a pound, and two-tenths of 1 cent a pound on paper valued above 24 cents a pound and not above 2½ cents a pound. This was a reduction on ordinary news print paper from \$6 a ton to \$2 per ton. Then the Mann report

The retention of a duty of one-tenth of I cent per pound, as suggested, is justified both on the principles of a tariff for revenue and a tariff for protection. It is not desirable to strike down or injure the present paper mills in the United States. To do so would not only be very expensive to the present paper-mill owners and employees, but would probably in the future enhance the cost and price of paper. The duty proposed is about equal to the additional cost of labor in the United States and the additional cost of materials used by the paper mills caused by other tariff provisions.

Contrasting the recommendation of the Mann committee made after a thorough study of conditions both in the United States and Canada with the paragraph now under consideration, we find that American industries as well as American labor were never lost sight of by the investigators, while the present tariff bill as it passed the House has discarded all rights of both industry and labor.

Protests were made by paper manufacturers before the different committees of the House at hearings in 1911, 1912, and this year. I have here a protest from the president-secretary of the International Brotherhood of Pulp, Sulphite, and Paper Mill Workers, comprising all the mill workers in the United States and Canada, which I wish inserted in my remarks at this point.

The PRESIDING OFFICER. In the absence of objection,

that order will be made

The matter referred to is as follows:

INTERNATIONAL BROTHERHOOD PULP, SULPHITE, AND PAPER MILL WORKERS OF THE UNITED STATES AND CANADA, Fort Edicard, N. Y., May 31, 1913.

PAPER MILL WORKERS OF THE UNITED STATES AND CANADA,

Port Edward, N. Y., May 31, 1913.

Hon. John W. Weeks,

Washington, D. C.

Honorable Sia: I note in the daily press the fact that there is considerable said in regard to the cotton, woolen, and sugar schedule of the Underwood bill; in no case have I read of the paper schedule. On this subject I desire to say that if a reduction in tariff on news print paper was going to benefit the 95,000,000 people of the United States in general then, perhaps, a revision would be for the general good; but the Nation can not benefit by the removal of duty on this article in any way, shape, or manner. If there is anyone to be benefited by this bill, in so far as it affects paper, it is solely, simply, and only newspaper publishers, and they, perhaps, will charge the consumer as much for a paper under the removal of duty as they now charge for a copy. Since the reciprocity bill became a law some of the publishers have increased the price of their publications.

Why paper costing 2½ cents a pound is permitted to come in free of duty, while a duty is still retained on paper costing more than that amount, is more than I can understand, and, as stated in a previous communication, is discriminating class legislation, pure and simple, which is bound to affect the American workmen as regards their hours and wages. There never has been a question as to the necessity for a duty on other grades of paper than that costing 24 cents a pound or less. Knowing that duty is necessary on the most expensive papers made in order to protect the industry convinces us of the discrimination which the Underwood bill carries with it by permitting the free entry of paper and pulp from Canada and other foreign countries and in not making provision for the raw material, especially the wood in certain Provinces of Canada. This country is not entirely dependent on Canada for wood, as you know, but Canada certainly must depend on this country for a market for the finished product.

The men who are members of

our Canadian neighbors the products of the Maine forests at

John H. Malin, President-Secretary. Mr. WEEKS. The paragraph unamended will turn over to

the very time the Provinces of Canada are legislating more and more by way of restrictions that compel the manufacture within the Dominion into finished products the products of her forests. It is a discrimination against New England, but even this failed to make any impression upon the House. The Mann committee did not overlook that discrimination.

I have here copies of the different acts that have been passed by the different Provinces of Canada applying to this subject. I should like to have such of those as are not included in the remarks made by my colleague [Mr. Longe] included in my remarks

The PRESIDING OFFICER. There being no objection, that order will be made.

The matter referred to is as follows:

EXHIBIT A. ONTARIO.

[Order of lieutenant governor in council, Sept. 16, 1897.]

[Order of Heutenant governor in council, Sept. 16, 1897.]

Section 1. No timber licensee or holder of a permit engaged in cutting, taking, or removing saw logs or timber upon or from the lands of the Crown, or driving, floating, or towing the same in Canadian waters, and no other person, firm, or company engaged in or about any such work under the authority or with the assent of such licensee or holder of a permit, shall employ or engage, or permit to be employed or engaged, in any capacity whatever in and about or in connection with such cutting, removing, driving, floating, or towing in Canadian waters, any person who is not a resident of and domiciled in Canada, excepting the following persons, viz: The agent or manager having charge or supervision of the entire lumbering operation carried on by any person, firm, or company within the Province of Ontario, the head bookkeeper or accountant under such agent or manager, and one estimator or explorer, unless under special permission of the commissioner of Crown lands expressed in writing.

Sec. 4. All horses, cattle, sleighs, and all provisions, pork, flour, tea, and all tools and hardware, such as chains, axes, saws, and all other tools, supplies, or material of any kind whatsoeyer required or used in connection with the taking out of saw logs or timber cut upon Crown lands shall be purchased in Canada.

EXHIBIT B. ONTARIO.

[63 Vict., ch. 11, Apr. 30, 1900.]

(1) All sales of timber limits or berths by the commissioner of Crown lands which shall hereafter be made and which shall convey the right to cut and remove spruce or other soft-wood trees or timber other than pine, suitable for manufacturing pulp or paper, and all licenses or permits to cut such timber on the limits and berths so sold, and all agreements entered into or other authority conferred by the said commissioner by virtue of which such timber may be cut upon lands of the Crown, shall so be made, issued, or granted subject to the condition set out in the first regulation of Schedule A of this act, and it shall be sufficient if such condition be cited as "the manufacturing condition" in all notices, licenses, permits, agreements, or other writing.

Schedule A.

Schedule A.

(1) Every license or permit conferring authority to cut spruce or other soft-wood trees or timber, not being pine, salitable for manufacturing pulp or paper, on the ungranted lands of the Crown, or to cut such timber reserved to the Crown on lands leased or otherwise disposed of by the Crown, which shall be issued on and after the 30th day of April, 1900, shall contain and be subject to the condition that cli such timber cut under the authority or permission of such license or permit shall, except as hereinafter provided, be manufactured in Canada; that is to say, into merchantable pulp or paper, or into sawn lumber, woodenware, utensils, or other articles of commerce or merchandise, as distinguished from the said spruce or other timber in its raw or unmanufactured state; and such condition shall be kept and observed by the holder or holders of any such license or permit who shall cut or cause to be cut spruce or other soft-wood trees or timber, not being pine, suitable for manufacturing pulp or paper, under the authority thereof, and all such wood trees or timber, cut into logs or lengths or otherwise, shall be manufactured in Canada as aforesaid. It is hereby declared that the cutting of spruce or other soft-wood trees or otherwise, shall be manufactured in Canada as aforesaid. It is hereby declared that the cutting of spruce or other soft-wood trees or timber, not being pine, suitable for manufacturing pulp or paper into cordwood or other lengths, is not manufacturing the same within the meaning of this regulation. Schedule A.

EXHIBIT C.

[A. Campbell Reddie, deputy clerk executive council.]

Certified copy of a report of a committee of the honorable the executive council, approved by his honor the lieutenant governor, on the 12th day of July, A. D. 1912.

To his honor the LIEUTENANT GOVERNOR IN COUNCIL:

To his honor the Lieutenant Governor in Council:

On a memorandum from the honorable the minister of lands, which has been accepted and approved by council, it is ordered that, notwithstanding anything contained in the following pulp leases granted by His Majesty the King, therein represented by the honorable the chief commissioner of lands for the Province of British Columbia, on the 9th day of January, 1907, demising the following lands in the Province of British Columbia, that is to say:

Lease No. 2: Lots 148 to 155, inclusive; lots 160 to 160A, inclusive; lots 162 to 167, inclusive; all in range 1, coast district. Lots 104 to 122, inclusive; lots 124 to 151, inclusive; lots 153 to 154, inclusive; all in range 2, coast district;

Lease No. 5: Lot 493, range 1, coast district;
or any other prohibition or restriction whether by law, order, regulation, or contractual relation, directly or indirectly, obtaining in the premises, all pulp wood which has been or shall be cut on the lands described in the sald leases, or the papers, board, or wood pulp manufactured from the wood cut on said lands may be exported free of any export duty, export license fee, or other export charge of any kind whatsoever, or any prohibition or restriction in any wise relating to such exportation.

And that a certified copy of this minute, if approved, be forwarded E. V. Bodwell, Esq., solicitor, Victoria.
Dated this 11th day of July, A. D. 1912.

WM. R. Rose, Minister of Lands.

Approved this 12th day of July, A. D. 1912.

RICHARD McBride,

Presiding Member of the Executive Council.

EXHIBIT D. ORDER.

EXECUTIVE COUNCIL CHAMBER, Quebec, December 31, 1912.

Present: The lieutenant governor in council.
